B. If the total of the amounts of taxes stated in subsection 1.A or the total of the tax rate stated in subsection 1.A would be in excess of any maximum allowed by law, then such taxes shall be reduced to the maximum amount allowed. The maximum amount allowed by law includes the maximum amount of regular property taxes approved by vote of the people of The City of Seattle pursuant to RCW 84.55.050. For purposes of this subsection, the maximum amount of regular property taxes is determined by the King County Assessor as follows. First, the Assessor determines the amount of regular City property taxes that could be levied for collection in 2020 had the voters approved none of the levy lid lift measures submitted pursuant to RCW 84.55.050 and Ordinances 124796 and 125028, Initiative 122, and Ordinances 125604 and 125809. This amount is computed by the Assessor by multiplying the amount of general purpose regular property taxes levied for collection in 2019 by a limit factor. The limit factor is the lesser of 101 percent or 100 percent plus the rate of inflation, unless, pursuant to RCW 84.55.0101, the Council finds that there is a substantial need to use and approves the use of 101 percent as the regular property tax limit factor. Second, the Assessor adds the levy for tax refunds authorized by RCW 84.68.040, RCW 84.69.180, and RCW 84.55.070; plus the allowance authorized by RCW 84.55.010 for new construction, increases in assessed value due to construction of electric generation wind turbine facilities classified as personal property, improvements to property, and any increase in the assessed value of state-assessed property. Then, to that total amount is added the five dollar amounts set forth in the last sentence of subsection 1.A authorized for 2020 collection in the approvals given by the voters of the City pursuant to RCW 84.55.050 and those enumerated ordinances.

Section 2. Voter-approved excess taxes for bonds. In addition, a further tax is levied to raise revenue to provide for the interest on and redemption of voter-approved general obligation bonds for the fiscal year 2020 in the amount of \$22,761,750. This tax is applicable to all taxable property within The City of Seattle.

Section 3. The several provisions of this ordinance are declared to be separate and severable and the invalidity of any clause, sentence, paragraph, subdivision, section, subsection, or portion of this ordinance, or the invalidity of the application thereof to any person, property, or circumstance, shall not affect the validity of the remainder of this ordinance or the validity of its application to other persons, property, or circumstances.

Section 4. Any act pursuant to the authority of this ordinance taken after its passage and prior to its effective date is ratified and confirmed.

Section 5. This ordinance shall take effect and be in force 30 days after its approval by the Mayor, but if not approved and returned by the Mayor within ten days after presentation, it shall take effect as provided by Seattle Municipal Code Section 1.04.020.

SUMMARY and FISCAL NOTE*

Department:	Dept. Contact/Phone:	CBO Contact/Phone:
CBO	Dave Hennes/4-0537	Dave Hennes/4-0537

** Note that the Summary and Fiscal Note describes the version of the bill or resolution as introduced; final legislation including amendments may not be fully described.*

1. BILL SUMMARY

Legislation Title: AN ORDINANCE relating to the levy of property taxes; fixing the rates and/or amounts of taxes to be levied, and levying the same upon all taxable property, both real and personal, in The City of Seattle, to finance the departments and activities of City government and to provide for the general obligation bond interest and redemption requirements for the year beginning on the first day of January 2020; and ratifying and confirming certain prior acts.

Summary and background of the Legislation: This ordinance imposes the City's property tax for 2020 to pay for City government activities and for general obligation bond interest and redemption.

RCW 84.55.010 provides that the City may, with a simple majority vote of the Council, levy a property tax increase equal to inflation but not greater than a 1% increase over the prior year's regular property tax collection. If inflation is lower than 1%, the law requires a majority plus one vote, with a finding of substantial need, to have a tax increase exceed inflation to the maximum of 1%. Inflation is measured by the implicit price deflator for the United States published in September. In most years, the inflation rate will exceed 1%. This year the rate prior to revision is 1.39%. Thus, the attached Bill does not contain, and the Council does not need to make a finding of substantial need with approval by a majority plus one vote to provide for the use of 101% as the regular property tax limit factor. The Council may not increase regular property taxes above 1% without a vote of the people.

Other than the 1% increase in the regular non-voted current expense property tax levy proposed in the attached Bill, the same 1% increase is applied to the Move Seattle Transportation levy lid lift and the Families, Education, Preschool and Promise levy lid lift per the terms of their respective ordinances. All other lid lifts are flat amounts year over year. The current 7-year Library lid lift (Ord. 123851) expires in 2019. On August 6, 2019, however, voters approved for 2020 collection, a renewed Library levy lid lift with a first-year levy amount of \$30,371,066. Altogether, these changes result in an overall increase from 2019 of \$16,900,564, which does not include changes in the excess levy for redemption of general obligation bonds, the "refund fund levy" or additional taxes resulting from new construction, construction of wind turbine facilities classified as personal property, improvements to property, or increases in the value of state-assessed property.

It also does not include levy amounts for the Metropolitan Parks District (MPD). Pursuant to RCW 35.61, the MPD is a legally separate taxing jurisdiction from the City of Seattle, whose property tax levy authority of \$0.75 per \$1,000 assessed value is outside of the City's statutory

rate limit of \$3.60 per \$1,000 assessed value. The MPD began collecting tax revenues in the 2016 tax collection year.

Additionally, this ordinance includes a levy of \$22,761,750 for interest on and redemption of voter-approved general obligation bonds for the fiscal year 2020, a decrease of \$7,050 from the amount levied for collection in 2019. This amount includes payment amounts against the Libraries and Seawall bonds.

2. CAPITAL IMPROVEMENT PROGRAM

Does this legislation create, fund, or amend a CIP Project? ☐ Yes ☒ No

3. SUMMARY OF FINANCIAL IMPLICATIONS

Does this legislation amend the Adopted Budget? ☒ Yes ☐ No

Appropriation change (\$):	General Fund \$		Other \$	
	2020	2021	2020	2021
Estimated revenue change (\$):	Revenue to General Fund		Revenue to Other Funds	
	2020	2021	2020	2021
	\$9,774,305		\$32,208,852	
Positions affected:	No. of Positions		Total FTE Change	
	2020	2021	2020	2021

Does the legislation have other financial impacts to the City of Seattle that are not reflected in the above, including direct or indirect, short-term or long-term costs?
Yes, please see c) immediately below.

Is there financial cost or other impacts of *not* implementing the legislation?

Without this legislation, no **increase** in property tax revenue, other than that resulting from the voted levy lid lift, new construction, improvements to property, construction of wind turbine facilities classified as personal property, and any increase in the value of state-assessed property, may be authorized. The cost of not implementing this legislation is the 1% increase over the 2019 current expense levy, Families, Education, Preschool and Promise levy lid lift and Move Seattle Transportation levy lid lift, estimated to be \$11.6 million. If not passed, the County Assessor will levy the same amounts (general expense and levy lid lifts) as levied for the 2019 tax collection year plus any newly voter-approved levy lid lifts, amounts resulting from new construction, improvements to property, construction of wind turbine facilities classified as personal property, and any increase in the value of state-assessed property.

3.a. Appropriations

☐ This legislation adds, changes, or deletes appropriations.

3.b. Revenues/Reimbursements

☒ This legislation adds, changes, or deletes revenues or reimbursements.

Anticipated Revenue/Reimbursement Resulting from this Legislation:

Fund Name and Number	Dept	Revenue Source	2020 Revenue
00100 General Fund	General Fund	Property Tax	\$282,452,885
10398 Move Seattle Levy Fund	Transportation	Property Tax	\$98,857,381
16418/16419 2016 Housing Levy Capital Fund/2016 Levy O&M Fund	Office of Housing	Property Tax	\$41,428,571
18200 2019 Library Levy Fund	Seattle Public Library	Property Tax	\$30,371,066
12300 Election Vouchers Fund	Ethics & Elections Commission	Property Tax	\$3,000,000
17871 Families, Education, Preschool and Promise Fund	Dept. of Education & Early Learning	Property Tax	\$86,759,000
20140 UTGO Bond Interest & Redemption Fund	FAS	Property Tax	\$22,761,750
TOTAL			\$565,630,653

Revenue/Reimbursement Notes:

3.c. Positions

☐ This legislation adds, changes, or deletes positions.

4. OTHER IMPLICATIONS

a. Does the legislation affect any departments besides the originating department?

See the “Anticipated Revenue” Table above for affected departments.

b. Is a public hearing required for this legislation?

Yes. Public hearings will take place on October 3, 2019 and October 22, 2019.

c. Does this legislation require landlords or sellers of real property to provide information regarding the property to a buyer or tenant?

No.

d. Is publication of notice with *The Daily Journal of Commerce* and/or *The Seattle Times* required for this legislation?

No.

e. Does this legislation affect a piece of property?

No.

f. Please describe any perceived implication for the principles of the Race and Social Justice Initiative. Does this legislation impact vulnerable or historically disadvantaged communities? What is the Language Access plan for any communications to the public?

The revenues generated through the property tax, both general expense and levy lid lifts for particular purposes, support a broad range of government services, many of which support vulnerable or historically disadvantaged communities. This legislation has no policy or program implementation ramifications affecting vulnerable or historically disadvantaged communities beyond providing the underlying funding that supports City programs. Increases in taxes may disproportionately affect low-income individuals.

g. If this legislation includes a new initiative or a major programmatic expansion: What are the specific long-term and measurable goal(s) of the program? How will this legislation help achieve the program's desired goal(s).

CITY OF SEATTLE
ORDINANCE _____
COUNCIL BILL _____

AN ORDINANCE authorizing the levy of regular property taxes by The City of Seattle for collection in 2020, representing an increase above the regular property taxes levied for collection in 2019; and ratifying and confirming certain prior acts.

WHEREAS, to increase regular property taxes, RCW 84.55.120, as approved by the voters of the State of Washington in "Referendum 47" on November 4, 1997, requires the City to enact a separate ordinance indicating the change in taxes from the previous year in terms of percentage and total amount; and

WHEREAS, The City of Seattle proposes to make its regular property tax levy for collection in 2020 in the amount reflected in the companion ordinance to this bill, which is commonly known as the "Long Property Tax Ordinance"; and

WHEREAS, the Long Property Tax Ordinance for 2020 authorizes an increase above the amount of regular property taxes levied for collection in 2019; and

WHEREAS, pursuant to RCW 84.55.120, after proper notice was given, the City Council held public hearings on October 3, 2019 and October 22, 2019, to consider The City of Seattle's 2020 budget and the regular property tax levy to support it; and

WHEREAS, notice of the City Council's consideration of this ordinance has been provided in the usual manner for other proposed City ordinances; NOW, THEREFORE,

BE IT ORDAINED BY THE CITY OF SEATTLE AS FOLLOWS:

Section 1. Regular property taxes for collection in 2020 are authorized in the amount reflected in the ordinance introduced as Council Bill 119691. Not including increases resulting from the addition of new

1357

construction, construction of wind turbine facilities classified as personal property, improvements to property, and any increase in the value of state-assessed property, the regular property tax levy for 2020 collection represents an increase above regular property taxes levied for collection in 2019 (excluding the "refund fund levy" in both instances) of \$16,900,564, which is a 3.25 percent increase. These regular property tax levies for collection in 2019 and 2020 include regular property tax "levy lid lifts" previously approved by the voters of The City of Seattle.

Section 2. Any act pursuant to the authority of this ordinance taken after its passage and prior to its effective date is ratified and confirmed.

Section 3. This ordinance shall take effect and be in force 30 days after its approval by the Mayor, but if not approved and returned by the Mayor within ten days after presentation, it shall take effect as provided by Seattle Municipal Code Section 1.04.020.

CITY OF SEATTLE

RESOLUTION _____

A RESOLUTION adopting a spending plan for the proceeds of the Seattle Transportation Network Company tax to provide support to affordable housing near frequent transit, transportation, and a driver conflict resolution center.

WHEREAS, Seattle is one of the fastest-growing major cities in the country, gaining 100,000 new residents and more than 50,000 jobs in the last 20 years, and this growth is a boon to our economy and a test for our transportation system; and

WHEREAS, Seattle families' transportation-related spending is second only to their spending on housing, and a well-functioning transportation system that provides many alternatives to the expense of car ownership makes living and working in Seattle more affordable; and

WHEREAS, public transit provides affordable and critical transportation services to all consumers; and

WHEREAS, the Seattle streetcar network has seen an increase in ridership of 18 percent in 2018, totaling a combined system-wide ridership of 1,673,000 riders; and

WHEREAS, the Center City Connector Streetcar line will provide a critical link in the Seattle streetcar network, connecting residents and visitors to regional bus lines, ferries at Coleman Docks, and light rail connections; and

WHEREAS, existing sources of funding for affordable housing are insufficient to meet the needs of all individuals and families experiencing a housing cost burden; and

WHEREAS, investments in affordable housing provide access to opportunity for low-wage workers and their families, increase mobility from poverty, and foster inclusive communities accessible to all; and

WHEREAS, individuals and families making in the range of \$15 to \$25 per hour are especially dependent on

1364

transit for commuting to centrally located destinations such as their jobs, schools, grocery stores, libraries, and clinics; and

WHEREAS, co-locating affordable housing investments near transit infrastructure amplifies investments' capacity to simultaneously address Seattle's mobility and affordability challenges; and

WHEREAS, transportation network companies (TNCs) provide application dispatch services that allow passengers to directly request the dispatch of drivers via the internet using mobile interfaces such as smartphone applications; and

WHEREAS, TNCs are major hiring entities, with 31,676 TNC drivers issued permits by King County in 2018 as recorded by the King County Department of Licensing; and

WHEREAS, in the pursuit of economic opportunity, many TNC drivers are immigrants and people of color who have taken on debt or invested their savings to purchase and/or lease vehicles and for-hire licenses; and

WHEREAS, TNC drivers who have access to a driver conflict resolution center for education and representation in cases such as unwarranted deactivation will be more likely to remain in their positions over time, and such experienced drivers will improve the safety and reliability of the TNC services provided to passengers and thus reduce the safety and reliability problems created by frequent turnover in the TNC industry; and

WHEREAS, research shows TNCs contribute to growing traffic congestion in large U.S. cities; and

WHEREAS, over 24 million TNC trips were taken in Seattle in 2018, showing consistent growth year over year; and

WHEREAS, The City of Seattle intends to exercise its taxing authority, as granted by the Washington State Constitution and as authorized by the Washington State Legislature, and impose a tax on TNCs operating in Seattle; and

WHEREAS, Mayor Durkan has proposed further investments in affordable housing near transit, transportation

1365

and a driver conflict resolution center using proceeds from a tax on TNC companies providing 1,000,000 rides per quarter or more on a per-ride basis; and

WHEREAS, the purpose of this plan is to effectuate Seattle's vision to provide housing and transit opportunities for all, and support drivers in the TNC community by bringing educational tools and representation that is afforded to other sectors; NOW, THEREFORE,

**BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE, THE MAYOR
CONCURRING, THAT:**

Section 1. **Spending Plan.** The City shall use the proceeds of the transportation network company (TNC) tax imposed by Chapter 5.39 of the Seattle Municipal Code to accelerate affordable housing production for low-wage workers and their families at locations that are within the frequent transit network, make investments in transportation, including transit, and provide for workplace protections. Eligible expenditures include:

A. Funding of the administration of the TNC tax and regulations related to TNC drivers up to \$2,000,000 in the first year, for the second year and each year after up to \$1,500,000. Beginning in year five, this amount may increase each year to reflect the rate of inflation, consistent with the Consumer Price Index, and subject to appropriations.

B. Up to \$3,500,000 per year shall fund a Driver Resolution Center to provide driver resolution services and costs related to administering driver protection.

C. After administrative costs related to the tax and regulations of TNC drivers, as described in subsection A of this section, and after funding the Driver Resolution Center and other driver protections as described in subsection B of this section, up to 50 percent of revenue from the tax over its first six full years shall be used to finance acquisition, construction, rehabilitation, operations, and maintenance of property to provide housing that serves low-income households and provide for the housing needs of low-income households within the frequent transit network, as defined by the Seattle Department of Transportation's Tran

1366

Master Plan. The low-income housing funded hereby should serve households making up to 80 percent of the annual median family income for the statistical area or division thereof including Seattle, for which median family income is published from time to time by the U.S. Department of Housing and Urban Development, or successor agency, with adjustments according to household size in a manner determined by the Director of Housing. Beginning in the seventh full year after adoption of this tax, up to \$5,000,000 (in 2020 dollars, indexed to reflect the rate of inflation) per year shall be used to provide operating support for Office of Housing (OH)-funded housing affordable to households with incomes at or below 30 percent of the median family income.

D. After administrative costs related to the tax and regulations of TNC drivers as described in subsection A of this section, and after funding the Driver Resolution Center and other driver protections as described in subsection B of this section, and after the funding for affordable housing as described in subsection C of this section, the remainder of revenue collected in the first six full years that the tax is imposed shall be used to support projects related to transportation and transit, including the Center City Streetcar. Beginning in the seventh full year after adoption of this tax, after the administrative costs, funding the Driver Resolution Center, and after up to \$5,000,000 (in 2020 dollars, indexed to reflect the rate of inflation) used to support for OH-funded housing affordable to households with incomes at or below 30 percent of the median family income per year, the remainder of the net proceeds shall be used to support projects related to transportation improvements and transit.

Section 2. Every year, or at such other intervals as the City Council may specify, the Executive shall prepare a report to include total revenue collected per year and the cost of administration of the tax and regulatory oversight related to the TNC tax.

Section 3. Accountability and Oversight Committees. For the purpose of overseeing the funding for low-income housing with access to the frequent transit network, the Housing Levy Oversight Committee shall provide a report to the City Council as to the progress of funding received from the TNC tax. The Director of the Office of Housing, or the Director's designee, will prepare and submit to the Oversight Committee, City

1367

Council, and Mayor an annual progress report on the implementation of funds from the TNC tax.

For the purpose of overseeing the spending of tax proceeds related to transportation improvements, the Levy to Move Seattle Oversight Committee (or its successor) shall oversee and monitor the progress of funding received from the tax. The Director of the Department of Transportation, or assigned designee, will prepare and submit to the Oversight Committee, City Council, and Mayor an annual report on the implementation of programs receiving funding from the tax.

Adopted by the City Council the _____ day of _____, 2019, and signed by
me in open session in authentication of its adoption this _____ day of _____, 2019.

SUMMARY and FISCAL NOTE*

Department:	Dept. Contact/Phone:	CBO Contact/Phone:
Mayor's Office	Kate Garman / 727-8760	Julie Dingley / 684-5523

** Note that the Summary and Fiscal Note describes the version of the bill or resolution as introduced; final legislation including amendments may not be fully described.*

1. BILL SUMMARY

Legislation Title: A RESOLUTION adopting a spending plan for the proceeds of the Seattle Transportation Network Company tax to provide support to affordable housing near frequent transit, transportation, and a driver conflict resolution center.

Summary and background of the Legislation: This legislation adopts a plan for how the proceeds from the proposed Seattle Transportation Network Company tax (TNC tax) will be used:

- First, the plan funds the setup and ongoing costs of administering and collecting the TNC tax and regulations related to TNC drivers by the Department of Finance and Administrative Services (FAS). In the first year that cost is up to \$2,000,000 and in the second and beyond \$1,500,000, indexed for inflation beginning in the fifth year.
- The plan funds up to \$3,500,000 per year for a Driver Resolution Center that provides resolution services to TNC drivers and TNCs, which may include services such as providing a venue for drivers to contest deactivation by a TNC. This Center will be administered by a neutral, third-party non-profit organization and be funded in the Department of Finance and Administrative Services and/or the Office for Labor Standards, with support and evaluation funding provided within this part of the spending plan.
- The proceeds remaining after expenses the above two items shall be split during the first six full years of tax collection. Up to half of the proceeds shall go to the Office of Housing (OH)'s Low-Income Housing Fund to finance acquisition, construction, rehabilitation, operations and maintenance of property to provide housing that serves low-income households and proves for the housing needs of low-income households with the frequent transit network as defined by the Seattle Department of Transportation's Transit Master Plan. The remainder of the proceeds shall be used to support projects related to transportation and transit, including the Center City Streetcar.
- Beginning in the seventh full year of collection, the funds will be spent as follows:
 1. Ongoing costs of administering and collecting the TNC tax and regulations related to TNC drivers by FAS as described above. (up to \$1,500,000, indexed for inflation)
 2. Costs for operations of the Driver Resolution Center, as described above. (up to \$3,500,000)
 3. Operating support for OH-funded housing affordable to households with incomes at or below 30% of the Median Income. (up to \$5,000,000)

4. Projects related to transportation improvements and transit (remainder of the tax proceeds).

2. CAPITAL IMPROVEMENT PROGRAM

Does this legislation create, fund, or amend a CIP Project? ☐ Yes ☒ No

3. SUMMARY OF FINANCIAL IMPLICATIONS

Does this legislation amend the Adopted Budget? ☐ Yes ☒ No

Does the legislation have other financial impacts to the City of Seattle that are not reflected in the above, including direct or indirect, short-term or long-term costs?
No.

Is there financial cost or other impacts of *not* implementing the legislation?
No.

4. OTHER IMPLICATIONS

- a. Does this legislation affect any departments besides the originating department?
The Department of Finance and Administrative Services (FAS), the Office of Labor Standards (OLS), Seattle Department of Transportation (SDOT) and Office of Housing (OH) will receive the funds described in the spending plan once the tax is collected and appropriation authority is transferred from Finance General to the appropriate departments.
- b. Is a public hearing required for this legislation?
No.
- c. Does this legislation require landlords or sellers of real property to provide information regarding the property to a buyer or tenant?
No.
- d. Is publication of notice with *The Daily Journal of Commerce* and/or *The Seattle Times* required for this legislation?
No.
- e. Does this legislation affect a piece of property?
No.
- f. Please describe any perceived implication for the principles of the Race and Social Justice Initiative. Does this legislation impact vulnerable or historically disadvantaged communities? What is the Language Access plan for any communications to the public?

The resolution adopts a spending plan for the proceeds of the Seattle Transportation Network Company (TNC) tax to provide support to affordable housing near frequent transit,

transportation, and a driver conflict resolution center and other driver protections. People of color are disproportionately affected by rising costs associated with housing affordability and access to transportation. In addition, the Driver Resolution Center will provide resolution services to TNC drivers and TNCs, which may include services such as providing a venue for drivers to contest deactivation by a TNC. Many drivers are people of color and/or immigrants.

- g. If this legislation includes a new initiative or a major programmatic expansion: What are the specific long-term and measurable goal(s) of the program? How will this legislation help achieve the program's desired goal(s).**

The resolution adopts a spending plan for the proceeds of the Seattle Transportation Network Company tax to support affordable housing near frequent transit, transportation, and a driver conflict resolution center and other driver protections. Evaluation plans will be developed as the City studies the minimum wage for drivers.

CITY OF SEATTLE

RESOLUTION _____

A RESOLUTION acknowledging the inherent responsibility of the City to reduce unnecessary justice system involvement; acknowledging that pre-arrest diversion programs, such as the Law Enforcement Assisted Diversion (LEAD) program, represent a harm reduction, evidence-based approach to reduce recidivism and provide for the public safety; and declaring that the City is committed to ensuring that evidence-based, law enforcement-engaged, pre-bookings diversion programs, such as LEAD, receive the funding necessary to accept all priority qualifying referrals.

WHEREAS, the Law Enforcement Assisted Diversion Program (LEAD) offers police officers the ability to exercise discretionary authority at point of contact to divert individuals to a community-based, harm-reduction intervention for law violations driven by unmet behavioral health needs; and

WHEREAS, LEAD clients bypass the normal criminal justice system cycle in qualifying cases and instead are referred into a trauma-informed, intensive case-management program where the individual receives a wide range of support services, often including mental health treatment, transitional and permanent housing, and drug treatment; and

WHEREAS, LEAD is recognized as an evidence-based diversion approach to improving health outcomes and reducing justice system involvement in the Washington State "Healthier Here" 2019 Medicaid Transformation Project Toolkit; and

WHEREAS, LEAD was recognized as the 2018 Outstanding Criminal Justice Program for the west region by the National Criminal Justice Association and received the Seattle Human Services Coalition 2014 Innovative Program Award; and

WHEREAS, LEAD has been identified by the Seattle City Auditor as a local program that has embraced rigorous evaluation and used continuous assessment to adjust operational program elements; and

1372

WHEREAS, LEAD's Policy Coordinating Group has established both a standing Evaluation Workgroup, which has active evaluation projects with the University of Washington Evans School regarding community-level impact on actual and perceived public health, safety, and order, and the Center for Court Innovation, regarding police diversion of sex workers, and is seeking funding for evaluation projects in additional areas including impact of LEAD on participant drug use and on court appearance rates; and

WHEREAS, the first LEAD Program was launched in Belltown in 2011, and due to demand from other neighborhoods, the Mayor and the City Council have chosen to expand the program citywide; and

WHEREAS, LEAD has 561 active clients that were contacted in the Seattle Police Department's West Precinct, East Precinct and North Precinct, has 120 approved clients in need of outreach, and over 300 approved priority referrals on a waiting list that includes clients in the SoDo neighborhood, and expects to have approximately 1,400 clients when it fully expands treatment services to the South areas of the City and West Seattle in 2020; and

WHEREAS, LEAD caseworkers currently carry an average load of 44 cases and have found that optimal results are achieved when caseworkers do not carry more than 25 cases per caseworker; and

WHEREAS, LEAD interventions have provided 188 individuals with substance use disorder treatment services, and 73 individuals with mental health services from January-September 2019; and

WHEREAS, the Seattle Municipal Court has established a LEAD calendar where a dedicated Seattle City Attorney LEAD liaison is able to staff hearings for LEAD participants and recommend actions in non-diverted cases which coordinate with and do not undermine the individual intervention plan developed for the participant in LEAD; and

WHEREAS, the 2020 Adopted budget includes \$150,000 for a second Seattle City Attorney LEAD liaison, as well as \$100,000 for a study of the public and private funding necessary to accept all priority qualifying referrals by 2023; and

WHEREAS, LEAD has secured neighborhood-based workspace in the North and East Precincts and in the

SODO neighborhood, with support from neighborhood businesses; and

WHEREAS, in an example of public-private partnership, Microsoft has funded an information-sharing platform that will allow dashboard-like real time reports as well as improved coordination among all the LEAD operational partners; and

WHEREAS, in the 2020 Adopted Budget, LEAD received from The City of Seattle (the City) \$6.05 million in public funding for Seattle's LEAD clients, which will be combined with other funding that will not flow through the City's budget to include \$1.6 million in King County funding; and

WHEREAS, LEAD was awarded grant funding as part of the Trueblood Court Settlement Agreement, and approximately \$768,000 of this funding will support in Seattle LEAD clients whose law violations were thought to stem from high acuity mental health needs; and

WHEREAS, a private donor has authorized a grant of \$1.5 million to LEAD in 2020, conditioned on adequate commitments by the City of Seattle and King County to plan for deployment of LEAD with public funding citywide by 2023 with sufficient capacity to take on all priority appropriate referrals; and

WHEREAS, public and private funding in 2020 will allow the LEAD program to hire 54 new case managers and maintain a caseload that does not exceed 25 cases per case manager; and

WHEREAS, LEAD could in future years be eligible for federal funding from the Comprehensive Addiction and Recovery Act (CARA), which is the most comprehensive federal effort undertaken to address the opioid epidemic, encompassing prevention, treatment, recovery, law enforcement, criminal justice reform, and overdose reversal; and

WHEREAS, the Washington State Legislature in 2019 amended RCW 10.31.110 to provide that all local jurisdictions must develop and adopt protocols for pre-booking diversion programs similar to LEAD and established a grant-based distribution process to be coordinated by the Washington Association of Sheriffs and Police Chiefs; and

WHEREAS, legislators are exploring a proposed amendment to the state Medicaid plan that would allow

Medicaid reimbursement for outreach activities, which could potentially cover more of LEAD case management activity than is currently Medicaid reimbursable; and

WHEREAS, King County historically has matched Seattle in funding for Seattle LEAD, and with the proposed increase in Seattle contribution, it is timely to approach the County and ask for a significant increase in MIDD II allocation for Seattle LEAD; NOW, THEREFORE,

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF SEATTLE THAT:

Section 1. The City acknowledges its inherent responsibility to reduce unnecessary justice system involvement. The City also acknowledges that pre-arrest diversion programs, such as the Law Enforcement Assisted Diversion (LEAD) program, represent a harm reduction, evidence-based approach to reduce recidivism and provide for the public safety. Finally, the City declares its commitment to ensuring that law enforcement pre-arrest diversion programs, such as LEAD, receive public funding sufficient to accept all priority qualifying referrals citywide.

Section 2. The City intends that the LEAD Program operate at scale by 2023, with “scale” understood to mean that the program will have appropriate funding to accept all priority qualifying arrest and social contact referrals citywide, pursuant to the operational protocol currently approved by the LEAD Policy Coordinating Group. This intention is based on the desire of the City to ensure that individuals are not unnecessarily booked into jail due to behavioral health issues; and the City also anticipates that law violations by such individuals will be reduced through effective, research-based methods incorporated into the LEAD model.

Section 3. The City intends that LEAD be supported through a secure mix of public funding sources, including City funding and some combination of County, state, federal and Medicaid funding.

Section 4. The City recognizes that the statements of intent in this resolution address conditions of a \$1.5 million grant to LEAD from a private donor to assist in meeting LEAD capacity needs in 2020.

Adopted by the City Council the _____ day of _____, 2019, and signed by: 1375

me in open session in authentication of its adoption this _____ day of _____, 2019.

President _____ of the City Council

Filed by me this _____ day of _____, 2019.

Monica Martinez Simmons, City Clerk

SUMMARY and FISCAL NOTE*

Department:	Dept. Contact/Phone:	CBO Contact/Phone:
Legislative	Greg Doss 206-256-6225	

** Note that the Summary and Fiscal Note describes the version of the bill or resolution as introduced; final legislation including amendments may not be fully described.*

1. BILL SUMMARY

Legislation Title: A resolution acknowledging the inherent responsibility of the City to reduce unnecessary justice system involvement; acknowledging that pre-arrest diversion programs, such as the Law Enforcement Assisted Diversion (LEAD) program, represent a harm reduction, evidence-based approach to reduce recidivism and provide for the public safety; and declaring that the City is committed to ensuring that evidence-based, law enforcement-engaged, pre-bookings diversion programs, such as LEAD, receive the funding necessary to accept all priority qualifying referrals.

Summary and background of the Legislation: LEAD is a program that focuses on individuals engaged in law violations due to behavioral health conditions, continued drug use and/or extreme poverty. The goal of LEAD is to reduce law violations by participants, through use of harm reduction-based case management, prolonged engagement and coordination among justice system, law enforcement, human services and neighborhood partners.

LEAD staff have indicated that referrals and intakes are expanding faster than the program's case management capacity. In 2019, the program's clients grew from 388 cases in January to a current active client of 561. Program staff expect the caseload to grow to 829 by the end of 2019 and believe that current referral rates could result in an active client count of 1,400 by the end of 2020. The caseload growth is creating a need for additional Case Managers and funding to ensure that LEAD has the capacity to provide services to priority clients in Seattle.

The 2020 Adopted budget will include a \$3.5 million increase to the City funding that is currently allocated to the LEAD program. This resolution acknowledges that the City funding will be augmented by a \$1.5 million grant to help provide case management capacity in 2020. As a condition of the grant, the funder has requested a resolution that declares the City's intent that LEAD is supported through a secure mix of public funding sources, including City funding and some combination of County, state, federal and Medicaid funding. The funder seeks to ensure that the grant is framed as one-time bridge funding for a program that is otherwise publicly funded.

The language in the resolution declares that the City is committed to providing LEAD with a mix of public funding sufficient to accept all priority qualifying referrals citywide.

2. CAPITAL IMPROVEMENT PROGRAM

Does this legislation create, fund, or amend a CIP Project? ___ Yes X No

3. SUMMARY OF FINANCIAL IMPLICATIONS

Does this legislation amend the Adopted Budget? ___ Yes X No

Does the legislation have other financial impacts to the City of Seattle that are not reflected in the above, including direct or indirect, short-term or long-term costs?

No.

Is there financial cost or other impacts of *not* implementing the legislation?

LEAD program staff have indicated that the legislation is necessary to secure a \$1.5 million grant for the program. If the grant funding is not made available, then LEAD may not have sufficient capacity to serve priority clients, who may ultimately become involved in the criminal justice system and create costs for the City.

4. OTHER IMPLICATIONS

- a. Does this legislation affect any departments besides the originating department? No.
- b. Is a public hearing required for this legislation? No.
- c. Does this legislation require landlords or sellers of real property to provide information regarding the property to a buyer or tenant? No.
- d. Is publication of notice with *The Daily Journal of Commerce* and/or *The Seattle Times* required for this legislation? No.
- e. Does this legislation affect a piece of property? No.
- f. Please describe any perceived implication for the principles of the Race and Social Justice Initiative. Does this legislation impact vulnerable or historically disadvantaged communities? What is the Language Access plan for any communications to the public?

The resolution is intended to build awareness and community support for LEAD and the concept of pre-arrest diversion, which benefit communities of color, who are disproportionately overrepresented in the criminal justice system. A larger, more expansive LEAD program may offer more opportunities to divert people of color from prosecution and incarceration.

- g. If this legislation includes a new initiative or a major programmatic expansion: What are the specific long-term and measurable goal(s) of the program? How will this legislation help achieve the program's desired goal(s).**

The resolution is accompanied by a City Council add of \$3.5 million to the LEAD program. The add would: (1) sustain caseloads at no more than 25 cases per case manager vs. the current load of 44 per case manager; (2) increase case manager salaries by 10 percent and all LEAD employee salaries by five percent; (3) provide funding for project management functions such as LEAD Personnel Costs, Rent and Occupancy, Travel and Professional Services, Legal Services and a PDA Administrative Allocation; and (4) bring the number of case managers from 19 to 73.

Introduction

The City of Seattle and its more than 12,000 employees build and maintain infrastructure, provide utility service, support the needs of the city's residents, and create recreational, cultural, and other enriching opportunities. In providing excellent service, these employees use and maintain dozens of city-owned properties, a fleet of vehicles ranging from fire trucks to golf carts, and equipment and facilities necessary to complete the City's mission.

Budgeting for a large organization with many functions is a crucial and complex process. A proposed budget requires solid forecasts on commodities (such as the price of fuel), economic strength (as it impacts tax revenues, among other budgetary components), and demand for services (from parking meters to libraries to police officers to disc golf courses).

This book is designed to provide clear and accurate information on the budgetary process, estimated revenue streams, and a basic description of departmental needs and spending. The State of Washington allows cities to adopt biennial budgets. The City Council and Mayor endorsed a budget for 2020 in late 2018 and will adopt a budget for 2020 in late 2019.

City of Seattle Budget Process

In its simplest terms, the City budget is proposed by the Mayor (Executive), checked for compliance with the law (City Attorney), and amended and passed by the City Council (Legislative) before returning to the Mayor for his or her approval and signature. The budget itself is composed of two main documents: an operating budget and a capital improvement program (CIP) budget. The CIP budget consists of large expenditures on infrastructure and other capital projects. The operating budget is primarily composed of expenditures required by the City to deliver the day-to-day array of City services.

Charts summarizing the City's budget process and organization can be found at the end of this section.

Budget Preparation

The budgeting process begins early each year as departments assess needs and budget forecasters work to estimate revenues and costs. Operating budget preparation is based on the establishment of a current services or "baseline" budget. Current services is what it sounds like – continuing programs and services the City provided in the previous year, in addition to previous commitments that will affect costs in the next year, such as a voter-approved levy for new park facilities, as well as labor agreements and changes in health care, insurance, and cost-of-living- adjustments for City employees.

During the budget preparation period, the City Budget Office (CBO) makes two General Fund revenue forecasts, one in April and one in August. Both are used to determine whether the City's projected revenues are sufficient to meet the projected costs of the current services budget. If revenues are not sufficient to cover the cost of current services, the City must identify changes to close the gap – either through reductions or increased revenues or a combination of both. If the revenue forecast shows that additional resources are available, then the budget process identifies new or expanded programs to meet the evolving demands for City services. Regardless, the City is required by state law to prepare a balanced budget.

Introduction & Budget Process

In May, departments prepare and submit Budget Memos to CBO for analysis and mayoral consideration. The Mayor's Office reviews and provides direction to departments on the Budget Memos, giving direction on items they should include in their formal budget submittal. In early June, CBO receives departmental operating budget and CIP submittals, including all position (employee) changes. Mayoral review and evaluation of department submittals takes place through the end of August. CBO, in conjunction with individual departments, then finalizes the operating and CIP budgets.

In late September, the Mayor submits the proposed budget and CIP to the City Council. In addition to the budget documents, CBO prepares supporting legislation and other related documents.

After the Mayor submits the proposed budget and CIP, the City Council conducts public hearings. The City Council also holds committee meetings in open session to discuss budget requests with department representatives and CBO staff. Councilmembers then recommend specific budget actions for consideration by their colleagues.

During the budget review process, the City Council may choose to explain its budget actions further by developing statements of legislative intent and budget guidance statements for future budget action. Intent statements describe the Council's expectations in making budget decisions and generally require affected departments to report back to the City Council on results.

After completing the public hearing and deliberative processes the City Council votes to adopt the budget, incorporating its desired budget changes, in late November. The Mayor can choose to approve the Council's budget, veto it, or let it become law without mayoral signature. The Mayor must veto the entire budget or none of it, as there is no line-item veto in Seattle. Copies of budget documents are available for public inspection at the CBO offices, at the Seattle Public Library, and on the Internet at <http://www.seattle.gov/budget>.

During the year, the City may have a need to change the adopted budget to respond to evolving needs. The City makes such changes through supplemental budget appropriation ordinances. A majority of the City Council may, by ordinance, eliminate, decrease, or re-appropriate any unspent appropriations during the year. The City Council, generally with a three-fourths vote, may also increase appropriations from available money to meet necessary expenditures that were not foreseeable earlier. Additional unforeseeable appropriations related to settlement of claims, emergency conditions, or laws enacted since passage of the annual operating budget ordinance require approval by a two-thirds vote of the City Council. Absent such changes, departments are legally required to stay within their annual budget appropriation.

Reader's Guide

This reader's guide describes the structure of the 2020 Proposed Budget book and outlines its content. The budget book is designed to present budget information in an accessible and transparent manner – the way decision-makers consider the various proposals. It is designed to help residents, media, and City officials more easily understand and participate in the budget deliberations.

A companion document, the 2020-2025 Proposed Capital Improvement Program (CIP), identifies expenditures and fund sources associated with the development and rehabilitation of major City facilities, such as streets, parks, utilities, and buildings over the next six years. The CIP also shows the City's financial contribution to projects owned and operated by other jurisdictions or institutions. The CIP fulfills the budgeting and financial requirements of the Capital Facilities Element of Seattle's Comprehensive Plan by providing detailed information on the capacity impact of new and improved capital facilities.

The 2020 Proposed Budget and 2020-2025 Proposed CIP can also be found online at the City Budget Office's webpage. In addition to PDF files containing the Proposed Budget and Proposed CIP, the site contains department-customized expenditures and revenues.

The 2020 Proposed Budget

This document is a description of the proposed spending plan for 2020. It contains the following elements:

- **Proposed Budget Executive Summary** – A narrative describing the current economy, highlighting key factors relevant in developing the budget document, and how the document addresses the Mayor's priorities;
- **Summary Tables** – a set of tables that inventory and summarize expected revenues and spending for 2020;
- **General Fund Revenue Overview** – a narrative describing the City's General Fund revenues, or those revenues available to support general government purposes, and the factors affecting the level of resources available to support City spending;
- **Selected Financial Policies** – a description of the policies that govern the City's approach to revenue estimation, debt management, expenditure projections, maintenance of fund balances, and other financial responsibilities;
- **Departmental Budgets** – City department-level descriptions of significant policy and program changes from the 2019 Adopted Budget, the services provided, and the spending levels proposed to attain these results;
- **Appendix** – an array of supporting documents including Cost Allocation, a summary of cost allocation factors for internal City services; a summary of position changes by department contained in the 2020 Proposed Budget; and a glossary.

Reader's Guide

Departmental Budget Pages: A Closer Look

The budget presentations for individual City departments (including offices, boards, and commissions) constitute the heart of this document. They are organized alphabetically within seven functional clusters:

- Arts, Culture, & Recreation;
- Education, Health & Human Services;
- Neighborhoods & Development;
- Public Safety;
- Utilities & Transportation;
- Administration; and
- Funds and Funding Sources.

Each cluster, with the exception of the last, comprises several departments sharing a related functional focus, as shown on the organizational chart following this reader's guide. Departments are composed of one or more budget control levels, which in turn may be composed of one or more programs. Budget control levels are the level at which the City Council makes appropriations.

The cluster "Funds and Funding Sources" is comprised of sections that do not appear in the context of department chapters, including the General Fund Revenue Table, Cumulative Reserve Funds, Fiscal Reserve Funds, Community Development Block Grant Funding Source, and other administrative funds. A summary of the City's general obligation debt is also included in this section.

As indicated, the proposed budget appropriations are presented in this document by department, budget control level, and program. At the department level, the reader will also see references to the underlying fund sources (General Fund and Other) for the department's budgeted resources. The City accounts for all of its revenues and expenditures according to a system of funds. In general, funds are established to account for specific revenues and permitted expenditures associated with those revenues. For example, the City's share of Motor Vehicle Fuel taxes must be spent on road-related transportation activities and projects, and are accounted for in a fund in the Transportation Fund. Other revenues without statutory restrictions, such as sales and property taxes (except voter-approved property taxes), are available for general purposes and are accounted for in the City's General Fund. For many departments, such as the Seattle Department of Transportation, several funds, including the General Fund, provide the resources and account for the expenditures of the department. For several other departments, the General Fund is the sole source of available resources.

Reader's Guide

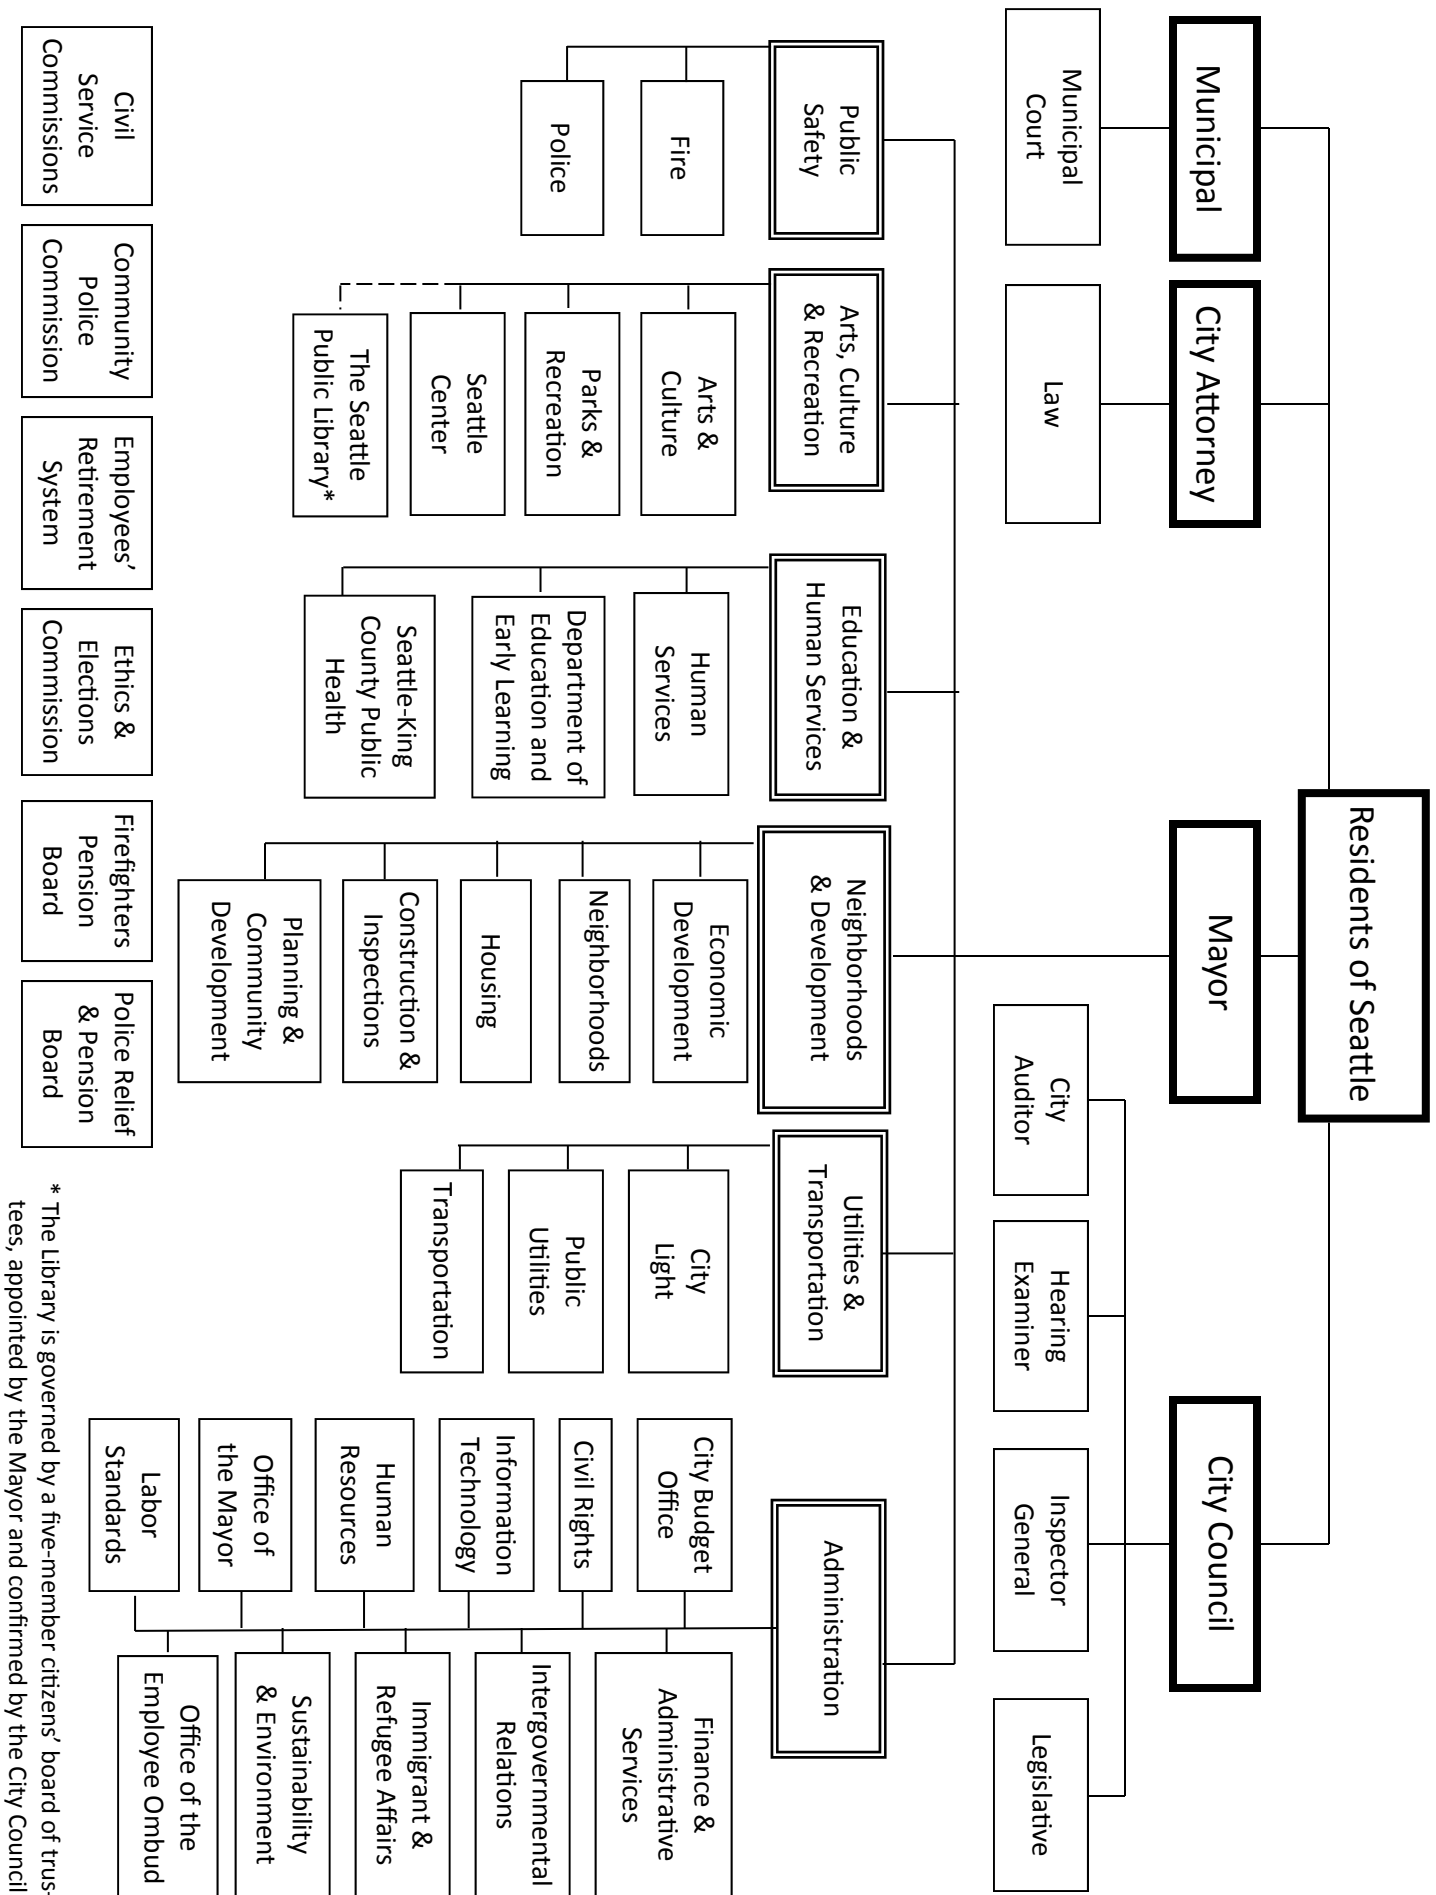

Budget Presentations

Most department-level budget presentations begin with information on how to contact the department. The department-level budget presentation then goes on to provide a general overview of the department's responsibilities and functions within City government, as well as a summary of the department's overall budget. A narrative description of the issues impacting the department's 2020 Proposed Budget then follows. The next section of the department-level budget presentation provides a numerical and descriptive summary of all of the incremental budget changes included in the 2020 Proposed Budget, along with a discussion of the anticipated operational and service-level changes that will result. The department-level budget presentation concludes with summary level tables that describe the department's overall expenditures and revenues by type as well as by budget control level and program. All department, budget control, and program level budget presentations include a table summarizing historical and adopted expenditures, as well as proposed appropriations for 2020.

A list of all position changes proposed in the budget has been compiled in the appendix. Position modifications include eliminations, additions, reclassifications, and status changes (such as a change from part-time to full-time status), as well as adjustments to departmental head counts that result from transfers of positions between departments.

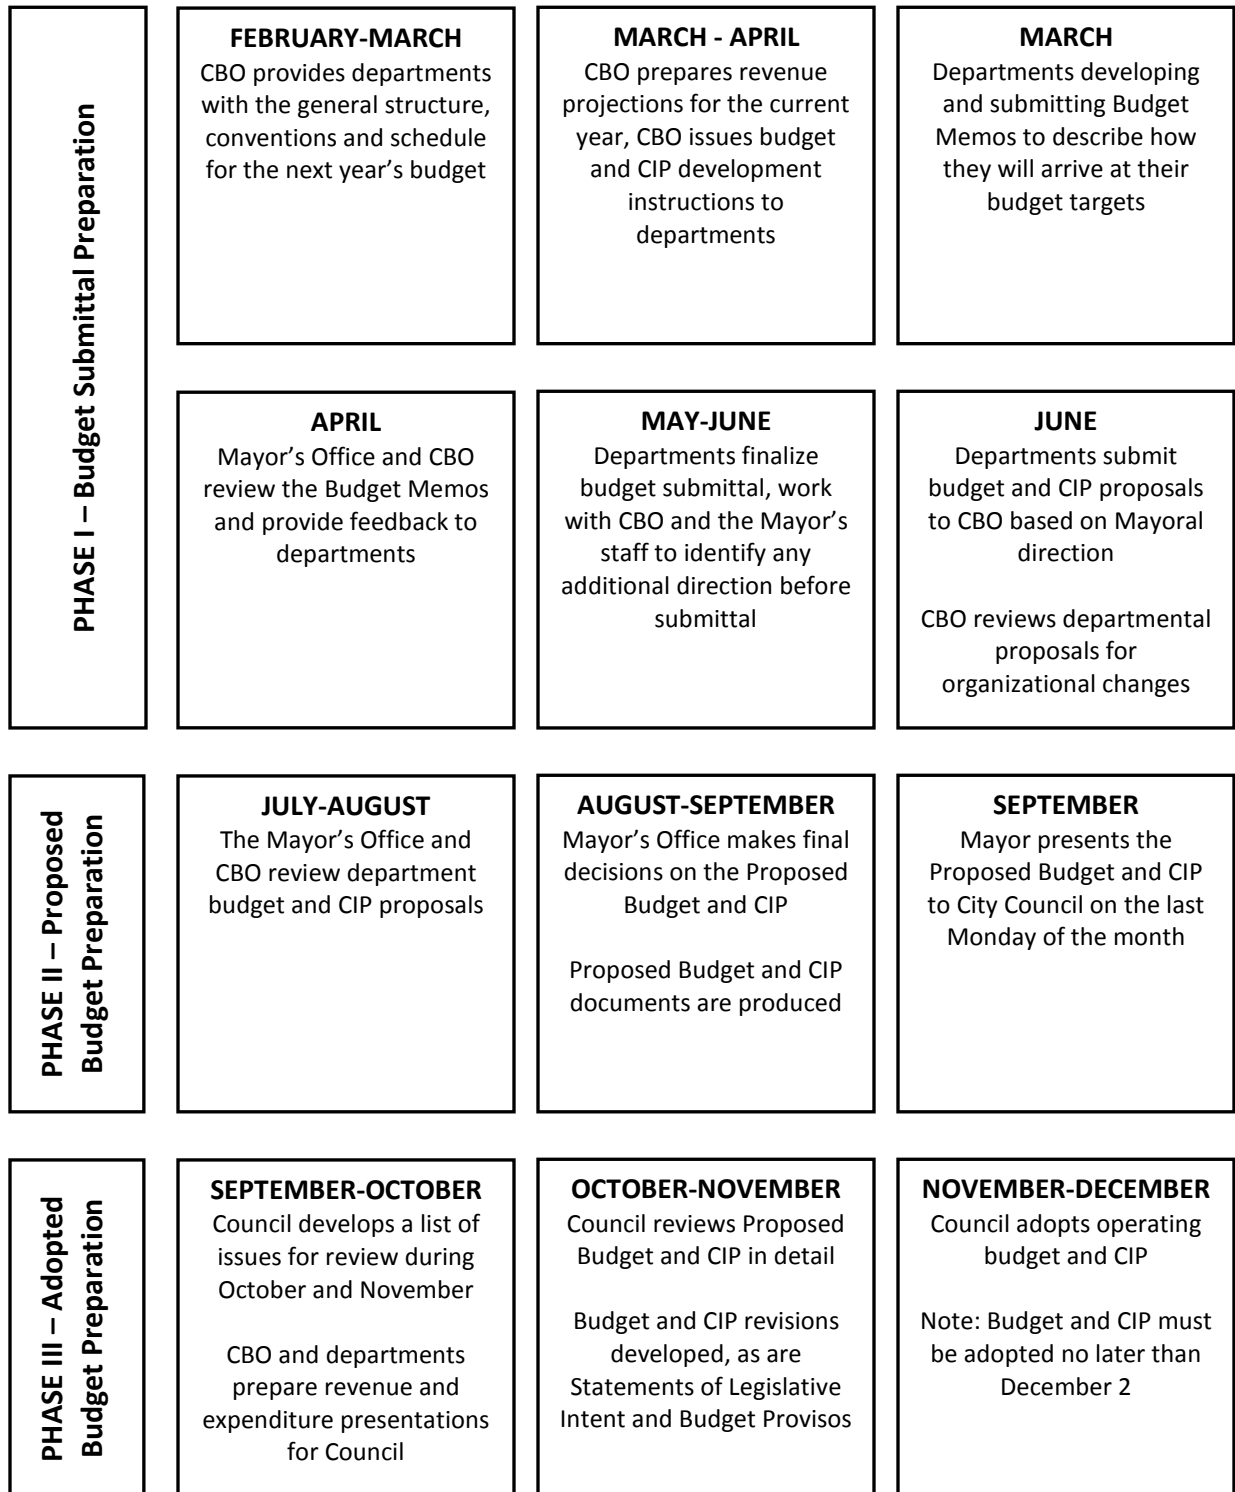

For information purposes only, an estimate of the number of staff positions to be funded under the 2020 Proposed Budget appears in the departmental sections of the document at each of the three levels of detail: department, budget control, and program. These figures refer to regular, permanent staff positions (as opposed to temporary or intermittent positions) and are expressed in terms of full-time equivalent employees (FTEs). In addition to changes that occur as part of the budget document, changes may be authorized by the City Council or the Human Resources Director throughout the year, and these changes may not be reflected in the estimate of staff positions presented for 2018. These changes are summarized in the appendix.

Where relevant, departmental sections include a statement of projected revenues for the years 2019 through 2021.

* The Library is governed by a five-member citizens' board of trustees, appointed by the Mayor and confirmed by the City Council.

Budget Process Diagram

2020 Proposed Budget Executive Summary

The City of Seattle's 2020 Proposed Budget represents the second year of the City's 2019-2020 biennial budget process. The City's biennial budget process requires that the City develop a two-year budget plan every other year. The first year of the biennial budget is adopted as law, and the second provides the foundation from which to develop a single-year proposal the following year. Accordingly, as part of last year's budget actions, the Mayor and the City Council formally adopted the 2019 Budget and endorsed a budget for 2020. The 2020 Endorsed Budget did not legally appropriate spending for 2020 but did provide a firm baseline from which the 2020 Proposed Budget has been developed.

As described below, the overall revenue forecast for 2019 and 2020, which defines the resources available for appropriation, has changed relatively little since the 2020 budget was endorsed last fall. The local economy has remained stable over the past year, growing steadily but at a relatively modest rate, consistent with the City's forecast. However, several other developments have provided additional resources to support some new spending in 2020. For example, the sale of the Mercer Megablock properties and payments to the City associated with the expansion of the Washington State Convention Center have provided significant resources for both housing and transportation investments. Inflation costs have been somewhat lower than anticipated and the cost of retroactive pay at the Seattle Police Department was less than projected. Most of these additional resources represent one-time infusions and balancing this limitation against the pressures for expansion of ongoing services is among the challenges that the Mayor faced in developing the 2020 Proposed Budget. Recognizing the one-time nature of the additional revenues, a number of the proposals for additional spending represent one-time spending or cautionary investments in pilot programs that need to be further assessed before the City makes long-term funding commitments.

Local Economy Remains Strong but Growth Has Slowed

For the past two years the City Budget Office (CBO) has predicted that the local economy would continue to grow – buoyed by a strong technology sector and robust construction activity – but that this growth would slow as the pace of hiring and expansion locally began to track more closely to national trends. While stronger growth persisted somewhat longer than had been anticipated, this prediction has largely been realized. Looking forward, the local economic forecast, which underlies the prediction of economically dependent revenues such as sales tax and business and occupation tax, anticipates that this trend will continue. In 2020, CBO is forecasting 1% growth in regional employment, which is significantly slower than the approximately 3% average annual growth rate since the post-recession low point in February 2010. General Fund revenues are expected to grow by about 2.8%, after adjustments, such as removing the one-time proceeds from the sale of the Mercer Megablock, that allow for cross-year comparisons. Such growth is just above the expected rate of inflation at about 2.3%.

Relative to recent forecasts, the most important difference is the downward risk in the current projections. Current federal trade policy has been reducing the volume of international trade, and a further escalation in volleying tariffs poses a significant risk to the regional economy. Major employers including Boeing, Microsoft and Amazon are all dependent on access to international markets. Neither CBO's forecast, nor the national predictions upon which it is built, anticipate that these policies will lead

2020 Proposed Budget Executive Summary

to a recession in the coming year, but the probability that such an event could occur has definitely increased. The 2020 Proposed Budget includes additional contributions to both the City's Revenue Stabilization Account and its Emergency Fund, per the terms of existing financial policies, that could help mitigate the impacts of an economic downturn, should one occur.

Affordable Housing and Equitable Development – Opportunities Provided by the Sale of the Mercer Megablock and New State Laws

While the recent strength of the local economy has driven growth in City revenues, it also has created significant policy challenges in terms of housing affordability and displacement. The City has responded with a variety of strategies, both in terms of direct funding and regulatory intervention. In the 2020 Proposed Budget, the proceeds from the sale of the Mercer Megablock properties will provide significant resources to expand direct investments in new and existing strategies to provide affordable housing and promote a more equitable, community-driven pattern of neighborhood development. In total, after accounting for transaction costs, the sale of the Megablock properties will provide more than \$78 million for these programs. Of this total, \$15 million is allocated to the City's existing Equitable Development Initiative (EDI). Led by the Office of Planning and Community Development, EDI provides direct funding for community-driven development efforts that are designed to serve existing residents, businesses and the cultural organizations that are at the highest risk of displacement. This will complement the \$5 million in annual funding from the Short-Term Rental (STR) Tax that now will now be fully devoted to EDI projects. In 2019, approximately \$1 million of STR revenues are being used to fund the staff tasked with implementing EDI. Consistent with recent City Council action directing that STR revenues not be used to fund City staff, the 2020 Proposed Budget allocates General Fund resources for this purpose.

An additional \$15 million will be directed to the Office of Housing to further mitigate residential displacement by funding affordable home ownership via a community land-trust model. Residential affordability, both for homeowners and potential tenants, will also be enhanced by a proposed \$6 million investment in enhancing the affordability of accessory dwelling development. The City recently approved legislation expanding the opportunities for the construction of such units, and the Mayor is now proposing that \$6 million of the proceeds from the sale of the Mercer Megablock properties be used to fund a low-cost loan program to reduce the cost of building such units, in exchange for ensuring that they will be rented at affordable rates.

The remaining \$42 million in proceeds from the sale of the Mercer Megablock properties will be held in Finance General, awaiting appropriation for strategic investments that will produce publicly-owned assets, whether that be undeveloped land or existing facilities, to provide affordable housing, mitigate the pressures of displacement, and provide other potential public benefits on a permanent and enduring basis. The Megablock properties are a significant tangible asset and the Mayor believes that if they are to be sold, the proceeds from the sale should be used to purchase comparable assets that can provide long-term value to future generations of Seattle residents. Over the coming months and into the first part of 2020, the Mayor has proposed a process to work with the City Council to identify such opportunities, vet these potential investments with a committee of community experts and stakeholders, and to bring forward specific proposal for Council action. Rarely does the City have access to the resources needed to make such targeted investments in support of the joint goals of expanding

2020 Proposed Budget Executive Summary

access to affordable housing and mitigating the risk of displacement for local residents, businesses and cultural institutions.

In addition to this funding for affordable housing and equitable development, more than \$50 million of the total \$143.5 million in proceeds from the sale of the Mercer Megablock properties are dedicated to transportation purposes. Portions of the Megablock properties were originally purchase with transportation-restricted resource and must be used for transportation purposes. The details of this proposed spending are summarized below as part of a more general discussion of proposed transportation funding.

Actions by the state legislature to increase the funding available for affordable housing have provided for further opportunities to expand investments in affordable housing, relative to what was originally planned in the 2020 Endorsed Budget. The City recently adopted legislation taking advantage of a new state law that provides an opportunity to redirect a portion of the sales tax collected from local jurisdictions into new affordable housing investments. This will provide up to \$4.5 million per year for 20 years for new affordable housing. The 2020 Proposed Budget invests in 175 new units of Permanent Supportive Housing (PSH) and the associated operation and maintenance costs. Debt will be issued to secure the funding needed to build the housing, and this new revenue stream will provide both the resources needed to repay that loan and the operational costs of the facility.

Taking advantage of another state law change in 2019 ([HB 1219](#)), the Mayor is also making \$25 million total of Real Estate Excise Tax (REET) revenues available to support additional capital investments for new affordable housing through 2025. Per City policy, REET revenues are generally targeted toward spending on the long-term maintenance of City facilities, including things such as roof repair, HVAC replacement and other basic capital needs. While additional funding for affordable housing is a priority for the City, ongoing investments in our existing facilities is necessary to support the provision of other City services and to avoid costly projects that result from the neglect and deferred maintenance. The budget strikes a balance between these competing uses of REET revenues.

A Renewed Focus on Assistance for Small Business

The strength of the local economy has also been a mixed blessing for the City's business community. The growth in employment and population has created significant opportunities, but the pressure on wage costs, commercial rental rates and competition have also created significant challenges, particularly for small businesses. The Mayor's proposed budget responds to this dynamic by expanding the tools available to the Office of Economic Development's (OED) Only in Seattle (OIS) Program, as well as an increased strategic focus at OED on service-oriented small businesses in neighborhoods facing high-risk of displacement. The proposed budget includes \$300,000 for two designated funds to assist small businesses, the Business Stabilization and Tenant Improvement funds. The Business Stabilization Fund will help small businesses facing short-term emergencies, such as theft, vandalism, or emergency repairs, with a focus on those in high-risk displacement neighborhoods. The Tenant Improvement Fund encourages the development of affordable commercial tenant improvements for businesses in high displacement risk areas. Both these funds are part of the office's new Inclusive Economy Agenda, which aims to reduce barriers to economic success for small business owners.

2020 Proposed Budget Executive Summary

Expansion of Childcare Subsidies and Access to Healthy Food – Opportunities Provided by Sweetened Beverage Tax Revenues

Unanticipated growth in the revenues from the City's Sweetened Beverage Tax (SBT) represents a notable exception to the general observation that tax revenues have tracked closely to forecast. For the second year in a row, 2019 SBT revenues will significantly outpace our initial forecasts, and this outcome has led CBO to also revise 2020 revenue estimates as well. The original forecasts for 2019 and 2020 anticipated approximately \$21 million per year in SBT revenues—the forecast now projects that to be closer to \$24 million per year. This will provide an additional \$3 million per year in funding for SBT-eligible activities. Furthermore, after final action was taken on the 2019 Adopted and 2020 Endorsed Budget, Council provided direction to the Executive that will make additional SBT resources available for such activities in 2020 and beyond. In particular, the 2019 Adopted and 2020 Endorsed Budget relied on SBT revenues to support more than \$6 million in annual spending that had previously relied on General Fund resources. The 2020 Proposed Budget implements that direction, meaning that about \$9 million of ongoing SBT funding is available to be allocated in the 2020 Proposed Budget (approximately \$3 million from the forecast revision and \$6 million due to change in policies regarding the use of funding). In addition, unspent fund balance of approximately \$4 million from 2019 is also available for appropriation on a one-time basis in 2020.

This additional ongoing funding will be used to make three significant investments. First, \$2.7 million will be dedicated to a significant expansion of the Fresh Bucks program, which provides direct assistance for the purchase of healthy foods to those who might not otherwise be able to afford such options. An additional \$3 million will be made available to the Department of Education and Early Learning (DEEL) to expand the eligibility and depth of the subsidies offered through the City's Child Care Assistance Program (CCAP). Specifically, this funding will support increasing income eligibility from 300% to 350% of the Federal Poverty Level (FPL), fund enrollment increases, reflect the increasing cost of childcare, support providers who participate in the program, and enhance staffing capacity. The 2020 Proposed Budget almost doubles the funding for the program, and as a result, an additional 500-700 families will receive childcare vouchers. In addition, the proposed budget provides \$2.5 million to the Department of Neighborhoods to create a Healthy Food Fund, a new community grant program to improve public health. The Fund is consistent with the recommendations from the Sweetened Beverage Tax Community Advisory Board (CAB), which provides recommendations regarding the City's use of SBT revenue. Additional funding will also be provided to fund some additional youth-focused recreational activities in the Department of Parks and Recreation. The remaining resources are to be used to support the staff needed to implement the new and expanded programs.

The additional, one-time \$4 million unspent fund balance mentioned above will be used for two purposes: the creation of a one-time \$3 million opportunity fund to address capital needs at P-patches and community gardens, which can directly help provide access to healthy food for both the gardeners themselves and the agencies to whom the P-patches and community gardens donate; and the creation of a fund reserve to protect against a future downturn of SBT revenues. Initially, the reserve would be funded at \$1 million.

2020 Proposed Budget Executive Summary

Public Safety

Seattle Police Department Staffing. The Mayor maintains a strong commitment to public safety and consistent with that view, the 2020 Proposed Budget includes funding to enhance public safety services in a number of ways. Unanticipated challenges in both recruitment and retention have constrained the Seattle Police Department's (SPD) ability to meet the hiring goals set in the original budget. With lower staffing levels than anticipated there are resources available to fund new recruitment and retention efforts, and to invest in programs that can complement the officers who are available for duty.

As the hiring challenges became clear early in 2019, the Executive formed a work group that included experts from SPD and elsewhere in the City to identify new strategies to enhance both recruitment and retention. The 2020 Proposed Budget includes approximately \$1.6 million to implement these strategies and an additional \$800,000 will be spent on direct financial incentives for new recruits and "lateral" hires who move to SPD from another police department.

These efforts will help increase the size of the force over time, but investments are also proposed to address near-term public safety needs. Nearly \$850,000 in funding will be available to continue the community-based emphasis patrols that began earlier this year. At the same time, the Mayor proposes redirecting \$1.2 million that would have otherwise been spent to fund new sworn officers towards the expansion of the recently revived Community Service Officer (CSO) program. CSOs are non-sworn, civilian positions that work closely with police officers to coordinate on specific community needs and build stronger relationships with communities across the city and may serve as a community pipeline for new officers. The funding will add six CSOs, including a supervisor, expanding the overall program from 12 to 18 employees.

Behavioral Health and Public Safety. Beyond these general commitments to enhancing SPD, the budget also includes funding for several innovative pilots designed to address more specific public safety issues. For example, one issue that has become an increasing challenge for both SPD and the Seattle Fire Department (SFD) is the number of non-emergency calls that require attention of both police and fire personnel. Many of these calls come from individuals who are facing significant mental or emotional challenges, but not immediate risks to their physical health. To help reduce the number of calls that are generated, the budget includes funding to provide dedicated nurses at five locations that currently generate a high volume of non-emergent, low-acuity 9-1-1 calls. This will be complemented by a dedicated nurse call line available to other facilities that also generate many such calls. In addition, resources will be available to expand the new "Health One" unit, which will be launched in October of 2019. This unit, which is being piloted by SFD, provides a team that includes both medical and mental health personnel to respond to calls that are not life-threatening emergencies and where other services are required to address both the near- and long-term needs of those seeking assistance. Funding will also be provided to expand SPD's Crisis Response Unit with four new mental health professionals, providing one such professional for each of the five precincts. This addition is not designed to reduce call volumes, but rather ensure that SPD has an appropriate team available to respond to situations where significant mental health crises have created a public safety risk.

Response to "High Barrier" Individuals. An analysis of data from SPD, SFD, the Seattle Municipal Court and the Human Services Department has revealed that a relatively small number of individuals are putting significant stress on the City's public safety systems, and that a significant majority of these individuals suffer from serious mental health and/or substance abuse issues. Recognizing that the City's

2020 Proposed Budget Executive Summary

existing structure of interventions and services is not successfully addressing their needs or effectively minimizing their impact on the broader community, the Mayor formed a multi-jurisdictional, multi-agency work group, which included City and County representation from the relevant law enforcement, court, prosecution, defense and human service agencies to develop new, more effective strategies. The High Barrier Individual Work Group has just completed a progress report that recommends a number of pilot projects. The 2020 Proposed Budget includes just over \$3 million, including \$2 million in capital costs, to implement these recommendations. The capital investment is associated with a joint effort by the County and the City to transform an unused portion of the King County Jail into a place-based treatment center for those dealing with mental health and substance abuse issues. In addition, the County and the City are working together to provide enhanced services, including referral to appropriate treatment, for individuals who are being released from jail after relatively short stays, but for whom such stays have been repeated and frequent. The Seattle Municipal Court, which also has been an active participant in High Barrier Individual Work Group, will pilot a new approach to probation services for this group of individuals, with an emphasis on lower caseloads for probation counselors, specialized training in harm reduction, and a more flexible approach to court-controlled sanctions and incentives.

Human Services and Homelessness – Increased Services and a Shift to Regional Governance

In terms of overall funding, the Mayor's 2020 Proposed Budget continues a strong commitment to serving the needs of those who find themselves experiencing homelessness in Seattle. Funding is maintained for current services and additional resources are proposed for an expansion of some existing programs. The specific proposals are described below. At the same time, initial funding will be provided to the newly formed King County Regional Homelessness Authority, which has been proposed in conjunction with King County to take over responsibility for the development and implementation of programs to both prevent homelessness and provide services to those who are experiencing homelessness. A funding allocation of \$2 million, paid for by part of a \$5 million donation from the developer that purchased the Mercer Megablock properties, will provide the one-time resources needed to stand up the agency.

The remainder of this donation will provide funding to address a number of other funding needs, including: the resources that may be needed to ramp down operations at two of the City-sanctioned tiny house villages and replace any lost shelter system capacity with increased space in other villages and enhanced shelters; the ongoing operation costs for the recently opened Mount Baker Family Resource Center; and one-time funding needed to sustain families enrolled in the pilot Seattle Rental Housing Assistance Program.

The budget also provides resources to sustain the City's Navigation Team at its current size and capacity level. The Human Services Department used one-time salary savings to expand the Navigation Team in 2019 by hiring two additional Field Coordinators. This expansion has allowed the Team to increase outreach services to those living in unsanctioned locations, and provided the resources needed to remove unsanctioned encampments with a focus on those blocking the right-of-way.

The budget also includes additional resources for Seattle Public Utilities, the Department of Finance and Administrative Services, and the Department of Parks and Recreation to expand the City's existing

2020 Proposed Budget Executive Summary

recreational vehicle remediation program. The budget makes an additional investment in 2020 to support the pilot Safe Parking Program originally funded through the 2019 Adopted and 2020 Endorsed Budget. These funds will be added to the \$250,000 already in the 2020 Endorsed Budget, expanding the program's 2020 budget by 50%.

The proposed budget also makes an additional inflationary adjustment for human service provider contracts. The 2020 Endorsed Budget contained a 2% inflationary increase for contracts that are funded by the City's General Fund. The City Council passed [Ordinance 125865](#) in July 2019, requiring that the City adjust all human services provider contracts by CPI-W each year. The proposed budget increases this adjustment to a total of 2.6% across nearly all City HSD contracts.

Transportation – Implementing the “Move Seattle” Levy and Investing in Mobility

As noted previously, the sale of the Mercer Megablock properties will generate significant revenues for the Seattle Department of Transportation (SDOT). Much of this money will be spent to repay previous outstanding debts, including for the construction of the Mercer Corridor itself (\$12.2 million), past operations of the South Lake Union Streetcar (\$3.6 million) and a recent Council-authorized allocation to the Center City Streetcar (\$9 million). In addition, \$9.2 million will be needed to address a decline in the forecast of Commercial Parking Tax revenues. This leaves \$16.7 million for new transportation investments. The 2020 Proposed Budget directs this funding into bicycle facilities, new sidewalks, sidewalk repair, curb ramps, and traffic calming devices that will be SDOT-owned and maintained. These Vision Zero projects were selected based on the priorities in the Bicycle Master Plan, the Pedestrian Master Plan and the Safe Routes to School Action Plan. These documents contain strong equity components, driving capital investments toward neighborhoods that are historically disadvantaged.

The 2020 Proposed Budget continues to support the Move Seattle Levy plan by including capital project staffing support, sidewalk and ADA improvements, multimodal corridor projects, bridge rehabilitation, and school zone safety enhancements. 2019 saw a ramp-up in delivery on many programs, including over 800 striped crosswalks; nearly 15 lane miles of paving; 12 blocks of new sidewalks; and 8 sidewalk block equivalents repaired. The funding in the proposed budget will support the various programs and keep on-track to meet annual planned accomplishments.

In addition, the 2020 Proposed Budget invests the remaining Seattle Transportation Benefit District (STBD) Proposition One revenues by adding 25,000 Metro transit service hours, beginning in March 2020, and continues funding for first/last mile transit service. These investments will support and increase mobility in areas where service gaps remain. The proposed budget also adds almost \$5 million to STBD's capital improvement program to fund items such as new bus shelter pads and benches, transit-only lanes, queue jumps and other spot improvements. Funding in the proposed budget continues to promote affordability and accessibility of transportation options through the ORCA Opportunity program, which provides transit passes to students. The STBD Proposition One measure will expire at the end of 2020.

Addressing Climate Change and Shifting to Carbon-free Energy Sources

In addition to the more traditional transportation funding outlined above, the Mayor's focus on climate change and the need to shift toward carbon-free energy sources is reflected in other transportation-related investments. An additional \$2.2 million is proposed to continue advance electrification of the

2020 Proposed Budget Executive Summary

City's vehicle fleet, as called for in the Green Fleet Action Plan. The budget also includes a proposed expenditure of \$600,000 by Seattle City Light to add six more direct current fast chargers for electric vehicles. The 2019 budget included funding for 20 stations and this additional investment will bring the total number of stations to 26. However, investments to reduce the use of carbon-based fuels are not limited to transportation. For example, the budget includes an additional \$1.5 million for the City's Municipal Energy Efficiency Program, which funds capital investments in City facilities that will reduce overall energy consumption, with a focus reducing the use of carbon-based fuels. Looking beyond the actions of the City government itself, Mayor Durkan also recently proposed legislation that would impose a tax on home heating oil, with the associated revenues dedicated to subsidizing homeowners to help offset the costs of converting from oil heat to more efficient electric heat pumps.

Investing in Community Assets

As noted above, much of the additional funding available for the 2020 Proposed Budget was from one-time sources and thus is most appropriately spent on one-time commitments. This has provided an opportunity for the City to meet the funding needs of several community organizations that have been seeking support for one-time capital investments. For example, using proceeds from street vacations associated with expansion of the Washington State Convention Center, the 2020 Proposed Budget includes \$500,000 to support Lambert House in its effort to purchase the facility it uses to provide services to LGBTQ youth in Seattle; \$1 million for the Chief Seattle Club to complete a major renovation and expansion of its facility in downtown Seattle; and \$500,000 to supplement funding awards for the Equitable Development Initiative. In addition, one-time investments are also proposed for redevelopment of a facility at Magnuson Park that the *Outdoors for All* organization will use to "enrich the quality of life for children and adults with disabilities through outdoor recreation" (\$1,000,000), and for International Community Health Services to pursue the development of a new facility on North Beacon Hill (\$1,000,000).

Fulfilling Commitments to City Employees

Following through on initial commitments that were made during last year's budget process, the 2020 Proposed Budget includes funding to increase staffing at the newly formed Office of the Employee Ombud, provides resources to the newly formed workplace investigations unit at the Seattle Department of Human Resources (SDHR), adds staff at SDHR to support anti-harassment and anti-discrimination training, and includes a new staff position at the Seattle Office for Civil Rights to support implementation of the Race and Social Justice Initiative. In addition, the budget includes the resources needed to fulfill the financial commitments made to City employees represented by the Coalition of City Unions, and to provide comparable increases to the compensation and benefits provided to the City's non-represented employees.

