## 2017 Fourth Quarter Supplemental Ordinance Summary Detail Table

Item	Title/Description	Amount/FTE
	Section 1 – Appropriation Reductions	
1.1	Reduce Appropriations for Joint Preschool Site and Tenant Improvements Project; i.e.; transfer to Parks (Seattle Preschool Levy, Preschool Services Fund (17861))	(\$860,000)
	This item reduces the appropriation authority in the Capacity Building BCL by \$860,000 of the SPP Levy funds by shifting the appropriation authority directly to the Parks Department. This project provides funding to evaluate, plan, design preschool classrooms and to further perform the necessary alterations, tenant improvements, site improvements, and other related improvements necessary to expand, renovate or construct preschool classrooms at Parks sites/facilities. DPR will directly charge the SPP levy fund for this work, thus, DEEL will no longer need the appropriation authority (see associated item 5.1)	
	Section 2 – Appropriation Increases	
2.1	KeyArena Event Expenses (Seattle Center, Seattle Center Fund (11410))	\$2,400,000
	This item increases appropriation authority by \$2,400,000 in the KeyArena BCL. KeyArena has enjoyed another successful year hosting the Seattle Storm, Seattle University as well as a variety of concerts, family shows and other events. KeyArena's 2017 Adopted Budget was built on a set of event assumptions regarding how many events the facility would host, how many staff hours those events would require and how much expense would be required to staff those events. Because the City's budget process takes place almost two years in advance of the actual fiscal year, the budget is based on the best information available at the time. Actual numbers of events hosted can vary based on artists touring schedules, customer demand and available dates. In this year, the number of major events in KeyArena will be significantly higher than was assumed in the budget. The budget assumed a total of 16 concerts, while the facility will host 28 concerts by year's end. Additionally, "DOTA", a very large week-long electronic gaming event added an additional day over what was assumed in the budget. This event is very labor intensive, requiring nearly \$1,200,000 in expense to host in 2016. The additional expenses generated by the increase in events will be paid for by revenues generated by these events themselves so no additional General Fund is being requested.	
2.2	McCaw Hall Reserve Spending (Seattle Center, Seattle Center Fund (11410))	\$300,000
	This item increases appropriation authority by \$300,000 in the McCaw Hall BCL. This authority is needed to allow for expenditures from various reserve funds dedicated to replacing Event and Kitchen Equipment in the facility. The McCaw Hall Operating Board, consisting of members of Seattle Center, Seattle Opera and Pacific Northwest Ballet have approved a variety of projects to replace aging event equipment that control lighting, staging and sound systems as well as certain items in the facility's kitchen areas such as a new dishwasher, oven and venting equipment. This action is in accordance with the McCaw Hall Operating Agreement approved by Ordinance 121206.	
2.3	Seattle Center Productions Event Expenses (Seattle Center, Seattle Center Fund (11410))	\$100,000
	This item increases appropriation authority by \$100,000 in the Community Programs BCL. Seattle Center's free and low-cost programming has seen an increase in the number of, and level of labor required by, community and cultural festivals. While no one event has made major programmatic increases, many of them have made relatively small increases in the production levels associated	

