Software Design Engineer II Fall 2005–2013
I work on the Labor Management team that is responsible for writing software and services to help track and manage labor across Amazon.com's warehouses across the world for both Finance and Operations in realtime. My responsibilities include designing, implementing and supporting software and services for the FCs.
 - University of Washington: Computing and Communications Seattle, WA
Student Application Developer Fall 2005–2007
Worked for a group, which makes network management tools for the University of Washington. While working there I have helped design, develop, and maintain the front-end code and UI for a web-based application that helps report outages on the network.
 - IBM Corporation Austin, TX
IBM Extreme Blue Technical Intern – Project Sentinel Summer 2006
Worked on Tivoli project named Sentinel that dealt with IT security compliance, with a team composed of 3 technical interns and one MBA. We developed a system to enable companies to easily track if they are remaining compliant against government and company regulations. I developed Eclipse-based adapter plugins that would communicate with the underlying Tivoli products and provide data to do compliance checks.
 - TeraCloud Corporation Bellevue, WA
Summer Intern: Software Development Summer 2005
TeraCloud creates storage resource management software solutions for both mainframe and distributed environments. At the Summer Internship I worked on making new Graphical User Interface components using Swing and JClass and other enhancements for the next release of their client program. I also implemented a new way to handle localization in the client program.