Race and Social Justice Initiative (RSJI)

Introduction

This chapter provides background and context for Race and Social Justice Initiative (RSJI)-related budget additions throughout the 2020 Proposed Budget.

[RSJI](#) is a Citywide effort to end institutionalized racism and race-based gaps in City government. A key component of achieving this goal is the examination of City policies, projects, initiatives and budget decisions to determine how each item impacts different demographic groups in Seattle. Launched in 2004, Seattle was the first U.S. city to undertake an effort that focused explicitly on institutional racism. Since then, King County, and other cities – including Minneapolis, Madison, and Portland – have all established their own equity initiatives. RSJI’s long-term goals are to change the underlying system that creates race-based disparities and to achieve racial equity, as well as to:

- End racial disparities within City government so there is fairness in hiring and promotions, greater opportunities in contracting, and equitable services to all residents;
- Strengthen outreach and public engagement, changing existing services using Race and Social Justice best practices, and improving immigrant and refugee access to City services; and
- Lead a collaborative, community-wide effort to eliminate racial inequity in education, criminal justice, environmental justice, health and economic success.

RSJI works to eliminate racial and social disparities across key indicators of success in Seattle, including: arts and culture, criminal justice, education, environment, equitable development, health, housing, jobs, and service equity.

Mayoral Direction

Soon after her inauguration, Mayor Jenny A. Durkan signed an Executive Order reaffirming the City's commitment to RSJI and a focus to apply a racial equity lens on actions relating to: 1) affordability, 2) education, 3) criminal justice, 4) environmental justice, 5) transportation equity, 6) labor equity, 7) women and minority business contracting equity, 8) removing internal structural and institutional barriers for City employees, and 9) arts and culture equity. The Executive Order also charged the Mayor’s Office to oversee and coordinate a review of the City’s current implementation of the RSJI and directed department directors, personnel within the Mayor’s Office, as well as the Mayor herself, to participate in implicit bias training.

Consideration of Race and Social Justice in the Mayor’s Office

Each City department has a “Change Team” – a group of employees that supports RSJI activities and strengthens a department’s capacity to get more employees involved. The team facilitates and participates in discussions on race and racism. The Mayor’s Office and the City Budget Office (CBO) created a combined Change Team in 2015. This team offers staff an opportunity to engage all levels of the Mayor’s Office in discussions around how to more consistently and effectively use an equity lens in policy and budget decision-making. These discussions increase individual and group understanding of how racism and other marginalizing factors affect equity and service provision.

Race and Social Justice Initiative (RSJI)

Consistent with established practice since the launch of RSJI, all 2020 budget adjustments were screened for RSJ impacts. Departments used the City's Racial Equity Toolkit (RET) or other tools to assess direct and indirect results of their proposals, and this analysis was then utilized in the decision-making process within CBO and the Mayor's Office.

Race and Social Justice Impacts in the 2020 Proposed Budget

This section highlights specific examples of RSJI considerations in the 2020 Proposed Budget.

Equitable Development Initiative (EDI)

The Equitable Development Initiative is coordinated by the Office of Planning and Community Development (OPCD) and guided by an interdepartmental working group from the Office of Housing (OH), Department of Neighborhoods (DON), Office of Economic Development (OED), Office of Arts & Culture (ARTS), Office of Civil Rights (OCR), Mayor's Office (MO), and City Budget Office (CBO). It is also informed by an external interim community advisory board and review committee representing impacted communities. The EDI program addresses historic and market inequities in Seattle's most marginalized communities and neighborhoods that have high displacement risk and low access to opportunity. Under the existing funding structure, approximately \$16 million of one-time funding is paying for capital and capacity building grants for 15 unique projects.

The 2020 Proposed Budget expands this commitment by providing \$15 million of proceeds from the sale of the Mercer Megablock in South Lake Union to create a revolving site acquisition loan fund for EDI projects. Loans will be repaid with permanent financing so that this can be a sustainable tool to serve future projects. In addition, \$500,000 of proceeds from this property sale will be used to begin community outreach and engagement and a feasibility evaluation for strategic land acquisition. The 2020 Proposed Budget also includes \$5.5 million of short-term rental tax revenues and unrestricted cumulative reserve funds for EDI grant awards, \$430,000 of federal Community Development Block Grant dollars, and \$1.1 million of General Fund for EDI administration and staff costs.

Child Care Assistance Program Expansion

The 2020 Proposed Budget includes Sweetened Beverage Tax (SBT) funding to expand the Child Care Assistance Program (CCAP). CCAP provides financial assistance to low and moderate-income families to pay for child care. The subsidies are based on a sliding scale and the program is designed to support families who make too much money to qualify for the State's Working Connections Child Care program which only supports families up to 200% of the Federal Poverty Level (FPL). DEEL currently contracts with approximately 180 Seattle licensed child care providers. In 2018, 648 vouchers were issued to 491 families. More than 80% of the families that received child care vouchers identified as families of color.

As of September 1, 2019, the sliding scale for the voucher subsidies increased from 300% Federal Poverty Level (FPL) to 350% FPL or approximately \$90,000 for a family of four. The 2020 Proposed Budget continues funding for this expansion, reflects increases in costs for providers, and provides funding for increasing enrollment at lower income levels. DEEL conducts an annual market rate study and the voucher rates are adjusted to reflect the increased costs of child care. The 2020 Proposed Budget also includes additional funding and supports for child care providers who participate in the CCAP program.

Race and Social Justice Initiative (RSJI)

Seattle Youth Employment Program Expansion

The Seattle Youth Employment Program serves youth that are from vulnerable and historically disadvantaged communities. The proposed expansion from a summer only model to a year-round model increases career navigation, exploration, and skill-building opportunities for youth from these communities. HSD does not plan to use a Racial Equity Toolkit for this proposal. HSD has applied Results Based Accountability to develop its theory of change and will have focus populations

SHA Rental Assistance Program Pilot Extension

SRHAP analyzes outcomes and practices by race and ethnicity and will arrive at equity recommendations or goals, with RET guidance, by the end of the pilot. HSD established in its 2017 Homelessness Investments RFP that increasing the rates at which Black/African American households maintain permanent housing through a homelessness prevention project can impact the percentages of people that are living unsheltered and interrupt overrepresentation among Black/African-American households in the homeless services system. The SRHAP pilot is a part of this plan to address racial disparities in services. More than half (52%) the SRHAP participants are Black or African American; this percentage is greater than the percentage of Black or African Americans who are homeless in the region and living in Seattle. Language Access Plan (LAP): Staff across four nonprofit agencies work to ensure that immigrant and refugee English language learners are able to access the information and services they need. Agencies offer support in Spanish, Somali, Amharic, Tigrinya, Marshallese, Vietnamese, Cantonese, Arabic, Oromo, Hindi, and Urdu. Agencies have transferred clients to one another as needed to support SRHAP household language needs. Agencies are also available to SHA to increase the percentage and amount of program materials translated into multiple languages as needed. Continual investment in all four agencies can maintain language access for the entire pilot: eliminating just one of the smallest programs would limit the availability of Arabic, Oromo, Amharic, Somali, Tigrinya, Hindi, Urdu, and Spanish for the pilot and SHA.

Mt. Baker Family Resource Center

The agencies indicated that the proposed families to be served through the Mt. Baker Family Resource Center include families of color who are low income and may have experienced homelessness. The agencies proposed that bilingual services will be provided by REWA for families who are English Language Learners.

Investments to Improve Homeownership Opportunities and Creating ADUs

The Office of Housing (OH) will invest \$21 million of the proceeds from the sale of the Mercer Properties towards increasing affordable housing. OH will use \$15 million to improve homeownership opportunities and \$6 million to support the Mayor's goal of nearly doubling the City's portfolio of permanently affordable homes, affordable to households earning less than 80% of Area Median Income (AMI). OH will also use \$6 million to pilot a loan program to help low- and moderate-income families create affordable ADUs.

Race and Social Justice Initiative (RSJI)

Continuation of 2019 Navigation Team Expansion

The homeless population is disproportionately made up of people of color, ethnic minorities and LGBTQ. The Navigation Team addresses public safety and public health concerns by conducting outreach to encampment inhabitants, connecting them to resources, including shelters and tiny house villages and other resources aimed at helping them move toward housing. Field coordinators play a critical role in these operations; they serve as the project manager for site engagements, offer and provide storage to encampment occupants, and work closely with outreach to ensure that people living unsheltered are connected to resources.

Additional Funding for Safe Parking Pilot

In 2019, a majority of individuals experiencing homelessness in Seattle/King County identified as people of color. An estimated 42% of individuals identified as White, 32% identified as Black or African American, 10% identified as American Indian or Alaska Native, 4% identified as Asian, and 3% identified as Native Hawaiian or Pacific Islander. Eight percent (8%) of individuals identified with multiple races. Additionally, an estimated 15% of individuals identified their ethnicity as Hispanic or Latino. When compared to the demographic racial profiles of Seattle/King County's general population, disparities were observed among those identifying as Black or African American (32% compared to 27%), as American Indian or Alaska Native (10% compared to 3%), and with Native Hawaiian or Pacific Islander (3% compared to 1%).

The racial equity goals for this pilot will be determined as the project gets more fully underway. The goals will be incorporated into the services and management plan. The Urban League has access to interpreters and language line services to provide services to non-English speaking clients.

Startup Costs for King County Regional Homelessness Authority

Homelessness is often a symptom of structural and institutional racism. Homelessness occurs as a result of a variety of factors, principle among them the legacy of slavery, Jim Crow laws and legislated redlining, all of which have collectively resulted in, among other things, a disparity in wealth by race and ethnicity that, by some accounts, places wealth accumulation of African American households over 200 hundred years behind White households. The result is a phenomenon referred to as network impoverishment, or the financial impoverishment of one's support network to such a degree that they cannot provide support and assistance in times of crisis. In other words, through systematic impoverishment of communities of color, institutionalized racism has reduced the ability of these communities to backstop people in times of crisis, resulting a higher likelihood that people of color will experience homelessness. In King County, nearly two-thirds of people experiencing homelessness are people and families of color. African Americans are five times more likely to experience homelessness than their white counterparts in King County and American Indian and Alaska Native individuals are seven times more likely to experience homelessness.

One of the primary goals of Regional Governance is to build a system that places equity and customer voice at the center. To do that, customers and equity advocates have been closely involved in the design

Race and Social Justice Initiative (RSJI)

of the new Regional Authority structure, with particular focus on the Governing Board. Specifically, persons with lived experience and organizations representing their perspective expressly identified the need for the Governing Board to not merely consider customer voice, but more importantly include persons with or representing Lived Experience in all levels of governance – the Steering Committee and the Governing Board.

To ensure equity is at the center of the Regional Authority's work, the Authority will proactively seek to eliminate disproportionalities in the population experiencing homelessness and disparities in outcomes for people experiencing homelessness by directly addressing structural racism, ableism, homophobia, transphobia, misogyny and other sources of inequities. To this end, the Authority will establish and operate under an equity-based decision-making framework that shall guide its policy, business processes, and funding activities. This equity-based decision-making framework will establish a prioritization of customers of the service system and people with lived experience of homelessness as decision-makers in both system operations and policy development; a process for driving program and policy proposals based on customer feedback; a process for examining all policy, business process, and funding decisions with an explicit equity and racial justice analysis; a set of strategies to advance equity and racial justice. It will provide for the mitigation of unintended negative consequences; processes to ensure policy and program direction adapts to customer feedback and in response to negative impacts on communities of color; and establish processes to measure, evaluate, and respond to the impact of its decision-making on its goals of advancing equity.

Keeping the customer at the center of the Regional Authority's work requires intentional design to ensure that customer experience is at the heart of program design and customer voice is not merely valued but reflected in every aspect of the Authority's work. The Governing Board will ensure the creation of an Office of the Ombud with the goals of establishing an accountability structure for customers and employees of the Authority and its homeless service system; and promoting customer confidence in the system and the Authority's ability to quickly and appropriately meet the needs of people experiencing homelessness.

Commitment to customers and employees necessitates attention to accessibility. Within six months of formation, the Authority will prepare an initial work plan that, among other things, will describe an organizational structure, a plan for initial implementation of contracted services and a description of major goals and activities that the PDA will undertake until approval of its first Five-Year Plan. This first implementation plan will include ways in which it will address accessibility for employees and customers, including a plan to ensure that language needs of customers, staff and the general public are met.

Nurse Call Line

The new nurse call line is designed to benefit individuals experiencing homelessness, which are disproportionately people of color. According to the 2019 *Point-in-Time Count*, a majority of individuals experiencing homelessness in Seattle/King County identified as people of color. An estimated 42% of individuals identified as White, 32% identified as Black or African American, 10% identified as American Indian or Alaska Native, 4% identified as Asian, and 3% identified as Native Hawaiian or Pacific Islander. Eight percent (8%) of individuals identified with multiple races. Additionally, an estimated 15% of individuals identified their ethnicity as Hispanic or Latino. When compared to the demographic racial

Race and Social Justice Initiative (RSJI)

profiles of Seattle/King County's general population, disparities were observed among those identifying as Black or African American (32% compared to 27%), as American Indian or Alaska Native (10% compared to 3%), and with Native Hawaiian or Pacific Islander (3% compared to 1%).

Onsite Nurses at Shelter and Permanent Supportive Housing Locations

Attaching medical services to the shelter or PSH site can satisfy outstanding needs of people experiencing homelessness who are disproportionately Black or African American, American Indian or Alaska Native, and Multi-racial as compared to their percentages in the general population in Seattle/King County.

In 2019, All Home reported that a majority of individuals experiencing homelessness in Seattle/King County identified as people of color. An estimated 42% of individuals identified as White, 32% identified as Black or African American, 10% identified as American Indian or Alaska Native, 4% identified as Asian, and 3% identified as Native Hawaiian or Pacific Islander. Eight percent (8%) of individuals identified with multiple races. Additionally, an estimated 15% of individuals identified their ethnicity as Hispanic or Latino. When compared to the demographic racial profiles of Seattle/King County's general population, disparities were observed among those identifying as Black or African American (32% compared to 27%), as American Indian or Alaska Native (10% compared to 3%), and with Native Hawaiian or Pacific Islander (3% compared to 1%).

In a data scan of the top five PSH sites, there are people who are disproportionately impacted by homelessness who can benefit from nursing staff on site:

- 26% Black or African American
- 11% American Indian or Alaska Native
- 6% Hispanic/Latino
- 3% Multiple Races
- 1% Native Hawaiian or Pacific Islander

100% are living with a disability including:

- 82% mental health problem
- 76% substance use disorder
- 48% physical disability
- 39% chronic health condition

Data was pulled from HMIS on 08/27/2019 for 01/01/2018 through 06/30/2019.

Likewise, staff from the outreach continuum and Seattle Navigation Team, permitted villages, and Navigation Center all report seeing people they engage with who need support to meet immediate and ongoing medical needs and activities of daily living that can be greater addressed by on-site nursing staff. People with outstanding post-surgical, pregnancy, or post-partum needs would be better served at a shelter and/or PSH site designed with medical services, rather than in programs that must scramble to generate necessary medical services or referrals.

Race and Social Justice Initiative (RSJI)

CDBG Capital Investments

This proposal supports organizations and projects designed to support historically disadvantaged communities; ICHS specifically serves the Asian Pacific Islander community; SHA provides housing for low-income households in need of subsidized housing. Systemically, non-white populations are over-represented in being excluded from housing and income opportunity.

Domestic Violence Hotline

In Seattle and King County, an estimated 132,000 women and 86,000¹ men experience some form of intimate partner violence every year. Domestic violence has devastating physical, emotional, and economic consequences for survivors, their children, perpetrators, and their communities. It is the immediate cause of homelessness for approximately 50% of homeless women and children², as well as a significant contributor to poor physical and behavioral health for many adults and children. Due to the impacts of current and historical trauma and oppression, families of color, refugees and immigrants, and other marginalized people are at highest risk for experiencing domestic violence, and they also encounter the greatest barriers to accessing help. For example, immigrant and refugee survivors and other survivors of color are unlikely to consider calling 911 when they are in danger, for fear of deportation, incarceration, and loss of custody of their children.

Safety RFP Ramp-Down Funding

The Safety RFP award review committee members represented and worked with the priority and focus populations of this RFP. Raters hold content expertise with addressing the impacts of the criminal legal system in the City of Seattle, King County, and Washington State. Raters were age, gender, and ethnically diverse and represented multiple cultures and communities: Black, African-American, Native, Black/Mexican, Black (mixed), Brown (mix), South Asian, Asian/Filipino, Asian, African-American/Pacific Islander, Middle Eastern, Hispanic/Latino, LGBTQ, bilingual, and white. The review committee participated in a two-hour session with the Black Prisoners' Caucus (BPC) Chapter from Stafford Creek Corrections Center and a session led by the Seattle Office for Civil Rights. To prepare for the review process, the review committee discussed the anti-racist principles and strategy chart of the People's Institute for Survival and Beyond as guidance and tools when rating applications.

Staff Capacity to Support Food Programs

This funding provides increased support to programs that increase racial equity. People of color experience food insecurity at higher rates than non-Hispanic Whites. Native Hawaiian and Pacific Islanders are 3 times more likely to experience food insecurity compared to non-Hispanic Whites. Black/African Americans are 2.5 times and American Indian/Alaskan Native, Hispanic/Latinx and Asians are 2 times more likely to experience food insecurity compared to non-Hispanic Whites. Food and meal

¹ Centers for Disease Control, National Intimate Partner and Sexual Violence Survey, 2010 & 2015

² The National Center on Family Homelessness, Addressing Issues Facing Families Who are Homeless, 2013

Race and Social Justice Initiative (RSJI)

programs have historically been low barrier programs providing low income families and families of color access to food through location, cultural competency and service delivery style. Food programs are also one of the few accessible services for undocumented clients. HSD used the Racial Equity Toolkit in planning for the 2019 Food and Nutrition RFP and conducted a robust community engagement process with over eleven listening circles and focus groups including two focus groups of food bank clients. All community input was integrated into planning for food and meal investments, which received a significant increase from the Sweetened Beverage Tax.

Additional Staff to support Utility Discount Program

The two pockets will increase capacity to reach the increased household enrollment goals through outreach. The additional capacity will allow staff with fixed call center schedules to attend RSJ trainings and activities. RSJ trainings and activities develop the ability of staff to serve our diverse population of customers through an RSJ lens. A RET will not be used for this proposal because UDP currently serves vulnerable populations and most customers come from areas in the City that are historically disadvantaged. This proposal incorporates Language Access Plan strategies through UDP's community outreach efforts. Outreach efforts target populations with translation and interpretation needs through engagement with local community-based organizations that provide services to immigrant populations.

Citywide Outreach & Engagement Expansion

The Mayor is committed to improving the City's outreach and engagement efforts, especially to historically under-served communities. As part of her commitment, the Mayor has asked the Department of Neighborhoods (DON) to improve the coordination of outreach and engagement by departments through the 2020 budget process. DON is to serve as a strategic advisor to departments so communities can better access City services and information and provide feedback in a more streamlined way. The 2020 Proposed Budget expands the DON's current portfolio to lay the Citywide groundwork to improve how departments provide outreach and engagement. A position will be added to negotiate Memorandums of Understanding (MOUs) with the first cohort of partner departments, including Finance and Administrative Services, the Office of Sustainability and the Environment, Human Services Department, Seattle Information Technology, Seattle City Light, and Seattle Public Utilities. MOUs with partner departments will identify funding to support two additional full-time positions, to be added via supplemental requests in 2020.

Community Outreach and Engagement

Using the Racial Equity Toolkit, the Office of Arts and Culture (ARTS) found the need for more dedicated support to reach communities of color, refugees, and others who have not historically benefited from ARTS' programs. To reach ARTS' racial equity goals of meeting artists who haven't had access to these resources previously requires additional, dedicated communications and outreach capacity that can focus on digging deeper into community engagement opportunities and partnering strategically with community partners. This kind of outreach takes more time and relationship building than traditional modes of media. The 2020 Proposed Budget adds a community outreach and engagement manager to provide expanded reach for open grants, calls for artists, professional development opportunities,

Race and Social Justice Initiative (RSJI)

events, and workshops. This new position will also support ARTS' Language Access Plan and other accessibility efforts, maintain grants, maintain the website, and other communications needs.

Expansion of Small Business Support

The Office of Economic Development (OED) will expand the tools available to the Only in Seattle (OIS) program to include two designated funds to assist more small businesses, the Business Stabilization and Tenant Improvement Funds. The Business Stabilization Fund will help small businesses facing short-term emergencies, such as theft, vandalism, or emergency repairs, with a focus on those in high-risk displacement neighborhoods. The Tenant Improvement Fund encourages the development of affordable commercial tenant improvements for businesses in high displacement risk areas. Both these funds are part of the office's new Inclusive Economy Agenda, which aims to reduce barriers to economic success for small business owners.

Eliminate Fines for Overdue Library Materials

The 2019 Library levy eliminates fines for overdue materials and uses levy resources as a revenue replacement for these funds. Approximately 10% of all accounts that have had a check-out within the last three years are blocked due to fines and fees and patrons are unable to borrow materials. Other library systems have found borrowers return materials at the same or higher rates after fines are eliminated. Overdue fines impact “low opportunity” neighborhoods more significantly because patrons who are unable to pay fines are blocked regardless of whether they return materials or not. Removing fines will increase access to library materials. Over a 7-year period, the levy includes \$8 million to replace lost fine revenue.

Pre-Filing Diversion Program Funding of Choose 180 Workshops

The 2017 Adopted Budget created the Pre-Filing Diversion Program led by the Law Department with assistance from the Seattle Municipal Court. In a 2017 Racial Equity Toolkit (RET) analysis, it was determined that additional services were required to meet racial equity needs of participants, including pre- and post-workshop support and connection with resources in a timely manner. The department conducts six workshops per year, providing one every other month. The six workshops have been funded through carryover budget due to the late start of the program in 2017. For 2020, the department requested \$25,000 to continue the same level of service. An additional \$75,000 is added to increase the workshops to one a month. With 12 workshops per year, participation is expected to increase with a more immediate connection to resources.

The letter sent to young adults inviting them to take part in diversion has been translated into 14 different languages. Telephonic interpretation services are provided to Choose 180 for their outreach and in-person interpretation is provided to participants attending the workshop.

Seattle Police Department Diverse Police Officer Recruitment and Hiring

Race and Social Justice Initiative (RSJI)

The budget supports the department's ongoing efforts to recruit and hire quality, diverse police officers in 2020 above current staffing levels. It is important to both Chief Best and the Mayor to focus on building a department that represents the community it serves. Recognizing the significance of hiring diverse police officers and understanding that the current hiring plan is aggressive, the budget includes continued funding in support of continuing recruiting efforts.

Repurpose Funding for Aquatic Equity Initiatives

The 2020 Proposed Budget repurposes funding in SPR's budget to provide more impactful, equity-focused investments in aquatic programming. Specifically, it will equalize service levels at its 22 wading pools to maintain a consistent operating schedule for community and staff; eliminate the low-income swim fee at all pools; and expand the lifeguard training program with a focus on recruiting diverse, low-income youth to participate in the program.

Expand Recreation Programming with Sweetened Beverage Tax Funds

The 2020 Proposed Budget adds \$150,000 of Sweetened Beverage Tax (SBT) funds to expand summer programming for youth including Destination Summer Camps and the Summer of Safety program. Destination Summer Camps are highly subsidized, low-fee activity camps sited in low-income neighborhoods. In 2018, the department piloted this program with external funding at Garfield Community Center and had more than 580 program registrations. Funding from the Sweetened Beverage Tax will provide a sustainable funding source for this program and allow for expansion to additional sites in Southeast Seattle. The Summer of Safety program provides free, structured recreation for youth not otherwise engaged in formal programming. Sweetened Beverage Tax funds will increase the number of days the program can operate at its existing locations.

Add Funding for Outdoors for All

Outdoors for All enriches the quality of life for children and adults with disabilities through outdoor recreation. In March 2019 through a RFP process, Outdoors for All was awarded the right to renovate and use Building 18 for its future headquarters. This item adds \$1 million to SPR's budget as an award from the Mayor's Office to Outdoors for All to help fund capital improvements necessary to renovate the building.

Sidewalk Accessibility and Safety

As part of an Americans with Disabilities Act consent decree, the City will invest in constructing 1,250 curb ramps annually, increasing accessibility to sidewalks and streets. In addition to curb ramps, the budget includes funding to address sidewalk defects across the City, which will make the sidewalks safer and more accessible.

Race and Social Justice Initiative (RSJI)

Digital Equity/Technology Impacts

The Seattle Department of Transportation recognizes the inequities and impacts that can be created via service and transportation models that may require access to or utilization of personal technologies that many underserved residents may not possess (access to mobile payment system, park-by-plate, etc.). This plan will allow SDOT and the City to identify where these perceived advancements can negatively impact certain resident demographics, and where alternative solutions can be equally beneficial and cost effective.

By proactively creating a strategic plan for technology improvements and investments, Seattle can ensure that disparate negative outcomes or burdens, such as construction impacts or loss of business parking, on people of color and historically neglected communities are minimized or eliminated. We will also consider equity as a large component in prioritizing these improvements, making sure to provide high levels of service in areas with lower access to opportunity and high density of people of color and recent immigrants.

School Safety Improvements

Projects within the Pedestrian Master Plan and the Safe Routes to School Action Plan contain strong equity components, driving capital investments toward neighborhoods that are historically disadvantaged. Schools with higher percentages of non-white or Hispanic students receive a higher priority score during the selection process.

Increase Capacity for the Office of the Employee Ombud

The Office of the Employee Ombud (OEO) serves as an independent resource for City employees who have questions, concerns and complaints regarding workplace experiences that are not in alignment with the City of Seattle's workplace expectations. In early 2019, the Director conducted nearly a dozen listening sessions with City employees and the consistent themes that emerged in these sessions centered on race, class and gender related discrimination. Additional staff and a more strategically accessible office will increase the OEO's ability to address these concerns, providing greater capacity and a confidential space. In addition to working with individual employees, OEO is working to further dismantle institutional racism by engaging with policy improvements that support the City's continuous effort to provide every City employee a safe and respectful workplace.

Improving the City's Response to Misconduct Allegations

The Mayor's Executive Order (EO) 2018-04 directed SHDR to establish a Human Resources Investigations Unit (HRIU) as part of the City's initial actions to improve the response to, and thoroughly investigate, employee allegations of harassment, discrimination, retaliation and harassment-related misconduct. Centralizing and establishing consistent practices in investigations is foundational in addressing the disparities that the RSJI Survey reported pertaining to employee concerns over harassment and discrimination. The RSJI Survey found that 80% of respondents who experienced gender-based incidents

Race and Social Justice Initiative (RSJI)

of harassment in the workplace did not seek help; 29% of women of color and 18% of men of color reported experiencing different workplace treatment due to their race; and 30% of women of color and 37% of white women reported experiencing different treatment due to their gender. The 2020 Adopted Budget finalizes the establishment and funding of the HRIU, allowing the work to address these disparities to continue.

Increase RSJI Training Capacity

In May 2018, the Mayor issued Executive Order (EO) 2018-04: Anti-Harassment and Anti-Discrimination. Among other things, the EO tasked the Seattle Department of Human Resources (SDHR) director and the Seattle Office for Civil Rights director to develop anti-harassment and anti-discrimination training. SDHR was also directed to work with all departments to develop a training plan for employees to include anti-harassment and anti-discrimination training and bias training. The two departments have worked collaboratively to assess the training needs of executive departments and develop a training plan. The demand for trainings far exceeds the capacity that the two departments have for providing trainings. To respond to the EO, and meet department training needs, the 2020 Proposed Budget adds two positions to SDHR and one position to OCR. SDHR is the lead department on the EO and the training plan. The OCR position will add capacity to the department to do RSJI training and partner with SDHR on embedding RSJI in the anti-harassment and anti-discrimination trainings, described below.

Anti-Harassment/Anti-Discrimination (AH/AD) Training

Implementation of the AH/AD trainings is one of the first steps in creating a safe, welcoming and inclusive workplace for all employees where discrimination and harassment is not tolerated. In 2020, SDHR and OCR are partnering to create a Train-the-Facilitator Program (TTF) in which employees will know how to:

- Define harassment, discrimination and inappropriate behavior in the workplace and which actions and behaviors should be reported
- List ways to respond to discrimination, harassment and inappropriate behavior in the workplace and resources to reach out to or make referrals to
- Identify behaviors that foster a workplace culture that prevents harassment and discrimination from taking place
- Explain the role that bystanders have when witnessing discrimination, harassment and inappropriate behavior in the workplace
- Explain what bystanders can do upon witnessing harassment, discrimination and inappropriate behavior

The training of approximately 11,000 City employees carries out the primary goal of RSJI of having a racially knowledgeable workforce able to intervene and respond to instances of harassment and discrimination to create culture change that positions the City as an employer of choice. The TTF will utilize strong facilitators who understand and model an equity framework and look at existing groundwork to consider how best to assess and ensure a strong level of facilitation and RSJ competency.

Race and Social Justice Initiative (RSJI)

Statewide Initiative 1000 Implementation

Statewide Initiative 1000 (I-1000) provides agencies with the authority to establish and implement affirmative action programs. With the passing of I-1000, agencies are still prohibited from granting preferential treatment to groups based on race, sex, age, sexual orientation, veteran status, ethnicity and disability. However, agencies now may establish affirmative action programs that allow setting and achieving goals for these protected groups with the purpose of increasing diversity within defined areas provided no quotas or set asides are used.

The City is committed to equity and inclusion within its contracting program, employee hiring and recruitment and education opportunities for Seattle students. This budget funds a body of work that includes a review of how the City's current policies and aspirational goals fit into initiative requirements, support of a Citywide disparity study and development/implementation of any policy or procedural changes necessary to be in compliance.

I-1000 gives the City an opportunity to increase racial equity within the City's contracting, employment and educational policies and programs.

General Fund Revenue Overview

City Revenue Sources and Fund Accounting System

The City of Seattle budget authorizes annual expenditures for services and programs for Seattle residents. State law authorizes the City to raise revenues to support these expenditures. There are four main sources of revenues. First, taxes, license fees, and fines support activities typically associated with City government, such as police and fire services, parks, and libraries. Second, certain City activities are partially or completely supported by fees for services, regulatory fees, or dedicated property tax levies. Examples of City activities funded in-whole or in-part with fees include certain facilities at the Seattle Center, recreational facilities, and building inspections. Third, City utility services (electricity, water, drainage and wastewater, and solid waste) are supported by charges to customers for services provided. Finally, grant revenues from private, state, or federal agencies support a variety of City services, including social services, street and bridge repair, and targeted police services.

The City accounts for all revenues and expenditures within a system of accounting entities called “funds.” The City maintains numerous funds. The use of multiple funds is necessary to ensure compliance with state budget and accounting rules and is desirable to promote accountability for specific projects or activities. For example, the City of Seattle has a legal obligation to ensure revenues from utility use charges are spent on costs specifically associated with providing utility services. As a result, each of the City-operated utilities has its own fund. For similar reasons, expenditures of revenues from the City’s various property tax levies are accounted for in separate funds. As a matter of policy, several City departments have separate funds. For example, the operating revenues and expenditures associated with those revenues for the City’s parks are accounted for in the Park and Recreation Fund. The City also maintains separate funds for debt service and capital projects, as well as pension trust funds, including the Employees’ Retirement Fund, the Fireman’s Pension Fund, and the Police Relief & Pension Fund. The City holds these funds in a trustee capacity, or as an agent, for current and former City employees.

The City’s primary fund is the General Fund. The majority of resources for services typically associated with the City, such as police and fire or libraries and parks are received into and spent from one of two funds of the City’s general government operation: the General Fund for operating resources and the Cumulative Reserve Fund for capital resources.

All City revenue sources are directly or indirectly affected by the performance of the local, regional, national, and even international economies. For example, revenue collections from sales, business and occupation, and utility taxes, which together account for 55.5% of General Fund revenue, fluctuate significantly as economic conditions affecting personal income, construction, wholesale and retail sales, and other factors in the Puget Sound region change. The following sections describe the current outlook for the local and national economies, and present greater detail on forecasts for revenues supporting the General Fund and the Cumulative Reserve Fund.

National Economic Conditions and Outlook

“As Janet Yellen says, expansions don’t die of old age. I like to say they get murdered instead.”

- Ben Bernanke

Long live the expansion. The economic expansion that began after the Great Recession ended in June 2009 is now 123 months long, making it the longest expansion in U.S. history. However, compared to

1423

Revenue Overview

the previous expansions it is weaker, with real gross domestic product (GDP) growth averaging only 2.3% per year. Over the course of the recovery, the economy has been adding on average 169,000 jobs each month and the unemployment rate has gradually fallen from its 10.0% peak in October 2009 to 3.7% in July 2019. Wages have risen rather slowly, on average at 2.1% per year, but have slightly outpaced the consumer price inflation which averaged 1.7% per year.

Figure 1. Annual U.S. Real GDP Growth

Source: U.S. Bureau of Economic Analysis, IHS Markit.

Increased uncertainty and economic slowdown ahead. Even though the fundamentals of the U.S. economy appear solid, with continued job and income growth and strong consumer spending, there are increased concerns regarding the future. The rate of economic growth has been decreasing steadily for several decades and is expected to decline further in coming years. It was temporarily stimulated in 2018 by the Tax Cuts and Jobs Act which lowered individual and corporate federal taxes and the Bipartisan Budget Act, which boosted federal spending in 2018 and 2019. This stimulus was however considered by many economists as poorly timed, possibly overheating the economy and causing a boom-bust cycle.

In addition, the overall increase in policy uncertainty and recent escalation in the trade war between the U.S. and China make it more difficult for businesses to anticipate costs and demand. A new study by Federal Reserve economists suggests that the increased trade policy uncertainty could lower growth by about 0.5% in 2019 and 1% in 2020. Combined with a slowdown of global demand, this leads to lower investment and hiring by firms, which could also lower confidence and spending by consumers, thus increasing the risk of a recession. Greater uncertainty about the future has already increased volatility in financial markets and lowered long-term Treasury yields. The 10-year Treasury yield dropped below the 2-year Treasury yield at the end of August 2019. Similar inversions preceded each of the past seven recessions by about 18 months on average. In the September 2019 Wall Street Journal Economic Forecasting Survey of economists, the average probability of recession in the next 12 months was 34.8%, up from 17.7% a year ago. The IHS Markit August 2019 recession probability estimate for the next 12 months is 35%. Finally, based on the 2019Q2 Duke University/CFO Global Business Outlook 68.8% of the 237 U.S. CFOs that participated in the survey believe that a recession will have begun by the end of 2020.

Revenue Overview

In response to recent economic developments and outlook, the Federal Reserve has lowered interest rates in July 2019 for the first time since the last recession, and another rate cut is very likely in September 2019.

Figure 2. Probability of a U.S. Recession In Next Twelve Months

Seattle Metropolitan Area Economic Conditions and Outlook

Despite the weak national recovery, the Seattle area economy has grown rapidly. Since the Great Recession ended in June 2009, the region's economy has outperformed the national economy by a considerable margin. This is reflected in the region's robust job growth and low unemployment rate. Seattle Metro Area (King and Snohomish Counties) employment increased by 28.2% from its post-recession low in February 2010 through July 2019. This compares to a 16.7% gain for the U.S. and a 19.1% gain for the rest of Washington state (see Figure 3). In July 2019, the seasonally adjusted unemployment rate for the Seattle metro area was 3.2%, compared to 4.6% for Washington and 3.7% for the U.S. The region has also outpaced the nation and the state in both income and wage growth during the recovery.

Revenue Overview

Figure 3. Employment Growth: February 2010 to July 2019

*King & Snohomish Counties.

Source: WA Employment Security Dept., U.S. Bureau of Labor Statistics.

Although virtually all sectors of the region's economy have seen employment increase during the recovery, the principal driver of growth has been high-technology business. Foremost is Amazon, which has increased its Seattle area employment from less than 10,000 in 2010 to more than 45,000 in 2019. Google and Facebook each have more than 3,000 employees in the region, and other Silicon Valley firms have opened or expanded Seattle area offices. In addition, local firms, including Microsoft, Tableau, and Zillow, have been growing, and new firms have emerged. Strong growth in the technology sector and other basic industries has spurred growth in construction, real estate, and business and professional services.

Strong employment growth has drawn workers and job seekers to the region, boosting the region's population. Between 2010 and 2019, the population of King and Snohomish Counties increased by 400,000 (15.5%). Slightly more than a third of that increase took place in Seattle. Strong population growth has stimulated employment in the local serving sectors of the economy, including retailing, eating and drinking places, and health care.

Employment growth peaked in the first half of 2016 and has been slowing gradually since then (see Figure 4). One cause of the slowing has been job reductions at Boeing. Between December 2015 and September 2017, Boeing reduced its Washington employment by 12,600. In addition, there are signs that Amazon's pace of growth slowed in 2018 and 2019.

Revenue Overview

Figure 4. Seattle Metro Area* Year-over-Year Employment Change

*King and Snohomish Counties. Source: WA Employment Security Dept.

Seattle has been home to an outsized share of metro area growth during the recovery. The region's economic growth during the current recovery has been concentrated in the city of Seattle. Both employment and population growth have been more robust in Seattle than in the rest of the region. The difference has been most pronounced for population growth. Between 2010 and 2018 Seattle's population increased by 138,640, a 22.8% gain, to reach 747,300 (see Figure 5). The increase for the rest of the metro area (the rest of King and Snohomish Counties) was 12.9%.

Figure 5. Annual Population Growth, City of Seattle*

*April 1 data. Source: WA Office of Financial Management.

Revenue Overview

The biggest driver of growth in the city has been Amazon, which has added more than 35,000 jobs since 2010. Also contributing the city's growth have been other technology businesses, and business and professional service firms. Employment growth at these businesses, along with the current popularity of in-city living, has boosted the demand for office space and housing in the city, spurring a construction boom. Initially construction was focused in new apartments and public construction, but over time activity has broadened to include more office projects and condominiums. In 2017, the City issued building permits valued at a record \$5.0 billion (see Figure 6).

Figure 6. Value of Building Permits Issued, Seattle

Source: Seattle Dept. of Construction and Inspections.

The Seattle metro area economy is expected to continue slowing. The economic forecast for the metro area assumes that 2016 will be the peak year for employment and population growth during the current cycle, and that the slowing which began in 2017 will continue going forward (see Figure 7). 2019 will see moderate growth, but it will be followed by a fairly steep slowdown in 2020 and 2021. Driving the deceleration is the forecast for the U.S. economy, which predicts the nation's economy will slow as the impact of the 2018 tax cuts wanes and the trade war and slowing world economy take their toll. At the local level, the forecast assumes Amazon's growth will continue to slow and that construction employment will fall gradually for several years after peaking in 2019.

Revenue Overview

Figure 7. Annual Growth of Seattle Metro Area* Employment

*King and Snohomish Counties. Source: WA ESD, City of Seattle Budget Office.

The risks to the forecast are high in large part because the probability of a national recession is elevated. A national recession would almost certainly precipitate a regional recession. Even if a national recession is avoided, there are sources of risk and uncertainty in the local economy, including the outlook for the current construction cycle and the fortunes of the region's technology sector, including major employers Boeing, Amazon, and Microsoft.

Construction activity is highly cyclical, with periods of strong growth often, but not always, followed by steep downturns. The city is currently well into a boom period, with the value of building permits issued annually having more than tripled since 2010. The regional economic forecast incorporates a modest construction downturn beginning in 2020, but a more severe downturn is possible, particularly if there is a national recession.

Risks for Boeing include the federal government's expanding trade war, the risk of a national recession, and the grounding of the 737 MAX. As the nation's biggest exporter, Boeing is vulnerable to trade war retaliation, and national recessions have always been followed by employment reductions in the aerospace industry. Boeing's most immediate problem is resolving the safety issues that have led to the grounding of the 737 MAX. If the return of the MAX is delayed longer than currently anticipated, Boeing has said it might temporarily halt MAX production and lay off workers at its Renton facility.

A major source of uncertainty is the future course of Amazon in the region. The company's decision to sublease rather than occupy the Rainier Square Tower suggests its expansion in Seattle will continue to slow. However, Amazon has been both purchasing and leasing office space in Bellevue, and the firm is in the process of moving its worldwide operations unit from Seattle to Bellevue. At the same time, Amazon is developing a second headquarters in Virginia.

Consumer Price Inflation

Inflation remains moderate, effect of trade tariffs likely to be small. The Great Recession pushed inflation into negative territory in 2009, the first time in 54 years that consumer prices had declined on

Revenue Overview

an annual basis. During the subsequent recovery, inflation has remained subdued, with the U.S. Consumer Price Index for All Urban Consumers (CPI-U) averaging 1.8% per year over the period 2010-2018. For the 12-month period ending in July 2019, the U.S. CPI-U increased by 1.7%.

Local inflation tends to track national inflation because commodity prices and national economic conditions are key drivers of local prices. Seattle inflation has been, however, running higher in recent years due to the region's high housing price inflation. From 2011 to 2018, the Seattle CPI-U has grown on average 2.3% each year, compared to 1.8% for the U.S. CPI-U. Average annual housing inflation for this period was 3.8% for Seattle and 2.3% for the U.S.

Nationally, inflation is expected to average about 2.3% over the next several years. The estimates of the effect of trade tariffs suggest only a small impact around 0.3%, because goods constitute just 30% of total consumer spending and consumers will to some extent lower and shift their spending. Seattle area inflation will continue to track higher than national inflation in the short run, though the gap will narrow as the region's housing price inflation slows.

Annual Wage Increase adjustments for City of Seattle employees are based on the Seattle CPI-W.

Annually, the City of Seattle adjusts employee salaries for changes in the cost-of-living. Most wage adjustments are based on the Seattle CPI-W, which measures price changes for urban wage earners and clerical workers (the CPI-U measures price changes for all urban consumers). In recent years, some adjustments have been based on negotiated fixed rate increases. The two CPI measures that the City uses for annual wage increase adjustments are:

- June-to-June change in Seattle CPI-W
- Change in Seattle CPI-W averaged for 12 months ending in June

City Revenue

The following sections describe forecasts for revenue supporting the City's primary operating fund, the General Fund, its primary capital funds – the Cumulative Reserve Funds, and two select other funds – the Sweetened Beverage Tax Fund and the Short-Term Rental Tax Fund.

General Fund Revenue Forecast

Expenses paid from the General Fund are supported primarily by taxes. As Figure 8 illustrates, the most significant revenue source is the property tax, which accounts for approximately 24%, followed by sales tax, the Business and Occupation (B&O) tax, and utility taxes.

Revenue Overview

Figure 8. 2020 Proposed General Fund Revenue Forecast by Source - \$1,469.3 Million

Figure 9 illustrates tax revenue growth continuing to outpace inflation for almost all of the economic expansion since the Global Financial Crisis. Inflation is forecast to be stable and low. Tax revenue growth is forecast to be positive and above inflation, with an average annual growth rate of over 3.0%, 2019 through 2020. Inflation for the same period will average 2.4%. Tax growth is artificially low in 2020 because two relatively new taxes that were included in the general fund (Sweetened Beverage Tax and the Short-term Rental Tax) will now be in their own funds beginning in 2020.

Revenue Overview

Property Tax

Property tax is levied primarily on real property owned by individuals and businesses. Real property consists of land and permanent structures, such as houses, offices, and other buildings. In addition, property tax is levied on various types of personal property, primarily business machinery and equipment. Under Washington State law, property taxes are levied by governmental jurisdictions in accordance with annual growth and total rate limitations.

Statutory growth limits, assessed value and new construction. State statute restricts the annual growth in property tax revenue in two ways. First, state law limits growth in the amount of tax revenue a jurisdiction can levy to the lesser of 1% or the national measure of the Implicit Price Deflator. Previously, beginning in 1973, state law limited the annual growth of the City's regular levy (i.e., General Purpose plus voted lid lifts) to 6%. In November 2001, voters statewide approved Initiative 747, which changed the 6% limit to the lesser of 1% or the Implicit Price Deflator, effective for the 2002 collection year. On November 8, 2007, Initiative 747 was found unconstitutional by the state Supreme Court. However, the Governor and state legislature, in a special session on November 29, 2007, reenacted Initiative 747, thus preserving the 1% growth limit. The second growth restriction is that state law caps the maximum tax rate a jurisdiction can impose. For the City of Seattle, this cap is \$3.60 per \$1,000 of assessed value and covers the City's general purpose levy, including Fire Pension, and lid lifts.

The City of Seattle's 2019 tax rate at \$2.23 per \$1,000 AV was roughly 27% of the total \$8.28 rate paid by Seattle property owners for all taxing jurisdictions. In 2019, for a home of median assessed value in Seattle, although the tax obligation for taxes imposed by the City of Seattle increased 7.6% from \$1,410 to \$1,518, the total property tax obligation from all taxing jurisdictions decreased 1.1% from \$5,709 to \$5,642. The increase in the City levy is largely due to voter approval of the new Families, Education Preschool and Promise Levy, which replaces the expired Families and Education Levy and the Pre-School Services Levy. The overall decrease is due to the legislated decrease in the Seattle School District's levy for public school funding. For the median valued Seattle residence this was a 23.4% and \$281 decrease from \$1,201 in 2018 to \$920 in 2019. As part of the State Legislature's solution on school funding, the Seattle Public School District's (SPS) levy is capped beginning in the 2019 tax collection year. The State's schools levy increased 2.7% from \$1,742 in 2018 to \$1,790 in 2019 for the median assessed valued residence.

Assessed Value (AV) -- Prior to 2010, the last significant decrease in Seattle's total assessed value (AV) was in 1984 when AV decreased 3.6%. As Figure 11 illustrates, total assessed value in the City of Seattle fell in 2010 by approximately 10.3 percent. AV fell again in 2011 and 2012 by 2.9 percent and 2.2 percent respectively. Since then, AV growth has clearly reversed as Seattle AV (commercial and residential combined) has grown an annual average of approximately 13.0% from 2014 to 2019. Seattle AV growth has slowed significantly, however, in the past 12 months. The 2020 Proposed Budget assumes AV growth of 3.9% for the 2020 tax collection year.

Revenue Overview

Figure 11. Seattle Total Assessed Value

New Construction -- In addition to the allowed maximum 1% levy growth, state law permits the City to increase its regular levy in the current year by an amount equivalent to the previous year's tax rate times the value of property constructed or remodeled within the last year, as determined by the assessor. The City is receiving \$11.5 million in additional levy revenues from new construction in 2019 based on \$5.77 billion in new construction added to the tax roll. The 2020 Proposed Budget assumes a small decrease in new construction value to \$5.45 billion in 2020. These new construction volumes are projected to generate \$11.22 million in 2020 revenue.

Figure 12. Seattle New Construction Property Tax Revenue

Revenue Overview

The 2020 Proposed Budget assumes 1% growth plus new construction. The forecast for the 2020 Proposed Budget's General Fund (General Purpose) portion of the City's property tax is \$268.2 million in 2019 and \$278.7 million in 2020. The 2019 and 2020 amounts include approximately \$200,000 and \$500,000 in additional revenue added since the 2019 Adopted and 2020 Endorsed Budget from increases in new construction relative to prior forecast. Additionally, the City is levying approximately \$249.4 million for voter-approved lid lifts in 2019, and \$264.7 million in 2020. The 2019 amount includes \$86.7 million from the voter-approved 2018 Families, Education, Pre-school and Promise Levy and the 2020 revenue includes \$30.3 million for the renewed Library levy. All levy lid lift proceeds are accounted for in other funds than the City's General Fund. Finally, the City is levying \$22.8 million in 2019 and \$22.7 million in 2020 to pay debt service on voter-approved bond measures.

Seattle Parks District. In August 2014, voters approved creation of a Metropolitan Park District (MPD). Pursuant to RCW 35.61, the MPD is a legally separate taxing jurisdiction from the City of Seattle, whose property tax levy authority of \$0.75 per \$1,000 assessed value is outside of the City's statutory rate limit of \$3.60 per \$1,000 assessed value and whose revenues will not be accounted for in the City's General Fund. The MPD, per its 6-year spending plan (2015-2020), is levying approximately \$52.1 million in 2019 and \$53.3 million in 2020.

Medic 1/Emergency Medical Services. Voters in November 2013 approved a renewal of the Medic 1/EMS levy at \$0.335 per \$1,000 of AV. At this rate King County projected revenues over the 6-year life of the levy of \$678 million, approximately \$256 million of which will come to the City of Seattle. The 2020 Proposed Budget projects revenues of \$52.5 million in 2019, the final year of the current levy. The 2020 Proposed Budget assumes renewal of this levy in 2019 at the proposed \$0.265 per \$1,000 assessed value. This generates approximately \$67.1 million in revenue in 2020.

Figure 13 shows the different jurisdictions whose rates make up the total property tax rate imposed on Seattle property owners, as well as the components of the City's 2019 property tax.

Revenue Overview

(tax rate = \$2.23 per \$1,000 assessed value)

Revenue Overview

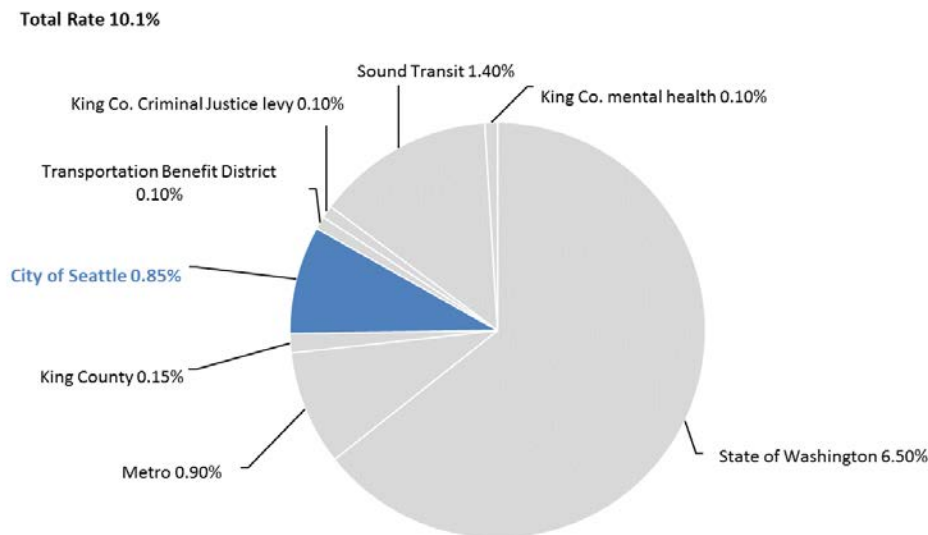

Retail Sales and Use Tax

The retail sales and use tax (sales tax) is imposed on the sale of most goods and certain services in Seattle. The tax is collected from consumers by businesses who, in turn, remit the tax revenue to the state. The state sends the City its share of the collections each month.

The current sales tax rate in Seattle is 10.1%. The rate was increased to 10.1% on April 1, 2017 by the addition of a voted increase of 0.5% for the Regional Transit Authority (Sound Transit). This followed an increase from 9.5% to 9.6% on April 1, 2015, when a 0.1% sales tax levy for the Seattle Transportation Benefit District was added. Seattle voters approved that increase in November 2014.

The basic sales tax rate of 10.1% is a composite of separate rates for several jurisdictions as shown in Figure 14. The City of Seattle's portion of the overall rate is 0.85%. In addition, Seattle receives a share of the revenue collected by the 0.1% King County Criminal Justice Levy. Revenue collected by the Seattle Transportation Benefit District is used to make transportation improvements in Seattle.

Figure 14. Sales and Use Tax Rates in Seattle, 2019

Sales tax revenue has grown and contracted with the local economy's ups and downs. Of the City's four major taxes, the sales tax is the most volatile because it is the most sensitive to changing economic conditions. Over half of sales tax revenue comes from retail trade and construction activity, which are very sensitive to changing economic conditions.

Seattle's sales tax base grew rapidly in the late 1990s, driven by a strong national economy, expansion at Boeing in 1996-1997, and the stock market and technology booms. The recession that followed the bursting of the stock market bubble and the September 11, 2001 terrorist attacks ushered in three successive years of declining revenue. This was followed by four years of healthy growth, 2004–2007, led by a surge in construction activity. That expansion ended in 2008 with the onset of the Great Recession, which caused the largest contraction in the sales tax base in more than 40 years. In a period of five quarters beginning with the third quarter 2008, the sales tax base shrunk by 18.2%. The decline was led by a steep drop in construction along with falling sales in almost every industry.

Revenue Overview

After hitting bottom in 2010, Seattle's sales tax base has rebounded strongly, with construction leading the way. Other fast-growing industries include motor vehicle and parts retailing, e-commerce retailing, professional, scientific and technical services, accommodation, and food services. Over the 2011-2018 period sales tax revenue increased on average at an average rate of 8.4% per year.

Sales tax revenue growth is expected to slow down in the coming years. Sales tax revenue has grown by 6.0% in the first six months of 2019 compared to the same period in the previous year. This is a slowdown from 10.9% growth in 2018, which was above average for several reasons. Retail trade and construction sectors, which account for about 55% of the sales tax revenue, both posted strong increases by 15.0% and 15.7% respectively in the first half of 2018. Retail trade tax revenue increased considerably as a result of the Washington Marketplace Fairness Act and the Wayfair decision which expanded taxation of online retail sales. Compliance is expected to increase over time and retail trade grew by a solid 8.2% in the first half of 2019. The construction sector, on the other hand, posted a revenue increase of only 2.6% in the first six month of 2019 as a result of the 2018 base effect and the February 2019 snowstorms.

Sales tax revenue is expected to increase by 4.6% in 2019, 2.2% in 2020, and 2.3% in 2021 (see Figure 15). Weaker growth in 2020 and 2021 reflects the expected slowing of the metro area economy and the assumption of a modest decline in construction activity from its current above the trend levels. The expected decline accumulates to 10.5% over the three-year period 2019-2021.

Figure 15. Annual Growth of Retail Sales Tax Revenue

Business and Occupation Tax

Seattle's principal business tax is the business and occupation (B&O) tax, which is levied on the gross receipts of most business activity that takes place in the city. The B&O tax has a small business threshold of \$100,000, which means businesses with taxable gross receipts below \$100,000 are exempt from the tax. Between January 1, 2008 and January 1, 2016, the City's B&O tax also included a square footage tax that was complementary to the gross receipts tax. The square footage tax was implemented to offset an expected revenue loss from state mandated changes in the allocation and apportionment of B&O income. Included in B&O tax revenue are tax refunds, audit payments, and penalty and interest payments for past-due tax obligations.

Revenue Overview

The City levies the gross receipts tax at different rates on different types of business activity, as indicated in Figure 16. Most types of business activity, including manufacturing, retailing, wholesaling, and printing and publishing, are subject to a tax of 0.222% on taxable gross receipts in 2018. Services and transporting freight for hire are taxed at a rate of 0.427%. In 2017 and 2018, the City increased B&O tax rates to the maximum allowed under state law. The increase took place in two steps, a roughly two percent increase on January 1, 2017 and an increase of approximately one percent on January 1, 2018. In addition, the special 0.15% rate for international investment management services was eliminated on January 1, 2017.

Figure 16. Seattle Business and Occupation Tax Rates, 2016 – 2019

	2016	2017	2018-2019
Retailing, wholesaling	0.215%	0.219%	0.222%
Manufacturing, extracting	0.215%	0.219%	0.222%
Printing, publishing	0.215%	0.219%	0.222%
Service, other	0.415%	0.423%	0.427%
International investment management	0.150%	0.423%	0.427%

Other things being equal, the B&O tax base is more stable than the retail sales tax base. The B&O base is broader than the sales tax base, which does not cover most services. In addition, the B&O tax is less reliant than the sales tax on the relatively volatile construction and retail trade sectors, and it is more dependent upon the relatively stable service sector.

B&O revenue growth has mirrored the growth of the local economy. B&O receipts have fluctuated with the economy's ups-and-downs, rising rapidly during the late-1990s stock market and dot-com boom and the housing bubble of the mid-2000s, going flat from 2001–2004 during the previous decade's first recession, and falling sharply during the Great Recession (see Figure 17). During the Great Recession the B&O tax base lost 16.8% of its value between first quarter 2008 and second quarter 2010.

Figure 17. Annual Growth of B&O Tax Revenue

B&O tax revenue has grown at a healthy pace during the recovery from the Great Recession. Over the 2011-2018 period, revenue increased on average at a 7.2% annual rate. Growth was weak in 2013 because of a drop in the revenue from audit activity and an increase in refund payments, not because of

Revenue Overview

a weakening of tax base growth. Industries growing rapidly during the recovery have been construction, information, real estate, management of companies and enterprises, food services, and accommodation.

B&O tax revenue growth will slow down in the coming years. The B&O revenue forecast has been shaped by the expected slowdown of the economic growth in the metro area. Tax revenue growth forecast is 5.4% for 2019 and on average 4.3% per year for the 2019-2022 period. A one-time drop in revenue is expected in 2020 as a result of HB 1059 which changes the due date for annual payments from January 31 to April 15 beginning with 2020 obligations. Since January and February payments are accrued to 2020, but April and May payments are accrued to 2021, this delay in due date lowers the forecasted growth rate for the 2020 B&O tax revenue from 3.7% to 2.5%.

Utility Business Tax - Private Utilities

The City levies a tax on the gross income derived from sales of utility services by privately owned utilities within Seattle. These services include telephone, steam, cable communications, natural gas, and refuse collection for businesses.

Natural gas prices remain low. The City levies a 6% utility business tax on gross sales of natural gas and on sales of steam which has natural gas as an energy source. The bulk of revenue from the natural gas tax is received from Puget Sound Energy (PSE). PSE's natural gas rates are approved by the Washington Utilities and Transportation Commission (WUTC). Another tax is levied on consumers of gas delivered by private brokers. It is also assessed at 6% on gross sales. Spot prices, those paid for delivery in the following month, continue to be low. Temperatures play a key role in gas related revenues and are inversely related to natural gas usage and subsequent tax receipts.

Telecommunications tax revenues continue to decline. The utility business tax is levied on the gross income of telecommunication firms at a rate of 6%. Revenue from traditional land-line services has been on a steady decline. This was counteracted by the increasing prevalence of mobile/wireless phones. While new smartphone users have added to the wireless tax revenue base, the increased use of data and internet services which are not taxable have caused declines in the revenue streams.

As more and more wireless phone users are using the devices for data transmission instead of voice or text applications, and telecom companies change their rate plans to respond to this consumer behavior, the City may continue to see tax revenue declines. Some recent court decisions have altered what types of wireless phone calls the City can tax; the City may no longer assess a tax on interstate and international phone calls. There are continued pressures on this revenue stream.

Cutting the cord is affecting Cable Tax revenues. The City has franchise agreements with cable television companies operating in Seattle. Under the current agreements, the City levies a 10% utility tax on the gross subscriber revenues of cable TV operators, which accounts for about 90% of the operators' total revenue. The City also collects B&O taxes on miscellaneous revenues not subject to the utility tax. The imposition of a 4.4% franchise fee makes funds available for cable-related public access purposes. This franchise fee is deposited into the City's Cable Television Franchise Fund. Cable revenues have been declining year over year for some time. Increased competition from satellite and streaming services appear to be taking customers away from traditional cable providers. That is expected to continue and will be a drag on revenues.

Revenue Overview

Utility Business Tax - Public Utilities

The City levies a tax on most revenue from retail sales collected by City-owned utilities (Seattle City Light and Seattle Public Utilities). Tax rates range from a State-capped 6% on City Light up to a current 15.54% on the City Water utility.

Revenue Stabilization Account Surcharge is in effect. City Light sells excess power on the wholesale energy market. City Light energy production, almost exclusively hydro power, competes with natural gas in the wholesale market. For the 2010 fiscal year, the City Council authorized the creation of a rate stabilization account (RSA) for the utility funded with an as needed surcharge based on funding levels of the RSA. The rate stabilization surcharge was triggered in 2016 because the RSA funding level has dropped below \$90 million, the account's minimum required balance set by the Council. This forecast expects the surcharge to remain in effect through October of 2020.

Water rates are adopted through 2023. Tax revenue growth is expected to average 1.7% for 2019 through 2020.

Drainage and Wastewater rates are adopted through 2020. Drainage and wastewater tax revenue growth will average 8.0% 2019 through 2020.

Value of some recycled products has declined. Some recycled products that had a market overseas have seen their demand collapse. No recovery in these commodity prices is forecast soon. Solid waste has also seen a decline in demand from single-family households that has been offset by increased demand from multi-family and commercial users. Solid waste tax revenues will average 1.2% growth 2019 through 2020.

Tonnage taxes remain stable. The City imposes a \$13.27 per ton tax on solid waste hauled within the city limits. Historically these tax revenues, which apply to both public and private haulers, was collected by Seattle Public Utilities and used to pay for Clean City programs. These programs support public garbage collection, graffiti removal, illegal dumping, and other activities. In 2016 the tonnage tax began accruing to the General Fund which continues to support Clean City programs.

Other Notable Taxes

Admission Tax. The City imposes a 5% tax on admission charges to most Seattle entertainment events, the maximum allowed by state statute. This revenue source is highly sensitive to swings in attendance at athletic events. It is also dependent on economic conditions, as people's ability and desire to spend money on entertainment is influenced by the general prosperity in the region. Recently, entertainment venues have opened around the City, increasing the size of the tax base. Offsetting this, the former Key Arena has closed for renovations affecting some large entertainment events. Once reopened, the refurbished venue should provide increases in admissions tax revenues starting mid-2021. Revenues are forecast to grow by an average annual rate of 0.5% for 2019 through 2020.

Of admission tax revenues, excluding men's professional basketball, 20% were dedicated to programs supported by the Office of Arts and Culture (Arts) before 2010. In 2010 this contribution increased to 75% based on the actual admission tax receipts from two years prior, this was increased to 80% for 2016. In 2017 funding was increased to 90% and then 100% of actual receipts in 2018. As a result, Arts is fully funded by the admission tax, except for money received from the 1% for Arts program. The

Revenue Overview

forecasts in Figure 10 for admission taxes reflect the full amount of tax revenue. The Office of Arts and Culture section of this document provides further detail on the office's use of Arts Account revenue from the admission tax and the implementation of this change.

Licenses and Permits

The City requires individuals and companies conducting business in Seattle to obtain a City business license. In addition, some business activities, such as taxi cabs and security systems, require additional licenses referred to as professional and occupational licenses. The City also assesses fees for public-safety purposes (e.g., pet ownership and fire hazard inspection) and charges a variety of fees for the use of public facilities and rights-of-way.

In 2005 the City instituted a two-tier business license fee structure. The cost of a license, which had been \$80 per year for all businesses, was raised to \$90 for businesses with worldwide revenues of more than \$20,000 per year and lowered to \$45 for businesses with worldwide revenues less than \$20,000 per year. The City increased the fees for 2015 license renewals to \$110 and \$55, respectively.

To provide funding for additional police officers, the City implemented a new business license fee structure that took effect for 2017 licenses. Fees increased for businesses that have a taxable income (reported for B&O tax purposes) greater than \$500,000. Fees for all other businesses remain at 2016 levels (See Figure 18) until 2020. Fee increases were being phased in over a three-year period, 2017–2019, and will increase with inflation annually thereafter. Largely as a result of the fee increases, business license revenue grew from \$6.8 million in 2015 to \$17.3 million in 2018, a 153.2% increase. Revenue growth is expected to slow to 4.9% in 2019 and 2.4% in 2020.

Figure 18. Business License Fee Schedule, 2016 – 2020

Taxable income	2016*	2017	2018	2019	2020
Less than \$20,000	\$55	\$55	\$55	\$55	\$56
\$20,000 - \$500,000	\$110	\$110	\$110	\$110	\$113
\$500,000 - \$2 mil.	\$110	\$480	\$480	\$500	\$511
\$2 mil. - \$5 mil.	\$110	\$1,000	\$1,000	\$1,200	\$1,227
More than \$5 mil.	\$110	\$1,000	\$2,000	\$2,400	\$2,455

*2016 fee is based on worldwide gross income, not taxable income.

Parking Meters/Traffic Permits

In spring 2004, the City of Seattle began replacing traditional individual space parking meters with pay stations in various areas throughout the City. In addition to offering the public more convenient payment options, including credit cards and debit cards, for hourly on-street parking, pay station technology has allowed the City to more actively manage the street right-of-way by adopting different pricing, time limit and other management parameters on different blocks throughout the city and at different times of day. The City currently has around 1,700 pay stations controlling approximately 12,000 parking spaces. The overall objective of the parking management program is to provide a more data-driven, outcome-based management and price-setting approach in pursuit of the adopted policy goals of one to two open spaces per block-face, reduced congestion, support of business districts, and reduced vehicle emissions and improved air quality.

Revenue Overview

Based on collected occupancy data, the 2020 Proposed Budget assumes the implementation in Fall 2019 of planned changes to parking rates (increases and decreases), which are reviewed and adjusted annually by SDOT based on parking availability targets. Also assumed are projected space additions and removals for coming years, as planned by SDOT. The net effect of rate, space and timing changes leads to a 2020 Proposed Budget forecast for -0.25% revenue growth in on-street parking revenue between 2019 and 2020, from \$39.1 million to \$39.0 million.

Street Use and Traffic Permits. Traffic-related permit fees, such as meter hood service, commercial vehicle load zone, truck overload, gross weight and other permits, including revenues from the City's car sharing program with Car2Go, Lime and ReachNow, are projected to generate revenues of approximately \$7.2 million in 2019, and \$7.0 million in 2020. The 2020 Proposed Budget includes fee increases for meter hoods (a \$2 increase) and vehicle load zone permits (from \$195 to \$250), but also reflects the discontinuation, as of mid-2019, of the ReachNow car share service.

Court Fines

Although shifting with the introduction of photo enforcement cameras, between 50% and 60% of court fine revenues collected by the Seattle Municipal Court are from parking citations written by Seattle Police Department parking enforcement (PEOs) and traffic officers. Fines from photo enforcement in selected intersections and school zones now comprise approximately 35-45% of revenues and 5-10% comes from traffic and other non-parking related citations.

Overall fines revenue increased approximately \$1.3 million (3.3%) from 2017 to 2018 to \$39.5 million. Approximately \$1.1 million of that increase came from camera enforcement revenues. In 2018 school zone speed camera revenues came in at \$12.2 million, up from \$11.2 million in 2017. The 2020 Proposed Budget includes \$9.9 million in school zone camera revenue for 2019 and \$10.6 million in 2020. The decline in 2019 is due to an assumed rate of change in the number of citations based on driver behavior. 2020 revenues assume activation of six new cameras at three new school locations. School zone camera revenues are accounted for in the School Safety Traffic and Pedestrian Improvement Fund.

Total General Fund fines revenues were approximately \$27.3 million in 2018 and are expected to decline slightly in 2019 and 2020 to \$26.9 million. Red light camera enforcement revenues (i.e., non-school zone cameras) in 2019 and 2020 are projected to remain relatively flat at about \$5.1 million in each year. These amounts are fully recognized in the General Fund through 2020, per the City Council's action for 2018-20 to suspend the prior requirement of transferring 20% of red-light camera revenues to the School Safety Traffic and Pedestrian Improvement Fund. Non-camera fine revenues are projected to fall approximately \$500,000 from 2018 to \$21.7 million in 2019 and 2020, due to reduced citation volumes.

Interest Income

Through investment of the City's cash pool in accordance with state law and the City's own financial policies, the General Fund receives interest and investment earnings on cash balances attributable to several of the City's funds that are affiliated with general government activities. Many other City funds are independent, retaining their own interest and investment earnings. Interest and investment income to the General Fund varies widely, subject to significant fluctuations in cash balances and changes in earnings rates dictated by economic and financial market conditions.

Revenue Overview

As a result of the financial crisis in 2008 and the Federal Reserve Bank's (Fed) unprecedented purchasing of assets through quantitative easing, borrowing rates fell to historic lows. These rates have remained relatively low, but the Fed has ended their purchasing programs. They have recently begun to lower short-term interest rates to head off a slowing economy. This will lead to fairly flat interest earnings on the City's cash pool for 2020. The annual earnings yield for the cash pool was 2.58% in 2018 but forecast to be 2.29% in 2019 before rising to 2.46% by 2020. Should the economy suffer any material setbacks, these rates would be expected to fall further.

Revenue from Other Public Entities

Washington State shares revenues with Seattle. The State of Washington distributes a portion of tax and fee revenue directly to cities. Specifically, portions of revenues from the State General Fund, liquor receipts (both profits and excise taxes), and motor vehicle fuel excise taxes, are allocated directly to cities. Revenues from motor vehicle fuel excise taxes are dedicated to street maintenance expenditures and are deposited into the City's Transportation Fund. Revenues from the other taxes are deposited into the City's General Fund.

Criminal Justice revenues are stable. The City receives funding from the State for criminal justice programs. The State provides these distributions out of its General Fund. These revenues are allocated on the basis of population and crime rates relative to statewide averages. These revenues have been affected by State budget changes in the recent past and, while not expected, could be affected in future budgets out of Olympia.

Marijuana related revenues are being shared with local jurisdictions. As part of the State's 2016 budget, marijuana related tax revenues are being shared with local jurisdictions for public safety purposes. The state has adopted a complicated allocation of these revenues, but in general only those cities in counties that have legalized marijuana sales will receive excise tax distributions based on both their jurisdictions proportion of marijuana related sales as well as a per capita basis. Because this is a relatively new revenue stream with a growing tax base, the forecast is imprecise.

State budget restores liquor related revenues to cities. Cities in the state of Washington typically receive two liquor related revenues from the State. One is related to the liquor excise tax on sales of spirits and the other is a share in the State Liquor and Cannabis Board's profits accrued from the operation from their monopoly on spirits sales. The State no longer holds the monopoly in liquor sales in the state due to the passing of Initiative 1183 in November of 2011. The initiative guaranteed the cities would continue to receive distributions in an amount equal to or greater than what they received from liquor board profits prior to the implementation of the initiative as well as an additional \$10 million to be shared annually. There was no guarantee concerning liquor excise taxes. In recent budgets the State has eliminated, on a temporary basis, the sharing of liquor excise taxes. The most recent State budget has restored fully the excise tax funding to cities.

Service Charges and Reimbursements

Internal service charges reflect current administrative structure. In 1993, the City Council adopted a resolution directing the City to allocate a portion of central service expenses of the General Fund to City utilities and certain other departments not supported by the General Fund. The intent is to allocate a fair share of the costs of centralized general government services to the budgets of departments supported by revenues that are largely self-determined. These allocations are executed in the form of

Revenue Overview

payments to the General Fund from these independently supported departments. More details about these cost allocations and methods are detailed in the Cost Allocation section of this budget.

Interfund Transfers

Interfund transfers. Occasionally, transfers from departments to the General Fund take place to pay for specific programs that would ordinarily be executed by a general government department or to capture existing unreserved fund balances. A detailed list of these transfers is included in the General Fund revenue table found in the Funds and Other section. This includes the transfer of school zone camera revenues described under Court Fines above.

In adopting the 2020 Budget, it is the intent of the City Council and the Mayor to authorize the transfer of unencumbered, unreserved fund balances from the funds listed in the Finance General revenue table to the General Fund.

Cumulative Reserve Fund – Real Estate Excise Tax

The Cumulative Reserve Fund resources are used primarily for the maintenance and development of City general government capital facilities. These purposes are supported mainly by revenues from the Real Estate Excise Tax (REET), but also, to a lesser degree, by the proceeds from certain property sales and rents, street vacation revenues, General Fund transfers, and interest earnings on fund balances.

The REET is levied by the City at a rate of 0.5% on sales of real estate measured by the full selling price. Because the tax is levied on transactions, the amount of revenue that the City receives from REET is determined by both the volume and value of transactions.

Over time, 52.6% of the City's REET tax base has come from the sale of residential properties, which include single-family homes, duplexes, and triplexes. Commercial sales, which include apartments with four units or more, account for 32.2% of the tax base, and condominiums constitute the remaining 15.2% (see Figure 19).

Figure 19. Value of Seattle Real Estate Transactions by Property Type, 1982 - 2018

Revenue Overview

The residential market showing signs of calming. The value of Seattle real estate transactions (the REET tax base) increased at an average annual rate of 13.1% between 1982 and 2007, a period when Seattle area inflation averaged only 3.4% per year. Growth was particularly strong during the recent boom years, fueled by low interest rates and a growing economy. 2008 saw the national property bust that started in late 2005 come to Seattle. The REET tax base declined 50.7% from 2007 to 2008 and continued to decline by 23.4% into 2009. The decline was felt across all three real estate categories. The first quarter of 2009 was the bottom of Seattle's residential market for both sales and prices on a seasonally adjusted basis. With low financing rates and a strong economy, residential and condominium sales have been on an upswing in Seattle increasing Real Estate Excise Tax revenues. Single-family home prices, both nominal and adjusted for inflation, have well surpassed their previous peak set in 2007 (see Figure 20). Average prices have come down from that peak but are expected to stabilize over the next few years.

Figure 20. Seattle Single-family Market

The volatility of REET is reflected by the fact that despite a 8.7% compounded average annual growth rate, the REET tax base declined in eleven years during the period 1982–2018. This volatility is largely the result of changes in sales volumes, which are sensitive to shifts in economic conditions and movements in interest rates; average prices tend to be more stable over time. Commercial activity tends to be more volatile than the residential market, in part because the sale of a handful of expensive properties can result in significant swings in the value of commercial sales from one year to the next, as was seen in 2007, 2012, and 2015 (see Figure 21). Those years saw significant commercial activity with many large buildings in the downtown core changing hands.

Revenue Overview

Figure 21. REET Revenues

Sweetened Beverage Tax Fund

On June 5, 2017, the City Council approved the Sweetened Beverage Tax (SBT) effective January 1, 2018. Distributors of sweetened beverages are liable for the tax of \$0.0175 per fluid ounce of sweetened beverage distributed into the city of Seattle for final sale to the consumer. The 2020 Proposed Budget includes revenues of \$23.9 million in 2019 and \$24.3 million in 2020. Sweetened beverages include sodas, energy drinks, sweetened juices and teas, sports drinks and ready-to-drink coffee drinks. Revenues will be used to fund educational and food access programs primarily through the Department of Education and Early Learning (DEEL), the Human Services Department (HSD) and the Office of Sustainability and Environment (OSE). Beginning in 2020 these revenues and associated expenditures are moved from the General Fund to the Sweetened Beverage Tax Fund in the City's accounting system.

Short-Term Rental Tax Fund

Effective January 1, 2019, the State legislature authorized the public facilities district that is the Washington State Trade and Convention Center to impose a 7% tax on the sale of or charge made for the furnishing of lodging (including but not limited to any short-term rental). The proceeds generated from short-term rental charges in Seattle are distributed to the City of Seattle to support community-initiated equitable development and affordable housing programs. The 2020 Proposed Budget assumes \$10.5 million in each of 2019 and 2020. Beginning in 2020 these revenues and associated expenditures are moved from the General Fund to the Short-Term Rental Tax Fund in the City's accounting system.

City Fiscal Reserve Funds

The State of Washington permits the City to maintain two financial reserves to draw upon in the event of certain unanticipated expenditure or revenue pressures.

Emergency Fund

Under the authority of RCW 35.32A.060, the City maintains the Emergency Fund (EMF) of the General Fund. The EMF is the principal reserve for the City to draw upon when certain unanticipated expenses occur during the fiscal year. Eligible expenses include costs related to storms or other natural disasters. State law limits the amount of money the City can set aside in this reserve to 37.5 cents per \$1,000 of assessed value of property within the city.

The City's practice had been to fully fund the emergency reserve to this maximum limit. However, over that past several years assessed values have undergone significant growth and are expected to continue at a rate that far outpaces the projected City's revenue growth rate. While perhaps good news from an economic standpoint, these increasing assessed values do not translate into a proportional increase in City property tax revenues. In that context, and in recognition of the need for resources to be directed toward related social services in response to the homelessness crisis, in 2017 the City modified the existing financial policies for the EMF to establish a minimum balance of \$60 million, and to adjust that level each year with the rate of inflation. This implies that the EMF would continue to grow, but at somewhat lower rate than under the previous policy. This policy change strikes a balance between ensuring that resources will be available to address unanticipated expenditures and making resources available to address current needs. For the 2020 Proposed Budget, the City adds \$1.9 million to the reserve balance bringing the total to \$66.9 million for 2020.

Revenue Stabilization Fund

Under the authority of RCW 35.21.070, the City maintains a second financial reserve called the Revenue Stabilization Fund (RSA), also known as the Rainy Day Fund. The RSA provides resources for the City to draw upon to maintain City services in the event of a sudden, unanticipated shortfall in revenue due to economic downturns or other factors. City code limits the amount set aside in this reserve to five percent of General Fund tax receipts. [Ordinance 123743](#) requires the City to deposit an amount equivalent to 0.5% of General Fund tax revenues into the RSA, with some limited exceptions. In addition, City policy requires the deposit of 50% of any unplanned year-end fund balance in the General Fund into the RSA. The RSA has a fund balance cap equal to five percent of total annual General Fund tax revenue.

The City adopted significant RSA funding enhancements in 2011 via Ordinance 123743. These changes enabled the City to rebuild the Rainy-Day Fund reserves that had been spent down in 2009 and 2010 in the midst of the Great Recession. The new policies facilitated the rebuilding of this reserve fund from a low of \$10.5 million in 2010 to \$57.7 million by 2019. For the 2020 Proposed Budget, the City adds \$3.0 million to the reserve balance bringing the total to \$60.8 million for 2020.

Community Development Block Grant (CDBG)

Funding Source Overview

In 2017, as part of the implementation of a new enterprise-wide financial management system, the Community Development Block Grant (CDBG) Fund (17810) was dissolved and budget was distributed to various other funds in alignment with the direct fund model. The Human Services Department is the City department which acts as custodian for all grants from the U.S. Department of Housing and Urban Development, including CDBG funding. However, CDBG is a relatively flexible funding source and is used by many City departments.

