Payment for Schedule B permit renewals, where allowed, which is received more than 30 calendar days but fewer than 91 calendar days past the permit expiration date shall be equal to 1.25 times the renewal fee. The renewal permit will be valid for only one year from the expiration date of the prior permit. Permits for which no renewal payment has been received within 90 calendar days following the permit expiration date will be cancelled. Permits that have been cancelled may be reinstated, effective from the expiration date, if the permit holder pays a late penalty of 1.5 times the fee for an original permit within 180 days of the expiration date. Thereafter, any person whose permit has been cancelled shall not be allowed to reinstate the cancelled permit, but shall be required to submit a new permit application and pay a late penalty of 1.5 times the fee for an original permit. ^c Fireworks Permits. An application for a fireworks permit shall be made in writing to the fire code official at least 30 calendar days in advance of the display. At the time the permit application is submitted, the fire code official shall be consulted regarding requirements for standby fire apparatus.

1 C. The fees for the following special hazards permits are established in Schedule C. See
2 Table C for 22.602.045.

3 Special Hazards Permits

4 Fees for special hazards permits are established in Schedule C (See Table C for
5 22.602.045). In some cases these fees are based on the quantity of hazardous material stored
6 and/or handled at the site and the relative risk posed by each material.

7 1. Definitions:

a. "Quantity Range Number," as established in the Quantity Range Table below, is a number between 1 and 2 that is assigned to a hazard category based upon the amount of hazardous material located at the site.

QUANTITY RANGE TABLE

| QUANTITY RANGE NUMBER | SOLIDS (Pounds) | LIQUIDS (Gallons) | GASES (Cubic Feet) |
|------------------------------|------------------------|--------------------------|---------------------------|
| 1 | 0—550 | 0—55 | 0—1,000 |
| 1.25 | >550—5,500 | >55—550 | >1,000—5,000 |
| 1.5 | >5,500—27,500 | >550—2,750 | >5,000—50,000 |
| 1.75 | >27,500—55,000 | >2,750—5,500 | >50,000—100,000 |
| 2 | >55,000 | >5,500 | >100,000 |

b. "Assigned Risk Factor," as established below, is a number between 1 and 1.5 assigned to each hazard class and category of hazardous material indicating the relative hazard posed by materials in that hazard category and the potential nature of controls required by the Fire Code.

| Hazard Class | Assigned Risk Factor | Hazard Class | Assigned Risk Factor |
|----------------------------|-----------------------------|-------------------------------|-----------------------------|
| Aerosol products | 1.3 | Organic peroxides | |
| Cellulose nitrate | 1.3 | Unclassified | 1.5 |
| Combustible fiber | 1.2 | Class I | 1.4 |
| | | Class II | 1.3 |
| Combustible liquids | | Class III | 1.2 |
| Class II | 1.2 | Class IV | 1.0 |
| Class III-A | 1.1 | | |
| Class III-B | 1.0 | | |
| | | Compressed gases | Oxidizers |
| Highly toxic | 1.5 | Class 4 | 1.5 |
| Pyrophoric | 1.4 | Class 3 | 1.4 |
| Flammable | 1.4 | Class 2 | 1.2 |
| Unstable | 1.4 | Class 1 | 1.1 |
| Oxidizing | 1.4 | Pyrophoric liquids and solids | 1.3 |

| Hazard Class | Assigned Risk Factor | Hazard Class | Assigned Risk Factor |
|---------------------------------|----------------------|---|----------------------|
| Toxic | 1.3 | Toxic liquids and solids | 1.2 |
| Corrosive | 1.3 | Unstable (reactive) liquids and solids | |
| Corrosive Liquids and Solids | 1.1 | Class 4 | 1.5 |
| Cryogenic Fluids | 1.3 | Class 3 | 1.4 |
| Explosives | 1.5 | Class 2 | 1.3 |
| Fireworks | 1.4 | Class 1 | 1.0 |
| Flammable liquids, Class I | 1.4 | Water-reactive materials | |
| Flammable solids | 1.3 | Class 3 | 1.5 |
| Highly toxic liquids and solids | 1.5 | Class 2 | 1.3 |
| Magnesium | 1.3 | Class 1 | 1.0 |

1 c. "Fixed permit cost" is the minimum cost for the Seattle Fire Department to
 2 issue a hazardous material permit. The fixed permit cost is (~~(\$255)~~) \$288.

3 d. "Base permit fee" is determined by multiplying the sum of the products of the
 4 quantity range number and assigned risk factor for each hazard class by the fixed permit cost and
 5 is represented by the following equation:

$$\text{Base permit fee} = [\Sigma (Q_1)(R_1) + (Q_2)(R_2) \dots] [F]$$

7 Where: Q = The quantity range number.

8 R = The assigned risk factor.

9 F = The fixed permit cost of (~~(\$255)~~) \$288.

10 When an individual material has multiple hazards, only the hazard presented by the
 11 hazard class that has been assigned the highest risk factor shall be considered in the fee
 12 calculation.

13 Example:

1 XYZ Company stores 50 gallons of gasoline and 200 gallons of 50% nitric acid.
 2 Gasoline is classified as a Class I flammable liquid, which has an assigned risk factor of 1.4.
 3 Nitric acid (50%) is classified as both a corrosive liquid and a Class 2 oxidizer. Because 50%
 4 nitric acid presents two separate hazards (corrosive and Class 2 oxidizer) only the Class 2
 5 oxidizer hazard is considered in the fee calculation because it has an assigned risk factor of 1.2
 6 compared to the 1.1 risk factor assigned to corrosives.

7 Base permit fee = [(1)(1.4)_{flammable} + (1.25)(1.2)_{Class 2 oxidizer}] [((~~\$255~~)) \$288]

8 Base permit fee = ((~~\$739.50~~)) \$835.20

² This temporary permit is valid for six months and is issued to a facility placed under a long-term compliance plan while the facility works towards full compliance with the Code. The fee is calculated to be half of the annual permit fee of the annual permit that will be issued to the facility once compliance is achieved. This permit cannot be renewed but additional 1070 permits can be issued as needed to cover the entire compliance plan period.

³ This permit is valid for 24 months and is renewed on a biannual basis.

~~((Schedule C flat fee permits which had been grandfathered at below market rate permit fees under prior fee schedules will increase 25 percent annually until such time as they reach parity with renewal rates identified in the current Schedule C.))~~

14 L. Fees for certification examinations are established in Schedule L. Each examination
 15 fee listed under Schedule L includes one test and one opportunity to retake the test under the
 16 following “re-test” conditions: the person taking the examination does not pass the examination
 17 the first time and the “re-test” occurs within 90 calendar days of the original test. Upon
 18 successfully passing a certification examination, and upon providing evidence of current State of
 19 Washington certification if required by State law for that certification type, the person who took

1 the test will be certified by The City of Seattle for that certification type for one year. The
 2 certification may be renewed for two subsequent years at no cost to the licensee. The licensee
 3 will, however, need to demonstrate continued competence and continue to comply with State
 4 regulations where applicable as a condition of certification renewal. The renewal of the license
 5 will be denied if the Seattle Fire Department becomes informed and verifies that the licensee no
