Amendment Process

- Generally, amendments will be of two kinds: (1) changes to zone designations on the Official Land Use Map (i.e. rezones) and (2) changes to substantive or procedural standards in the text of the zoning code.
- Proposed amendments must be within the scope of environmental review in the Final Environmental Impact Statement for Citywide Implementation of Mandatory Housing Affordability, as modified by the additional review required by the Hearing Examiner's decision.
- Potential amendments should be identified early in the process to allow time for staff to analyze them and provide the public with an opportunity to comment on them at the public hearing.
