Budget Action description:

This green sheet recommends passage of C.B. 119381, Seattle Center's parking charge ordinance. This C.B. would increase the daily and monthly parking charge ranges at Seattle Center, increase the charge range for short-term premises licensee permits, adjust the service charge amounts for the premium parking program and for parking coupons, and remove outdated code language related to parking programs that are no longer active. The department expects that these parking charge adjustments would increase annual parking revenue by approximately \$268,000.