Budget Overview

In the 2020 Proposed Budget, the funds are distributed to departments and projects as detailed on the following page. All projects are subject to federal CDBG eligibility requirements, and, for some projects, final eligibility has not yet been determined:

Community Development Block Grant - 2020 Proposed Budget						
Department	Title	Project Description	2018 Actuals*	2019 Adopted Budget	2020 Endorsed Budget	2020 Proposed Budget
HSD	Community Facilities	Community facility capital improvements.	-	1,993,449	217,000	2,000,000
	Homeless Services	Provides emergency shelter, day center / outreach activities, and homelessness prevention services. Note that the City is allocating all CDBG services funding to homelessness shelters and programs.	3,730,628	3,151,628	3,151,628	3,368,628
	Human Services Admin & Planning	Provide internal staffing capacity to adequately and effectively manage and administer all Consolidated Plan funds, ensure programmatic compliance with applicable federal regulations.	790,519	1,122,621	1,122,621	1,122,621
	Minor Home Repair	Provide minor home repairs to low- and moderate-income homeowners for safety and health-related repairs to their homes.	379,902	449,917	449,917	449,917
	HSD Total		4,901,049	6,657,615	4,941,166	6,941,166
OED	Neighborhood Business District - Only in Seattle	Provide grants and services to foster inclusive neighborhood business districts that allow small businesses to thrive.	13,399	679,675	679,675	199,675
	King Street Station	Provide financial assistance to conduct a feasibility analysis and to begin implementation of projects development of King Street Station as determined by the feasibility analysis and community.	-	262,500		-
	Neighborhood Business District Planning, Technical Assistance & Staff Support	Provide staffing, technical assistance, planning and administration to support the Only in Seattle Initiative.	130,000	172,000	172,000	172,000
	Small Business Support	Provide financial assistance to qualifying small businesses and microenterprises. Delivery of business marketing and technical assistance to existing small business entrepreneurs serving low-income neighborhoods.	259,399	512,000	512,000	992,000
	OED Total		402,798	1,626,175	1,363,675	1,363,675
OH	Home Repair Program	Provide major home repair financial assistance to low- and moderate-income homeowners. Assisted households typically include seniors and others on low, fixed incomes. The Home Repair Loan Program helps prevent displacement of low-income homeowners by helping them remain safely in their homes.	248,231	350,000	350,000	350,000
	Home Repair Staffing	Provide administrative and management staff support to the home repair program.	248,122	255,462	255,462	255,462
	Homebuyer Education and Counseling	Provide education for first-time low- and moderate-income homebuyers.	220,941	217,000	217,000	-
	Office of Housing Admin & Planning	Support OH costs associated with CDBG and HOME program planning, administration, and contracted services.	168,956	160,972	160,972	160,972
	Rental Housing Preservation and Development	Provide financial assistance for the preservation and development of multifamily rental affordable housing.	630,818	490,278	490,278	490,278
	OH Total		1,517,070	1,473,712	1,473,712	1,256,712
OIA	ESL for Work (Ready to Work)	Provide ESL and job skills training for persons with limited English proficiency.	388,898	400,000	400,000	400,000
OPCD	Equitable Development Initiative	Provide support for community-based organizations pursuing investment strategies that will mitigate displacement within high-risk neighborhoods.	-	1,430,000	430,000	430,000
Parks	Seattle Conservation Corp Park Upgrades	Provide funding to the Seattle Conservation Corps for capital improvements and renovation in neighborhood parks serving qualifying low- and moderate-income neighborhoods and ADA improvements.	716,832	808,000	808,000	1,508,000
Total			7,926,647	12,395,502	9,416,553	11,899,553
						Unspent from prior years (\$2m appropriated in HSDs Community Facilities for one-time projects and \$300k in Parks for ADA improvements)
						\$ (2,300,000)
						\$ (400,000)
						Net CDBG entitlement expectation for 2020

*Note that 2018 Actuals are an estimate based on 2018 year-end data and subject to change based on accounting adjustments and corrections in 2019.

City Bond Issuance and Debt Service

In addition to cash resources, the City also uses bonds and property tax levies to fund a variety of capital improvement projects. The City's budget must include funds to pay interest and principal on outstanding and proposed bonds. The City has issued three types of debt to finance its capital improvement programs: unlimited tax general obligation bonds, limited tax general obligation bonds and revenue bonds.

Unlimited Tax General Obligation Bonds

The City may issue Unlimited Tax General Obligation (UTGO) Bonds for capital purposes if a proposition authorizing their issuance is approved by 60% of the voters in an election in which the number of voters exceeds 40% of the voters in the most recent general election. Payment of principal and interest is backed by the "full faith and credit" of the City. This means that the City commits itself to include in its property tax levy an amount that is sufficient to pay principal and interest on the bonds. Property taxes levied to pay debt service on UTGO bonds are not subject to the statutory limits in state law on the taxing authority of local governments, which is why UTGO bonds are "unlimited" (see the "Property Tax" section of the "Revenue Overview" for a description of statutory limits on property tax rates and growth). However, state law does limit the amount of UTGO bonds that can be outstanding at any time to 7.5% of assessed valuation of property in the city: 2.5% for open space and park facilities, 2.5% for utility purposes, and 2.5% for general purposes. As of December 31, 2018, there were approximately \$274 million in UTGO bonds outstanding.

Limited Tax General Obligation Bonds

The City Council may authorize the issuance of Limited Tax General Obligation (LTGO) Bonds, also known as Councilmanic bonds, in an amount up to 1.5% of assessed valuation, without a vote of the people. The City pledges its full faith and credit to the payment of principal and interest on LTGO bonds, but this pledge must be fulfilled within the City's statutory property tax limitations. Thus, these are "limited" general obligation bonds. The combination of UTGO bonds issued for general purposes and LTGO bonds cannot exceed 2.5% of assessed property valuation. If LTGO bonds are issued up to the 1.5% ceiling, then UTGO bonds for general purposes are limited to 1% of assessed value.

The City also guarantees debt issued by the Pike Place Market Preservation and Development Authority, the Seattle Indian Services Commission, the Seattle Chinatown/International District Preservation and Development Authority, and the Museum Development Authority. As of December 31, 2018, the guarantees totaled \$39.3 million out of \$877 million outstanding LTGO debt. Guarantees count against the City's LTGO debt capacity.

Revenue Bonds

Revenue bonds are used to provide financing for the capital programs of City Light and the three other utilities - Water, Drainage and Wastewater, and Solid Waste - which are grouped together in Seattle Public Utilities. The City does not pledge its full faith and credit to the payment of debt service on revenue bonds. Payment of principal and interest on the bonds issued by each utility is derived solely from the revenues generated by the issuing utility. No tax revenues are used to pay debt service.

When revenue bonds are sold, the City commits itself to set fees and charges for the issuing utility that will be sufficient to pay all costs of operations and maintenance, and all payments of principal and interest on the bonds. While the amount of revenue bonds is not subject to statutory limits, the utility's ability to repay debt with interest is a practical constraint.

City Bond Issuance and Debt Service

Forms of Debt Authorized by State Law

Table 1 below summarizes the conditions and limitations that apply to the issuance of the general obligation debt issued by the City.

Table 1: Summary of Conditions and Limitations for City Debt Issuances

Form of Debt	Voter Approval Required	Source of Repayment	Statutory Limitation	Current Limit ¹	Outstanding 12-31-18 ¹
Unlimited Tax General Obligation Bonds (UTGO)					
Parks & Open Space	Yes	Property Tax	2.5% of AV	\$6.1 Billion	\$0
Utility	Yes	Property Tax	2.5% of AV	\$6.1 Billion	\$0
General Purposes	Yes	Property Tax	1.0 % of AV ²	\$2.4 Billion	\$274 Million
Limited Tax General Obligation Bonds (LTGO)					
	No	Taxes and Other Revenues	1.5% of AV ²	\$3.7 Billion	\$877 Million ³

¹ As of 12/31/18, assuming the latest certified assessed value of \$244.9 billion, issued on February 25, 2019 for taxes payable in 2019.

² The sum of UTGO and LTGO debt for general purposes cannot exceed 2.5% of assessed valuation.

³ Includes \$39.3 million of PDA debt guarantees.

City Debt Management Policies and Bond Ratings

The use of debt financing by the City is subject to federal and state laws as well as the City's own debt management policies ([Resolution 31553](#)).

The City has earned very high ratings on its bonds as a result of a strong economy and prudent financial practices. The City's UTGO debt is rated Aaa by Moody's Investors Service, AAA by Fitch IBCA, and AAA by Standard & Poor's (S&P), which are the highest possible ratings. The City's LTGO debt is rated Aaa by Moody's, AAA by Fitch, and AAA by S&P. In addition, the City's utilities have very high ratings for revenue debt, reflecting sound finances and good management.

2020 Projected Bond Issues

In 2020, the City expects to issue approximately \$63.3 million of limited tax general obligation (LTGO) bonds for a variety of purposes. Table 2 lists the financed projects and other details of the financing plan. Bond proceeds will be deposited into the 2020 Multipurpose Bond Fund. City departments responsible for all or portions of projects listed in Table 2 will then draw money from this fund as appropriated to implement the projects. The appropriation authority for using these bond funds are in the respective departments' sections of this budget.

Approx. Par Amount	Issuance Costs & Pricing Adjustments	Issuance Cost Proposed for 2020
\$63,326	3%	\$1,900

2020 Debt Service

In 2020, debt service associated with outstanding bond issues as well as the proposed 2020 bond issuances totals \$97.5 million. Appropriation authority for debt service costs are in the respective departments' sections of this budget. The Debt Service Appendix to this budget book lists debt service amounts by paying fund.

Selected Financial Policies

Through a series of Resolutions and Ordinances, the City has adopted a number of financial policies that are designed to protect the City's financial interests and provide a framework and guidelines for the City's financial practices. For additional information about these policies, please refer to the City of Seattle website: http://www.seattle.gov/financedepartment/financial_policies.htm.

Budgetary Basis

- The City budgets on a modified accrual basis. Property taxes, sales taxes, business and occupation taxes, and other taxpayer-assessed revenues due for the current year are considered measurable and available and, therefore, as revenues, even though a portion of the taxes may be collected in the subsequent year. Licenses, fines, penalties, and miscellaneous revenues are recorded as revenues when they are received in cash since this is when they can be accurately measured. Investment earnings are accrued as earned.
- Expenditures are considered a liability when they are incurred. Interest on long-term debt, judgments and claims, workers' compensation, and compensated absences are considered a liability when they are paid.

Appropriations and Execution

- The adopted budget generally makes appropriations for operating expenses at the budget control level within departments, unless the expenditure is from one of the General Fund reserve accounts, or is for a specific project or activity budgeted in the General Subfund category called Finance General. These projects and activities are budgeted individually.
- Capital projects programmed in the CIP are appropriated in the budget at the program or project level. Grant-funded activities are controlled as prescribed by law and federal or state regulations.
- Within the legally adopted budget authorizations, more detailed allocations, as approved by CBO, are recorded in the City's accounting system, called SUMMIT, at the lowest levels of each department's organizational structure and in detailed expenditure accounts. Throughout the budget year, CBO monitors revenue and spending performance against the budget to protect the financial stability of the City.
- In accordance with Washington state law, any unexpended appropriations for operating or ordinary maintenance expenditures automatically lapse at the close of the fiscal year, except for any appropriation continued by ordinance. Unexpended appropriations for capital outlays remaining at the close of the fiscal year are carried forward to the following year, except for any appropriation abandoned by ordinance.

Budget Transfers

The Budget Director may approve, without ordinance, appropriation transfers within a department or agency of up to 10%, and with no more than \$500,000 of the appropriation authority for the particular budget control level or, where appropriate, line item, being increased. In addition, no transfers can reduce the appropriation authority of a budget control level by more than 25%.

Selected Financial Policies

Debt Policies

- The City of Seattle seeks to maintain the highest possible credit ratings for all categories of short- and long-term General Obligation debt that can be achieved without compromising delivery of basic City services and achievement of adopted City policy objectives.
- The City will reserve \$100 million of legal limited tax (councilmanic) general obligation debt capacity, or 12% of the total legal limit, whichever is larger, for emergencies. The 12% reserve is now significantly greater than \$100 million.
- Except in emergencies, net debt service paid from the General Subfund will not exceed 9% of the total General Fund budget. In the long run, the City will seek to keep net debt service at 7% or less of the General Fund budget.

General Fund Fund Balance and Reserve Policies

- State law allows the City to maintain an emergency reserve at a maximum statutory-authorized level of 37.5 cents per \$1,000 of assessed property value in the city. The City's previous practice had been to fully fund the emergency reserve to this maximum limit. However, over the past several years assessed values have undergone significant growth and are expected to continue at a rate that far outpaces the projected City's revenue growth rate. In 2017 the City modified the existing financial policies for the Emergency Subfund (ESF) to establish a minimum balance of \$60 million, and to adjust that level each year with the rate of inflation. This implies that the ESF would continue to grow, but at somewhat lower rate than under the previous policy. This policy change strikes a balance between ensuring that resources will be available to address unanticipated expenditures and making resources available to address current needs.
- Annual contributions of 0.50% of forecasted tax revenues are automatically made to the Revenue Stabilization Account of the Cumulative Reserve Subfund (commonly referred to as the "Rainy Day Fund").¹ In addition, 50% of any unanticipated excess General Subfund fund balance at year's end is automatically contributed to the Rainy Day Fund. These automatic contributions are temporarily suspended when the forecasted nominal tax growth rate is negative or when the total value of the Rainy Day Fund exceeds 5% of total tax revenues. In addition to the automatic contributions, the City may also make contributions to the Rainy Day Fund via ordinance. Expenditures from the Rainy Day Fund require the approval of a majority of the members of the Seattle City Council and must be informed by the evaluation of out-year financial projections.

Other Citywide Policies

- As part of the Mayor's budget proposal, the Executive develops a revenue estimate that is based on the best available economic data and forecasts.
- The City intends to adopt rates, fees, and cost allocation charges no more often than biennially. The rate, fee, or allocation charge structures may include changes to take effect at

¹ The 0.50% contribution is lowered to 0.25% of forecasted tax revenues for any year immediately following the suspension of contributions as a result of negative nominal tax revenue growth.

Selected Financial Policies

specified dates during or beyond the biennium. Other changes may still be needed in the case of emergencies or other unanticipated events.

- In general, the City will strive to pay for general government current operating expenditures with current revenues, but may use fund balance or other resources to meet these expenditures. Revenues and expenditures will be monitored throughout the year.
- In compliance with State law, no City fund whose purpose is restricted by state or local law shall be used for purposes outside of these restrictions.
- Working capital for the General Fund and operating funds should be maintained at sufficient levels so that timing lags between revenues and expenditures are normally covered without any fund incurring negative cash balances for greater than 90 days. Exceptions to this policy are permitted with prior approval by the City Council.

Office of Arts and Culture

Randy Engstrom, Director

(206) 684-7171

Department Overview

The Office of Arts & Culture (ARTS) envisions a city driven by creativity that provides the opportunity for everyone to engage in diverse arts and cultural experiences. The office promotes Seattle as a cultural destination and invests in Seattle's arts and cultural sector to ensure the City provides a wide range of high-quality programs, exhibits and public art. ARTS includes eight programs: Cultural Partnerships, Communications and Outreach, Equity and Youth, Cultural Facilities Operations, Public Art, Artwork Conservation, Administrative Services, and Cultural Space. These programs are supported by two funding sources: the Arts and Culture Fund, which is funded through the City's admission tax revenues, and the Municipal Arts Fund, which is supported by the 1% for Arts contributions from Capital Projects.

The **Cultural Partnerships** Program invests in cultural organizations, youth arts programs, individual artists and community groups to increase residents' access to arts and culture, and to promote a healthy cultural sector in the city. The Cultural Partnerships program offers technical assistance and provides grants to arts and cultural organizations throughout the city.

The **Communications and Outreach** Program works to ensure greater community access to arts and culture through annual forums and award programs by showcasing community arts exhibits and performances at City Hall and King Street Station, and by developing materials to promote Seattle as a creative capital. This program also works on innovative ways to reach out to communities about the opportunities of the department.

The **Cultural Space** Program provides resources to fund the development of new cultural spaces, the retention of crucial cultural anchors, and physical space improvements in existing cultural institutions. The program exists to preserve, create and activate cultural square footage in the city of Seattle; to work with artists and arts organizations to strengthen their role in charting the future of their creative spaces; and to work with developers and builders to incorporate arts and culture into new projects.

The **Cultural Facilities Operations** Program (formerly named the Langston Hughes Performing Arts Institute Program) provides operational support for Langston Hughes Performing Arts Institute, a cultural facility that provides rental spaces and technical assistance, and that works in partnership with LANGSTON, a non-profit organization, to present classes, performing arts academies, programs and events, with the goal of providing quality cultural programs with educational components that meet the needs of the African American community. This program also supports the operation and programming of the King Street Station. This includes a rotating gallery opened to the public. Programming is submitted by the community and reviewed by a community advisory group. This program also provides technical assistance to applicants and selected programs.

The **Equity and Youth** Program invests in teaching artists, educators and organizations that are working toward a stronger more vibrant creative youth culture. ARTS does this through funding, professional development, school and community arts partnerships, arts education initiatives (The Creative Advantage), and career-connected learning in the arts and creative industries. The program also supports arts and cultural learning and events for our city's young people.

The **Public Art** Program integrates artists and their ideas in the design of City facilities, manages the City's portable artworks collection and incorporates art in public spaces throughout Seattle. This program is funded through the 1% for Art program, which by ordinance requires eligible City capital projects to contribute 1% of their budgets to the Municipal Arts Fund for the commission, purchase and installation of public artworks.

Office of Arts and Culture

The **Artwork Conservation** Program supports the City of Seattle's Public Art investment in permanent art. This program provides professional assessment, conservation, repair, and routine and major maintenance of artwork for the City's approximately 400-piece permanently sited art collection.

The **Administrative Services** Program provides executive management and support services for the office; engages in Citywide initiatives, supports the Seattle Arts Commission, a 16-member advisory board that advises the office, The Film and Music Commission, a 21 member advisory board, Mayor and City Council on arts programs and policy; and promotes the role of the arts in economic development, arts education for young people and cultural tourism. Funding within this program also covers basic department overhead costs, including office space, human resources, and IT.

Budget Overview

The Office of Arts and Culture (ARTS) is funded by admission tax revenue and the 1% for Art Program. This funding supports arts-related programs and capital expenditures to keep artists living and working in Seattle, builds community through arts and cultural events and the placement of public art, and increases arts opportunities for youth. ARTS commits to an anti-racist work practice that centers the creativity and leadership of people of color – those most impacted by structural racism – to move toward systems that benefit us all.

Building on the momentum of the 2019 Adopted Budget, the 2020 Proposed Budget uses admission tax funds strategically to focus on short-term programming and funding opportunities that benefit artists, students, and community members from under-represented groups, and that advance the goals of the City's Race and Social Justice Initiative (RSJI). ARTS will continue racial equity work in 2020 by providing RSJI training to ARTS partners and panel members, updating translations of ARTS' media, and expanding the Creative Strategies Initiatives for racial justice work.

Over the past four years, ARTS has worked with other City departments and community stakeholders to identify opportunities to increase affordability, stabilize cultural communities in flux, and bring equity to the current wave of property development. The 2020 Proposed Budget sustains and strengthens these commitments.

In 2019, ARTS implemented an expanded Cultural Facilities Fund program. This was one way to achieve some of the recommendations of the Create Activate Preserve (CAP) Report released in 2017 and followed recommendations made through a Racial Equity Toolkit analysis of the program in 2018. Changes to the existing fund resulted in the shift of the allocation of resources in community and aimed 80% of the cultural facilities funding towards communities of color.

Office of Arts and Culture

The Tiny Cultural Space program, a program responding to community advocacy around the disposition of “snippet” excess properties and the need for tiny, stand-alone cultural spaces, was launched in 2019 in partnership with the Department of Finance and Administrative Services. Sawhorse Revolution was engaged as a partner and Estelita’s Library was identified as the recipient organization. The tiny space, designed and built by an all-women, youth-of-color cohort from South Seattle, was installed onsite in the Central District in the fall of 2019.

In 2019 the Cultural Space program graduated the first class of its Build Art Space Equitably (B.A.S.E.) certification cohort. This 30-person group, made up entirely of people of color, represented an attempt to knit together the worlds of commercial property development and of arts and culture.

The first large-scale collaboration between ARTS and the Office of Housing was launched in 2019, when the two departments co-issued the Request for Proposals for the “K-Site,” a City-owned piece of property in the Uptown neighborhood. The two offices both offered funding and technical assistance to create a mixed-use project that will contain both affordable housing for those transitioning out of homelessness and a cultural space serving both the building’s tenants and the broader community.

In 2020, ARTS will continue implementation of The Creative Advantage, a racial equity driven arts education initiative led by a public-private partnership that includes ARTS, Seattle Public Schools, The Seattle Foundation, and community arts partners. The Creative Advantage began with 13 schools in 2013-2014 and by the end of the 2019-2020 school year will be operating in 81 schools. The goal is to provide equitable access to sequential and comprehensive arts education to all K-12 students in the 100+ schools within Seattle Public Schools. ARTS is on track to reach this goal by the 2022-2023 school year.

In 2019, ARTS deepened its partnership with Office of Economic Development (OED)/Office of Film and Music (OFM), and DEEL to align investments in education, creative workforce development, creative industry, and arts and culture to create a robust city-wide strategy for Seattle’s creative economy. The City is laying the foundation for a multi-year, multi-pronged approach that will be driven by community and industry needs and evaluated through qualitative and quantitative data. ARTS and partner departments have already begun synthesizing feedback received from the economic reports, industry focus groups, and racial equity toolkits, and have identified key priorities in creative industries work.

As part of the reorganization of the OFM, funding provided by ARTS for some creative economy functions that were housed at OFM/OED will return to ARTS in 2020, but will be dedicated to the same purposes they had been. Specifically, funding and support for the Music Commission, as well as a strategic advisor position that supports creative industries work, will stay within ARTS moving forward.

In 2019 ARTS opened a cultural hub on the third floor of King Street Station, preserving historic cultural and affordable space in the heart of the city. At the same time, the ARTS offices moved into the historic building to provide more access to resources for the community. In 2019, ARTS implemented increases in operations and maintenance needed to support operating two cultural facilities. Cultural Facilities Operations is monitoring the needs of the new facility through its inaugural year. The 2020 Proposed Budget adds funding to provide security services needed at ARTS at King Street Station to ensure this new public space is a welcoming and safe place for all, including artists who have artworks on display.

The 2020 Proposed Budget also adds three new positions to ARTS. To ensure that ARTS can carry out its increased programming effectively and reach communities that have not historically benefited from ARTS’ programs, the 2020 Budget adds an executive assistant to the director to help handle ARTS’ expanded programming, partnerships, and new projects like King Street Station and Langston Hughes Performing Arts Institute; a community impact and assessment manager to support ARTS’ creative economy work, manage cross-departmental partnerships, and improve ARTS’ effectiveness through evaluation of race and social justice outcomes; and a community outreach and engagement manager to reach marginalized communities through stronger relationship building as well as other communications and accessibility efforts.

Proposed Technical		
Funding Alignment	-	-
Position Pocket Move	-	1.00
Total Incremental Changes	\$828,091	4.00
Total 2020 Proposed Budget	\$15,587,464	39.09

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$279,457

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$4,534

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Office of Arts and Culture

Citywide Adjustments for Standard Cost Changes

Expenditures	\$21,664
--------------	----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Community Impact & Assessment Manager

Expenditures	\$149,413
Position Allocation	1.00

This item adds a full-time Impact and Assessment Strategic Advisor I to develop data collection and analysis informing program assessment. Programmatic assessment will measure ARTS' impact against racial equity goals, and this position will be closely aligned with the department's Racial Equity Coordinator and other data leads in the department in order to present a full picture of results. This position additionally supports ARTS' creative economy work and provides research and assessment support for partnerships across the City, with other departments and partnering organizations, including Seattle Public Schools.

Community Outreach & Engagement

Expenditures	\$161,415
Position Allocation	1.00

This item adds a community outreach and engagement Strategic Advisor II to address results from using the Racial Equity Toolkit finding the need for more dedicated support to reach communities of color, refugees, and others who have not historically benefited from ARTS' programs. This kind of outreach takes more time and relationship building than traditional modes of media. This position will provide expanded reach for open grants, calls for artists, professional development opportunities, events, and workshops. This position will also support ARTS' Language Access Plan and other accessibility efforts, maintain grants, maintain the website, and other communications needs.

Executive Assistant

Expenditures	\$121,607
Position Allocation	1.00

This item adds a dedicated Executive Assistant (Admin Staff Analyst) to support the director of the department. ARTS' programmatic scope has grown significantly in recent years, including the Langston Hughes Performing Arts Institute and the ARTS at King Street Station space, as well as new interdepartmental partnerships like the Shape of Trust performances. Demands on the director and the overall internal needs of the department have also grown significantly and require additional administrative support. This position will also act as primary contact and support for the Seattle Arts Commission and Seattle Music Commission.

Office of Arts and Culture

Security for ARTS at King Street Station

Expenditures	\$90,000
--------------	----------

This item will pay for security service during public hours at the new ARTS at King Street Station cultural hub. Security is needed at ARTS at King Street Station to ensure this public space is a welcoming and safe place for all, including artists who have artworks on display.

Proposed Technical

Funding Alignment

Expenditures	-
--------------	---

This technical change makes net zero corrections to program areas within ARTS' budget. The transfers will correct an inaccurate division created during the conversion to the new PeopleSoft financial system, as well as better align programming.

Position Pocket Move

Position Allocation	1.00
---------------------	------

This technical change moves a Strategic Advisor I position from the Office of Economic Development (OED) to ARTS. ARTS currently pays for the full time position via an annual Memorandum of Agreement with OED. Funding for the position comes from Admission Tax. This position supports the departments' creative industries work.

Seattle Parks and Recreation

Jesús Aguirre, Superintendent

(206) 684-4075

<http://www.seattle.gov/parks/>

Department Overview

Seattle Parks and Recreation (SPR) works with all residents to be good stewards of the environment and to provide safe, welcoming opportunities to play, learn, contemplate, and build community. SPR manages a [6,400-acre park system of over 485 parks](#) and extensive natural areas. SPR provides athletic fields, tennis courts, play areas, specialty gardens, and more than 25 miles of boulevards and 120 miles of trails. The system comprises about 12% of the city's land area. SPR also manages many facilities, including 27 [community centers](#), eight [indoor swimming pools](#), two [outdoor \(summer\) swimming pools](#), four [environmental education centers](#), two [small craft centers](#), four [golf courses](#), an outdoor stadium, and much more. The Woodland Park Zoological Society operates the zoo with City financial support, and the Seattle Aquarium Society operates the City-owned Seattle Aquarium.

Department employees work hard to develop partnerships with park neighbors, volunteer groups, non-profit agencies, local businesses, and Seattle Public Schools to effectively respond to increasing requests for use of Seattle's park and recreation facilities. Perhaps the most significant partnership is with the Associated Recreation Council (ARC) which provides child care and supports recreation programs at SPR-owned facilities, including community centers and small craft centers. ARC, a non-profit organization, also supports and manages the recreation advisory councils. These advisory councils are made up of volunteer community members who advise SPR's staff on recreation programming at community centers and other facilities. This collaborative relationship with ARC enables the department to offer quality child care and a wide range of recreation programs to the public.

SPR's funding is a combination of tax dollars from the City's General Fund, Seattle Park District funds, Real Estate Excise Tax and revenue from a variety of other sources including grants, user fees and rental charges. Funding for new parks facilities historically came from voter-approved levies. In 2014, Seattle voters approved the formation of a new taxing district known as the Seattle Park District. Property taxes collected by the Seattle Park District provide funding for City parks and recreation including maintaining parklands and facilities, operating community centers and recreation programs, and developing new neighborhood parks on previously acquired sites.

Budget Snapshot

	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Department Support

Seattle Parks and Recreation

Budget Overview

The 2020 Proposed Budget maintains resources to Seattle Parks and Recreation (SPR) and identifies efficiencies to implement budget-neutral staffing changes across the department. In addition, the proposed budget allocates funding to cover increasing costs associated with utility expenses and other citywide adjustments; adds funds to expand existing operations and recreation programming; updates the Capital Improvement Program to reflect planned spending in 2020; and implements technical changes to adjust revenues and expenditures within SPR's budget.

Identifying Efficiencies to Improve Service Levels

SPR closely examined its operations to find efficiencies within existing budget. As a result, the 2020 Proposed Budget implements a number of changes to improve service levels and help the department keep up with increasing demand at its recreation facilities. These changes are budget neutral and include:

- repurposing funding to equalize service levels at 22 wading pools and allow SPR to invest in other aquatic equity initiatives like eliminating the low-income swimming fee;
- adding permanent staffing at the Arboretum Loop Trail, Japanese Garden, and the 24-Hour Call Center;
- realigning staffing to better reflect the evolving needs of various programs and divisions;
- formalizing a commitment to the Teen Summer Musical and other performing arts programs by establishing a dedicated funding source for this work; and
- expanding SPR's administrative capacity and ongoing efforts to measure performance quality across the organization.

Expanding and Enhancing Operations

The 2019-2020 budget added \$150,000 of Sweetened Beverage Tax funding to SPR for youth recreation scholarships. In 2020, SPR will receive additional funding to expand the number of Destination Summer Camp locations and to add hours for Summer of Safety programming at existing sites. In 2020, funding from the Sweetened Beverage Tax will be budgeted in a new Sweetened Beverage Tax Fund per [Ordinance 125886](#).

The 2019 Third Quarter Supplemental Budget Ordinance added partial funding for SPR to partner with the Associated Recreation Council (ARC) to add staffing capacity at community centers. The 2020 Proposed Budget provides the ongoing funding and position authority to hire 3.5 permanent Assistant Coordinator positions. The proposed budget also adds ongoing funding to expand the RV Remediation Program; this funding will cover SPR's portion of the costs and provide additional staff hours and backfill support.

Updating the Capital Improvement Program

In 2019, Outdoors for All was awarded an RFP to renovate Building 18 at Magnuson Park to serve as the organization's future headquarters. Outdoors for All enriches the quality of life for children and adults with disabilities through outdoor recreation. The Mayor's 2020 Proposed Budget includes \$1,000,000 of one-time funding in SPR's Capital Improvement Program (CIP) to assist Outdoors for All with capital renovations at the facility.

SPR's 2020 baseline budget includes \$880,000 of ongoing Community Development Block Grant (CDBG) funding to support the Seattle Conservation Corps. The 2020 Proposed CIP will provide an additional \$700,000 of one-time CDBG funds for ADA compliance; this will supplement existing funding for this work in 2020 and further advance SPR's efforts to make parks and recreation facilities more accessible to all.

In addition, the 2020-2025 Proposed CIP has been updated to reflect anticipated revenue in 2020 from the King County Conservation Futures Tax, transfer ongoing Municipal Energy Efficiency Program funding from the

Seattle Parks and Recreation

Department of Finance and Administrative Services to SPR's budget, and shift funding for the Aquarium Expansion from 2020 to 2021 to reflect an updated spending plan.

Other Changes

Since 2014, SPR has received approximately \$2,000,000 per year from the King County Parks Levy to fund capital projects such as play area and comfort station renovations. The 2014 King County Parks Levy ended in 2019 and was renewed by voters in August 2019. During the 2019-2020 budget process, SPR temporarily removed funding associated with the King County Parks Levy from its Capital Improvement Program and added a placeholder in its operating budget. Now that the levy has been renewed, the 2020 Proposed Budget removes this placeholder from SPR's operating budget and adds the baseline funding back to the 2020-2025 Capital Improvement Program. Finally, the proposed budget adds funding to SPR to account for increasing utility expenses, annual wage adjustments, and other internal service cost changes.

Description of Incremental Budget Changes

Baseline

Elliot Avenue Lease Costs

Expenditures \$350,000

In 2019, SPR executed a new lease at 300 Elliott Avenue West, commonly known as Elliott Bay Office Park. This item provides ongoing funding for Parks to cover increased lease costs.

Citywide Adjustments for Standard Cost Changes

Expenditures \$1,203,524

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Restore Baseline Funding from the King County Parks Levy (Operating)

Expenditures \$(1,399,238)

Revenues \$(1,399,238)

This item removes funding temporarily added to the Park and Recreation Fund as a placeholder for the 2020 King County Parks Levy. The 2020 Endorsed Budget balanced revenues and expenditures in the Park and Recreation Fund for projects historically funded by the levy with the expectation that the budget would transfer back to the King County Parks Levy fund once approved at the ballot by voters in August 2019. Now that the levy has passed, SPR is removing these revenues and expenditures from the Park and Recreation Fund and will re-appropriate them from the King County Parks Levy fund in their Capital Improvement Program via a separate budget adjustment (see below).

Restore Baseline Funding from the King County Parks Levy (Capital)

Expenditures \$2,163,000

Revenues \$2,249,000

This item appropriates funding from the 2020 King County Levy in SPR's Capital Improvement Program. SPR receives approximately \$2.2 million in revenue per year to fund capital projects such as play areas and comfort stations. Ongoing funding from the 2014 King County Levy was temporarily removed from the 2020 Endorsed Budget pending approval of a new levy by voters in 2019. This change restores King County Parks Levy funding in SPR's baseline

Seattle Parks and Recreation

capital budget beginning in 2020. The revenue budget is slightly higher than the expenditure budget in 2020 to cover a small, unfunded balance remaining in the endorsed budget.

Technical Adjustment

Expenditures	-
--------------	---

This item includes budget-neutral technical adjustments to align project coding and account categories.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures	\$6,707,816
--------------	-------------

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor. SPR will receive General Fund (\$3,886,356) to help support this increase. Remaining funding will come from the Park and Recreation Fund (\$1,577,165) and the Park District Fund (\$1,244,295).

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures	\$100,253
--------------	-----------

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

2020 Baseline CIP Adjustment

Expenditures	\$(500,000)
--------------	-------------

This technical adjustment applies CIP amendments made during 2019 to the Proposed CIP.

Proposed Operating

Repurpose Funding for Aquatic Equity Initiatives

Expenditures	\$(45,475)
Revenues	\$(45,475)

SPR currently has 22 wading pools in a variety of parks around the city. The level of service provided at these pools has fluctuated since 2017 based on budget decisions and stabilized in 2019 with 22 pools in service for approximately 709 operating days per year. During the 2019-2020 budget process, Council allocated additional budget to SPR to further increase service levels in 2020 to an unspecified number of operating days. The 2020 Proposed Budget will use some of these funds to maintain current service levels (22 pools and 709 days), providing a consistent operating schedule for the community and staff. The remaining funds will be redirected to more impactful, equity-focused investments in aquatic programming. Specifically, Parks will eliminate the low-income swim fee at all pools and expand the lifeguard training program with a focus on recruiting diverse, low-income youth to participate in the program. Eliminating the fee will result in an ongoing reduction in SPR's total revenue and associated expenditure authority, estimated at \$45,475 in 2020.

Seattle Parks and Recreation

Add Maintenance Staff at the Arboretum Loop Trail

Expenditures	-
Position Allocation	2.00

The 2019 Adopted Budget provided ongoing funding for costs associated with the Arboretum Loop Trail. In 2019, these funds were used to hire temporary labor to assist with initial planting and restoration work. Now that this work is complete, SPR will reallocate the funding to hire two permanent positions who will address ongoing maintenance needs. This adjustment adds FTE authority for one full-time Maintenance Laborer and one full-time Gardener.

Add Dispatcher Position at the 24-Hour Call Center

Expenditures	-
Position Allocation	1.00

In 2019, SPR implemented a 24-Hour Call Center to receive and dispatch staff for maintenance services and emergency responses. Two of three Dispatchers were hired, and Parks has used part-time and intermittent labor to cover the third eight-hour shift. This proposal reallocates the budget for temporary and part-time labor to hire a permanent, full-time Dispatcher position to cover this shift.

Make a Temporary Position Permanent at the Japanese Garden

Expenditures	-
Position Allocation	0.75

This item reallocates funding within SPR's budget and provides FTE authority to make a temporary, part-time Gardener position permanent at the Japanese Garden. This change is expected to result in more reliable, higher-quality service in response to the growing number of annual visitors at the facility.

Realign Staffing for Event Scheduling

Expenditures	-
Position Allocation	(0.25)

This adjustment abrogates a vacant, 0.5 FTE Event Scheduler position and reallocates the funding to better align staffing with the service needs of the Event Scheduling unit. With this funding, SPR will increase an existing 0.75 FTE Special Event Coordinator to full time and increase the unit's budget to hire temporary staff who will support peak season workload needs.

Realign Concrete & Playground Crew

Expenditures	-
Position Allocation	-

This proposal realigns the Concrete & Playground Crew into two distinct crews based on their respective bodies of work. An existing vacant position will be reclassified to a Crew Chief to oversee the Play Area Crew and position costs increases will be covered within existing budget.

Seattle Parks and Recreation

Realign Teen Life Center Staffing

Expenditures	-
Position Allocation	0.75

This item adjusts Teen Life Center staffing to better reflect changing usage, including the growing number of youth served at the Southwest Teen Life Center facility. The 2020 Proposed Budget adds one 0.75 FTE Recreation Leader position to the Southwest Teen Life Center and reclassifies one position into a Senior Recreation Program Specialist to take on more unit-wide duties across the three Teen Life Center sites. This is a budget neutral change funded by repurposing existing resources.

Restructure SPR's Youth Employment Program

Expenditures	\$12,550
Revenues	\$12,550
Position Allocation	0.50

The adjustment makes budget neutral changes to combine two programs, Youth Employment and Service Learning and the Youth Career Training Program, under one supervisor. To implement this restructure, Parks will reclassify two positions and increase one half-time position to full time. These changes will result in one Recreation Coordinator who will supervise both programs and increase staffing capacity at the program implementation level. Position cost increases will be funded by repurposing existing budget within the division and recognizing \$12,550 of unbudgeted program revenues.

Create a Teen Performing Arts Project

Expenditures	\$8,000
Revenues	\$8,000
Position Allocation	-

The Teen Summer Musical at the Langston Hughes Performing Arts Institute engages 80+ youth each summer in nine weeks of structured, day-long programming related to theater and the performing arts. It is a flagship annual program that has never had a formal budget in the SPR department and instead relied on one-time funding and other discretionary resources. The 2020 Proposed Budget formalizes a commitment to the Teen Summer Musical and other teen performing arts programming by creating a permanent funding source for this work through the reallocation of existing budget and recognition of \$8,000 of unbudgeted program revenue.

Increase Administrative Staff Analyst Capacity

Expenditures	-
Position Allocation	1.00

This item increases the hours of two half-time Administrative Staff Analyst positions in the Parks and Environment Division to better support the operational and administrative needs of the division. SPR will reallocate funding from its budget for part-time and temporary labor to make these positions full time; one position will add capacity to support increasingly complex labor coding and data cleanup and the second position will support the Environmental and Education and Sustainability Unit with miscellaneous daily tasks.

Seattle Parks and Recreation

Expand Program Performance and Quality Efforts

Expenditures	-
Position Allocation	-

This item reclassifies one position from a Senior Recreation Program Specialist to a Management Systems Analyst to expand the department's efforts to assess and improve program quality and participant outcomes across the Recreation Division. SPR is reallocating existing budget to cover the salary difference.

Expand Recreation Programming with Sweetened Beverage Tax Funds

Expenditures	\$150,000
--------------	-----------

The 2020 Proposed Budget adds \$150,000 of Sweetened Beverage Tax funds to Seattle Parks and Recreation to expand two programs keeping youth safe and active in structured recreation programming during the summer: Destination Summer Camps and Summer of Safety.

Destination Summer Camps are highly subsidized, low-fee activity camps sited in low-income neighborhoods. In 2018, the department piloted this program with external funding at Garfield Community Center and had more than 580 program registrations. Funding from the Sweetened Beverage Tax will provide a sustainable funding source for this program and allow for expansion to additional sites in Southeast Seattle.

The Summer of Safety program provides free, structured recreation for youth not otherwise engaged in formal programming. The program is currently offered at four locations 3-4 days per week. Sweetened Beverage Tax funding will allow these sites to operate five days per week.

Leverage ARC funds to add Assistant Coordinators

Expenditures	\$150,000
Revenues	\$150,000
Position Allocation	3.50

This item adds 3.5 Assistant Coordinator positions to support growing recreation programming needs at community centers, funded in part by an annual contribution from the Associated Recreation Council (\$150,000) and by reducing SPR's budget for temporary staffing. Partial funding for these positions was approved in the 2019 Second Quarter Supplemental Budget Ordinance. This adjustment provides the ongoing budget and FTE authority to hire the permanent positions.

RV Remediation Expansion

Expenditures	\$100,000
--------------	-----------

This adjustment adds \$100,000 for an expansion of the RV remediation program. This funding will provide for the SPR portion of the expansion to additional sites that are not currently covered by the City's RV remediation program.

Add Funding to Cover Utility Rate Increases

Expenditures	\$1,000,000
--------------	-------------

This item appropriates \$1 million of one-time funding from the Park and Recreation Fund to cover utility rate increases. Utilities include sewer, drainage, water, electricity, gas, and recycling. Seattle Public Utilities has been increasing utility rates annually and SPR is not adequately budgeted for the increasing expenses, particularly drainage costs. The department's total budget for utilities is \$13.7 million in 2019 and 2020 but utility costs already exceeded this amount by \$400,000 in 2018. SPR will evaluate actual operating costs in 2020 and propose a longer-term solution as part of its development of the next six-year Park District financial plan.

Seattle Parks and Recreation

Proposed Capital

Add Funding for Outdoors for All

Expenditures	\$1,000,000
--------------	-------------

Outdoors for All enriches the quality of life for children and adults with disabilities through outdoor recreation. In March 2019 through a RFP process, Outdoors for All was awarded the right to renovate and use Building 18 for its future headquarters. This item adds \$1 million to SPR's budget as an award from the Mayor's Office to Outdoors for All to help fund capital improvements necessary to renovate the building.

Adjust Aquarium Expansion Funding

Expenditures	\$(936,000)
--------------	-------------

This item adjusts the timing of the City's funding commitment to the Aquarium Expansion project to align with the spending plan of the Seattle Aquarium Society. The proposed change moves \$936,000 of REET 1 funding from 2020 to 2021 (\$448,000) and 2022 (\$488,000) based on the most current projected spending plan; it does not affect the total project cost. In addition, this item shifts \$300,000 of REET 1 funding to REET 2 funding in 2020.

Add Community Development Block Grant Funding for ADA Compliance

Expenditures	\$700,000
Revenues	\$700,000

This item adds \$700,000 of one-time Community Development Block Grant funding to the ADA Compliance project in SPR's Capital Improvement Program. This funding supplements \$1,000,000 of Real Estate Excise Tax (REET) in the CIP in 2020 and will further SPR's efforts to implement ADA improvements at a number of SPR facilities.

Transfer Municipal Energy Efficiency Improvement Funding

Expenditures	\$881,449
--------------	-----------

This change transfers the Municipal Energy Efficiency Program (MEEP) funding to Seattle Parks and Recreation for 2020. Previously, this funding was budgeted centrally in the Department of Finance and Administrative Services. MEEP is managed by the Office of Sustainability and Environment in support of the City's goal to reduce building energy use.

Add Park Land Acquisition CFT Funding

Expenditures	\$1,500,000
Revenues	\$1,500,000

This item adds \$1.5 million to the Park Land Acquisition project in 2020; this funding is backed by revenue from the King County Conservation Futures Tax (CFT).

Proposed Technical

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures	-
--------------	---

This technical change reflects the requirements of Ordinance 125886 and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero.

Seattle Parks and Recreation

Waterfront LID Fund - Technical Adjustment

Expenditures	-
--------------	---

This adjustment shifts project costs from the Central Waterfront Improvement Fund (35900) to the new Waterfront LID Fund (35040) that was established during the Waterfront LID formation in early 2019.

Other Technical Changes

Expenditures	\$79,797
Position Allocation	1.05

Technical adjustments include modifications that do not represent fundamental changes in SPR's service delivery. SPR adjusts revenue and expense budgets between or within budget control levels to better reflect actual spending patterns. These technical adjustments include the following changes:

- align positions with projects based on actual workload;
- reconcile position titles with the Human Resources Information System (HRIS); and
- shift supply budgets, temporary staffing, and FTE among divisions to reflect actual spending and staffing needs.

Seattle Parks and Recreation

Seattle Parks and Recreation

The following information summarizes the programs in Cost Center Maintenance and Repairs Budget Summary Level:

M&R Grounds Crews

The purpose of the M&R Grounds Crews Budget Program Level is to provide custodial, landscape, and forest maintenance and restoration services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
M&R Grounds Crews	23,171,292	23,287,013	24,724,210	26,304,061
Full Time Equivalents Total	72.87	76.53	78.51	80.01

M&R Shops Crews

The purpose of the M&R Shops Crews Budget Program Level is to repair and maintain park buildings and infrastructure so that park users can have safe, structurally sound, and attractive parks and recreational facilities.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
M&R Shops Crews	9,845,099	10,051,507	10,264,355	11,695,708
Full Time Equivalents Total	54.86	55.86	55.86	56.36

M&R Specialty Crews

The purpose of the M&R Specialty Crews Budget Program Level is to provide centralized management of natural areas and developed parks including forest restoration, urban forestry, wildlife management, trails, and grass and turf management.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
M&R Specialty Crews	4,007,067	4,503,858	4,574,807	5,119,913
Full Time Equivalents Total	26.05	31.05	31.05	34.30

SPR - BO-PR-20000 - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to provide executive, community, financial, human resource, technology, and business support to the department.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	8,291,954	15,442,853	13,240,226	12,121,935
Departmental Indirect Costs	13,441,022	9,337,469	9,517,899	12,257,138
Divisional Indirect Costs	7,449,384	8,243,916	8,129,898	9,110,939
Indirect Cost Recovery Offset	(18,244,044)	(3,743,690)	(3,743,777)	(3,879,094)
Pooled Benefits	16,413,614	2,947,074	3,062,869	2,612,301
Total	27,351,929	32,227,622	30,207,116	32,223,220
Full-time Equivalents Total*	114.74	118.54	118.54	120.59

*FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Seattle Parks and Recreation

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services, Seattle Information Technology Department, and the Department of Human Resources.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	8,291,954	15,442,853	13,240,226	12,121,935

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs Budget Program Level is to provide executive, financial, communications, human resources and business support and strategic planning an analysis to the departments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	13,441,022	9,337,469	9,517,899	12,257,138
Full Time Equivalents Total	73.25	77.05	77.05	78.10

Divisional Indirect Costs

The purpose of the Divisional Indirect Costs Budget Program Level is to provide managerial and administrative support for operating divisions. The Budget Program also provides planning and development support to develop new park facilities, and make improvements to existing park facilities to benefit the public.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Divisional Indirect Costs	7,449,384	8,243,916	8,129,898	9,110,939
Full Time Equivalents Total	41.49	41.49	41.49	42.49

Indirect Cost Recovery Offset

The purpose of the Indirect Cost Recovery program is to recover costs associated with indirect programs within Leadership and Administrative BSL from the department's direct cost programs. This program does not fully recover Leadership and Administration BSL costs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Indirect Cost Recovery Offset	(18,244,044)	(3,743,690)	(3,743,777)	(3,879,094)

Pooled Benefits

The purpose of the Pooled Benefits program is to fund department costs associated with health and dental insurance, workers compensation, and unemployment insurance contributions.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Pooled Benefits	16,413,614	2,947,074	3,062,869	2,612,301

1498

Seattle Parks and Recreation

SPR - BO-PR-30000 - Departmentwide Programs

The purpose of the Department-Wide Services Budget Summary Level is to provide management and operations of services that span across multiple lines of business within Seattle Parks and Recreation such as partner relationship management, emergency operations, and security services.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

Seattle Center

Robert Nellams, Director

(206) 684-7200

<http://www.seattlecenter.com/>

Department Overview

Seattle Center is home to cultural and educational organizations, sports teams, festivals, community programs (including cultural and community celebrations), and entertainment facilities. Millions of people visit the 74-acre Seattle Center campus annually. Consistently rated as one of the City's top attractions, Seattle Center is a premier urban park whose purpose is to create exceptional events, experiences, and environments that delight and inspire the human spirit and build a stronger community.

The history of Seattle Center dates back to a time well before it existed as a City department in its current form. Prior to the 1850s, the land on which Seattle Center sits was a part of a Native American trail which was later homesteaded by the David Denny family and eventually donated to the City of Seattle. In 1927, the new Civic Auditorium, now Marion Oliver McCaw Hall, and Arena were constructed with funding from a levy and a contribution from a local business owner. In 1939, a large military Armory was constructed. In 1948, the Memorial Stadium was built and the Memorial Wall was added in 1952. Finally, in 1962, the community pulled together these facilities and added new structures to host the Seattle World's Fair/Century 21 Exposition. At the conclusion of the fair, the City took ownership of most of the remaining facilities and campus grounds to create Seattle Center. Since its creation in 1963, Seattle Center has nurtured artistry and creativity by providing a home for and technical assistance to a wide variety of arts and cultural organizations. These tenants play a critical role in the arts and cultural landscape of the region.

Seattle Center is undergoing major changes with the renovation of the Arena, which began in 2019. Following an RFP process, the City selected Oak View Group (OVG)/Seattle Arena Company (ArenaCo) to renovate the Arena using private funding. When the building reopens in 2021, ArenaCo will operate the building. The new building will be capable of hosting both NHL hockey and NBA basketball, and will continue to house the WNBA's Seattle Storm as well as a variety of concerts, family shows, and other events.

Seattle Center is financed by a combination of tax dollars from the City's General Fund and revenue earned from commercial operations. Major sources of commercial revenues include facility rentals, parking fees, long-term leases to non-profit organizations, sponsorships, food sales, and monorail fares.

Due to the size and importance of commercial revenues, Seattle Center confronts many of the same market factors that other businesses do. Changing consumer preferences, fluctuating demand, and the many options customers have in terms of discretionary spending all influence the financial performance of Seattle Center. Seattle Center's situation is also unique in that it must meet the simultaneous financial challenges of competition with other facilities that host events; the presence on campus of long-term, non-profit tenants; and the need to balance its public and private event offerings.

Seattle Center

Budget Overview

Seattle Center is in the midst of one of the largest transformations to touch the campus since the 1962 Seattle World's Fair. In late 2018, the City signed an agreement with Seattle Arena Company (ArenaCo) based on the City's 2017 Memorandum of Understanding (MOU) with Oak View Group (OVG) to invest over \$600 million of private resources to redevelop Seattle Center's largest venue, KeyArena, into a state-of-the-art, world-class sports and entertainment facility capable of hosting a range of events from touring concerts to NBA/WNBA basketball and NHL hockey. The Arena is now closed for redevelopment until 2021. When the Arena reopens, Seattle Center will no longer operate the revitalized venue.

The redevelopment and shift in management of KeyArena fundamentally changes Seattle Center's operating model. While the Arena is closed, Seattle Center is operating at a deficit. As part of the 2019 Adopted Budget, Council passed legislation authorizing Seattle Center to draw on a temporary interfund loan. Per the lease agreement with ArenaCo, when the Arena reopens, ArenaCo will make annual rent payments to the City. Seattle Center will receive a share of any increased revenue associated with sponsorships and parking receipts. These future revenue streams will help to repay the loan.

To protect the City's interests during Arena construction, proper monitoring of project finances is necessary. The 2020 Proposed Budget adds resources to engage a consultant with the expertise to ensure that ArenaCo maintains appropriate balances in equity accounts and/or letters of credit as construction proceeds.

All funding for Arena operations was removed in the 2019 Adopted Budget. In 2019, remaining KeyArena staff were moved into Seattle Center vacancies with different campus work responsibilities. Continuing the transition plan's 2019 staff reductions, five vacant positions will be eliminated in 2020.

Safety concerns have increased around the Seattle Center campus along with the rapid growth occurring in the surrounding neighborhood. Along with increased foot traffic during evening and nighttime hours, incidents requiring the involvement of Seattle Center security officers have grown in frequency. The 2020 Proposed Budget adds security staffing so that swing and graveyard shift security staff can patrol the 74-acre campus in teams.

Seattle Center

While the Arena is being redeveloped, Seattle Center is maintaining robust programming in its other facilities. These include concerts and festivals held on campus grounds, as well as events at McCaw Hall hosted by its resident tenants, the Seattle Opera and the Pacific Northwest Ballet, and other groups. In 2019, the department increased parking rates and facility rental fee ranges at several campus venues to better reflect market rates and maximize commercial revenues when possible. Facilities affected include McCaw Hall, the Armory Loft, the Exhibition Hall, and Fisher Pavilion.

Seattle Center's Capital Improvement Program (CIP) includes several major investments to address deferred maintenance needs across the campus. In addition to the continuation of critical asset preservation work, major planned outlays include International Fountain and Dupen Fountain renovations; maintenance, seismic upgrades, and elevator renovations in Mercer Garage; relocating Seattle Center's skatepark; and replacing the Cornish Playhouse roof. See Seattle Center's 2020-2025 Proposed CIP Overview for more information on capital projects.

Municipal Energy Efficiency Projects - Seattle Center	526,105	-
Proposed Technical		
Budget Realignment	-	-
Elimination of Vacant Positions	-	(4.50)
Total Incremental Changes	\$3,859,859	(2.50)
Total 2020 Proposed Budget	\$50,268,568	225.23

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$2,147,640

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$35,244

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Seattle Center

Citywide Adjustments for Standard Cost Changes

Expenditures \$366,825

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Arena Construction Financial Oversight

Expenditures \$600,000

This item adds one-time funding to engage a consultant with expertise in construction finances. The City needs continued monitoring and financial due diligence during construction of the new Arena to ensure that ArenaCo is maintaining the proper balances in equity accounts created to protect the City's interest in successful completion of the project. This work requires specialized expertise that City staff do not possess. An independent, third party would review ArenaCo's updates on project budget and material change orders, and have access to construction records to provide the City with advance notice of potential major delays or cost overruns.

Overnight Safety Initiative

Expenditures \$184,045

Position Allocation 2.00

These Security Officer positions will augment Seattle Center's graveyard and swing shifts where staffing levels are currently lower than at other parts of the day. Along with rapid growth of the surrounding neighborhood, Center has seen an increase in the number of incidents requiring involvement of its security officers. This increase will allow for officers on those shifts to patrol in teams.

Proposed Capital

Municipal Energy Efficiency Projects - Seattle Center

Expenditures \$526,105

This change transfers the Municipal Energy Efficiency Program (MEEP) funding to Seattle Center for 2020. Previously, this funding was budgeted centrally in the Department of Finance and Administrative Services. MEEP is managed by the Office of Sustainability and Environment in support of the City's goal to reduce building energy use. In 2020, Seattle Center will use these funds for LED retrofitting at the 5th Avenue N Garage and Seattle Repertory Theatre, and HVAC upgrades at the Armory.

Proposed Technical

Budget Realignment

Expenditures -

This technical change shifts \$1,313,304 in budget authority from the Leadership and Administration BSL to the Campus Grounds Budget Program in the Campus BSL. This is a more accurate representation of where those funds are actually spent.

Seattle Center

Elimination of Vacant Positions

Expenditures	-
Position Allocation	(4.50)

This technical change eliminates five vacant positions. These positions were identified and unfunded in the staffing transition plan for the 2019 Adopted Budget. They were not eliminated at that time to allow for attrition to address staffing reductions rather than laying off staff. Since that time, these positions have been vacated and Seattle Center is eliminating the position authority.

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Campus Budget Summary Level:

Access

The purpose of the Access Program is to provide the services needed to assist visitors in coming to and traveling from the campus, while reducing congestion in adjoining neighborhoods. Program services include operating parking services, maintaining parking garages, managing the Seattle Center Monorail, and encouraging use of alternate modes of transportation.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Access	1,817,096	1,239,189	1,253,938	1,335,314
Full Time Equivalents Total	9.71	9.71	9.71	9.71

Campus Grounds

The purpose of the Campus Grounds Program is to provide gathering spaces and open-air venues in the City's urban core. Program services include landscape maintenance, security patrols and lighting, litter and garbage removal, recycling operations, hard surface and site amenities maintenance, management of revenues associated with leasing spaces, and food service operations at the Armory.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Campus Grounds	15,198,941	12,293,531	12,475,727	15,618,940
Full Time Equivalents Total	82.15	124.00	124.00	126.00

Seattle Center

Commercial Events

The purpose of the Commercial Events Program is to provide the spaces and services needed to accommodate and produce a wide variety of commercial events, both for profit and not for profit, and sponsored and produced by private and community promoters.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Commercial Events	2,574,055	1,933,677	1,960,324	2,085,328
Full Time Equivalents Total	11.38	11.38	11.38	11.38

Community Programs

The purpose of the Community Programs Program is to produce free and affordable programs that connect diverse cultures, create learning opportunities, honor community traditions, and nurture artistry, creativity, and engagement.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Community Programs	3,701,893	2,535,648	2,448,706	2,606,770
Full Time Equivalents Total	14.38	17.38	16.38	16.38

Cultural Facilities

The purpose of the Cultural Facilities Program is to provide spaces for performing arts and cultural organizations to exhibit, perform, entertain, and create learning opportunities for diverse local, national, and international audience.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Cultural Facilities	441,826	276,020	280,237	301,153
Full Time Equivalents Total	3.38	3.38	3.38	3.38

Festivals

The purpose of the Festivals Program is to provide a place for the community to hold major festival celebrations.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Festivals	1,508,857	1,289,702	1,308,758	1,396,872

Seattle Public Library

Marcellus Turner, Executive Director and Chief Librarian

(206) 386-4636

<http://www.spl.org>

Department Overview

The Seattle Public Library, founded in 1891, includes the Central Library, 26 neighborhood libraries, and a robust "virtual library" available on a 24/7 basis through the Library's website. The Central Library provides library services and programs for downtown residents and workers. It is also the hub for planning and developing system-wide programs and services and provides critical computer and Wi-Fi availability for people without internet access, in addition to many Seattle visitors. The 26 neighborhood libraries provide services and programs close to where people live, go to school and work, and serve as neighborhood anchors for lifelong learning, civic engagement, and economic vitality.

In 2018, The Seattle Public Library (SPL) hosted more than five million visitors and circulated almost 12 million items. Adult learning programs like English as a Second Language, Adult Education Tutoring, and Ready to Work programs helped over 11,000 people. More than 32,000 kids participated in last year's Summer of Learning and The Seattle Public Library hosted more than 1,100 homework help sessions.

The Library is governed by a five-member Board of Trustees, who are appointed by the Mayor and confirmed by the City Council. Board members are eligible to serve two five-year terms. The Revised Code of Washington (RCW 27.12.240) and the City Charter (Article XII, Section 5) grant the Board of Trustees "exclusive control of library expenditures for library purposes." The Library Board adopts an annual Operations Plan in December after the City Council approves the Library's budget appropriation.

Budget Snapshot

Seattle Public Library

Budget Overview

With more than 5 million visits annually, the Seattle Public Library's (SPL) 27 locations are among the most heavily used public spaces in the city. In addition, the Library's virtual branch receives more than 12 million online visits annually. Seattle residents borrow nearly 12 million items a year and 300,000 attendees partake in more than 10,000 annual Library programs and events. Libraries are a critical part of the fabric of the City, helping close the opportunity gap and providing pathways for people to be successful in life through services to children, students and adults – and especially vulnerable groups such as new immigrants, people who are insecurely housed and those who cannot afford access to the internet at home.

In 2012, Seattle voters passed a seven-year, \$123 million Library levy with 63% approval. The levy restored core Library services that were cut during the Great Recession. The 2012 levy made four promises to voters: keep libraries open when patrons need them, provide a robust collection of books and materials, improve computer and online services, and maintain buildings for the next generation. The levy also allows the Library to access and leverage investments from other sources in response to changing patron needs.

As the Library prepared for the completion of the 2012 levy, it took stock of the cumulative impact of accomplishments over the life of the levy and engaged the community in how to better serve current and future patrons with a levy renewal. In 2018, the Library conducted a community survey to assess public satisfaction with Library programs and services and gauge interest in potential new service offerings. SPL also engaged the public through three Community Conversations about future library services. These efforts guided the development of the levy renewal package that included community priorities of increased access, better collections, investment in technology, services for high-needs communities, and safer, cleaner buildings.

The Mayor proposed and the City Council agreed to place a levy renewal measure on the August 2019 ballot. The measure passed with 76% approval from the voters. The 2020 Proposed Budget adds budget authority to reflect this recent passage. The budget also includes technical adjustments to reflect increases in salary, health care, and retirement costs.

Library Levy

In August 2019, Seattle voters approved a seven-year, \$219 million "Libraries for All" levy to support, maintain, and expand core Library services. Each year, the Library Board of Trustees will allocate available levy funds through the annual Operations Plan and report to the Mayor and City Council on how levy proceeds were spent in the prior year.

The 2020 Proposed Budget includes budget authority for the first year of spending property tax revenues generated from the approved \$219 million levy. The proposed budget reflects the programs that were included in [Ordinance 125809](#).

The seven-year levy supports six priority areas:

- **Hours and Access - \$71.4 million (7-year total)** Seattle residents identified additional open hours as the number one community priority in the 2018 Library Programs and Services Assessment which gathered input from over 26,000 Seattle residents. To meet this demand, the levy adds about 6,600 open hours in 2020 and approximately 10,000 open hours per year for branches across the city in 2021 through 2026. The levy expands Sunday hours at all branches and adds one hour, Monday through Thursday, at all neighborhood branches. Additional morning and evening hours are added at High Point, International District/Chinatown and South Park branches and Friday hours are added at Delridge, Green Lake, New Holly, and Wallingford branches. The new hours provide more access to collections, technology, meeting spaces, instruction and assistance. This investment area also includes sustaining funding for two security officers and adding a community resource specialist for youth. New Sunday hours will be added early in 2020. Other new hours begin in June 2020. The 2020 Proposed Budget includes \$7.6 million in budget authority for this investment area.

Seattle Public Library

- **Collections Improvements and Late Fine Elimination - \$58.4 million (7-year total)** To meet patron demand, the levy increases investments in e-books, e-audiobooks, and streaming and downloadable services for music, films, tv, digital comics, and magazines. The levy also continues investment in popular materials, sustains the Peak Picks “no holds, no-wait” collection, and continues funding support for the collection and digitization of local history materials. The 7-year levy includes \$45 million to sustain funding for baseline collections and increases investment in e-materials by \$5 million.

In addition to the investment in materials, the levy eliminates fines for overdue materials and uses levy resources as a revenue replacement for these funds. Approximately 10% of all accounts that have had a check-out within the last three years are blocked due to fines and fees and patrons are unable to borrow materials. Other library systems have found borrowers return materials at the same or higher rates after fines are eliminated. Overdue fines impact “low opportunity” neighborhoods more significantly because patrons who are unable to pay fines are blocked regardless of whether they return materials or not. Removing fines will increase access to library materials. Over a 7-year period, the levy includes \$8 million to replace lost fine revenue. The 2020 Proposed Budget includes \$5.8 million in baseline collection funding, \$633,000 for increased investments in e-materials and \$1 million to replace lost fine revenue for a total of \$7.4 million.

- **Technology and Access - \$29 Million (7-year total)** The Library plays an important role in providing digital access to patrons who lack internet access at home. A recent Library survey showed that 32% of Seattle residents rely on Library computers or Wi-Fi networks to access the internet and other digital resources. To meet this demand, and provide this important service to the community, the levy adds funding to replace high-speed internet access infrastructure and continues funding for the digital equity programs with levy funds replacing declining cable franchise fee revenues.

The levy also continues funding to upgrade and replace computers printers and copiers, upgrade enterprise equipment and replace or upgrade the Integrated Library System. The 2020 Proposed Budget includes \$3.2 million in budget authority for this investment area.

- **Maintenance - \$56 million (7-year total)** The Library operates seven Carnegie-era branches which are considered historic city, state, and national landmarks. These are Douglass-Truth, Columbia, Fremont, Green Lake, University, Queen Anne, and West Seattle. These branches are unreinforced masonry (URM) buildings, which means that the buildings are at increased risk during a seismic event. The levy includes funding for seismic retrofits for three of the Carnegie-era branches at highest risk of damage in an earthquake: Columbia, Green Lake, and University branches.

The levy also includes funding to support enhanced daily maintenance of library facilities and regular preventative maintenance. In addition, the levy continues funding for capital costs in the major maintenance program. The 2020 Proposed Budget includes \$3.7 million in budget authority for this investment area.

- **Play and Learn Programming - \$2 million (7-year total)** The levy expands funding for the Library’s early learning programs for children ages zero to five. In 2018, the Library held more than 180 Play and Learn group sessions attended by over 7,600 children and their caregivers and currently hosts five weekly play and learn groups at Broadview, Beacon Hill, Columbia, Lake City, and Rainier Beach branches using the Kaleidoscope Play and Learn model. These groups are led in English, Spanish or Mandarin and are facilitated by Library partners (Denise Louie Center, Chinese Information and Service Center, and Wonderland Development Center). This levy expands the program in up to six library branches with levy funds to support new group formation and facilitation. New play groups may be added at existing locations or other branches such as Delridge, High Point, Lake City, NewHolly, Northgate, and South Park. It is anticipated that most of these new play groups will be led by community partners in languages other than English. The 2020 Proposed Budget includes \$262,000 for this investment area.

Seattle Public Library

- **Levy Administration and Library of the Future - \$2.2 million (7-year total)** Funding for levy administration is approximately 1% of the 2019 Library Levy. This includes funding for labor costs of monitoring and reporting on levy performance metrics. This investment area also includes one-time funding for a consultant study to guide planning for library services, staff development, and library operations over the next 10 years. The 2020 Proposed Budget includes \$486,000 in budget authority for this investment area.

Seattle Public Library

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$3,092,279

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$52,534

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$696,911

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Eliminate Overdue Fines

Expenditures -

This is a revenue change to reflect the new policy to eliminate all overdue fines for Library materials. The 2019 Library Levy will fund operations previously supported by fine revenue. In 2019, the Library expects to collect about \$1.1 million in overdue fines. This revenue source has declined by 19% since 2013 as more patrons use digital formats, which are fine-free. Experience in other jurisdictions has shown that eliminating fines does not have a negative impact on returning library materials. All library branches see a similar number of late materials, but "low opportunity" neighborhoods have higher account balances leading to more blocked accounts and limiting access to library materials. Eliminating fines will remove this barrier to accessing Library materials. This change is reflected on the revenue side of the budget.

Investing in e-Materials

Expenditures \$633,000

This item adds budget authority to reflect the 2019 Library Levy resources for e-materials. Digital content, e-books, and streaming media are the fastest growing formats in the library collection. E-material circulation has increased from less than 10% of the total circulation in 2012 to 30% in 2018. E-books and e-audiobooks can cost 3-5 times more than physical books and the future cost model is uncertain. The levy funding will ensure that digital collections

Seattle Public Library

can continue to grow, and meet patron demand. E-materials are also supported by the General Fund and the Seattle Public Library Foundation.

Add Open Hours to Library Branches

Expenditures \$673,000

This item adds approximately 10,000 hours to all Library neighborhood branches per year over the life of the levy. This includes Friday hours at Delridge, Green Lake, NewHolly and Wallingford branches, additional morning and evening hours at High Point, International District/Chinatown and South Park branches, and one additional open hour Monday through Thursday at all neighborhood branches to support increased access to meeting rooms and other Library resources. In addition, all branches will be open on Sunday at noon.

Add Community Resource Specialist for Youth

Expenditures \$146,000

The community resource specialist program is designed to expand and improve the Library's information and referral services for patrons who are in need of housing, shelter, health care or other community resources assistance. The levy adds resources to contract with community-based organization to expand the current community resource special program to include assistance services for at-risk youth. Services will be provided at the Central Library and branches which serve a high number of at-risk youth.

Fund Two Security Personnel with Levy Resources

Expenditures \$200,000

This item shifts the funding for the two security personnel from General Fund resources in 2019 to 2019 Library Levy funding for the duration of the levy. In 2019, the Library was able to add 2.0 FTEs to its security team (1.0 FTE Security Officer and a 1.0 FTE Senior Lead Security Officer) with one-time General Fund resources. The levy continues funding for these positions which are critical to the safety and security of patrons and staff.

Replace Cable Franchise Fees with Levy Resources

Expenditures \$23,500

This item shifts \$671,000 in annual funding for digital equity programs and services from cable franchise fees to the 2019 Library Levy. The Seattle Public Library's Digital Equity and Wi-Fi HotSpot Program serves Seattle residents through short-term checkout of Wi-Fi HotSpots by Library users as well as residents served at prioritized outreach locations. The program is supported by Cable Franchise Fee revenues which is a declining revenue source. The cable franchise fee revenues currently support a librarian and an outreach position. The librarian identifies prioritized populations for the Wi-Fi HotSpot program and provides digital training and support. The staff provides outreach support for hotspot distribution to prioritized populations. The levy is also replacing cable franchise fees which supported \$190,000 of computer hardware and software used by the public. The \$22,378 increase is due to inflation.

Upgrade Enterprise Equipment

Expenditures \$511,000

The item reflects 2019 Library Levy funding to support regular upgrades and replacement of the hardware components of the Library's enterprise technology systems. These include upgrading the Wi-Fi infrastructure and replacing core and network switches at the Central Library and in branches.

In 2020, the Library will use levy funds to upgrade its Wi-Fi infrastructure. The Library continues to see an increase in Wi-Fi connections, surpassing over 5,000 connections per day. It is anticipated that Wi-Fi connections will increase

Seattle Public Library

year over year with a wide-ranging group of users of all ages bringing in more personal devices from tablets to phones. To meet the mobile information needs of our patrons and residents, the Library will upgrade its aging Wi-Fi infrastructure at the Central Library and all 26 branches.

Expand Play and Learn Program

Expenditures \$262,000

This item reflects 2019 Library Levy funding to expand Play and Learn programming by six groups per week at neighborhood branches and hire an early learning program manager for the seven-year levy period. In 2018, the Library held more than 180 Play and Learn group sessions attended by over 7,600 children and their caregivers. The Library currently hosts five weekly play and learn groups at Broadview, Beacon Hill, Columbia, Lake City, and Rainier Beach branches. These groups are led in English, Spanish or Mandarin and are facilitated by Library partners (Denise Louie Center, Chinese Information and Service Center, and Wonderland Development Center). The Library Foundation currently funds the Early Learning Manager who works with community partners to provide these sessions and also provides a small amount of money for books and other materials used by these groups. King County provides funding to the community partners who facilitate these groups through Best Starts for Kids and other resources.

Library of the Future Study

Expenditures \$200,000

This item includes one-time 2019 Library Levy funding for a consultant study to help the Library position itself for the future. SPL will partner with library and information-industry leaders and private-sector entities to contract with future thinking organizations to develop a report on the future of libraries that will guide planning for library services, staff development and library operations over the next 10 years. This work will address the intersection of space and place, self-directed learning, education and skill-development, affordability, technology and communication.

Baseline funding for Hours and Access Levy Category

Expenditures \$7,645,000

This item adds 2019 levy resources to continue funding levels for the "Hours and Access" levy category based on services levels in the 2012 levy. This includes funding to allow the Library to be open 52 weeks a year, provides resources for all branches to be open on Sundays, continues support for hours added in the 2012 Levy at Columbia, Northgate, University, International District, High Point and South Park branches. This funding also supports security and maintenance costs for additional hours as well as reference, technical and supervisory staff to support the longer operating hours.

Baseline Funding for Collection Levy Category

Expenditures \$5,758,000

This item maintains the level of spending on collections and related services funded by the 2012 levy. This includes support for expanding the breadth and depth of the collection in all formats, adding more copies of popular materials, expanding online resources including e-books, e-audiobooks, databases, and streaming services and curating and digitizing the Library's collection of local materials.

Baseline Funding for Technology and Online Services

Expenditures \$2,060,000

This item adds 2019 levy resources to continue technology and online services commitments based on the services levels established in the 2012 Library Levy. This includes labor costs for maintaining spl.org and other digital

Seattle Public Library

presence, administrative support for the Information Technology division, and staff to support enhanced audio-visual equipment in public meeting rooms. This funding also supports print and copy contracts, baseline IT infrastructure, public and staff computers, and upgrades to meeting room audio-visual equipment.

Baseline Funding for Maintenance Levy Category

Expenditures \$1,638,000

This item adds levy resources to support enhanced maintenance service levels established in the 2012 Levy. The funding maintains service levels that were established in the 2012 levy. This includes interior and exterior window washing, carpet and upholstery cleaning, high dusting and numerous other service agreements to keep the facilities clean and safe for staff and patrons. It also supports funding for 5.0 FTEs that are directly funded with levy resources in 2019.

Baseline Funding for Administration Levy Category

Expenditures \$286,000

The 2019 Library Levy maintains the levy oversight services levels established in the 2012 levy. This includes labor costs for monitoring and reporting on levy performance metrics and commitments to the public.

Proposed Capital

Earthquake Retrofit of Carnegie Branches

Expenditures \$500,000

The 2019 Library Levy adds \$13.8 million of new levy resources over the next seven years to the Library's CIP to fund earthquake retrofits at three Carnegie libraries. The total costs of these projects is anticipated to be \$24.9 million. The City's Unreinforced Masonry Policy Committee recommended in 2016 that high-risk unreinforced masonry buildings be retrofitted in ten years or less. The Library has three branches at high risk for seismic damage: Green Lake, University District and Columbia branches. Construction would be staged over the seven year period with funding in the first year to cover the design costs at the Green Lake branch.

Baseline Major Maintenance Funding from Levy

Expenditures \$3,690,000

This item adds \$3.7 million of levy resources in 2020 and \$29.1 million over the next seven years to the Library's CIP to fund the Library's major maintenance program. These resources will be combined with levy money set aside for earthquake retrofit upgrades to provide comprehensive major maintenance to the Green Lake, University and Columbia branches. Approximately \$7.9 million of the \$29.1 million of major maintenance funds over the life of levy will be allocated to these three branches. The remaining funds will go to ongoing major maintenance in other Library facilities.

Proposed Technical

Technical Adjustments

Expenditures \$(5,092,514)

This item includes technical adjustments to remove General Fund budget authority associated with the 2012 Library Levy. This item also makes adjustments for central rates.

Declining Operating Revenues

Expenditures \$(107,740)

Seattle Public Library

The Library is projecting decreased revenues in the amount of \$100,000 for 2020, which is driven by two components. First, as result of the increase in high-rise towers with dedicated parking structures near the Central Branch, parking garage revenue at the Central Library garage has fallen. Second, the Library is no longer accepting credit cards related to print and copy. The Library is participating in the city-wide study and eventual RFP related to city credit card acceptance. This work carries a go-live date of October 2021, which means Print and Copy revenues for the Library will be reduced through at least this period.

Seattle Public Library

Expenditure Overview

Appropriations	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

Total	1,555,064	1,949,709	2,021,663	2,338,142

Seattle Public Library

SPL - BO-PL-B7STR - Institutional & Strategic Advancement

The purpose of the Institutional and Strategic Advancement division is to provide planning and support functions, including strategic analysis, government relations, community partnerships and external and internal communication, to help the City Librarian shape the strategic direction, work and culture of the Library in pursuit of its mission. The division ensures that the public is informed about services and programs offered by the Library.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Institutional & Strategic Adva	2,193,623	1,620,405	935,303	1,586,897
Total	2,193,623	1,620,405	935,303	1,586,897

SPL - BO-PL-LOFT - Levy Operating Fund Transfer

From 2013 through 2019, the 2012 Library Levy provided an operating transfer to the Library Fund. These resources helped preserve core Library services that would have otherwise been reduced in response to the Great Recession.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Levy Operating Fund Transfer	4,827,960	-	-	-
Total	4,827,960	-	-	-

Department of Education and Early Learning

Dwane Chappelle, Director

(206) 233-5118

www.seattle.gov/education

Department Overview

The mission of the Department of Education and Early Learning (DEEL) is to transform the lives of Seattle's children, youth, and families through strategic investments in education. DEEL achieves this goal by investing in high-quality early learning services and programs that help children succeed in school, increasing capacity for such programs in underserved communities and strengthening school-community connections.

DEEL is responsible for weaving together early learning programs in the City to provide families with the opportunity to prepare their children to enter school ready to succeed. By braiding and blending resources from the previous Families and Education and the Seattle Preschool Program Levies; the new Families, Education, Preschool, and Promise (FEPP) Levy; the state Early Childhood Education and Assistance Program; the Sweetened Beverage Tax (SBT); and the City's General Fund, the department seeks to ensure families in the city have access to high quality early learning.

DEEL builds linkages between the City of Seattle, the Seattle Public School District, and other organizations to ensure successful levy implementation. Levy investments are made in programs that improve academic achievement and helps students graduate ready for the postsecondary path of their choice. To that end, each program undergoes ongoing program evaluation to ensure it delivers on specific targeted outcomes intended to improve academic achievement. The department provides annual reports detailing program targets and results to policy makers and the community.

DEEL serves as the liaison between the City and the higher education community on education issues of joint concern. The department builds partnerships with, and facilitates collaboration between, local higher education representatives to increase academic, economic and social advancement. DEEL aligns City investments with institutions' priorities, initiatives and goals to increase student success and higher levels of educational attainment. Part of this work includes implementation of the Seattle Promise College Tuition Program. The Seattle Promise provides two years of free college for Seattle public high school graduates, removing financial barriers to higher education facing many Seattle public school students. Seattle Promise students have the opportunity to obtain up to 90 credits of instruction towards a degree, credential, certificate or pre-apprenticeship program. In Fall 2019, Seattle Promise expanded to all 17 Seattle Public High Schools.

Budget Overview

DEEL implements its mission with funding from the Families, Education, Preschool and Promise Levy (FEPP); the City's General Fund, Sweetened Beverage Tax revenues, state and private grants, and partnerships with other City departments.

Child Care Subsidy Program Expansion

The 2020 Proposed Budget includes Sweetened Beverage Tax (SBT) funding to expand the Child Care Assistance Program (CCAP). CCAP provides financial assistance to low and moderate-income families to pay for child care. The subsidies are based on a sliding scale and the program is designed to support families who make too much money to qualify for the State's Working Connections Child Care program which only supports families up to 200% of the Federal Poverty Level (FPL). DEEL currently contracts with approximately 180 Seattle licensed child care providers. In 2018, 648 vouchers were issued to 491 families. More than 80% of the families that received child care vouchers identified as families of color.

As of September 1, 2019, the sliding scale for the voucher subsidies increased from 300% Federal Poverty Level (FPL) to 350% FPL or approximately \$90,000 for a family of four. The 2020 Proposed Budget continues funding for this expansion, reflects increases in costs for providers, and provides funding for increasing enrollment at lower income levels. DEEL conducts an annual market rate study and the voucher rates are adjusted to reflect the increased costs of child care. The 2020 Proposed Budget also includes additional funding and supports for child care providers who participate in the CCAP program.

Families, Education, Preschool and Promise Levy

In November 2018, Seattle voters approved the seven-year \$631 million FEPP Levy. The FEPP Levy replaced the 2012 Families and Education Levy and the 2014 Seattle Preschool Program Levy. The FEPP levy ordinance, Ordinance 125604, directed DEEL to develop an Implementation and Evaluation Plan. DEEL utilized a variety of methods to engage stakeholders across the preschool to post-secondary continuum to inform the development of the plan. After an extensive outreach and engagement process, the City Council adopted the final plan in April 2019 through Ordinance 125807. The 2020 Proposed Budget includes adjustments to positions to better reflect how the levy will be implemented. These adjustments include re-classifications of existing positions and adding new positions for levy implementation.

Department of Education and Early Learning

The FEPP levy focuses on the core connections of investments across a continuum of ages and needs. The objectives of the FEPP levy include the following:

- increase the number of children in quality preschool;
- maintain support for K-12 and community investments, including school-based health services and supports for students most in need; and
- expand access to college for Seattle public school graduates through support for the Seattle Promise Program.

