

Code Reviser’s Statement on Code Adoption

A physical book copy of the 2021 International Fire Code will be filed prior to adoption to comply with RCW 35.21.180. The online version may be found at <https://codes.iccsafe.org/content/IFC2021P2>.

The adopted book should be the same printing linked to above; however, sometimes the final printed versions from the International Code Council are later printings than what are given to Seattle to produce its codes. Every effort has been made to update the initial file to the latest printing. In the event of a discrepancy in unamended code language, the filed book will control.
