Budget Action description:

This green sheet would add \$15,000 GSF to the City Attorney's Office (LAW) to contract with an organization such as the Alliance for Gun Responsibility to partner with an academic institution or individual to communicate and promote the findings of a trace data report to the community. A trace data report determines the source of a gun used to commit a crime.

A public facing trace data report allows for greater transparency with communities most impacted by interpersonal violence. Through a recent Disarm Hate community summit, community members identified a trace data report as a high priority for communities of color in Seattle to inform the community where the guns to commit crimes come from.
