This project includes mobility improvements to the City's street system to support heavy haul freight mobility between port facilities and railroad intermodal yards. The project may include adding an additional layer of concrete on East Marginal Way South to support the increased weight of vehicles traveling on the road. The total project cost is estimated to be from \$3 to \$4 million. The 2016 amount represents the City's contribution to the project. The remaining amount is expected to come from the Port of Seattle.