This continuum of investments is comprised of four building blocks:

1. **Preschool and Early Learning** The Preschool and Early Learning investments are allocated across seven strategies, evaluation, and DEEL administration. The seven strategies include preschool services and tuition; quality teaching; comprehensive support; organizational and facility development; Seattle Preschool Program child care subsidies; the Homeless Child Care program; and Family Child Care Mentorship and Quality Supports. Key metrics for the 2019-2020 school year include the following:
 - 1,916 children in levy-funded preschool slots in 106 classrooms for the 2019-2020 school year
 - 42 child care subsidies for levy-funded children
 - 1,916 health assessments and consultations for preschool children
 - home visitations for 450 families annually
 - professional development for 400 early learning educators
2. **K-12 School and Community-Based Investments** K-12 School and Community investments are designed to close opportunity gaps and ensure students graduate from high school college career ready and prepared for the post-secondary pathway of their choice. Four strategies are funded in this area:
 - **School-Based:** These investments offer intensive support to a limited number of schools. Services will include extended in-school and expanded learning opportunities, academic support and social emotional skill development, college readiness programming, and career exploration experiences.
 - **Opportunity & Access:** These investments will support school and community partnerships, increase access to expanded learning opportunities, promote 21st century skill building and college and career awareness, prevent or limit academic loss during school breaks, and support school and community partnerships by investing in community-based organizations and schools not receiving School-Based awards.
 - **Wraparound Services:** These investments support students by providing family support services and wraparound care, reducing and preventing non-academic barriers to student learning, supporting youth experiencing homelessness, and providing services to support extended day programming.
 - **Culturally Specific and Responsive:** These investments foster equitable learning opportunities, diversify the educator workforce, create positive connections between peers and adults, and offer programming reflective of racial and cultural diversity within the community.

Key metrics for the 2019-2020 school year in the K-12 School and Community-Based Investment area include the following:

- extended learning time and out-of-school time at 21 elementary schools, 16 middle schools, and five high schools;
- social, emotional, and behavioral support, college and career planning at four middle schools, case management for college and career planning for up to 600 students;
- summer learning for up to 1,300 students;
- out-of-school time transportation and sports at 16 middle schools;
- extended learning time & social, emotional, and behavioral support for ninth graders at five schools;
- college and career planning at five schools; and

Department of Education and Early Learning

- case management for college and career planning for up to 400 students at five high schools.

3. K-12 School Health

This investment area funds school-based health centers, oral health and mental health training for providers.

The FEPP Levy adds funding for three more school-based health centers plus partial funding for a fourth school-based health center. Key metrics and outputs for the 2019-2020 school year include the following:

- school-based health centers (SBHCs) and nursing services at five middle schools and 10 high schools;
- SBHC, nursing, and family engagement services at the Seattle World School;
- SBHC services for students at the Interagency Academy;
- health care, mental health interventions and community referrals for elementary school students at eight sites;
- a quality control system for mental health providers;
- oral health services for 10 schools; and planning work for a SBHC at Nova High School.

4. Seattle Promise

The Seattle Promise program provides college and career readiness supports at the high school level, and tuition assistance and program persistence and advising supports at the three Seattle Colleges for students who graduate from a public Seattle high school. Seattle Promise expanded from three high schools to six schools in 2018. In Fall 2019, the Promise program will expand to all 17 Seattle Public high schools. Key metrics for the program for the 2019-2020 school year include the following:

- 900 12th grade students participating in Seattle Promise;
- 300 college students will receive program and advising supports;
- 140 students will receive tuition assistance; and
- 100 students will receive Equity Scholarship support.

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$833,961

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Department of Education and Early Learning

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$9,384

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$153,277

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Child Care Assistance Program Expansion

Expenditures \$3,000,000

Position Allocation 5.50

The 2020 Proposed Budget includes funding to continue the expansion of the Child Care Assistance Program (CCAP) including increasing income eligibility from 300% to 350% of the Federal Poverty Level (FPL), fund enrollment increases, reflect the increasing cost of child care, support providers who participate in the program and enhance staffing capacity. The base budget for the CCAP program is \$3.1 million. The 2020 Proposed Budget almost doubles the funding for the program, and as a result, an additional 500-700 families will receive voucher subsidies.

In 2018, DEEL contracted with a consultant to do a comprehensive study of the CCAP program. Among other things, the consultant recommended that the income eligibility for the program be expanded to 350% to match increases in median income and cost of living in the city. As of September 1, 2019, DEEL increased the eligibility level for the program from 300% FPL to 350% FPL, or approximately \$90,000 for a family of four. DEEL also increased the subsidy rate from 10% to 25% for families at the higher levels of the sliding scale to make child care more affordable for families.

The 2020 Proposed Budget also includes funding to pay for provider rate increases based on the cost of child care. DEEL does an annual provider rate study, and makes adjustments to subsidies based on this information. In 2019, there was an 8.5% increase in rates based on this study. DEEL anticipates another rate increase in 2020.

In addition to the rate increases, as DEEL has done more outreach to eligible families, enrollment in the program has grown. Enrollment counts in 2019 are almost 30% higher than 2018. DEEL expects this enrollment trend to continue in 2020, and the 2020 Proposed Budget includes funding to support the increased enrollment.

However, for the program expansion to continue, there needs to be enough providers in the program for families to have access to child care. To help support increased participation by providers, the 2020 Proposed Budget includes funding to provide direct financial assistance to encourage providers to meet the eligibility requirements for program participation.

The 2020 Proposed Budget also adds six positions to DEEL to support the program expansion. These positions include intake representatives, education specialists, a grants and contracts position, and accounting support. The

Department of Education and Early Learning

staff will provide coaching and support to providers, assist families with enrollment, and perform accounting work to support the program.

Enhance Data Analysis in Early Learning Operations

Expenditures	-
Position Allocation	1.00

This item adds a levy-funded Strategic Advisor 1, Exempt position to the Early Learning Operations team to manage the child enrollment and provider management system (CHIPS). The Early Learning Data Analyst position will be dedicated to early learning work, but will be embedded in DEEL's Performance and Evaluation team to maximize alignment of work flow. This position's primary responsibilities will be to:

- serve as a liaison between Early Learning and the Seattle Information Technology Department (IT) supporting CHIPS;
- work with providers and DEEL staff to offer technical assistance in the functioning of CHIPS;
- ensure the accuracy of data entry which is critical for performance management and provider payments;
- manage reporting evaluation and schedules; and,
- serve as a liaison with external evaluators working on Early Learning assessments.

The position adds are budget neutral as funding was shifted from professional services and other accounts to personnel services. This item includes adjustment for wage increases, and there is an offsetting adjustment in the technical change requests.

Enhance Outreach and Marketing Capacity

Expenditures	-
Position Allocation	1.00

This item adds a Public Relations Specialist, Sr to support DEEL's community-facing programs, including the Seattle Preschool Program and Seattle Promise. With the addition of the Seattle Promise and the continued expansion of the Seattle Preschool Program (SPP) in 2019 and beyond, the need for a position dedicated to graphic design, marketing, and media development has become apparent. This position will assist with outreach events related to FEPP Levy services and programs, with a specific emphasis on Promise and SPP, to ensure that the department is successful in achieving its enrollment and participation goals in both areas.

The position adds are budget neutral as funding was shifted from professional services and other accounts to personnel services. This item includes adjustment for wage increases, and there is an offsetting adjustment in the technical change requests.

Increase Early Learning Administrative Capacity

Expenditures	-
Position Allocation	1.00

This item adds a levy-funded administrative position (Admin Spec II) to support the Early Learning Division in the areas of purchasing and invoice processing, data entry, and management of preschool-related equipment. The Early Learning Division conducts a high volume of purchasing and planning of events that require labor-intensive invoice processing. A position dedicated to this role will help ensure timely and accurate payment processing. In addition, this position will be responsible for entering all professional development data from preschool trainings into MERIT, the Washington State data collection system, to ensure that teachers receive credit for all sessions.

There is a current backlog of invoices, credential data entry, and equipment management which has led to delays in getting both teachers and providers paid in a timely manner. Timely invoice processing is critical for DEEL in order to

Department of Education and Early Learning

maintain a close-to-perfect prompt pay record. Additionally, teacher credential data entry is a key step for processing payments to providers and agencies for their teacher enhancement pay. Delays in entering and processing teacher credential data entry also impact the rate at which providers and agencies are paid.

The position adds are budget neutral as funding was shifted from professional services and other accounts to personnel services. This item includes adjustment for wage increases, and there is an offsetting adjustment in the technical change requests.

Early Learning Reorganization

Expenditures	-
Position Allocation	-

This is a budget neutral change which reflects the reclassification of nine levy-funded positions added to the Early Learning Division budget in 2019. At the time the 2019 Adopted and 2020 Endorsed Budget was developed, DEEL was concurrently working on the FEPP Levy Implementation and Evaluation Plan. As a result of that work, and finalizing the plan, DEEL has better information on the types of positions needed for levy implementation and the scopes of work for the levy positions.

The reclassifications include the following:

- 1.0 FTE Early Education Specialist reclassified to Strategic Advisor 1, Exempt (Operations Unit)
- 1.0 FTE Early Education Specialist reclassified to Manager 1, Exempt (Operations Unit)
- 3.0 FTE Early Education Specialists reclassified to Early Education Specialist Sr. (Operations Unit)
- 1.0 FTE Human Services Coordinator (HSC) to HSC Supervisor (Operations Unit)
- 1.0 FTE Program Intake Representative (PIR) to PIR Senior (Operations Unit)
- 2.0 FTE Early Education Specialist Sr. reclassified to Manager 1, Exempt (Quality Practice & Professional Development Unit)

The reclassification of nine positions to either a higher or supervisory level would result in several outcomes:

- 1) a more balanced ratio of managers to direct reports;
- 2) more skill diversity and level of responsibility; and
- 3) specialization in key FEPP levy priority areas.

Leadership & Administration Reclassifications

Position Allocation	-
---------------------	---

This is a budget neutral change to reflect two position reclassifications in Leadership & Administration. The reclassifications include a Financial Analyst, Sr. shifting to a Strategic Advisor 1 and an Accounting Tech II shifting to an Accounting Tech III. These reclassifications align the accounting positions in DEEL with the level needed to perform critical job functions.

Transfer Upward Bound from HSD to DEEL

Expenditures	\$628,398
Revenues	\$464,431
Position Allocation	4.00

This item transfers funding and positions for the Upward Bound program from the Human Services Department (HSD) to the Department of Education and Early Learning (DEEL). The program is funded with a U.S. Department of Education grant of \$460,000 and the General Fund. The Upward Bound program prepares underserved high school students for higher education by promoting academic achievement, goal setting, and career exploration. The program's goal is to give students the knowledge, skills and motivation necessary to earn a two- or four-year college

Department of Education and Early Learning

or technical degree after high school. Each year, more than 100 students from three Seattle public high schools participate in Upward Bound.

The transfer to DEEL is occurring to improve mission alignment with the goals of the Families, Education, Preschool and Promise (FEPP) Levy which include pre-college and job readiness for Seattle students. Moving the program to DEEL also allows for efficiencies, and programmatic synergies which will improve access to Seattle Public Schools and Seattle Colleges, provide access to data and evaluation support, and provide direct access for Upward Bound students and families to the Seattle Promise program's services and supports. There is a corresponding adjustment in the HSD section of the budget.

Proposed Technical

Add SPP Tuition Revenues and Expenses

Expenditures	\$2,000,000
Revenues	\$2,000,000

This is a budget neutral change to add revenue and expenditure authority for the Seattle Preschool Program tuition collection. At the time the 2019-2020 budget was prepared, the working assumption was that DEEL would rely on a voucher model and no longer collect tuition from families. During the FEPP planning process, and based on feedback from providers and families, this assumption was changed in favor of continuing to have DEEL collect tuition from families who are able to pay part of the tuition costs.

Early Learning FEPP Personnel Technical Adjustments

Expenditures	\$(1,241)
--------------	-----------

This item makes corrections to the 2020 baseline salary and benefits for FEPP-funded early learning positions, as well as moves some non-personnel budget lines to new activities. During the baseline phase, insufficient funds were allocated to FEPP-funded salaries and benefits in the Early Learning division.

Early Learning General Fund Personnel Technical Adjustments

Expenditures	\$(9,366)
--------------	-----------

This BIP funds makes corrections to the 2020 baseline salary and benefits for General Fund-funded early learning positions, including Sweetened Beverage Tax (SBT) and DEEL's state grant (ECEAP), as well as moves non-personnel budget from/to more appropriate activity codes.

Leadership & Administration Technical Adjustments

Expenditures	\$(298,518)
--------------	-------------

This technical adjustment shifts funding between accounts to offset increases in DEEL's central rates and other adjustments administered centrally that impacted personnel-related accounts.

Technical Balancing Adjustment

Expenditures	\$(199,104)
--------------	-------------

This item includes technical adjustments to offset the annual wage increases and state paid family medical leave increases to the FEPP levy budget. This item also includes adjustments to reflect increases in the Early Childhood Education and Assistance Program (ECEAP) grant.

Department of Education and Early Learning

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures -

This technical change reflects the requirements of Ordinance 125886, and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero in total.

Human Services Department

Jason Johnson, Interim Director

(206) 386-1001

<http://www.seattle.gov/humanservices/>

Department Overview

The mission of the Human Services Department (HSD) is to connect people with resources and solutions during times of need, so all Seattle residents can live, learn, work and take part in strong and healthy communities. HSD contracts with more than 170 community-based human service providers and administers programs to ensure Seattle residents have food and shelter, education and job opportunities, access to health care, opportunities to gain social and economic independence and success, and many more of life's basic necessities. HSD is committed to working with the community to provide appropriate and culturally relevant services.

HSD's strategic plan, "Healthy Communities, Healthy Families," identifies six key results:

- All youth in Seattle successfully transition into adulthood.
- All people living in Seattle are able to meet their basic needs.
- All people living in Seattle are housed.
- All people living in Seattle experience moderate to optimum health conditions.
- All people living in Seattle are free from violence.
- All older adults experience stable health and are able to age in place.

HSD's work is funded by a variety of revenue sources, including federal, state, and inter-local grants, as well as the City's General Fund. General Fund contributions leverage significant grant revenues to benefit Seattle residents. As a result, external grants represent 37.4% of HSD's revenue, while the General Fund represents 58.2% in the 2020 proposed budget. In addition, \$5.15 million of HSD's revenue comes from the newly created Sweetened Beverage Tax Fund, representing roughly 2.3% of the department's total budget in 2020. Approximately 1.5% of HSD's 2020 budget is supported by Short Term Rental tax revenues, and the remaining 0.7% of HSD's budget will come from the Unrestricted Cumulative Reserve Fund.

Human Services Department

Budget Overview

The Human Services Department's 2020 Proposed Budget prioritizes much-needed investments across a wide array of program areas, and also makes a number of technical changes to reflect the City's ongoing work to organize itself as effectively as possible to respond to ongoing crises of affordability, livability and homelessness.

Priorities for HSD's 2020 proposed budget include:

Homelessness Prevention, Services, and the new King County Regional Homelessness Authority

The Human Services Department (HSD) accounts for approximately 90% of the City's total spending on homelessness and plans to spend \$94.9 million in 2020. These funds will support operations, staff, and programs to prevent homelessness, support those experiencing homelessness, and address the community impacts of living unsheltered in 2020. This amount represents an increase of approximately 12% over HSD's revised budget in 2019.

The proposed budget includes a number of one-time program investments in homelessness outreach, shelter, and prevention. Among these are a one-time extension of the Mayor's pilot program to provide rental assistance to households at risk of homelessness while on the Seattle Housing Authority's waitlist for Housing Choice Vouchers, and an additional 2020 investment in a safe overnight parking pilot program to serve people living in vehicles.

The proposed budget includes an investment to cover one-time costs associated with potentially ramping down operations at two of the City's tiny house villages. The Human Services Department is actively engaging with village operators and stakeholders at the Northlake and Georgetown locations to consider possibilities for the villages, which may include shifting shelter capacity away from these two villages and ramping down operations there in 2020. Any lost capacity will be replaced by adding units at existing tiny house villages or adding new enhanced shelter beds.

A number of City-funded shelters and Permanent Supportive Housing projects serve a client population with a high level of low-acuity medical needs. This has been shown to result in a very high volume of 9-1-1 calls to select locations. The 2020 Proposed Budget makes strategic investments in a 24/7 nurse call line and in onsite nursing staff. In partnership with Seattle/King County Public Health, Harborview Medical Center, and NeighborCare, these investments seek to better meet the needs of this client population while reducing the burden on the City's 9-1-1 system.

Human Services Department

Incremental Budget Changes

Human Services Department

	2020 Budget	FTE
Total 2020 Endorsed Budget	199,750,278	382.75

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$438,152

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process. This BIP captures budget changes in the central cost accounts. Shifts between general fund and grant funding sources budgeted in the Human Services Fund are visible in this BIP. Combined with HSD-140, the total appropriation increase for HSD is \$195,017 of general fund and \$7,022,841 of grant funding sources.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$45,155

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$3,001,306

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Human Services Department

Transfer a Management Systems Analyst to the Leadership and Administration Division

Expenditures	-
Position Allocation	-

This item transfers budget for a Management Systems Analyst position from the Preparing Youth for Success Budget Summary Level (BSL) to the Leadership and Administration BSL. This move is part of the gradual consolidation of data analysis and evaluation positions and expertise within the department's Data, Performance, and Evaluation team, which is housed in the Leadership and Administration BSL.

Transfer Partial Funding for an Administrative Specialist to the Leadership and Administration Division

Expenditures	-
--------------	---

This item moves budget authority from the Addressing Homelessness BSL to the Leadership and Administration BSL to partially fund an Executive Assistant position to support the department's deputy director.

Transfer Funding from a 2019 2% Inflationary Increase to the Addressing Homelessness Division

Expenditures	-
--------------	---

This item transfers budget authority established by 2019 City Council Green Sheet 14-9-D-1, which provided for an inflationary increase to Human Services provider contracts backed by non-General Fund revenue. Budget authority is moving from the Leadership and Administration BSL into the Addressing Homelessness BSL to support inflation to contracts supported by the Federal HOPWA grant, which had previously been determined ineligible for such an increase.

Transfer HSD's Federal Grants and Community Facilities Teams to the Leadership and Administration Division

Expenditures	-
--------------	---

This item transfers budget authority from the Addressing Homelessness BSL to the Supporting Affordability and Livability BSL. HSD's Federal Grants unit and Community Facilities investment teams were previously budgeted and managed out of the Homeless Strategy and Investments Division and have now been transferred to the Leadership and Administration Division.

Move 2019 Council Budget Add to the Affordability and Livability BSL

Expenditures	-
--------------	---

This item transfers budget provided by 2019 City Council Green Sheet 15-7-B-1 from the Addressing Homelessness BSL to the Supporting Affordability & Livability BSL. This Council budget action provided \$300,000 in flexible funds for households at risk of homelessness, but the intent of the funding is better aligned with HSD's broader portfolio of affordability programs.

Proposed Operating

One-Time Costs to Stand up the King County Regional Homelessness Authority

Expenditures	\$2,000,000
--------------	-------------

This item provides one-time funding to support startup costs for the new King County Regional Homelessness Authority (KCRHA). It is anticipated that the City will provide funding for some costs associated with opening operations at KCRHA in 2020 which are not currently accounted for in HSD's base budget. These items may include expenses to cover senior level staff, such as an Executive Director, a Chief of Staff, Deputy Directors, and a Human Resources manager. These items may also include startup operations expenses such as an executive search firm, technology systems for financial planning and management and human resources, office supplies, and moving costs

Human Services Department

to a new office space.

In addition to the City's contribution to one-time standup costs, King County has committed to provide office space and cover four years' worth of space rent for KCRHA. The County will also cover the cost of all tenant improvements needed to renovate and furnish the selected space. The estimated 2020 value of the County's contribution in this area is \$1,340,000.

Additional Funding in 2020 to the Support Safe Parking Program

Expenditures \$125,000

This item makes an additional investment in 2020 to support the pilot safe parking program originally funded through the 2019 Adopted and 2020 Endorsed budgets. The region's 2019 Point-In-Time Count estimated 2,147 individuals living in vehicles. This accounts for 19% of the total count, and 41% of those living unsheltered. These funds will be added to the \$250,000 already in the 2020 Endorsed budget, expanding the program's 2020 budget by 50%.

Continuation of 2019 Navigation Team Expansion

Expenditures \$326,461

This item provides ongoing funding to sustain the Navigation Team at its current size and capacity level. The Human Services Department used one-time salary savings to expand the Navigation Team in 2019 by hiring two additional Field Coordinators. This expansion allowed the Team to further provide outreach, services, and removal of unsanctioned encampments with a focus on those blocking the right-of-way.

Re-Siting Tiny House Villages

Expenditures \$1,262,000

This item provides one-time funding to ramp down operations at two of the City-sanctioned tiny house villages and replace the lost shelter system capacity with increased space in other villages and enhanced shelters. The City is considering possibilities for the Georgetown and Northlake village locations, both of which have reached the end of their two-year permitting cycles set out in City Ordinance 12474 which originally authorized the establishment of sanctioned encampments. Other encampments which are also at the end of this permitting cycle are likely to enter agreements for sponsorship with faith-based communities which would allow them to remain in place.

Onsite Nurses for Locations that Generate a High Volume of 9-1-1 Medical Calls

Expenditures \$650,000

This item adds ongoing funding to provide onsite nurse support for an after-hours swing shift at five shelter and permanent supportive housing locations which have been identified as among those generating the highest volume of non-emergency 9-1-1 calls. This funding will serve the low-acuity medical needs of those who most frequently access the City's 9-1-1 emergency response system. Nurses will perform basic patient triage and address medical complaints of clients in alignment with the Seattle Fire Department's patient evaluation and triage approach.

Nurse Call Line

Expenditures \$40,000

This item adds \$40,000 in 2020 to open and operate a 24/7 nurse call line to handle low-acuity calls from staff and clients at city shelters and permanent supportive housing locations, with the goal of reducing the burden posed by these calls on the City's 9-1-1 emergency response system.

Downtown Emergency Services Center (DESC) piloted such a call line from 2017 to 2018. The pilot covered 15 DESC

Human Services Department

sites. This pilot found that only 80% of the calls received by the call line did not need to be redirected to 9-1-1. This budget action provides for \$3,000 for one-time startup costs and \$37,000 for ongoing operations. It is estimated that this funding will allow the call line to field as many as 900 calls per year.

Mt. Baker Family Resource Center

Expenditures	\$840,000
--------------	-----------

This item provides one-time funding to support the ramp-up of program operations at the Mt. Baker Family Resource Center. These programs are operated by Mary's Place, Childcare Resources, and Refugee Women's Alliance, and are located at Mercy Housing's Mount Baker Affordable Housing building. This center will serve families living at the building as well as those living in the surrounding area. Services will include housing search and navigation, childcare resources and referrals, financial literacy, parent coaching, preventative health education, and employment services.

Seattle Rental Housing Assistance Pilot Extension

Expenditures	\$515,000
--------------	-----------

This item provides additional one-time funding to sustain the Seattle Rental Housing Assistance Pilot (SRHAP) program through the end of 2020. The pilot was originally scheduled to end by February of 2020.

This pilot program provides funding for direct financial assistance, staffing, and other costs to support homelessness prevention services for households on the Seattle Housing Authority (SHA) Housing Choice Voucher waitlist. In October of 2018, SHA slowed the rate at which vouchers are issued in an effort to facilitate a higher success rate among voucher holders in finding housing. A byproduct of this policy has been increased wait times for those on the list, including households enrolled in the SRHAP pilot program.

Additional Inflationary Increase for Human Service Provider Contracts

Expenditures	\$1,564,998
--------------	-------------

This item provides an additional inflationary increase to human services provider contracts in 2020. In July of 2019 the City Council passed Ordinance 125865, which requires that human services provider contracts provide an inflationary increase each year when renewed or renegotiated. The ordinance calls on HSD to use the annual average growth rate of the Seattle-Tacoma-Bellevue Area Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) to determine the inflationary increase amount. CPI-W for this budget cycle is 2.6%.

The 2019 Adopted and 2020 Endorsed Budgets provided for a 2% increase in each year to those human services provider contracts which are supported by General Fund revenues. This proposed additional increase adds \$739,770 to provide the remaining 0.6% to General Fund-backed contracts and adds \$825,228 to provide the full 2.6% increase to most contracts funded by grants or other non-general fund revenues.

King County Domestic Violence Hotline

Expenditures	\$375,000
--------------	-----------

This item provides \$375,000 in ongoing money to support a county-wide domestic violence hotline. King County and partnering agencies will provide the remaining \$1.2 million annually. The County line will provide 24-hour, multi-lingual, multi-modal services including immediate crisis support and counseling, and serve as single point of contact for referral to the region's specialized survivor advocacy services, children's services, and legal, medical, and housing assistance.

Human Services Department

Sweetened Beverage Tax-Backed Investment in Food Banks and HSD Staff Capacity

Expenditures	\$1,125,000
Position Allocation	2.00

This item provides Sweetened Beverage Tax (SBT) revenue to the Human Services Department to support the expansion of staff and programs. Approximately \$300,000 will provide for the addition of a Sr. Grants and Contracts Specialist and a Strategic Advisor II to the department. The remainder of this add, which is approximately \$825,000, will be used to support the work of food banks.

The addition of Sweetened Beverage Tax revenue has resulted in a significant increase to HSD's budget for food and nutrition programs since 2018. These two staff are needed to ensure this funding receives sufficient oversight as it gets programmed, monitored, and reported. The Strategic Advisor II will also be the primary point of contact within HSD for communicating with key stakeholders on issues related to the use of SBT revenue, such as the SBT Community Advisory Board, the Mayor's Office, and Seattle City Council. These staff positions will account for 5.8% of HSD's \$5,149,713 in SBT-backed spending in the 2020 Proposed Budget. This total represents a true increment to HSD's budget relative to spending before the SBT was imposed, because the use of SBT to replace previous General Fund support has been eliminated from the 2020 budget.

Seattle Youth Employment Program Year-Round Expansion

Expenditures	\$310,019
Position Allocation	2.00

This item adds a year-round component to the Human Services Department's Seattle Youth Employment Program (SYEP). SYEP has traditionally served 400 youth from low-income and historically disadvantaged communities in a summer internship program. This expansion will serve 200 of the program's participants in three consecutive modules during the fall, winter, and spring. The new modules will provide career navigation, exploration, and skill-building opportunities to augment the existing summer internships. Participants will receive support for food, transportation, work appropriate clothing, and stipends or wages. This budget change will fund the two additional Youth Development Counselors needed to provide the youth support services that are central to this program's service model.

Additional Staff to Support the Utility Discount Program

Expenditures	\$169,037
Revenues	\$169,037
Position Allocation	2.00

This Item adds one Program Intake Representative and one Administrative Specialist to HSD to support the Utility Discount Program. Since 2014, HSD has been charged with increasing enrollment in the UDP from 14,000 to 34,000 utility payers. This has resulted in higher caseloads and the need for additional staff to provide necessary administrative and enrollment support. These positions are backed by funding from Seattle Public Utilities and Seattle City Light.

CDBG Capital Investments

Expenditures	\$2,000,000
--------------	-------------

This item invests previously unused Community Development Block Grant (CDBG) money from the U.S. Department of Housing and Urban Development (HUD). These funds will go to support Seattle Housing Authority (SHA) and International Community Health Services (ICHS). SHA will use these funds to make much-needed upgrades to fire alarm systems and other building maintenance needs at its properties. These upgrades will both improve the safety of residents and reduce the number of false alarms to which the Seattle Fire Department currently responds. ICHS

Human Services Department

will use CDBG funding to support the completion of a facility for a Program of All-Inclusive Care for the Elderly (PACE) for the Asian Pacific Islander community.

Chief Seattle Club Health Clinic

Expenditures \$1,000,000

This item is a one-time capital investment in Chief Seattle Club's 2019 project to build affordable housing units and a health clinic in Pioneer Square. Seattle Indian Health Board will rent the main floor of the building and operate the health clinic. The project will also provide Chief Seattle Club with space to provide expanded services, including case management, job training, and education. Once constructed, it is estimated that the on-site clinic will provide primary care for between 600 and 1,200 homeless and low-income American Indian/Alaska Native people each year.

Safety RFP Ramp-Down Funding

Expenditures \$1,313,696

This item provides one-time funding in 2020 to ramp down City support of programs which previously received funding from the Human Services Department, but which were unsuccessful in the Department's 2019 Safety RFP process. 24 eligible applications to this RFP were reviewed by a 15-person review committee comprised of non-profit leaders, subject matter experts, local youth, and City staff from the Legislative, Law, Human Services, and Education and Early Learning departments. 14 organizations were successful in the RFP and were together awarded nearly \$4.5m. Of those not awarded, seven held contracts with the Human Services Department in 2019 and will receive this one-time support in 2020 to help mitigate the impacts of the RFP results on their programs and clients.

One-time Capital Investment in LGBTQ Youth facility

Expenditures \$500,000

This item adds one-time funding for Lambert House in support of its capital campaign. Lambert House empowers lesbian, gay, bisexual, transgender, and questioning youth through the development of leadership, social, and life skills. The organization offers LGBTQ youth over 30 different annual and ongoing programs, activities, resources, and services.

This funding will support Lambert House's current effort to acquire and renovate the building it currently operates in Seattle's Capitol Hill neighborhood. Funding will be distributed after an agreement for public benefits has been negotiated with the organization.

Support Statewide Human Services Advocacy

Expenditures \$25,000

This item adds funding to support the City's statewide human services contract for public policy advocacy. The City contracts with outside organizations to support public policies and funding that benefit low-income or vulnerable Seattle residents, particularly with elected officials in the Washington state government. The Office of Intergovernmental Relations had been managing these contracts in recent years, but the work better aligns with the Human Services Department. This addition will allow for the continued support of these contracts in the Human Services Department.

Proposed Technical

General Fund Appropriation Adjustments

Expenditures \$(386,011)

This item provides for technical adjustments to HSD Budget Control Levels in the General Fund. Changes are a combination of technical transfers between budget projects to align with current allocations made through HSD

1565

Human Services Department

contracts to service providers and the balancing of General Fund items with grant funding in the Human Services Fund.

Grant Funded Appropriation Changes

Expenditures	\$6,561,825
--------------	-------------

This item provides for increased appropriation as a result of current and anticipated grant awards in the Human Services Fund.

In the Addressing Homelessness BCL, changes include a \$1.5m increase in the City's McKinney-Vento award from the U.S. Department of Housing and Urban Development, a \$590,000 increase to the City's Housing Opportunities for People with AIDS (HOPWA) award, and a \$370,000 increase in funds from the City of Seattle's Housing Levy derived from underspend in the prior year. In the Preparing Youth for Success BCL, changes include a \$179,000 reduction in Education Levy funds and a \$175,000 reduction in the use of fund balance. In the Promoting Healthy Aging BCL, changes include a \$3.1 million increase to Title XIX case management funding, a \$358,000 increase in funding from the Older Americans Act, a \$550,000 reduction in transportation grant funding, and a \$177,000 increase in State grant funding, along with other small grant funding changes. In the Supporting Affordability and Livability BCL, changes include a \$400,000 increase in Older Americans Act funds and a \$73,000 increase in Childcare Nutrition Funds from the Office of the Superintendent for Public Instruction. In the Supporting Safe Communities BCL, the change reflects an increase of \$452,000 in the use of Domestic Violence and Sexual Assault funds from court proceeds.

Technical Transfers in the Human Services Fund

Expenditures	-
--------------	---

This item contains net-zero transfers within the Human Services Fund. These transfers represent changes to allocations between funding sources, accounts, and projects. The resulting impact a \$76,939 reduction to the Addressing Homelessness BSL, a \$21,049 reduction to the Promoting Healthy Aging BSL, a \$64,447 increase to the Supporting Affordability and Livability BSL, and a \$33,540 increase to the Supporting Safe Communities BSL.

Transfer Funding for Upward Bound from HSD to DEEL

Expenditures	\$(573,702)
Position Allocation	(4.00)

This item transfers funding and positions for the Upward Bound program from the Human Services Department (HSD) to the Department of Education and Early Learning (DEEL). The Upward Bound program prepares underserved high school students for higher education by promoting academic achievement, goal setting, and career exploration. The program's goal is to give students the knowledge, skills and motivation necessary to earn a two- or four-year college or technical degree after high school. Each year, more than 100 students from three Seattle public high schools participate in Upward Bound.

This transfer to DEEL is occurring to improve mission alignment with the goals of the Families, Education, Preschool and Promise (FEPP) Levy which include pre-college and job readiness for Seattle students. Moving the program to DEEL also allows for efficiencies, and programmatic synergies which will improve access to Seattle Public Schools and Seattle Colleges, provide access to data and evaluation support, and provide direct access for Upward Bound students and families to the Seattle Promise program's services and supports. There is a corresponding adjustment in the DEEL section of the budget. This transfer includes both appropriation authority and program-related revenue from a Federal grant.

Human Services Department

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures -

This technical change reflects the requirements of Ordinance 125886 and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero in total.

CDBG and General Fund Transfer

Expenditures -

This item transfers appropriation authority from the general fund to the CDBG funding source in fund 16200 to maximize the CDBG grant service cap.

Support for Evaluation Capacity at Organizations Operating Programs Backed by Sweetened Beverage Tax Revenue

Expenditures \$249,764

This item transfers ongoing appropriation authority in the amount of \$499,528 from the Office of City Auditor to the Supporting Affordability & Livability BSL in HSD. Funds are transferring from the Auditor to the Human Services Department in order for HSD to provide technical assistance to partner organizations that will expand their ability to evaluate programs funded by the Sweetened Beverage Tax. This item corresponds to item HSD-OT99 in the 2019 3rd Quarter Supplemental Budget Ordinance, which transfers the same amounts from 2018 and 2019 from the Office of City Auditor to the Human Services Department.

Transfer General Fund Appropriation to Short Term Rental Tax Fund

Expenditures -

This item transfers \$3.3 million of General Fund appropriation to the Short Term Rental Tax fund.

Appropriations by Budget Summary Level and Program

HSD - BO-HS-H1000 - Supporting Affordability and Livability

The purpose of the Supporting Affordability & Livability Budget Summary Level is to support educational programs for children, youth, and families; and provide utility payment and transportation assistance to Seattle residents with low incomes.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Access to Services	1,822,587	3,844,998	3,657,215	4,657,503
Community Facilities	-	3,512,451	1,779,074	5,372,325
Emergency Preparedness and Program Administration	-	943,876	906,207	1,181,250
Food & Nutrition	14,238,091	15,295,344	15,460,766	17,677,356
Total	16,060,678	23,596,669	21,803,261	28,888,434
Full-time Equivalents Total*	25.00	28.00	28.00	32.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Supporting Affordability and Livability Budget Summary Level:

Access to Services

The purpose of the Access to Services Program is to provide information and access to community resources that support affordability and livability, including utility payment assistance and vehicle license rebates to low income residents in the City of Seattle.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Access to Services	1,822,587	3,844,998	3,657,215	4,657,503
Full Time Equivalents Total	14.00	14.00	14.00	16.00

Community Facilities

The purpose of the Community Facilities Program is to support the construction of facilities that are primarily for the benefit of low-income people in Seattle, including childcare facilities.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Community Facilities	-	3,512,451	1,779,074	5,372,325

Emergency Preparedness and Program Administration

This Budget Summary Level is being combined with the Affordability and Livability Budget Summary Level in the 2019 Budget.

Human Services Department

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Preparing Youth for Success Budget Summary Level:

Family Support

The purpose of the Family Support Program is to focus on strengthening and empowering families, through systems navigation support and family management, so that youth in Seattle successfully transition into adulthood.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Family Support	5,414,629	5,320,032	5,187,075	6,186,955
Full Time Equivalents Total	11.00	11.00	11.00	11.00

Human Services Department

Safety

The purpose of the Safety Program is to support youth and adults at risk of involvement with the criminal justice system through violence prevention, intervention and re-entry supports to foster successful transitions to adulthood and safe communities.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Safety	3,011,559	6,711,832	6,187,069	7,217,195
Full Time Equivalents Total	4.00	4.00	4.00	4.00

Youth Development

The purpose of the Youth Development Program is to provide youth with strength-based experiences and employment and training which helps them to become more socially, culturally, emotionally, physically, cognitively and academically competent.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Youth Development	11,220,077	7,478,473	8,403,124	7,585,227
Full Time Equivalents Total	19.00	19.00	19.00	16.00

HSD - BO-HS-H3000 - Addressing Homelessness

The purpose of the Addressing Homelessness Budget Summary Level is to support a range of programs that provide resources and services to Seattle's low-income and homeless residents to reduce homelessness.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Homelessness Prevention and Support	23,714,711	19,637,155	19,302,053	19,046,640
Navigation Team	-	2,024,357	2,902,957	2,559,377
Shelters & Housing	60,730,463	58,967,438	59,743,274	68,256,708
Total	84,445,175	80,628,950	81,948,284	89,862,725

Seattle Department of Construction and Inspections

Nathan Torgelson, Director

(206) 684-8600

www.seattle.gov/sdci

Department Overview

The Seattle Department of Construction and Inspections (SDCI) administers City ordinances regulating building construction, the use of land, and housing. It supports Mayor Durkan's priority of delivering essential City services and building safer, more just communities.

SDCI is responsible for developing and enforcing policies and codes related to public safety, environmental protection, land use, construction and rental housing, including:

- Environmentally Critical Areas Ordinance (ECA)
- Housing and Building Maintenance Code (HBMC)
- Just Cause Eviction Ordinance
- Rental Registration and Inspection Ordinance (RRIO)
- Seattle Building and Residential Codes
- Seattle Condominium and Cooperative Conversion Ordinances
- Seattle Electrical Code
- Seattle Energy Code
- Seattle Grading Code
- Seattle Land Use Code
- Seattle Mechanical Code
- Seattle Noise Ordinance
- Seattle Rental Agreement Regulation Ordinance
- Seattle Shoreline Master Program (SSMP)
- Seattle Tenant Relocation Assistance Ordinance (TRAO)
- Seattle Tree Protection Ordinance
- State Environmental Policy Act (SEPA)
- Stormwater Code

SDCI reviews land use and construction-related permits, annually approving more than 51,000 permits and performing approximately 230,000 on-site inspections. SDCI's work includes permit review and community involvement with Master Use Permits (MUPs); shoreline permits and design review; review and approval of permits for construction, mechanical systems, site development, elevators, electrical installation, boilers, furnaces, refrigeration, signs and billboards; field inspections for all construction and trade-related permits; annual maintenance inspections of boilers, elevators, and refrigeration equipment; and home seismic retrofits.

SDCI also enforces compliance with the codes and handles more than 30,000 contacts per year at the Code Compliance Complaint Center.

SDCI operations are funded by a variety of fees and General Fund resources. SDCI must demonstrate that its fees are set to recover no more than the cost of related services. To provide this accountability, SDCI uses cost accounting to measure the full cost of its programs. Each program is allocated a share of departmental administration and other overhead costs to calculate the revenue requirements of the program.

Budget Overview

The City of Seattle continues to see historically high levels of development activity in 2019. In 2018, SDCI's volumes of construction permits, building and electrical inspections, and housing, zoning and construction complaints were in line with the record levels SDCI has seen over the past three years. While high permit levels continue in 2019, the pace of development is projected to decrease in 2020.

Due to the strength of the development cycle, 13 positions were added to SDCI in 2019 to support land use zoning review and shorten permit review times. The 2020 Proposed Budget includes these newly added positions, which have a sunset date of December 31, 2022. These positions are funded by permit fees and other building and land use revenues.

Accela is the City's enterprise-wide permitting system that allows greater sharing between departments that are using the system, including SDCI, the Seattle Department of Transportation and the Seattle Fire Department. Accela will also provide a more streamlined process for applicants. In September 2018, SDCI and the Seattle Information Technology Department (Seattle IT) signed a change order to accelerate enhancement work and issue resolution of the new permit, complaint, and land use tracking and permitting system upgrade for SDCI. This change order was extended to the end of 2019. Ongoing improvements are being made throughout 2020 and beyond as the department continues to enhance the new system. In addition, continued investment in the Accela permitting initiative will lead to more immediate permitting process improvements, and better customer experience and interaction. SDCI's proposed budget makes two additional investments in the Accela program: it adds \$241,000 for SDCI's share of City-wide Accela support by Seattle IT, and it adds \$1.6 million for SDCI-specific Accela work.

The proposed budget advances Mayor Durkan's goal of seizing opportunities to build a more vibrant city for the future by adding a new position to serve as an Accessory Dwelling Unit (ADU) navigator, as directed in Executive Order 2019-4. The department is also planning for the future by participating in environmental review work for Sound Transit 3, a \$54 billion public transit expansion with a major light rail investment within Seattle.

Except for Code Compliance and Land Use Code Development, SDCI is primarily fee-supported and its fees and charges are necessary to fund its permitting and inspections operations. Per state law and Seattle Municipal Code, all fees collected by SDCI for processing and inspecting permits are used for that purpose, and the fee structure is established accordingly. The 2020 Proposed Budget includes legislation that revises most of SDCI's 2020 fees and

Seattle Department of Construction and Inspections

charges by 4% to align with the Consumer Price Index (CPI) increase. The legislation also adjusts the land use hourly fee from \$386 to \$394, consistent with direction provided by Council during the 2019 Adopted Budget process. The proposed budget also includes legislation to update SDCI's fund policies to make them consistent with current naming conventions and related practices. Please see the legislation for more detail.

Description of Incremental Budget Changes

Baseline

Citywide Indirect Costs Accela O&M Baseline Adjustment

Expenditures -

This baseline adjustment transfers \$1 million associated with Accela operations and maintenance (O&M) from the IT Allocation in the Leadership & Administration BSL to the Process Improvements & Technology BSL. This adjustment is within SDCI's Construction and Inspections Fund.

Seattle Department of Construction and Inspections

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$3,682,936

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor. \$310,000 of this increase is from the General Fund, \$10,000 is from the Unrestricted Cumulative Reserve Fund, and \$3,362,936 is from SDCI's Construction and Inspections Fund.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$55,500

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees. General Fund supports \$5,000 of this increase and \$50,500 is from SDCI's Construction and Inspections Fund.

Citywide Adjustments for Standard Cost Changes

Expenditures \$1,146,355

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services (FAS) rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Divisional Indirect Costs Green Sheet Position Restoration Baseline Adjustment

Expenditures -

This adjustment corrects budget allocations for three Admin Spec II positions that were restored by the City Council in Green Sheet 33-2-A-2-2019; this is required because the Council added back the full budget for these positions to the Leadership & Administration BSL, but the budget should have been split between the Leadership & Administration BSL and the Inspections BSL.

Reallocate Budget for Site Inspection Position to Site Development Program

Expenditures -

This adjustment realigns a position in the correct BSL/Program. A 1.0 FTE Site Dev Insp should have been allocated to Site Development in the Permit Services BSL; it was instead allocated to Site Inspections in the Inspections BSL. This change was a result of the restructure of the Site Development group during 2018 due to Summit Reimplementation.

Proposed Operating

Accessible Dwelling Unit (ADU) Navigator

Expenditures \$118,013

Position Allocation 1.00

1585

Seattle Department of Construction and Inspections

Mayor Durkan directed SDCI to add a new “Accessory Dwelling Unit (ADU) Navigator” position via Executive Order 2019-4 to help guide homeowners through the permitting process for ADUs and Detached Accessory Dwelling Units (DADUs). A 2019 Third Quarter Supplemental Budget Ordinance item adds the position authority and budget appropriation for this position during only 2019. This action provides on-going budget appropriation and position authority for 1.0 FTE Permit Spec II position in SDCI’s Permit Services BSL. This position is supported by fees in the Construction and Inspections Fund.

Divide Building Official and Principal Engineer Positions

Expenditures	\$198,838
Position Allocation	1.00

This action adds 1.0 FTE Executive 2 position in the Permit Services program in preparation for the retirement of the individual who currently holds the titles of both Principal Engineer and Building Official. This position will provide continuity of service and is supported by fees in the Construction and Inspections Fund.

Parking Fee Increase

Expenditures	\$352,800
--------------	-----------

This item covers costs for parking fee increases during 2019. Costs rose from approximately \$85/month per space to \$300/month per space. Parking fees were not previously budgeted in SDCI. The fees are paid for by Construction and Inspections Fund fees.

Increased Position Costs from Business-Driven Position Reclassifications and Position Alignments

Expenditures	\$87,675
Position Allocation	-

The action increases appropriation authority to cover increased labor costs due to seven position reclassifications that allow SDCI to better fulfill its business needs, improve customer service response levels, and retain talented staff. The General Fund supports \$8,554 of this item; the remaining \$79,121 is supported by SDCI's Construction and Inspections Fund.

Mayor-Directed Efficiencies in Vacancies

Position Allocation	(1.00)
---------------------	--------

This action reduces position authority only for a 1.0 FTE Code Compliance Analyst position in the Compliance program. A sunset position was added in the 2015 Second Quarter Supplemental Budget Ordinance to assist with the Shoreline Management Program. This position was added as an ongoing position in the 2016 Adopted Budget, and Seattle HR inadvertently added another pocket for the same body of work.

RRIO Inspections Program Positions

Position Allocation	-
---------------------	---

This action extends one position's sunset date from December 31, 2019 to December 31, 2022 and converts another sunset position to a regular ongoing position in order to maintain staffing capacity in support of the Rental Registration and Inspection Ordinance (RRIO) program. Ordinance 125705 changed the RRIO program’s registration renewal cycle from five years to two years and adjusted RRIO program fees. The costs associated with these positions are included in the baseline, so there are no incremental costs. These positions are supported by RRIO fees in the Construction and Inspections Fund.

Seattle Department of Construction and Inspections

Seattle Department of Construction and Inspections Accela Work Group

Expenditures \$1,607,807

This action establishes a dedicated Seattle Information Technology Department (Seattle IT) project and provides nine positions in Seattle IT for the Seattle Department of Construction and Inspection's (SDCI's) Accela work items. The project supports ongoing innovation and enhancements that maximize efficiency and optimize customer experiences with permitting technology. This item allows quick response to new legislation and Mayor's Office priorities that require changes to Accela and related side systems; it also supports continued improvements to Accela as identified by SDCI. Of this amount, \$25,425 is one-time and the remainder is ongoing. This item is supported by permit fee revenues from the Construction and Inspections Fund.

Increase Seattle IT Allocation to Fund Accela Support

Expenditures \$240,627

Seattle IT added positions to support the Permitting System Integration (PSI) body of work. This item adds expenditure authority to SDCI to fund its allocation of expenditures for PSI. Please see Seattle IT's budget book pages for more detail in the "Increase Staff Support for Accela Program" item. This item is funded by permit fees in SDCI's Construction and Inspections Fund.

Seattle Department of Construction and Inspections Laptop Purchase

Expenditures \$401,465

These funds support the Seattle Department of Construction and Inspection's purchase of 140 laptops and laptop accessories. This one-time purchase of laptops will replace desktop computers. General Fund supports \$34,411 of this item and the remaining \$367,054 is from the Construction and Inspections Fund.

Proposed Technical

Land Use Zoning Reviewers related to CBA

Expenditures \$1,847,457

Position Allocation 13.00

This technical item increases budget appropriation and position authority for 11.0 FTE Land Use Planner III, 1.0 FTE Land Use Planner IV, and 1.0 FTE Permit Spec II positions with sunset dates of December 31, 2022. These 13 positions were added with the use of 2019 Contingent Budget Authority (CBA) and the subsequent 2019 Second Quarter Supplemental Budget Ordinance. The addition of these positions will reduce permit issuance times and reduce the backlog of zoning, discretionary land use, and addressing reviews. These positions are supported by fees in the Construction and Inspections Fund.

Overhead Technical Adjustment

Expenditures -

This action adjusts the distribution of indirect overhead expenses across programs to account for changes in the following budget programs: Compliance; Government Policy Safety & Support; Indirect Cost Recovery Offset; Inspections; Land Use Services; Permit Services; and Rental Housing. The adjustment also redistributes indirect overhead across SDCI programs consistent with the proposed budget. This budget-neutral adjustment represents a \$19,354 General Fund decrease and a corresponding increase from the Construction and Inspections Fund.

Appropriations by Budget Summary Level and Program

SDCI - BO-CI-U2200 - Land Use Services

The purpose of the Land Use Services Budget Summary Level is to provide land use permitting services.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Land Use Services	16,806,343	18,354,322	18,585,787	21,979,865
Land Use Services CBA	-	1,672,241	1,672,241	1,672,241
Total	16,806,343	20,026,563	20,258,028	23,652,106
Full-time Equivalents Total*	86.00	86.00	86.00	99.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Land Use Services Budget Summary Level:

Land Use Services

The purpose of the Land Use Services Program is to provide land use permitting services to project applicants, City of Seattle departments, public agencies, and residents. Land Use staff provide permit process information and regulatory expertise to inform pre-application construction project design. Land Use staff also review development concepts as part of a developer's permit application. The Land Use review process includes eliciting public input and facilitating public meetings and design review board meetings. It may also include coordination with various city and county agencies, defending project decisions during appeal to the Hearing Examiner or coordinating the department recommendation for a development application through the City Council approval process. These services are intended to ensure that development proposals are reviewed in a fair, reasonable, efficient, and predictable manner, and to ensure that the plans substantially comply with applicable codes, legal requirements, policies, and community design standards.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Land Use Services	16,806,343	18,354,322	18,585,787	21,979,865
Full Time Equivalents Total	86.00	86.00	86.00	99.00

Land Use Services CBA

The purpose of the Land Use Services CBA Program is to display the amount of unallocated Contingent Budget Authority (CBA) in the Land Use Services BSL that has not been accessed. In contrast, CBA that is accessed is appropriated in the programs in which it will be spent.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Land Use Services CBA	-	1,672,241	1,672,241	1,672,241

Seattle Department of Construction and Inspections

SDCI - BO-CI-U2300 - Permit Services

The purpose of the Permit Services Budget Summary Level is to facilitate the review of development plans and processing of permits.

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Inspections Budget Summary Level:

Inspections

The purpose of the Inspections Program is to provide timely on-site inspections of property under development at predetermined stages of construction; work closely with project architects, engineers, developers, contractors, and other City of Seattle departments to approve projects as substantially complying with applicable City codes, ordinances, and approved plans; and to issue final approvals for occupancy.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Inspections	21,509,748	21,260,266	21,582,160	22,713,587
Full Time Equivalents Total	102.00	103.00	103.00	103.00

Inspections Services CBA

The purpose of the Inspections Services CBA Program is to display the amount of Contingent Budget Authority (CBA) that has not been accessed within the Inspections BCL for construction inspections and electrical inspections with plan review. In contrast, CBA that is accessed is appropriated in the programs in which it will be spent.

The following information summarizes the programs in Compliance Budget Summary Level:

Compliance

The purpose of the Compliance Program is to investigate and respond to violations of code standards for the use, maintenance, management and development of real properties and buildings, facilitate compliance by property owners and other responsible parties, pursue enforcement actions against violators through the legal system, reduce the deterioration of structures and properties to reduce blight, and manage the adoption of administrative rules and response to claims.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Compliance	5,972,860	7,401,114	7,411,445	7,966,472
Full Time Equivalents Total	35.00	37.50	37.50	36.50

Rental Housing

The purpose of the Rental Housing Program is to improve the quality of the rental housing stock in Seattle and investigate and respond to violations of tenant relocation and eviction regulations. By registering and inspecting all rental housing properties the program helps ensure key life, health and safety standards are met. The program provides assistance to property owners and tenants regarding relocation assistance, just cause eviction, and other duties and responsibilities of owners and tenants.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Rental Housing	1,273,093	2,014,135	2,038,228	2,124,557
Full Time Equivalents Total	12.00	13.00	13.00	13.00

Seattle Department of Construction and Inspections

SDCI - BO-CI-U2500 - Leadership and Administration

The purpose of the Leadership & Administration Budget Summary Level is to lead and direct department employees, provide policy guidance, and oversee relationships with the community.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	465	21,226,694	21,978,020	22,090,564

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs Program is to collect and allocate departmental central costs such as pooled costs, paid-time-off, and other City central costs. The costs in this program are allocated to all department programs except the Contingent Budget Authority (CBA) Programs, the Process Improvements & Technology (PI&T) Program, and other programs in Leadership and Administration.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	465	21,226,694	21,978,020	22,090,564

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs Program is to lead department employees; provide policy guidance, financial stewardship, and employee support; and oversee relationships with the community, government agencies, and the media. The costs in this program are allocated to all department programs except the Contingent Budget Authority (CBA) Programs, the Process Improvements & Technology (PI&T) Program, and other programs in Leadership and Administration.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	(140,913)	3,467,073	3,470,413	3,813,536
Full Time Equivalents Total	32.00	32.00	32.00	32.00

Seattle Department of Construction and Inspections

Divisional Indirect Costs

The purpose of the Divisional Indirect Costs Program is to provide support functions for SDCI's primarily fee funded programs: Land Use Services, Permit Services, Inspections; and for the fee-funded portion of the Government Policy, Safety and Support Program. The costs in this program are allocated only to the programs described above.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Divisional Indirect Costs	140,448	2,851,001	2,852,107	2,783,467
Full Time Equivalents Total	26.00	27.00	27.00	27.00

Indirect Cost Recovery Offset

The purpose of the Indirect Cost Recovery Offset Program is to offset the proportionate share of Citywide Indirect Costs, Departmental Indirect Costs, and Divisional Indirect Costs that allocate to the department's other Budget Summary Level programs as overhead. It is necessary to offset the full cost of indirect cost programs to calculate the budget appropriation and revenue requirements of the related programs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Indirect Cost Recovery Offset	-	(27,346,768)	(28,102,540)	(28,658,332)

Seattle Department of Construction and Inspections

SDCI - BO-CI-U2600 - Government Policy, Safety & Support

The purpose of the Government Policy, Safety & Support Budget Summary Level is to develop and update land use code and technical code regulations, manage the public disclosure of documents, and provide appropriate support for disaster preparation, mitigation, response, and recovery services.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

Office of Economic Development

Bobby Lee, Director

(206) 684-8090

www.seattle.gov/economicdevelopment

Department Overview

The Office of Economic Development (OED) seeks to foster an inclusive economy that grows family-wage jobs and increases wealth among underserved communities. OED promotes shared prosperity for all Seattleites, economic growth that is equitable, robust, and enduring. OED supports a healthy business environment for underserved populations, empowers entrepreneurs to innovate, grow and compete, while at the same time supporting low-income Seattle residents to develop their talent towards viable career paths. OED invests in four primary program areas all targeting underserved populations: supporting entrepreneurs; building healthy and vibrant neighborhood business districts; developing the talent of youth and adults; and partnering with key industry sectors. The core services OED provides capitalize on Seattle's economic strengths, particularly in the industry areas of manufacturing and maritime, technology, startups, restaurants, health care, life sciences and global health, clean technology, and the creative economy. To accomplish this mission, the office delivers services designed to:

- support the retention and growth of local small businesses owned by underserved populations through technical assistance, access to capital, affordable commercial space, mentorship and marketing;
- increase the number of low-income youth and adults who obtain the skills necessary to meet industry's needs for qualified workers by building collaborations with community-based organizations in the service of youth and providing Career Connected Learning Grants to support youth career readiness;
- support neighborhood business districts through direct funding, technical support and Business Improvement Area (BIA) formation;
- streamline and advance policies and practices and develop partnerships that lead to sustainable economic growth with shared prosperity;
- attract and establish new business via domestic and international investments; and
- support the City's prioritization of film and special events through advocacy and permit coordination to encourage and grow film production and public events in a way that maximizes positive business, economic, and cultural activity while ensuring public safety.

In addition to these services, OED manages many financing programs to increase access to capital for projects from micro-loans to major capital lending. Among these financing tools are three federal programs: 1) Individual Development Accounts (IDAs), a matched savings program in which the City provides Community Development Block Grant funds to low-income owned businesses that demonstrate savings and take business training courses; 2) New Markets Tax Credits (NMTC) which leverage private investment in low-income communities through federal tax incentives; and 3) U.S. Department of Housing and Urban Development (HUD) Section 108 loans which provide financing for economic development projects benefiting low and middle-income individuals.

Budget Overview

The Office of Economic Development (OED), under the leadership of its new director, is implementing an Inclusive Economy Agenda. This mission rests on three OED competencies to serve underserved populations: building self-sufficiency and improving access to employment, family-wage job and wealth creation, and capacity-building for neighborhood resilience in the face of displacement. Those three competencies, in turn, are reflected in various office programs: workforce development and training, small business support and technical assistance, industry cluster development, and neighborhood business district support.

As part of this new mission, OED will work with the Office of Arts and Culture (Arts) to launch the Creative Industry Cluster program in the 2020 Proposed Budget. This is a result of the two offices agreeing to reorganize and repurpose the Office of Film and Music (OFM), which exists within OED, to support the growing needs of Seattle's creative economy. This restructure adds or repurposes existing positions in OED and transfers admissions tax-backed positions and programming back to Arts. This allows OED's teams and their economic development tools to fully support and invest in the new initiative. The Creative Industry Cluster program will be led by OFM as a new component of OED's Industry Support Team.

OED will also expand its small business support to include more funding by adding two new funds: The Business Stabilization and Tenant Improvement Funds. These funds will help small businesses navigate the difficulties of short-term setbacks and encourage commercial affordability in areas of high displacement. OED will repurpose some of its Only in Seattle (OIS) funding towards these two funds and the General Fund will backfill the original OIS funding.

Total 2020 Proposed Budget	\$11,226,246	36.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$340,293

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$5,689

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Office of Economic Development

Citywide Adjustments for Standard Cost Changes

Expenditures \$73,992

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Technical Adjustment Salary & Benefits Transfer

Expenditures -

This is a technical, net-zero adjustment that moves position-related costs from the Business Services budget program to the Department Indirect Costs budget program.

City Business Recruitment & Attraction Services

Expenditures \$100,000

This item adds \$100,000 in ongoing funding to encourage business recruitment to and retention in Seattle.

Director Salary Adjustment

Expenditures \$31,470

This item adds \$31,000 in ongoing funding to pay for the additional position-related costs of hiring a new office director.

Funding for Staff-Initiated Position Reclassifications

Expenditures \$51,491

This item adds \$51,000 in ongoing funding to pay for multiple, staff-initiated reclasses of job classifications approved by the Seattle Human Resources Department.

Pay Equity Funding

Expenditures -

This proposal uses \$119,000 in existing resources, including those made available from the reorganization of the Office of Film and Music, to address ongoing pay equity issues for office staff as researched and confirmed by Seattle Department of Human Resources.

Transgender Economic Empowerment Program

Expenditures \$185,000

This item adds \$185,000 in ongoing funding for a transgender economic empowerment program. In the 2019 Adopted Budget, Council placed an ongoing proviso on this amount for this work in the office. There are no available resources to fund this ongoing program in the existing budget of the office.

Office of Economic Development

Proposed Operating

OFM Reorganization & Creative Industry Cluster

Expenditures \$(61,284)

Position Allocation -

In 2019, the Mayor's Office directed the Office of Economic Development (OED) and the Office of Arts and Culture (Arts) to review the mission and programming of the Office of Film and Music (OFM), which is within OED. Both offices agreed to an OFM reorganization to better sync their efforts to better support the creative economy. There are two components to this reorganization:

- **Transfer of admissions tax-backed staffing and programming to Arts.** OFM will transfer back to Arts programming and a position funded by Arts' admission tax revenues: a 1.0 FTE Strategic Advisor 1 to Arts to continue the role of a Creative Economy Business Advocate, a position that will be shared with OED, and \$50,000 in annual support for the Seattle Music Commission.
- **Repurposing of OFM Resources.**
 - New Creative Industry Cluster program. OED will add capacity to build out its creative economy cluster strategy, helping both Arts and OED support the growth of the local creative sector covering everything from film to music to gaming. These positions are changed or added: a 1.0 FTE Strategic Advisor 3 position, previously filled by the OFM director, will now be the Creative Industry Cluster Director; and a 1.0 FTE Strategic Advisor 2 will be added to provide focused policy and program development support for the overall Creative Industry Cluster program, costing \$164,000. A 1.0 FTE Strategic Advisor 1, the Film & Special Events program lead; a 1.0 FTE Strategic Advisor 2, the Nightlife Business Advocate; 2.0 FTE Admin Staff Assistants, acting permitting specialists; and 1.0 FTE Admin Specialist I BU will remain unchanged.
 - Officewide capacity and budgetary needs. OED will reclassify a 1.0 FTE Admin Spec II BU in OFM as a Community Development Specialist for data collection and analysis in OED, resulting in a \$7,000 funding increase. OED will also use its OFM resources to fund a baseline add of \$119,000 to address pay equity issues within the office (please see baseline changes).

Small Business Support Expansion

Expenditures \$300,000

This proposal expands the tools available to the Only in Seattle (OIS) program to include two designated funds to assist more small businesses, the Business Stabilization and Tenant Improvement Funds. Whereas before OIS programming focused on improving the capacity of small business districts, the OIS program will work closer with the Small Business Development program to tap new funding options for individual small businesses. The Business Stabilization Fund will help small businesses facing short-term emergencies, such as theft, vandalism, or emergency repairs, with a focus on those in high-risk displacement neighborhoods. The Tenant Improvement Fund encourages the development of affordable commercial tenant improvements for businesses in high displacement risk areas. Both these funds are part of the office's new Inclusive Economy Agenda, which aims to reduce barriers to economic success for small business owners. Of the \$852,000 in Community Development Block Grant that funds OIS, part of its \$1.5 million total, \$300,000 will be repurposed to support these two new small business funds. The General Fund will backfill OIS by the same amount to keep the program whole.

Office of Economic Development

Adding Accounting Capacity

Expenditures	-
Position Allocation	0.50

This proposal uses \$56,000 of the office's existing resources to reallocate two existing staff to new classifications that reflect their increased level of responsibility with respect to the management and administration of the accounting and finances. This additional responsibility is needed as the office continues to adjust to the increased work volume of the City's accounting system, PeopleSoft 9.2, which was implemented in 2018. The Finance Analyst, Senior, becomes a Strategic Advisor 1, in Finance, Budget, and Accounting; and the part-time Accounting Technician II becomes a full-time Accounting Technician III.

Office of Housing

Emily Alvarado, Acting Director

(206) 684-3727

<http://www.seattle.gov/housing/>

Department Overview

The mission of the Office of Housing (OH) is to build strong healthy communities and increase opportunities for people of all income levels to live in our city. To accomplish this mission, OH has three Budget Summary Levels:

- Multifamily Housing;
- Homeownership and Sustainability; and
- Leadership and Administration.

Multifamily Housing employs the Housing Levy and other federal and local funding to make low-interest loans to developers to develop or preserve affordable multifamily rental housing. OH monitors the housing portfolio to ensure that the policy objectives of the City are achieved and the units remain in good condition. The portfolio now includes 16,800 units, representing a significant investment of City and other funding in affordable housing over 35 years.

Homeownership and Sustainability includes three programs to assist low-income households:

- The **Home Ownership Program** supports first-time homebuyers and existing low-income homeowners through down payment assistance loans, subsidies for permanently affordable homes, and foreclosure prevention loans.
- The **Home Repair Program** provides grants or no- to low-interest loans to assist with critical home repairs.
- The **Weatherization Program** provides grants to increase energy efficiency and lower utility costs for low-income residents in both single-family and multifamily properties.

Leadership and Administration provides centralized leadership, coordination, technology, contracting, and financial management services to OH programs and capital projects. This includes the Policy and Planning program that establishes long-term strategic plans, develops and implements policy-based tools, and addresses housing-related aspects of citywide land use and community development planning.

Office of Housing

Budget Overview

This summer, Mayor Durkan presented her vision and actions for the City's approach to addressing Seattle's housing crisis. The plan, *Seattle Housing Now*, includes four key priorities:

- Increase opportunity and access to family-wage jobs and shared prosperity;
- Build more housing for low- and middle-income earners, and for people experiencing homelessness;
- Address displacement and prevent eviction so Seattle residents can stay in their current housing and community; and
- Secure new tools and resources for the City to address housing in new, innovative ways.

The Office of Housing's 2020 Proposed Budget furthers these priorities through affordable homeownership investments and strategies to address displacement using the Mercer Properties proceeds and increasing the supply of new affordable housing through the State local option bond and other funding sources. The Proposed Budget also includes new programming to make it easier for low-income families to heat their homes using sustainable energy and other operational and technical changes.

Transformational Investments with Proceeds from Mercer Properties Sale

In 2019, the Mayor announced the disposition of surplus City property, known as the Mercer Properties, that resulted in over \$130 million in net proceeds for the City, \$78.2 million of which will be invested in transformational investments in affordable housing. OH plans to invest \$21 million to increase opportunities for permanently affordable homeownership and to help low- and moderate-income homeowners develop affordable accessory dwelling units (ADUs), increasing opportunities for income- and rent-restricted housing in single-family neighborhoods.

Investing in new permanently affordable homeownership opportunities and helping existing low- and moderate-income homeowners build assets are some of the best ways to prevent displacement while building community resiliency, agency, and wealth. Moreover, homeownership is a powerful tool to advance racial equity by increasing the wealth generation of people of color through homeownership. Less than 40% of households of color own their own homes compared to over half of white households. This results in a significant wealth gap.

The remaining \$57.2 million will be invested in addressing displacement and creating opportunities for equitable transit-oriented development. Of this remaining amount, \$15 million in the Office of Planning and Community Development (OPCD) funds a revolving Equitable Development Initiative (EDI) site acquisition loan pool to help project partners acquire site control in rapidly changing real estate markets; and another \$42.2 million appropriated to Finance General and OPCD funds a strategic property acquisition fund to address displacement.

The 2020 Proposed Budget invests **\$15 million of Mercer sale proceeds to increase the supply of permanently affordable homes and support stewardship of those homes**. At least \$12 million will be used for a capital investment to support the Mayor's goal of nearly doubling the City's portfolio of permanently affordable homes, affordable to households earning less than 80% of Area Median Income (AMI). The City is currently exploring a partnership with Sound Transit to acquire up to 12 sites for permanently affordable homeownership. Up to \$3 million would be used to seed an employer-resourced program to support buyer-driven, permanently affordable homeownership for middle-income Seattle workers. City funds would be used to support on-going affordability by covering the start-up program operations performed by the stewardship entity, as well as potentially provide deeper subsidy to households below 80% AMI if needed. The stewardship entity will help to prepare potential buyers for homeownership, affirmatively market homebuying opportunities, facilitate re-sales and monitor and enforce compliance with a regulatory agreement that ensures the homes will remain affordable for generations to come. Families and employers benefit when workers can live near their jobs rather than commute long distances.

The 2020 Proposed Budget also dedicates **\$6 million of the Mercer proceeds to pilot a loan program to help low- and moderate-income families create affordable ADUs**, generating wealth for homeowners and increasing the supply of rent- and income-restricted housing options in single-family zones. In community conversations across

Office of Housing

Seattle earlier in 2019, the Mayor's Office heard strong support for a City financing option that could help a wider range of homeowners be able to create ADUs. Seattle has allowed attached and detached ADUs since 1994 and 2010, respectively, but less than two percent of single-family lots have added an ADU. Not only does this create an opportunity for new, contextual, space-efficient housing on tens of thousands of lots across Seattle neighborhoods, but ADUs also offer homeowners a flexible way to earn income and provide efficient, relatively inexpensive housing options for renters. To that end, the City recently adopted legislation removing regulatory barriers to ADUs and increasing the viability of ADU development throughout Seattle. However, limited financing options generally restrict ADU development and the corresponding benefits to those with wealth, equity, and access to capital.

The City's proposed ADU financing program aims to address this issue and provide access to capital with below market-rate terms to low- and moderate-income homeowners who otherwise would not benefit from new ADU policies.

This pilot program will allow the City to test this approach, demonstrate the feasibility of affordable ADU loans to spur the private lending market and learn how to scale future financial support for homeowners interested in developing an ADU. The financing pilot also complements and works together with a suite of other strategies the City is pursuing to accelerate and broaden access to ADU development, as described in [Executive Order 2019-04](#), including streamlined permitting with pre-approved ADU plans; educational opportunities; and new and improved ADU resources, including a tool for exploring the feasibility of creating an ADU on a property.

New Affordable Housing Through the State Local Option Housing Law and newly dedicated Real Estate Excise Tax (REET)

In 2019, the State of Washington passed a local option housing bill (HB 1406) that allows cities and counties to retain certain local taxes, like sales or use tax, for 20 years provided they spend it on building new or rehabilitating affordable housing units or providing operating and maintenance (O&M) subsidies for new units of affordable or supportive housing. Seattle was the first city in the state to take advantage of this new law, which will provide up to \$4.5 million per year for 20 years.

The 2020 Proposed Budget invests in 175 new units of Permanent Supportive Housing (PSH) – and the associated O&M subsidies needed – through a bond against part of the future revenue. PSH provides wraparound services for the most vulnerable people, those living at or below 30% of the Area Median Income, and ensures they remain housed.

Taking advantage of another state law change in 2019 (HB 1219), the Mayor is also making \$25 million total of REET available for additional capital investments for new affordable housing through 2025.

Low-Income Heating Oil Conversion

In 2019, the Mayor proposed a new tax on heating oil service providers to provide financial assistance necessary to help low-income families convert to sustainable heating supply like electric systems. Heating oil produces carbon pollution, so the City chose this as one of its strategies in its 2013 Seattle Climate Action Plan to achieve its goal of becoming a carbon-neutral city by 2050. Low-income households will be eligible for assistance, including households enrolled Seattle City Light's Utility Discount Program.

Operational Changes

The 2020 Proposed Budget includes two operational changes that results in the service delivery remaining the same or improving. OH will now fund the staff in the positions in Finance and Administrative Services that oversee OH-funded projects to guarantee compliance with local wage laws. Previously, these positions were funded by Finance General. OH is also proposing a change in its current homebuyer education program provided by a local non-profit. This redesign aims to align the program with OH's broader work to help families purchase affordable homes and prevent displacement.

Technical Changes

Office of Housing

OH is requesting various changes in its appropriation authority largely due to changes in revenue projections but also due to corrections. There is also a net-zero technical change to correct the budget location for the office's pooled and fringe benefits to align the budget with the location of the actual expenditures.

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$393,842

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Office of Housing

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$5,841

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$78,130

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Accessory Dwelling Unit (ADU) Financing Program

Expenditures \$5,838,470

This item provides \$6 million in funding, revenue from the sale of the Mercer Properties, in the Office of Housing (OH) to fund an Accessory Dwelling Unit (ADU) pilot finance program to increase the affordable rental housing supply and support low- and moderate-income homeowners. OH is working with the Office of Planning and Community Development to develop a pilot loan program to help these homeowners build ADUs to provide affordable rental housing. The pilot program will be administered by a third-party entity with expertise in residential lending. Funds will be used for program implementation, including capital and third-party program delivery and administrative costs. While homeowners up to 120% Area Median Income (AMI) will be eligible, homeowners below 80% AMI will receive more favorable loans terms, such as deferred repayment or lower interest rates, to make constructing an ADU more feasible for these households. The loan terms and conditions will be structured in such a way to help homeowners remain in their community and lower racial disparities in access to capital. All ADU units created through the program will be affordable to households at or below 80% AMI for 10 years. This investment will fund up to 75 loans over three years.

The staffing costs for a full-time Community Development Specialist and programming costs will be shared with other Mercer Property proposal, the Increasing Homeownership Opportunities program, for a total of \$697,000 to cover five years when adjusted for inflation or about \$139,000 annually. This position, which is recognized in the homeownership proposal, will be responsible for designing the ADU pilot loan program, managing the RFP and contracting process for an ADU loan administrator, and managing questions and inquiries from potential ADU program participants. In addition, the position will handle responsibilities related to the homeownership program, including managing the RFP process for surplus sites, handling the day-to-day logistics of maintenance on the homeownership properties OH will be holding for future development, and managing community outreach work related to homeownership projects funded with Mercer proceeds. Since this one-time funding is to provide support for five years, \$996,000 will be held in reserves to cover staffing, programming, and maintenance costs for both proposals. Please see the Increasing Homeownership Opportunities proposal for more information.

Office of Housing

Increasing Homeownership Opportunities

Expenditures	\$14,165,261
Position Allocation	1.00

This proposal provides \$15 million in one-time revenue from the sale of the Mercer Properties to increase the supply of permanently affordable for sale homes through two approaches. Almost \$14 million will be used for capital investment to support the Mayor's goal of nearly doubling the City's portfolio of permanently affordable homes for households earning less than 80% of Area Median Income (AMI). The City is currently exploring a partnership with Sound Transit to secure up to 12 sites for permanently affordable homeownership for households at or below 80% AMI. Up to \$3 million would be used to seed an employer-resourced program to support buyer-driven, permanently affordable homeownership for middle-income Seattle workers. City funds would be used to support on-going affordability by covering the start-up program operations performed by the stewardship entity, as well as potentially provide deeper subsidy to households below 80% AMI if needed. The stewardship entity will help to prepare potential buyers for homeownership, affirmatively market homebuying opportunities, facilitate re-sales and monitor and enforce compliance with a regulatory agreement that ensures the homes will remain affordable for generations to come.

The proposal includes holding and maintenance costs, \$531,000 over five years when adjusted for inflation or about \$106,000 annually, to cover costs such as fence installation, maintenance, mowing, and snow removal. The staffing costs for a full-time Community Development Specialist and programming costs will be shared with other Mercer Property proposal, the Accessory Dwelling Unit Financing Program, for a total of \$697,000 to cover five years when adjusted for inflation or about \$139,000 annually. This position will handle responsibilities related to the homeownership program, including managing the RFP process for surplus sites, handling the day-to-day logistics of maintenance on the homeownership properties OH will be holding for future development, and managing community outreach work related to homeownership projects funded with Mercer proceeds. Although the position add is recognized in this program, the position will also be responsible for designing the ADU pilot loan program, managing the RFP and contracting process for an ADU loan administrator, and managing questions and inquiries from potential ADU program participants. Since this one-time funding is to provide support for five years, \$996,000 will be held in reserves to cover staffing, programming, and maintenance costs for both proposals. Please see the Accessory Dwelling Unit Financing Program proposal for more information.

Implement Local Option to Use State Sales Tax for Affordable Housing

Expenditures	\$22,500,000
Revenues	\$4,500,000

In 2019, the State of Washington passed a law allowing cities like Seattle to retain local taxes, like sales tax, to maintain or provide new affordable housing. Under the law, the City will be allowed to retain \$4.5 million in local taxes per year for up to 20 years. This proposal allows the City to bond \$18 million, recognized in the 2020 LTGO Taxable Bond Fund (36710), and use about \$4 million in revenue from the first year, recognized in the Low-Income Housing Fund (16400), to build 175 units. Revenue in the subsequent years will pay down the debt and provide operation and maintenance subsidies for any new Permanent Supportive Housing (PSH) units built for 20 years, including all units if needed. PSH units provide wraparound services for the most vulnerable of people, from social services to medical care. This strategy ensures all residents in the program stay housed. The Office of Housing's staff will absorb any administrative work for this proposal.

Low-Income Heating Oil Conversion Program

Expenditures	\$270,000
Revenues	\$270,000

This request is to use revenue from a potential new oil heat tax to help families convert to sustainable energy. There will be \$270,000 available in 2020 and then \$750,000 annually from 2021 through 2029. OH will receive this funding

Office of Housing

to administer the delivery of services to help low-income families convert away from using oil to heat their homes. The tax becomes effective in July 1, 2020.

Wage Monitoring Staff

Expenditures -

This proposal provides ongoing funding to maintain 1.5 FTE in the Department of Finance and Administrative Services (FAS) to ensure construction projects funded by the Office of Housing (OH) comply with wage labor laws. Previously, Finance General funded these positions, but when the City changed its accounting system in 2018 the use of Finance General was reevaluated, and it was determined that OH should be responsible for staff that focuses squarely on OH-funded projects. To help OH ease into this transition of funding responsibilities, the Mayor's Office agreed to have the General Fund finance these staff for 2019 with OH providing the ongoing funding starting in 2020. FAS and OH agree that any changes to staffing costs, beyond adjustments for inflation, will go through the formal budget process.

Homebuyer Education Redesign

Expenditures \$(67,000)

Revenues \$(217,000)

This proposal swaps \$217,000 in ongoing Community Development Block Grant funding with \$150,000 in one-time General Fund to test a redesign of the homebuyer education program to better align it with the Office of Housing's (OH) work to help communities develop affordable options for homebuyers. This program will now be used to help potential homebuyers prepare to purchase a unit at the Othello Square Limited Equity Cooperative, the first City-funded housing cooperative that helps address displacement of both residents and businesses. This program redesign will allow OH to connect homebuyer education more directly to its community preference policy which supports homebuyers with local ties to neighborhoods purchase OH-funded homes. The program will be evaluated after a year to see whether the redesign should continue.

Proposed Technical

Correct Budget Locations for Pooled and Fringe Benefits

Expenditures -

This is an ongoing transfer of appropriation authority in the amount of \$157,874 from the Leadership and Administration Budget Control Level (BCL) in the Office of Housing Fund (16600) to the Homeownership and Sustainability BCL in the same fund. This item also transfers appropriation authority in the amount of \$875,752 from the Leadership and Administration BCL in the Office of Housing Fund to the Multifamily Housing BCL in the same fund. Lastly, there is a minor transfer of appropriation authority in the amount of \$247 from the Leadership and Administration BCL in the General Fund (00100) to the Homeownership and Sustainability BCL in the same fund. There are also minor transfers across budget programs within the Leadership and Administration BCL in Office of Housing Fund. These transactions are necessary to avoid a budget exception by moving the budget for fringe benefits, which includes FICA, Medicare, and retirement, and pooled benefits, which consists of health care, unemployment, worker's compensation, to the right locations. The transactions also include adding budget for pooled benefits billing.

Increased Capital Spending from Program Income and Interest Earnings

Expenditures \$11,730,000

This technical change adds authority for capital spending of interest earnings, which had previously been omitted in error, and program income. This item uses \$530,000 in fund balance.

Office of Housing

Revising Projected Asset Management Expenditures

Expenditures	\$(1,353,066)
--------------	---------------

This technical change corrects the projected Operation and Maintenance expenditures in Asset Management, decreasing the subsidy amounts by \$1,353,066 to align budget with projected expenditures.

Weatherization Appropriation Change

Expenditures	\$1,103,875
--------------	-------------

This technical proposal increases the appropriation authority by \$1,103,875 in the Weatherization grant program to reflect an increase in the projected revenues from the State of Washington and Federal Government by the same amount to that program in 2020.

Appropriations by Budget Summary Level and Program

OH - BO-HU-1000 - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to provide centralized leadership, strategic planning, program development, and financial management support services to the office.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	941,286	1,221,106	1,185,387	1,192,440
Departmental Indirect Costs	2,219,250	2,858,623	2,863,075	2,973,952
Policy & Planning	968,629	1,101,248	1,103,808	1,192,710
Pooled Benefits	(6,719)	934,596	975,381	33,862
Total	4,122,446	6,115,573	6,127,651	5,392,964
Full-time Equivalents Total*	17.50	17.50	17.50	17.50

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services and Seattle Information Technology Department.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	941,286	1,221,106	1,185,387	1,192,440

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department. This may include personnel costs related to department leadership and administration or other administrative costs such as external rent and operating supplies or services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	2,219,250	2,858,623	2,863,075	2,973,952
Full Time Equivalents Total	9.50	9.50	9.50	9.50

Policy & Planning

The purpose of the Policy & Planning program is to provide strategic planning, program development, and vacant land redevelopment services to increase housing opportunities for Seattle residents.

Office of Housing

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed

Department of Neighborhoods

Andrés Mantilla, Director

(206) 684-0535

www.seattle.gov/neighborhoods

Department Overview

The Department of Neighborhoods (DON) strives to strengthen Seattle by engaging all communities. DON serves residents of Seattle by providing programmatic support and building inclusive partnerships to help ensure that they receive equitable access to government and opportunities to build community. This is accomplished by fostering community partnerships, cultivating emerging leadership and facilitating community inclusiveness.

By establishing and implementing equitable outreach and engagement practices, DON is creating opportunities, promoting community building and broadening accessibility, which are important components to any community involvement process and reflected in the programs DON administers.

