

Amendment 9 Version 1 to CB 121240 – FEPP Levy I & E Plan

Sponsor: Councilmember Hollingsworth

College and Career Exposure for K-12 Students

Effect: This amendment would add “exposure” to college and career readiness activities listed in the Enrichment Supports for Expanded Learning Opportunities. This amendment would clarify that college and career readiness activities include activities that would expose K-12 students to college and career choices.

Amend Page 30 of Attachment 1 to CB 121240 as follows:

Strategy #1: Expanded Learning Opportunities

Funded Services

Expanded Learning Opportunities (ELO) services are intended to provide academic and enrichment support such as tutoring and mentoring, integrated student supports such as family case management and referrals, active family and community engagement, collaborative leadership and practices, and environmental learning for Seattle youth. Programs to be funded include School-Based Investments, Community-Based Investments, Middle School Sports, and Environmental Learning, as described below.

- **School-Based Investments** provide funding to Seattle public and charter schools, for targeted student interventions delivered during the school day or out-of-school time (OST) such as afterschool, break camps, or summer. These interventions must advance four pillars of investments:
 1. *Expanded and Enriched Learning Time and Opportunities*, which consists of two types of support:
 - *Academic supports* that are designed to close learning gaps and increase student proficiency in English Language Arts (ELA), math and/or science. Funded activities include, but are not limited to, high impact tutoring and extended instructional time.
 - *Enrichment supports* that are designed to boost student engagement, attendance, and overall well-being. Funded activities include, but are not limited to, mentoring, science, technology, engineering, math (STEM) programs, arts and culture, sports and physical wellness, social emotional learning, civic engagement, youth leadership development programming, international experiential learning, college and career exposure and readiness activities, environmental education, and Community Learning Centers.
