Statement of Legislative Intent:

The Council requests that City Light work with OSE, OIR, Law, and any other relevant City departments to propose actions the City can take, including possibly seeking changes to state law, to support a more aggressive program of converting both the public and private transportation fleet from gasoline and diesel to City Light's GHG-neutral electricity. The Council's goal is to reduce CO₂ emissions from vehicles by at least 60,000 tons per year by 2020 through electrification of an additional 20,000 vehicles by then.

Responsible Council Committee(s): Energy

Date Due to Council: January 29, 2016
