HOUSING SEATTLE

An Action Plan to Address Seattle's Affordability Crisis

How might we account for the loss of affordability in the market?

Why are we increasing development capacity?

Development capacity is being added for the purpose of implementing a Mandatory Inclusionary Housing program to create affordable housing.

We are not adding zoning capacity to increase development capacity.

- Development capacity based on an unlimited timeframe in which all available sites across the city are build to their maximum zoning capacity.
- Does not predict market demand, or how fast or where growth will occur over time.
- Does not consider individual property owner decisions about selling or redeveloping land.
- Many properties will not redevelop for over 20 years or more.

How Mandatory Inclusionary Housing (MIH) works

Existing:

- Current zoning allows a new 3 story building.
- No rent-restricted affordable housing is required.

How Mandatory Inclusionary Housing (MIH) works

Proposed MIH Program:

- 10' of additional height and FAR increase allows 1 more story.
- Building is required to provide a percentage of affordable housing. (5% - 8%)

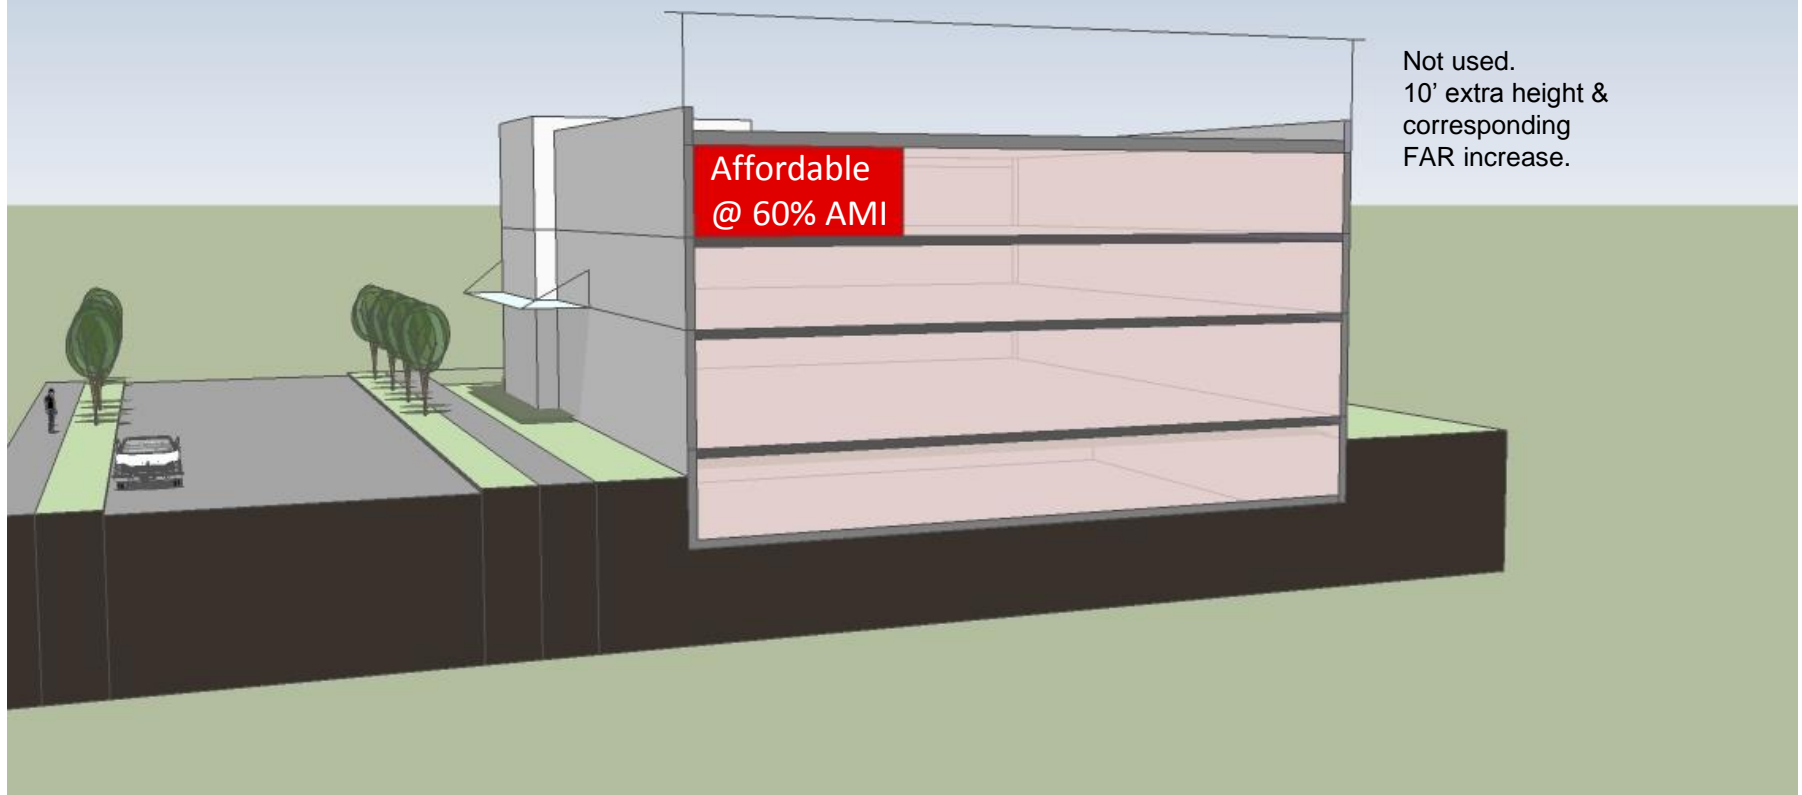

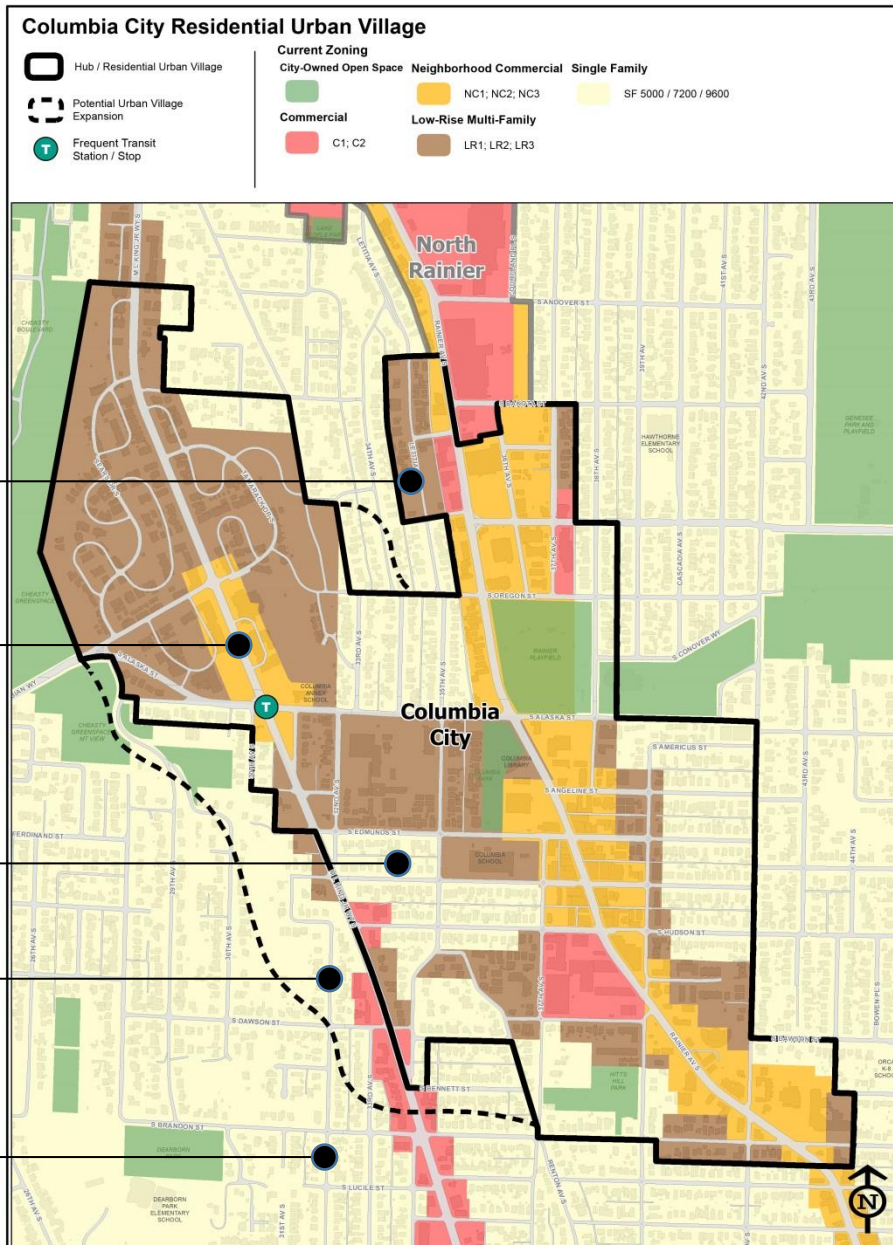

How Mandatory Inclusionary Housing (MIH) works

Proposed MIH Program:

- Even if the new building does not take advantage of additional allowed height or FAR, a required percentage of affordable housing (5% - 8%) is still required.

How Mandatory Inclusionary Housing (MIH) Works: Downtown / SLU

Proposed MIH Program:

- 1,000 sq. ft. of extra floor area is granted (yellow).
- Affordable housing payment or performance is required for all portions of the building.
- Fee will apply regardless of whether the yellow part is built.
- If code or design requirements restrict the yellow, the fee will be adjusted.

Maximum floor plate size is increased to 11,500 sq. ft.

Base height limit (85'*)
