the findings in the 2015 “Fiber-to-the-Premises Feasibility Study” that incorporates the cost of upfront infrastructure investments, expected monthly charges for customers, accommodations for a “low-income internet utility discount program,” and expected roll-out of availability of internet utility services based on time and location. Additionally, the plan should explore potential cost-savings through infrastructure investments currently existing through other city utilities, and expected reductions in City of Seattle based telecommunications expenditures across departments. Costs for the study are expected to be a one-time expenditure of \$170,000, plus one FTE ongoing to administer the study in Seattle IT.
