1. BILL SUMMARY

Legislation Title: AN ORDINANCE relating to the electric system of The City of Seattle; adopting a system or plan of additions, improvements, and betterments to and extensions of the existing municipal light and electric power generation, transmission, and distribution system of the City; authorizing the issuance and sale of municipal light and power revenue bonds for the purposes of providing funds to pay part of the cost of carrying out that system or plan, providing for the reserve fund requirement (if necessary), and paying the costs of issuance of the bonds; providing parameters for the bond sale terms including conditions, covenants, and other sale terms; describing the lien of the bonds and authorizing their issuance as either senior lien parity bonds or junior lien bonds; and ratifying and confirming certain prior acts.

Summary and Background of the Legislation: This legislation provides the legal authorization to issue up to \$500 million of bonds in 2026 to fund a portion of capital expenditures for Seattle City Light's system outlined in the proposed 2026-2031 Capital Improvement Plan (CIP). Approximately \$200 million of this borrowing would be issued in connection with a plan for potential debt optimization, if market conditions are favorable. Debt optimization involves redeeming higher interest debt with operating cash and separately issuing new lower interest debt to fund capital projects. This approach reduces overall interest costs without increasing the debt burden or extending the term of outstanding debt.

Although the budget, capital plan and rates make specific assumptions about the use of debt financing for a certain share of the capital program, separate authorization for the issuance of bonds is technically required.

The bond proceeds combined with internally generated funds will support City Light's capital program for about one year. The bond proceeds may also be used to make a deposit to the bond debt service reserve fund (DSRF) and to pay issuance costs. As described in the legislation, bonds would have a maximum maturity of 40 years.

Major projects supported by the bond issue include the replacement of overhead and underground distribution equipment (including the accelerated pole replacement program), and other distribution related projects such as overhead and underground service connection work for General Service customers. For further information about City Light's capital projects, please see the 2026-2031 CIP.

2. CAPITAL IMPROVEMENT PROGRAM				
Do	es this	legislation create, fund, or amend a CIP Project?	☐ Yes ⊠ No	
3.	. SUM	MARY OF FINANCIAL IMPLICATIONS		
Do	es this	legislation have financial impacts to the City?	☐ Yes ⊠ No	
4.	OTH	ER IMPLICATIONS		
a.	Is a public hearing required for this legislation? No.			
b.	Is publication of notice with The Daily Journal of Commerce and/or The Seattle Times required for this legislation? No.			
c.	Does this legislation affect a piece of property? No.			
d.		e describe any perceived implication for the principles of the R te Initiative.	ace and Social	
	i.	i. How does this legislation impact vulnerable or historically disadvantaged communities? How did you arrive at this conclusion? In your response please consider impacts within City government (employees, internal programs) as well as in the broader community. $\rm N/A$		
	ii.	Please attach any Racial Equity Toolkits or other racial equit development and/or assessment of the legislation. $N\!/A$	y analyses in the	
	iii.	What is the Language Access Plan for any communications to $N\!/\!A$	o the public?
