Budget Action description:

This green sheet recommends passage of C.B. 118828 to amend SMC 11.23.440 and establish a formal parklet program in the public space. Parklets are structures that convert on-street parking into publicly-accessible open space.

This legislation is an administrative action to clarify SDOT's permitting authority for parklets in the Seattle Municipal Code. A parklet-specific use code is added to the Street Use Fee Schedule, effective January 1, 2017, in companion legislation introduced as Council Bill 118827.