DON has three lines of business:

Community Building delivers technical assistance, supports services, grants, commissions, and programs in neighborhoods to strengthen local communities, engages residents in community improvement, leverages resources and completes neighborhood-initiated projects. The programs that support this work include:

- Community Engagement Coordinators
- Community Liaisons
- Duwamish River Opportunity Fund
- Find It Fix It
- Healthy Food Fund
- Historic Preservation
- Housing Affordability and Livability Agenda (HALA)
- Major Institutions and Schools
- P-Patch Community Gardening
- Participatory Budgeting (Your Voice, Your Choice)
- People's Academy for Community Engagement (PACE)

Leadership and Administration provides executive leadership, communications, and internal operations and administration support for the entire department. This support includes financial, human resources, information technology, facility, and administrative functions.

Neighborhood Matching Fund provides support to local grassroots projects within neighborhoods and communities by providing funding to match community contributions of volunteer labor, donated professional services and materials, or cash, to implement community-based self-help projects.

Budget Overview

The Mayor is committed to improving the City's outreach and engagement efforts, especially to historically underserved communities. As part of her commitment, the Mayor has asked the Department of Neighborhoods (DON) to improve the coordination of outreach and engagement by departments through the 2020 budget process. DON is to serve as a strategic advisor to departments so communities can better access City services and information and provide feedback in a more streamlined way.

The 2020 Proposed Budget includes two outreach and engagement proposals: one, to make a Seattle Department of Transportation (SDOT) pilot expansion permanent, and the second, to lay the groundwork for growing DON's partnerships with other City departments. In 2019, DON and SDOT expanded upon their partnership to add more staff to work on various SDOT projects. In the 2020 Proposed Budget, those staff are made permanent and supported by SDOT revenue.

The 2020 Proposed Budget also adds a full-time contracting position to oversee the increasing volume and complexity of intradepartmental Memorandums of Understanding (MOUs). This position will negotiate with the first cohort of departments to draft MOUs with DON to coordinate their outreach and engagement. As part of the MOUs, DON will seek budget from these departments to support two additional full-time staff for outreach and engagement.

The 2020 Proposed Budget also adds one-time funding for the AIDS Walk Memorial to finalize construction of this project.

Sweetened Beverage Tax (SBT) Community Grant

In 2018, the City passed a tax on sweetened beverages to promote public health, especially in underserved communities. As part of the ordinance establishing the tax, a Community Advisory Board recommends funding allocations for this revenue. For the 2020 Proposed Budget, the Advisory Board recommended investment in community-led activities such as grants to community-based organizations and programs; and support for one-time investments in infrastructure to increase the capacity of schools and community-based meal programs. In response, the Mayor is creating an ongoing community grant program, the Healthy Food Fund, in DON to provide resources to community-based organizations to improve public health.

Department of Neighborhoods

One-time Funding for P-Patch Community Garden Preservation and Enhancement

DON's P-Patch Community Garden program provides access to healthy food for both the gardeners who directly participate and the agencies to whom the p-patches and community gardens donate food. One of the purposes for which SBT revenues are targeted is "community-based investments to expand food access." It has been over a decade since the last significant capital investment in the P-Patch Community Gardening Program, provided by the 2008 Parks Levy. Currently, there are several gardens facing relocation pressures, while others need capital investments to address deferred maintenance, and this funding would help address these issues. These one-time dollars will be allocated through a process that will involve department staff, the Community Advisory Board, and other P-Patch and community leaders.

Healthy Food Fund	2,500,000	1.50
P-Patch Community Garden Preservation and Enhancement	3,000,000	-
Total Incremental Changes	\$6,905,229	6.50
Total 2020 Proposed Budget	\$20,018,374	65.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$489,335

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$7,500

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of

Department of Neighborhoods

Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$98,010
--------------	----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Transfer FAS Fleet Services from P-Patch to Citywide Indirect Costs

Expenditures	-
--------------	---

This item transfers budget for fleet services, provided by the Finance and Administrative Services department, from the P-Patch budget program to its correct budget program, Citywide Indirect Costs.

Transfer ITD Allocation Costs from P-Patch to Citywide Indirect Costs

Expenditures	-
--------------	---

This item transfers budget for services provided by the Seattle Information Technology department from the P-Patch budget program to its correct budget program, Citywide Indirect Costs.

Transfer SA2 from Community Engagement Coordinators to Executive Leadership

Expenditures	-
Position Allocation	-

This item transfers a Strategic Advisor 2 position and its budget from the Community Engagement Coordinators budget program to the Executive Leadership budget program. This transfer is one part of three baseline transfers of Strategic Advisor 2 positions and budget authority from various budget programs to the Executive Leadership budget program to reflect how the department currently operates.

Transfer SA2 from Participatory Budgeting to Executive Leadership

Expenditures	-
Position Allocation	-

This item transfers a Strategic Advisor 2 position and its budget from the Participatory Budgeting budget program to the Executive Leadership budget program. This transfer is one part of three baseline transfers of Strategic Advisor 2 positions and budget authority from various budget programs to the Executive Leadership budget program to reflect how the department currently operates.

Department of Neighborhoods

Transfer SA2 from HALA to Executive Leadership

Expenditures	-
Position Allocation	-

This item transfers a Strategic Advisor 2 position and its budget from the Housing Affordability and Livability Agenda budget program to the Executive Leadership budget program. This transfer is one part of three baseline transfers of Strategic Advisor 2 positions and budget authority from various budget programs to the Executive Leadership budget program to reflect how the department currently operates.

Proposed Operating

SDOT Outreach & Engagement Expansion

Expenditures	\$662,775
Revenues	\$622,000
Position Allocation	4.00

This proposal makes a 2019 pilot outreach and engagement program between the Department of Neighborhoods (DON) and Seattle Department of Transportation (SDOT) permanent. In 2019, DON and SDOT expanded their outreach and engagement partnership to better align efforts to include communities in project planning and implementation. Previously, SDOT funded 2.0 FTEs in DON to serve as outreach and engagement advisors for SDOT projects. The pilot added 4.0 FTEs, all Strategic Advisor 1 positions to work on various SDOT projects. These positions will sunset at the end of 2019 and will be made permanent starting 2020. SDOT will provide \$622,000 in ongoing revenue in 2020 to fund this program. This program aims to serve as a template for Citywide efforts to improve department outreach and engagement.

Citywide Outreach & Engagement Expansion

Expenditures	\$82,610
Position Allocation	1.00

This proposal expands the DON's current portfolio to lay the Citywide groundwork to improve how departments provide and coordinate outreach and engagement. Position and budget authority for a 1.0 FTE Grants and Contracts Specialist, Sr. will be added to negotiate Memorandums of Understanding (MOUs) with the first cohort of partner departments, including Finance and Administrative Services, the Office of Sustainability and the Environment, Human Services Department, Seattle Information Technology, Seattle City Light, and Seattle Public Utilities. MOUs with partner departments will identify funding and other resources to support two additional full-time positions: a Planning and Development Specialist II to support Community Liaison work and an Administration Specialist II to provide general support. Additional budget and position authority can be added via supplemental requests in 2020.

AIDS Walk Memorial

Expenditures	\$65,000
--------------	----------

In 2020, the plaza over Seattle's Capitol Hill Station and the north edge of Cal Anderson Park will become home to the AIDS Memorial Pathway (AMP), a community-driven and collaboratively funded project. The department will contribute one-time funding of \$65,000 in 2020, in addition to \$100,000 provided in the 2019 2nd Quarter Supplemental Budget Ordinance, to finish this project. The AMP began in 2017 to gather stories about those who lived and died with HIV/AIDS, and those who fought and continue to fight the virus, especially ethnic minorities who are disproportionately impacted by HIV/AIDS.

Department of Neighborhoods

Healthy Food Fund

Expenditures	\$2,500,000
Position Allocation	1.50

This proposal uses \$2.5 million in ongoing funding from the Sweetened Beverage Tax (SBT) to create a Healthy Food Fund, a new community grant to improve public health. The Fund is in line with the recommendations from the Community Advisory Board (CAB), which provides recommendations regarding the City's use of SBT revenue. The Advisory Board recommends that the 2020 Proposed Budget invest more in community-led activities and provide more support for one-time investments in infrastructure to increase community capacity to offer healthier food options. The program will include funding for two permanent positions: a 1.0 FTE Planning and Development Specialist II and a 0.5 FTE Admin Spec II. Also included is one-time funding for a one-year TLT Planning and Development Specialist II.

P-Patch Community Garden Preservation and Enhancement

Expenditures	\$3,000,000
--------------	-------------

This proposal provides one-time funding from the Sweetened Beverage Tax to provide additional support for the P-Patch Community Gardening program, which produces fresh, healthy foods for the public and develops a sense of community. This allows the department to invest in the community gardens to create a more financially sustainable program. The department will consider land acquisition, garden relocation, and capital infrastructure. The department will look towards working with the Sweetened Beverage Community Advisory Board, local community garden partners, and other stakeholders to best determine which projects to fund. The department will hire a TLT projects coordinator to support these efforts.

The following information summarizes the programs in Community Building Budget Summary Level:

Community Engagement Coordinators

The purpose of the Community Engagement Coordinators Program is to provide a range of technical assistance and support services for residents and neighborhood groups to develop a sense of partnership among neighborhood residents, businesses, and City government.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Community Engagement Coordinators	1,683,944	2,033,352	1,846,427	2,553,682
Full Time Equivalents Total	12.00	12.00	12.00	15.00

Community Liaisons

The purpose of the Community Liaisons Program is to provide equitable outreach and engagement in a culturally competent manner to historically underserved communities. This is done for City departments through independent contractors who serve as resources and liaisons for community members, provide quality translations and interpretations and advise on best practices for engaging with their communities.

Department of Neighborhoods

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Community Liaisons	294,615	836,317	840,360	868,095
Full Time Equivalents Total	4.75	3.75	3.75	3.75

Duwamish River Opportunity Fun

The purpose of the Duwamish River Opportunity Fund Program is to support new and existing small-scale programs focused on the challenges faced by communities in the Duwamish River area.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Duwamish River Opportunity Fun	261,193	250,000	250,000	249,799
Full Time Equivalents Total	1.00	-	-	-

Find It Fix It

The purpose of the Find It Fix It (FIFI) Program is provide funds for grassroots projects to improve neighborhood infrastructure.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Find It Fix It	9,639	30,000	30,000	30,000

HALA

The purpose of the Housing Affordability Livability Agenda (HALA) Program is to address affordable housing and livability within the City through outreach and engagement efforts.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
HALA	192,947	137,148	138,225	-
Full Time Equivalents Total	1.00	1.00	1.00	-

Healthy Food Fund

The purpose of the Healthy Food Fund Program is to support community-based projects and programs that are food-related consistent with the overarching goal of the Sweetened Beverage Tax of improving public health.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Healthy Food Fund	-	-	-	2,500,000
Full Time Equivalents Total	-	-	-	1.50

Historic Preservation

The purpose of the Historic Preservation Program is to provide technical assistance, outreach, and education to the general public, owners of historic properties, government agencies, and elected officials to identify, protect, rehabilitate, and re-use historic properties

Department of Neighborhoods

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Historic Preservation	951,608	1,115,613	873,054	937,278
Full Time Equivalents Total	7.00	7.00	7.00	7.00

Major Institutions and Schools

The purpose of the Major Institutions and Schools Program is to coordinate community involvement in the development, adoption, and implementation of Major Institution Master Plans, and to facilitate community involvement in school re-use and development.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Major Institutions and Schools	218,301	224,453	226,553	243,036
Full Time Equivalents Total	2.00	2.00	2.00	2.00

Participatory Budgeting (Your Voice Your Choice)

The purpose of the Participatory Budgeting (Your Voice Your Choice) Program is to provide a process in which Seattle residents democratically decide how to spend a portion of the City's budget.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Participatory Budgeting (Your Voice Your Choice)	119,290	198,705	225,955	136,388
Full Time Equivalents Total	1.00	2.00	2.00	1.00

People's Academy for Community Engagement (PACE)

The purpose of the People's Academy for Community Engagement (PACE) Program is to provide leadership development and skill building of emerging leaders in a multicultural, participatory adult learning environment where participants learn hands-on strategies for community building, inclusive engagement, and accessing governments from experts in the field

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
People's Academy for Community Engagement (PACE)	118,158	141,254	142,309	150,942
Full Time Equivalents Total	1.00	1.00	1.00	1.00

P-Patch Community Gardening

The purpose of the P-Patch Community Gardening Program is to provide community gardens, gardening space, and related support to Seattle residents while preserving open space for productive purposes, particularly in high-density communities

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
P-Patch Community Gardening	806,791	881,748	870,666	3,874,956

DON - BO-DN-I3400 - Neighborhood Matching Fund

The purpose of the Neighborhood Matching Fund Budget Summary Level is to support local grassroots projects within neighborhoods and communities. The Neighborhood Matching Fund provides funding to match community contributions of volunteer labor, donated professional services and materials, or cash, to implement community-based self-help projects.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Neighborhood Matching	4,856,478	4,091,812	4,100,254	4,169,482
Total	4,856,478	4,091,812	4,100,254	4,169,482
Full-time Equivalents Total*	9.00	8.00	8.00	8.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

DON - BO-DN-I3900 - Donations Fund

The purpose of the Donations Fund Budget Summary Level is to support P-Patch Community Gardening Programs.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Donations Fund	6,574	-	-	-
Total	6,574	-	-	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Office of Planning and Community Development

Sam Assefa, Director

(206) 386-1010

<http://www.seattle.gov/opcd/>

Department Overview

The Office of Planning and Community Development (OPCD) was established in December 2015 with a mission of strengthening citywide planning and implementation and ensuring City departments are aligned and coordinated in planning for Seattle's future development. OPCD coordinates City departments to ensure that development decisions and investments advance equitable growth, consistent with Seattle's Comprehensive Plan. The department is guided by its vision of "an inspiring city, in harmony with nature, where everyone thrives." In addition to partnering with other City departments, OPCD works closely with community partners and other agencies to implement that vision. During the last four years, OPCD has accomplished a wide range of projects, including implementation of Mandatory Housing Affordability (MHA); legislation to make it easier for property owners to create accessory dwelling units (ADUs); development of new Design Guidelines in six neighborhoods; funding more than 20 community-initiated projects to combat displacement through the Equitable Development Initiative (EDI); and numerous other items.

The director of OPCD co-chairs the Capital Subcabinet with the director of the City Budget Office (CBO) to facilitate a coordinated decision-making structure to guide planning and implementation of infrastructure investments. The Capital Subcabinet is comprised of key staff from the Mayor's Office, CBO, department directors who have responsibility for major capital projects, and directors of departments that support neighborhoods and businesses. OPCD works with members of the cabinet to ensure the City's capital investments support community development objectives, and that department priorities are aligned and reflected in policies and budget resources.

OPCD is organized in three divisions: Citywide Initiatives, Community Planning and Design, and Equitable Development.

Citywide Initiatives

This division leads the development of strategies, policies and actions on issues of citywide importance through efforts such as Seattle's 2035 Comprehensive Plan Update and the Affordable Middle-Income Housing Advisory Council. This division also represents the City in regional planning initiatives and works with partners to conduct research and analysis on current issues and trends to forecast potential future challenges and opportunities.

Community Planning and Design

This division works at the neighborhood, district or community scale to develop localized strategies for addressing community-defined priorities. These efforts are typically undertaken in collaboration with community partners and involve multiple City departments as well as other agencies. Outcomes range from near-term tactical interventions to legislative actions such as adoption of design guidelines and rezoning. Decisions about where to focus these efforts are informed by data on growth, equity, displacement, environmental issues and other topics, and are often in response to major capital investments or market forces that will catalyze community change and/or contribute to displacement. This division also leads site- and area-specific efforts to facilitate desired change in the built environment and property redevelopment that achieves community-benefit outcomes.

Equitable Development

This division leads the City's Equitable Development Initiative (EDI) in partnership with City departments and community groups to invest in community-led efforts aimed at addressing issues of racial equity, social justice and cultural displacement. The Equitable Development Framework guides how the City prioritizes its work; shapes its budgets, policies, programs, and investments; and structures the implementation of targeted strategies and

Office of Planning and Community Development

equitable development projects by using clear objectives for reducing disparities and achieving equitable outcomes for marginalized populations.

In addition, two independent commissions are housed within OPCD:

The **Seattle Design Commission** promotes civic design excellence in capital improvement projects that are located on City land, in the City right-of-way, or constructed with City funds. The commission provides recommendations on aesthetic, environmental and design principles and policies, and promotes interdepartmental and interagency coordination. The Seattle Design Commission consists of 3.5 FTE staff and 10 commissioners that meet twice a month and review City-funded capital projects such as community centers, park facilities, fire stations and police stations. The commission advises the Mayor, the City Council and City departments on the design of capital improvements and other projects and policies that shape Seattle's public realm.

The **Seattle Planning Commission** advises the Mayor, the City Council and City departments on broad planning goals, policies and plans for the physical development of the city. Comprised of 3.5 FTE staff and 16 volunteers, the commission's work is framed by the Comprehensive Plan and seeks public comment and participation as a part of the process to achieve the plan's vision. The commission provides independent analysis and promotes issues vital to livability.

Budget Snapshot

Budget Overview

The Equitable Development Initiative (EDI) is an important and growing program within OPCD. The EDI program is coordinated by OPCD and guided by an interdepartmental working group consisting of staff from the Office of Housing (OH), Department of Neighborhoods (DON), Office of Economic Development (OED), Mayor's Office (MO), and City Budget Office (CBO). It is also informed by an external community advisory board representing impacted communities. In 2017, the City Council identified the initial five projects for the EDI program. Since then, the EDI program has completed two additional rounds of project funding and now supports a total of 22 unique projects. Support for each of these projects includes a mix of capacity building and capital development funding, which can include site acquisition.

The EDI program was initially funded with \$16 million in one-time proceeds from the sale of surplus property known as the Civic Square Block. The Washington State Legislature passed the Short-Term Rental (STR) Tax in the 2018 legislative session and beginning in 2019, the EDI program has also been funded with STR revenues. In 2020, \$5 million of STR revenues support EDI grant-making. General Fund supports EDI staff and other administrative components of the program, and the 2020 Proposed Budget includes \$430,000 of Community Development Block

Office of Planning and Community Development

Grant (CDBG) dollars. CDBG dollars are received as part of a grant from the federal government and will support construction or site development work.

In 2019, the City completed the sale of the Mercer Megablock properties in South Lake Union, resulting in new revenues, of which \$15 million is appropriated in the 2020 Proposed Budget for a new Equitable Development Initiative (EDI) Revolving Site Acquisition Loan program. This funding will help project partners acquire site control for EDI projects that include housing in order to advance the project toward concrete implementation outcomes. An additional \$500,000 of Mercer property proceeds are included in OPCD's proposed budget to fund work on strategic investments for anti-displacement property acquisition.

One of the core functions of OPCD is to serve as the steward of the City's Comprehensive Plan, a 20-year vision and roadmap for Seattle's future. The Comprehensive Plan guides City decisions about where to create new jobs and residences, how to improve the transportation system, and where to make capital investments such as utilities, sidewalks, and libraries. It provides a framework to guide most of Seattle's big-picture decisions on how to manage growth while preserving and improving our neighborhoods.

The Washington State Growth Management Act (GMA) requires that cities undertake a major review and update of their comprehensive plans every eight years. Under the GMA, comprehensive plans must accommodate the growth that is anticipated over the next 20 years. The previous major update of the Comprehensive Plan planned for anticipated growth of 70,000 housing units and 115,000 jobs during the 2014-2035 planning period. The next major plan update will extend the planning period to approximately 2043. Based on faster-than-anticipated growth to date and updated state and regional projections for population and employment, the next update will likely anticipate significantly more growth. In response, the City will review and revise as needed the Urban Villages growth strategy and policies that guide City actions that include land use, transportation, housing, and public investments. The 2020 Proposed Budget adds \$650,000 in one-time resources for OPCD to work on an Environmental Impact Study, engage in community outreach, and conduct a racial equity analysis to support the next major update to the Comprehensive Plan.

Another major initiative for OPCD is Sound Transit 3 (ST3) light rail station area planning. ST3 will include 14 new light rail stations and 11 miles of guideway in Seattle. Starting in 2020, City departments and other jurisdictions will begin substantive work on station area planning for ST3 facilities, including policies and implementation strategies concerning urban design and neighborhood integration of Sound Transit investments. OPCD will be engaged in station design and neighborhood integration, including the evaluation of station area planning principles supported by urban design frameworks for each station area, strategy development and implementation for Transit Oriented Development (TOD), Equitable Development, and Anti-Displacement. OPCD is also the lead department on developing station design guidelines, incentive zoning for station areas, and applying a Racial Equity Toolkit (RET) analysis to these projects.

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$443,442

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor. Of this amount, \$28,330 is Real Estate Excise Tax and the remaining \$415,112 is General Fund.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$7,256

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This

Office of Planning and Community Development

item increases appropriations to account for the City's obligation for all employees. General Fund supports \$6,789 of this increase and the remaining \$467 is from Real Estate Excise Tax.

Citywide Adjustments for Standard Cost Changes

Expenditures \$74,284

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process. The General Fund supports \$71,861 of this allocation and the remaining \$2,423 is supported by Real Estate Excise Tax.

Proposed Operating

EDI Revolving Site Acquisition Loan Fund

Expenditures \$15,000,000

Escalating land prices have become a barrier to implementing the strategies outlined in the Equitable Development Initiative (EDI) Implementation Plan and Equitable Development Financial Strategy. The 2020 Proposed Budget includes \$15 million of one-time funding to address this issue by creating a revolving site acquisition loan program for equitable development projects. Loans will be repaid with permanent financing so that this can be a sustainable tool to serve future projects. This item is funded by proceeds from the Mercer Megablock property sale in South Lake Union.

Strategic Investment Fund

Expenditures \$500,000

Position Allocation 1.00

The 2020 Proposed Budget makes significant investments in strategic land acquisition to advance racial equity and address displacement. The proposed budget adds \$330,664 of one-time General Fund for strategic land acquisition work to address displacement. The work will include community outreach and engagement. It will also include a citywide scan of potential properties, including feasibility evaluation. This item also provides \$169,336 of ongoing General Fund for a Strategic Advisor 2 Real Estate Advisor position. The proposed budget also includes a \$42 million allocation in Finance General to support a Strategic Investment Fund. OPCD will work with DON, OED, CBO, and OH on all phases of the strategic investment land acquisition work. Funding for this item comes from sale of the Mercer Megablock property in South Lake Union.

Comprehensive Plan Major Update

Expenditures \$650,000

This item adds \$650,000 of one-time General Fund support to launch the next major update of the City's Comprehensive Plan. The Plan update, which is required under the state Growth Management Act, is anticipated to take three years to complete. This item includes \$500,000 for OPCD to contract with a consultant team for the project EIS and \$150,000 for outreach and engagement. OPCD is working with DON and OCR to develop a community engagement work plan which will result in the generation of specific tasks and roles for OPCD, DON and consultants.

Office of Planning and Community Development

Restore Funding for EDI Staff

Expenditures	\$1,119,580
--------------	-------------

This ongoing item restores funding to OPCD's budget for administration of the Equitable Development Initiative. In 2019, \$4 million of Short-Term Rental Tax (STR) dollars were allocated to community-initiated projects, and \$1 million of STR dollars were allocated to administer the program. On July 22, 2019, the City Council passed legislation that directed all \$5 million of OPCD's STR budget to community-initiated equitable development projects. This item adds General Fund to support the 6 FTEs who administer the EDI program and to support EDI administrative and consultant services costs.

Additional EDI Project Funding

Expenditures	\$540,000
--------------	-----------

The 2020 Proposed Budget adds \$540,000 of one-time funding for Equitable Development Initiative grant awards. This will support projects that are strong candidates for project selection but were not initially selected for funding due to budget constraints. Of this amount, \$40,000 is from the General Fund and the remaining \$500,000 is from the Unrestricted Cumulative Reserve Fund.

Sound Transit 3 Funding from SDOT

Expenditures	\$134,255
Revenues	\$134,255

This technical item increases appropriation authority by \$134,255 for station area planning work related to Sound Transit 3. The 2020 Endorsed Budget included an appropriation of \$134,255 in SDOT's budget for work to be performed by OPCD in support of Sound Transit 3. This item adds the corresponding budget appropriation for OPCD. Revenues in SDOT's Transportation Fund (street use fees) are supporting this one-time General Fund appropriation to OPCD.

Proposed Technical

Move Short Term Rental Tax to New Fund

Expenditures	-
--------------	---

During 2019, Council passed Ordinance 125872 which created the Short-Term Rental Tax Fund. This technical adjustment moves OPCD's \$5 million allocation of short-term rental tax from the General Fund to this new fund. This appropriation will be used to support the Equitable Development Initiative.

Technical Adjustments for Commissions Housed in OPCD

Expenditures	-
--------------	---

This budget neutral item allocates commission budgets where expenses are occurring to assist with planning and monitoring efforts.

Community Police Commission

Bessie Scott, Interim Executive Director

(206) 256-5545

<http://www.seattle.gov/policecommission/>

Department Overview

The Office of the Community Police Commission (CPC) is the administrative and policy support entity of the Community Police Commission. The CPC is charged with providing community oversight and input on the police reform efforts that are the subject of a Settlement Agreement between the City and the U.S. Department of Justice regarding police practices. Membership of the CPC was modified in 2017 through legislation addressing changes in civilian oversight of the police ([Ordinance 125315](#)). A 21-member board appointed by the Mayor, the City Council and the Community Police Commission governs the CPC. Each commissioner serves a three-year term.

The CPC provides an independent forum for dialogue and widespread input on the reform efforts embodied in the Settlement Agreement and Memorandum of Understanding established by the Department of Justice. Ongoing community input is a critical component of achieving and maintaining effective and constitutional policing.

The CPC leverages the ideas, talent, experience and expertise of the people of Seattle to ensure police services:

- fully comply with the Constitution of the United States;
- ensure public and officer safety; and
- promote public confidence in the Seattle Police Department and its officers.

In 2017, the CPC's role was further refined through legislation addressing changes in the civilian oversight of the police ([Ordinance 125315](#)). The CPC is still charged with fulfilling and prioritizing the responsibilities as specified under the Consent Decree and Memorandum of Understanding and its role now includes:

- reviewing and providing input to many city partners on the police accountability system, police services and the Seattle Police Department's policies and practices;
- engaging in community outreach to obtain the perspectives of the community on police-community relations, the police accountability system, police services, policies and practices and providing that input to other City departments;
- maintaining connections with representatives of disenfranchised communities and community groups; and
- advocating for reforms to state law that will enhance public trust and confidence in policing and the criminal justice system.

Community Police Commission

Budget Overview

The 2020 Proposed Budget for the Community Police Commission (CPC) makes no significant changes and includes minor Citywide technical changes which are described below. Funding is reserved in the FAS proposed budget for future space renovations needs, estimated at \$250,000, as determined by CPC leadership.

Incremental Budget Changes

Community Police Commission

	2020 Budget	FTE
Total 2020 Endorsed Budget	1,468,572	9.00
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	77,905	-
2020 State Paid Family Medical Leave Increase Base Budget	1,190	-
Citywide Adjustments for Standard Cost Changes	19,618	-
Total Incremental Changes	\$98,713	-
Total 2020 Proposed Budget	\$1,567,285	9.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$77,905

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$1,190

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Community Police Commission

Citywide Adjustments for Standard Cost Changes

Expenditures \$19,618

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Seattle Fire Department

Harold D Scoggins, Fire Chief

(206) 386-1400

www.seattle.gov/fire

Department Overview

The Seattle Fire Department (SFD) provides fire protection and prevention, technical rescue and emergency medical services for the City of Seattle. It deploys engine companies, ladder companies, aid and medic units and fireboats to mitigate the loss of life and property resulting from fires, medical emergencies and other disasters. SFD maintains 33 fire stations that are strategically located within six battalions to provide optimal response times to emergencies. Each battalion serves specific geographic areas in the city: the downtown/Central Area, north and northeast Seattle, northwest Seattle, south and southeast Seattle and West Seattle.

SFD has a strong record on prevention of fires and property loss from fires. Seattle has fewer fires than the national average and of other cities with similar population size. Dollar loss and civilian deaths are also below the national and regional averages. Seattle averages 0.9 fires annually per 1,000 residents, which is lower than the regional average of 3.5 and national average of 4.1. Over the past five years, the average number of total structure fires per year in Seattle has been 624. Total fire dollar loss averaged \$22.6 million per year.

SFD provides emergency medical responses, which account for approximately 82% of all fire emergency calls in Seattle. In order to respond to the emergency medical demand, all Seattle firefighters are trained as emergency medical technicians (EMTs) to provide basic emergency medical care, or basic life support. SFD staffs seven medic units each with two firefighter-trained paramedics to provide more advanced medical care or advanced life support. Additionally, the department has five full-time and two peak-time aid units staffed by firefighters to provide basic life support citywide.

In 2016, SFD implemented the Low Acuity Alarm Program to reduce non-emergency calls to the 911 system and to provide improved service and care to individuals with non-emergent needs. Currently, core activities are high utilizer intervention (individuals and locations), low acuity data and trend analysis, establishment of referral partnerships and alternate treatment/transportation development.

The department also has marine, hazardous materials, high-angle, tunnel and confined-space rescue teams. In addition, SFD officers and firefighters are members of local and national disaster response teams such as the Federal Emergency Management Agency (FEMA)'s Urban Search and Rescue Task Force and wild land firefighting. SFD's fire prevention efforts include fire code enforcement, building inspections, plan reviews of fire and life safety systems, public education and fire safety programs, regulation of hazardous materials storage and processes and regulation of places of public assembly and public events to ensure life safety.

Seattle Fire Department

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

The Seattle Fire Department's (SFD) 2020 Proposed Budget reflects the City's commitment to maintaining public safety and supporting the work of those who directly meet the community's emergency-response needs.

Enhancing Response to 9-1-1 Calls

SFD plays a key role responding to a high volume of 9-1-1 calls that are medical, behavioral, and/or social in nature and do not require emergency interventions or hospitalization, or "low-acuity" calls. In 2018, downtown core units responded to over 11,000 low-acuity calls. This represented nearly 50% of those units' EMS run volume. Yet SFD has few options for these patients beyond hospital Emergency Department (ED) transport or leaving them at the scene. Nearly half of these downtown non-emergent patients were seen but not transported and almost 4,000 of them were seen and transported to an ED. Low-acuity conditions affect some of the most vulnerable in the community and 31% of downtown core patients were flagged as experiencing homelessness.

In late 2019, SFD launched Health One, a Mobile Integrated Health (MIH) pilot, to intervene in crises after a 9-1-1 call as an alternative to this current state. This program sends a team of two fire fighters and one social worker to the scene of low-acuity and crisis EMS calls to divert patients to appropriate and therapeutic destinations. This service will achieve a "warm handoff" of the patient to a new or existing caseworker and supportive services, including shelter, housing, and substance abuse treatment. The 2020 Proposed Budget adds resources to enhance the Health One program.

Providing Life Safety Protections

SFD's Fire Marshal's Office (FMO) provides fire prevention services, including enforcement of the Fire Code, to help provide a high standard of life safety to residents, workers, and visitors to the city. Currently one in three fire protection systems in Seattle are out of compliance, and roughly one in three fire calls turns out to be a false alarm. Until recently, SFD could only provide a notice of violation that did not always result in sustained compliance. Following up on notices of violation (now called orders to comply) requires scheduling return visits that provide time for building owners to come into compliance, unless the violation requires immediate compliance. If a building owner continues not to comply with an order, after potential extensions of compliance deadlines, prosecution is the next step in enforcement, with the threat of penalties of up to \$1,000 per day of violation. This is a slow process that may be too lenient for smaller violations that are easy to come into compliance for and then reoffend. At the same time, the penalty at the end of the process can be harsh.

In late 2019, legislation was approved to provide FMO with a more moderate tool to compel code compliance. SFD now has the authority to issue citations for Fire Code violations such as locked exit doors, failure to properly

Seattle Fire Department

maintain fire protection systems like sprinklers, and repeated false alarms. The provisions for Fire Code citations are similar to existing provisions in the Seattle Municipal Code for the Seattle Department of Construction and Inspections and the Seattle Department of Transportation, including appeal to the Office of the Hearing Examiner. This moderate tool in FMO's toolbox will improve life safety in the city by providing an immediate penalty and incentive for building owners and businesses to comply with the Fire Code.

Increasing Administrative Workload

As the city has grown and demand for SFD services has increased, so have demands on the Operations team's administrative staff. The department is striving to increase efficiencies with electronic systems; however, even with the addition of these systems, the volume of work far exceeds the resources available and the current staff in the past two years have worked a significant amount of overtime to keep up. A new position using existing resources will help provide the level of administrative support that is needed to effectively run Seattle Fire Department Operations and Resource Management Divisions.

Seattle Fire Department

Incremental Budget Changes

Seattle Fire Department

	2020 Budget	FTE
Total 2020 Endorsed Budget	220,970,564	1167.05

2020 Coalition and Non-Rep Annual Wage Increase Base Budget	719,197	-
2020 State Paid Family Medical Leave Increase Base Budget	200,828	-
Add Accounting Position	54,996	0.50
Citywide Adjustments for Standard Cost Changes	959,825	-
Proposed Operating		
Add Ops Admin Support	-	1.00
Enhance Health One	400,000	-
Increase Seattle IT Allocation to Fund Accela Support	37,220	-
Total Incremental Changes	\$2,372,066	1.50
Total 2020 Proposed Budget	\$223,342,630	1168.55

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$719,197

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase for the department's non-uniformed staff, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$200,828

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Seattle Fire Department

Add Accounting Position

Expenditures	\$54,996
Position Allocation	0.50

This item adds an Accounting Technician II position to providing accounting support for the Fire Prevention Division, which will be implementing a new Fire Code citations program. The additional resource will be funded by new revenues collected from the Fire Code citations program. Until the fall of 2019, SFD did not have the authority to issue citations for Fire Code violations such as locked exit doors, failure to properly maintain fire protection systems like sprinklers, and repeated false alarms. With citations, the Fire Marshall's Office can now more quickly incentivize businesses and building owners to comply with the Fire Code than the prior method of issuing notices of violation, scheduling return visits and re-inspections, and pursuing litigation in particularly uncooperative cases. The 2020 Proposed Budget also increases resources at the Office of the Hearing Examiner to handle the citations appeals resulting from the new program. See the Office of the Hearing Examiner's budget book pages for more detail.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$959,825
--------------	-----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Enhance Health One

Expenditures	\$400,000
--------------	-----------

This item adds funding to enhance the Health One mobile integrated health service. Health One sends a team of two fire fighters and one social worker to the scene of EMS calls that do not require emergency department transportation, to divert patients to appropriate and therapeutic destinations. This program will allow firefighters and police officers to focus on emergency situations. The 2019 pilot program for Health One launched with operating hours coinciding with peak call times and core business hours of partner referral services, four days a week. This funding will enable SFD to expand Health One service and track and evaluate the program more effectively.

Increase Seattle IT Allocation to Fund Accela Support

Expenditures	\$37,220
--------------	----------

This item adds expenditure authority to SFD to cover its portion of new staffing added in Seattle Information Technology (Seattle IT) for the Permitting System Integration (PSI)/Accela program. See Seattle IT's budget book section for more details on this program.

Seattle Fire Department

Add Ops Admin Support

Expenditures	-
Position Allocation	1.00

This item adds an Administrative Staff Assistant to perform complex administrative support functions directly supporting the Assistant Chief of Operations and Assistant Chief of Resource Management and respective divisions and provide supervision of three administrative staff. SFD has documented a significant increase in the administrative workload of their Operations team since 2015, including overtime transaction processing, travel and training requests, tour and visit requests, memo generation, mail processing, and special events coordination. This increased workload resulted in nearly 1,000 hours of overtime (among 5 staff members) worked in 2018. The costs of this new position will be offset with reductions in utilization of temporary employment services and/or overtime.

Firefighter's Pension

Steve Brown, Executive Secretary

(206) 625-4355

<http://www.seattle.gov/firepension/>

Department Overview

The Firefighters' Pension Fund (FPEN) provides pension and medical benefit services to eligible firefighters, active and retired, and their beneficiaries. FPEN is a closed plan that only covers firefighters who were hired before October 1, 1977. Retiree benefits for firefighters hired more recently are primarily covered through a separate state-managed plan.

Management of firefighter benefits funds transitioned in the 1970s from local to state control. Prior to that time, the City paid into FPEN to provide for firefighter retiree benefits. In March 1970, the state created the Law Enforcement Officers and Fire Fighters Retirement System Plan 1 (LEOFF 1). Seattle firefighters hired between March 1970 and October 1977 enrolled in LEOFF 1, but also received additional benefit coverage through FPEN. As a result, this group of firefighters receives retiree benefits primarily from the state's LEOFF 1 plan, but also any earned increment from the City's FPEN that exceeds LEOFF 1 coverage. Both FPEN and LEOFF 1 closed to new enrollees in October 1977. Firefighters hired after that date enroll in the state's LEOFF 2 plan and do not receive benefits from FPEN.

The Seattle Firefighters' Pension Board is a five-member quasi-judicial body chaired by the Mayor or his/her designee, which formulates policy, rules on disability applications, and provides oversight of the Firefighters' Pension Fund. Four staff employees of the board handle all of its operational functions. Staff positions associated with Firefighters' Pension Fund are not reflected in the City's position list.

The projections of annual pension and medical benefits, which comprise about 97% of the total annual FPEN budget, are based on the forecasts of an independent actuary. The Firefighters' Pension Fund has two statutory funding sources:

- The first is a component of the City's property tax levy. These revenues are placed in the City's General Fund, which funds the Fire Pension Fund's annual budget.
- The second is the state fire insurance premium tax.

These statutory funding sources are in addition to other smaller funding sources that support the Firefighters' Pension Fund obligations.

The Firefighters' Pension Fund includes two funds: the Fire Pension Fund, which pays current pension, medical, and death benefits; and the Actuarial Account, which was established by [Ordinance 117216](#) in 1994 to accumulate a balance sufficient to pay all future pension liabilities of the fund by 2028.

Budget Overview

The Firefighters' Pension Fund (FPEN) receives almost all of its revenue from the City's General Fund. FPEN's expenditures pay the legally-mandated pension and medical benefits, including long-term care, to eligible retired firefighters and qualified beneficiaries. Most of FPEN's retirees are represented by either Local 27 (firefighters' union) or Local 2898 (fire chiefs' union) and their total pension benefits are increased annually with a cost of living adjustment (COLA) equal to the negotiated annual wage increases (AWI) for the active union members at the Seattle Fire Department and then offset by benefits paid by the state's LEOFF 1 pension plan which has its own annual growth rate.

In November 2016, Council passed Ordinance 125190 which requires an actuarially determined level payment amount from the City to the FPEN Fund each year to cover pension benefit costs. Any remaining difference between the payment amount and actual pension benefit costs is transferred to the Actuarial Account for FPEN's future pension obligations. The account is invested in a portfolio managed by the Department of Finance and Administrative Services (FAS). The 2020 Proposed Budget assumes an annual rate of return of 6% on the investment portfolio and that the returns are continuously reinvested.

The 2020 Proposed Budget increases the administration appropriations by \$40,000 compared to the 2020 Endorsed budget to reflect citywide changes to wages, family medical leave benefits and internal service costs. It also increases the pension benefits payments by \$28,000.

Firefighter's Pension

Total 2020 Proposed Budget	\$21,236,362	4.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$45,511

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$864

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(6,388)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Office of Inspector General for Public Safety

Lisa Judge, Inspector General

(206) 684-3663

<http://www.seattle.gov/oig>

Department Overview

The Office of Inspector General for Public Safety (OIG) was established in 2017 via [Ordinance 125315](#). OIG provides oversight of management, practices, and policies of the Seattle Police Department (SPD) and Office of Police Accountability (OPA), monitoring of ongoing fidelity to organizational reforms implemented pursuant to the goals of the 2012 Federal Consent Decree and Memorandum of Understanding, and auditing and review of criminal justice system policies and practices related to policing and other criminal justice matters.

OIG is empowered to help ensure the fairness and integrity of the delivery of law enforcement services and the investigation of allegations of police misconduct. OIG has been established to make systemic recommendations for lasting reform that are intended to reflect the values of Seattle's diverse communities.

Responsibilities of OIG include:

- performing oversight activities that ensure the ongoing integrity of SPD and OPA processes and operations;
- ensuring SPD is meeting its mission to address crime and improve quality of life through the delivery of constitutional, professional, and effective police services that retain the trust, respect, and support of the community;
- conducting risk management reviews and performance audits;
- reviewing misconduct complaint-handling and investigations by OPA;
- evaluating SPD's response to incidents involving death, serious injury, serious use of force, mass demonstrations, serious property or vehicle damage, or other issues of significant public concern to assess the integrity of the process; and
- making recommendations to policymakers for increasing the effectiveness of SPD and related criminal justice system processes.

Office of Inspector General for Public Safety

Budget Overview

The 2020 Proposed Budget focuses on strengthening the capacity of the recently formed OIG by expanding the department's staffing. As OIG ramps up operations, additional auditing staff provide needed oversight for the audit areas identified in the police accountability ordinance. It will also help mitigate the impact of emergent audit issues that could affect the annual OIG work plan.

The 2020 Proposed Budget adds funding and position authority for two auditor positions: one senior auditor and one auditor. The senior auditor will provide oversight and technical expertise that will ensure compliance with auditing standards, and the auditor will help OIG conduct a greater number of audits. These changes expand the capacity of the department to fulfill its mandate to provide civilian auditing of the management, practices, and policies of the Seattle Police Department and Office of Police Accountability, as established under the 2017 Police Accountability legislation (Ordinance 125315).

Office of Inspector General for Public Safety

Office of Inspector General for Public Safety

	2020 Budget	FTE
Total 2020 Endorsed Budget	1,964,119	10.00
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	105,511	-
2020 State Paid Family Medical Leave Increase Base Budget	542	-
Citywide Adjustments for Standard Cost Changes	167,237	-
Proposed Operating		
Add Senior Auditor (1.0 FTE) to OIG	171,415	1.00
Add Auditor (1.0 FTE) to OIG	159,413	1.00
Total Incremental Changes	\$604,119	2.00
Total 2020 Proposed Budget	\$2,568,238	12.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$105,511

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$542

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$167,237

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final

Office of Inspector General for Public Safety

for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Add Senior Auditor (1.0 FTE) to OIG

Expenditures	\$171,415
Position Allocation	1.00

This change adds position authority and funding for one senior auditor at a Strategic Advisor 2, Exempt, level for OIG. Auditing is a core function of the OIG. Under the police accountability ordinance (Ordinance 125315) that established the OIG, performance auditing distinguishes this organization from all other City police oversight entities. Audit supervision is a critical activity that should be done by a senior auditor to ensure objectivity, fairness and compliance with auditing standards, and provide meaningful mentorship to other auditors. This position will provide project management and strategic support and expand the department's capacity to perform complex audits as well as improve internal controls over OIG work product.

Add Auditor (1.0 FTE) to OIG

Expenditures	\$159,413
Position Allocation	1.00

This item adds position authority and funding for one auditor at a Strategic Advisor 1, Exempt, level. This position will expand OIG's capacity to perform quality audits in accordance with auditing standards and support the ongoing work of the department in critically examining SPD's operations. Auditing is foundational to the OIG legal mandate to provide systemic oversight over SPD. The body of potential audit work is extensive and at current staffing levels, any new competing priority causes significant delays to planned audits. This additional staff position is necessary to support ongoing oversight capacity and operational needs and will increase the total number of auditors to four.

Law Department

Peter S. Holmes, City Attorney

Civil Division, (206) 684-8200; Criminal Division, (206) 684-7757

<http://www.seattle.gov/cityattorney>

Department Overview

The Law Department serves as counsel to the City's elected officials and agencies, and as the prosecutor in Seattle Municipal Court. The Seattle City Attorney, Peter S. Holmes, is a nonpartisan elected official.

The department provides legal advice to City officials and departments, represents the City in litigation, and protects the public health, safety, and welfare of the community by prosecuting violations of City criminal and civil ordinances and state law. The four department divisions are described below.

The **Civil Division** provides legal counsel and representation to the City's elected and appointed policymakers in litigation at all levels of county, state, and federal courts, and administrative agencies. The Civil Division is organized into seven specialized areas of practice: Employment, Environmental Protection, Land Use, Government Affairs, Torts, Regulatory Enforcement & Economic Justice, and Contracts & Utilities.

The **Criminal Division** prosecutes misdemeanor crimes and represents the City in contested traffic infractions in Seattle Municipal Court, provides legal advice to City clients on criminal justice matters, monitors state criminal justice legislation of interest to the City, and participates in criminal justice policy development and management of the criminal justice system. The Criminal Division is comprised of a Prosecution Support Unit, Case Preparation Unit, Domestic Violence Negotiation and Trial Unit, Domestic Violence Victim Advocates, Appeals, Review and Filing Unit, Specialty Courts Unit (Mental Health, Veterans' Court, LEAD, and Pre-filing Diversion), Infractions Unit, and Trial Team Unit.

The **Precinct Liaison Division** funds attorneys to work in each of the City's five police precincts, providing legal advice to police and other City departments, and solving issues of concern to the community.

The **Administration Division** provides executive leadership, communications, and operational support for the entire department. It is comprised of the executive leadership team, human resources, finance, media relations, and information technology staff.

Budget Snapshot

	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

Law Department

Budget Overview

The 2020 Proposed Budget provides additional resources to the Law Department to increase staffing to address special projects and meet increased workload, and adds funding for Citywide impacts.

In the last five years, use of outside counsel has increased for the Civil Division. The Law Department uses outside counsel when there is a conflict of interest, specific expertise is required, or existing staff is at capacity. Three Assistant City Attorney positions are added in the areas of employment and government affairs where outside counsel has increased primarily due to capacity. Adding these positions is expected to save the General Fund over \$1 million.

In the 2019 Adopted Budget, the Law Department was requested to absorb a 1% salary savings reduction of \$250,000 in the Civil Division. The reduction was restored in 2019 through the 2nd Quarter Supplemental Budget Ordinance and is restored on an ongoing basis in the 2020 Proposed Budget. Restoring this budget allows the department to fill vacancies promptly, adjust pay as required for the experience levels of staff, and absorb employee payouts when they leave the department. In 2019, movement of employees along the discretionary pay band was delayed until this funding was restored. The Law Department is concerned the current wage structure for Civil Division attorneys is not competitive. A compensation review of the Assistant City Attorney classification is underway to compare Civil and Precinct Liaison Division attorneys to the market of governmental attorneys.

In the Criminal Division, an Assistant City Prosecutor (ACP) is added to the general rotation of the Criminal Division in the 2020 Proposed Budget. Since the expansion of paid care leave programs in the City, the Criminal Division has had one to two ACPs on parental or other city benefited leave at any given time reducing overall capacity to address steady court scheduling and case management, as well as effectively identifying cases for diversion programs. Having a permanent position in place of temporary staffing enables the department to hire and train a permanent employee to backfill employees on leave. The position will also assist the Review and Filing Unit in addressing case filing backlogs that occur as a result of regular sick and vacation time usage when backfill is not being provided.

The current Criminal Division case management application, DAMION, was implemented in 1998 to track all aspects of prosecution including police reports, charging decisions, victims, witnesses, defendants, court dates and disposition. The application also relies upon significant data exchanges with the Seattle Police Department (SPD) and the Seattle Municipal Court (SMC). This desktop system is at the end of its lifecycle and the vendor is no longer fully supporting the application for updates and maintenance. In addition, use of the system limits the department's ability to implement a paperless process and reduce redundancies. The Seattle Information Technology Department (ITD) has \$325,000 in the Criminal Justice Information System Replacement Project to upgrade the existing system. An additional unspent \$650,000 was carried over from 2018 to 2019 to provide further funding for this project. Remaining funding needs will be addressed in the Criminal Justice Information System Replacement Project. A request for proposals (RFP) will be issued in 2019 to begin identifying a replacement solution. Implementation is expected to take place in 2020, with a 'go live' date in the fourth quarter of 2020.

The 2017 Adopted Budget created the Pre-Filing Diversion Program led by the Law Department with assistance from the Seattle Municipal Court. The 2017 Racial Equity Toolkit (RET) determined that additional services, including pre- and post-workshop support and swift connection to resources, were required to meet racial equity needs of participants. The proposed budget includes funding to double the number of workshops from 6 to 12 workshops per year to meet these needs. In the Administration Division, additional staff and staffing changes are being provided without funding to help the department manage the increased workload associated with the PeopleSoft 9.2 accounting system implementation and human resource needs. The department will fund this staff via contributions from the operating divisions. A Personnel Specialist position will bring human resource staffing to two to support over 200 employees and volunteers and manage an average of five open recruitments per month. In the finance section, an accounting tech position will be reclassified to full accountant adding redundancy to meet PeopleSoft 9.2 role requirements and provide coverage when the principal accountant is out.

The 2020 Proposed Budget also includes revenue-backed appropriation for the MOAs the Law Department has negotiated with other city departments and outside agencies for specific services. While these have historically been

Law Department

off budget, appropriation of these items follows the financial policies required by PeopleSoft 9.2. In addition, the budget provides appropriation for reclassifications approved by the Seattle Department of Human Resources.

In 2019, the Mayor convened the High Barrier Individuals Working Group, an interagency group including King County, in response to heightened community conversations around public safety and individuals repeatedly caught in a cycle of criminal justice, social services and community incidents. The group explored new strategies, system reforms or partnerships needed for a more focused approach to repeat offenders who are not receiving appropriate interventions. The group developed four new pilot programs to address these issues including Case Conferencing with support from the City Attorney's Office to coordinate across systems and programs addressing those involved in diversion programs, court programs or post-sentencing probation for these high barrier individuals. There are funds set aside in Finance General for these pilot programs.

Fund Paralegal Reclassifications from 2018	45,502	-
Total Incremental Changes	\$4,170,169	8.50
Total 2020 Proposed Budget	\$34,203,612	204.10

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$1,701,530

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$28,530

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Law Department

Citywide Adjustments for Standard Cost Changes

Expenditures	\$315,431
--------------	-----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Attorney Staffing

Expenditures	\$528,505
Position Allocation	3.00

The Law Department sometimes assigns work to outside attorneys due to conflicts of interest, needed expertise or staffing capacity. The department analyzed outside counsel data from 2014-2018 related to capacity of existing staff in the Civil Division. During that period, approximately \$18 million was spent on outside counsel. Of this, over \$10 million in expenditures was related to General Fund matters. Most of the remaining \$8 million was reimbursed by utility departments. The General Fund savings could be more than \$1 million annually with the hiring of three attorneys to address capacity issues.

Pre-Filing Diversion Program Funding of Choose 180 Workshops

Expenditures	\$100,000
--------------	-----------

The 2017 Adopted Budget created the Pre-Filing Diversion Program led by the Law Department with assistance from the Seattle Municipal Court. In a 2017 Racial Equity Toolkit (RET) analysis, it was determined that additional services were required to meet racial equity needs of participants, including pre- and post-workshop support and connection with resources in a timely manner. The department conducts six workshops per year, providing one every other month. The six workshops have been funded through carryover budget due to the late start of the program in 2017. For 2020, the department requested \$25,000 to continue the same level of service. An additional \$75,000 is added to increase the workshops to one a month. With 12 workshops per year, participation is expected to increase with a more immediate connection to resources.

Assistant City Prosecutor to Address Case Backlog and Leave Backfill

Expenditures	\$144,127
Position Allocation	1.00

An Assistant City Prosecutor is added to the Criminal Division to provide capacity to backfill employees utilizing paid parental and family care leave. The Criminal Division typically has one to two prosecutors on parental or other city benefited leave at any given time. Having a permanent position that can be used in place of temporary staffing will enable the department to hire and train a single person to cover multiple types of leave and rotation. The position will also be available to assist the Review and Filing Unit to mitigate and address case backlogs, some of which may qualify for the department's diversion programming.

Law Department

Restore Vacancy Rate Assumption Reduction

Expenditures	\$270,648
--------------	-----------

This item restores a \$250,000 ongoing 2019 budget cut of assumed salary savings to the Civil Division. Restoring the reduction allows the department to fill vacancies promptly, move employees along a discretionary pay spectrum as they increase their levels of experience, and absorb employee payouts when they leave the department. The restored funding amount includes additional funding to cover AWI expenses.

Administrative Staffing

Expenditures	-
Position Allocation	1.00

Additional staff and staffing changes are being provided without funding to help the department manage the increased workload associated with the new financial system implementation and human resource needs. The department will fund this staff via contributions from the operating divisions. A Personnel Specialist position will bring human resource staffing to two to support over 200 employees and volunteers and manage an average of five open recruitments per month. While the department has grown more than 25% in the last ten years with many new leave and workforce equity requirements, HR staffing has remained unchanged. In the finance section, an accounting tech position will be reclassified to a full accountant to add the redundancy to meet PeopleSoft 9.2 role requirements and provide coverage when the principal accountant is out. This section manages over 5,000 invoices per year and is responsible for all special fund reimbursements for the Judgment and Claims Fund and Memorandum of Agreement (MOA) billing for the department which require analysis, invoice backup preparation and auditing to ensure they are correctly posted.

Proposed Technical

Budget for Revenue Supported Memorandum of Agreements

Expenditures	\$922,375
Position Allocation	3.50

City departments and outside entities have historically funded the Law Department for attorney services through memorandum of agreements (MOA). This revenue-backed funding is now tracked through the PeopleSoft 9.2 accounting system and requires associated appropriation per financial policies. Most of these changes are just formalizing financial arrangements that have existed in past years and for which resources have been allocated previously in the “customer” departments’ base budgets.

- MOA with Seattle Police Department for Discipline Support. \$160,660, 1.0 FTE. Since September 2017, a dedicated employment attorney in the Civil Division advises and serves the Chief of Police regarding officer discipline and disciplinary proceedings. The term-limited position is converted to a regular authority for the ongoing body of work.
- MOA with Seattle Police Department for Fifth Precinct Liaison Attorney. \$161,962. The Law Department has provided a fifth precinct liaison attorney to the Seattle Police Department (SPD) Southwest (SW) Precinct under a MOA since 2017. This liaison attorney provides in-person legal guidance to police officers and works with the SW Precinct on community safety, nuisance and regulatory issues, similar to the work performed by the other four liaison attorneys funded by the Law Department. The SW position was created by transferring a position from SPD to the Law Department and reclassifying it to an Assistant City Attorney. The position is funded by SPD pursuant to the 2017 MOA.
- MOA with Legislative Department for Code Reviser. \$25,000. The Code Reviser authority was legislated by ordinance in August 2019. The Legislative Department will provide \$26,164 in revenue to support this

Law Department

appropriation in 2020. The Law Department will reallocate a Paralegal position to a Strategic Advisor 1 to perform this work in the Civil Division.

- MOAs with Office Housing (OH) and Finance and Administrative Services (FAS). \$178,164, 1.0 FTE. For decades, the Law Department Civil Division has provided a dedicated attorney for legal advice and transactional support to OH. In late 2018, OH requested a second dedicated position. In the 2018 4th Quarter Supplemental Budget Ordinance, a position without appropriation was added to accommodate this request. This transaction adds appropriation for the second position. A technical net zero adjustment for the FAS MOA moves healthcare costs to the correct project as part of this transaction.
- MOA Funding Law Enforcement Assisted Diversion (LEAD) Staffing. \$204,269. This transaction adds appropriation authority in the Criminal Division for 1.5 FTEs supported by revenue from the Public Defender Association. This MOA was initiated in 2017. The funding and position authority will continue to be contingent on the execution of MOA agreements for this purpose on a biennial basis.
- MOA Funding Legal Intervention and Network of Care (LINC) Program Staffing. \$145,207, 1.0 FTE. In 2018, the Law Department signed a MOA with King County to provide services associated with the 2015-16 Washington Senate Bill 5177 and *Trueblood et al v. Washington State DSHS*. A prosecutor designed an internal program to make referrals of appropriate adult individuals to the LINC program developed and monitored by the King County Behavioral Health and Recovery Division's (BHRD) Diversion and Reentry Services section. This agreement is anticipated to be ongoing contingent on continued funding availability from the State. The term-limited Assistant City Prosecutor position is converted to regular authority for the ongoing body of work in the Criminal Division.
- MOA with Seattle Police Department (SPD) for Forfeiture Paralegal. \$47,113, 0.50 FTE. The Law Department is litigating 22 real property and 48 personal property, narcotics, and felony forfeiture cases which require case management, discovery and trial prep assistance from paralegal staff. A MOA with SPD was initiated in 2018 to provide a 0.50 Paralegal funded by revenue from forfeiture funds in the Criminal Division. The regular position which sunsets at the end of 2019 is continued for the body of work in 2020.

Fund 2019 Reallocations of Positions in the Public Disclosure Unit

Expenditures \$113,521

Two reallocations were approved by the Seattle Department of Human Resources (SDHR) in 2019. The first reclassification from Senior Paralegal to Strategic Advisor 2 aligned the department public disclosure officer to comparable positions across the City. The second reclassification from an out-of-class Paralegal to Assistant City Attorney acknowledged the long-term duties of the position to support public disclosure legal work.

Fund Paralegal Reclassifications from 2018

Expenditures \$45,502

In August 2018, Ordinance 125653 established new classification titles and salaries for the Paralegal and Senior Paralegal positions in the Law Department. This transaction appropriates ongoing funding for the salary increase.

Seattle Municipal Court

The Honorable Ed McKenna, Presiding Judge

(206) 684-5600

<http://www.seattle.gov/courts/>

Judicial Overview

The Seattle Municipal Court (Court) adjudicates misdemeanors, gross misdemeanors, infractions (e.g., traffic and parking tickets, traffic camera violations, and other violations), and civil violations related to building and zoning offenses. The Judicial Branch of Seattle government has seven elected judges and six appointed magistrates. There are more cases processed here than any other municipal court in the State of Washington; in 2018, 10,115 criminal cases were filed and 56,455 criminal hearings were held at Seattle Municipal Court.

The Court is committed to excellence in providing fair, accessible and timely resolution of alleged violations of the Seattle Municipal Code in an atmosphere of respect for all. The Court is a leader in implementing innovative programs and services, utilizing evidence-based best practices and harm reduction strategies, using data to continually evaluate practices and inform new strategies, and taking a holistic approach that benefits Court participants and ensures ongoing public safety.

Whether individuals come to the Court to resolve a ticket or appear at a criminal hearing, the Court strives to meet people where they are and remove barriers to success, with the goal of reducing racial disparities and recidivism.

Court Programs and Services

The Court partners with community organizations to provide a wide variety of services at the **Community Resource Center**, a social service hub located in the courthouse. The Community Resource Center is open for the entire public's use and is woven into all the Court's strategies for supervising individuals, community outreach and reentry support. Services offered include:

- food and clothing
- housing through Coordinated Entry for All
- health and hygiene
- grocery cards and food stamps
- substance use disorder assessment
- employment and job readiness

In pretrial proceedings, judges prioritize the least restrictive option for release while protecting community safety. The Court's Pretrial Services division works to support individuals participating in a variety of alternatives to detention. Some of these alternatives include:

- day reporting included in an overall pre-trial strategy; and
- Electronic Home Monitoring (EHM) and Secure Remote Alcohol Monitoring (SCRAM) with options for subsidized or reduced costs for low income and homeless individuals.

The Court also partners with the Seattle City Attorney's Pre-filing Diversion Program.

In 2019, the Court implemented an automated text reminder program to improve court appearance rates, at no additional cost to the City. This makes it easier for individuals who are released pretrial to stay informed about their court dates and avoid having warrants issued. This is an especially important method of communication for individuals who have no permanent mailing address.

For individuals fulfilling post-trial probation obligations, the Court's **Probation Counselors** work one-on-one with clients to address underlying needs and help them meet their goals. Over half of the individuals on probation in 2018

Seattle Municipal Court

were sentenced for high public safety risk charges: DUIs make up the largest share of individuals on probation at 42%, followed by domestic violence at 19%. In 2019, the Court has contracted with the Vera Institute of Justice to review our current probation policies and practices with the goal of identifying examples of success as well as areas for advancement. This review will analyze impacts of court probation practices on communities of color, women and nonbinary people, and the LGBTQ community, and identify ways to improve service to these populations.

Specialty Courts

In addition to three general trial courts, the jail arraignment calendar and the master jury trial calendar, the Court serves defendants and the community through several specialty court calendars.

Mental Health Court, established in 1999, is a specialized court where the judge, defense, prosecution, probation counselors, and a mental health clinician work as a team to improve outcomes for the participant. Individuals are referred to this voluntary program by judges, defense attorneys, prosecutors, jail staff, or others. Mental Health Court has saved thousands of jail days, thousands of hospital bed days, and hundreds of thousands of dollars in jail costs to the City of Seattle. The Mental Health Court program has been working over the last six months to increase participation. The Court is contracting via HSD with Public Health of Seattle/King County to provide clinical services to individuals eligible for MHC. Having a highly skilled clinician has resulted in a large increase in the volume of participants referred to the court and being placed on Conditions of Release. The clinician has worked with 51 participants since beginning with the court in May 2019.

Seattle Veterans Treatment Court was established in 2012 and is a voluntary, court-monitored treatment program that addresses the mental health and/or substance use issues of veteran defendants. This program is a collaboration between the Court, prosecution, defense, the King County Department of Community and Human Services, the Washington State Department of Veterans Affairs, and the U.S. Department of Veterans Affairs.

Domestic Violence Courts were established in 2004 and are staffed by designated judges and specialized probation counselors. A dedicated domestic violence court allows judges to ensure follow-through, aid domestic violence survivors, and hold offenders accountable, with the assistance of justice partners and social service agencies. The Court has been integral in piloting a collaborative treatment modality known as the **Domestic Violence Intervention Project (DVIP)**. This pilot project is aimed at improving safety for survivors via individualized batterer intervention and is a multi-agency/system collaboration and response. The pilot began in June 2018 and will fully launch in early 2020.

Seattle Youth Traffic Court, established in 2012, provides eligible teen drivers charged with a traffic violation the opportunity to maintain a clean driving record. Youth appear before a court of their peers who act as judges, jurors, defense attorneys and prosecutors. The peer jury determines an appropriate sanction based on the nature of the violation and impact on the community. This program is a collaboration between the Court, Seattle University School of Law, Garfield High School, and the Seattle Police Department.

In addition to these specialty courts, the Court is exploring options for re-instituting a **Community Court** in the coming years, in collaboration with the City Attorney, the Department of Public Defense, and other community partners. The Court is also examining the potential benefit of adopting a DUI specialty court, in collaboration with the Washington Traffic Safety Commission.

Community Outreach

The Court hosts quarterly community outreach events that bring court services and resources to Seattle neighborhoods. These *SMC In The Community* events are an opportunity for community members to receive assistance with resolving Seattle Municipal Court warrants, learn about options for addressing Seattle and King County tickets by setting up a payment plan or community service plan, get help with reinstating their driver's license, and access supportive services through the Community Resource Center.

Seattle Municipal Court

The most recent community event, at Garfield Community Center in May 2019, connected 248 people with a variety of services. While the majority (67%) of attendees were Seattle Municipal Court clients, a third were members of the general public coming to access supportive services from court partners. Approximately one in three people at the event reported experiencing homelessness or unstable housing.

The Court will continue to expand its outreach efforts. The next SMC In the Community event is scheduled for October 2019 at Rainier Beach Community Center. The Court is also exploring options for holding magistrate hearings in neighborhoods across Seattle to provide community members more accessible locations to resolve outstanding tickets, at no additional cost to the City.

Infractions

The Court processes hundreds of thousands of traffic, parking, and traffic camera tickets every year. In 2018, the Court processed 27,421 traffic infraction tickets, 107,211 traffic camera tickets, and 433,175 parking tickets. Individuals may schedule hearings with one of the Court's magistrates to contest or mitigate their tickets; magistrates held 74,658 infraction hearings in 2018.

The Court will work with individuals who are unable to pay their tickets through payment plans or by converting the amount owed into community service hours.

Municipal Court Information System Replacement

The Court is replacing its legacy municipal court information system, MCIS, with a modern and adaptable case management solution. The new system will streamline court processes, improve the accessibility of court services to the public, and make it easier for partners at the Seattle Police Department, King County, and others to work collaboratively with the Court.

Language Access and Accessibility

The Court has provided **Interpreter Services** in 148 languages since 2005. A Court priority is ensuring access to justice for Limited English Proficiency (LEP) and deaf, hard-of-hearing, or deaf-blind (D/HH/DV) individuals. Free of charge interpreter services are provided for criminal and civil matters, including court hearings, trials, attorney-client interviews, probation appointments, prosecution witnesses, mental health evaluations, customer service, and translation of court forms and letters. In 2018, about 6,000 interpreted events were conducted with the help of 183 freelance interpreters in 71 languages, including American Sign Language. Approximately 40% of the requests are for Spanish language interpreters. Other frequent requests for interpretation include the Vietnamese, Somali, Amharic, Tigrinya, Cantonese, Mandarin, Russian, Punjabi, and Arabic languages.

To improve services in languages where state certification is not yet available, the Court designed and implemented a mentoring program for non-credentialed and Registered court interpreters. This is the first program of its kind in Washington State and helps ensure quality interpretation services for all LEP individuals. In 2018, Interpreter Services also designed, tested and implemented video remote interpreting via VSee for some mitigation hearings. SMC Interpreter Services developed Bench Card Courtroom Interpreting for Spoken Languages, which has been approved by the Supreme Court Interpreter Commission to be used by judges statewide.

Budget Overview

The 2020 Proposed Budget provides resources to enable the Court to continue to adjudicate criminal cases, citations and infractions.

A priority for the Court is to continue preparing for the replacement of the Municipal Court Information System (MCIS). MCIS is over 27 years old and was developed internally using the legacy IBM Informix platform to capture key court case events and meet the reporting requirements of the state's Administrative Office of the Courts (AOC). Over time, the Court has enhanced this system to provide important case management information, increased application functionality and improved data exchanges and public access. The Court and the City are highly dependent on MCIS to provide a continuing, permanent record of court case events, dates, hearings and outcomes. MCIS also tracks defendant compliance with court ordered sanctions and tracks all related fines and fees. Data related to the collection of \$47 million in fines and fees from the Seattle Police Department's parking and traffic ticket devices are highly dependent on MCIS. Daily data exchanges with the City of Seattle departments, King County and the State of Washington agencies rely on MCIS fully functioning with modern technology capabilities.

This project, began in 2015, is included in the Seattle Information Technology Department (Seattle IT) Capital Improvement Program, as part of the Criminal Justice Information System Replacement Project, with an estimated total cost of \$41 million over six years.

Schedule and Milestones:

1. 2017: \$2.5 million was appropriated to Seattle IT to conduct an options analysis comparing available options, vendor demonstrations, and conduct research for information on technology capabilities, while concurrently documenting MCIS current business practices and requirements.
2. 2018: \$5 million was appropriated to develop an RFP, data preparation, business process engagement and organizational change management.
3. 2019: \$3 million was appropriated to finalize an RFP, evaluate proposals, specific vendor demonstrations and interviews fit gap analysis and contract negotiations.
4. 2020: \$8.3 million appropriations proposed with the vendor on board.

Implementation will continue through 2020-2021 with a go-live date in January 2022.

Seattle Municipal Court

Elected state, superior and district court judicial salaries are set by the Washington Citizen's Commission on Salaries for Elected Officials. By Ordinance 122112, SMC judicial salaries are set at 95% of the district court. A final salary schedule and wage increase was mandated effective July 2019 and the budget will fund this increase. Additionally, setting SMC judicial salaries at this level qualifies the City to receive a contribution from the state for technology improvements at SMC per the aforementioned ordinance.

In 2019, the Mayor convened the High Barrier Individuals Working Group, an interagency group including King County, in response to heightened community conversations around public safety and individuals repeatedly caught in a cycle of criminal justice, social services and community incidents. The group explored new strategies, system reforms or partnerships needed for a more focused approach to repeat offenders who are not receiving appropriate interventions. The group developed four new pilot programs to address these issues including the HB Probation pilot program that will feature a smaller, specialized caseload for SMC probation counselors to assist those high barrier individuals with court interactions, chemical dependencies and other issues. There are funds set aside in Finance General for these pilots as well as additional funding coming from the Municipal Court funds.

Total Incremental Changes	\$2,093,699	-
Total 2020 Proposed Budget	\$36,306,601	215.10

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$1,761,439

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$26,556

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$276,506

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to

Seattle Municipal Court

improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Technical

2020 Judicial Salary Technical Adjustment

Expenditures	\$29,198
--------------	----------

In Washington state, elected state, superior and district court judicial salaries are set by the Washington Citizen's Commission on Salaries for Elected Officials. As directed in Ordinance 122112, Seattle Municipal Court judicial salaries are set at 95% of the district court. A final salary schedule and wage increase was mandated effective July 2019 which the Court will absorb within their 2019 budget. The Proposed 2020 Budget funds the 2019 ongoing increase. Additionally, setting SMC judicial salaries at this level qualifies the City to receive a contribution from the state for technology improvements at SMC. The state's contribution is generally \$150,000 annually and is applied to the Trial Court Improvement Account in Finance General. The Ordinance permits appropriation, by annual budget or by separate ordinance, solely to fund allowable Seattle Municipal Court related expenditures".

Seattle Police Department

Carmen Y. Best, Chief of Police

(206) 684-5577

<http://www.seattle.gov/police/>

Department Overview

The Seattle Police Department (SPD) prevents crime, enforces laws, and enhances public safety by delivering respectful, professional, and dependable police services. SPD divides operations into five precincts. These precincts define east, west, north, south, and southwest patrol areas, with a police station in each area. The department's organizational model places neighborhood-based emergency response services at its core, allowing SPD the greatest flexibility in managing public safety. Under this model, neighborhood-based personnel in each precinct assume responsibility for public safety management, primary crime prevention and law enforcement. Precinct-based detectives investigate property crimes and crimes involving juveniles, whereas detectives in centralized units located at SPD headquarters downtown and elsewhere conduct follow-up investigations into other types of crimes. SPD also has citywide responsibility for enhancing the City's capacity to plan for, respond to, recover from, and reduce the impacts of a wide range of emergencies and disasters, under the auspices of the Office of Emergency Management. Other parts of the department function to train, equip, and provide policy guidance, human resources, communications, and technology support to those delivering direct services to the public.

Police Chief Carmen Best has adopted a set of policing priorities that will guide the department through the next phase of the Consent Decree and establish a culture of continuous improvement and innovation:

- **Reduce Crime and Disorder** - Improve public safety by effectively addressing crime and disorder.
- **Service Excellence** - Strive for excellence in service, to better foster trust, support and understanding in the communities we serve.
- **Honor and Professionalism** - Serve with honor, professionalism and pride.
- **Business Efficiency** - Increase business efficiency through better utilization of the resources we have, effective management of the budget and process improvements.
- **Data-Driven Policies and Practices** - Use data-driven policies and best practices to improve deployments, and monitor and respond to emerging crime trends.

In 2018, SPD was found to be in “full and effective compliance” with court-ordered reforms set forth in the 2012 U.S. Department of Justice (“DOJ”) Settlement Agreement (“Consent Decree”). Following this announcement, the department immediately entered into a two-year sustainment period, wherein SPD must demonstrate its sustained compliance with the Consent Decree by providing constitutional and effective police services through the continued development and refinement of policies and procedures. In May 2019, the court found the department to be partially out of compliance with the Consent Decree in one area related to accountability. The City is working with the Federal Monitor, DOJ and other stakeholders to respond to the court’s concern.

SPD is committed to recruiting, hiring and training police officers that are representative of the communities it serves. With higher than average attrition and increasing competition for qualified police candidates, the department is implementing new strategies to attract and retain a quality, diverse candidate pool to achieve its hiring goals in 2019 and beyond.

Budget Overview

The 2020 Proposed Budget for the Seattle Police Department (SPD) reflects the City's commitment to protecting public safety, strengthening community trust and enhancing responses to individuals in crisis. Over the last year, Chief Carmen Best has organized the department to ensure proactive and collaborative policing that enhances the police reform and accountability work that has been ongoing.

Since 2012, SPD has been under a federal Consent Decree with the U.S. Department of Justice (DOJ) and has been working with the Federal Monitor to meet the requirements and implement reforms. In January 2018, the U.S. District Court Judge overseeing the Consent Decree ruled that the SPD had fully complied with the first phase of the agreement, which initiated a second phase of the agreement a two-year sustainment period. During the sustainment period, SPD continues to demonstrate compliance with the Consent Decree before it can be terminated. In May 2019, the court issued a ruling that found the department partially out of compliance in one area – accountability. The City is working with DOJ, the Federal Monitor and other stakeholders to address the court's concern in this one area.

In developing the 2020 Proposed Budget, the Mayor worked closely with SPD to prioritize funding for safe and healthy communities. The hiring and retaining of sworn officers will continue to be the top priority in 2020, while providing funding for additional community-based emphasis patrols will help to address public safety needs. SPD's budget reflects targeted investments in the Mayor's priority areas, including:

- proactive community policing and supporting officer recruitment and retention;
- responding to a behavioral and public health crisis;
- strategic crime prevention and diversion; and
- supporting the department's community engagement and policing initiatives.

Proactive Community Policing and Supporting Officer Recruitment and Retention

Ongoing Police Officer Recruitment and Retention

The budget supports the department's ongoing efforts to recruit and hire quality, diverse police officers in 2020 above current staffing levels. It is important to both Chief Best and the Mayor to focus on building a department that represents the community it serves. Recognizing the significance of hiring diverse police officers and understanding that the current hiring plan is aggressive, the budget includes continued funding in support of recruiting efforts. The department piloted new recruitment and hiring approaches through 2019 including offering a hiring incentive and

Seattle Police Department

expanding recruitment locations. At the same time, the Mayor convened a Recruitment and Retention workgroup (“workgroup”) comprised of staff from the City’s Innovation & Performance team, SPD, Seattle Department of Human Resources, City Budget Office, the City Council and others. The workgroup studied why new hires and overall sworn officer counts are declining and identified short- and long-term strategies to improve outcomes. The workgroup proposed the implementation of 12 initiatives across the below areas to address the challenges that SPD faces when meeting its service goals:

- **Recruitment:** three initiatives that seek to increase the number and diversity of applicants;
- **Hiring:** four initiatives that seek to increase the efficiency and effectiveness of the hiring process; and
- **Retention:** five initiatives that seek to retain our talented, well-trained staff.

The 2020 Proposed Budget funds all these initiatives, and a strategic hiring and retention plan is being developed to operationalize and measure success of each initiative. The department’s ability to hire and retain officers will be closely tracked by the department and the Executive over the coming years, as many unknown variables will impact the ability to achieve goals. A new workgroup will be convened to track progress and determine the efficacy of the initiatives.

Focus on Proactive Community Policing

Under Chief Best, SPD is strengthening its community outreach and community-based policing efforts. Previous budgets included funding for the development of a community liaison program and a Community Service Officer (CSO) program. The proposed budget includes funding for expansion of the CSO program to all precincts in the City. This program becomes part of the newly formed Collaborative Policing Bureau which also includes the Navigation Team, the Crisis Response Unit and the Community Outreach Units. Consolidation of these units ensures a consistent and coordinated response to some of our most vulnerable community members.

The 2020 budget will include funding to continue community-based emphasis patrols at similar levels to 2019. In April 2019, based on community feedback and data analysis by SPD, emphasis patrols began in seven Seattle neighborhoods to improve public safety. Emphasis patrols are a recognized practice in police departments across the country and an evidence-based strategy to fight crime. Continuation of these patrols will build on the positive results to-date which included hundreds of contacts with individuals and increased visibility by SPD officers. Continuing evaluation will determine future deployments.

Responding to a Behavioral and Public Health Crisis

The department continues to use data to better prioritize an effective response to public safety calls. In 2018, 9-1-1 calls for individuals in crisis grew by 28% to 11,430 crisis calls. The Crisis Response Unit (CRU) specifically focuses on individuals who, due to mental health issues, are likely to cause harm to themselves or others and/or frequently contact 9-1-1. Officers deploy to these situations in a co-responder model with Mental Health Providers (MHPs). Currently there are five officers and one MHP in the unit. The 2020 Proposed Budget adds four MHPs so that each officer in the unit has a co-responder and teams can focus on one precinct leading to better relationships with service providers and individuals who are in crisis.

Strategic Crime Prevention and Diversion

Diverting individuals from the criminal justice system continues to be a goal for Mayor Durkan. Many programs work directly in partnership with law enforcement to achieve these goals such as Law Enforcement Assisted Diversion (LEAD), youth violence prevention programs, the community police academy and community advisory groups.

Through the 2020 Proposed Budget, two successful diversion programs will be expanded. Choose 180 is a pre-trial diversion program that works to end youth detention and is administered by the City Attorney’s Office. The program expansion will double the number of classes for young adults allowing for monthly offerings serving an additional 100 young adults per year. To further invest in directed community outreach programs, the 2020 Proposed Budget will create a dedicated Native American community liaison to provide culturally responsive services to Indigenous communities navigating the criminal legal system.

Seattle Police Department

Continuing Investments in Police Reform and Accountability

The 2020 Proposed Budget expands activities pertaining to sustainment of the federal consent decree, reinforcing implemented reforms and investing in accountability structures within the department. This budget adds capacity to the Office of Police Accountability (OPA) by adding a civilian investigator to the office who will work closely with the public to investigate constituent complaints about policing and decrease the backlog of investigations. This brings the total number of investigators to nine sworn and two civilian staff. The budget also accelerates the schedule for providing implicit bias training for all officers.

Invest Wisely in SPD's Future

This budget includes investment in a critical piece of department infrastructure that is due for replacement, the Computer-Aided Dispatch System (CAD) which routes all SPD 9-1-1 calls to officers in the field. The CAD replacement will ensure that more complete data can be provided to officers ensuring a more efficient response.

Seattle Police Department

Description of Incremental Budget Changes

Baseline

Budget Realignment with Actual Costs

Expenditures \$(6,178,689)

This is a technical adjustment to realign the 2020 SPD salary, benefit and overtime budget appropriation to reflect for delays in hiring in 2019 that impact 2019 expenditures.

Mental Health Professionals

Expenditures \$310,000

This adjustment funds 4 additional, contracted Mental Health Professionals (MHP) in the SPD Crisis Response Unit (CRU). The CRU, which is currently staffed with one MHP, works to connect individuals in crisis to resources to help address their physical and mental health needs and divert them from the criminal justice system. The addition of four MHPs would greatly expand the department's ability to work with community members before they reach acute stages of behavioral crisis. Each MHP-Officer team will focus on a precinct.

Abrogate vacant position

Position Allocation (1.00)

This item removes a position for a Management Systems Analyst, Senior, for the Parking Enforcement Unit.

Supplemental Changes to Baseline

Position Allocation 4.00

This adjustment reflects changes made through supplemental budget legislation since the last adopted budget. Supplemental budget legislation is developed by the Executive and adopted by the City Council three times a year to provide corrections to the adopted budget, unforeseen changes in circumstance, new funding opportunities or new policy priorities. These changes may include additions or reductions in appropriations and FTEs. Included in this adjustment are two position additions for the Legal Unit which provides support for public disclosure and case evidence, one position addition for civilianization of SPD's Equal Employment Opportunity (EEO) Investigator position and one addition of a grant-funded position.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$4,087,448

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$320,211

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Seattle Police Department

Citywide Adjustments for Standard Cost Changes

Expenditures \$1,665,027

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Recruitment and Retention Initiatives

Expenditures \$1,663,683

Position Allocation 1.00

The City's Innovation & Performance team created a work group that developed strategies to increase recruitment and retention of sworn officers. Through interviews, surveys and interactions with officers, the team accepted over 1,000 ideas of ways to increase retention of current officers and increase hiring of new recruits and experienced officers. Twelve recommendations will be enacted by SPD as part of a strategic hiring and recruitment plan. This item funds all 12 recommendations and includes a project manager to oversee the first year of implementation, a training specialist to implement retention strategies and increased administrative staff support for the recruitment team.

