BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. Subsection 21.33.030.D of the Seattle Municipal Code, which section was last amended by Ordinance 126215, is amended as follows:

21.33.030 Drainage service charges and drainage rates-Schedule-Exemptions

* * *

D. Drainage rates used in the calculation of drainage service charges shall be the sum of the treatment rate and the system rate, as follows:

1. Treatment rate. The "treatment rate" shall be the rate required to pay the drainage share of "treatment cost" which is the cost of wastewater treatment, interception and disposal service, and any associated costs necessary to meet Drainage and Wastewater Fund policies. The treatment rate shall be the amount obtained when (a) the projected drainage treatment cost for each rate category is divided by (b) the projected number of billing units in each rate category and the result is multiplied by ((17.4

percent)) 1.189507 in 2022, 1.190301 in 2023, and 1.190379 in 2024 to cover the costs of taxes, low income rate assistance, and other allowances. The projected treatment cost shall be the treatment cost anticipated for the upcoming calendar year, which may include an adjustment to reflect the difference, whether positive or negative, between the drainage share of expected total treatment cost for the current year and the total drainage service charge revenues attributable to the treatment rate expected for the current year. The treatment rate is designed to pass through cost changes driven by King County and may be adjusted by ordinance at any time in response to such charges.

2. System rate. The “system rate” shall be the rate required to fund the expense associated with operating, maintaining, and constructing the City’s surface and stormwater management system, including any share of combined sanitary and stormwater system expense assigned to drainage.

3. ((The rate categories and the corresponding annual drainage rates)) Annual drainage treatment rates and dates effective are as follows:
