CITY OF SEATTLE

ORDINANCE _____

COUNCIL BILL _____

AN ORDINANCE relating to Seattle Public Utilities; amending Sections 21.33.030 and 21.76.040 of the Seattle Municipal Code to adjust drainage rates.

WHEREAS, Seattle City Council Resolution 31760, adopted on November 13, 2017, adopted a 2018-2023

Strategic Business Plan Update for Seattle Public Utilities (SPU), which guides utility investments, service levels, and rate paths through 2023; and

WHEREAS, the Strategic Business Plan Update includes increases in the capital and operating requirements of the Drainage and Wastewater Fund in response to federal and state regulatory requirements, as well as environmental and infrastructure concerns, with a resulting increase in revenue requirements; and

WHEREAS, SPU identified wastewater and drainage infrastructure needs requiring additional capital funding; and

WHEREAS, drainage credits for qualified low-income customers, including those not billed directly by SPU, whose credits are based on typical residential bills, need to be revised to reflect the changes in drainage rates; NOW, THEREFORE,

BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. Subsection 21.33.030.D of the Seattle Municipal Code, which section was last amended by Ordinance 125443, is amended as follows:

21.33.030 Drainage service charges and drainage rates-Schedule-Exemptions

* * *

D. Drainage rates used in the calculation of drainage service charges shall be the sum of the treatment rate and the system rate, as follows:

1. Treatment rate. The “treatment rate” shall be the rate required to pay the drainage share of “treatment cost,” which is the cost of wastewater treatment, interception and disposal service, and any associated costs necessary to meet Drainage and Wastewater Fund policies. The treatment rate shall be the amount obtained when (a) the projected drainage treatment cost for

each rate category is divided by (b) the projected number of billing units in each rate category and the result is multiplied by ((118)) 117 percent to cover the costs of taxes, low income rate assistance, and other allowances. The projected treatment cost shall be the treatment cost anticipated for the upcoming calendar year, which may include an adjustment to reflect the difference, whether positive or negative, between the drainage share of expected total treatment cost for the current year and the total drainage service charge revenues attributable to the treatment rate expected for the current year. The treatment rate is designed to pass through cost changes driven by King County and may be adjusted by ordinance at any time in response to such charges.

2. System rate. The “system rate” shall be the rate required to fund the expense associated with operating, maintaining, and constructing the City’s surface and stormwater management system, including any share of combined sanitary and stormwater system expense assigned to drainage.

3. The rate categories and the corresponding annual drainage rates are as follows:

4. SPU shall provide a ((40)) ten percent reduction in the drainage service charge for parcels containing new or remodeled

commercial buildings that, after July 27, 2003, install and utilize rainwater harvesting systems that meet the performance requirement that the systems are sized to use the amount of rain that falls on the roofs of such buildings during a one-year, 24-hour storm event. A system that involves indoor uses of rainwater must be permitted by Seattle-King County Department of Health to qualify for the rate reduction. A system that relies solely on the capture and indoor use of rainwater shall qualify for the drainage service charge reduction only if the system is sized to meet the performance requirement stated above. Qualifying for the drainage service charge reduction does not relieve the property owner from the obligation to comply with applicable stormwater and drainage code requirements for the buildings and site.

5. Effective November 7, 2008, open space properties or parcels shall be charged only for the area of impervious surface and at the rate under which the parcel is classified using the total parcel acreage.

Section 2. Subsection 21.76.040.A of the Seattle Municipal Code, which section was last amended by Ordinance 125444, is amended as follows:

21.76.040 Rate discounts

1. Wastewater. Certified customers billed directly for Seattle Public Utilities wastewater services will receive a rate discount equal to 0.5 times the total current wastewater volume charge. Certified customers who pay for wastewater services indirectly through rent shall receive the following rate credits based on dwelling type and consistent with Section 21.76.050:

Effective date	Single-family and duplex dwellings	Multifamily dwellings
January 1, 2018	\$28.94 per month	\$20.20 per month

January 1, 2020	\$33.43 per month	\$23.32 per month
January 1, 2021	\$34.96 per month	\$24.39 per month

At the time of a change to the wastewater volume charge described in Section 21.28.040, the Director of Seattle Public Utilities shall calculate new credits for certified customers who pay for wastewater services indirectly through rent. The rate credit for multifamily dwelling customers shall be 0.5 times the wastewater volume charge multiplied by 3.0 CCF, which is typical multifamily sewer billed consumption.