Item	Title/Description	Amount/FTE
	with their events. This is consistent with department's effort to build the production capacity of community event producers. Additionally, 2017 has seen an increase in the number of free speech events following the most recent national election. Revenues to pay for these increased costs will be received from fees and reimbursable labor billings.	
2.4	Campus Commercial Event Expenses (Seattle Center, Seattle Center Fund (11410))	\$500,000
	This item increases appropriation authority by \$500,000 in the Commercial Events BCL. The number of events on Center's grounds have increased to a higher level than anticipated in the budget. The largest of these events is the portion of the DOTA electronic gaming event which occurs outside of the KeyArena itself. This associated event occupies the Fisher Pavilion and the Fisher Lawn for over one week. Previous editions of the DOTA event did not include such a large presence outside the KeyArena. Expenses for this portion of the DOTA event are expected to surpass \$250,000. In addition to this event, Center hosted several other large-scale events which used multiple facilities. The expenses generated by these events are offset by increased Rent, Reimbursable Labor and Catering revenues.	
2.5	Seattle IT PC Replacement Backlog Appropriation (Department of Parks and Recreation, Park and Recreation Fund (10200))	\$442,409
	This item increases appropriation authority by \$442,409 in the Finance and Administration BCL (K390A). This item is necessary to address DPR's current backlog of computers that extends beyond Seattle IT's standard five-year replacement cycle. In 2017, Seattle IT created a new Device Replacement rate pool that assumed Departments were current in their replacement cycles. DPR was not current on PC replacements and is required to fund the backlog. This item expends \$442,409 from the Park and Recreation Fund (10200) to Seattle IT to pay for the backlog of PC replacements.	
2.6	Appropriation Authority Related to Homewise Position Change (Executive, Office of Housing (16600))	\$20,000
	This item increases appropriation authority by \$20,000 in the Office of Housing Operating Fund BCL. The Homewise program currently has a vacant part-time Admin Spec II position. Office of Housing has determined that a position focusing on public engagement and outreach is a more critical need for the Homewise program than an Admin Spec II, and is working with SDHR to reallocate the vacant position as such. Office of Housing has also determined that the body of work for this reallocated position requires full-time status rather than part-time. This full-time, reallocated position will promote three new efforts funded by the 2016 Housing Levy: foreclosure prevention, home repair grants, and multifamily rental rehab. Dedicated staff time for this work is critical to ensure that these programs reach underserved communities, and that RSJI goals are met. Funding for this change is covered by existing OH resources; it will be a combination of Weatherization grant funds and Levy admin funds. This item is related to position action 9.1.	
2.7	Unemployment Compensation Claims Costs (Personnel Compensation Trust Subfunds, Unemployment Insurance Subfunds (00517))	\$700,000
	This item increases the appropriation authority by \$600,000 for the Unemployment Insurance Subfund. The City is self-insured with respect to unemployment and reimburses the State of WA actual claim cost incurred on a Quarterly basis. The claim costs incurred and projected for 2017 are anticipated to be significantly higher than what was budgeted. However, the Fund does have	

Item	Title/Description	Amount/FTE
	adequate fund balance and cash to cover the additional claim cost and only needs expenditure budget authority.	
2.8	Health Care - Forecast Variance Reserve (Personnel Compensation Trust Subfunds, Health Care Subfund (00627))	\$8,357,000
	This item increases the appropriation authority by \$8,357,000 Health Care BCL to cover the 2017 year-end projection of actual claims costs in excess of the budgeted claims costs. This request is driven by two main factors. First, retirees over age 65 were added to the Health Care Subfund mid-year in 2017. The claims costs for this group are not subsidized by City contributions and considered "self-pay" members of the City's health care plan. Therefore, their total member contributions of \$2.5 million is anticipated to bear their expected \$2.5 million claims costs. Second, September 2017 claims experience was unusually high for Aetna members, indicating one or more high cost claims episodes. Since the City's medical plans are self-insured, additional appropriation authority is needed so that the existing fund balance can cover these claims costs. This appropriation increase request is equal to the forecast variance reserve (FVR) balance of \$8,357,000. The FVR is a cash reserve used to pay high claims that exceed projections and the total reserve amount is set by the City's health care actuaries each year, based on expected claims costs and collected through contribution rates. The 2018 health care rates were approved in August 2017 by the Health Care Committee (HC2). Therefore, due to timing issues, recovering the drawdown of the FVR will not impact department contribution rates until 2019.	
2.9	Seattle Parks and Recreation PC Replacement Backlog (Seattle Information Technology Department, Information Technology Fund (50410))  This item increases appropriation authority by \$442,409 in the Citywide IT Initiatives BCL (D9900). This one-time request is necessary to pay for the replacement of 319 workstations and laptops that were purchased by the Department of Parks and Recreation between 2008 and 2012. The equipment is beyond end-of-life and, this item would allow the Department of Parks and Recreation to address this backlog outside of the five-year replacement cycle for workstations and laptops. This item will be direct billed back to the Department of Parks and Recreation.	\$442,409
2.10	2017 Cost of Living Adjustments (Business Office) (Seattle Information Technology Department, Information Technology Fund (50410))	\$5,233

This request is necessary to fund contractual cost of living increases agreed to with IBEW Local Union Number 77 in October 2016 (Ordinance 125144). The agreement was not formerly signed until the late stages of the 2017-2018 budget process and therefore, was not included in the 2017 Adopted and 2018 Endorsed Budgets. Without this item, the Seattle Information Technology Department will need to defer ongoing efforts.

	This item increases appropriation authority by \$116,000 in the Engineering and Operations BCL (D3300). This request is necessary due to a significant increase in the purchase of Automatic Vehicle Locators in 2017. Seattle Public Utilities (SPU) has decided to place Automatic Vehicle Locators in all SPU vehicles which was not anticipated within the 2017-2018 budget process. Without this item, the Seattle Information Technology Department will not have the expenditure authority to continue purchasing new and replacement Automatic Vehicle Locators in 2017.
