- 5. Any development proposal, regardless of size or site characteristics, is subject to the administrative design review process according to Section 23.41.016 if it receives public funding or an allocation of federal low-income housing tax credits, and is subject to a regulatory agreement, covenant, or other legal instrument recorded on the property title and enforceable by The City of Seattle, Washington State Housing Finance Commission, State of Washington, King County, U.S. Department of Housing and Urban Development, or other similar entity as approved by the Director of Housing, which restricts at least 40 percent of the units to occupancy by households earning no greater than 60 percent of median income, and controls the rents that may be charged, for a minimum period of 40 years.
- 6. Any development proposal that is located in a Master Planned Community zone and that includes a request for departures, regardless of size or site characteristics, is subject to full design review according to Section 23.41.014. If a development proposal in a Master Planned Community zone does not include a request for departures, the applicable design review procedures are in Section 23.41.020. A development proposal in a Master Planned Community zone, which includes a request for departures and provides affordable housing per subsection 23.41.004.A.5, shall be subject to administrative design review according to Section 23.41.016.

 - a. External architectural details with no living area, such as chimneys,
- eaves, cornices, and columns, may project no more than 18 inches into any required yard;
- b. Bay windows are limited to 8 feet in width and may project no more than 2 feet into a required front, rear, and street side yard;
- c. Other projections that include interior space, such as garden windows, may extend no more than 18 inches into any required yard, starting a minimum of 30 inches above finished floor, and with maximum dimensions of 6 feet in height and 8 feet in width;
- d. The combined area of features permitted by subsections 23.44.014.C.6.b and 23.44.014.C.6.c may comprise no more than 30 percent of the area of the facade.
- 7. ((Unenclosed)) Covered, unenclosed decks and roofs over patios.

 ((Unenclosed)) Covered, unenclosed decks and roofs over patios, if attached to a principal structure, ((or a detached accessory dwelling unit,)) may extend into the required rear yard, but shall not be within 12 feet of the centerline of any alley, or within 5 feet of any rear lot line that is not an alley lot line, or closer to any side lot line in the required rear yard than the side yard requirement of the principal structure along that side, or closer than 5 feet to any accessory structure. The height of the roof over unenclosed decks and patios shall not exceed 12 feet above

1 1. An application for special accommodation must demonstrate to the 2 satisfaction of the Director: 3 a. That the needs of the residents of the domestic violence shelter make it necessary for the residents to live together in a group of the size proposed; and 4 5 b. That adverse impacts on the neighborhood from the increased density will be mitigated. 6 7 2. The Director shall take into account the size, shape and location of the 8 dwelling unit and lot, the traffic and parking conditions on adjoining and neighboring streets, 9 the vehicle usage to be expected from residents, staff and visitors, and any other circumstances 10 the Director determines to be relevant as to whether the proposed increase in density will 11 adversely impact the neighborhood. 3. An applicant shall modify the proposal as needed to mitigate any adverse 12 impacts identified by the Director or the Director shall deny the request for special 13 14 accommodation. 15 4. A grant of special accommodation permits a dwelling to be inhabited only 16 according to the terms and conditions of the applicant's proposal and the Director's decision. If 17 circumstances materially change or the number of residents increases, or if adverse impacts 18 occur that were not adequately mitigated, the Director shall revoke the grant of special 19 accommodation and require the number of people in the dwelling to be reduced to eight unless 20 a new grant of special accommodation is issued for a modified proposal. 21 5. A decision to grant special accommodation is a Type 1 Master Use Permit 22 decision (See Chapter 23.76) that shall be recorded with the King County Division of Records 23 and Elections.

B. The Director may grant reasonable accommodation to individuals who are handicapped within the meaning of 42 U.S.C. 3602, in order for them to live in a household of more than eight (8) persons, according to the following:

1. An applicant for reasonable accommodation must demonstrate to the satisfaction of the Director that the handicap of the proposed residents makes it necessary for them to live in a household of the size proposed in order to have equal opportunity to use and enjoy a dwelling.

2. The Director shall determine what adverse land use impacts, including cumulative impacts, if any, would result from granting the proposed accommodation. The Director shall take into account the size, shape and location of the dwelling unit and lot; the traffic and parking conditions on adjoining and neighboring streets; vehicle usage to be expected from residents, staff and visitors; and any other circumstances the Director determines to be relevant.

