SDOT: Strategic Approach to Vehicle Bridge Maintenance is Warranted

PRESENTATION TO THE TRANSPORTATION & UTILITIES COMMITTEE SEPTEMBER 16, 2020

Key Takeaways

- SDOT's bridge conditions are similar to other cities, but this is not good news
- SDOT meets bridge maintenance expenditure targets, but the amount budgeted is far below what is needed
- Accurate estimates of need and several other issues need to be addressed for SDOT to establish a strategic bridge preservation program

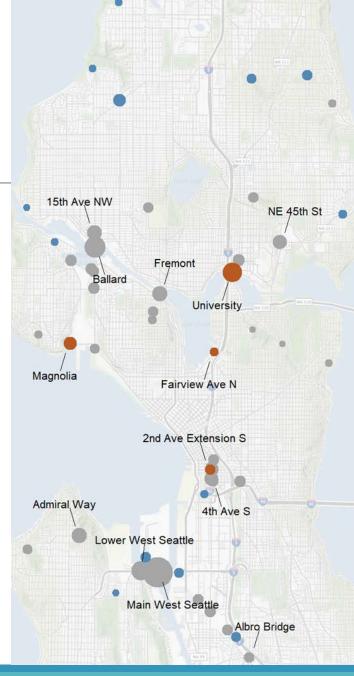

SDOT Bridges

We looked at 77 vehicle bridges that SDOT owns and maintains:

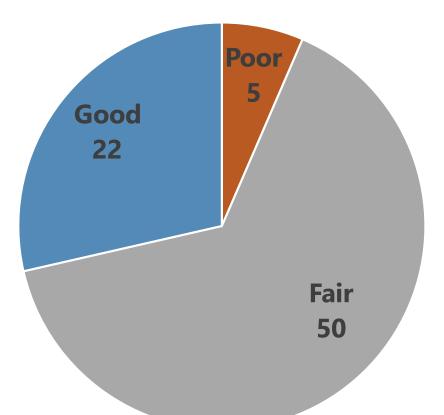

- 22 are in good condition
- 50 are in fair condition
- 5 are in poor condition

The five bridges in poor condition are:

- Fairview Ave N (in the process of being replaced)
- Magnolia
- 2nd Ave S Ext.
- University (counted as two bridges)

Most SDOT Vehicle Bridges are in Fair Condition

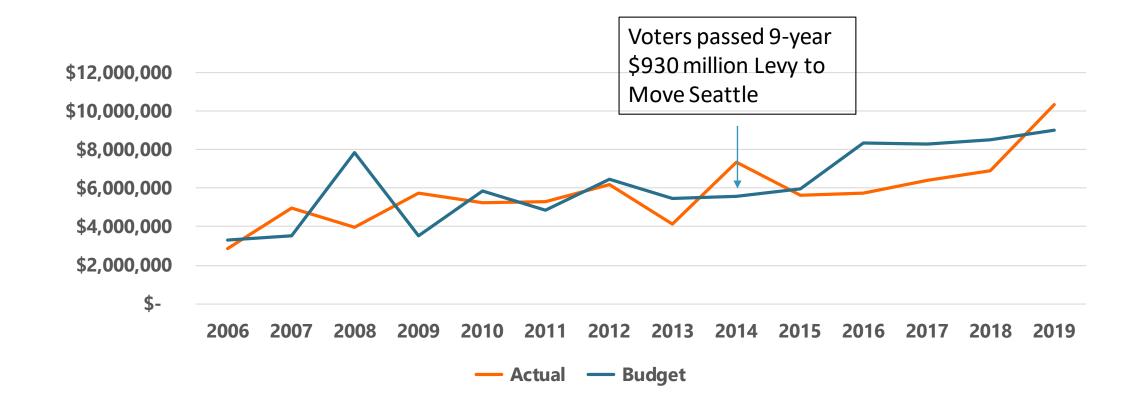

Increased maintenance investments needed to prevent bridges in good or fair condition from deteriorating, especially given the age of many Seattle bridges

SDOT's Bridge Portfolio is Similar to Other Jurisdictions

Chicago (607)	14%	58%	28%	
Pittsburgh (298)	13%	64%	22%	
SDOT (77)	6%	65%	29%	
Minneapolis (316)	5%	65%	30%	
Washington DC (244)	<mark>4%</mark>	71%	25%	
Portland (387)	<mark>3</mark> %	88%	10%	
Poor Good				

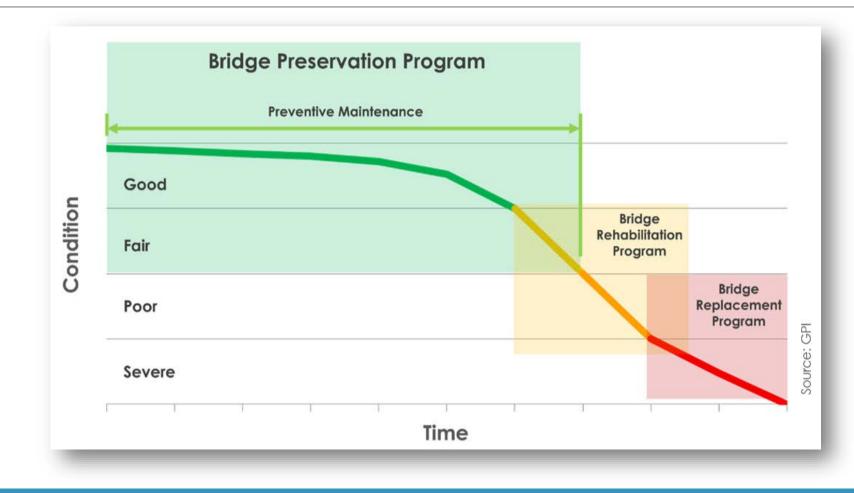

SDOT Spends Most of What it Budgets for Bridge Maintenance

SDOT Estimates More Funding is Needed

- To maintain bridges in a state of good repair, SDOT estimates they should spend 1 to 3 percent of total replacement cost
- In 2018, the replacement value for all SDOT bridges over 60 years old was estimated to be \$3.4 billion
- At 1 percent, that's a minimum of \$34 million per year
- Average annual spending on bridge maintenance for the last 14 years was \$6.6 million

