Diversity of Housing

* * *

H 3.4 Promote use of customizable modular designs and other flexible housing concepts to allow for households' changing needs, including in neighborhood residential areas (~~zoned for single-family use~~).

H 3.5 Allow additional housing types in neighborhood residential areas (~~that are currently zoned for single-family development~~) inside urban villages; respect general height and bulk development limits currently allowed while giving households access to transit hubs and the diversity of goods and services that those areas provide.