3. The Director shall consider the applicant's need for accommodation in light of the anticipated land use impacts, and the Director may impose conditions in order to make the accommodation reasonable in light of those impacts.

4. A grant of reasonable accommodation permits a dwelling to be inhabited only according to the terms and conditions of the applicant's proposal and the Director's decision. If the Director determines that the accommodation has become unreasonable because circumstances have changed or adverse land use impacts have occurred that were not anticipated, the Director shall rescind or modify the decision to grant reasonable accommodation.

Code, if work requiring a permit is performed on the structure or has previously been performed
without a permit. To allow the conversion of an existing accessory structure, the Director may
allow an exception to one or more of the development standards for accessory dwelling units
contained in standards a through f, and h through k, listed in Table A for 23.44.041. ((, provided
the conversion does not increase the structure's nonconformity with the standard.)) These
exceptions also apply to any additions to an existing accessory structure. An existing accessory
structure may be converted if the applicant can demonstrate that the accessory structure existed
prior to December 31, 2017, as an accessory structure. If an accessory structure existing prior to
December 31, 2017, was replaced to the same configuration in accordance with the standards of
Section 23.42.112, then the replacement structure also qualifies for conversion under this
subsection 23.44.041.C.2. For purposes of this subsection 23.44.041.C.2, the term "conversion"
means either keeping the accessory structure intact or removing and rebuilding the accessory
structure, provided that any expansion or relocation of the accessory structure complies with the
development standards for detached accessory dwelling units.

14	23.45.529.D, a side facade that is not street-facing includes all vertical surfaces enclosing interior
15	space, including gables and dormers, as shown in Exhibit A for 23.45.529, if located within 10
16	feet of a side lot line.
17	1. If the side facade of a structure that is not street-facing exceeds 1,000 square
18	feet in area, one of the following must be met:
19	a. A portion of the side facade with a minimum area of 250 square feet and
20	a maximum area of 750 square feet shall project or be recessed from abutting facade planes by a
21	minimum depth of 18 inches; or

G. Design standards for townhouse developments

1. Building orientation. Townhouse developments shall maximize the orientation of individual units to the street by complying with one of the following conditions:

a. ((At)) When multiple buildings are located on a lot, at least 50 percent of the townhouse units shall be located so that there is no intervening principal structure between the unit and the street, unless the intervening principal structure was established under permit as of October 31, 2001, or was granted a permit on October 31, 2001, and the permit has not expired; or

b. All townhouse units <u>without a street-facing facade</u> shall have direct access to a common amenity area meeting the requirements of Section 23.45.522 that either abuts the street or is visible and accessible from the street by a clear pedestrian pathway.

2. Pedestrian pathway. A clear pedestrian pathway from the street to the entrance of each townhouse unit shall be provided. The pedestrian pathway may be part of a driveway, provided that the pathway is differentiated from the driveway by pavement color, texture, or similar technique. Signage identifying townhouse unit addresses and the directions to the unit entrance(s) from the street shall be provided.

3. Pedestrian entry. Each townhouse unit with a street-facing facade shall have a pedestrian entry on the street-facing facade that is designed to be a visually prominent feature through the use of covered stoops, porches, or other architectural entry features. For townhouse units on corner lots, a visually prominent pedestrian entry is required on only one of the street-facing facades.

4. Architectural expression. Architectural detail or composition shall be provided to visually identify each individual townhouse unit, as seen from the public street. Design elements such as trim or molding, modulation, massing, color and material variation, or other similar features may be used to achieve visual identification of individual units. Rooftop features, such as dormers or clerestories, or roofline variation may be used to visually identify individual townhouse units.

Section 25. A new Section 23.45.600 is added to the Seattle Municipal Code as follows: 23.45.600 Major Phased Developments in Midrise zones

A. In a Midrise zone, an applicant may seek approval of a Major Phased Development. A Major Phased Development proposal is subject to the provisions of the zone and shall meet the following thresholds:

- 1. Minimum site size of 5 acres, composed of contiguous parcels or parcels divided only by one or more rights-of-way.
- 2. The proposed project at time of application is a single, functionally interrelated campus, contains more than one building, with a minimum total number of 500 dwelling units, and will meet Mandatory Housing Affordability requirements pursuant to Section 23.58C.005 using the performance option on site.

