

U Temple Methodist Church

UHeights Safe Lot Proposal

There is great need. It is estimated that a minimum of 2-3 thousand people live in their cars in King County. Nearly 200 died on the streets last year (double four years ago). The Safe Lot would provide a track to get unsheltered into housing.

Clientele

- o Clients will go through a screening process.
- o There would be an initial focus on giving relief to families, women, and UW students facing displacement, followed by working adults.
- o Clients would have to agree to several house rules, including a prohibition on drugs and alcohol, to be allowed in the safe lot.

Security

- The supervisor would case the grounds on a regular basis to ensure only approved clients or their guests are on the lot.
- o This project would *increase* security for UHeights and the surrounding neighborhood by activating an urban block.

Services

- o Operate during the evenings from 8pm-7am in the north parking lot of UHeights.
- o Case Manger (potentially through Urban League or Elizabeth Gregory Home) will provide regular social services to clients, including finding permanent housing, better employment, or accessing other social services.
- o There will be an outdoor bathroom facility and a pop-up kitchen for clients' use.
- o UHeights will work with resident organizations to provide programming specifically meant to serve clients in the safe lot, such as afterschool programs.

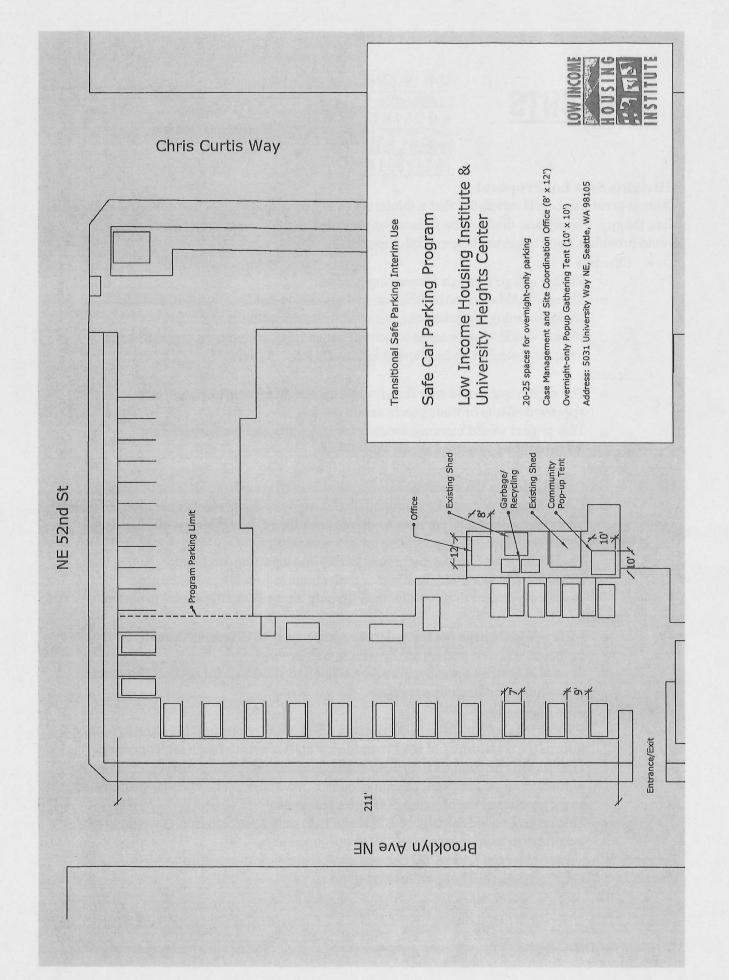

Partners

- LIHI would manage the lot under the sponsorship of U Temple Church. U
 Lutheran will also participate in serving clients.
- Several U District organizations have offered to allow safe lot clients with access to washrooms and similar services.

• Community Engagement

- UHeights is holding several community discussions regarding this issue to both inform the community of vehicle residency and to receive feedback/concerns.
 First forum occurred on 8/8/2019 with Councilmembers Mosqueda and Pacheco participating on the panel. Announcements have been made via e-newsletters and a purchased list of 5,000 U District residents.
- This project would initially be a trial run with only 5 participants. It would grow over time to include more vehicles to 20-30 vehicles.

For more info contact Maureen Ewing, ED at <u>maureen@uheightscenter.org/206-556-2498</u> and Sharon Lee, ED at <u>sharon.lee@lihi.org</u> or 206-571-5730.