1. Planning Needed to Close the Gap

1. Planning Needed to Close the Gap

Updated estimates of **how long bridges should last** is the foundation of a proactive bridge preservation program.

RECOMMENDATIONS:

Update the estimated useful life of bridges; use the data to plan for maintenance work and lifecycle costs; and close the maintenance funding gap.

2. Address Compliance Risk

SDOT risks being out of compliance with federal regulators

RECOMMENDATION:

Take immediate steps to resolve all the issues identified in the 2019 Federal Highway Administration review.

Internet users may also reach the Office of the Federal Register's home page at: http://www.access.gpo.gov/nara. Background The FHWA bridge inspection program regulations were developed as a result of the Federal-Aid Highway Act of 1968 (Pub L. 90–495, 82 Stat. 815) that required the Sccretary of Transportation to establish NBIS to ensure the safety of the traveling public. The 1968 Federal-Aid Highway Act directed the States to maintain an inventory of Federal-Aid Highway system bridges. The Federal-Aid Highway Act of 1970 (Pub L. 91–605, 84 Stat. 1713) limited the NBIS to bridges on the Federal-Aid Highway Act of 1970 (Pub. L. 95–599, 92 Stat. 2689) extended NBIS requirements to bridges greater than 20 feet on all public roads. The Surface Transportation and Uniform Relocation Assistance Act of 1978 (Pub. L. 95–599, 92 Stat. 2689) extended NBIS requirements to bridges greater than 20 feet on all public roads. The Surface Transportation and Uniform Relocation Assistance Act of 1976 (Pub. L. 00–17, 101 Stat. 132) expanded the scope of bridge inspection procedures for fracture critical members and underwater inspection. The FHWA published an advance notice of proposed rulemaking (ANPRM) on September 26, 2001, (66 FR 49154) to solicit commenters to the ANPRM recommended that the FHWA revise the NBIS regulation. Discussion of Comments Received to the NPIR's of Pronced Rulemaking
	DEPARTMENT OF TRANSPORTATION Federal Highway Administration 23 CFR Part 650 [FHWA Docket No. FHWA-2001-8954] RIN 2125-AE86 National Bridge Inspection Standards AGENCY: Federal Highway Administration (FHWA), DOT. ACTION: Final rule.	
	SUMMARY: The FHWA is revising its regulation on the National Bridge Inspection Standards (NBIS). This action is necessary to address perceived ambiguities in the NBIS that have been identified since the last update to the regulation in 1988. The changes clarify the NBIS language that is vague or ambiguous; reorganizes the NBIS into a more logical sequence; and makes the regulation easier to read and understand, not only by the inspector in the field, but also by those administering the highway bridge inspection programs at the State or	

Federal agency level.

of "rule" in 5 U.S.C. 804(3)(A) because

the Notice of Proposed Rulemaking (NPRM)

3. Hidden Cost of Reimbursable Work

Some SDOT bridge maintenance work is **not** on SDOT bridges.

3. Hidden Cost of Reimbursable Work

1) reduces **amount** of work done on Seattle bridges, and

2) changes **type** of work done on Seattle bridges

RECOMMENDATION:

Reduce reimbursable project workload unrelated to SDOT bridge maintenance.

4. Revise Oversight of Private Bridges

⁷ City of Seattle - Office of City Auditor

4. Revise Oversight of Private Bridges

Historic ordinance from **more than 50 years ago** creates duplicative work and takes 0.5 FTE of SDOT inspection capacity each year.

RECOMMENDATION: SDOT should develop draft legislation to replace Ordinance 96715. . . .

AND THE PARTY IS IN

JMT:FF 5-8-68

AN ORDINANCE relating to the maintenance of certain structures in, along and across the public streets; providing for inspections and payment of inspection fees in connection therewith and prescribing penalties.

ORDINAN

BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. The City Engineer shall annually, or oftener as he shall deem necessary for the protection of the public safety, inspect or cause to be inspected all bridges, trestles, viaducts, tunnels, grade crossings, and other structures which have been or may be constructed or installed in, along, over, or across the public streets of the City pursuant to ordinance granting any franchise or special permit and required by such ordinance to be maintained by the grantee of any such franchise or special permit,

Section 2. The cost of such inspection shall be paid by the grantee of any such franchise or special permit and the City Engineer is hereby authorized to bill for and collect fees in such amounts as are commensurate with the reasonable cost of such inspections.

Key Takeaway Summary and Conclusion

- SDOT's bridge conditions are similar to other cities, but this is not good news
- SDOT meets bridge maintenance expenditure targets, but the amount budgeted is far below what is needed
- Accurate estimates of need and several other issues need to be addressed for SDOT to establish a strategic bridge preservation program

Acknowledgements and Questions

We appreciate SDOT's cooperation and assistance
