New Major Institution Master Plan Application
Swedish Hospital Cherry Hill Campus
located at 500 17th Avenue

RECORD SUPPLEMENT REQUEST

The undersigned declares under penalty of perjury under the laws of the State of Washington that I am now and at all times herein mentioned, a resident of the State of Washington, over the age of eighteen years, the representative of 19th Avenue Block Watch/Squire Park Neighbors, and competent to be a witness herein.

The Exhibits provided as part of the 19th Avenue Block Watch/Squire Park Neighbors Request to Supplement the Record shows that the 19th Avenue residents adjacent to the east boundary of the Swedish Medical Center (SMC) Cherry Hill Campus have experienced flooding over the years and continue to do so. The SMC Environmental Impact Statement (EIS), the proposed Major Institution Plan, and the Director's Determination had claimed that flooding did not happen along 18th Avenue east boundary despite the 19th Avenue neighbors' public hearing testimony. The two affidavits and three photos, Exhibits 1 through 5, show that flooding does occur along 19th Ave and supports the expert testimony of Scott Kindred, who testified that the soil and geological conditions of the Campus area warrant consideration that the Hearing Examiner incorporated in her Recommendation #64.

BEFORE SEATTLE CITY COUNCIL
CITY OF SEATTLE

This added evidence meets the standard for supplementation because it documents a flooding occurrence that happened on December 8th and 9th, 2015, after the open record hearing before the Hearing Examiner had closed in July 2015.

DATED this 8th day of February, 2016.

I declare under penalty of perjury under the laws of the State of Washington that I am now and at all times herein mentioned, a resident of the State of Washington, over the age of eighteen years, am competent to be a witness herein and that the foregoing is true and correct:

I live with my wife, Melissa Flynn, at 529 19th Avenue, Seattle, WA 98122. Our home is over 100 years and we have a below grade basement, which runs under our porch. On December 8, 2015 at approximately 7:30 PM, our basement flooded. We took a video and three photos that show our basement had accumulated about a half-inch of water under our porch.

On December 9, 2015 at approximately 8:50 AM, my wife had finished shop-vacuuming about 160 gallons of accumulated water. We were relieved the storm had stopped because the ground was too saturated to hold any more moisture.

DATED this 8th day of February, 2016 at 529 19th Avenue, Seattle, WA 98122
