SEATTLE'S TRANSPORTATION EQUITY FRAMEWORK

A community workgroup leads the way in building a more just and equitable transportation future

Our transportation system is the direct result of institutional racism, and we take our role in ending it seriously. Elevating community voices not traditionally heard in transportation policy and operations is a critical need. Since 2019, we committed resources and collaborated with 11 community members and now have a framework with over 200 tactics focused on equity. Members represent Black, Indigenous, and People of Color and vulnerable communities. They are connected to local organizations in the Seattle-King County region and apply their experiences and professional knowledge to identify actions toward resolving transportation-related challenges. The resulting framework will guide the actions of Seattle Department of Transportation (SDOT) employees for years to come. We are honored by the workgroup's dedication and contributions to centering race and social justice in the city of Seattle.

The Need
A history of racist policies and disinvestment has created inequities in our transportation system. The long-term impacts of racism limit access to opportunities and wealth. Results include longer commutes for communities of color than their white counterparts due to displacement and often less access to high-quality transit service. While communities of color contribute less to pollution, they disproportionately experience the impacts. Incorporating this new framework into department policies and operations is a step toward addressing these issues.

Equity is a measure of fair treatment, opportunities and outcomes across race, gender, class and other dynamics.

Timeline moving forward

Overall Goals

- Continue the vibrancy, livability and resilience benefits from the Safe Start COVID response
- Lower barriers to participation throughout Seattle for communities and BIPOC-owned businesses, including vendors
- Provide new tools and options for activating Seattle's public space
- Make the program financially sustainable
- Build flexibility into our approach

Programmatic Goals

Outdoor Dining

- Plan for longer lasting, sturdy structures
- Encourage year-round vibrancy
- Ensure adequate curb space for passenger and freight loading

Merchandise Display

- Simplify process for simple storefront displays

Vending

- Help BIPOC-owned small-business
- Allow more partnership opportunities for food trucks and other businesses, including breweries
- Allow food truck “pods” where appropriate
- Add more opportunities for new vending businesses in Seattle

Street Activation