Implicit Bias Training for SPD Officers

Expenditures \$100,000

This item is a one-time transfer of budget from Finance General to the Seattle Police Department for all officers to receive implicit bias training from a national expert. Implicit bias is the subconscious form of group-based bias. The training will include an overview of implicit bias research and findings, interactive and introspective exercises and small group dialogue.

Sworn Officer Hiring Incentive

Expenditures \$813,750

SPD has experienced significant difficulty in recruiting both experienced and new police officers. To incentivize individuals to become a police officer with SPD, City Council passed Ordinance 125784 authorizing SPD to grant hiring bonuses of \$15,000 to experienced officers and \$7,500 to new recruits. This item will fund the hiring incentive through 2020 for 20 experienced officers and 84 new recruits.

Emphasis Patrols and Force Augmentation

Expenditures \$847,863

In 2019 multi-department, community-based emphasis patrols were effective in engaging with community members to highlight locations or issues that required attention, maintenance or police patrols. In 2020 SPD plans to continue this work using overtime shifts. Overtime will also be used to augment the force to ensure that SPD can maintain minimum staffing and target response times throughout the city.

Seattle Police Department

Expand the Community Service Officer Program

Expenditures	\$1,208,700
Position Allocation	6.00

This item adds one team of Community Service Officers (CSO) to SPD's Collaborative Policing Bureau. The five officers and supervisor will expand the CSO team to a total of 18 which will allow the teams to be based in precincts and provide service seven days per week with an expansion of hours until 8:00 p.m. CSOs are non-commissioned officers who work as liaisons between the community and SPD. They serve to bridge the service gap on non-criminal calls for service and perform a variety of public safety-related community service and outreach work that does not require the enforcement authority of a sworn officer. CSOs will also help augment the police force and potentially provide a pathway for individuals interested in policing but not ready to become a sworn officer.

Add Native American Liaison

Position Allocation	1.00
---------------------	------

To further invest in community-based policing, this item adds one Crime Prevention Coordinator to SPD's Collaborative Policing Bureau who will be a dedicated Native American community liaison to provide culturally responsive services to Indigenous communities navigating the criminal legal system.

Civilian Investigator in the Office of Police Accountability

Expenditures	\$148,832
Position Allocation	1.00

The Office of Police Accountability (OPA) establishes and manages processes to initiate, receive, classify and investigate allegations of police misconduct. This item transfers budget from Finance General to OPA to add a full-time civilian investigator to the office. Civilian investigators receive complaints of misconduct from the public and investigate those complaints. OPA is currently budgeted for nine sworn investigators and one civilian investigator.

Earthquake Early Warning

Expenditures	\$(10,000)
--------------	------------

This item reduces the Office of Emergency Management budget by \$10,000 to offset an increase in Seattle IT rates to SPD for a project in the Innovation Advisory Council portfolio: Earthquake Early Warning.

School Zone Camera Expansion

Expenditures	\$170,908
--------------	-----------

Seattle Department of Transportation (SDOT) is proposing to expand the School Zone Camera program by up to five new school zone enforcement locations. The expansion would result in the increase of up to 10 new enforcement cameras. Each violation that is recorded by the cameras must be reviewed by a sworn officer. This item increases the budget for officer overtime and professional services necessary to review potential violations.

CAD Replacement

Expenditures	\$2,675,343
Revenues	\$1,415,650

Seattle Police Department's Computer Aided Dispatch (CAD) system was implemented in 2008. The system manages the in-flow of calls to SPD's 9-1-1 center and ensures that the calls can get to officers in the field with the relevant caller information relayed to patrol officers. The current CAD system has not been updated to take advantage of new technologies such as Next Generation 9-1-1 systems that integrate information from cell phone data for a

Seattle Police Department

faster, more accurate 9-1-1 response.

Upgrading the CAD system will allow police officers to respond more quickly and will provide resiliency and redundancy to the 9-1-1 system, especially in disaster situations. A new CAD system will also integrate with a variety of SPD systems to allow for in-depth lookup capabilities by dispatchers and officers.

The total project cost for 2020 is \$3.2 million. The project is funded by \$550,000 of fund balance from the New Records Management System project, \$1.4 million in funding from the E-9-1-1 levy and approximately \$1.3 million of General Fund appropriation.

Proposed Technical

Budget Restructuring

Expenditures

-

This technical item aligns SPD's budget structure to its organizational structure. Two new BSLs are created, Collaborative Policing Bureau and School Zone Camera Program to better reflect SPD operations and align the budget to where the actual expenditures are occurring. The Collaborative Policing Bureau combines the navigation team, community outreach, the crisis response unit and community service officers into a single bureau. The purpose of the School Zone Camera Program BSL is to support operations and administration for the School Zone Camera program. Six precinct BSLs are combined into the single Patrol Operations BSL, and five investigations BSLs are combined into the single Criminal Investigations BSL. This change will allow for improved budget tracking, improved expenditure monitoring, greater transparency and compliance with citywide accounting practices. This request is cost neutral and only updates budget organization to reflect the current operational structure. This change does not affect deployment of personnel or resources.

Police Relief and Pension

Dan Oliver, Executive Secretary

(206) 386-1286

<http://www.seattle.gov/policepension/>

Department Overview

The Police Relief and Pension Fund (PPEN) provides pension and medical benefit services to eligible active and retired police officers and their beneficiaries. PPEN is a closed plan which only covers police officers who were hired before October 1, 1977. Retiree benefits for police officers hired more recently are primarily covered through a separate state-managed plan.

The management of police benefits funds transitioned in the 1970s from local to state control. Prior to that time, the City paid into PPEN to provide for police officer retiree benefits. In March 1970, the State of Washington took over the provision of certain police pensions through Revised Code of Washington (RCW) Section 41.26, the Law Enforcement Officers and Fire Fighters (LEOFF) Plan 1. Seattle police officers hired between March 1970 and October 1977 enrolled in LEOFF 1, but also received additional benefit coverage through PPEN. As a result, this group of police officers receives retiree benefits primarily from the state's LEOFF 1 plan, but also any earned increment from the City's PPEN that exceeds LEOFF 1 coverage. Both PPEN and LEOFF 1 closed to new enrollees in October 1977. Police officers hired after that date enroll in the state's LEOFF 2 plan and do not receive benefits from PPEN.

The Seattle Police Pension Board is a seven-member quasi-judicial body chaired by the Mayor or the Mayor's designee, which formulates policy, rules on disability applications, and provides oversight of the Police Pension Fund. Three staff employees of the board handle all of its operational functions. Staff positions associated with Police Relief and Pension are reflected in the City's position list.

The projections of annual pension and medical benefits, which comprise about 97% of the total annual PPEN budget, are based on the forecasts of an independent actuary. The City's General Fund provides funding for nearly all of PPEN's annual budget that supports the Police Relief and Pension Fund obligations. The Police Pension Fund also has a statutory funding source from police auction proceeds, which contribute a small amount towards the annual budget.

Police Relief and Pension

Budget Overview

The Police Relief and Pension Fund (PPEN) pays legally mandated pension and medical benefits, including long-term care, to eligible retired police officers and qualified beneficiaries. The total pension benefits for PPEN members are increased annually through locally negotiated cost of living adjustments (COLA) and local inflation. These increases are then offset by the benefits paid by the state's LEOFF 1 pension plan which has its own annual growth rate.

Most of PPEN's retirees are represented by either the Seattle Police Management Association (SPMA) or the Seattle Police Officer's Guild (SPOG).

The 2020 Proposed Budget's retiree medical and long-term care costs are \$15.38 million, unchanged from the 2019 Adopted Budget. The actuarial report anticipates medical and long-term care costs will increase over the next 15 to 20 years due to PPEN's aging membership and annual trend rates for medical and long-term care costs.

The 2020 Proposed Budget includes appropriation increases of \$43,513 for centrally adjusted administrative and labor costs.

Incremental Budget Changes

Police Relief and Pension

	2020 Budget	FTE
Total 2020 Endorsed Budget	26,589,761	3.00
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	39,781	-
2020 State Paid Family Medical Leave Increase Base Budget	607	-
Citywide Adjustments for Standard Cost Changes	3,125	-
Total Incremental Changes	\$43,513	-
Total 2020 Proposed Budget	\$26,633,274	3.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$39,781

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Police Relief and Pension

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$607

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$3,125

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Seattle City Light

Debra Smith, General Manager & CEO

(206) 684-3500

<http://www.seattle.gov/light/>

Department Overview

Seattle City Light was created by the residents of Seattle in 1902 to provide affordable, reliable, and environmentally sound electric power to the City of Seattle and neighboring suburbs. Owned by the community it serves, City Light is a nationally recognized leader in energy efficiency, renewable resource development, and environmental stewardship.

City Light provides electric power to approximately 462,000 residential, business, and industrial customers within a 131-square-mile service area. City Light provides power to the City of Seattle and surrounding jurisdictions, including parts of Shoreline, Burien, Tukwila, SeaTac, Lake Forest Park, Renton, Normandy Park, and areas of unincorporated King County.

City Light owns about 2,000 megawatts of very low-cost, environmentally-responsible, hydroelectric generation capacity. In an average year, City Light meets about 50% of its load with hydroelectric facilities that it owns directly and obtains the remainder primarily through the Bonneville Power Administration (BPA). City Light is the nation's ninth largest publicly-owned electric utility in terms of customers served.

Seattle City Light

Budget Overview

The 2020 Proposed Budget for Seattle City Light (SCL) reflects the priorities outlined in the department's 2019-2024 Strategic Plan and follows the plan's rate path, which includes a rate increase of 5.4% in 2020. The proposed budget does not vary significantly from the 2020 Endorsed Budget; the differences are primarily attributable to several net-zero adjustments between programs and an overall funding increase for revenue-backed work related to pole attachments for the 5G network.

The most noteworthy net-zero adjustment is the use of projected underspend to fund the expansion of transportation electrification programs. Funding will be used for additional electric vehicle fast-charging stations; incentives for industrial vehicle customers; and infrastructure for King County Metro's new fleet of electric buses.

The 2020 Proposed Budget also incorporates a reorganization of City Light's operational structure that was implemented in April of 2019. This reorganization was intended to encourage greater creativity, innovation and collaboration, and to streamline working groups to achieve greater focus on priority areas. No additional resources were required and there were no changes to staffing levels.

City Light's 2020 Capital Improvement Program (CIP) budget includes the year-to-year reprioritization of projects but does not change the overall budget, except for the 100% revenue-backed increase for pole attachment work. For more detailed information on the capital program, please see the 2020-2025 Proposed CIP.

To support the capital program and other eligible City Light costs, the 2020 Proposed Budget anticipates a 2020 bond issue of approximately \$225 million.

Seattle City Light

Incremental Budget Changes

Seattle City Light

	2020 Budget	FTE
Total 2020 Endorsed Budget	1,421,574,537	1784.80

Total Incremental Changes	\$11,412,857	8.00
Total 2020 Proposed Budget	\$1,432,987,392	1792.80

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$5,324,186

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$757,236

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Seattle City Light

Citywide Adjustments for Standard Cost Changes

Expenditures \$(151,280)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Transportation Electrification

Expenditures -

This net-zero adjustment uses projected underspend within City Light's Customer Energy Solutions Division to expand transportation electrification programs in the following areas.

City Light already has a project underway to install 20 Direct Current Fast Chargers by the end of 2019. This expansion will add six more stations in 2020, bringing the total to 26.

The utility will also explore ways of enhancing charging options for multi-family residential customers, and they will work with the industrial transportation sector (for example trucking and package delivery companies) to install charging infrastructure for heavy-duty vehicles. Non-passenger vehicles account for approximately one half of vehicle emissions and City Light is exploring ways to help facilitate their transition to electric.

Lastly, City Light is working with King County Metro to design and build a charging facility for electric buses (Metro expects to receive 110 all-electric buses in 2021). City Light applied for a \$2 million matching grant from the Washington State Department of Commerce and if awarded, the department would set up a new capital project for this work.

Pole Attachment Contract-In Position Conversions

Position Allocation 8.00

City Light had been utilizing citywide contract-in positions for two Senior Capital Project Coordinators and five Electrical Engineer Associate IIIs to carry out pole attachment work. These positions are approaching the three-year limit for temporary assignments and this item converts the positions to permanent City Light staff. Funding for the positions already exists in the budget. The pole attachment body of work has continued to expand in recent years and the forecast is for continued growth, as telecommunications companies look to deploy 5G networks. Additionally, this item adds an unfunded Strategic Advisor I to assist with data analytics and accountability.

Annual Capital Spending Adjustments

Expenditures \$9,232,865

The CIP Overview BIP provides explanations for changes in the Capital Improvement Program (CIP) due to the normal refinement of work schedules and the ongoing reprioritization of capital work. This BIP highlights the 2020 changes in the current biennium and the 2021-25 changes in the remainder of the six-year CIP.

Seattle City Light

Technical Adjustments

Expenditures	\$(3,750,150)
--------------	---------------

This request includes net-zero technical adjustments for central costs, security costs, and labor agreement increases, as well as a change in the budget treatment of engineering overhead. These adjustments are consistent with the Strategic Plan and proposed rates.

Appropriations by Budget Summary Level and Program

SCL - BC-CL-W - Financial Services - CIP

The purpose of the Financial Services - CIP Budget Summary Level is to provide for the capital costs of rehabilitation and replacement of the utility's financial systems and information technology infrastructure, and the development and implementation of large software applications. This Budget Summary Level supports capital projects identified in the department's Capital Improvement Plan.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
FINANCE AND IT SYSTEMS	8,042,903	2,722,196	2,785,613	-
Total	8,042,903	2,722,196	2,785,613	-
Full-time Equivalents Total*	10.71	10.71	10.71	10.71

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SCL - BC-CL-X - Power Supply & Environ Affairs - CIP

The purpose of the Power Supply & Environmental Affairs - CIP Budget Summary Level is to provide for the capital costs of maintaining the physical generating plant and associated power license and regulatory requirements. This Budget Summary Level supports capital projects identified in the department's Capital Improvement Plan.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
BOUNDARY	41,220,107	48,736,444	58,041,918	51,276,288
CEDAR FALLS - TOLT	3,169,185	4,856,149	4,764,144	5,678,484
FLEETS AND FACILITIES	12,146,511	18,530,342	24,072,512	25,718,153

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Customer Focused - CIP Budget Summary Level:

CUSTOMER AND BILLING

The Customer and Billing program provides the funding to support a portion of the customer billing functions at the utility and to fund City Light's customer call center improvement program.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CUSTOMER AND BILLING	692,605	64,152	209,434	603,918

CUSTOMER IT SYSTEMS

The Customer IT Systems program provides for the capital costs of rehabilitation and replacement of the utility's customer information technology infrastructure, and the development and implementation of large software applications. This program supports capital projects identified in the department's Capital Improvement Plan.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CUSTOMER IT SYSTEMS	-	-	-	1,957,029

Seattle City Light

CUSTOMER OTHER

The Customer Other program provides funding to support the customer service engineering program and the Neighborhood Voluntary Undergrounding program.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CUSTOMER OTHER	127,445	1,192,904	336,133	330,095
Full Time Equivalents Total	0.13	0.13	0.13	0.13

LOCAL JURISDICTIONS

The Local Jurisdictions program funds the capital costs for projects in local jurisdictions requiring utility services or relocations.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
LOCAL JURISDICTIONS	6,477,782	13,777,159	22,349,849	22,288,874
Full Time Equivalents Total	5.32	5.32	5.32	10.32

SERVICE CONNECTIONS

The Service Connections program funds the capital costs of customer service connections and meters.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
SERVICE CONNECTIONS	113,013,546	50,458,448	47,620,851	60,446,156
Full Time Equivalents Total	42.66	42.66	42.66	42.66

TRANSPORTATION RELOCATIONS

The Transportation Relocations program funds the capital costs for large inter-agency transportation projects requiring utility services or relocations.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
TRANSPORTATION RELOCATIONS	25,752,238	30,074,986	28,618,796	28,487,607

Total	89,930,640	95,451,254	25,451,034	29,143,428
Full-time Equivalents Total*	341.39	319.89	312.39	312.39

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration - General Manager Budget Summary Level:

CHIEF OF STAFF O&M

The Chief of Staff O&M program provides support for the Chief of Staff.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CHIEF OF STAFF O&M	1,278,600	-	4,737,998	5,012,620

GENERAL MANAGER ADMIN O&M

The General Manager Administration O&M program provides administrative support for staff working in the areas of customer service, communication, and governmental affairs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
GENERAL MANAGER ADMIN O&M	8,973,322	12,273,783	6,510,646	6,863,070
Full Time Equivalents Total	47.24	46.24	46.24	46.24

GENERAL MANAGER OPS O&M

The General Manager Operations O&M program provides the operational support to carry out the customer service and communications functions.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
GENERAL MANAGER OPS O&M	79,678,718	83,177,471	14,202,390	17,267,739
Full Time Equivalents Total	294.15	273.65	266.15	266.15

Seattle City Light

SCL - BO-CL-D - Debt Services

The purpose of the Debt Service Budget Summary Level is to meet principal repayment and interest obligations on funds borrowed to meet City Light's capital expenditure requirements.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
DEBT SVS OPS	209,018,057	230,449,286	240,913,369	240,913,369

Seattle Public Utilities

Mami Hara, General Manager & CEO

(206) 684-3000

<http://www.seattle.gov/util/>

Department Overview

Seattle Public Utilities (SPU) provides reliable, efficient and environmentally conscious utility services to enhance the quality of life and livability in all communities SPU serves. SPU operates three distinct utilities: Drainage and Wastewater, Solid Waste and Water. The three utilities each have unique revenue sources and capital improvement projects but share many operations and administration activities within SPU and the City.

Drainage and Wastewater: The Drainage and Wastewater Utility collects and disposes or discharges storm runoff and wastewater from residences, businesses, institutions and public properties within the City. In addition to handling sewage and storm water runoff, Drainage and Wastewater works with other government agencies and private parties to address Federal EPA-mandated sediment cleanup projects where contamination is linked to storm water or sewage, such as Gas Works Park and the Lower Duwamish Waterway. The drainage and wastewater systems include approximately 448 miles of separated sanitary sewers, 968 miles of combined sewers, 481 miles of storm drains, 68 pump stations, 85 permitted combined sewer overflow outfalls, 290 storm drain outfalls, 578 water quality structures, 295 drainage flow control facilities, and 38 combined sewer overflow control detention tanks and pipes.

Solid Waste: The Solid Waste Utility collects and processes recycling, compostables, and residential and commercial garbage to promote public health and safety, quality of life, and environmental stewardship. The City owns and operates two transfer stations, two household hazardous waste facilities, a fleet of trucks and heavy equipment, and several closed landfills. The Solid Waste Capital Improvement Plan (CIP) supports the transfer stations, heavy equipment, and post-closure projects on landfills previously used by the City. In addition, SPU contracts with private companies who collect household refuse, compostable material, and recyclables. The companies deliver the material to recycling and composting facilities and to transfer stations for its ultimate processing or disposal. In concert with its waste handling and disposal activities, Solid Waste engages its customers in environmental sustainability programs that promote recycling, composting and reducing waste generation. Solid Waste also works to keep Seattle clean, by targeting illegal dumping, automobile abandonment, graffiti removal and providing public litter cans and recycling bins across Seattle.

Water: The Water Utility provides reliable, clean, and safe water to more than 1.5 million customers in and around Seattle for consumption and other uses. The water delivery system extends from Edmonds to Des Moines and from Puget Sound to Lake Joy near Duvall. SPU delivers water directly to its customers in Seattle and adjacent areas and provides wholesale water to 21 suburban water utilities and two interlocal associations for distribution to their customers. The Water Utility includes 1,900 miles of pipeline, 31 pump stations, 15 treated water reservoirs, three wells and 104,000 acres in two watersheds. The Utility builds, operates and maintains the City's water infrastructure to ensure system reliability, conserve and enhance the region's environmental resources and protect public health and safety. SPU engages the community in conservation efforts to reduce water consumption.

SPU monitors its funds using financial targets and employs these metrics to communicate about the financial health of its utilities with the Mayor and City Council, Seattle residents and businesses, and the bond rating agencies. Financial performance metrics include net income; year-end cash balance; the amount of cash versus debt dedicated to the CIP; debt service coverage, which is the amount of cash available to pay annual debt service after day-to-day system expenses are paid; and, for the Drainage and Wastewater Fund, the debt to asset ratio. Due to strong financial management and a commitment on the part of elected officials to establishing prudent rates, SPU has some of the strongest bond ratings of any utility in the country. SPU's Water and Drainage and Wastewater bonds are rated one notch below the highest rating by both S&P (AA+) and Moody's (Aa1), while Solid Waste bonds, which traditionally are viewed as riskier by ratings agencies, are just slightly lower and still categorized as High-Grade High Quality bonds (AA and Aa3 from the two agencies, respectively). These high ratings help SPU sell revenue bonds to

Seattle Public Utilities

fund infrastructure investments at the lowest costs possible. These lowered costs benefit the utilities and the rate payers they serve.

Budget Overview

The 2020 Proposed Budget for Seattle Public Utilities (SPU) largely reflects the 2020 Endorsed Budget that was developed in 2018 and continues to support key initiatives and service levels identified in the 2018-2023 Strategic Business Plan. The 2020 Proposed Budget also provides budget corrections based on financial planning information, and includes changes reflected in capital planning. The net impact of these changes reduces SPU's 2020 Proposed Budget by \$44.7 million.

Strategic Business Plan Overview

In 2017, the City adopted the 2018-2023 SPU Strategic Business Plan that guides the department's operations and investments for the six-year period from 2018-2023. A nine-member customer panel oversaw the development of the plan. The plan sets a transparent and integrated direction for all SPU utilities and contains projected six-year rate paths for water, drainage, wastewater, and solid waste lines of business. The adopted rate of growth across all lines of business is 5.2% annually.

In 2020, SPU will continue with programmatic reprioritization, efficiency improvements, and refinement of the CIP and operating budgets outlined in the plan to streamline utility services and deliver on regulatory requirements. SPU will create 9 new positions, including 6.0 FTEs to support financial services and 3.0 FTEs to support ongoing operations at solid waste transfer stations.

Drainage and Wastewater Highlights

The City adopted Drainage and Wastewater Rates in 2018 that reflected decreased expenditures in the Strategic Business Plan. Drainage rates will grow by 8.0% each year for the three-year period from 2019-2021. Wastewater rates will grow 7.5%, 7.4%, and 7.3% in 2019, 2020, and 2021 respectively. These rates include an estimate of a 2.8%

Seattle Public Utilities

increase in the King County treatment rate in 2021; actual 2021 rate increases may vary based on the actual King County treatment rate that is passed through to customers.

Efficiencies, Reductions, and Deferrals: The 2020 Proposed Budget reduces the Drainage and Wastewater 2020 Endorsed Budget by \$59.5 million, attributable to:

- reducing operating budget by \$19.4 million to reflect various technical changes related to taxes and fees, debt service, central costs, labor-related changes, and miscellaneous reductions;
- deferring \$21.7 million in costs associated with the Ship Canal Water Quality Project;
- deferring \$17.6 million in costs associated with construction on Operational Facilities projects;
- deferring \$8.9 million in costs associated with Move Seattle Levy projects; and
- a net increase of \$8.1 million in costs associated with increases and decreases across 30 capital projects within the Drainage and Wastewater CIP.

None of the efficiencies, reductions, or deferrals are expected to adversely affect services provided to customers or significantly change long-term goals of capital projects.

The 2020-2025 Proposed CIP revises and adds projects based on Combined Sewer Overflow and clean-up efforts, the largest of which is the Ship Canal Water Quality Project. For more information on these changes, please see the accompanying 2020-2025 Proposed CIP.

Water Utility Highlights

The Water Utility delivers potable water directly to retail customers both inside the City and in adjacent areas. These retail customers provide about 72% of the Water Fund's operating revenues, with roughly equal revenues coming from residential and commercial users. SPU also delivers water to districts and agencies who then deliver water to their direct customers. This wholesaling of water represents about 21% of Water's projected operating revenues in 2020. The remaining revenue is generated by non-rate fees and other sources.

The Water line of business has moved away from a period of intensive capital investment in new projects and is transitioning into maintenance and improvements of the existing transmission and distribution system. SPU will continue its efforts to complete reservoir retrofits and covering, water supply and asset preservation projects as detailed in the 2020-2025 Proposed CIP.

The City Council adopted Water Rates for retail customers in 2017 for the 2018, 2019 and 2020 rate period. Adopted Water rate increases for 2019 and for 2020 are under the 2018-2023 updated Strategic Business Plan by 2.5% and 3.7% respectively.

Changes to the Water Fund: The 2020 Proposed Budget increases the Water budget over the 2020 Endorsed Budget by \$12.3 million and includes:

- various technical changes to taxes and fees, debt service, central costs, labor-related changes, and miscellaneous reductions;
- increasing funding for capital projects driven by demand (e.g. water tap installations that follow permit requests for new construction; and
- decreasing funding for capital projects that are deferred or delayed.

For more information on these changes, please see the accompanying 2020-2025 Proposed CIP.

Solid Waste Highlights

The Solid Waste Utility provides collection services to residents and businesses within Seattle. Financial support of this service is primarily generated through charges based on the amount of garbage collected from residential and commercial waste collection contracts. Solid Waste will pursue opportunities for efficiencies in service delivery as it

Seattle Public Utilities

continues to experience decreased demand for services as a result of its conservation efforts to reduce solid waste and increase recycling activity.

SPU transmitted legislation to set Solid Waste Utility Rates for the 2020, 2021, and 2022 period. Solid Waste Rates are effective April 1st each year. Rates submitted for 2020-2022 are consistent with the 2020 Proposed Budget and is informed by the 2018-2023 Strategic Business Plan. The proposed rates include increases of 3.0% in 2020, 2.9% in 2021, and 2.9% in 2022, for an average annual increase of 3.0% over the three year period. This is below the average Solid Waste Rate path assumed in the 2018-2023 Strategic Business plan that assumed average annual increases of 3.4% over the same three-year period.

The Solid Waste Fund expects long-term demand to remain stable, with a small decline in some sectors through 2020.

Changes to the Solid Waste Fund: The 2020 Proposed Budget increases the Solid Waste budget over the 2020 Endorsed Budget by approximately \$871,000 due to revised capital project spending that shifts planned project costs in 2023 and 2024 forwards into 2020.

For more information on these changes, please see the accompanying 2020-2025 Proposed CIP.

Shared Across All Enterprise Funds

SPU corporate functions including leadership and administration, project delivery, and customer service are shared across all three enterprise funds and allocated proportionally. These functions are included individually by fund and each line of business collects enough rate revenues to pay for these costs.

Efficiencies, Reductions, and Deferrals: SPU will reduce budget by \$23.2 million across all three funds, primarily due to:

- \$19.6 million in reduced debt service obligations;
- \$1.5 million in reduced major contracts;
- \$9.1 million in reduced taxes and fees;
- \$5.7 million in increased labor changes; and
- \$1.3 million in increased miscellaneous programs.

Please see the Incremental Change section below for more detail.

General Fund

In addition to the three utility enterprise funds, SPU receives General Fund monies to support activities that go beyond direct utility service provision and support general government services. The General Fund portion of the SPU budget provides resources for:

- the Clean City Program, which addresses public blight issues in Seattle including public litter, illegal dumping, graffiti on public property, and litter issues related to unsanctioned homeless encampments;
- the Trees for Seattle Program (previously called ReLeaf), which works to maintain and increase the urban tree canopy in Seattle; and
- general government functions like maintaining survey markers throughout Seattle, standardizing construction specifications and planning documents, and maintaining engineering records for the city.

Programmatic increases: The 2020 Proposed Budget adds approximately \$1.2 million to the SPU General Fund budget to reflect increasing costs related to disposal and operations for general government garbage and neighborhood clean-up programs, as well as for the Recreational Vehicle Remediation Pilot Program.

Homelessness Investments: The 2020 Proposed Budget will:

Seattle Public Utilities

- maintain existing programs that address litter issues arising from unsanctioned homeless encampments; and
- expand the 2019 pilot to reduce trash and litter from illegally parked recreational vehicles (RVs) in the public right-of-way or on Seattle Parks and Recreation property.

Existing Homelessness Programs: The 2019 Adopted Budget included funding for SPU to continue three programs related to homelessness issues in Seattle. These programs included the Encampment Bag Program, the Litter Abatement Program, and the Needle Program. Under these programs, SPU provided trash removal from encampments, removed litter from the public right-of-way in neighborhoods affected by unsanctioned homeless encampments, and removed used needles from the public right-of-way and installed and serviced public needle disposal boxes throughout Seattle. Since first implementing the programs as pilots in 2017, service levels have expanded. The 2020 Proposed Budget maintains the expanded service levels.

Description of Incremental Budget Changes

Proposed Operating

Accounting and Operational Support

Expenditures	\$840,320
Position Allocation	6.00

This change increases budget in the Leadership and Administration Budget Control Level by \$840,320 in 2020 for the Water Fund, Drainage and Wastewater Fund, and the Solid Waste Fund. This change adds a mix of permanent and temporary labor to support areas in the Seattle Public Utilities (SPU) Accounting Division to address the impact of business process and system changes due primarily from the re-implementation of the financial system conducted in 2018, as well as operational support for data management. Included are the following permanent, ongoing positions: 3.0 FTE Accountants, 1.0 FTE Senior Accountant, 1.0 FTE Principal Accountant, 1.0 FTE Strategic Advisor. In addition, this change adds funding for 3.0 FTE temporary staff.

Seattle Public Utilities

Solid Waste Operations

Expenditures	-
Position Allocation	3.00

This change converts 5.0 FTE term-limited temporary positions to permanent positions in 2020 in order to maintain the current staffing levels at the transfer stations. In addition, position-only authority for 3.0 FTE Laborers and reallocation of two existing vacant positions for 2.0 FTE Laborers is authorized. This change represents a net-zero dollar impact to the utility as a whole; budget already exists for the current temporary labor.

Clean City Disposal Costs

Expenditures	\$1,069,021
--------------	-------------

This change increases the General Fund appropriation in 2020 by \$1,069,021 in the Utility Services and Operations Budget Control Level to pay for increased Clean City program disposal costs, staff support for the RV Remediation pilot to maintain current service levels, and increased professional service costs to support changes in business practices.

RV Remediation Increase

Expenditures	\$116,616
--------------	-----------

This change adds \$116,616 to expand the Recreational Vehicle Remediation Pilot program begun in 2019. This expansion would allow SPU to provide clean-up support to the larger citywide effort, doubling the average number of sites available for remediation from an average of 8 locations to an average of 16 locations per month.

Proposed Capital

Water Capital Changes

Expenditures	\$12,323,340
--------------	--------------

This change increases the Water Fund Core and Shared CIP by \$12,323,340 in 2020. The primary focus is on asset management for distribution and transmission pipes, water system impacts associated with the various Seattle and regional transportation projects, and upgrades to water system facilities such as operation buildings. Please refer to the Water 2020-2025 Proposed Capital Improvement Program for more detail.

Drainage and Wastewater Capital Changes

Expenditures	\$(40,175,697)
--------------	----------------

This change decreases the Drainage and Wastewater Fund (DWF) by \$40,175,697 in 2020 across all Capital Budget Control Levels, and reflects the SPU 2018-2023 Strategic Business Plan, which includes updated regulatory requirements and a joint project with King County to build a Combined Sewer Overflow (CSO) storage facility along the Ship Canal. Please see the Drainage and Wastewater 2020-2025 Proposed Capital Improvement Program for more details.

Solid Waste Capital Changes

Expenditures	\$4,255,064
--------------	-------------

This change increases the Solid Waste Fund by \$4,255,064 in 2020 and shifts various project costs between years for a total reduction of \$690,000 over the 2020-2025 Capital Improvement Program. Changes from the Endorsed 2020 Solid Waste CIP are primarily driven by the South Park landfill redevelopment project as SPU, WSDOT, and Sound Transit negotiate and finalize scope and timeline. Please see the Solid Waste 2020-2025 Capital Improvement Program for more details.

Seattle Public Utilities

Technology Capital Changes

Expenditures -

This change makes no change to the Technology Capital Improvement Program (CIP) in 2020. The total increase for the six-year period of 2020-2025 is \$10,500,000 in out-year spending, resulting from adding an additional year (2025) to the CIP spending plan window. This change also completes a net-zero shift as project timing and needs are projected to change in 2021 and beyond. Please see the Technology 2020-2025 Proposed Capital Improvement Program for more details.

Proposed Technical

Supplemental Budget Changes

Position Allocation 2.00

This technical change implements budget revisions made in the 2019 Quarterly Supplemental Budget Ordinances. Changes in this adjustment include transferring two positions from Seattle Department of Information Technology to Seattle Public Utilities.

Technical Adjustments

Expenditures \$(23,155,445)

Position Allocation 0.75

This change increases SPU's staff resourcing by .75 FTE as SPU requests to convert two part-time positions to full-time positions, as well as reduces SPU's budget by \$23.2 million. This change adjusts various operating budgets in the Water, Drainage and Wastewater, Solid Waste and General Funds. The main drivers of change are:

- updated projections for taxes and fees paid by SPU as a result of lower than projected revenues on which these taxes and fees are based (\$9.1 million reduction);

- a reduction in debt service as SPU's bond issuance needs have been reduced due to improved capital planning and revenue projections (\$19.6 million reduction);
- a major service contract payment reduction as SPU updates projections for future contract expenditures (\$1.8 million reduction);
- an increase in city-wide central costs (\$2.7 million);
- an increase in labor-related and central cost expenses to support the department's share of city-wide central services and labor costs (\$5.7 million increase); and
- increases and reductions in miscellaneous activities (net \$1.1 million reduction).

Appropriations by Budget Summary Level and Program

SPU - BC-SU-C110B - Distribution

The purpose of the Distribution Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade the City's water lines, pump stations, and other facilities.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Distribution	21,589,637	36,177,685	35,328,077	34,136,663
Total	21,589,637	36,177,685	35,328,077	34,136,663
Full-time Equivalents Total*	79.00	79.00	79.00	79.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C120B - Transmission

The purpose of the Transmission Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade the City's large transmission pipelines that bring untreated water to the treatment facilities, and convey water from the treatment facilities to Seattle and its suburban wholesale customers' distribution systems.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Transmission	2,605,160	11,897,836	15,408,573	15,612,322
Total	2,605,160	11,897,836	15,408,573	15,612,322
Full-time Equivalents Total*	5.00	5.00	5.00	5.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C130B - Watershed Stewardship

The purpose of the Watershed Stewardship Budget Summary Level, a Capital Improvement Program funded by water revenues, is to implement projects associated with the natural land, forestry, and fishery resources within the Tolt, Cedar, and Lake Youngs watersheds.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Watershed Stewardship	302,851	1,192,633	173,878	1,289,569
Total	302,851	1,192,633	173,878	1,289,569
Full-time Equivalents Total*	8.00	8.00	8.00	8.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

SPU - BC-SU-C140B - Water Quality & Treatment

The purpose of the Water Quality & Treatment Budget Summary Level, a Capital Improvement Program funded by water revenues, is to design, construct, and repair water treatment facilities and remaining open-water reservoirs.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Water Quality & Treatment	1,076,427	1,660,000	8,830,000	9,525,000
Total	1,076,427	1,660,000	8,830,000	9,525,000
Full-time Equivalents Total*	14.00	14.00	14.00	14.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C150B - Water Resources

The purpose of the Water Resources Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade water transmission pipelines and promote residential and commercial water conservation.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Water Resources	2,788,762	8,372,108	7,271,497	8,464,008
Total	2,788,762	8,372,108	7,271,497	8,464,008
Full-time Equivalents Total*	12.00	12.00	12.00	12.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C160B - Habitat Conservation Program

The purpose of the Habitat Conservation Budget Summary Level, a Capital Improvement Program funded by water revenues, is to manage projects directly related to the Cedar River Watershed Habitat Conservation Plan.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Habitat Conservation Program	1,377,485	3,023,995	1,953,846	3,488,143
Total	1,377,485	3,023,995	1,953,846	3,488,143
Full-time Equivalents Total*	15.00	15.00	15.00	15.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

SPU - BC-SU-C230B - New Facilities

The purpose of the New Facilities Budget Summary Level, a Capital Improvement Program funded by solid waste revenues, is to design and construct new facilities to enhance solid waste operations.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
New Facilities	6,266,584	3,540,947	21,894,979	18,442,478
Total	6,266,584	3,540,947	21,894,979	18,442,478
Full-time Equivalents Total*	9.00	9.00	9.00	9.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C240B - Rehabilitation & Heavy Equipment

The purpose of the Rehabilitation and Heavy Equipment Budget Summary Level, a Capital Improvement Program funded by solid waste revenues, is to implement projects to repair and rehabilitate the City's solid waste transfer stations and improve management of the City's closed landfills and household hazardous waste sites.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Rehabilitation & Heavy Eqpt	251,006	325,000	320,000	8,390,000
Total	251,006	325,000	320,000	8,390,000

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C333B - Protection of Beneficial Uses

The purpose of the Protection of Beneficial Uses Budget Summary Level, a Capital Improvement Program funded by drainage revenues, is to make improvements to the City's drainage system to reduce the harmful effects of storm water runoff on creeks and receiving waters by improving water quality and protecting or enhancing habitat.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Protection of Beneficial Uses	7,113,683	15,564,660	25,835,358	22,273,994
Total	7,113,683	15,564,660	25,835,358	22,273,994
Full-time Equivalents Total*	15.00	14.00	14.00	14.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

SPU - BC-SU-C350B - Sediments

The purpose of the Sediments Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to restore and rehabilitate natural resources in or along Seattle's waterways.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Sediments	4,876,431	3,636,224	4,202,353	3,481,934
Total	4,876,431	3,636,224	4,202,353	3,481,934
Full-time Equivalents Total*	7.00	7.00	7.00	7.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C360B - Combined Sewer Overflows

The purpose of the Combined Sewer Overflow (CSO) Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to plan and construct large infrastructure systems, smaller retrofits, and green infrastructure for CSO Summary.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Combined Sewer Overflows	25,432,288	71,316,167	138,590,582	121,148,094
Total	25,432,288	71,316,167	138,590,582	121,148,094
Full-time Equivalents Total*	30.00	30.00	30.00	30.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C370B - Rehabilitation

The purpose of the Rehabilitation Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to rehabilitate or replace existing drainage and wastewater assets in kind, to maintain the current functionality of the system.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Rehabilitation	27,008,384	45,274,242	36,496,483	40,043,724
Total	27,008,384	45,274,242	36,496,483	40,043,724
Full-time Equivalents Total*	30.00	30.00	30.00	30.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

SPU - BC-SU-C380B - Flooding, Sewer Backup & Landslide

The purpose of the Flooding, Sewer Back-up, and Landslides Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to plan, design and construct systems aimed at preventing or alleviating flooding and sewer backups in the City of Seattle, protecting public health, safety, and property. This program also protects SPU drainage and wastewater infrastructure from landslides, and makes drainage improvements where surface water generated from City rights-of-way contributes to landslides.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Flooding, Sewer Backup & Lndsl	8,901,797	16,029,911	42,734,349	37,252,229
Total	8,901,797	16,029,911	42,734,349	37,252,229
Full-time Equivalents Total*	25.00	25.00	25.00	25.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C410B - Shared Cost Projects

The purpose of the Shared Cost Projects Budget Summary Level, which is a Capital Improvement Program, is to implement the Water, Drainage and Wastewater, and Solid Waste Utility's share of capital improvement projects that receive funding from multiple SPU funds.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Shared Cost Projects	54,060,883	129,345,465	89,769,324	81,663,847
Total	54,060,883	129,345,465	89,769,324	81,663,847
Full-time Equivalents Total*	95.00	95.00	95.00	95.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C510B - Technology

The purpose of the Technology Budget Summary Level, a Capital Improvement Program, is to make use of technology to increase the Water, Drainage and Wastewater, and Solid Waste Utility's efficiency and productivity.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Technology	10,623,764	12,873,000	11,200,000	11,199,999
Total	10,623,764	12,873,000	11,200,000	11,199,999
Full-time Equivalents Total*	41.00	41.00	41.00	41.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

SPU - BO-SU-N000B - General Expense

The purpose of the General Expense Budget Summary Level is to provide for the Utility's general expenses such as debt service, taxes and major contracts.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Budget Reserves	-	4,891,654	8,332,924	8,039,526
Capital Purchases	94,676	225,082	229,583	234,175
Debt Service	166,494,702	179,931,914	199,496,319	179,932,891
Major Contracts	284,791,914	288,635,714	294,038,893	292,235,325
Taxes and Fees	130,393,257	137,269,086	150,863,602	141,778,458
Total	581,774,550	610,953,451	652,961,321	622,220,374

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in General Expense Budget Summary Level:

Budget Reserves

The purpose of the Budget Reserves Program is to appropriate funds to maintain a necessary working reserve for unanticipated expenditures that may develop during the fiscal year. These are important due to the utility need to plan revenue on a six-year horizon.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Budget Reserves	-	4,891,654	8,332,924	8,039,526

Capital Purchases

The purpose of the Capital Purchases Program is to provide appropriation for the utility to purchase equipment that cannot purchased using bond proceeds.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Capital Purchases	94,676	225,082	229,583	234,175

Debt Service

The purpose of the Debt Service Program is to provide appropriation for new bond issuance costs as well as principal and interest payments on previously issued bonds and loans.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Debt Service	166,494,702	179,931,914	199,496,319	179,932,891

Seattle Public Utilities

Major Contracts

The purpose of the Major Contracts Program is to provide appropriation for large service contracts that SPU has with solid waste contractors and for water and wastewater treatment costs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Major Contracts	284,791,914	288,635,714	294,038,893	292,235,325

Taxes and Fees

The purpose of the Taxes Program is to provide appropriation for payment of city and state taxes.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Taxes and Fees	130,393,257	137,269,086	150,863,602	141,778,458

SPU - BO-SU-N100B - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to provide overall management and policy direction for Seattle Public Utilities and to provide core management and administrative services like finance, human resources, and facility management.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	61,306,514	60,458,559	59,244,798	62,288,719
Departmental Indirect Costs	63,180,667	80,487,925	84,542,640	97,268,012
Divisional Indirect Costs	1,530,056	1,275,796	1,451,280	1,492,703
Indirect Cost Recovery Offset	-	(22,909,895)	(23,958,240)	(20,878,653)
Paid Time Off Indirect Costs	7,292,540	5,048,724	5,197,854	5,656,400
Pooled Benefits Indirect Costs	(16,405,366)	5,751,082	6,716,392	6,381,850
Total	116,904,411	130,112,190	133,194,725	152,209,031
Full-time Equivalents Total*	109.35	108.35	108.35	116.60

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services and Seattle Information Technology Department.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	61,306,514	60,458,559	59,244,798	62,288,719

Seattle Public Utilities

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department. This may include personnel costs related to department leadership and administration or other administrative costs such as external rent and operating supplies or services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	63,180,667	80,487,925	84,542,640	97,268,012
Full Time Equivalents Total	109.35	108.35	108.35	116.60

Divisional Indirect Costs

The purpose of the Divisional Indirect Costs program is to fund administrative costs generated by sub-departmental units.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Divisional Indirect Costs	1,530,056	1,275,796	1,451,280	1,492,703

Indirect Cost Recovery Offset

The purpose of the Indirect Cost Recovery Offset program is to reflect the adjustment to the Leadership and Administration BSL occurring as a result of the Utility's general and administrative overhead allocation.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Indirect Cost Recovery Offset	-	(22,909,895)	(23,958,240)	(20,878,653)

Paid Time Off Indirect Costs

The purpose of the Paid Time Off program is to fund salary and benefit costs associated with City-provided leave benefits such as holiday pay, sick time, vacation time, executive leave or other leave benefits, including termination payouts for vacation and sick leave.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Paid Time Off Indirect Costs	7,292,540	5,048,724	5,197,854	5,656,400

Pooled Benefits Indirect Costs

The purpose of the Pooled Benefits program is to fund department costs associated with health and dental insurance, workers compensation, and unemployment insurance contributions.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Pooled Benefits Indirect Costs	(16,405,366)	5,751,082	6,716,392	6,381,850

Seattle Public Utilities

SPU - BO-SU-N200B - Utility Service and Operations

The purpose of the Utility Service and Operations Budget Summary Level is to fund the direct delivery of essential Customer Service programs and the operating expenses for Pre-Capital Planning & Development, Project Delivery, Drainage and Wastewater, Solid Waste, Water and General Fund programs.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Customer Service	21,311,452	26,106,969	27,240,026	26,781,448
Drainage System	7,341,858	10,102,780	11,209,670	10,475,721

The following information summarizes the programs in Utility Service and Operations Budget Summary Level:

Customer Service

The purpose of the Customer Service Program is to provide appropriation to manage and provide customer service support for the direct delivery of programs and services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Customer Service	21,311,452	26,106,969	27,240,026	26,781,448
Full Time Equivalents Total	234.00	242.00	249.00	249.00

Drainage System

The purpose of the Drainage System Program is to provide appropriation for maintaining the drainage system, drainage conveyance, stormwater detention and green stormwater infrastructure.

Seattle Public Utilities

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Drainage System	7,341,858	10,102,780	11,209,670	10,475,721

DWW Facilities & Equip

The purpose of the DWW Facilities and Equipment Program is to provide appropriation for drainage and wastewater operating and decant facilities

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
DWW Facilities & Equip	1,322,248	255,672	266,186	789,897

DWW System Operations

The purpose of the DWW System Operations Program is to provide appropriation for drainage and wastewater overall system planning, system modeling and analysis, source control, compliance and outreach and education.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
DWW System Operations	18,317,519	22,674,958	23,374,569	19,597,607

Emergency Response

The Emergency Response Program provides appropriation to procure necessary equipment and provide maintenance and support services in case of emergencies.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Emergency Response	296,702	2,087,079	2,213,981	2,147,041

Engineering

The purpose of the Engineering Program is to provide engineering design and support services, construction inspection, and project management services to capital improvement projects and to the managers of facilities.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Engineering	6,039,663	7,045,537	7,331,297	6,529,147
Full Time Equivalents Total	107.50	106.50	106.50	107.00

Pre-Capital Planning

The purpose of the Pre-Capital Planning Program is to support business case development, project plans, and options analysis. This program will capture all costs associated with a project that need to be expensed during its life cycle, including any post-construction monitoring and landscape maintenance.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Pre-Capital Planning	3,129,376	4,127,267	4,727,643	4,271,378

1779

Seattle Public Utilities

Solid Waste Facilities & Equip

The purpose of the Solid Waste Facilities & Equipment Program provides appropriation to maintain and support the solid waste facilities and landfills.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Solid Waste Facilities & Equip	4,249,512	5,529,176	5,756,407	6,020,127

Solid Waste Operations

The purpose of the Solid Waste Operations Program provides appropriation for overall solid waste system planning, operations of the transfer stations, solid waste outreach and management of the Local Hazardous Waste Mitigation Program (LHWMP).

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Solid Waste Operations	24,234,682	25,361,656	26,757,294	28,070,069
Full Time Equivalents Total	85.56	88.56	88.56	91.56

Wastewater System

The Wastewater System Program provides appropriation to maintain wastewater conveyance, pump stations and storage.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Wastewater System	11,733,085	15,626,505	15,108,382	13,861,807
Full Time Equivalents Total	225.05	233.05	233.05	233.05

Water Distribution System

The Water Distribution System Program provides appropriation to maintain water distribution conveyance, pump stations and reservoirs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Water Distribution System	11,803,593	15,908,943	16,699,704	14,252,581

Seattle Department of Transportation

Sam Zimbabwe, Director

(206) 684-5000

<http://www.seattle.gov/transportation>

Department Overview

The Seattle Department of Transportation (SDOT) develops, maintains, and operates a transportation system that promotes the safe and efficient mobility of people and goods, and enhances the quality of life, environment, and economy of Seattle and the surrounding region. The City's transportation infrastructure is estimated to be worth approximately \$20 billion, including:

- 1,548 lane-miles of arterial streets;
- 2,396 lane-miles of non-arterial streets;
- 2,293 miles of sidewalks;
- 124 bridges;
- 502 stairways;
- 613 retaining walls;
- 22 miles of seawalls;
- 267 traffic cameras;
- 1,085 signalized intersections;
- 361 miles of on-street bicycle facilities;
- 41,000 street trees;
- 1,581 pay stations;
- 31,319 curb ramps;
- more than 191,000 signs

The SDOT budget covers three major lines of business:

The **Transportation Capital Improvement Program** includes the major maintenance and replacement of SDOT's capital assets; the program also develops and constructs additions to the City's transportation infrastructure. The program includes the Major Maintenance/Replacement, Major Projects, and Mobility-Capital Budget Summary Levels (BSLs).

Operations and Maintenance covers day-to-day operations and routine maintenance that keep people and goods moving throughout the city, which includes operating the city's movable bridges and traffic signals, cleaning streets, repairing potholes, issuing permits, maintaining trees, and transportation planning and engineering. The four BSLs in this area are: Bridges and Structures; Maintenance Operations; Mobility-Operations; and Right-of-Way Management.

Business Management and Support provides overall policy direction and business support for SDOT and includes the Leadership and Administration and General Expense BSLs.

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

The City of Seattle is one of the fastest growing cities in the United States. While this growth provides great opportunities for economic development, it also places significant pressure on the transportation system. Within this context of growth and increasing density the 2020 Proposed Budget builds on the 2019 Adopted Budget with continued support for investments that enhance safe environments for walking, biking, riding transit, driving and moving freight based on geographic equity and community need. In addition, the proposed budget adjusts staffing to better maintain levels of service, leverage investments in improved customer service and help deliver key projects. All budget investments are intended to further integrate SDOT's master plans and continue to implement a comprehensive Move Seattle strategy that maintains and expands the City's transportation infrastructure. All investments are prioritized based on safety, need, regulatory requirements and policies established by the City.

For 2020, resources are focused in the areas below:

- delivering on voter commitments - STBD and Move Seattle Levy;
- enhancing safety and accessibility;
- engaging in effective management of the public right-of-way (ROW); and
- addressing emerging issues

Delivering on voter commitments- STBD and Move Seattle Levy The 2020 Proposed Budget invests the remaining Seattle Transportation Benefit District (STBD) Proposition One revenues by adding 25,000 Metro transit service hours in March 2020 and continues funding for first/last mile transit service. These investments will support and increase mobility in areas where there are service gaps. The proposed budget also adds almost \$5 million to STBD's capital improvement program to fund items such as new bus shelter pads and benches, transit-only lanes, queue jumps and other spot improvements. Using different modes of transit should help reduce single occupancy vehicle trips thus addressing a major contributor to traffic congestion. Funding in the proposed budget continues to promote affordability and accessibility of transportation options through the ORCA Opportunity program, which provides bus passes to students. The STBD Proposition One measure will expire at the end of 2020.

Seattle Department of Transportation

The 2020 Proposed Budget continues to support the Move Seattle Levy plan by including capital project staffing support, sidewalk and ADA improvements, bridge rehabilitation, and school zone safety enhancements. Construction funding for significant capital projects include the Fairview and Northgate Bridges, and the Delridge Way SW – RapidRide H Line multimodal corridor. 2019 is a critical year for the Levy as SDOT delivers Move Seattle projects and improvements, including the S. Lander Bridge and targeting 6 Vision Zero corridors, 25-32 Safe Routes to School projects, 6 miles each of protected bike lanes and neighborhood greenways, and 29 arterial lane miles re-paved.

The table below summarizes the Move Seattle Levy capital and operations investments in the proposed budget.

<u>Move Seattle Category (Levy Fund only)</u>	<u>2019 Adopted</u>	<u>2020 Proposed</u>	<u>Original Total 9- year Levy</u>	<u>November 2018 Levy Workplan Update 9-year Levy</u>
Safe Routes	\$26,768,737	\$30,018,257	\$207,000,000	\$206,047,002
Vision Zero	\$9,539,877	\$4,830,188	\$71,000,000	\$70,881,807
Pedestrian and Bike Safety	\$14,055,979	\$21,838,068	\$110,000,000	\$108,909,724
Neighborhood Projects	\$3,172,881	\$3,350,001	\$26,000,000	\$26,255,471
Maintenance and Repair	\$65,923,361	\$71,225,917	\$420,000,000	\$420,445,711
Maintain Streets	\$36,775,405	\$38,051,074	\$250,000,000	\$250,571,854
Bridges and Structures	\$25,772,480	\$30,392,988	\$140,000,000	\$139,929,330
Urban Forestry and Drainage	\$3,375,476	\$2,781,855	\$30,000,000	\$29,944,527
Congestion Relief	\$55,089,929	\$30,682,288	\$303,000,000	\$303,507,287
Corridor Mobility Improvements	\$28,056,800	\$16,101,383	\$169,000,000	\$168,407,172
Light Rail Partnership Improvements	\$7,142,873	\$2,912,645	\$27,000,000	\$27,000,239
Pedestrian and Bike Improvements	\$11,449,770	\$8,887,540	\$68,000,000	\$69,630,458
Freight Mobility Improvements	\$8,440,489	\$2,780,720	\$39,000,000	\$38,469,418
Grand Total	\$147,782,028	\$131,926,462	\$930,000,000	\$930,000,000

Enhancing Safety and Accessibility The proposed budget includes several items that improve pedestrian and bike safety under the Vision Zero program and the Safe Routes to School program. The use of \$16.7 million in one-time revenues from the sale of surplus property in South Lake Union (known as the Mercer Megablock) will be used to support Vision Zero projects that enhance pedestrian and bicycle safety. In addition, the budget includes new school safety cameras at 2-3 locations in the fall of 2020 and funds a variety of additional school safety improvements. School safety cameras have a convincing track record of changing behavior (the longer a camera is in place, the better compliance is with posted school zone speed limits). Lastly, in order to meet our requirements for ADA curb ramps, additional funding is provided for curb ramp construction and staffing for inspections to ensure the ramps are code compliant.

Engaging in effective management of the public right-of-way (ROW) The City's investment in paid parking technology provides a wealth of data that supports management of the right of way and maintaining parking space availability. The 2020 Proposed Budget implements a number of improvements to meet this goal – including updating commercial

Seattle Department of Transportation

vehicle load zone permit fees and meter hooding fees. This action also improves service delivery at the Traffic Permit Counter and in the Commercial Vehicle Enforcement program by adding additional staffing resources that are backed by permit fee revenue. One position is added to the Traffic Permit Counter to improve processing times of permits and respond to customer inquiries. A second position is added to the Commercial Vehicle Enforcement program to more effectively address commercial vehicle-related mobility issues in increasingly congested areas of the city, including Downtown and Pioneer Square.

SDOT continues to work with Seattle IT on a number of key collaborative efforts, including service delivery and new enterprise-wide permitting and mobility technology initiatives. The 2020 Proposed Budget includes funding for the department to develop a comprehensive and consolidated IT strategic plan for both emerging transportation technology and operational technology. Additional funding will support Hansen Permit Data Archiving to allow for closing out existing permits, examining prior conditions and collecting a permit history for future development.

Addressing Emerging Needs The Northlake Avenue retaining wall at the north end of Lake Union is deteriorating. A multi-year major investment is needed to replace the worn structure with something that will better suit the needs of local businesses and the public. This budget funds a modest effort to begin design on this project. As part of the capital monitoring and oversight process, this project will be used as a pilot for a new “partial funding” approach being developed by the Project Delivery Executive Committee, a subgroup of the Capital Subcabinet.

Transportation Revenues

The 2020 Proposed Budget uses several funding sources and increased revenues to support transportation needs. Sources include federal, state and local grants; bonds; Move Seattle Levy proceeds; commercial parking tax; vehicle license fees; fees for service; real estate excise taxes; street vacation fees; gas tax; multimodal funds, property sale proceeds; school zone camera tickets; red light camera tickets; sales tax; and an annual allocation from the City's General Fund.

Commercial parking tax revenues have been adjusted downward to reflect recent and forecast growth in this revenue stream. These revenues are leveraged to back bond financing of both Seawall/Waterfront program items and general transportation needs. Continued investments of Real Estate Excise Tax (REET) support SDOT's Capital Improvement Program (CIP), allowing for increased funding in 2020 for infrastructure maintenance, preservation and expansion primarily focused on the Central Waterfront and general transportation projects including ADA curb ramps.

The 2020 Proposed Budget includes a portion of the sale of property in South Lake Union commonly known as the Mercer Properties (Megablock). Of the total anticipated proceeds from the sale, \$54.7 million has been identified as available for SDOT use. This funding is proposed to be allocated across six categories in 2020-2023:

Seattle Department of Transportation

Mercer Megablock Property Proceeds

Category	Amount (\$ in millions)	Description of Use of Funds
Mercer West Construction Loan Repayment	\$12.2	This amount will allow repayment of the Interfund Loan.
SLU Streetcar Operating Loan Repayment	\$3.6	This amount will allow repayment of the Interfund Loan.
Center City Connector Streetcar Capital Loan Repayment	\$9.0	This amount will allow SDOT to repay an interfund loan authorized in 2019 for Center City Streetcar planning and engineering design work.
Commercial Parking Tax Revenues Offset	\$9.2	This allocation of Mercer Megablock proceeds will allow SDOT to offset a shortfall in CPT revenue.
<u>SDOT Vision Zero Priorities:</u> <ul style="list-style-type: none"> • PMP - Crossings • NE 43rd St Improvements • BMP - Greenways • Highland Park Roundabout (Rename to HPW Safety Project) • BMP – Protected Bike Lane • PMP – Crossings 	<u>\$16.7</u> \$1.7 \$0.65 \$2 \$3.5 \$8.35 \$0.5	SDOT will use these funds to support new Vision Zero capital projects, including Bicycle Master Plan and Pedestrian Master Plan implementation projects. Funding will be spread over 2020-2023 based on planned project construction dates. The 2020 Proposed Budget allocates \$1.8 million.
Transaction Costs	\$4.0	Of the total transaction costs related to the sale of the Mercer Megablock property, \$4 million will be charged to SDOT.

Seattle Department of Transportation

Seattle Department of Transportation

Total Incremental Changes	\$28,207,353	25.50
Total 2020 Proposed Budget	\$725,884,188	957.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$5,758,641

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor. Of the total adjustment for 2020, about \$885,000 is from the General Fund, and the remainder is from other transportation-related funds.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$128,004

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

2020 SDOT Baseline CIP Adjustment

Expenditures \$(5,973,774)

This technical CIP adjustment applies Council changes made during 2019 to the "out years" (2020-2024) of the CIP projects. This change reestablishes the budget from which the 2020-2025 Proposed CIP incremental changes are applied.

2020 Waterfront Baseline CIP Adjustment

Expenditures \$(14,483,200)

This technical CIP adjustments applies Council changes made during 2019 to the "out years" (2020-2024) of the CIP projects. This change reestablishes the budget from which the 2020-2025 Proposed CIP incremental changes are applied.

Proposed Operating

STBD 2020 O&M Adjustment

Expenditures \$7,077,780

This one-time increase is for the City's purchase of Seattle Transportation Benefit District (STBD) transit services provided by King County Metro. The increased appropriation will fund 25,000 additional transit service hours in March 2020 (\$2.6 million), First Mile-Last Mile Service (\$4 million), and budget to adjust for 2019 actual transit service costs that were higher than anticipated (\$1.3 million). In addition, partnership service costs are decreasing

Seattle Department of Transportation

by \$867,000; however, service levels will remain constant. The fund source is the Transportation Benefit District Fund (vehicle license fees and sales tax).

Mercer Megablock Property Proceeds - Operating

Expenditures	\$7,600,000
--------------	-------------

This action programs a portion of the anticipated proceeds from the sale of the City's "Mercer Megablock" property in South Lake Union for transportation projects and programs administered by SDOT. Of the total anticipated proceeds from the sale, \$54.7 million has been identified as available for SDOT use. This funding is proposed to be allocated across six categories in 2020-2023:

SDOT Emerging Technology and IT Strategic Plan

Expenditures	\$125,000
--------------	-----------

The 2020 Proposed Budget includes \$125,000 from internal overhead to complete a comprehensive transportation technology strategic plan, approved in a prior budget, that addresses all facets of SDOT technology including the technology infrastructure necessary to support emerging transportation systems and services; technology to expand and improve transportation operations such as traffic management and navigation; and operational technology for maintenance/operations and critical business functions. The Transportation Technology Plan (TTP) will be used to improve the safety, efficiency, cost effectiveness and end-user experience of travel in the city.

Emerging Transportation technology Systems and Services include items such as autonomous vehicles (AV), intelligent transportation systems (ITS), pay-by-plate parking systems, navigation systems, ride-share services, incident response/congestion management applications and much more. To implement and support these systems, SDOT must also have the technology for daily maintenance and operations (M&O), business services (Financial, Purchasing/Contracting, Human Resources, etc.). The development of a comprehensive transportation technology plan is needed to ensure that City technology investments are identified and implemented proactively to improve efficiency, reduce costs, and ensure proper prioritization and sequencing.

Seattle Department of Transportation Permitting Archives

Expenditures	\$235,686
--------------	-----------

The State of Washington requires that the City keep permit records for 6 to 10 years. This item, funded by Street Use fees, will create an archive of the SDOT's current legacy permitting system (Hansen), which is at the end of its life and is being replaced by Accela. This project has two parts: Part 1 will migrate active records to Accela; Part 2 will develop a user-friendly mechanism to enable the business to readily store and search historical data that does not get converted into Accela (closed, inactive records). Enabling access to legacy data will allow the business to more readily research claims and other questions related to historical permit data.

Increase Seattle IT Allocation to Fund Accela Support

Expenditures	\$275,042
--------------	-----------

Seattle IT added FTE to support the Permitting System Integration (PSI) body of work, related to the Accela permitting platform. This item adds \$275,042 in expenditure authority from the Transportation Fund to cover SDOT's allocation of expenditures for this effort. See Seattle Information Technology Department's budget book pages for more detail on the Increase Staff Support for Accela Program item.

Positions to Support Continuing Operations

Expenditures	\$218,266
Position Allocation	23.50

Seattle Department of Transportation

This action maintains staffing capacity within SDOT to continue to provide basic services and voter-approved projects and programs delivered throughout the department by converting 19 Term-Limited Assignment (TLA) and Temporary Employment Services (TES) positions to regular, ongoing FTE and by adding 4.5 new FTE. No additional budget appropriation authority or revenues are needed for the 19 existing positions, as the costs and funding for these positions is already built into SDOT's 2020 Endorsed Budget. These positions support and perform essential services necessary to fulfill SDOT's mission and commitments to the community. All 19 TLA and TES positions will expire during 2020; conversion at the start of 2020 will help retain experienced and knowledgeable staff and ensure seamless delivery of services. Funding for the two (2) ADA curb ramp inspectors mentioned previously are included in this item. The remaining 1.5 positions are primarily revenue-backed. Any requested funding will be covered by a combination of permit fees and reimbursements from state agencies.

Commercial Vehicle Loading Zone Program Upgrade

Expenditures	\$210,000
--------------	-----------

This action adjusts Commercial Vehicle Load Zone (CVLZ) permit fees to modernize the CVLZ system and improve curb space management in support of more efficient urban goods delivery. The fee will be raised from \$195 to \$250 (+\$55). This growing industry is critical to Seattle's continued economic vitality but faces increasing pressures from congestion and limited loading options. Without better CVLZ management, vehicles will continue to skip deliveries to return later or double-park, adding to congestion and business financial costs. Accompanying legislation adjusts the CVLZ permit fee. General Fund will cover payment program additions and upgrades, system set-up, ensuing credit card fees, and customer outreach.

Commercial Vehicle Enforcement Program and Traffic Permit Counter

Expenditures	\$425,729
--------------	-----------

Position Allocation	2.00
---------------------	------

This item adds \$425,729 and 2.0 FTE to improve SDOT service levels at the Traffic Permit Counter and in the Commercial Vehicle Enforcement program. One position is added to the Traffic Permit Counter to improve processing times of permits and respond to customer inquiries. A second position is added to the Commercial Vehicle Enforcement program to more effectively address commercial vehicle-related mobility issues in increasingly congested areas of the city, including Downtown and Pioneer Square. In addition, a modest increase in Temporary No Parking fees (also known as meter hooding) of \$2 (8%-13% increase) is made to reflect current administrative program costs. General Fund, permit fees, and a reduction in costs related to contracted work at the permit counter are used to pay for the staffing as well as one-time costs such as protective equipment and vehicles.

Proposed Capital

Megablock Property Proceeds - Capital

Expenditures	\$1,800,001
--------------	-------------

The proposed budget funds investments of \$16.7 million to support new Vision Zero capital projects, supplement existing projects, and increase spot safety projects, including bicycle and pedestrian projects over four years. The proposed 2020 budget funding amount is \$1.8 million. The Vision Zero projects were selected based on the priorities in the Bike Master Plan, the Pedestrian Master Plan and the Safe Routes to School Action Plan. These documents contain strong equity components, driving capital investments toward neighborhoods that are historically disadvantaged. The funding source for this item is Mercer Megablock proceeds.

STBD 2020 CIP Adjustment

Expenditures	\$4,958,462
--------------	-------------

This one-time item increases funding to build additional capital projects that enhance transit speed, reliability, access and safety. Projects funded in 2020 include bus stop shelter footings and benches, transit-only lane markings

1791

Seattle Department of Transportation

(red lane treatment), queue jumps, and spot improvements. The fund source is the Transportation Benefit District Fund (vehicle license fees and sales tax).

Northgate Bridge and Cycle Track

Expenditures \$1,000,000

This item increases Move Seattle Levy funding for the construction of the Northgate Pedestrian and Bicycle Bridge by \$1 million in 2020 and increases total project costs by \$11.6 million. Funding for this project is coming from Bridge Rehabilitation and savings from the S Lander project. The project will construct pedestrian and bicycle improvements to enhance access to the Sound Transit Link Light Rail station under construction in Northgate; improvements include a pedestrian and bike bridge over I-5 and a protected bike lane and multi-use path along 1st Avenue NE. The existing transit center currently serves over 6,000 passengers daily, and the future light rail station is expected to serve over 15,000 passengers per day.

The completed project will improve connections between the east and west sides of the Northgate community, helping to knit together a neighborhood historically divided by a 10-lane interstate. The new bridge will span roughly 1,900 feet, landing at North Seattle College on the west side and at the future light rail station on the east side.

SDOT ADA Program

Expenditures \$2,067,645

The 2020 Proposed Budget adds \$7.22 million to fund the installation of an additional 273 curb ramps in 2020. Funding includes \$5.1 million of capital project savings and \$2.1 million in School Safety Traffic and Pedestrian Improvement (SSTPI). These investments allow the City to meet the annual ADA curb ramp requirement per the Reynoldson Consent Decree. Per the Consent Decree, a minimum of 1,250 ADA-compliant curb ramp improvements or remediations are required to be constructed in the city every calendar year. Ramps above 1,250, and up to 625, can be deposited into a “credit bank” and applied to future years. The proposed budget also provides two new, full time FTE’s for inspection positions to support the ADA program to ensure ramps are constructed correctly. Timely curb ramp inspection due to staffing limitations has been one of the biggest challenges to counting ramps towards yearly deliverables.

Northlake Retaining Wall

Expenditures \$2,000,000

This item creates a new CIP project to fund the design of a replacement for the Northlake Retaining Wall (location: <https://www.google.com/maps/@47.6480779,-122.3437823,19.22z?hl=en>) to the 30% design level. This critical structure is a 452-foot-long lake front timber structure constructed in 1951 and is located along the north shoreline of Lake Union adjacent to North Northlake Way. The wall currently shows signs of advanced deterioration, overstress, and some sections of structural failure. The current calculated capacity/demand ratio is 0.1 where 1.0 represents stability. This presents a significant risk to public safety given the right-of-way supported by the wall, the private structures directly offshore and adjacent to the wall, and the close proximity (immediately adjacent and up to 50 feet onshore) of overhead power lines and subsurface gas, sewer, drainage and water utility infrastructure.

School Safety Traffic and Pedestrian Improvement

Expenditures \$1,250,001

The 2020 proposed budget funds pedestrian safety and accessibility projects in school zones through 2024 via School Safety Traffic and Pedestrian Improvement Fund (SSTPI). Safe Routes to School is an integral part of the City’s commitment to Vision Zero, the plan to end traffic deaths and serious injuries by 2030. The program uses a combination of strategies, including engineering, encouragement, and education to reach the goal of increased safe walking for all of Seattle’s Public School students. The engineering toolkit includes projects like curb bulbs, curb ramps, raised crosswalks, crossing beacons, and pedestrian signals; sidewalks; school zone signage, 20mph flashing

1792

Seattle Department of Transportation

beacons, speed humps, lane reduction/lane narrowing, and street trees; for example. The program will construct as many of these types of projects as possible with this funding, including the installation of an additional 3-5 school zone cameras, and citation-related staffing.

Proposed Technical

South Lake Union Streetcar Operations

Expenditures	\$928,002
Revenues	\$1,506,763

This ongoing item increases the operating budget for the South Lake Union Streetcar. Several budget assumptions have changed since the 2020 Endorsed Budget: King County Metro has agreed to contribute \$1.5 million annually for streetcar operations through 2024, projected operating revenues have decreased by \$335,000, operating expenses have increased by \$37,000, and accounting practices have changed between the City and King County, which operates the streetcar. As a result of these changed accounting practices, the proposed budget includes revenues received from the ORCA fare payment system; in the past, these revenues were not included in SDOT's budget. Of the \$928,000 expenditure increase, \$37,000 is due to increased operating costs and the remaining \$891,000 is due to accounting practice changes. This item also reduces the CPT transfer to SLU to reflect the increased contribution from King County. The fund source for this increase is King County Metro funds.

First Hill Streetcar Operations

Expenditures	\$1,132,362
Revenues	\$641,845

This ongoing item increases the operating budget for the First Hill Streetcar. Several budget assumptions have changed since the 2020 Endorsed Budget: projected operating revenues have decreased by \$491,000 and accounting practices have changed between the City and King County, which operates the streetcar. As a result of these changed accounting practices, the proposed budget included revenues from the ORCA fare payment system; in the past, these revenues were not included in SDOT's budget. The proposed budget does not anticipate any increased operating expenses. The fund sources for the increase are operating revenues (\$860,000) and Commercial Parking Tax 10% (\$272,000).

REET Debt Service Project Alignment Correction

Expenditures	-
--------------	---

This change request corrects the allocation of REET II funds for debt service payments in the 2019-2024 CIP between projects, from Debt Service - REET I (MO-TR-D003) to Debt Service - REET II (MO-TR-D006). This reflects the project structure in PeopleSoft 9.2 and will help prevent reporting discrepancies moving forwards.

Debt Service Technical Adjustments

Expenditures	\$(1,881,573)
--------------	---------------

This is a technical adjustment for debt service based on funding swaps, updated financing cost assumptions, and changes in annual LTGO bond needs based on current project spend plans.

O&M Technical Adjustments

Expenditures	\$(2,471,235)
--------------	---------------

This technical adjustment action updates 2020 proposed budget amounts by \$2.47 million to reflect Citywide technical adjustments made in the baseline phase, changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care,

Seattle Department of Transportation

retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across City departments.

CIP Technical Adjustments

Expenditures	\$5,225,129
--------------	-------------

This technical adjustment includes several projects with capital savings that have transferred funds to support upcoming projects and those with scope or schedule adjustments. Key work includes street paving and resurfacing; building new sidewalks and curb ramps; school safety improvements; implementation of the Bike, Pedestrian, and Transit Master Plans; investments to facilitate freight mobility; traffic cameras and signals; bridge projects such as bridge replacement, maintenance, and seismic retrofitting; and support for the Seawall and Waterfront Program.

Reimbursable Technical Adjustments

Expenditures	\$801,793
--------------	-----------

This technical adjustment updates the 2020 proposed budget amounts for estimated reimbursable work by \$801,792 to account for anticipated increases in reimbursable work that SDOT will be undertaking.

Street Use Technical Adjustments

Expenditures	\$1,690,017
--------------	-------------

This one-time adjustment aligns the 2020 Proposed Budget with anticipated expenditures in SDOT's Street Use program. Funds will be used to support increased costs for temporary labor (\$388,000), training, fees, printing and other services (\$569,000), downtown mobility staffing (\$439,000), urban design work (\$169,000), and various budget reallocations. The fund source is street use fees within SDOT's Transportation Fund.

Reimbursable CWF transfer to new BSL

Expenditures	\$8,109,575
--------------	-------------

This action adds reimbursable appropriation authority to a new BSL for the Central Waterfront program (created in change request OWF-904). This appropriation was previously made within the Bridges and Structures BSL. The change request also reflects a reduction from this BSL. It increases the reimbursable authority by \$8,109,575, to \$41,500,000. This accounts for updated cashflow and additional reimbursable work above what was budgeted in the 2020 Endorsed budget.

The \$41.5M is for the following reimbursable work: Seattle Parks (\$12,000,000), Office of Arts and Culture (\$250,000), SCL (\$15,000,000), Washington State Ferries/SCL (\$1,500,000), SPU (\$10,000,000) and Telecom (\$2,750,000).

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Major Maintenance/Replacement Budget Summary Level:

Bridges & Structures

The purpose of Bridges and Structures Program is to provide for safe and efficient use of the city's bridges and structures to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Bridges & Structures	9,136,126	42,492,825	26,691,223	38,795,436
Full Time Equivalents Total	12.75	13.75	13.75	13.75

1802

Seattle Department of Transportation

Landslide Mitigation

The purpose of the Landslide Mitigation Program is to proactively identify and address potential areas of landslide concerns that affect the right-of-way.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Landslide Mitigation	414,304	453,000	466,000	475,349
Full Time Equivalents Total	2.00	2.00	2.00	2.00

Roads

The purpose of the Roads program is to provide for the safe and efficient use of the city's roadways to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Roads	38,583,621	50,402,124	48,966,885	61,154,175
Full Time Equivalents Total	46.00	47.00	47.00	47.00

Sidewalk Maintenance

The purpose of Sidewalk Maintenance Program is to maintain and provide for safe and efficient use of the city's sidewalks to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Sidewalk Maintenance	4,076,007	5,692,000	3,765,648	3,807,479
Full Time Equivalents Total	6.00	6.00	6.00	6.00

Signs, Signals and Markings

The purpose of Signs, Signals and Markings Program is to design, plan and maintain the city's signs, signals, and street, sidewalk markings

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Signs, Signals and Markings	1,338,651	1,552,533	1,594,145	1,657,420

Trails and Bike Paths

The purpose of Trails and Bike Paths Program is to maintain and provide for safe and efficient use of the city's trails and bike paths to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Mobility-Capital Budget Summary Level:

Corridor & Intersection Imprv

The purpose of the Corridor & Intersection Improvements Program is to analyze and make improvements to corridors and intersections to move traffic more efficiently. Examples of projects include signal timing, left turn signals and street improvements.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Corridor & Intersection Imprv	20,426,227	32,081,095	26,606,393	39,398,696
Full Time Equivalents Total	37.50	37.50	37.50	38.50

Freight Mobility

The purpose of the Freight Mobility Program is to help move freight throughout the city in a safe and efficient manner.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Freight Mobility	14,803,094	38,267,051	33,819,822	38,752,769
Full Time Equivalents Total	4.50	4.50	4.50	4.50

Intelligent Transp System

The purpose of the Intelligent Transportation System (ITS) Program is to fund projects identified in the City's ITS Strategic Plan and ITS Master Plan. Examples of projects include implementation of transit signal priority strategies;

Seattle Department of Transportation

installation of closed-circuit television (CCTV) cameras to monitor traffic in key corridors; and development of parking guidance, traveler information and real-time traffic control systems.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Intelligent Transp System	3,007,711	4,516,945	6,833,055	3,259,933
Full Time Equivalents Total	8.25	9.25	9.25	9.25

Neighborhood Enhancements

The purpose of the Neighborhood Enhancements Program is to plan and forecast the needs of specific neighborhoods including neighborhood and corridor planning, development of the coordinated transportation plans, traffic control spot improvements and travel forecasting. The program also constructs minor improvements in neighborhoods based on these assessments.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Neighborhood Enhancements	10,232,341	7,469,532	4,538,724	8,615,342
Full Time Equivalents Total	19.75	19.75	19.75	19.75

New Trails and Bike Paths

The purpose of the New Trails and Bike Paths Program is to construct new trails and bike paths that connect with existing facilities to let users transverse the city on a dedicated network of trails and paths.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
New Trails and Bike Paths	16,470,151	20,619,831	12,482,045	23,144,949
Full Time Equivalents Total	-	-	-	1.00

Sidewalks & Ped Facilities

The purpose of the Sidewalks & Pedestrian Facilities Program is to install new facilities that help pedestrians move safely along the city's sidewalks by installing or replacing sidewalks, modifying existing sidewalks for elderly and handicapped accessibility, and increasing pedestrian lighting.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Sidewalks & Ped Facilities	28,424,508	33,731,293	25,607,632	36,441,122
Full Time Equivalents Total	37.50	50.50	50.50	52.50

Transit & HOV

The purpose of the Transit & HOV Program is to move more people in less time throughout the city.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Transit & HOV	35,352,977	48,337,205	97,549,061	48,824,755
Full Time Equivalents Total	14.00	13.00	13.00	13.00

Seattle Department of Transportation

SDOT - BO-TR-12001 - South Lake Union Streetcar Operations

The purpose of the South Lake Union Streetcar Operations Budget Summary Level is to operate and maintain the South Lake Union Seattle Streetcar.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
S Lake Union Streetcar Ops	974,684	2,793,955	3,428,841	4,356,843
Total	974,684	2,793,955	3,428,841	4,356,843

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BO-TR-12002 - First Hill Streetcar Operations

The purpose of the First Hill Streetcar Operations Budget Summary Level is to operate and maintain the First Hill Seattle Streetcar.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
First Hill Streetcar Ops	5,927,202	12,069,474	8,288,386	9,420,748
Total	5,927,202	12,069,474	8,288,386	9,420,748

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BO-TR-16000 - Waterfront and Civic Projects

The purpose of the Waterfront and Civic Projects Summary Level is to pay for expenses related to reimbursable design and construction services provided by the Central Waterfront program for other City departments and external partners. Additionally, the BSL provides planning and leadership support for other Civic Projects.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Waterfront and Civic Projects	-	-	-	41,499,999
Total	-	-	-	41,499,999

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Department of Transportation

SDOT - BO-TR-17001 - Bridges & Structures

The purpose of the Bridges and Structures Budget Summary Level is to maintain the City's bridges and structures which helps provide for the safe and efficient movement of people, goods, and services throughout the City. Additionally, the BSL provides general construction management, engineering support for street vacations, scoping of neighborhood projects, and other transportation activities requiring engineering oversight.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Bridge Operations	3,425,281	3,739,773	3,760,574	3,902,269
Engineering & Ops Support	17,973,963	35,010,749	35,653,269	2,285,329
Structures Engineering	1,036,863	957,142	975,611	1,008,015
Structures Maintenance	6,760,367	7,301,039	7,350,126	7,743,404
Total	29,196,474	47,008,703	47,739,580	14,939,017
Full-time Equivalents Total*	56.00	56.00	56.00	57.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Bridges & Structures Budget Summary Level:

Bridge Operations

The purpose of Bridge Operations is to ensure the safe and efficient operations and preventive maintenance for over 180 bridges throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Bridge Operations	3,425,281	3,739,773	3,760,574	3,902,269
Full Time Equivalents Total	18.50	17.50	17.50	17.50

Engineering & Ops Support

The purpose of the Engineering Ops & Support program is to provide engineering support services to other SDOT projects, perform engineering related to bridges and structures, and manage stormwater pollution control.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Engineering & Ops Support	17,973,963	35,010,749	35,653,269	2,285,329
Full Time Equivalents Total	3.00	3.00	3.00	3.00

Structures Engineering

The purpose of the Structures Engineering Program is to provide engineering services on all the bridges and structures within the city to ensure the safety of transportation users as they use or move in proximity to these transportation facilities.

