

## MEMORANDUM

TO: Peter Lindsay, City Council Central Staff

FROM: Theresa Wagner, Senior Assistant City Attorney, Seattle City Attorney's Office

SUBJECT: Proposed Amendments to Council Bill 118465

DATE: September 1, 2015

This memorandum documents proposed amendments to Council Bill 118465. The proposed amendments are typographical and are shown below in two ways: in summary form and in double strike through and double underlined language:

### Summary:

1. Section 29 - SMC 22.802.030 – Two subsections are lettered “B.” Change the second subsection “B” to “C” to read: “C. Permissible Discharges to Sanitary Sewers. ...”
2. Section 29 - SMC 22.802.030 – Change the subsection now numbered “C” to “D” to read: “D. Permissible Discharges to Public Combined Sewers. ...”
3. Section 40 - SMC 22.805.070.D.3 – In chart heading, change “Capacity Constrained” to “Capacity-constrained”
4. Section 40 - SMC 22.805.070.D.4 – In chart heading, change “Capacity Constrained” to “Capacity-constrained”
5. Section 40 - SMC 22.805.070.D.5 – In chart heading, change “Capacity Constrained” to “Capacity-constrained”
6. Section 40 - SMC 22.805.070.E.4.c – Change “rchaeological ...” to “Archaeological ...”
7. Section 40 - SMC 22.805.070.E.4.h – Change “h.Archaeological ...” to “h. Archaeological ...”
8. Section 42 – SMC 22.805.090.B.6 – Change “impervious” to “hard” so that B.6 reads, “6. Discharges to Groundwater. Direct discharge of untreated drainage water from pollution-generating ~~impervious~~ hard surfaces to (~~(ground water)~~) groundwater is prohibited.” Explanation: Ecology required Seattle to make a similar change in many sections; this one was missed.

### Double strike through and double underlined language:

Amend Section 29 – SMC 22.802.030, in which two subsections are lettered “B” – by changing the second subsection “B” to “C” to read: “C. Permissible Discharges to Sanitary Sewers. ...” and changing the following subsection from “C” to “D” to read: “D. Permissible Discharges to Public Combined Sewers. ...”

Amend Section 40 - SMC 22.805.070.D.3, 4 & 5 – in table row headings by adding a hyphen between “Capacity Constrained” and correcting capitalization accordingly to read “Capacity-constrained.” For example, for SMC 22.805.070.D.3:

3. For trail and sidewalk projects, Table B for 22.805.070 applies.

<u>Table B for 22.805.070</u>				
<u>On-site List for Trail and Sidewalk Projects</u>				
<u>Category</u>	<u>BMPs</u>	<u>Projects Discharging to a Receiving Water Not Designated by Section 22.801.050, or its Basin</u>	<u>Projects Discharging to a Public Combined Sewer or Capacity - Constrained System,<sup>c</sup> or its Basin</u>	<u>Projects Discharging to a Designated Receiving Water, or its Basin</u>

Amend Section 40, SMC 22.805.070.E.4.c – by adding an “A” before “rchaeological” to read “Archaeological”

Amend Section 40, SMC 22.805.070.E.4.h – by increasing the spacing after “h.” to read, “h. Archaeological ....”

Amend Section 42, SMC 22.805.090.B.6 – by adding an additional revision consisting of deleting the word “impervious” and inserting the word “hard” to read:

“6. Discharges to Groundwater. Direct discharge of untreated drainage water from pollution-generating ((~~impervious~~) hard surfaces to ((~~ground-water~~) groundwater is prohibited.”