- 3. The first phase of the development consists of at least 100 dwelling units.
- 4. At time of application, the project is consistent with the general character of development anticipated by Land Use Code regulations.
 - 5. The site shall be within 2,640 feet of an existing or planned light rail station.
- B. A Major Phased Development application shall be submitted, evaluated, and approved according to the following:
- 1. The application shall contain a level of detail that is sufficient to reasonably assess anticipated impacts, including those associated with a maximum build-out, within the timeframe requested for Master Use Permit extension.
- 2. A Major Phased Development component shall not be approved unless the Director concludes that anticipated environmental impacts, such as traffic, open space, shadows, construction impacts and air quality, are not significant or can be effectively monitored and conditions imposed to mitigate impacts over the extended life of the permit, or any such impacts have been addressed through the State Environmental Policy Act (SEPA).
- 3. Expiration or renewal of a permit for the first phase of a Major Phased Development is subject to the provisions of Chapter 23.76. The Director shall determine the expiration date of a permit for subsequent phases of the Major Phased Development through the analysis provided for above; such expiration shall be no later than 15 years from the date of issuance.
 - C. Changes to the approved Major Phased Development
- 1. When an amendment to a Master Use Permit with a Major Phased

 Development component is requested, the Director shall determine whether the amendment is minor or not.

	Lofstedt/Graves/Saunders SDCI 2021 Omnibus ORD D6a
1	a. A minor amendment is one that meets the following criteria:
2	1) Substantial compliance with the approved site plan and
3	conditions imposed in the existing Master Use Permit with the Major Phased Development
4	component with no substantial change in the mix of uses and no major departure from the bulk
5	and scale of structures originally proposed; and
6	2) Compliance with applicable requirements of this Title 23 in
7	effect at the time of the original Master Use Permit approval; and
8	3) No significantly greater impact would occur.
9	2. If the Director determines that the amendment is minor, the Director may
10	approve a revised site plan as a Type I decision. The Master Use Permit expiration date of the
11	original approval shall be retained.
12	3. If the Director determines that the amendment is not minor, the applicant may
13	either continue under the existing Major Phased Development approval or may submit a revised
14	Major Phased Development application. The revised application shall be the subject of a Type II
15	decision. Only the portion of the site affected by the revision shall be subject to regulations in
16	effect on the date of the revised Major Phased Development application, notwithstanding any
17	provision of Chapter 23.76. The decision may retain or extend the existing expiration date on the
18	portion of the site affected by the revision.

23.49.181 Bonus floor area for affordable housing in the PSM 85-120 zone

. .

B. Permitting ((Conditions)) conditions

1. Master Use Permit. The Master Use Permit application to establish any bonus floor area under this Section 23.49.181 shall include a calculation of the total amount of bonus floor area sought and shall identify the quantity and type of affordable housing to be provided to satisfy the conditions to such bonus floor area. The application shall include the proposed location of the affordable housing. If any of the affordable housing is proposed to be within the area defined on Map A for Section 23.49.180 where additional height is permitted, the application shall include the location of the affordable housing within that area and its distribution within the proposed building(s). If any of the affordable housing is not to be provided within the area defined on Map A for Section 23.49.180 where additional height is permitted, the application shall include the address, legal description, dimensions and ownership of the other lot(s), and the approval of the Director of Housing for the affordable housing to be provided on the other lot(s), pursuant to subsection 23.49.181.E.3. The Director shall, at the time of issuance of any Master Use Permit decision approving any bonus floor area, issue a Type I decision as to the amount of bonus floor area to be allowed and the conditions to such bonus floor area. A declaration signed by the applicant and any other owners of the lot(s) on which the project using the bonus floor area is to be built and any other owners, or persons with control, of

the lot(s) where the affordable housing will be located, on a form approved by the Director, specifying the amount of bonus floor area, the legal descriptions of the lot where the bonus floor area will be used and each other lot where affordable housing will be located, and the conditions, must be executed and recorded as a condition to issuance of the Master Use Permit for a development to include bonus floor area. If a change in the total bonus floor area to be developed, or a change in the location of the affordable housing approved by the Director of Housing pursuant to subsection 23.49.181.E.3, results in adjustment to one or more conditions, the declaration and any related conditions of the Master Use Permit may be amended, with the written approval of the Director, as a Type I decision. In requesting amendment of a declaration under this subsection 23.49.181.B and any related conditions of the Master Use Permit, the applicant may elect, consistent with subsection ((23.76.026.G)) 23.76.026.E, that the provisions of this Section 23.49.181 as in effect on the date of the Director's action on that request, rather than any earlier date applicable under Section 23.76.026, apply for purposes of the amendment to the Master Use Permit.