Seattle Department of Transportation

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Structures Engineering	1,036,863	957,142	975,611	1,008,015
Full Time Equivalents Total	3.50	3.50	3.50	3.50

Structures Maintenance

The purpose of the Structures Maintenance Program is to provide for the maintenance of the city's bridges, roadside structures and stairways.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Structures Maintenance	6,760,367	7,301,039	7,350,126	7,743,404
Full Time Equivalents Total	31.00	32.00	32.00	33.00

SDOT - BO-TR-17003 - Mobility Operations

The purpose of the Mobility-Operations Budget Summary Level is to promote the safe and efficient operation of all transportation modes in the city. This includes managing the parking, pedestrian, and bicycle infrastructure; implementing neighborhood plans; encouraging alternative modes of transportation; and maintaining and improving signals and the non-electrical transportation management infrastructure.

Program Expenditures	2018	2019	2020	2020
	Actuals	Adopted	Endorsed	Proposed
Commuter Mobility	24,471,567	31,136,140	25,094,822	17,100,325
Neighborhoods	1,121,688	1,140,569	1,137,844	1,153,967
Parking & Curbspace	13,240,830	13,670,815	13,869,926	14,767,719
Signs & Markings	3,755,300	3,990,599	4,048,767	4,191,653
Traffic Signals	9,569,956	9,360,650	9,249,598	9,487,442
Transit Operations	43,380,667	52,120,211	59,717,169	66,851,338
Urban Planning	3,998,313	4,060,096	3,119,749	3,243,950
Total	99,538,322	115,479,081	116,237,875	116,796,394
Full-time Equivalents Total*	133.75	134.75	134.75	140.75

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Mobility Operations Budget Summary Level:

Commuter Mobility

The purpose of the Commuter Mobility Program is to provide a variety of services, including enforcement of City commercial vehicle limits, transit coordination, and planning, to increase mobility and transportation options to the residents of Seattle.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Commuter Mobility	24,471,567	31,136,140	25,094,822	17,100,325
Full Time Equivalents Total	45.25	44.25	44.25	50.25

Seattle Department of Transportation

Neighborhoods

The purpose of the Neighborhoods Program is to plan and forecast the needs of specific neighborhoods including neighborhood and corridor planning, development of the coordinated transportation plans, traffic control spot improvements and travel forecasting. The program also constructs minor improvements in neighborhoods based on these assessments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Neighborhoods	1,121,688	1,140,569	1,137,844	1,153,967
Full Time Equivalents Total	2.50	2.50	2.50	2.50

Parking & Curbspace

The purpose of Parking and Curb Ramp Program is to manage the City's parking resources, maintain and operate pay stations and parking meters for on-street parking, manage curbspace, develop and manage the City's carpool program and Residential Parking Zones.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Parking & Curbspace	13,240,830	13,670,815	13,869,926	14,767,719
Full Time Equivalents Total	32.00	31.00	31.00	31.00

Signs & Markings

The purpose of the Signs & Markings Program is to design, fabricate and install signage, as well as provide pavement, curb and crosswalk markings to facilitate the safe movement of vehicles, pedestrians and bicyclists throughout the city.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Signs & Markings	3,755,300	3,990,599	4,048,767	4,191,653
Full Time Equivalents Total	19.50	19.50	19.50	19.50

Traffic Signals

The purpose of the Traffic Signals Program is to operate the Traffic Management Center that monitors traffic movement within the city and to maintain and improve signals and other electrical transportation management infrastructure.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Traffic Signals	9,569,956	9,360,650	9,249,598	9,487,442
Full Time Equivalents Total	21.25	24.25	24.25	24.25

Seattle Department of Transportation

Transit Operations

The Purpose of the Transit Operations Program is to purchase Metro Transit service hours on routes with at least 65% of the stops within the city of Seattle and to support regional transit service in conjunction with other cities, transit agencies, and transportation benefit districts who contribute to the cost of providing regional transit service. The program also funds ORCA Opportunity which provides youth ORCA cards for Seattle Public Schools Students, Seattle Promise scholarship students or similar programs. The program also funds and administers a \$20 low-income VLF rebate to qualified individuals and supports access to transit service for low-income riders. The Transit Operations program revenues support the implementation of City-wide improvements to maximize transit operations.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Transit Operations	43,380,667	52,120,211	59,717,169	66,851,338
Full Time Equivalents Total	2.75	2.75	2.75	2.75

Urban Planning

The Urban Planning Program is comprised of Adaptive Streets, Citywide & Community Planning, GIS, Urban Design, and the Center City Mobility Plan.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Urban Planning	3,998,313	4,060,096	3,119,749	3,243,950
Full Time Equivalents Total	10.50	10.50	10.50	10.50

SDOT - BO-TR-17004 - ROW Management

The purpose of the (Right-of-Way) ROW Management Budget Summary Level is to review projects throughout the city for code compliance for uses of the right-of-way and to provide plan review, utility permit and street use permit issuance, and utility inspection and mapping services.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
St Use Permit & Enforcement	31,865,155	36,347,438	36,363,829	40,114,478
Total	31,865,155	36,347,438	36,363,829	40,114,478
Full-time Equivalents Total*	133.25	134.25	134.25	139.25

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Department of Transportation

SDOT - BO-TR-17005 - Maintenance Operations

The purpose of the Maintenance Operations Budget Summary Level is to maintain the City's roadways and sidewalks, as well as to maintain, protect and expand the City's urban landscape in the street right-of-way through the maintenance and planting of new trees and landscaping to enhance the environment and aesthetics of the city.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Emergency Response	3,917,220	4,638,797	4,700,240	4,840,587
Operations Support	4,777,578	4,804,480	4,805,337	4,956,495
Pavement Management/Repair	15,792,089	14,321,048	14,474,065	14,732,700
Street Cleaning	7,793,657	7,616,728	7,699,401	7,878,769
Tree & Landscape Maintenance	6,260,577	5,847,777	6,107,263	6,313,717
Total	38,541,119	37,228,830	37,786,306	38,722,268
Full-time Equivalents Total*	146.00	144.00	144.00	144.50

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Maintenance Operations Budget Summary Level:

Emergency Response

The purpose of the Emergency Response Program is to respond to safety and mobility issues such as pavement collapses, severe weather, landslides and other emergencies to make the right-of-way safe for moving people and goods. This program proactively addresses landslide hazards to keep the right-of-way open and safe.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Emergency Response	3,917,220	4,638,797	4,700,240	4,840,587
Full Time Equivalents Total	19.00	19.00	19.00	19.00

Operations Support

The purpose of the Operations Support Program is to provide essential operating support services necessary for the daily operation of SDOT's equipment and field workers dispatched from three field locations in support of street maintenance activities. These functions include warehousing, bulk material supply and management, tool cleaning and repair, equipment maintenance and repair, project accounting and technical support, and crew supervision.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Operations Support	4,777,578	4,804,480	4,805,337	4,956,495
Full Time Equivalents Total	22.50	22.50	22.50	22.50

Pavement Management/Repair

The purpose of the Pavement Management and Repair Program is to assess the condition of asphalt and concrete pavements and establish citywide paving priorities for annual resurfacing, preservation and maintenance of all

Seattle Department of Transportation

streets and adjacent areas such as sidewalks and road shoulders by making spot repairs and conducting annual major maintenance paving and rehabilitation.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Pavement Management/Repair	15,792,089	14,321,048	14,474,065	14,732,700
Full Time Equivalents Total	57.25	57.25	57.25	57.25

Street Cleaning

The purpose of the Street Cleaning Program is to keep Seattle's streets, improved alleys, stairways and pathways clean, safe and environmentally friendly by conducting sweeping, hand-cleaning, flushing and mowing on a regular schedule.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Street Cleaning	7,793,657	7,616,728	7,699,401	7,878,769
Full Time Equivalents Total	22.50	22.50	22.50	22.50

Tree & Landscape Maintenance

The purpose of the Landscape & Tree Maintenance Program is to provide planning, design, construction and construction inspection services for landscape elements of transportation capital projects, as well as guidance to developers on the preservation of city street trees and landscaped sites during construction.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Tree & Landscape Maintenance	6,260,577	5,847,777	6,107,263	6,313,717
Full Time Equivalents Total	24.75	22.75	22.75	23.25

SDOT - BO-TR-18001 - Leadership and Administration

The purpose of the Leadership & Administration Budget Summary Level is to provide executive, community, financial, human resource, technology and business support to the Seattle Department of Transportation.

Program Expenditures	2018	2019	2020	2020
	Actuals	Adopted	Endorsed	Proposed
Citywide Indirect Costs	35,749,039	39,937,628	39,766,385	39,733,357
Departmental Indirect Costs	14,706,586	17,257,390	14,905,527	18,968,116
Divisional Indirect Costs	15,019,142	13,050,957	14,497,115	12,147,358
Indirect Cost Recovery Offset	(98,299,089)	(70,245,975)	(69,169,027)	(69,265,285)
Pooled Benefits and PTO	33,168,500	-	-	-
Total	344,177	-	-	1,583,546
Full-time Equivalents Total*	208.25	205.25	205.25	214.25

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Department of Transportation

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The Purpose of Citywide Indirect Cost Program is to allocate the City's general service costs to SDOT in a way that benefits the delivery of transportation services to the public.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	35,749,039	39,937,628	39,766,385	39,733,357

Departmental Indirect Costs

tbd

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	14,706,586	17,257,390	14,905,527	18,968,116
Full Time Equivalents Total	114.00	112.00	112.00	120.00

Divisional Indirect Costs

The purpose of the Divisional Indirect Costs Program is to provide division leadership and unique transportation technical expertise to accomplish the division's goals and objectives in support of the department's mission.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Divisional Indirect Costs	15,019,142	13,050,957	14,497,115	12,147,358
Full Time Equivalents Total	94.25	93.25	93.25	94.25

Indirect Cost Recovery Offset

Indirect Cost Recovery Offset Program includes Department Management Indirect cost recovery and General Expense Indirect Cost Recovery. This program equitably recovers and allocates departmental and general expense indirect cost from all transportation activities and capital projects to fund departmental management and support services essential for delivery of transportation service to the public.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Indirect Cost Recovery Offset	(98,299,089)	(70,245,975)	(69,169,027)	(69,265,285)

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Pooled Benefits and PTO	33,168,500	-	-	-

Seattle Department of Transportation

SDOT - BO-TR-18002 - General Expense

The purpose of the General Expense Budget Summary Level is to pay for general business expenses necessary to the overall delivery of transportation services, such as Judgment and Claims contributions and debt service payments.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Initiatives	182,121	-	-	14,150,000
Debt Service	33,447,752	35,028,548	39,782,023	37,900,450
Judgment & Claims	2,590,087	2,590,087	2,590,087	2,590,087
Total	36,219,960	37,618,635	42,372,110	54,640,537

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in General Expense Budget Summary Level:

Citywide Initiatives

The purpose of the Citywide Initiatives program is to support citywide or multi-departmental system or process improvement initiatives.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Initiatives	182,121	-	-	14,150,000

Debt Service

The purpose of Debt Service Program is to meet principal repayment and interest obligations on debt proceeds that are appropriated in SDOT's Budget

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Debt Service	33,447,752	35,028,548	39,782,023	37,900,450

Judgment & Claims

The purpose of the Judgement & Claims Program is to represent SDOT's annual contribution to the City's centralized self-insurance pool from which court judgements and claims against the city are paid.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Judgment & Claims	2,590,087	2,590,087	2,590,087	2,590,087

Central Waterfront Improvement Program

Marshall Foster, Director

206-684-8413

<http://www.seattle.gov/office-of-the-waterfront-and-civic-projects>

Central Waterfront Improvement Program

The Office of the Waterfront and Civic Projects is responsible for coordinating the City's waterfront improvement efforts, including project management, design, construction, and financial management. Organizationally, it is a unit of the Seattle Department of Transportation (SDOT), although its director reports directly to the Mayor. The Office of the Waterfront and Civic Projects is charged with administering the overall program and ensuring that it is managed efficiently and delivers on the Concept Design and Framework Plan for the Central Waterfront as adopted by the City in Resolution 31399.

The projects that make up the Central Waterfront program are included in SDOT's budget and in the budgets of two other City departments. Although there are multiple funding sources and multiple projects within the waterfront improvement program, the program itself includes all of the projects listed below.

Seattle Department of Transportation

- Alaskan Way Main Corridor project (MC-TR-C072)
- Overlook Walk and East/West Connections (MC-TR-C073)

Department of Parks and Recreation

- Parks Central Waterfront Piers Rehabilitation (MC-PR-21007)
- Aquarium Expansion (MC-PR-21006)

Department of Finance and Administrative Services

- Pike Place Market PC-1 North Waterfront Entrance project (complete)
- Local Improvement District Administration

In addition, there are funds budgeted in CIP projects for Seattle Public Utilities (SPU) and Seattle City Light (SCL) for utility relocations related to the Central Waterfront program. The Office of the Waterfront and Civic Projects is leading design and construction activities for these relocations, which in SDOT's budget are combined in a reimbursable project. The Office of Arts and Culture also has funding from the Waterfront program's 1% for Arts contribution.

Central Waterfront Improvement Fund is a single fund from which multiple departments draw funding resources. The fund tracks the interfund loan and philanthropic funds as well as other revenues. The fund supports certain costs associated with the design and construction of the waterfront improvement program and related costs for City administration, including the Office of the Waterfront and Civic Projects. Appropriations made from the Central Waterfront Improvement Fund are for these purposes.

In 2019, City Council created the Waterfront LID Fund to pay expenses related to the Waterfront Local Improvement District (#6751). Multiple departments will draw on the resource in this fund, which will be supported by an Interfund Loan (repaid by LID Bonds and LID assessments) until the LID bonds are sold in late 2020 or early 2021.

Office of the City Auditor

David G. Jones, City Auditor

(206) 233-3801

<http://www.seattle.gov/audit/>

Department Overview

The Office of City Auditor was established by City Charter and serves as Seattle's independent performance audit function. The City Auditor is appointed by the City Council to a four-year term of office.

The Office of City Auditor seeks to promote honest, efficient management and full accountability throughout City government. It serves the public interest by providing the City Council, the Mayor and City employees with accurate information, unbiased analyses and objective recommendations on how best to use public resources.

The Office of City Auditor conducts audits of City departments, programs, grantees and contracts, as well as some nonaudit projects. Most of the office's work is performed in response to specific concerns or requests from City Councilmembers, but the City Auditor also independently initiates work to fulfill the office's mission. If resources are available, the City Auditor responds to requests from the Mayor, City departments and the public.

Through its work, the Office of City Auditor answers the following types of questions:

- Are City of Seattle programs being carried out in compliance with applicable laws and regulations, and is accurate information furnished to the City Council and Mayor on these programs?
- Do opportunities exist to eliminate inefficient use of public funds and waste?
- Are programs achieving desired results?
- Are there better ways to achieve program objectives at lower costs?
- Are there ways to improve the quality of service without increasing costs?
- What emerging or key issues should the City Council and Mayor consider?

Office of the City Auditor

Budget Overview

The 2020 Proposed Budget maintains resources to support the Office of City Auditor and includes technical adjustments to bring the department's budget into alignment with an Annual Wage Increase, a State Paid Family Medical Leave increase, changes to internal service costs, and items previously approved in the 2019 Second Quarter Supplemental Budget Ordinance. In addition, \$500,000 included in the Auditor's baseline budget for the evaluation of the Sweetened Beverage Tax will now be funded from Sweetened Beverage Tax Fund, rather than the General Fund where those tax resources had previously been deposited.

Transfer Sweetened Beverage Tax Baseline Budget to New Fund	-	-
Total Incremental Changes	\$(100,637)	-
Total 2020 Proposed Budget	\$2,510,622	10.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$114,822

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$1,900

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$32,405

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to

Office of the City Auditor

improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Technical

Supplemental Changes

Expenditures	\$ (249,764)
--------------	--------------

This adjustment reflects changes made through supplemental budget legislation since the last adopted budget. Supplemental budget legislation is developed by the Executive and adopted by the City Council four times a year to provide for corrections to the adopted budget, unforeseen changes in circumstance, new funding opportunities or new policy priorities. These changes may include additions or reductions in appropriations and FTEs. This change includes transferring \$249,764 from the Office of City Auditor to the Human Services Department (HSD) for HSD to provide technical assistance to partner organizations that will expand their ability to evaluate programs funded by the Sweetened Beverage Tax.

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures	-
--------------	---

This technical change reflects the requirements of Ordinance 125886, and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero.

City Budget Office

Ben Noble, Director

(206) 615-1962

<http://www.seattle.gov/budgetoffice/>

Department Overview

The City Budget Office (CBO) is responsible for developing and monitoring the City's annual budget, carrying out budget-related functions, overseeing fiscal policy and financial planning activities, policy analysis, and preparing legislation for City Council review. CBO provides strategic analysis relating to the use of revenues, debt, long-term issues, and special events. The office also provides technical assistance, training, and support to City departments in performing financial functions. The Innovation and Performance team is also in CBO, supporting and advancing initiatives by using data and design to solve problems.

Office for Civil Rights

Mariko Lockhart, Director

(206) 684-4500

<http://www.seattle.gov/civilrights/>

Department Overview

The Office for Civil Rights (OCR) envisions a city of liberated people where community historically impacted by racism, oppression, and colonization hold power and thrive. OCR's mission is to end structural racism through accountable community relationships and anti-racist organizing, policy development, and civil rights enforcement.

OCR works to achieve equity and advance opportunity in Seattle by:

- developing policies and promoting partnerships to achieve racial equity and social justice;
- enforcing City, state and federal anti-discrimination laws that guarantee equal access to housing, employment, public accommodations, contracting, lending and protection against conversion therapy provided to minors;
- developing and conducting testing for discrimination in employment hiring and housing based on race, national origin, sexual orientation, gender identity and disability;
- staffing the Seattle Human Rights Commission, Seattle Women's Commission, Seattle Lesbian, Gay, Bisexual, Transgender, and Queer Commission, and the Seattle Commission for People with disAbilities;
- administering the Title VI program of the 1964 Civil Rights Act, which relates to physical access to governmental facilities, projects, and programs, and Title II complaints alleging discrimination on the basis of disability in the provision of services, activities, programs or benefits by the City;
- offering free civil rights technical assistance and outreach to businesses, community groups, and the general public, including immigrants, people of color, women, people with disabilities, and lesbian, gay, bisexual, transgender, and queer communities; and
- making available a wide array of civil rights information, including translations into other languages.

OCR leads the City's Race and Social Justice Initiative. The goals of the initiative are to end institutional racism in City government; promote inclusion and full participation of all residents in civic life; and partner with the community to achieve racial equity across Seattle. In working to achieve these goals, OCR conducts Race and Social Justice trainings, including Racial Equity Toolkit training, for all City staff and/or departments, community organizations and educational institutions.

Office for Civil Rights

Budget Overview

The 2020 Proposed Budget adds staffing capacity to the Office of Civil Rights (OCR) to support the City's Race and Social Justice Initiative (RSJI). The budget adds two positions to OCR: one commission liaison position, and one position focused on RSJI training. Adding the commission liaison position allows OCR to expand RSJI staffing to respond to the growing need across the City for RSJI support.

OCR staffs four commissions: the Commission for People with disAbilities, the Seattle LGBTQ Commission, the Seattle Human Rights Commission, and the Seattle Women's Commission. Prior to 2014, OCR had two commission liaison positions dedicated to providing support to the four commissions. Each liaison supported two commissions, and the staffing was focused on serving as point of contact for the commissions, administrative support, managing the recruitment and appointment process, training and onboarding new commissioners, providing technical assistance, and assisting with event planning. In 2014, there was a re-organization that shifted a vacant commission liaison position to the RSJI Division to expand capacity to address the growing city-wide RSJI needs and the mandates. Since 2015, the RSJI work across the city has continued to expand with OCR playing a critical role in supporting department training and policy needs. OCR has struggled to support the four commissions with only one position. Adding a new position will allow OCR to continue and expand the level of support for the RSJI work and staff the commissions more effectively.

In May 2018, the Mayor issued Executive Order (EO) 2018-04: Anti-Harassment and Anti-Discrimination. Among other things, the EO tasked the Seattle Department of Human Resources (SDHR) director and the OCR director to develop anti-harassment and anti-discrimination training. SDHR was also directed to work with all departments to develop a training plan for employees to include anti-harassment and anti-discrimination training and bias training. The two departments have worked collaboratively to assess the training needs of executive departments and develop a training plan. The demand for trainings far exceeds the capacity that the two departments have for providing trainings. To respond to the EO, and meet department training needs, the 2020 Proposed Budget adds two positions to SDHR and one position to OCR. SDHR is the lead department on the EO and the training plan. The SDHR positions are described in the SDHR section of the budget. The OCR position will add capacity to the department to do RSJI training and partner with SDHR on embedding RSJI in the anti-harassment and anti-discrimination trainings.

The 2020 Proposed Budget maintains \$1 million added by the City Council in the 2020 Endorsed Budget for community-based organizations providing alternatives to or addressing harm created by the criminal justice system. Funds will be dispersed through a participatory grantmaking model led by OCR in which participants use a democratic process and shared analysis to make funding decisions.

Finally, the 2020 Proposed Budget includes funding for wage adjustments related to the tentative agreement between the City and the Coalition of Unions.

Total Incremental Changes	\$597,305	2.00
Total 2020 Proposed Budget	\$6,639,611	33.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$330,370

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$3,701

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Office for Civil Rights

Citywide Adjustments for Standard Cost Changes

Expenditures	\$(11,657)
--------------	------------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Move Racial Equity Fund to RSJI

Expenditures	-
--------------	---

This is a budget neutral change to move the Racial Equity Fund that assists organizations with building their capacity to address structural racism, from the Leadership and Administration program to the Race and Social Justice program. The Racial Equity Fund is \$60,000.

Move Testing Budget to Enforcement

Expenditures	-
--------------	---

This is a budget neutral technical change to move the \$150,000 testing program budget from the Leadership and Administration program to the Civil Rights Enforcement program. The testing program utilizes testers to identify discriminatory practices and bias in access to Seattle's housing market and employment.

Proposed Operating

Increase Commission Support

Expenditures	\$125,479
Position Allocation	1.00

This item adds a position to staff both the Commission for People with DisAbilities (SCPD), and the Seattle LGBTQ Commission. Prior to 2014, OCR had two positions supporting the commissions. In 2014, a re-organization shifted one of the positions to the RSJI team in recognition of the increasing RSJI body of work across the City. Because the demand for OCR RSJI training, policy and toolkit support has continued to increase, OCR needs to maintain and increase the level of RSJI staffing. The position will provide administrative support on various tasks, staff commission meetings, manage the recruitment and appointment process, onboard new commissioners, deliver coordinate commissioner training, assist with coordinating of commissions events, and provide appropriate liaison duties between commissions and City departments, Council staff, and the Mayor's office.

Increase Race and Social Justice Training Capacity

Expenditures	\$149,413
Position Allocation	1.00

This items adds a Strategic Advisor 1, Exempt position to increase RSJI training capacity to the department. In May 2018 the Mayor issued Executive Order (EO) 2018-04: Anti-Harassment and Anti-Discrimination. Among other things, the EO tasked the Seattle Department of Human Resources (SDHR) director and the OCR director to develop anti-harassment and anti-discrimination training. To respond to the EO, and meet department training needs, the 2020 Proposed budget adds two positions to SDHR and one position to OCR. SDHR is the lead department on the EO

Office for Civil Rights

and the training plan. The SDHR positions are described in the SDHR section of the budget. The OCR position is focused on adding capacity to the department for RSJI trainings and partnering with SDHR to embed RSJI in the anti-harassment and anti-discrimination trainings.

Civil Service Commissions

Jennifer A. Greenlee, Executive Director

(206) 233-7118

<http://www.seattle.gov/civil-service-commission>
<http://www.seattle.gov/public-safety-civil-service-commission>

Department Overview

The **Civil Service Commissions** is the administrative entity serving both the Civil Service Commission and the Public Safety Civil Service Commission. The Commissions are quasi-judicial bodies charged with providing fair and impartial hearings on disciplinary actions and other employment related issues. Each commission is governed by a separate three-member board, with one member appointed by the Mayor, one appointed by the City Council, and one elected by, and representing, the employees. The term of each commissioner is three years.

The **Civil Service Commission (CSC)** provides fair and impartial hearings of alleged violations of the City's personnel rules. Employees may file appeals with the CSC regarding all final disciplinary actions and alleged violations of the Personnel Ordinance, as well as related rules and policies. The CSC may issue orders to remedy violations and may also make recommendations to the Mayor and the City Council regarding the administration of the personnel system.

In addition, the CSC investigates allegations of political patronage to ensure the City's hiring practices are established and carried out in accordance with the merit principles set forth in the City Charter. The CSC conducts public hearings on personnel related issues and may propose changes to personnel rules, policies, and laws to the Mayor and the City Council.

The purpose of the **Public Safety Civil Service Commission (PSCSC)** is to implement, administer, and direct a civil service system for sworn personnel of the Seattle Police Department and uniformed personnel of the Seattle Fire Department. The PSCSC provides sworn police and uniformed fire employees with a quasi-judicial process for hearings on appeals concerning disciplinary actions, examination and testing, and other related issues.

Civil Service Commissions

Budget Overview

The 2020 Proposed Budget for the Civilian Service Commissions (CIV) makes no significant changes and includes minor Citywide technical changes which are described below.

Incremental Budget Changes

Civil Service Commissions

	2020 Budget	FTE
Total 2020 Endorsed Budget	491,802	2.00
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	25,186	-
2020 State Paid Family Medical Leave Increase Base Budget	374	-
Citywide Adjustments for Standard Cost Changes	8,735	-
Total Incremental Changes	\$34,295	-
Total 2020 Proposed Budget	\$526,097	2.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$25,186

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$374

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Civil Service Commissions

Citywide Adjustments for Standard Cost Changes

Expenditures \$8,735

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Office of the Employee Ombud

Amarah Khan, Director

(206) 256-5982

Department Overview

In 2018, the Mayor issued [Executive Order](#) 2018-04 creating the Office of the Employee Ombud (OEO) following the recommendations issued by the Anti-Harassment Inter-departmental Team (AH IDT) on improving the City's workplace culture. The mission of the OEO is to support City employees in all branches of City government in assessing their concerns regarding workplace conduct that may be considered inappropriate; may constitute harassment, discrimination, or retaliation; and/or is in conflict with the City's Personnel Rules, Citywide workplace expectations, and other City policies.

The OEO provides assistance to City employees through a variety of means, including clarifying the City's processes and systems for reporting and investigations; facilitating discussions to break down miscommunication; providing the contact for represented employees' unions; and understanding what remedies are available through State or Federal agencies. The OEO also support employees with referrals to the City's contracted Employees Assistance Program (EAP) for appropriate emotional assistance.

In addition to individual employee services, the OEO engages with policy improvements that support the City's continuous effort to provide every City employee a safe and respectful workplace where they can do their best work in serving the residents of Seattle. OEO, as part of its systemic change mission, offers trainings and capacity building to city departments so that practices and behaviors that cause conflict among us can be addressed in a proactive manner. Beginning in 2020, the OEO will submit an annual report to the Mayor's Office and City Council that addresses issues extending beyond the experiences of individual employees and have a broader, systemic impact on the City. The report may include recommendations to change the City's Personnel Rules, complaint and investigations systems or trainings, and share information on patterns of inappropriate workplace conduct at the City.

Office of the Employee Ombud

Budget Overview

The 2020 Proposed Budget furthers the Mayor’s commitment to the Office of the Employee Ombud and the growth necessary to carry out the office’s mission. Since the creation of the OEO in the second quarter of 2019, it has received over 80 requests for assistance. In order to be able to keep up with the need, the proposed budget adds two additional positions: one position will serve as an Assistant Ombud, supporting case management, policy development, communications and training; another position will provide administrative support to the director and office. In addition to the two positions, the proposed budget adds one-time relocation costs and an on-going rent adjustment.

The 2020 Proposed Budget also provides for technical adjustments in the baseline budget reflecting tentative agreements with the Coalition of Unions. The tentative agreements include State Paid Family Medical Leave and an Annual Wage Increase. Another technical adjustment corrects the budget to reflect actual director labor costs.

Office of the Employee Ombud

Incremental Budget Changes

Office of the Employee Ombud

	2020 Budget	FTE
Total 2020 Endorsed Budget	561,310	3.00

Total Incremental Changes	\$852,611	2.00
Total 2020 Proposed Budget	\$1,413,921	5.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$33,770

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$299

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(67,589)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer

1843

Office of the Employee Ombud

of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Labor Cost Adjustment

Expenditures	\$57,108
--------------	----------

The director position was originally budgeted as a Manager 2 but classified as an Executive 2 per the Mayor's Office and Council requests. This adjustment adds funds to the Office of the Employee Ombud's total budget to account for actual labor costs.

Proposed Operating

Increase Case Management Capacity

Expenditures	\$288,023
Position Allocation	2.00

This item provides additional funding to the Office of the Employee Ombud in order to increase case management capacity. This includes funding for two positions:

- 1.0 FTE Strategic Advisor 2, to support policy, communications, and training development and increase case management capacity; and
- 1.0 FTE Management Systems Analyst, to support the overall office with administrative, data, and budgeting needs.

These positions provide much needed capacity to address the high number of inquiries already received in 2019.

Relocation of Office and Lease Cost Increase

Expenditures	\$541,000
--------------	-----------

This item provides the Office of Employee Ombud with funds to be able to relocate to a larger office space to support their growing staff and operational needs. The increase includes one-time funding for move costs, tenant improvements, and ongoing incremental cost for lease difference.

Employees' Retirement System

Jeff Davis, Executive Director

(206) 386-1293

<http://www.seattle.gov/retirement/>

Department Overview

The Seattle City Employees' Retirement System has two major functions: administration of retirement benefits and management of the assets of the Retirement Fund. Employee and employer contributions, as well as investment earnings, provide funding for the system. Approximately 9,150 active employee members, 2,350 terminated employee members and 6,400 retired employee members participate in the plan.

The provisions of the plan are set forth in [Chapter 4.36](#) of the Seattle Municipal Code. The plan is a "defined benefit plan" which means an employee's salary, years of service, and age at the time of retirement are used to determine the amount of retirement benefits. At retirement, members are given a choice of several payment options to collect their retirement benefit. The Retirement System is led by a seven-member Board of Administration and an Executive Director appointed by the Board.

Please note that the appropriations detailed in the following tables reflect only the costs to administer the system and do not reflect payment of retiree benefits.

Budget Overview

The Seattle City Employees' Retirement System (SCERS) relies on the long-term health of its assets to sustain its long-term financial obligations to SCERS members. The long-term health of SCERS is measured by the annual January 1 funding status, a percentage that represents the value of the asset portfolio over the reserves needed to pay retirement benefits to employees.

As of January 1, 2019, SCERS net assets are valued at \$2.88 billion with a 68.2% funded status. This is a decrease from 69.9% in 2018, but still higher than the low of 62% in 2010. Prior to 2018, SCERS funding status had increased steadily since 2010 due to changes SCERS has made to positively impact the funding status over the long-term. The

Employees' Retirement System

2018 decrease was due to adopted changes in assumptions related to long-term investment returns and lower than expected investment returns in 2018.

Annual Contributions: The plan's actuaries determine an "annual required contribution" (ARC) into SCERS so its assets grow in tandem with pension costs, which rise as new employees join SCERS, wages increase, and retirees live longer. In response to the drop in the value of its invested assets and its funded status coming out of the 2008-09 recession, SCERS and the City enhanced the plan in 2013 by revising its ARC calculation so SCERS will be fully funded after a fixed 30-year period beginning January 1, 2013 and ending January 1, 2043. In addition to the employee and employer annual required contributions, the City pays an additional fluctuating amount to achieve the fully funded status by 2043. These amounts are reflected in departmental budgets throughout the 2020 Proposed Budget.

Investment Return Assumption: In January 2014, SCERS decreased its long-term investment return assumption from 7.75% to 7.50% in anticipation of slower asset growth over the next 30 years. Effective January 2020, SCERS will decrease this assumption further to 7.25%. This assumption raises the ARC so the plan relies more on employee and employer contributions that are based on salaries, which are less volatile than the investment returns affected by portfolio experience and the economy.

Asset Smoothing: SCERS implemented an asset smoothing policy in 2011 to protect the funded status from volatile year-to-year swings by recognizing annual investment return gains and losses evenly over five years. This policy results in gradual changes in the ARC so the City's contribution is more stable.

Pension Plan for New Employees Hired On or After January 1, 2017: The City began evaluating plan changes in 2012 to reduce the cost of the plan for employees and the City, thereby enhancing SCERS' fiscal stability over the long run, while still maintaining an adequate retirement benefit for employees. In 2016, the City and labor unions agreed, and Council approved, a new defined benefit plan (SCERS II) for new employees hired on or after January 1, 2017. SCERS II has a similar structure to the existing plan (SCERS I).

Under SCERS II, there is an estimated 3.8% combined savings for annual employer and employee contributions. Members of the new plan will contribute 7% of their salary toward their retirement benefit, compared to 10.03% under SCERS I. Given the lower contributions into the plan, the new SCERS II plan will provide a retirement benefit lower than the SCERS I plan, but consistent with the design of the current SCERS I plan. The SCERS II benefit will still provide City retirees with an adequate retirement income when combined with Social Security.

SCERS I and SCERS II have the following key differences:

Key differences	SCERS I	SCERS II
Monthly Pension Benefit Calculation	2.00% multiplied by total years of service multiplied by the final average salary during 24 consecutive months	1.75% multiplied by total years of service multiplied by the final average salary during 60 consecutive months
Employee Contribution Rate	10.03% of salary	7.00% of salary
2020 Employer Contribution Rate	16.20% of salary	15.76% of salary
Normal Retirement Age	"Rule of 80" - lesser of 65 or when an employee's age plus service equals 80	"Rule of 85" - lesser of 65 or when an employee's age plus service equals 85
Minimum Retirement Age	52 years	55 years

The 2020 Proposed Budget includes appropriation increases of \$235,272 for centrally adjusted administrative and labor costs, but is otherwise unchanged from the 2019 Adopted and 2020 Endorsed Budget.

Employees' Retirement System

Ethics and Elections Commission

Wayne Barnett, Executive Director

(206) 684-8500

<http://www.seattle.gov/ethics/>

Department Overview

The Seattle Ethics and Elections Commission (SEEC) helps foster public confidence in the integrity of Seattle city government by providing education, training, and enforcement of the City's Ethics Code, Whistleblower Code, and lobbying regulations. It also promotes informed elections through education, training, and enforcement of the City's Elections Code and Election Pamphlet Code. With the passage of [Initiative 122](#) in November 2015, the Commission now administers and funds the Democracy Voucher Program.

The Commission's work on behalf of the City of Seattle centers around five main lines of business:

Ethics Code: The Commission conducts ethics training for all City of Seattle employees upon request and through the City's New Employee and New Supervisor Orientation programs. It also provides ethics training information for City employees via the City's intranet site. The Commission issues advisory opinions regarding interpretations of the Code of Ethics and also investigates and rules upon alleged violations of the Code. More than thirty years of formal advisory opinions, organized and searchable by topic, are available on the Commission's website.

Whistleblower Code: The Commission helps to protect an employee's right to report improper governmental action and to be free from retaliation as a result of such reporting. The Commission either investigates allegations of improper governmental actions itself or refers allegations to the appropriate agency.

Elections Code and Election Pamphlets Code: The Commission fulfills the public's mandate of full campaign disclosure by:

- training organizations required to report campaign contributions and expenditures in proper reporting procedures;
- auditing campaign reports;
- working with organizations to correct errors; and
- making all campaign finance information available to the public.

Since 1993, the Commission has made summary reports of campaign financing information available to the public, and since 1995, the Commission has published campaign financing information on its website. The Commission also produces voters' pamphlets for City elections and ballot measures. It makes these pamphlets available in several languages and produces a video voters' guide with King County.

Lobbying Regulations: The Commission is charged with administering the City's lobbying regulations. The Commission collects and posts information so that residents know who is lobbying and how much they are being paid to lobby. The Commission also enforces compliance with the lobbying regulations.

Democracy Voucher Program: The Commission administers the Democracy Voucher Program which was approved with the passage of I-122 in November 2015. The primary goal of the program is to provide \$100 in vouchers to eligible Seattle residents so that they can contribute to candidates for City office who qualify to participate in the program.

Budget Overview

The 2020 Proposed Budget for the Seattle Ethics and Elections Commission (SEEC) maintains investments at current service levels. The only significant change in the SEEC budget is the net-zero conversion of temporary staff to permanent status in the Democracy Voucher program. Having nearly completed two full election cycles, it's become clear that the bodies of work related to public relations (one full-time position) and program administration (one part-time position) are ongoing.

Ethics and Elections Commission

Incremental Budget Changes

Ethics and Elections Commission

	2020 Budget	FTE
Total 2020 Endorsed Budget	1,738,855	5.90
Conversion of Temporary Positions to Permanent Status	-	1.50
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	70,855	-
2020 State Paid Family Medical Leave Increase Base Budget	1,047	-
Citywide Adjustments for Standard Cost Changes	26,136	-
Total Incremental Changes	\$98,038	1.50
Total 2020 Proposed Budget	\$1,836,893	7.40

Description of Incremental Budget Changes

Conversion of Temporary Positions to Permanent Status

Expenditures	-
Position Allocation	1.50

The Democracy Voucher program initially utilized temporary labor during the program's implementation as the staffing needs were unclear. Having almost completed two election cycles, and with the three-year limit on term-limited temporary labor approaching, the program will convert two staff members to permanent status.

A full-time, temporary Public Relations Specialist, Senior will be converted to permanent status. This position addresses the ongoing need to promote awareness of the Democracy Voucher program, develop strategic partnerships with organizations working with underserved communities, and ensure that key program communications are culturally relevant and widely available in multiple languages.

Secondly, the program's half-time Administrative Specialist III position will be made permanent. This body of work, which includes handling program inquiries as well tracking, replacing and processing vouchers, is ongoing.

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures	\$70,855
--------------	----------

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Ethics and Elections Commission

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures	\$1,047
--------------	---------

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$26,136
--------------	----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Department of Finance and Administrative Services

Calvin W. Goings, Director

(206) 386-0041

<http://www.seattle.gov/fas>

Department Overview

The Department of Finance and Administrative Services (FAS), with approximately 600 employees represented by 16 different unions, has the most diverse set of responsibilities of any City department. In addition to the services FAS provides directly to its external customers, FAS also provides behind-the-scenes services to all City departments, which supports their work on the public's behalf. Broadly, FAS's work and operations can be broken into four categories.

Customer Service

FAS is often the first stop for the public to interact with City government. This contact may come through the City's Customer Service Bureau, the Downtown Customer Service Center, the six customer service centers located throughout the city, or the Mobile Customer Service Center which launched in late 2016. Over the phone, online and in person, customers can get information, request services, pay bills, resolve problems and voice opinions. FAS supports the City's compliance with the Washington State Public Records Act by providing Citywide coordination and guidance on public disclosure and by helping customers clarify requests so they receive the information they are seeking from FAS or from other departments. These functions support transparency in City work. In addition, FAS oversees the City's efforts to comply with Title II of the Americans with Disabilities Act. Finally, through the Seattle Animal Shelter, FAS advocates for animal welfare, reunites lost animals with their owners and finds suitable owners to adopt homeless animals.

Regulation and Oversight

FAS ensures that all businesses operating in Seattle are properly licensed and pay the required business and occupation taxes. FAS issues regulatory licenses for certain business types - including taxis, transportation network companies and for-hire vehicles, adult entertainment venues, door-to-door salespeople, short-term rentals, recreational marijuana establishments and trade shows - and enforces requirements related to those licenses. FAS also monitors certain types of businesses to increase consumer safety and ensure proper charges for services. This includes setting rate caps for tows on private property, as well as ensuring that consumers are not overcharged due to an inaccurate device, such as a gas pump or a supermarket scanner or scale. As the central coordinator for City contracting, FAS establishes policies and procedures to ensure fair competition for City-funded construction projects and oversees programs to ensure everyone in the community has equal access to jobs and opportunities involving those projects. As part of these efforts, FAS administers the City's Priority Hire program to increase employment within the construction trades among women, people of color and those living in economically distressed ZIP codes. FAS also enforces animal-related ordinances, including the investigation of animal cruelty, neglect and abuse.

Financial Services

FAS's City Finance Division (CFD) prioritizes sustained fiscal health for the City in balance with the goals set forth by the Mayor and the City Council. CFD accomplishes this by providing Citywide financial direction and cohesive policies to City departments. In addition, CFD manages the City's bond issuance and internal loan programs, administers City-levied taxes, oversees the City's retirement boards, invests City funds and issues reports on City financial activity. CFD ensures that City revenues are collected and that vendors and City employees are paid properly in a timely manner. As a partner with the City's Law Department, CFD administers the payment of claims and judgments for damages against the City. CFD also oversees City financial systems and partners with the Seattle Department of Human Resources to oversee the City's human resources system.

Department of Finance and Administrative Services

Operational Services

FAS designs, builds and maintains most City-owned buildings, including Seattle City Hall, the Seattle Municipal Tower, the Justice Center, the Joint Training Facility, 33 neighborhood fire stations and five police stations. When departments need to acquire property or when the City no longer has a purpose for a property, FAS is responsible for managing the acquisition or disposition of the property. FAS also maintains the City's vehicle fleet, which includes police patrol cars, fire engines and heavy equipment. FAS also negotiates purchasing contracts on behalf of all City departments and establishes purchasing guidelines for departments.

FAS's budget is split into the following eight functional areas:

- Capital Development and Construction Management (CDCM), which plans, designs and constructs accessible City facilities and spaces that are fiscally responsible, operationally sound and environmentally sustainable. CDCM's services include master use and facilities planning, new facility design and construction, building infrastructure, office buildout and renovations, Americans with Disabilities Act (ADA) compliance and space planning.
- Purchasing and Contracting, which manages rules, bids and contracts for products, supplies, equipment and services; maintains guidelines and procedures for consultant contracting; and administers public works contracting to ensure that all City departments adhere to the City's policy goals related to social equity and environmental stewardship.
- Facility Operations, which manages more than 105 public buildings and facilities covering 3 million square feet, including office space, parking garages, police and fire stations, community facilities and maintenance shops; procures leased space for City tenants when needed; plans and acquires new and expanded City facilities; and disposes of surplus City property.
- City Finance, which receives City revenue and provides Citywide financial services such as debt management, treasury, City investments, Citywide accounting, business licensing and tax administration, and risk management which includes claims settlements. City Finance also provides financial oversight of the Central Waterfront Improvement Fund, which funds the approximately \$700 million Waterfront Seattle project.
- Fleet Management, which buys and provides maintenance, motor pool and fueling services for more than 4,000 vehicles and heavy equipment while supporting environmentally sustainable fleet goals and practices as they relate to City climate goals.
- Regulatory Compliance and Consumer Protection, which provides a variety of regulatory services such as overseeing Seattle's taxicab, transportation network company and for-hire vehicle industry, and consumer protection services, such as the Weights and Measures program.
- Seattle Animal Shelter, which promotes public safety and animal welfare, enforces Seattle's laws regarding animals, runs animal sheltering and adoption programs, and manages a spay and neuter clinic, caring for about 5,500 animals per year including dogs, cats, chickens and goats.
- Office of Constituent Services, which provides the customer service interface for the City's constituents through the Customer Service Bureau and at eight customer service centers, responding to more than 210,000 constituent contacts each year in addition to overseeing ADA Title II and Washington state Public Records Act compliance.

Internal service operations in FAS are primarily supported through charges to City departments and, in some cases such as when the City leases space, by private businesses or individuals. FAS also collects certain fees specifically to pay for its services, such as the Seattle Animal Shelter Spay and Neuter Clinic, pet licensing, the Weights and Measures program and for-hire driver licenses. The General Fund supports certain FAS services, including administration of the City's taxes and business licensing services.

Organizational Structure

In addition to the central FAS services mentioned above there are several budgetary units across the City for which FAS is not directly responsible for staffing or service provision but are housed within the FAS organizational

Department of Finance and Administrative Services

structure. For these areas FAS works with City Budget Office to facilitate resource requests and financial plans when required. Those units are:

- Judgment and Claims, which provides for the payment of legal claims and suits brought against the City government.
- Jail Services, which provides for the booking, housing, transporting and guarding of City inmates who are adults charged with or convicted of misdemeanor crimes alleged to have been committed within city limits.
- Indigent Defense Services, which secures legal defense services, as required by state law, for indigent people facing criminal charges in Seattle Municipal Court.
- Transit Benefits, which pays for the transit benefits offered to City employees.

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

As an internal services department, the Department of Finance and Administrative Services (FAS) supports all City departments through its fleets, facilities, customer service, finance, contracting and purchasing functions. FAS bills many of its functions to other City departments through central rates and allocations. FAS also performs general government functions, like business licensing and tax collection, consumer protection, parking meter collections, and operation of the Seattle Animal Shelter, which are funded directly in the General Fund.

The 2020 Proposed Budget includes operating increases to support the Citywide environmental sustainability goals through additional funding for the Green Fleet Action Plan and administrative support for a new Heating Oil Tax. The budget also increases support for existing work including the recreational vehicle (RV) remediation pilot and the administration of the Waterfront Local Improvement (LID). It also provides resources and positions for the ongoing management of the City's Animal Shelter, financial and Human Resources software systems and the implementation of Statewide Initiative 1000 (I-1000). These additions include work funded through existing City resources and the conversion of temporary staff to ongoing positions, recognition of the ongoing nature of this work.

Department of Finance and Administrative Services

In addition, there are technical changes that increase appropriations in FAS, including supporting real estate leases for departments with functions outside of City owned buildings. These technical changes are funded through appropriations in other City departments.

Delivering on the City's Climate and Environmental Goals

In April 2018, Mayor Durkan issued Executive Order 2018-02, directing City departments to accelerate a transition to a clean and green City fleet and committing the City to a goal of achieving a fossil-fuel-free fleet by 2030. As part of this goal, the executive order directed FAS to update the City's Green Fleet Action Plan (GFAP) setting out how this goal will be met. The updated GFAP commits the City to an electric fleet for all vehicle purchases where a market ready option exists. Additionally, the City was among the first in the nation to order hybrid police patrol vehicles and will continue converting existing gas patrol vehicles to hybrid vehicles. Larger, diesel-powered vehicles such as fire engines and heavy machinery do not have suitable electric or hybrid options. The City will switch to renewable diesel fuel which burns 50% cleaner than regular diesel fuel.

Accordingly, the 2020 Proposed Budget includes funding across City departments to upgrade to electric vehicles and to start purchasing renewable diesel fuel. This new funding is in addition to the existing resources in the Endorsed 2020 budget for electric vehicle charging stations and is partially offset by savings from lower fuel usage.

In addition to Fleet electrification, in 2020 the Office of Sustainability and the Environment (OSE) will increase efforts to help Seattle households convert their energy supply away from inefficient and environmentally harmful oil heat through a new tax on oil heating suppliers. FAS will support the implementation and collection of this tax through the Business Licensing and Tax Administration Division. Please see the OSE budget pages for details on this program.

Supporting the Central Waterfront Redevelopment Project

In 2012, City Council adopted Resolution 31399 endorsing an integrated funding plan for the Central Waterfront, including the formation of a Local Improvement District (LID) funded by property assessments. In January 2019, Council passed Ordinance 125762 to form the Waterfront LID. FAS provides support to The Office of the Waterfront in managing the administration of the overall project, including the LID. The final assessment amounts will be confirmed by Council in 2020 and will include assessments of City owned buildings. Therefore, the Proposed 2020 Budget adds resources for these assessments and the administration of the LID itself.

Removing Unsafe RVs from City Right-of-Way

Through the Regulatory Compliance and Consumer Protection (RCCP) division, FAS manages the City's contract with Lincoln Towing for removal of vehicles from City right-of-way. In recent years, this program has included an increasing number of RVs that are inoperable and pose a public health hazard. Impounded RVs that are not collected by owners and are found to be a significant health hazard can be disposed of. Both the increase in the number of RVs being towed and an increase in the size of the City's program mean there will likely be more RVs disposed of in 2020 than in previous years, thus requiring additional resources.

Managing the City's Financial System

The 2018 implementation of PeopleSoft 9.2 has given the City enhanced capabilities in effective and transparent financial management. As the lead department delivering on the effectiveness of the new financial system, FAS has additional needs in both accounting and systemwide management. The additional resources included in the 2020 Proposed Budget will provide increased benefits for the City's audited and public facing financial reports, as well as improving the consistency and accuracy of internal reporting for departments. The 2020 Proposed Budget also provides a sunset position to support to support scoping efforts and implementation of the Human Capital Management Project to replace Human Resources Information System (HRIS).

Implementing Statewide I-1000

Initiative 1000 (I-1000) provides public agencies with the authority to establish and implement affirmative action programs to address the impacts Initiative 200 had on public education, employment opportunities and public

Department of Finance and Administrative Services

contracting programs. Under I-1000, agencies now may establish affirmative action programs that allow setting and achieving goals for protected groups in terms of race, sex color, ethnicity or national origin. The purpose is to increase diversity within defined areas, such as contracting and employment, provided no quotas or set asides are used and there are other selection criteria used besides protected class status.

The City is committed to equity and inclusion within its contracting program, employee hiring and recruitment, and education opportunities for Seattle residents. The Proposed 2020 budget allocates resources to implement this initiative and to continue promoting and advancing our equity and inclusion objectives. This work includes a review of how the City's current policies and aspirational goals fit into initiative requirements, a Citywide disparity study, and development and implementation of any policy or procedural changes necessary to be in compliance with this initiative.

Maintaining Critical Infrastructure

Investing in ongoing maintenance of City facilities is essential to ensure a smooth and safe working environment for employees and visitors. In 2020, FAS will continue work on two large capital projects in the Seattle Municipal Tower (SMT): the heating and air-conditioning system replacement, which began in 2018 and the elevator replacement project. The elevator replacement project will reach 100% design with funding to start in 2021. As the 2020-2025 Capital Improvement Program has been redesigned to reflect risk and uncertainty into project estimates, construction funding for this project will be refined and appropriated as part of next year's budget process.

FAS is also responsible for all of the City's public safety facilities and there are a number of existing capital projects for improvements and maintenance work across these buildings. For example, the funding in this budget adds resources to address ongoing maintenance needs at Fire Station 31.

Space and Lease Needs for City Departments

In 2019, FAS created the Real Estate Services Division, which had previously been incorporated into the Facilities Services Division. This was created within existing budgets and positions. The creation of a new FAS division to specialize in real estate services reflects Mayor Durkan's interest in closer coordination and delivery of interdepartmental real estate strategy and related services. Along with other items managed by this division, the Proposed 2020 Budget includes technical adjustments to provide appropriations for external leases for Seattle Public Utilities and the Seattle Information Technology Department. Both leases were passed via Council action in 2019.

Department of Finance and Administrative Services

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures	\$599,954
--------------	-----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including Information Technology rates, Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across City departments. While the internal service rates are final for 2020, the adjustments reflect initial assumptions about these costs and inflators early in the budget process.

FAS Baseline & Technical Adjustments

Expenditures	\$290,230
Position Allocation	3.00

In 2019, FAS reallocated existing staff to areas that have seen increased workload with the implementation of the PeopleSoft 9.2 system, particularly in the areas of enhanced procedure to pay (EP2P). The position movements were budget neutral. Baseline changes also provide net three position pockets to manage the City's ADA Title II compliance program and tax related rule making and outreach. Additional resources were provided for the financial needs of the Office of the Employee Ombud (OEO).

Q2 2019 Labor Changes 2020 Entry

Position Allocation	5.00
---------------------	------

In 2019, FAS added five position pockets in the second quarter supplemental ordinance. These resources addressed increased workload, providing accounting and budget support to small departments and executive offices, and to support the implementation of PeopleSoft 9.2 in the areas of purchasing, contracting, accounting and budget services.

Proposed Operating

Green Fleet Action Plan Initiatives

Expenditures	\$2,223,000
--------------	-------------

This item adds an additional budget of \$2.2 million to the FAS Fleet Capital Program to implement Mayor Durkan's Executive Order 2018-02: to reduce the City's fleet's greenhouse gas emissions by 50% by 2025 and be fossil fuel free by 2030. The corresponding increases to departmental budgets for these vehicle upgrades are \$1.8 million. An anticipated savings of \$407,000 from reduction in fuel costs are based on anticipated lower fuel usage and would fund the remaining needs.

Citywide Resource Needs for Waterfront Redevelopment LID assessment

Expenditures	\$2,100,000
--------------	-------------

In January 2019, the City Council passed an ordinance forming the Waterfront Local Improvement District (LID). There are a number of City-owned buildings within the designated LID area that are required to pay the assessment. This item adds a one-time appropriation of \$2.1 million to FAS to fund the assessments on those buildings. This expenditure has been anticipated since the LID was proposed in 2012 and funding for these assessments has been held in reserve in the REET fund.

Department of Finance and Administrative Services

Waterfront Redevelopment LID Administration

Expenditures \$881,043

This item adds additional funding of \$881,043 for administrative expenses associated with the implementation of the Central Waterfront Local Improvement District (LID) in 2020. The 2020 LID budget is funded by the existing Central Waterfront Interfund loan prior to collection of LID assessments. This item will be funded with revenues from the LID assessments.

Resource Needs for RV Disposal

Expenditures \$165,154

FAS is responsible for managing the City's contract for vehicle impound management services. This includes the impound and, if appropriate, the disposal of recreational vehicles (RVs) that pose a safety or health hazard. Due to an increase in both the volume and cost of RV disposal, additional funding is required in 2020 to maintain the program at 2019 levels. This increase will fund the disposal of RVs found at the locations currently covered by the City's RV remediation pilot and does not fund the expansion of the work. This is covered in a separate budget item.

Expansion of the RV Remediation Program

Expenditures \$200,000

In addition to funding the existing RV disposal costs in FAS, this budget add provides funding of \$200,000 for the expansion of the impounded RV disposal program. This funding would provide additional funds for the expansion to additional sites that are not currently covered by the City's existing RV remediation program.

Administrative Needs for OSE Heating Oil Tax

Expenditures \$605,000

As part of the City's ongoing work on climate change, the Office of Sustainability and the Environment (OSE) has created a new heating oil tax as an effective way to help Seattle households convert away from ineffective and environmentally damaging heating oil. As with all Seattle taxes, the City Finance division in FAS will provide support for the implementation and administration of this tax. This item provides both one-time and ongoing resources for this program.

Resource Needs Post PeopleSoft (PS) 9.2 Implementation for Citywide Accounting Support

Expenditures \$307,353

Position Allocation 3.00

As the lead department in delivering on the effectiveness of PS 9.2, FAS has additional needs in both accounting and systemwide management. This item adds 3.0 FTE positions (two Principal Accountants and one Business Analyst) with new funding for two of the three positions within the City Finance Division. These positions will allow FAS to continue to manage both the core financial components of the system, but also coordinate business process improvements across the City.

Judgment and Claims Trend Adjustment

Expenditures \$5,000,000

Revenues \$5,000,000

Starting in 2016, the Judgment and Claims (JC) fund expenditures have been showing a higher trend in the settlements and judgments in tort cases and an increase in the use of outside counsel. This trend continues through 2019 and is expected to remain high through 2020. In 2018, Resolution 31847 revised the JC policies and increased

Department of Finance and Administrative Services

the budget appropriation based on actuarial reports. The goal is to achieve beginning a 50% confidence level of meeting actual expenditures in 2019, a 60% confidence level in 2020 and increases of 10% each year that achieve 90% confidence by 2023. This approach is expected to work long-term once the short-term higher trend levels out. An appropriation of \$5 million will meet the expenditure demands of this trend.

Permit System Integration Support

Expenditures	\$214,174
--------------	-----------

This item adds expenditure authority to FAS to cover its portion of new staffing added in Seattle Information Technology Department (Seattle IT) for the Permitting System Integration (PSI) project. See the Seattle IT budget book pages for more details on this program.

Initiative 1000 Implementation

Expenditures	\$179,227
Position Allocation	1.00

In April 2019, the Washington State Legislature passed Initiative 1000 (I-1000) which gives public agencies the authority to establish and implement affirmative action programs to address inequities in public education, employment and contracting based on proven disparate treatment of certain protected classes. This funding adds 1.0 FTE Strategic Advisor II to coordinate the City's implementation of I-1000.

FAS Resource Needs for Human Capital Management (HCM) Project

Expenditures	\$161,091
Position Allocation	1.00

This item funds a sunset Strategic Advisor 2 position (set to sunset the end of 2023) to support scoping efforts and implementation of the Human Capital Management Project to replace Human Resources Information System (HRIS). The Seattle Department of Human Resources (SDHR) is the lead department on this project, although FAS leads on the integration with the PeopleSoft 9.2 system. SDHR will reimburse FAS for this additional cost.

A Permanent Pocket for Animal Shelter Veterinarian

Expenditures	-
Position Allocation	1.00

This item converts a temporary veterinarian position into a full-time permanent Veterinarian position. In 2017, the City Council approved a pilot program to provide additional in-house animal care, which was completed using a temporary position. This program has been successful in reducing wait times for animals requiring care, reducing transportation costs, and increasing vaccination rates and other care for animals at the shelter. The ongoing position allows Seattle Animal Shelter to continue providing this level of service within the existing budget.

Transfer FAS public disclosure office position to Mayor's Office

Position Allocation	(1.00)
---------------------	--------

Between 2015 and 2018, the number of public records requests (PDR) received by the Mayor's Office has more than doubled from 99 in 2015 to 223 in 2018. This budget transfers an existing 1.0 FTE Strategic Advisor 2 Exempt position, currently supporting Mayor's Office PDR requests, from the Department of Finance and Administrative Services to the Mayor's Office. This transfer, as well as an additional PDR position increase in the Mayor's Office, will better align PDR staff with department work.

Department of Finance and Administrative Services

Proposed Capital

Fire Station 31 Improvements

Expenditures \$1,500,000

This item adds \$1.5 million of Real Estate Excise Tax (REET) to the existing Fire Station 31 Capital Improvements project. This project was initially to fund the bunker gear storage room in the basement of the building. During the design and bidding phase for this project additional needs at the station were identified. This additional funding provides resources to ensure the long-term functioning of Fire Station 31. An assessment of the final project scope is underway but it is clear that significant additional funding will be needed.

Seattle Municipal Tower Elevator Rehabilitation

Expenditures \$(3,000,000)

The 2018-2023 CIP provided preliminary estimates for the SMT elevator replacement project prior to pre-design. After completion of pre-design the cost and timing estimates have been updated. The revised schedule funds design at \$1 million in 2020, with estimated overall project costs between \$28 million to \$32 million needed in 2020-2023.

2020 Departmental Space Planning

Expenditures \$1,450,000

This item adds Real Estate Excise Tax (REET) and Street Vacation Fee funding in 2020 to fund space renovations in the Seattle Municipal Tower (SMT) with the goal of helping departments move back into, or stay, in City owned buildings. This funding will be used to renovate space with potential projects including relocating the Office of Labor Standards (OLS) from their current leased space and expanding the current Community Police Commission (CPC) space in SMT. Locating departments inside City owned space is more efficient as FAS manages and operates the buildings, and departmental rents are lower.

Municipal Energy Efficiency Program

Expenditures \$(1,407,554)

This change transfers the Municipal Energy Efficiency Program (MEEP) funding to Seattle Center and Seattle Parks and Recreation for 2020. Previously, this funding was budgeted centrally in the FAS capital budget. The MEEP program is managed by the Office of Sustainability and Environment in support of the City's goal to reduce building energy use.

Proposed Technical

Departmental Space Lease Increases

Expenditures \$489,000

This item increases FAS appropriation by \$489,000 to pay the costs for an external space lease for Seattle Public Utilities (SPU) and Seattle Information Technology Department (ITD). The funding for this change is from each of these departments and this technical adjustment gives FAS the appropriation authority to pay the external leases.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$5,446,260

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

Department of Finance and Administrative Services

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$83,345

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Cost of Issuance and Debt Service BCL Adjustments

Expenditures \$(145,433)

This item adjusts the General Bond Interest Redemption Fund (BIRF) to reflect the actual debt service payments out of the BIRF for 2020. These changes are primarily driven by the Build America Bonds tax credit. This change request also trues up the cost of issuance out of the 2020 bond funds (Tax Exempt and Taxable) to reflect the updated issuance amounts. Refer to the individual department budget pages for more information on projects using debt financing.

Technical Adjustment to FAS CIP Appropriation

Expenditures \$(500,000)

This item is a technical correction to the FAS Information Technology System Initiatives to align the 2020 appropriations with the 2020 - 2025 Capital Improvement Plan. There are no changes to the planned capital project, but this change updates the 2020 Proposed Budget to align with changes made during the 2019-2020 budget development process.

Summit Re-Impl Dept Cap Needs	4,140,313	-	-	-

FAS - BC-FA-ADAIMPR - ADA Improvements

The purpose of the ADA Improvements - FAS Budget Summary Level is to update or modify facilities for compliance with the standards contained in the American with Disabilities Act.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
ADA Improvements	259,204	750,000	750,000	750,000
Total	259,204	750,000	750,000	750,000

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Department of Finance and Administrative Services

FAS - BC-FA-APSCH1FAC - Asset Preservation - Schedule 1 Facilities

This purpose of the Asset Preservation - Schedule 1 Facilities Budget Summary Level is to provide for long term preservation and major maintenance to the Department of Finance and Administration's schedule 1 facilities. Schedule 1 facilities consist of existing and future office buildings located in downtown Seattle, including but not limited to City Hall, the Seattle Municipal Tower and the Justice Center. Typical improvements may include, but are not limited to, energy efficiency enhancements through equipment replacement, upgrades/repairs to heating/ventilation/air conditioning systems, upgrades/repairs to electrical systems, upgrades/repairs to fire suppression systems, roof repairs or replacement, and structural assessments and repairs. This work ensures the long-term preservation of the operational use of the facilities.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Asset Preserv_Sch 1 Facilities	3,983,069	11,752,000	14,552,000	11,552,000
Total	3,983,069	11,752,000	14,552,000	11,552,000

Finance General

Ben Noble, Director

(206) 615-1962

<http://www.seattle.gov/financedepartment/>

Department Overview

Finance General is controlled by the City Budget Office and provides a mechanism for allocating General Fund and other central resources to reserve and bond redemption funds, City departments, and certain programs where the City Council, Mayor, or City Budget Office needs additional oversight.

Budget Snapshot

	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Department Support				
General Fund Support	240,411,634	200,978,410	205,064,889	264,283,055
Other Funding - Operating	6,446,463	6,157,174	4,631,074	9,687,493
Total Operations	246,858,097	207,135,584	209,695,963	273,970,548
Total Appropriations	246,858,097	207,135,584	209,695,963	273,970,548

Budget Overview

Finance General serves as a central repository for ongoing City costs, General Fund contributions to the operations of City departments, and contributions to outside organizations. It also provides a mechanism to hold appropriations temporarily until the City determines the appropriate managing department; to act as a contingency reserve to respond to unpredictable situations; and, to cover costs that vary with economic conditions.

In the 2020 Proposed Budget, Finance General is the mechanism to transfer General Fund resources to the below departments:

- Office of Arts and Culture;
- Seattle Public Library;
- Office of Labor Standards;
- Police Pension;
- Fire Pension;
- Finance and Administrative Services;
- Information Technology;

Finance General

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$4,197,739

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor. For Finance General, this amount reflects General Fund support to the Finance and Administrative Services Department, Office of Labor Standards, Seattle Public Library, and to the Police Relief and Pension Fund and Firefighters Pension Fund personnel.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$56,967

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees. For Finance General, this amount reflects General Fund support to the Finance and Administrative Services Department, Office of Labor Standards, Seattle Public Library, and to the Police Relief and Pension Fund and Firefighters Pension Fund personnel.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(1,602,818)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Finance General Transfer to Departments for Central Rates

Expenditures \$2,694,985

This item is the transfer from the General Fund via Finance General to Seattle Public Library, Office of Labor Standards Fund, Police Pension and Relief Fund, Fire Pension Fund, Department of Finance and Administrative Services and Seattle Information Technology Department for standard cost changes made during the baseline phase. These charges are also reflected in the departmental budget.

Proposed Operating

High Barrier Workgroup Pilots

Expenditures \$2,932,500

This funding is for four pilot programs that have been recommended by the High Barrier Individuals Working Group. This interagency working group was brought together in response to heightened community conversations around public safety and individuals repeatedly caught in a cycle of criminal justice, social services and community incidents.

Finance General

The City and King County will partner to create a 40-60 bed, comprehensive place-based treatment center at the “West Wing” of the King County Correctional Facility. The treatment center will provide intensive on-site treatment for mental health and substance use disorder issues, as well as supportive housing and case management. Three additional pilots include a “rapid re-entry connector” program to plan for the release of individuals from jail; enhanced probation; and “case conferencing” by dedicated law enforcement and services staff to develop a coordinated plan for the most high-barrier individuals. The pilot programs will begin to be implemented in late 2019 and early 2020.

Public Restroom in the University District

Expenditures	\$550,000
--------------	-----------

This funding is for a public restroom in the University District. Funding will support planning (including identifying potential sites) as well as the cost to provide a public restroom.

Seattle Storm Relocation Costs

Expenditures	\$2,600,000
--------------	-------------

This item increases appropriation authority by \$2.6 million to pay for the Seattle Storm’s relocation costs, per the amended facility use agreement between the Storm and the City as approved by the City Council. While the Arena at Seattle Center is undergoing redevelopment, the Storm has been displaced from the facility. Under the amended facility use agreement, the City must pay for certain lost revenues and increased costs related to this displacement.

Strategic Investment Fund to Address Displacement

Expenditures	\$41,700,000
--------------	--------------

This fund will support strategic investment in areas at high risk of displacement or in areas of low access to opportunity that present unique opportunities for transformational equitable development. This would include areas with significant planned public investment like light rail station areas and parks, where increased access to opportunities will likely also increase displacement pressure. This fund will focus on sites and projects with the potential to achieve multiple community benefit outcomes through mixed-use and mixed-income development that creates opportunities for housing, affordable commercial and cultural space, public open space, and childcare.

Implementing this strategy will require creative use of existing expertise across City departments, outside expertise, and multiple forms of partnership. The City intends to execute this strategy in a way that builds on existing City and community assets and deepens relationships with community development organizations and other agencies committed to these outcomes. An interdisciplinary team including the Office of Planning and Community Development, Office of Housing, Office of Economic Development, the Office of Arts and Culture, Department of Neighborhoods, Office for Civil Rights, Department of Finance and Administrative Services and community partners experienced in community organizing and/or development will be formed in the third quarter of 2019 to finalize the criteria and principles for successful use of these funds through community engagement and outreach. We expect that this team, with the help of a development consultant, will identify priority investment opportunities and screen initial opportunities most likely to meet the goals of the program and pass an initial feasibility analysis. A short-list of priority opportunities will be further vetted in the first quarter of 2020 to determine conceptual development mix and scale, identification of potential partners, leveraging opportunities, and strategies to mitigate risk. Finally, the City will begin executing this investment strategy in mid-2020.

These funds are under proviso in Finance General until the Mayor’s Office submits a spending plan to the City Council in the first or second quarter of 2020.

Finance General

Support to IT Department in Lieu of Cable Franchise Funds

Expenditures \$750,000

This item provides \$750,000 of ongoing General Fund support for the Digital Equity program in the Seattle Information Technology Department which was previously supported by Cable Franchise Fees. Cable Television Fund revenues are steadily declining and these funds enable continuation of the program.

Implicit Bias Training for SPD Officers

Expenditures \$(100,000)

This item is a one-time transfer of budget from Finance General to the Seattle Police Department for all officers to receive implicit bias training from a national expert. Implicit bias is the subconscious form of group-based bias. The training will include an overview of implicit bias research and findings, interactive and introspective exercises and small group dialogue.

Civilian Investigator in the Office of Police Accountability

Expenditures \$(148,832)

The Office of Police Accountability (OPA) establishes and manages processes to initiate, receive, classify and investigate allegations of police misconduct. This item transfers budget from Finance General to OPA to add a full-time civilian investigator to the office. Civilian investigators receive complaints of misconduct from the public and investigate those complaints. OPA is currently budgeted for nine sworn investigators and one civilian investigator.

Proposed Technical

Adjust Debt Service Payments

Expenditures \$(165,006)

This adjusts Finance General payments for debt service to reflect projected debt service obligations for actual debt issuances.

Beginning Balance Transfer for Sweetened Beverage Tax Fund

Expenditures \$4,018,000

Revenues \$4,018,000

Pursuant to Ordinance 125886, this item transfers Sweetened Beverage Tax proceeds from the General Fund to the new Sweetened Beverage Tax Fund. This amount represents the beginning 2019 balance for Sweetened Beverage Tax in the General Fund and will allow departments to begin spending Sweetened Beverage Tax out of the new fund immediately in 2020, before 2020 revenue is deposited into the Fund. Any additional unspent Sweetened Beverage Tax proceeds from 2019 will be transferred from the General Fund to the new Sweetened Beverage Tax Fund in the same manner after 2019 fiscal year end, once final balances are known.

Increase Budget for Insurance Premiums

Expenditures \$383,921

Insurance premiums are paid by Finance General on behalf of City departments. Large liability insurance claims in recent years have increased premiums significantly, and this is a trend projected to continue in 2020. This increment is needed to fund the anticipated 2020 premium payment.

Finance General

Increase Fire Hydrant Payment to SPU

Expenditures \$496,000

This increases the General Fund support to Seattle Public Utilities for hydrant maintenance, a general government expense. SPU expects an increase in costs to service fire hydrants due to inflationary cost increases, growth in the number of assets requiring service, and accelerated work on maintenance backlogs.

Increase Transfer to Fiscal Reserve Funds

Expenditures \$508,292

This increases the General Fund transfer to the Emergency Fund and the Revenue Stabilization Fund. Transfer amounts are based on financial policies established by state law and city ordinance. For the 2020 Proposed Budget, the City adds \$1.9 million to the Emergency Fund reserve balance, bringing the total to \$66.9 million for 2020, and \$3.0 million to the Revenue Stabilization Fund reserve balance bringing the total to \$60.8 million for 2020.

Partially Restore Budget for Disability Claim Reserve

Expenditures \$63,233

In the development of the 2020 Endorsed Budget, the City Council took an across the board General Fund reduction with Green Sheet 1-10-B-1. For Finance General, the reduction came from the Disability Claim Reserve project. This budget proposal partially restores the \$500,000 original budget to \$350,000.

Street Lighting Reserve

Expenditures \$500,000

Increase to recurring reserve in Finance General for payments to Seattle City Light for street light maintenance, a General Fund obligation. Increases are due to lower than projected conversions to LED bulbs and therefore, higher than projected electricity consumption.

Technical Adjustment for OLS Space Rent

Expenditures \$(219,649)

This is a technical adjustment to the baseline budget of the Office of Labor Standards in the amount of \$219,649. This adjustment corrects previous estimates for lease increase.

Transfer Short-Term Rental Tax Baseline Budget to New Fund

Expenditures \$(193,157)

Finance General contained baseline budget for debt service payments funded with Short-Term Rental Tax for the affordable housing bonds. This technical change reflects the requirements of Ordinance 125872, and transfers the baseline department budget for Short-Term Rental Tax activity from the General Fund (00100) to the Short-Term Rental Tax Fund (12200). In addition, this change request reduces the budget due to lower than anticipated debt service payments.

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures -

This technical change reflects the requirements of Ordinance 125886, and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero.

Finance General

Transfer to Arts and Culture Fund

Expenditures	\$252,410
--------------	-----------

This increases the transfer from the General Fund to the Arts and Culture Fund in accordance with City policy. This change incorporates updated actual 2018 Admissions Tax revenue, which was higher than projected in the 2020 Endorsed budget. Each budget year's transfer amount reflects Admissions Tax revenue from two years prior.

Transfer to Judgement and Claims Fund

Expenditures	\$5,000,000
--------------	-------------

This transfers additional funding to the Judgement and Claims Fund to cover higher expenditures due to increases in settlements and tort cases and the use of outside counsel. There is a corresponding increase in the Judgement and Claims Fund in the Department of Finance and Administrative Services for payments.

Appropriations by Budget Summary Level and Program

FG - BO-FG-2QA00 - Appropriation to Special Funds

The purpose of the Appropriation to Special Funds Budget Summary Level is to appropriate General Fund and other centrally managed resources, several of which are based upon the performance of certain City revenues, to bond redemption or special purpose funds. These appropriations are implemented as operating transfers to the funds or accounts they support.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Appropriation to Special Funds	211,063,724	168,000,026	169,939,484	181,603,168
Total	211,063,724	168,000,026	169,939,484	181,603,168

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

FG - BO-FG-2QD00 - Reserves

The purpose of the Reserves Budget Summary Level is to provide appropriation authority to those programs for which there is no single appropriate managing department, or for which there is Council and/or Mayor desire for additional budget oversight.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Reserves	35,794,372	39,135,558	39,756,479	92,367,380
Total	35,794,372	39,135,558	39,756,479	92,367,380

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Office of Hearing Examiner

Ryan Vancil, Hearing Examiner

(206) 684-0521

<http://www.seattle.gov/examiner/>

Department Overview

The Office of Hearing Examiner is Seattle's quasi-judicial forum for reviewing factual and legal issues raised by the application of City Code requirements to specific people or property. As authorized by the Seattle Municipal Code, the office conducts hearings and decides appeals in cases where members of the public disagree with a decision made by a City agency. Many of the matters appealed to the Hearing Examiner relate to land use and environmental permit decisions and interpretations made by the Seattle Department of Construction and Inspections. The Hearing Examiner also hears appeals in many other subject areas, and makes recommendations to the City Council on rezone petitions, major institution master plans, and other Council land-use actions. Pursuant to authority granted in 2004, the Hearing Examiner also provides contract hearing examiner services to other local governments.

The Hearing Examiner is appointed by the City Council, and Deputy Hearing Examiners are appointed by the Hearing Examiner. Examiners handle all pre-hearing matters, regulate the conduct of hearings, and prepare decisions and recommendations based upon the hearing record and applicable law. The Seattle Municipal Code requires all examiners to be attorneys with training and experience in administrative hearings. The Hearing Examiner also manages an executive assistant to oversee the administrative areas of the office, a legal assistant to assist with hearings and decision preparation, and an administrative specialist to support all other office positions and provide information to the public.

Office of Hearing Examiner

Budget Overview

The 2020 Proposed Budget maintains support to the Hearing Examiner and preserves the services provided by the Hearing Examiner to members of the public and the City Council. Technical adjustments have been made to bring the proposed budget into alignment with an Annual Wage Increase, a State Paid Family Medical Leave increase, and other citywide adjustments to internal service costs.

Additionally, the 2020 Proposed Budget includes a part-time position to support appeals of fire code violations issued by the Seattle Fire Department (SFD). 2019 legislation is anticipated to grant SFD the authority to issue citations for Fire Code violations such as locked exit doors, failure to properly maintain fire protection systems like sprinklers, and repeated false alarms. The Hearing Examiner will partner with the SFD to hear appeals to the citations.

Office of Hearing Examiner

Incremental Budget Changes

Office of Hearing Examiner

	2020 Budget	FTE
Total 2020 Endorsed Budget	965,060	4.63
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	46,104	-
2020 State Paid Family Medical Leave Increase Base Budget	725	-
Citywide Adjustments for Standard Cost Changes	(5,847)	-
Fire Code Citations	32,671	0.37
Total Incremental Changes	\$73,653	0.37
Total 2020 Proposed Budget	\$1,038,713	5.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$46,104

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$725

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(5,847)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Office of Hearing Examiner

Fire Code Citations

Expenditures	\$32,671
Position Allocation	0.37

This item increases an Administrative Specialist II position from part time to full time to support hearing appeals to the Seattle Fire Department's fire code citations. The increase is due to the impact of anticipated 2019 legislation that will grant SFD the authority to issue citations for Fire Code violations such as locked exit doors, failure to properly maintain fire protection systems like sprinklers, and repeated false alarms. This item is funded through citation fees.

Seattle Department of Human Resources

Bobby Humes, Director

(206) 684-7999

<http://www.seattle.gov/personnel/>

Department Overview

The Seattle Department of Human Resources (SDHR) is responsible for centrally setting the strategic direction for human resources services: identifying, hiring, and retaining the City's dynamic, diverse workforce as well as developing and administering a compensation and benefits program to create a quality employee experience. SDHR also provides core human resources (HR) support services to all City employees. SDHR operations:

- create greater HR accountability and collaboration citywide so that consistent, cost-effective services are provided to all employees;
- provide full-service HR to 18 supported departments;
- manage the evolving HR alignment strategic plan;
- ensure a culture of respect and dignity for all employees;
- develop consistent policies, improved services, and programs that enhance the workforce;
- develop proactive workforce equity through our Workforce Equity Strategic Action Plan; and
- provide executive recruitment and succession planning services.

SDHR establishes Citywide personnel rules; offers strategic consultative assistance to departments, policymakers and employees; and ensures department staff and managers receive information and resources required to meet business needs and legal requirements such as leave administration.

The **Director's Office** establishes Citywide personnel rules; offers strategic consultative assistance to departments, policymakers and employees; provides internal fiscal management and budget development; and spearheads Citywide programs and efforts such as the Human Resources Strategic Plan and the Workforce Equity Initiative.

Citywide Shared Administrative Services administers Citywide quality and cost-effective employee benefits, including health care and workers' compensation; provides Citywide safety, classification/compensation and Workforce Analytics & Reporting services; manages the City's voluntary deferred compensation plan; and handles absence management.

Citywide Workforce Equity leads the Workforce Equity Strategic Plan and proactively addresses policies, processes and practices that advance the City's ability to maintain consistent and equitable treatment of employees Citywide. Partners include the Office for Civil Rights and the community to end racial disparities and create fair and equitable City career pathways.

Citywide Labor Relations develops and implements labor relations strategies in collaboration with labor management teams across the City, develops training in coordination with HR systems administration and operations while bargaining the impacts of management strategy and philosophy with labor partners.

Citywide Service Delivery and Talent Acquisition provides human resources support to executive offices; strategic alignment with department HR leaders and staff; and talent engagement, selection and staffing accountability for equitable outcomes.

Citywide HR Shared Governance is the strategy by which the Citywide HR workplan is developed by the multi-departmental Human Resources Leadership Team (HRLT) and focuses on projects intended to improve HR practices, standardize HR processes, implement Citywide HR programs, and update policies to meet workforce and business needs.

