Budget Action description:

This budget action imposes the following proviso:

“Of the appropriations in the 2018 budget to Budget Control Levels that would authorize expenditures on fencing areas in response to unauthorized encampments, none of the appropriated money may be spent on fencing areas that have been used for unauthorized encampments on City-owned or controlled property, except under the following circumstances:

- (1) The area is being fenced in response to objective hazards such as moving vehicles, pedestrian obstructions, or steep slopes;
- (2) The area is being fenced to protect a City-or state-owned roadway or other infrastructure;
- (3) The area is being fenced to prevent damage to an environmentally critical area;
- (4) The area is being fenced for imminent City or state work scheduled at the site when an encampment would impede the work; or
- (5) The area is one of ten “Emphasis Areas” as defined by the Department of Finance and Administrative Services Encampment Rule (FAS 17-01).”
