

Section 8. The Council requests that City Light include with its next strategic plan update a report that identifies the impacts on existing customer rate classes of establishing a single rate class while preserving the existing low income discount program for low income customers. The report should identify any legal, technical, or practical issues with establishing such a single class structure, especially as it relates to City Light's franchise agreements with neighboring jurisdictions. The report should include an analysis of the economic and employment impacts to Seattle and the region.