23.50.027 Maximum size of nonindustrial use

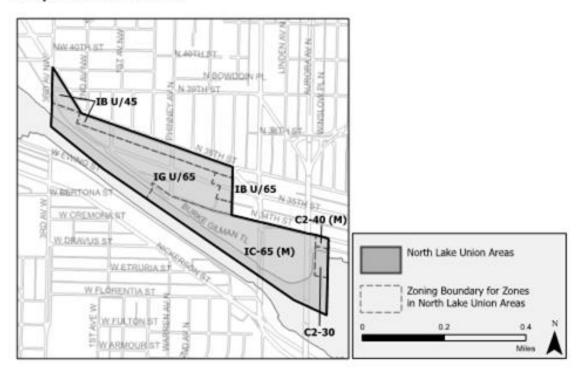

A. Applicability

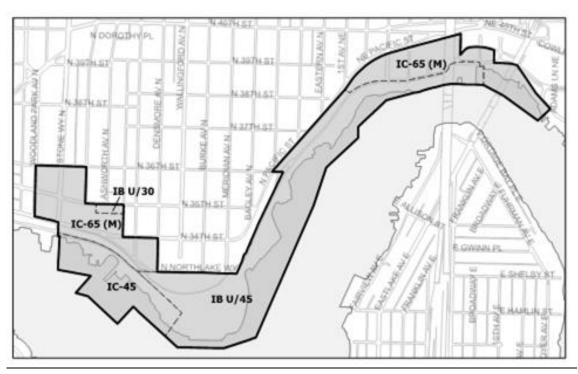

- 1. Except as otherwise provided in this Section 23.50.027, the maximum size of use limits on gross floor area specified in Table A for 23.50.027 apply to principal uses on a lot, and apply separately to the categories of uses. The total gross floor area occupied by uses limited under Table A for 23.50.027 shall not exceed 2.5 times the area of the lot in an IG1, IG2, IB, or IC zone.
- 2. The combined square footage of any one business establishment located on more than one lot is subject to the size limitations on non-industrial uses specified in Table A for 23.50.027.
- 3. The maximum size of use limits in Table A for 23.50.027 do not apply to the North Lake Union area identified in ((Exhibit)) Map A for 23.50.027. In that area no single non-office use listed in Table A for 23.50.027 may exceed 50,000 square feet in size.

²The arrowant of required parking is calculated based on the maximum number of staff, children

²The amount of required parking is calculated based on the maximum number of staff, children, or clients that the center is designed to accommodate on site at any one time.

³ A child care facility, when co-located with an assisted living facility, may count the passenger load/unload space required for the assisted living facility toward its required passenger load/unload spaces.

⁴ When family support centers are located within community centers owned and operated by the Department of Parks and Recreation, the Director may lower the combined parking requirement by up to a maximum of 15 percent, pursuant to subsection 23.54.020.I.

⁵ Indoor gymnasiums are not considered ball courts, nor are they considered auditoria or public assembly rooms unless they contain bleachers (fixed seats). If the gymnasium contains bleachers, the parking requirement for the gymnasium is one parking space for every eight fixed seats. Each 20 inches of width of bleachers is counted as one fixed seat for the purposes of determining parking requirements. If the gymnasium does not contain bleachers and is in a school, there is no parking requirement for the gymnasium. If the gymnasium does not contain

bleachers and is in a community center, the parking requirement is one space for each 350 square feet.

⁶ When a library is permitted in a single-family zone as a conditional use, the Director may modify the parking requirements pursuant to Section 23.44.022; when a library is permitted in a multifamily zone as a conditional use, the Director may modify the parking requirements pursuant to Section 23.45.122; and when a library is permitted in a commercial zone, the Director may modify the parking requirements pursuant to subsection 23.44.022.L.

⁷ For public schools, when an auditorium or other place of assembly is demolished and a new one built in its place, parking requirements are determined based on the new construction. When an existing public school on an existing public school site is remodeled, additional parking is required if any auditorium or other place of assembly is expanded or additional fixed seats are added. Additional parking is required as shown on Table C for 23.54.015 for the increase in floor area or increase in number of seats only. If the parking requirement for the increased area or seating is 10 percent or less than that for the existing auditorium or other place of assembly, then no additional parking is required.

⁸ Development standard departures may be granted or required pursuant to the procedures and criteria set forth in Chapter 23.79 to reduce the required or permitted number of parking spaces. ⁹ The general requirements of lines A through O of Table C for 23.54.015 for general public uses and institutions, and requirements of subsection 23.54.016.B for Major Institution uses, are superseded to the extent that a use, structure, or development qualifies for either a greater or a lesser parking requirement (which may include no requirement) under any other provision. To the extent that a general public use, institution, or Major Institution use fits within more than one line in Table C for 23.54.015, the least of the applicable parking requirements applies. The different parking requirements listed for certain categories of general public uses or institutions shall not be construed to create separate uses for purposes of any requirements related to establishing or changing a use under this Title 23.

¹⁰ The Director, in consultation with the Director of the Seattle Department of Transportation, may allow adult care and child care centers to provide loading and unloading spaces on street, if not prevented by current or planned transportation projects adjacent to their property, when no other alternative exists.

25.09.065 Mitigation standards

A. ((Regulations set out in this Chapter 25.09 are minimum requirements that shall be supplemented by)) All proposed development subject to this Chapter 25.09 is required to document use of mitigation sequencing in this Section 25.09.065 when needed to protect the ecological functions of steep slope erosion hazard areas and their buffers, wetlands, wetland buffers, fish and wildlife habitat conservation areas, and flood-prone areas. B. Mitigation sequencing 1. Mitigation ((below)) measures shall be undertaken in the following order of

- priority:
- a. Avoiding the impact altogether by not taking a certain action or parts of an action;
- b. Minimizing impacts by limiting the degree or magnitude of the action and its implementation by using appropriate technology, best management practices, and/or by taking affirmative steps to avoid or reduce impacts;
- c. Rectifying the impact by repairing, rehabilitating, or restoring the affected environment;
- d. Reducing or eliminating the impact over time by preservation and maintenance operations;
- e. Compensating for the impact by replacing, enhancing, or providing substitute resources or environments; and
- f. Monitoring the impact and the compensation projects undertaken under subsection 25.09.065.B.1.e and taking appropriate corrective measures.

- 2. Priority ((requirements)) mitigation measures. Lower priority measures shall be applied only if ((the)) higher priority measures ((is)) are infeasible or inapplicable.
- 3. Priority for the location of ecological mitigation in relation to compensation required under subsection 25.09.065.B.1.e shall be in the following order and the lower priority restoration location shall be allowed only if the higher priority location is infeasible or the applicant demonstrates that there will be a greater ecological benefit if a lower priority site is used:
 - a. At the site;
 - b. Within the same creek watershed;
 - c. Within Seattle city limits;
 - d. Within the same Watershed Resource Inventory Area.
- 4. If the required mitigation ((undertaken)) under subsection 25.09.065.B.1.e is infeasible, the applicant shall apply for an exception pursuant to Section 25.09.300 to allow the development.
- 5. As part of any application for approval of development that requires mitigation, the applicant shall submit a mitigation plan that meets the standards of subsection 25.09.065.C and a maintenance and monitoring plan that meets the standards of subsection 25.09.065.D unless the applicant demonstrates based on ((competent scientific evidence)) best available science that no impact to the ecological functions of the environmentally critical area or areas will occur as the result of the development or its use, construction, or management. The mitigation plan and the maintenance and monitoring plan must be approved by the Director.
- 6. Mitigation timing. Mitigation shall be completed prior to issuance of the certificate of occupancy. If that has not occurred or if no certificate of occupancy is needed, the

1	2. Buffer width reductions. In Category I, II, and III wetlands the Director may
2	reduce a wetland buffer width by 20 percent if a vegetated corridor at least 100 feet wide is
3	protected between the wetland buffer and any other priority habitats as defined by the
4	Washington Department of Fish and Wildlife. In all circumstances where the remaining buffer is
5	degraded as described in subsection ((25.09.160.B.3)) 25.09.160.B.4, removal of non-native
6	vegetation and planting native trees and vegetation in the degraded portions of the remaining
7	buffer area is required and shall include a five-year monitoring and maintenance plan consistent
8	with the requirements of Section 25.09.065. The corridor must be:
9	a. Legally protected by a conservation easement or equivalent; and
10	b. Undisturbed except for passive recreational walking trails not exceeding
11	five percent of the area of the corridor and made of pervious material.