Seattle Department of Human Resources

Citywide Human Resources Investigations Unit responds to and thoroughly investigates employee allegations of harassment, discrimination, retaliation and harassment-related misconduct in a manner which reflects an acknowledgement of the historical limitations of the employment law.

Personnel Compensation Trust Funds

The Seattle Department of Human Services (SDHR) administers five Personnel Compensation Trust Funds related to employee benefits. These funds are managed through Citywide contractual obligations on behalf of employees and City departments. The administering department collects funds from other City departments, which are then paid out to various insurance companies, service providers, and individuals.

Health Care Fund: contains the revenues and expenses related to the City's medical, dental and vision insurance programs; Flexible Spending Account program; Employee Assistance Program; COBRA continuation coverage; and other healthcare related items. The City is self-insured for both the Aetna and Kaiser medical plans, the vision plan, and one dental plan and carries insurance for the remaining dental plan.

Fire Fighters Health Care Fund: was created to track fire fighter employee contributions previously held within the larger Health Care Fund. Fire fighter premium collections are distributed directly to the trust that provides fire fighters' healthcare.

Industrial Insurance Fund: captures the revenues and expenditures associated with the City's Workers' Compensation and Safety programs. Since 1972, the City of Seattle has been a self-insured employer as authorized under state law. The Industrial Insurance Fund receives payments from City departments to pay for these costs and related administrative expenses. Overall costs include fees levied by the Washington State Department of Labor and Industries, reinsurance premiums, and administrative costs to manage the program.

Unemployment Insurance Fund: contains the revenues and expenditures associated with the City's unemployment benefit and administration costs. The City is a self-insured employer with respect to unemployment insurance.

Group Term Life Insurance Fund: contains the revenues and expenses related to the City's group term life insurance, long-term disability insurance, and accidental death and dismemberment insurance plans.

Seattle Department of Human Resources

Budget Overview

The Seattle Department of Human Resources (SDHR) strives for a consistent, equitable employee experience at the City so that employees can do their best work. SDHR supports employee resources such as benefits and professional development, and department services such as employee relations and job classifications. SDHR provides full HR services to most small and medium-sized departments. The City's larger departments employ their own HR staff. This structure has created the potential for varying levels of HR services and employee experiences across the City. Citywide alignment of HR policies and programs is essential to support City efforts towards workforce equity and consistent policy interpretation.

The 2019 Adopted Budget highlighted the work of SDHR to align the City's HR practices, creating strategic changes in workplace culture that would lead to the deepest impacts on workforce equity. The 2020 Proposed Budget adds one-time \$2.6 million and ongoing \$3.3 million and 7.5 FTE to support several key department additions:

Human Resources Investigations Unit

In 2018, the Mayor issued [Executive Order 2018-04](#) on Anti-Harassment and Anti-Discrimination following the Anti-Harassment Inter-Departmental Team (AH IDT) recommendations to transform the City's workplace culture to promote a safe, welcoming and inclusive workplace for all employees. The 2019 Adopted Budget established the Human Resources Investigation Unit (HRIU) with a Director and City Investigator positions. Two additional Investigator positions and one Management Systems Analyst were added through the 2019 2nd Quarter Supplemental Budget Ordinance. The 2020 Proposed Budget adds a third Investigator to the unit. These positions support the initial work to stand up the HRIU unit and begin the phased process to transition in-scope department intake and investigations to HRIU. The HRIU investigators will also work closely with the newly created Office of the Employee Ombud to ensure that workplace misconduct concerns are addressed. These positions are paid for through central cost allocation and are budget neutral adds.

Anti-Harassment/Anti-Discriminations Citywide Trainings

The Anti-Harassment and Anti-Discrimination Executive Order (EO) also tasked the SDHR director and the director of the Office for Civil Rights (OCR) to develop anti-harassment and anti-discrimination (AH/AD) training and then to work with all departments to develop a plan for employees to receive AH/AD and bias training. In order to meet the city-wide learning plan that is outlined in the Mayor's Executive Order, AH/AD learning content needs to be developed and implemented for approximately 11,000 City employees across 25 departments. This demand for trainings far exceeds the capacity that the two departments currently have for providing trainings. SDHR is the lead department on the EO and the training plan. The 2020 Proposed Budget adds two positions to SDHR: one permanent Project Manager and one term-limited one-year Project Coordinator to assist in the initial implementation of the training plan. The OCR position, as described in the OCR section of the budget, will add capacity to the department to lead Race and Social Justice Initiative (RSJI) training and partner with SDHR on embedding RSJI in the anti-harassment and anti-discrimination trainings.

City Leadership Academy

The City Leadership Academy (CLA) is a nine-month development program for City of Seattle employees who want to expand their leadership skills, create change, and model racial equity, social justice, and inclusion. The CLA is a key strategy in creating a safe and inclusive workplace, as well as providing pathways for advancement for City personnel. The 2020 Proposed Budget includes a permanent position and operational funding to ensure this program continues to equip leaders with the skills to lead change, develop an inclusive culture, and collaborate across departments. The CLA is partially funded by \$5,000 departmental sponsorships per employee accepted into the program.

Full HR Support for Small Departments and Offices

SDHR provides end-to-end HR support and aligns HR services to numerous departments and offices throughout the City. The 2020 Proposed Budget makes permanent a mid-year 2019 addition of a HR Business Partner to expand full-service HR support to additional City offices.

Seattle Department of Human Resources

HR Alignment

The 2019 Adopted Budget included a new HR allocation, charging SDHR's operating costs to each City department, and falling in line with the other central cost departments – the Seattle Information Technology Department (ITD) and the Finance & Administrative Services Department (FAS). The 2020 Proposed Budget continues SDHR's work towards transitioning and consolidating in a concerted effort to further engaging departments with the services they provide, supporting departments and employees, and solidifying the foundation for HR alignment.

Comprehensive Wage Study

In an effort to align City represented job titles with current market rates, ensuring the equity and competitiveness of City jobs, the City will engage in a comprehensive wage study under the terms of a Memorandum of Agreement (MOA) between the City and the Coalition of City Unions. The wage study will encompass all Coalition titles, of which there are approximately 650 Citywide and is funded at \$2 million. This project is expected to be completed by December 31, 2021.

Other 2020 Proposed Budget Items

Several additional baseline and operational adjustments are included in the proposed budget, which:

- Adjusts appropriation for changes to central costs including internal services, health care, retirement and workers' compensation charges;
- Adds two positions, a 0.5 Administrative Specialist 2 in support of the retiree medical plan funded by the Retirement Department (SCERS), and the addition of a term-limited temporary Health Advocacy Project Manager to implement and manage the City's new Advocacy and Well-Being (AWB) program, funded by the Health Care Fund;
- Adds budget and appropriations for \$70,000 for annual software license fee increases; and
- Adds funding for the first year of a two-year scoping and planning study to replace HRIS/EV5, the current system used for employee timekeeping, payroll, and basic HR management functions. The first year adds \$336,000 and the second-year costs, currently estimated at \$2.2 million, will be addressed in the next biennial budget.

Finally, the 2020 Proposed Budget includes net-zero technical adjustments for simplification and alignment of SDHR's budget. These adjustments include correcting labor budgets to align with position transfers, the reallocation of paid time off distribution for ease of tracking and reporting, the consolidation of IT project budgets to ensure proper account coding, and the redistribution of the indirect project budget to improve SDHR's complex cost recovery.

Personnel Compensation Trust Funds

The following provides a summary of each of the five individual funds that comprise the Personnel Compensation Trust Funds and are administered by SDHR.

Health Care Fund: Total City health care costs including medical, dental and vision care are expected to reach \$264 million in 2020. The City of Seattle experienced slow growth in average cost increases from 2014 through 2016. However, health care costs are generally cyclical in nature and in 2017 and 2018 the City of Seattle experienced health care deficits. Costs are expected to increase with a 7% annual trend in 2020.

The 2020 Proposed Budget assumes an estimate of 12,058 active employees enrolled in healthcare.

Fire Fighters Health Care Fund: The Fire Fighters Health Care Fund was created in the City's new financial system to track fire fighter employee contributions previously held within the larger Health Care Fund. This adjustment transfers revenue and expense budget to the new fund (63100).

Seattle Department of Human Resources

Industrial Insurance Fund: The 2020 Proposed Budget assumes decreases in total expenditures, principally due to lower projected fees paid to the state Department of Labor and Industries (L&I) for assessments and other services.

The 2020 Proposed Budget includes no funds for purchase and implementation of a new workers' compensation system, a project scheduled for completion in 2019. However, two additional administrative expenditures are proposed, including a one-time cost of \$50,000 to configure the new system to streamline Occupational Safety and Health Administration (OSHA) reporting and an on-going annual expenditure of \$15,000 for staff certifications required by L&I.

Unemployment Insurance Fund: The 2020 Proposed Budget for unemployment expenses is unchanged from the 2020 Endorsed Budget.

Group Term Life Fund: Total costs in the fund are expected to be approximately \$6.6 million in 2020. Unchanged from the 2020 Endorsed Budget the City Council approved in November 2018, the 2020 Proposed Budget costs are an increase of 2% over the 2019 Adopted Budget.

Seattle Department of Human Resources

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$950,139

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$14,816

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Budget Increase for Cornerstone System Licensing Costs

Expenditures \$70,000

SDHR pays the annual license fees for Cornerstone, the Citywide training and performance management system. The contract is five years with a two-year extension and is scheduled to expire in June 2019. The City's cost did not change during the initial five-year period. Under the terms of the extension, the vendor will adjust the City's license fees to reflect interim price increases, a change in the subscription model and growth in the number of employees using the system. This change in appropriations will cover the additional cost of subscription.

Citywide Adjustments for Standard Cost Changes

Expenditures \$1,060,158

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Transfer Budget Authority from Health Care Fund to Fire Fighters Health Care Fund

Expenditures -

Revenues -

A new Fire Fighters Health Care Fund was created in the 2019 2nd Quarter Supplemental Budget Ordinance. The City's health care costs for fire fighters had previously been appropriated in the Health Care Fund and separating them out allows for easier tracking of fire fighter employee contributions. This action transfers appropriation authority from the Health Care Fund to the Fire Fighters Health Care Fund.

Seattle Department of Human Resources

Proposed Operating

Addition of AH/AD Learning Partner and Project Manager

Expenditures	\$281,551
Position Allocation	1.00

This item adds two positions in SDHR to create and implement the work of the Anti-Harassment/Anti-Discrimination Citywide Train-the-Facilitator (TTF) program and develop and manage Anti-Harassment/Anti-Discrimination learning courses. These positions include:

- One 1.0 FTE Strategic Advisor 1, One-year Term-Limited Temporary
- One 1.0 FTE Strategic Advisor 1, Permanent

The TTF is in line with and supports the vision of SDHR serving as a consulting body. Furthermore, the TTF model builds capacity using existing resources, is more sustainable, and advances the work of shifting the City culture to one that learns and practices racial equity. An additional position is included in the Office for Civil Rights budget.

Addition of City Leadership Academy Program Advisor and Program Funding

Expenditures	\$247,559
Revenues	\$100,000
Position Allocation	1.00

This item adds a 1.0 FTE City Leadership Academy (CLA) Strategic Advisor 1 Program Advisor position and appropriates program costs from two sources: a sponsorship fee paid for each participant by the home department, and the remainder recovered through SDHR allocation (beginning 2021).

Addition of Funding for Human Capital Management (HCM) Scoping Study

Expenditures	\$336,149
--------------	-----------

This item adds funding for the first year of a two-year scoping and planning project for the future replacement of the current HRIS/EV5 application, which helps track position authority and personnel across the City. The current HRIS/EV5 application is at or near end of its useful life and it will be an ongoing challenge to stay current and compliant with security requirements.

Addition of HR Investigations Unit Positions

Expenditures	\$625,644
Position Allocation	4.00

This item adds four positions to the Human Resources Investigations Unit created through the Mayor's Executive Order 2018-04. These positions include:

- Three 1.0 FTE Strategic Advisor 2 - City Investigators
- One 1.0 FTE Management Systems Analyst

These positions support the initial work to stand up the HRIU unit and begin the phased process to transition in-scope department intake and investigations to HRIU.

Addition of Human Resources Business Partner

Expenditures	\$156,081
Position Allocation	1.00

This item adds a 1.0 FTE Strategic Advisor 1 HR Business Partner (HRBP) position to provide full-service HR support to additional small City offices. This request is for budget authority only as ongoing funding is through the SDHR internal services cost allocation.

Seattle Department of Human Resources

Addition of Retiree Benefits Position

Expenditures	\$52,599
Position Allocation	0.50

This item adds a 0.5 FTE Administrative Specialist 2 position to provide retiree medical plan administrative support. This request is for budget authority only as ongoing funding is through the Retirement Department (SCERS) and is through the SDHR internal services cost allocation.

Addition of Term-Limited Temporary Health Advocacy Project Manager

Expenditures	\$131,534
--------------	-----------

This item adds a term-limited temporary 1.0 FTE Strategic Advisor 1 Health Advocacy Project Manager to implement and manage the City's new Advocacy and Well-Being (AWB) program. The position will assist with review and evaluation of vendor proposals, develop change management communication strategies and be responsible for post-implementation activities, strategies and communication. The Health Care Fund will cover the salary and benefits costs.

Addition of Two Term-Limited Temporary Positions and Funding for Wage Study

Expenditures	\$2,008,868
--------------	-------------

This item adds two term-limited temporary positions and funding for consultant costs to complete a comprehensive wage study encompassing all Coalition titles. The positions include:

- One 1.0 FTE Strategic Advisor 2, Term-Limited Temporary
- One 1.0 Management Systems Analyst, Term-limited Temporary

This will be funded pursuant to a Memorandum of Agreement (MOA) between the City of Seattle and the Coalition of City Unions. The study is expected to take multiple years.

Implement Centralized OSHA Workers Compensation System

Expenditures	\$50,000
--------------	----------

This item adds one-time funding to configure new Origami workers compensation system Citywide, implement centralized OSHA tracking and reporting, and transition all departments to the centralized system; this will allow SDHR to easily track Citywide trends and produce aggregate reports.

Increase Budget for Workers' Compensation Training and Certification

Expenditures	\$15,000
--------------	----------

This item adds ongoing funding to support the required Washington State Department of Labor and Industries (L&I) certification and training of City employees who administer worker compensation claims.

Transfer of Positions to HR Investigations Unit

Expenditures	-
--------------	---

This item transfers two existing positions to the HR Investigations Unit created through the Mayor's Executive Order 2018-04. These positions include:

- One 1.0 FTE Executive 1 - Director
- One 1.0 FTE Strategic Advisor 3 – City Investigator

These positions support the initial work to stand up the HRIU unit and begin the phased process to transition in-scope department intake and investigations to HRIU.

Seattle Department of Human Resources

Proposed Technical

2020 Healthcare Expenditure Adjustment

Expenditures \$14,901,380

This adjustment to the health care fund reflects a trend rate of 7% in 2020. The City's total health care enrollment is expected to have a slight increase in 2020, compared to the 2019 Adopted Budget.

2020 Industrial Insurance Expenditure Adjustment

Expenditures \$(215,127)

This adjustment to the Industrial Insurance fund reflects decreases in total expenditures of 1%, due principally to lower projected fees to be paid to the Department of Labor and Industries (L&I) for assessments and other services.

Balancing of Indirect Cost Recovery

Expenditures -

This budget neutral adjustment redistributes indirect cost recovery to balance 2020 Proposed Budget.

Consolidation of IT Projects Budget

Expenditures -

This budget neutral adjustment moves the Customer Relationship Management System budget to ensure accurate coding.

Indirect Cost Recovery Alignment

Expenditures -

This technical adjustment is a net-zero alignment between indirect cost recovery accounts.

Indirect Project Budget Alignment

Expenditures -

This budget neutral adjustment redistributes the salary and benefits budget to materially improve SDHR complex indirect cost recovery for internal budget management, tracking and reporting.

Net-Zero Budget Alignment

Expenditures -

This budget neutral adjustment aligns labor budget with position transfers.

Paid Time Off Cost Redistribution

Expenditures -

This budget neutral adjustment reallocates the budget authority for Paid Time Off for ease of tracking and reporting purposes.

SDHR - BO-HR-N6000 - HR Services

The purpose of the HR Services Budget Summary Level is to provide Citywide strategic and technical human resources support while incorporating workforce equity strategies. This BSL administers employee benefits including health care and workers' compensation, the voluntary deferred compensation plan, and absence management; provides recruitment and staffing services; delivers employee training and development services; and negotiates and implements collective bargaining agreements. Other functions include safety, compensation/classification, supported employment programs, and Citywide human resources information management services.

Office of Immigrant and Refugee Affairs

Cuc Vu, Director

(206) 233-3886

www.seattle.gov/iandraffairs

Department Overview

The mission of the Office of Immigrant and Refugee Affairs (OIRA) is to improve the lives of Seattle's immigrant and refugee families. OIRA works to strengthen immigrant and refugee communities by engaging them in decisions about the City of Seattle's future and improving the City's programs and services to meet their needs.

OIRA collaborates with the Immigrant and Refugee Commission, community partners, government agencies, faith-based institutions, the private sector, and City departments to achieve our mission. According to the 2014 American Community Survey, immigrants and refugees comprise approximately 18 percent of Seattle's population. Today, the immigrant population has likely grown, as recent Census Bureau data shows that one in four (more than half a million) King County residents is foreign-born, increasing diversity in the region.

OIRA is dedicated to supporting the City's Race and Social Justice Initiative by consistently using the racial equity toolkit analysis, operationalizing racial equity in our workplans, and engaging directly with immigrant and refugee communities.

Office of Immigrant and Refugee Affairs

Budget Overview

Mayor Durkan's 2020 Proposed Budget continues the City's commitment to protecting Seattle immigrants and their families from threats to their well-being and safety. The 2020 Proposed Budget maintains resources and staff to support the ongoing work of the Office of Immigrant and Refugee Affairs and includes technical baseline adjustments to meet tentative agreements with the Coalition of Unions. The tentative agreements include a State Paid Family Medical Leave and an Annual Wage Increase. Additional baseline adjustments account for changes to the expenditure authority and revenue acceptance of Washington State Department of Social and Health Services (DSHS) and Seattle Housing Authority (SHA) grants to fall in line with the issuance of the awards. The request for expenditure authority and revenue will be added via supplemental grant acceptance upon notice of receipt.

The final baseline adjustment addresses the partnership with King County to fund the Legal Defense Network. In 2017, the City provided \$1 million in one-time funding and the County added \$550,000 in one-time funding to create the Seattle-King County Immigrant Legal Defense Network (LDN) running through the end of 2018. The City, assuming it would continue to administer the joint program, renewed its commitment to invest \$1 million annually to the LDN in the 2019 Adopted and 2020 Endorsed Budget. Since the budget was adopted, Seattle and King County have worked to refine the program model and shifted funds to the County to administer. The ordinance associated with the five-year King County Veterans, Seniors and Human Services Levy (VSHSL) funding which supports the County contribution requires the County to conduct any procurement and evaluation processes associated with the VSHSL funding. As a result, the shift in contract administration to King County was necessary to allow continued joint funding of this regional program, though OIRA maintains a policy, planning and convening role. While this technical adjustment reduces OIRA's expenditure authority of the County's portion, the City's commitment to the LDN remains unchanged. Since starting in October 2017, the LDN has assisted over 700 individuals with legal advice, direct representation, and in placing them with pro bono attorneys.

Office of Immigrant and Refugee Affairs

2020 Coalition and Non-Rep Annual Wage Increase Base Budget	85,103	-
2020 State Paid Family Medical Leave Increase Base Budget	1,343	-
Total Incremental Changes	\$(1,132,726)	-
Total 2020 Proposed Budget	\$3,954,420	9.50

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$6,769

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

DSHS grant expenditure and revenue reduced

Expenditures \$(390,000)

Revenues \$(390,000)

This technical change reduces the \$390,000 expenditure authority and revenue in the 2020 baseline which corresponds to WA Department of Social and Health Services funding awarded annually for a July-June contract period, to support the New Citizen Program. In future this expenditure authority and revenue will be added via supplemental grant acceptance ordinance when received.

Office of Immigrant and Refugee Affairs

King County Funding to Legal Defense Network Reduction

Expenditures	\$(810,000)
--------------	-------------

This adjustment reduces OIRA's expenditure authority corresponding to the amount appropriated for King County's portion of 2020 funding for the Legal Defense Network (LDN). Per a Memorandum of Agreement, King County will administer the funds for both entities and not transfer the County funding to the City of Seattle.

SHA grant expenditure and revenue reduced

Expenditures	\$(25,941)
Revenues	\$(25,941)

This technical change reduces the \$25,941 expenditure authority and revenue in the 2020 baseline which corresponds to Seattle Housing Authority funding awarded annually, to support the New Citizen Program. In future this expenditure authority and revenue will be added via supplemental grant acceptance ordinance when the award notification is received.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures	\$85,103
--------------	----------

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures	\$1,343
--------------	---------

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Seattle Information Technology Department

Saad Bashir, Chief Technology Officer

(206) 386-0026

<http://www.seattle.gov/seattleIT>

Department Overview

The Seattle Information Technology Department (Seattle IT) provides strategic direction for and management of the City's information technology resources. These include telecommunications, data, and supporting physical infrastructure; applications and application infrastructure; computer engineering and operations; data centers, servers, storage, and backup equipment; desktop, mobile, and printing devices; cloud services; digital engagement services; and the services to provide, maintain, and support the above for the City.

Seattle IT is a relatively new department, created in April 2016, comprised of information technology staff and resources previously located throughout City departments and in the City's previous IT department, the Department of Information Technology. With a full view of the City's IT needs, Seattle IT looks for opportunities to consolidate multi-department IT requests into one Citywide project, identifies similar programs that can share a common platform, and considers where a department may already have a solution that another department could utilize.

In 2019, Seattle IT implemented a reorganization to improve its ability to provide to best-in-class digital service. Seattle IT is now organized into 11 divisions: Frontline Digital Services; Digital Workplace; Business Applications; Platform Applications; Client Solutions; Executive Advisor; Service Modernization; Chief Privacy Officer; Digital Security & Risk; Technology Infrastructure; and the Chief of Staff.

The **Frontline Digital Services** Division is accountable for day to day client support and services, including device and customer support, web support, and IT service management.

The **Digital Workplace** Division provides modern tools and technologies for the City. The division endeavors to find all the processes the City is using and improve them with digital tools.

The **Business Applications** Division provides development and support for applications that are specific to departments' business needs, including finance and human resources, public safety and dispatch, and utility systems.

The **Platform Applications** Division manages enterprise-wide software solutions including GIS, CRM, and Permitting. The division's support ranges from ongoing software maintenance to enhancements and special projects.

The **Client Solutions** Division strategically leads departments through technology service delivery. The division is a part of the Seattle IT Leadership Team and plays a vital role in service delivery to its business customers.

The **Executive Advisor** Division oversees several business-critical areas including the City's cable television franchises, providing affordable high-speed internet access to residents, businesses, and institutions. The division maintains regular information exchanges with government stakeholders and oversees the departments Race and Social Justice initiative including digital equity.

The **Service Modernization** Division addresses new functionality and plans a modern approach to Best-in-Class digital service.

The **Chief Privacy Officer** Division provides structure and guidance essential for City departments to fully incorporate appropriate privacy practices into daily operations, and to build public trust and confidence in how we collect and manage the public's personal information.

Seattle Information Technology Department

The **Digital Security & Risk** Division balances safeguarding the City's assets, infrastructure, and the information entrusted to the City with the City's commitment to openness, transparency, equity, and innovation.

The **Technology Infrastructure** Division manages the back-end infrastructure of the organization.

The **Chief of Staff** Division provides the services that enable the successful operation of the department including corporate performance management, budget, finance, accounting, human resources, communications, administrative, contracting and purchasing services.

As an internal service department, Seattle IT provides services to other City departments that in turn pay Seattle IT for the services they purchase. As such, Seattle IT receives revenue from most of the major fund sources within the City, including the General Fund, Seattle City Light, Seattle Public Utilities, Seattle Department of Transportation, Seattle Department of Construction and Inspections and the Retirement Fund. Seattle IT also receives funds from the City's Cable Television Fund, grants and other government agencies external to the City (e.g., Seattle Public Schools, the Port of Seattle) that buy Seattle IT services for special projects.

Cable Fund Overview

Beginning in 1996, the City of Seattle entered into cable franchise agreements that included a franchise fee as compensation for cable television providers locating in the public right-of-way. The City has approved franchises with CenturyLink, Comcast and Wave Division I.

The Cable Television Franchise Fund (created by Ordinance 118196) revenues come from the franchise fee collected from the agreements. Related expenditures are budgeted in Seattle IT and charged to the Cable Television Franchise Fund. Resolution 30379 establishes usage policies for the fund. The fund pays for the following services:

- administration of the Cable Customer Bill of Rights as well as the public, education, and government access costs the City is obligated to fund under the terms of its cable franchise agreements;
- support of the Seattle Channel, including both operations and capital equipment;
- programs and projects promoting technology literacy and access, including related research, analysis, and evaluation; and
- use of innovative and interactive technology, including television and online content, to provide ways for residents to access City services.

Seattle Information Technology Department

Budget Overview

To develop the 2020 Proposed Budget, the Seattle Information Technology Department (Seattle IT) solicited new information technology (IT) project proposals from departments; evaluated proposals based on need, security, compliance and cost; looked for opportunities to create efficiencies and invest in common platforms; and approved individual department IT requests. The proposed budget reflects Seattle IT's new vision of providing best in-class digital services and follows six primary objectives: to be connective and collaborative, to be efficient and flexible, to continually invest in talent and capabilities, to be modern and innovative, to be reliable and sustainable, and to focus on privacy and transparency.

Reorganization of Seattle IT's Structure

The proposed budget includes adjustments to reflect the Seattle IT reorganization implemented in May 2019. The reorganization has five outcomes:

- simplify reporting relationships to improve the paces of decision-making;
- group similar components to deliberately increase collaboration;
- pivot every inch of Seattle IT to be innovation savvy that provides leadership to the rest of the organization;
- create a transparent view of Seattle IT for the benefit of stakeholders; and
- activate critical back office support functions to enable the rest of Seattle IT for success.

Budget Efficiencies

Seattle IT reviewed its budget to find reductions that would not impact the delivery of core services. The 2020 Proposed Budget includes a 1% increase in the assumed employee vacancy rate for Seattle IT, increasing it from 3% to 4%.

Seattle IT Initiatives

The 2020 Proposed Budget includes funding for Seattle IT to enhance its service delivery and implement new projects on behalf of the City. Key changes to improve the delivery of IT services include additional staffing to increase capacity for Seattle IT's Finance team and the Seattle City Light and Seattle Public Utilities Customer Information System. In addition, the proposed budget provides appropriation authority for the following IT Initiatives projects:

- Accela is the City's preferred application for permitting systems. As more departments move on to the platform, Seattle IT needs to increase its ongoing technical and customer relations support. The 2020 Proposed Budget includes additional resources to support the Accela permitting system.
- Seattle IT will maintain applications created during the first round of the Innovation Advisory Council (IAC) projects. The IAC was launched on August 2, 2018, by way of an Executive Order signed by Mayor Durkan. It includes a range of our region's most innovative companies committed to sharing insights and expertise with the City as the City develops data-driven technological approaches to addressing our priority areas of homelessness, affordability, and delivery of basic services. These applications include a youth opportunity portal and an application to support the City's Navigation Teams.

Cable Television Franchise Fund Budget Efficiencies

The Cable Television Franchise Fund receives revenues from cable television provider franchise fees. The 2020 Proposed Budget continues previous uses of the Cable Fund for programs such as the Seattle Channel, the Cable Customer Bill of Rights, initiatives that promote technology literacy and access, and technology that provides ways for residents to access City services.

Cable franchise fee revenues declined significantly from 2018 to 2019. Revenues continue to fall and will steadily decline in future years as Seattle residents increasingly discontinue their cable television service in favor of internet-

Seattle Information Technology Department

based streaming video services that are not subject to the City's regulatory structure. The 2020 budget reduces expenditures for programming that has historically been supported by the Cable Fund including reducing some contracted services and identifying alternative funding sources to replace the use of the Cable Fund. Seattle IT is closely monitoring quarterly franchise payments to determine the level of future reductions that will be necessary.

Department Initiatives

Seattle IT's budget includes funding for eight department-specific IT projects for which Seattle IT will do the work and collect revenues from the respective departments. These project funds are appropriated in both Seattle IT and in department budgets. These projects are shown in the Seattle IT budget book pages; however, the detail for these projects are included in the budget book sections for the individual departments. Please see the individual departments' budget book sections for more details.

Technical Changes

The proposed budget includes technical adjustments to implement a rebate for the reconciliation of the 2018 actual spending to revenues, and to increase the appropriation for maintenance and other standard annual cost increases.

- Seattle IT has performed a rate reconciliation of the 2018 shared services operating costs comparing revenues to actual expenditures. Seattle IT will rebate the amount that is underspend from the 2018 revenue collection. Seattle IT is committed to conducting this reconciliation annually.
- Seattle IT faces increased costs of existing systems and software licensing under contract as well as an increase in the leasing cost of a radio site.

The proposed budget also includes adjustments to add permanent positions to replace contract-in position, remove an Office Management Aide position, adjust budget system license cost revenues to accurately reflect the departments' licenses, align funding with planned spending in the 6-year Capital Improvement Program (CIP), reflect changes made through supplemental budget legislation, adjust for State Paid Family Medical Leave increase, add 2020 coalition and non-represented annual wage increases, and update internal service costs.

Seattle Information Technology Department

Description of Incremental Budget Changes

Baseline

2020 Seattle IT Baseline CIP Adjustment

Expenditures	-
--------------	---

This technical adjustment applies CIP amendments made during 2019 to the Proposed CIP.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$205,772
--------------	-----------

Revenues	\$205,772
----------	-----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Seattle IT Baseline Changes

Expenditures	\$218,734
--------------	-----------

This item adjusts the proposed budget for baseline changes including inflation, and resource realignment.

Proposed Operating

Increase Vacancy Rate by 1%

Expenditures	\$(1,038,035)
--------------	---------------

Revenues	\$(1,038,035)
----------	---------------

This item increases the department's employee vacancy rate assumption in the budget from 3% to 4%. By adjusting the vacancy rate assumption, the reduction better aligns the 2020 budget with the expected vacancy rate.

Reduce Excess Space Rent Budget

Expenditures	\$(1,018,256)
--------------	---------------

Revenues	\$(1,018,256)
----------	---------------

This item aligns the space rent budget to the amount in the Central Cost Manual.

Seattle Information Technology Department

Increase Staff Support for Accela Program

Expenditures	\$1,326,750
Revenues	\$1,326,750
Position Allocation	8.50

This item adds positions to the Accela Program to fill the operating gaps that have emerged as more departments are using the system. The positions will support quality testing, operation and release management, systems analysis work for departments, and external customer support. Several of these positions fill roles currently filled by temporary or contracted positions.

Seattle Police Department Records Management System Maintenance

Expenditures	\$822,000
Revenues	\$822,000

This item provides funding for the annual maintenance contract cost for the new Seattle Police Department records management system.

Earthquake Early Warning

Expenditures	\$10,000
Revenues	\$10,000

This item adds ongoing funding to support an earthquake early warning system for the City. Under the leadership of the City's Innovation Advisory Council, the Earthquake Early Warning project seeks to build a last-mile alert prototype to deliver early warning of impending hazardous ground shaking to key public safety officials.

Navigation Team App 2.0

Expenditures	\$10,000
Revenues	\$10,000

This item adds ongoing funding to support the work of the Navigation Team's NavApp 2.0 project. Under the leadership of the City's Innovation Advisory Council, NavApp 2.0 seeks to improve the Navigation Team's ability to use data to connect unsheltered individuals with existing services and create faster resolutions to hazardous situations.

Youth Opportunity Portal

Expenditures	\$10,000
Revenues	\$10,000

This item adds ongoing funding to support the Youth Opportunity Portal project. Under the leadership of the City's Innovation Advisory Council, the Youth Opportunity Portal project seeks to create a central online website and a centralized application platform for youth programs.

Seattle Information Technology Department

Add Staff to Support Customer Information System Reporting

Expenditures	\$302,206
Revenues	\$302,206
Position Allocation	2.00

This item adds funding for two developers at the Information Technology Professional-B level to support Seattle City Light (SCL) and Seattle Public Utilities (SPU) to build out and sustain data platforms to support customer information system reporting requirements. The data reporting work will provide reports to SCL and SPU that inform business decisions.

Capitol Hill Radio Lease Funding

Expenditures	\$145,000
Revenues	\$145,000

Seattle IT is operating under a new lease for the Capitol Hill radio site, a commercial tower infrastructure asset that provides services to critical City communications equipment. The new lease increases the City's expenditures by \$60,000 in 2019 and \$145,000 in 2020.

Change Allocation Methodology for Compliance Service

Expenditures	\$21,581
Revenues	\$21,581

This item changes the cost recovery methodology for the Compliance project from the number of transactions and devices to the average IT allocation. Considering the continual evolution of technology and associated risks/threats, and the growing areas of compliance, Seattle IT (ITD) expanded the scope of the compliance group from solely focusing on payment compliance and account data protection-related standards to a single team focused on the broader spectrum of compliance. This changes the allocation methodology metric to one more appropriate for the broader scope of the combined team.

The increase in budget is a technical change related to ITD's own consumption of services which is higher in the new metric than in the old. Because these costs are double-budgeted within ITD as part of their indirect cost distribution, additional appropriation authority is needed. The total amount included in rates to customers is not changing.

IT Infrastructure Maintenance Funding

Expenditures	\$613,000
Revenues	\$613,000

This item increases the budget for annual maintenance/licensing renewals of server/storage contracts and network/telecommunications contracts. This increase in cost is driven by increased customer usage and vendor inflation.

Budget Change Overhead Impacts

Expenditures	\$325,501
Revenues	\$325,501

This item represents the changes to Seattle IT overhead from the items included in rate calculations. Seattle IT recovers revenue for its use of technology services. The proposed budget changes include changes that increase Seattle IT's use of technology services, leading to a need for an increase in appropriations. This is a technical change and does not affect customer rates.

Seattle Information Technology Department

Seattle IT Reorganization Budget Alignment

Expenditures	\$(138,777)
--------------	-------------

This item aligns Seattle IT's baseline budget with the Department's new organizational structure. The difference between the old baseline and the new is a decrease in Seattle IT's use of technology services.

Transfer Seattle City Light (SCL) Internal Operating Initiatives Funds to SCL

Expenditures	\$(1,608,407)
Revenues	\$(1,608,407)

This item transfers the funds in the Seattle City Light (SCL) Internal Operating Initiatives project back to Seattle City Light. This project is a holding project for the non-capitalizable portion of SCL's IT project funding. Rather than maintain a holding project for upcoming projects, Seattle IT will change to budgeting each project individually, as is consistent with the projects of other departments.

Utility Customer Self-Service Support

Expenditures	\$158,131
Revenues	\$158,131

This item funds ongoing support and maintenance agreement with Milestone Utility Services, Inc. for the utility customer self-service portal application ("EPORTAL") implemented in 2019.

Cable Fund: Convert a Position to Single Point of Contact on Small Cell for Carriers

Expenditures	-
--------------	---

This item transfers a Strategic Advisor 2 position from the Digital Equity project to a newly created project to support the telecommunication industry transition to 5G deployment which will require low power, short range wireless transmission systems (also known as small cells). As the industry moves towards 5G deployment, this role will help coordinate City activities in support of the transitions. Currently an Interdepartmental Team (IDT) helps coordinate this activity and the processes necessary to provide space on City structures (e.g. utility poles). The IDT has identified a need for a single point of contact for this work. This position will address this need. This change shifts funding for this position from the Cable Fund to be supported by fees the City charges carriers.

Cable Fund: Eliminate Digital Equity Manager Position

Expenditures	\$(178,256)
Revenues	\$(178,256)
Position Allocation	(1.00)

This item eliminates funding for the vacant Digital Equity Manager position. Other Seattle IT staff will assume the program and personnel management responsibilities of this positions.

Seattle Information Technology Department

Cable Fund: Eliminate Funding for a Temporary Community Technology Outreach Coordinator Position

Expenditures	\$(167,350)
Revenues	\$(167,350)

This item eliminates funding to support a temporary Community Technology Outreach Coordinator position in the Digital Equity program. This position supports the Community Technology Advisory Board and the Surveillance Working Group. Seattle IT will shift the work to support the advisory board and working group to other staff in the department.

Cable Fund: Eliminate Open Data Manager Position

Expenditures	\$(165,032)
Revenues	\$(165,032)
Position Allocation	(1.00)

This item eliminates funding for Seattle IT's vacant Open Data Manager position. With the department's recent reorganization, the Open Data program has merged with other data services, and Seattle IT will leverage other resources to fulfill this function.

Cable Fund: Align Funding for Ytech Digital Pathways Program

Expenditures	\$(45,000)
Revenues	\$(45,000)

This item aligns the funding from the Community Technology Services project to reflect the 2019 contract amount of \$45,000 per year to support the Greater Seattle YMCA's YTech Digital Pathways program. YTech provides workshops targeted at young adults experiencing or at risk of homelessness, focusing on real-world digital skills that will increase participant access to employment, education and other important resources, including housing, and healthcare. It also offers a weekly after-school program for middle and high school students, intended to help build a bridge between low income youth, youth of color, immigrant and refugee youth, and Seattle's tech economy.

Cable Fund: Reduce Seattle Channel CIP Budget

Expenditures	\$(75,000)
Revenues	\$(75,000)

This item reduces the Seattle Channel's Capital Improvement Plan budget for equipment and equipment maintenance services to address shortfalls in revenues in the Cable Fund. The reduction of the capital budget may reduce the amount and quality of equipment the Channel procures to produce its programming and will require an extension of maintenance contracts on some equipment.

Cable Fund: Reduction of Seattle Channel Contracted Services

Expenditures	\$(202,700)
Revenues	\$(202,700)

This item is a budget reduction to respond to Cable Fund revenue shortfalls. The reduction of contractor services will result in a reduction of resources needed to produce some Seattle Channel programs and will reduce the overall frequency of some of the programs the Channel delivers.

Seattle Information Technology Department

Cable Fund: Transfer Digital Media Specialist Position to Communications

Expenditures	-
Revenues	-
Position Allocation	-

This item transfers the Digital Media Specialist position to Seattle IT's Communications team. As a part of Seattle IT's recent reorganization, the department identified this position as a better resource for the Communications team and it will now be supported by Seattle IT rates rather than the Cable Fund. This change does not lead to service-level impacts.

Cable Fund: Transfer Information Technology Professional-C to Public Engagement

Expenditures	-
Position Allocation	-

This item transfers an Information Technology Professional-C (ITP-C) position from the Seattle Channel to the Public Engagement team. This position currently supports the Seattle Channel website and this change incorporates those responsibilities into the overall web work of the Public Engagement team. This position will now be supported by Seattle IT rates rather than the Cable Fund.

Cable Fund: Transfer Seattle Channel Position to Seattle IT (ITD) Communications Team

Expenditures	-
Revenues	-
Position Allocation	-

This item transfers the Seattle Channel Communications Manager to Seattle IT's core Communications team in Finance & Administration. Combining the staff into a single team will eliminate duplicative efforts and allow the department to better focus its communications resources both internally and externally. Support will continue to be provided to the Seattle Channel, but within the broader context of external communications for the Department at large. This position will now be supported by Seattle IT rates rather than the Cable Fund.

Cable Fund: Library Levy Wi-Fi Hotspots Revenue Change

Expenditures	\$(642,000)
--------------	-------------

The 2019 Library Levy includes funding for SPL's Wi-Fi hotspots and digital equity program. Previously, this program was funded by the Cable Fund. This item adjusts the Cable Fund budget to reflect that the program is now budgeted in the Library Levy.

Cable Fund: Substitute Cable Fund with General Fund

Expenditures	-
--------------	---

This item provides \$750,000 of ongoing General Fund support for the Digital Equity program in the Seattle Information Technology Department which was previously supported by Cable Franchise Fees. Cable Television Fund revenues are steadily declining and these funds enable continuation of the program.

Seattle Information Technology Department

Seattle Department of Construction and Inspections Accela Work Group

Expenditures	\$1,601,218
Revenues	\$1,601,218
Position Allocation	9.00

This action establishes a dedicated Seattle Information Technology Department (Seattle IT) project and provides nine positions in Seattle IT for the Seattle Department of Construction and Inspection's (SDCI's) Accela work items. The project supports ongoing innovation and enhancements that maximize efficiency and optimize customer experiences with permitting technology. This item allows quick response to new legislation and Mayor's Office priorities that require changes to Accela and related side systems; it also supports continued improvements to Accela as identified by SDCI. Of this amount, \$25,425 is one-time and the remainder is ongoing. This item is supported by permit fee revenues from the Construction and Inspections Fund.

Seattle Department of Construction and Inspections Laptop Purchase

Expenditures	\$401,465
Revenues	\$401,465

These funds support the Seattle Department of Construction and Inspection's purchase of 140 laptops and laptop accessories. This one-time purchase of laptops will replace desktop computers. General Fund supports \$34,411 of this item and the remaining \$367,054 is from the Construction and Inspections Fund.

Seattle Department of Transportation Permitting Archives

Expenditures	\$235,686
Revenues	\$235,686

The State of Washington requires that the City keep permit records for six to ten years. This item, funded by Street Use fees, will create an archive of the Seattle Department of Transportation current legacy permitting system which is at the end of its life and is being replaced by Accela. This project has two parts: Part 1 will migrate active records to Accela; Part 2 will develop a user-friendly mechanism to enable the business to readily store and search historical data that does not get converted into Accela (closed, inactive records). Enabling access to legacy data will allow the business to more readily research claims and other questions related to historical permit data.

Department of Education and Early Learning Child Information and Provider System Enhancements

Expenditures	\$322,388
Revenues	\$322,388

This item continues enhancement and expansion work on the existing Child Information and Provider System (CHIPS), an in-house customer relationship management platform used to manage the application, enrollment, and data monitoring for early learning providers that contract with DEEL.

Finance and Administrative Services FleetAnywhere Hosted Solution

Expenditures	\$203,917
Revenues	\$203,917

This project migrates the Department of Finance and Administrative Services' Fleet Management Division's work order system, FleetAnywhere, to a hosted environment on the cloud. Moving to a hosted environment will decrease the amount of time the positions in Seattle IT and the business devote to servicing the system.

Seattle Information Technology Department

Seattle Department of Human Resources Compensation Assignment Reporting and Tracking System Replacement

Expenditures	\$527,329
Revenues	\$527,329

The Seattle Department of Human Resources (SDHR) Shared Administrative Services division is replacing their 27-year-old Compensation Assignment Reporting and Tracking System (CARATS) software with 21st century software and workflow tools to include new functionality, tracking, monitoring, stakeholder notification and real-time information capabilities. CARATS software was developed in-house and is minimally supported by Seattle IT. SDHR will partner with Seattle IT to either identify and leverage existing tools or pursue a software solution.

Seattle Department of Human Resources Human Capital Management Scoping Study

Expenditures	\$175,000
Revenues	\$175,000

This item adds funding for consulting services to complete the initial scoping and planning phase of the Human Capital Management (HCM) System project. The system currently used for employee timekeeping, payroll, and basic HR management functions is more than 20 years old. An initiative is underway to upgrade, stabilize, and extend the existing vendor contract to enable the systems to remain in place for a 5-year period while the City plans and implements a modern HCM platform.

Seattle Police Department Computer Aided Dispatch Replacement

Expenditures	\$2,675,343
Revenues	\$2,675,343

The Seattle Police Department's (SPD) Computer Aided Dispatch (CAD) system was implemented in 2008. The system manages the in-flow of calls to SPD's 9-1-1 center and ensures that the calls can get to officers in the field and that relevant caller information is relayed to patrol officers. The current CAD system has not been updated to take advantage of new technologies such as Next Generation 911 systems that integrate information from cell phone data for a faster, more accurate 911 response.

Upgrading the CAD system will allow police officers to respond more quickly and will provide resiliency and redundancy to the 911 system, especially in disaster situations. A new CAD system will also integrate with a variety of SPD systems to allow for in-depth look-up capabilities by dispatchers and officers.

Existing funds within SPD's budget, revenue from the King County E-911 levy, and savings from the records management project have been allocated to fund the project.

Proposed Technical

2018 Revenue True Up Technical Adjustment

Expenditures	\$8,054,543
--------------	-------------

Seattle IT has performed a rate reconciliation of the 2018 budgeted shared services operating costs comparing revenues to actual expenditures. Seattle IT will rebate the amount that is underspend from the 2018 revenue collection. This item provides Seattle IT with the needed legal appropriation to refund savings to departments as a part of the 2018 rate reconciliation. Seattle IT will conduct this reconciliation annually.

Seattle Information Technology Department

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures	\$4,160,058
Revenues	\$4,160,075

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures	\$119,000
Revenues	\$119,000

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Abandon Unfunded Tech Management Tools Budget

Expenditures	\$(2,933,327)
Revenues	\$(2,933,327)

This item abandons the unfunded portion of the Tech Management Tools project budget. A placeholder bond funding request for a tools refresh was included in the 2020 Endorsed Budget. With the recent launch of its new Service HUB system and the increasing switch to software as a service-based applications and toolsets, Seattle IT does need bond funds for Tech Management Tools in 2020.

Add Strategic Advisor 1 to Finance & Administration

Expenditures	-
Revenues	-
Position Allocation	1.00

This item adds a Strategic Advisor 1 to the Finance Team. This position will complete complex financial analyses to better support Seattle IT division leaders and drive operational efficiency.

Cable Fund: Transfer Strategic Advisor 2 Position to Enterprise Planning

Expenditures	-
Revenues	-
Position Allocation	-

This item transfers the Smart City Coordinator position to Seattle IT's Governance and Strategic Initiatives project. Originally this position was conceived of to support Seattle's Smart City Initiatives in technology. As such, it was funded by the Cable Fund given the externally focused nature of its work. However, this position now serves as a broader technology policy advisor working on issues which span the City. As such, the position is more appropriately funded from a broader source of funds and placed within a team with that broader scope of responsibilities.

Seattle Information Technology Department

Central Cost Manual Technical Adjustment

Expenditures	-
Revenues	-

This item shifts the Citywide Central Cost Manual adjustments to better align with where the related expenses are assigned in Seattle IT's budget.

Department Specific Maintenance True Up

Expenditures	\$33,186
Revenues	\$33,186

This item realigns the maintenance funding needed for two of Seattle IT's (ITD) maintenance projects. These two projects in Seattle IT allow ITD to directly assign costs for unique maintenance items to the requesting department. This item ensures that department rates closely match the projected 2020 maintenance spending. Major changes include adding funding for Oracle SKIRE, a Department of Finance and Administrative Services project, and DynamicCRM, a multi-department project.

Questica Subscription Fees

Expenditures	-
--------------	---

This item realigns the maintenance budget within the Applications BSL to fund ongoing Questica subscription fees. Questica is the budget system used by the City Budget Office and the City Council.

Seattle Public Utilities (SPU) CIP Technical Adjustment

Expenditures	\$1,950,000
Revenues	\$1,950,000

This item increases appropriation authority to align the Applications BSL budget with the anticipated Seattle Public Utilities' CIP budget for technology projects in 2020.

Seattle Public Utilities (SPU) Positions Transfer

Expenditures	\$(320,320)
Revenues	\$(320,320)
Position Allocation	(2.00)

This item is a 2019 supplemental item that transfers two positions back to the Seattle Public Utilities. These positions support the utility's Integrated Security System (ISS) which is an Operational Technology system. ISS is a combination of software, hardware, databases, peripherals (cameras, etc.) and network services to protect SPU critical infrastructure and facilities. The ISS is used to control physical access to facilities and trigger alarms in response to security events at multiple sites both in the City (reservoirs, transfer stations, pump stations, etc.) and in eastern King County (dams, water treatment facilities, transmission lines, etc.).

Transfer Network CIP Budget to Operating – Capital Decrease

Expenditures	\$(500,000)
--------------	-------------

This item transfers \$500,000 from the network CIP budget to the network operational budget to align budget with expected spending.

Seattle Information Technology Department

Transfer Network CIP Budget to Operating – Operating Increase

Expenditures	\$500,000
--------------	-----------

This item transfers \$500,000 from the network CIP budget to the network operational budget to align budget with expected spending.

Transfer Position to Accela

Expenditures	-
Revenues	-
Position Allocation	-

This item transfers an Info Technol Prof B-BU from the Frontline Digital Services Division to the Accela project in the Platform Applications Division.

Transfer Security CIP Funding to Operating and Abandon Unfunded Budget – Capital Decrease

Expenditures	\$(919,803)
Revenues	\$(680,689)

This item abandons the unfunded portion of the IT Security CIP project and transfers the remaining CIP budget to the Digital Security & Risk BSL's Operating Budget. The IT Security CIP project was created to fund major upgrades and product implementations to enhance the security of the City of Seattle's networks and systems. With the shift in the technology environment to service based, rather than on-premise, the enhancements and upgrades planned by Seattle IT to improve security do not qualify as capital purchases and should not be included in the CIP program.

Transfer Security CIP Funding to Operating and Abandon Unfunded Budget – Operating Increase

Expenditures	\$836,709
Revenues	\$597,595

This item abandons the unfunded portion of the IT Security CIP project and transfers the remaining CIP budget to the Digital Security & Risk BSL's Operating Budget.

Transfer Tech Management Tools Maintenance Funding to Operating – Capital Decrease

Expenditures	\$(43,288)
Revenues	\$(43,288)

This item transfers the Tech Management Tools maintenance budget from Seattle IT's CIP budget to its operations and maintenance budget. Ongoing maintenance costs should be in Seattle IT's operating budget rather than the capital budget.

Transfer Tech Management Tools Maintenance Funding to Operating – Operating Increase

Expenditures	\$43,288
Revenues	\$43,288

This item transfers the Tech Management Tools maintenance budget from Seattle IT's CIP budget to its operations and maintenance budget. Ongoing maintenance costs for Tech Management Tools should be in Seattle IT's operating budget rather than the capital budget.

Seattle Information Technology Department

Eliminate Office Management Aide Position

Position Allocation (1.00)

This item eliminates a position which was mistakenly added in the 2019 Adopted Budget. This position class is centrally held by Seattle Department of Human Resources (SDHR), therefore Seattle IT is removing this position because it is not needed by SDHR.

Add Five Positions to Replace Contract-In Positions

Position Allocation 5.00

This item creates new permanent positions for five contract-in positions. As a part of consolidation, five contract-in positions transferred from Seattle City Light to Seattle IT (ITD). ITD was unaware that these were contract-in positions which are held centrally in the Seattle Department of Human Resources and is converting them to regular positions. There is no rate or financial impact, as these positions are already funded in ITD's budget

Cable Fund Technical Adjustments

Expenditures \$(1,799,275)

This item adjusts the Cable Television Franchise Fee Fund (10101) budget to reflect the impact of changes with the Seattle Information Technology Operating Fund (50410) involving the use of Franchise Fee revenue. This change reflects budget changes as well as changes in methodologies that impact Cable-funded projects and shared services. Additionally, the Cable Fund efficiencies, as well as items that reduce the revenue from Cable Fund in the Seattle Information Technology Operating Fund, are included in this change to the Cable Television Franchise Fee Fund budget authority.

Seattle Information Technology Department

Expenditure Overview

Appropriations	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed

Appropriations by Budget Summary Level and Program

ITD - BC-IT-C0700 - Capital Improvement Projects

The Capital Improvement Projects Budget Summary Level provides support for citywide or department-specific IT projects and initiatives within Seattle IT's Capital Improvement Program (CIP).

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Application Services CIP	-	-	-	13,453,310
Citywide IT Initiatives CIP	-	-	-	79,280
Communications CIP	-	-	-	8,843,131
Customer Support Services CIP	-	-	-	1
Enterprise Compute Services CIP	-	-	-	2,797,618
Fiber Enterprise Initiatives CIP	-	-	-	4,244,846
Programmatic Initiatives CIP	-	-	-	2,300,000
Radio Communications CIP	-	-	-	686,981
Seattle Channel CIP	-	-	-	328,130
Security CIP	-	-	-	-
Total	-	-	-	32,733,295

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Capital Improvement Projects Budget Summary Level:

Application Services CIP

This budget program contains Capital Improvement Program (CIP) funding associated with developing, implementing and enhancing various software applications used by City departments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Application Services CIP	-	-	-	13,453,310

Citywide IT Initiatives CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with a portfolio of capital IT initiatives. Projects in this program may support multiple departments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide IT Initiatives CIP	-	-	-	79,280

Seattle Information Technology Department

Communications CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with ongoing design, acquisition, replacement and upgrading of software, infrastructure and major hardware for the City's data, communications and telephonic systems which may include switches, and or connectivity infrastructure.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Communications CIP	-	-	-	8,843,131

Customer Support Services CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the acquisition, replacement, and upgrading of software and hardware in the computing and customer support environments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Customer Support Services CIP	-	-	-	1

Enterprise Compute Services CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement, and upgrading of server and storage systems.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Enterprise Compute Services CIP	-	-	-	2,797,618

Fiber Enterprise Initiatives CIP

This budget program (formerly Technology Engineering & Project Management CIP) contains the Capital Improvement Program (CIP) funding associated with major maintenance and installation of a high-speed fiber-optic communication network for the City and its external fiber partners.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Fiber Enterprise Initiatives CIP	-	-	-	4,244,846

Programmatic Initiatives CIP

This budget program contains the Capital Improvement Program (CIP) funding for one-time Seattle IT Programmatic Initiatives including the acquisition and development of a new data center, the remodeling of Seattle IT space in the Seattle Municipal Tower, and the acquisition of new technology management tools.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Programmatic Initiatives CIP	-	-	-	2,300,000

Seattle Information Technology Department

Radio Communications CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of software and hardware for the City of Seattle's portion of the King County Regional 800 MHz radio system.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Radio Communications CIP	-	-	-	686,981

Seattle Channel CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of the cablecasting and production systems for the Seattle Channel.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Seattle Channel CIP	-	-	-	328,130

Security CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of software and hardware for the City's IT security systems.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Security CIP	-	-	-	-

Full-time Equivalents Total*	-	-	-	84.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Seattle Information Technology Department

Chief of Staff

This budget program contains the funding associated with the leadership and accountability of core administrative support to ITD's divisions. These efforts include the oversight of ITD's talent, workforce planning and training, communications, finance, corporate performance, and organizational change management.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Chief of Staff	-	-	-	12,800,867
Full Time Equivalents Total	-	-	-	60.00

Chief Privacy Office

This budget program provides oversight and guidance required for City Departments to incorporate appropriate privacy and surveillance ordinance compliance practices into City operations with the objective of building public trust and confidence in how we collect and manage the public's personal information.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Chief Privacy Office	-	-	-	647,286
Full Time Equivalents Total	-	-	-	2.00

Citywide Indirect Costs

This budget program contains the funding associated with the various overhead costs charged to Seattle IT, including budget and expenses that have been allocated from other City departments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	-	-	-	14,125,862

CTO / Executive Team

This budget program contains the funding associated with the Chief Technology Officer (CTO) and the Seattle IT Executive Team. The CTO sets technology standards and strategies to ensure the City's technology investments are used efficiently and effectively.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CTO / Executive Team	-	-	-	3,761,220
Full Time Equivalents Total	-	-	-	13.00

Seattle Information Technology Department

Executive Advisor

This budget program contains funding for key administrative support functions including process improvement, governance, interdepartmental service delivery, support for ITD's Racial Social Justice Initiative and community focused technology strategies.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Executive Advisor	-	-	-	1,763,268
Full Time Equivalents Total	-	-	-	9.00

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs for Seattle IT staff.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Pooled Benefits and PTO	-	-	-	(180,120)

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Technology Infrastructure Budget Summary Level:

Business Advancement Team

This budget program contains funding to support project planning and delivery support for ITD operating projects. This program includes business analysts and project managers.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Business Advancement Team	-	-	-	200,958
Full Time Equivalents Total	-	-	-	1.10

Communications Infrastructure

This budget program contains funding to provide data center services as well as costs for major moves, additions, or changes to communication network infrastructure.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Communications Infrastructure	-	-	-	9,191,555
Full Time Equivalents Total	-	-	-	4.80

Seattle Information Technology Department

Database Systems

This budget program contains funding associated with maintenance and direct labor costs for database administrators and data architecture. This includes installing and upgrading database structures, controlling and monitoring access to databases, and backing up and restoring databases.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Database Systems	-	-	-	2,016,207
Full Time Equivalents Total	-	-	-	12.00

Enterprise Services

This budget program contains the funding associated with Seattle IT's messaging support and identity management services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Enterprise Services	-	-	-	2,661,847
Full Time Equivalents Total	-	-	-	8.00

Infrastructure Tools

This budget program contains funding for major system controls, switches and components to support the technology infrastructure system operations.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Infrastructure Tools	-	-	-	3,631,904
Full Time Equivalents Total	-	-	-	5.00

Network Operations

This budget program contains funding for the design, operations, and maintenance of the City's fiber optic, wireless, and data networks, including City's internet access.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Network Operations	-	-	-	7,971,567
Full Time Equivalents Total	-	-	-	17.20

Seattle Information Technology Department

Radio Management

This budget program contains funding for maintenance of the City's emergency radio and dispatch systems including radios, pagers, and radio towers, base stations microwave and the fiber network for all the City's radio operations. The program also provides radio programming, installation and maintenance to City Departments and external partners.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Radio Management	-	-	-	2,511,996
Full Time Equivalents Total	-	-	-	10.00

Systems Engineering

This budget program contains funding associated with core computing services Seattle IT provides its customers, including the backup, recovery, and storage of customer data.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Systems Engineering	-	-	-	5,955,058
Full Time Equivalents Total	-	-	-	12.00

Telephone Engineering

This budget program contains funding for the design, maintenance and operations of the City's consolidated telephone systems.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Telephone Engineering	-	-	-	5,492,778
Full Time Equivalents Total	-	-	-	14.00

Windows Systems

This budget program contains funding associated with the centralized hosting, management and support of Windows applications.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Windows Systems	-	-	-	8,993,659
Full Time Equivalents Total	-	-	-	22.00

Seattle Information Technology Department

ITD - BO-IT-D0400 - Frontline Services and Workplace

The Frontline Services and Workplace Budget Summary Level develops, maintains, and manages all client support services, including incident resolution, end-user equipment and software deployment, device maintenance, operating system configuration and management, digital tools that enable everyday work, public-facing communications software development, and support. This Budget Summary Level also includes the Seattle Channel as the public-facing entity of the department and the Broadband and Community Technology programs.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Community Technology and Broadband	-	-	-	1,856,004
Digital Workplace	-	-	-	11,901,778
Frontline Digital Services	-	-	-	29,178,874
Total	-	-	-	42,936,657
Full-time Equivalents Total*	-	-	-	186.76

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Frontline Services and Workplace Budget Summary Level:

Community Technology and Broadband

This budget program contains the funding associated with the Community Technology Services team and the Technology Matching Fund. The Technology Matching Fund provides grants to community-based organizations for projects centered on improving digital equity.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Community Technology and Broadband	-	-	-	1,856,004
Full Time Equivalents Total	-	-	-	5.50

Digital Workplace

This budget program contains funding to enable digital tools and capabilities for the City's workforce including SharePoint, Office 365 Collaboration, Windows Enterprise, Process Automation, eDiscovery, and Mobility.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Digital Workplace	-	-	-	11,901,778
Full Time Equivalents Total	-	-	-	42.04

Seattle Information Technology Department

Frontline Digital Services

This budget program contains funding to develop, maintain, and manage client support services, including incident resolution, end-user equipment and software deployment, device maintenance, operating system configuration and management, digital tools that enable everyday work, and public-facing communications software development and support. Major services include Seattle Channel, Solutions Desk, Desktop Support, IT Asset Management, Computer Lifecycle and IT Service Management.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Frontline Digital Services	-	-	-	29,178,874
Full Time Equivalents Total	-	-	-	139.22

ITD - BO-IT-D0500 - Digital Security & Risk

The Digital Security and Risk Budget Summary Level provides security and risk mitigation services for the City's computing environments, and develops, applies, and monitors compliance with technology policies and procedures. This Budget Summary Level also includes the department's Emergency Management team.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Digital Security & Risk	-	-	-	5,299,398
Total	-	-	-	5,299,398
Full-time Equivalents Total*	-	-	-	15.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D0600 - Applications

The Applications Services Budget Summary Level designs, develops, and supports application solutions for both individual business and enterprise platform needs. In addition, it advances several IT functions, practices, and services such as vendor management, enterprise architecture, automation, quality assurance and analytics.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Business Applications	-	-	-	28,262,642
Department Initiatives	-	-	-	49,098,474
Platform Applications	-	-	-	18,129,322
Service Modernization	-	-	-	11,388,399
Total	-	-	-	106,878,836
Full-time Equivalents Total*	-	-	-	279.18

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Applications Budget Summary Level:

Seattle Information Technology Department

Business Applications

This budget program contains funding to design, develop, support application solutions that are focused towards individual business needs, in accordance with Citywide architecture and governance. Major business applications include Financial, HRIS, Police & Fire, Customer Care Billing (Utility), and Work Order Asset Management Systems.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Business Applications	-	-	-	28,262,642
Full Time Equivalents Total	-	-	-	71.67

Department Initiatives

This budget program contains funding to citywide or department-specific IT projects and initiatives that are outside the scope of Seattle ITD's Capital Improvement Program (CIP).

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Department Initiatives	-	-	-	49,098,474
Full Time Equivalents Total	-	-	-	48.97

Platform Applications

This budget program contains funding to design, develop, and support solutions for enterprise platform applications and middleware in accordance with Citywide architecture and governance. Major platform applications include GIS & CADD, Permitting, and Customer Relationship Management systems.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Platform Applications	-	-	-	18,129,322
Full Time Equivalents Total	-	-	-	99.54

Service Modernization

This budget program contains funding to mature and advance essential IT functions, practices and services including vendor management, enterprise architecture, quality assurance, and business intelligence and analytics.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Service Modernization	-	-	-	11,388,399
Full Time Equivalents Total	-	-	-	59.00

Seattle Information Technology Department

ITD - BO-IT-D0800 - Client Solutions

The Client Solutions Budget Summary Level provides account management and support for Seattle IT customers, which includes services that build and mature relationships, support and facilitate strategic planning, guide technology learning and decisions through customer innovation labs, establish standards for Project Management and Business Analysis services for all IT projects, facilitate IT project intake analysis, and support consistent communication and customer service practices across all customer-facing divisions.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Client Solutions	-	-	-	5,771,525
Total	-	-	-	5,771,525
Full-time Equivalents Total*	-	-	-	30.06

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D1000 - Leadership and Administration

The Leadership and Administration Budget Summary Level provides executive management, strategic planning, governance, finance, budget, accounting, human resources, performance management, administrative, contracting, and project oversight services.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Business Office	9,077,513	7,874,538	8,288,948	-
Citywide Indirect Costs	7,716,419	21,576,529	5,978,819	-
CTO / Executive Team	2,651,100	4,392,770	4,510,470	-
Indirect Cost Recovery Offset	(4,214,764)	-	-	-
Pooled Benefits and PTO	1,619,028	75,734	178,982	-
Strategy & Planning	2,711,535	2,126,097	2,189,510	-
Total	19,560,830	36,045,668	21,146,729	-
Full-time Equivalents Total*	71.00	70.50	70.50	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Seattle Information Technology Department

Business Office

This budget program contains the funding associated with the core finance and administrative functions of Seattle IT, including human resources, accounting, budget, finance, communications, performance management, contracting and purchasing services in support of Seattle IT.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Business Office	9,077,513	7,874,538	8,288,948	-
Full Time Equivalents Total	45.00	41.50	41.50	-

Citywide Indirect Costs

This budget program contains the funding associated with the various overhead costs charged to Seattle IT, including budget and expenses that have been allocated from other City departments.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	7,716,419	21,576,529	5,978,819	-

CTO / Executive Team

This budget program contains the funding associated with the Chief Technology Officer (CTO) and the Seattle IT Executive Team. The CTO sets technology standards and strategies to ensure the City's technology investments are used efficiently and effectively.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
CTO / Executive Team	2,651,100	4,392,770	4,510,470	-
Full Time Equivalents Total	10.00	18.00	18.00	-

Indirect Cost Recovery Offset

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Indirect Cost Recovery Offset	(4,214,764)	-	-	-

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Pooled Benefits and PTO	1,619,028	75,734	178,982	-

Seattle Information Technology Department

Strategy & Planning

This budget program contains the funding associated with the City's IT enterprise planning efforts, including establishing strategic directions and policies, enterprise-level architecture design, and defining and managing service management frameworks.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Strategy & Planning	2,711,535	2,126,097	2,189,510	-
Full Time Equivalents Total	16.00	11.00	11.00	-

ITD - BO-IT-D3000 - Engineering and Operations

The Engineering and Operations Budget Summary Level develops, maintains, and manages core IT services including communications and data networks, data center and computer infrastructure, and end-user equipment and support.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Customer Support Services	21,316,244	22,437,775	23,438,209	-
Div Indirect - Eng & Ops	72,430	(15,613)	(11,591)	-
Engineering & Ops Maintenance	648,619	1,578,808	1,602,688	-
Enterprise Computing	20,516,766	21,645,031	19,865,304	-
Network & Communications Tech	21,114,898	19,009,130	20,138,827	-
Operations Support	7,253,446	7,414,068	6,192,348	-
Total	70,922,403	72,069,199	71,225,785	-
Full-time Equivalents Total*	204.00	205.50	205.50	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Engineering and Operations Budget Summary Level:

Customer Support Services

This budget program contains the funding associated with Seattle IT's Customer Support Operations. This team is responsible for providing support for end user software and devices, including planned and unplanned maintenance. The team also provides telephone and in person support.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Customer Support Services	21,316,244	22,437,775	23,438,209	-
Full Time Equivalents Total	74.50	77.00	77.00	-

Seattle Information Technology Department

Div Indirect - Eng & Ops

This budget program contains the funding associated with the managerial and administrative costs of overseeing and managing the Engineering and Operations Division, including asset management and infrastructure tooling support.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Div Indirect - Eng & Ops	72,430	(15,613)	(11,591)	-
Full Time Equivalents Total	20.00	20.00	20.00	-

Engineering & Ops Maintenance

This budget program contains the funding associated with Engineering and Operations maintenance support. This support is department specific and is not attached to a single application or type of service.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Engineering & Ops Maintenance	648,619	1,578,808	1,602,688	-

Enterprise Computing

This budget program contains the funding associated with the core computing services Seattle IT provides its customers, including data backup, recovery, and storage; server development and maintenance; and messaging functionality.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Enterprise Computing	20,516,766	21,645,031	19,865,304	-
Full Time Equivalents Total	49.00	50.00	50.00	-

Network & Communications Tech

This budget program contains the funding associated with Seattle IT's radio and telecommunications services, including installing, operating, and maintaining radio, voice and network infrastructure for City departments and other regional agencies.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Network & Communications Tech	21,114,898	19,009,130	20,138,827	-
Full Time Equivalents Total	47.50	45.50	45.50	-

Seattle Information Technology Department

Operations Support

This budget program contains the funding associated with Seattle IT Support Operations, including batch processing support, data center facility management and large-scale printing.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Operations Support	7,253,446	7,414,068	6,192,348	-
Full Time Equivalents Total	13.00	13.00	13.00	-

ITD - BO-IT-D4000 - Digital Engagement

The Digital Engagement Budget Summary Level provides technology to connect the public to the City and promotes digital equity across Seattle. The Digital Engagement Budget Control Level provides Citywide web services and the City's Open Data portal, oversees cable television franchises, produces the Seattle Channel, and manages the City's data privacy program.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Broadband & Community Tech	1,949,341	2,318,604	2,357,114	-
Cable Communications	661,078	-	-	-
Digital Services	3,522,051	3,857,494	3,976,824	-
Open Data	1,009,284	1,155,765	1,211,133	-
Privacy	830,790	787,145	808,775	-
Seattle Channel	2,960,644	3,115,626	3,185,193	-
Total	10,933,187	11,234,634	11,539,039	-
Full-time Equivalents Total*	54.00	52.50	52.50	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Digital Engagement Budget Summary Level:

Broadband & Community Tech

This budget program contains the funding associated with the Community Technology Services team and the Technology Matching Fund. Community Technology ensures that residents have the information technology training and access needed to ensure civic and cultural participation, employment and lifelong learning. The Technology Matching Fund provides grants to community-based organizations for projects centered on improving digital equity.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Broadband & Community Tech	1,949,341	2,318,604	2,357,114	-
Full Time Equivalents Total	6.00	7.50	7.50	-

Seattle Information Technology Department

Cable Communications

This budget program contains the funding associated with the Office of Cable Communications. The Office is responsible for negotiating cable franchise agreements, transfers, and renewals; as well as ensuring the City's cable operators comply with all franchise terms, the Seattle Municipal Code, and state and federal law.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Cable Communications	661,078	-	-	-
Full Time Equivalents Total	2.50	-	-	-

Digital Services

This budget program contains the funding associated with the Digital Services team. This team provides leadership in using Web technology and develops the City's Web presence so that residents, businesses, visitors and employees have 24-hour access to relevant information and services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Digital Services	3,522,051	3,857,494	3,976,824	-
Full Time Equivalents Total	24.00	23.50	23.50	-

Open Data

This budget program contains the funding associated with the publication and management of the City's Open Data platform. The Open Data program makes the data generated by the City openly available to improve public understanding of City operations and encourage the development of innovative technology solutions that improve quality of life.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Open Data	1,009,284	1,155,765	1,211,133	-
Full Time Equivalents Total	4.00	4.00	4.00	-

Privacy

This budget program contains the funding associated with the Privacy Services team. Privacy Services is responsible for developing and implementing Citywide standards and policies designed to protect personal and sensitive information collected from the public.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Privacy	830,790	787,145	808,775	-
Full Time Equivalents Total	3.00	3.00	3.00	-

Seattle Information Technology Department

Seattle Channel

This budget program contains the funding associated with managing and operating the Seattle Channel. The Seattle Channel is an award-winning municipal television station with programming that highlights the diverse civic and cultural landscape of Seattle.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Seattle Channel	2,960,644	3,115,626	3,185,193	-
Full Time Equivalents Total	14.50	14.50	14.50	-

ITD - BO-IT-D5000 - Security, Risk & Compliance

The Security, Risk, and Compliance Budget Summary Level provides security and risk mitigation services for the City's computing environments and develops, applies and monitors compliance with technology policies and procedures.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Security, Risk & Compliance	3,616,327	4,353,752	4,450,980	-
Total	3,616,327	4,353,752	4,450,980	-
Full-time Equivalents Total*	15.00	15.50	15.50	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D6000 - Applications Services

The Applications Services Budget Summary Level designs, develops, and supports application solutions in accordance with Citywide architecture and governance.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Applications	25,474,044	29,759,810	31,203,602	-
Applications Maintenance	-	3,058,407	3,155,457	-
Cross Platform Services	9,235,418	6,699,217	6,900,428	-
Div Indirect - App Services	(554,287)	(515,866)	(515,785)	-
Shared Platforms	14,443,107	17,166,107	17,602,576	-
Total	48,598,282	56,167,675	58,346,278	-
Full-time Equivalents Total*	223.60	233.60	233.60	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Applications Services Budget Summary Level:

Seattle Information Technology Department

Applications

This budget program contains the funding associated with the Applications team which designs, develops, integrates and supports solutions in accordance with Citywide architecture and governance.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Applications	25,474,044	29,759,810	31,203,602	-
Full Time Equivalents Total	94.40	89.10	89.10	-

Applications Maintenance

This budget program contains the funding associated with annual maintenance tied to specific departmental applications and managed by Seattle IT.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Applications Maintenance	-	3,058,407	3,155,457	-

Cross Platform Services

This budget program contains the funding associated with Seattle IT functions that serve multiple application platforms, including database administration and quality assurance.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Cross Platform Services	9,235,418	6,699,217	6,900,428	-
Full Time Equivalents Total	51.00	53.00	53.00	-

Div Indirect - App Services

This budget program contains the funding associated with the managerial and administrative costs of overseeing and managing the Applications Division.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Div Indirect - App Services	(554,287)	(515,866)	(515,785)	-
Full Time Equivalents Total	3.00	4.00	4.00	-

Shared Platforms

This budget program contains the funding associated with the Shared Platforms team which develops, maintains and provides user support for technology platforms shared across City departments, including, GIS, Sharepoint and Business Intelligence platforms.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Shared Platforms	14,443,107	17,166,107	17,602,576	-
Full Time Equivalents Total	75.20	87.50	87.50	-

Seattle Information Technology Department

ITD - BO-IT-D8000 - Client Services Management

The Client Services Management Budget Summary Level provides account management and support for Seattle IT customers.

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Client Services Management	4,302,481	3,899,388	4,046,706	-
Total	4,302,481	3,899,388	4,046,706	-
Full-time Equivalents Total*	25.00	20.00	20.00	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D9000 - IT Initiatives

The IT Initiatives Budget Summary Level provides support for citywide or department-specific IT projects and initiatives that are outside the scope of Seattle IT's Capital Improvement Program (CIP).

Program Expenditures	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Budget for Billed Services	374,694	15,228,621	15,703,876	-
Citywide IT Initiatives	917,229	1,564,230	582,084	-
Dept Operational Projects	16,899,917	34,195,072	23,474,679	-
Project Services	3,160,467	5,887,602	13,640,534	-
Total	21,352,308	56,875,525	53,401,173	-
Full-time Equivalents Total*	75.00	83.00	83.00	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in IT Initiatives Budget Summary Level:

Budget for Billed Services

This budget program contains the funding associated with Seattle IT services that are billed directly to customers on an hourly basis. These include PMO Services, Application Services and Engineering and Operations Services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Budget for Billed Services	374,694	15,228,621	15,703,876	-
Full Time Equivalents Total	39.50	50.50	50.50	-

Seattle Information Technology Department

Citywide IT Initiatives

This budget program contains the funding associated with a portfolio of non-capital IT operating initiatives. Each project in this program supports multiple different departments.

	2018	2019	2020	2020
Expenditures/FTE	Actuals	Adopted	Endorsed	Proposed
Citywide IT Initiatives	917,229	1,564,230	582,084	-

Dept Operational Projects

This budget program contains the funding associated with a portfolio of non-capital Seattle IT operating initiatives. The projects in this portfolio are supported by and developed for an individual City department.

	2018	2019	2020	2020

Office of Intergovernmental Relations

Lily Wilson-Codega, Director

(206) 684-0213

<http://www.seattle.gov/oir>

Department Overview

The Office of Intergovernmental Relations (OIR) provides advice and information to, and on behalf of, City elected officials, City departments, and external partners. The primary goal of these efforts is to ensure the City's interests are advanced with regional, state, federal, tribal, and international entities to enable the City to better serve the Seattle community.

Budget Overview

The Office of Intergovernmental Relations (OIR) is responsible for engaging with other jurisdictions and governmental entities to collaborate and advocate for outcomes that are in the interest of the City and region. OIR implements and manages lobbying contracts and ensures the City's lobbying resources align with the City's strategic advocacy priorities.

The 2020 Proposed Budget restores funding to OIR to support the City's membership in the Association of Washington Cities (AWC) after the 2019 Adopted Budget reduced funding. AWC has also changed its dues structure resulting in higher dues for 2020 and future years.

Office of Intergovernmental Relations

Incremental Budget Changes

Office of Intergovernmental Relations

	2020 Budget	FTE
Total 2020 Endorsed Budget	2,744,100	10.00
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	115,961	-
2020 State Paid Family Medical Leave Increase Base Budget	1,875	-
AWC Baseline Adjustment and Increase	110,000	-
Citywide Adjustments for Standard Cost Changes	18,638	-
Total Incremental Changes	\$246,474	-
Total 2020 Proposed Budget	\$2,990,574	10.00

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$115,961

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$1,875

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

AWC Baseline Adjustment and Increase

Expenditures \$110,000

Since the 1990s, the City of Seattle has paid \$100,000 per year to be a member of the Association of Washington Cities (AWC). In 2018, the AWC changed its dues structure and the City's dues will increase \$5,000 a year over the next five years. In 2019, the City's dues will be \$105,000 and \$110,000 in 2020. The 2020 Proposed Budget includes the full \$110,000 allocation to restore funding after a reduction in the 2019 Adopted Budget.

Citywide Adjustments for Standard Cost Changes

Expenditures \$18,638

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Office of Labor Standards

Martin S. Garfinkel, Director

(206) 256-5297

www.seattle.gov/laborstandards

Department Overview

The mission of the Office of Labor Standards (OLS) is to advance labor standards through thoughtful community and business engagement, strategic enforcement, and innovative policy development, with a commitment to race and social justice. The Office of Labor Standards focuses on the implementation of labor standards for employees working within Seattle city limits. Effective January 2020, these standards, established through City ordinances and a City initiative, include the following:

- **Paid Sick and Safe Time Ordinance**, requiring employers with more than four full-time equivalent employees to provide paid sick and safe time;
- **Fair Chance Employment Ordinance**, restricting how employers can use conviction and arrest records during the hiring process and course of employment;
- **Minimum Wage Ordinance**, establishing a minimum hourly wage that will rise to \$15/hour for all employees in the city by 2021;
- **Wage Theft Ordinance**, requiring employers to provide written notice of employment information and pay all compensation due by reason of employment (including wages and tips) on a regular pay day;
- **Secure Scheduling Ordinance**, establishing scheduling requirements for covered retail and food service establishments to provide schedule predictability and increased access to hours;
- **Hotel Employees Health and Safety Initiative**, establishing workplace protections for hotel workers in four separate ordinances likely enacted soon to replace the Hotel Employee Health & Safety Initiative (invalidated by the Washington Court of Appeals on December 24, 2018);
- **Domestic Workers Ordinance**, which provides protections for domestic workers and establishes a Domestic Workers Standards Board; and
- **Commuter Benefits Ordinance**, requiring employers to provide commuter benefits on a pre-tax basis (OLS enforcement begins in January 2021).

OLS provides education and technical assistance to the business and worker communities. As a part of these efforts, OLS manages the **Community Outreach and Education Fund** to foster collaboration between OLS and the community with funds to develop awareness and understanding of the worker rights provided by Seattle's labor standards. The office also manages the **Business Outreach and Education Fund** which provides technical assistance to small businesses to increase compliance with Seattle's labor standards. The fund emphasizes outreach to businesses owned by low-income and historically disenfranchised communities who typically are not served by traditional outreach methods.

OLS also provides technical, policy, and administrative support for the Labor Standards Advisory Commission, consisting of 15 members who advise on matters related to labor standards, as well as to the recently created Domestic Workers Standards Board, a nine member body that advises on issues related to workplace protections for domestic workers.

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Budget Overview

The 2020 Proposed Budget maintains resources and staff to support the significant ongoing work of the Office of Labor Standards. This includes sustained funding for 5 FTE that were added in the 2019 budget to support the increased capacity needs of the office and to support the Domestic Workers Ordinance that the City Council and Mayor enacted in July 2018. In addition to the six City ordinances that OLS currently enforces: Paid Sick and Safe Time, Fair Chance Employment, Minimum Wage, Wage Theft, Secure Scheduling, and Domestic Workers; OLS will begin to monitor and prepare to provide support and services to cover the Commuter Benefits Ordinance. The Commuter Benefits Ordinance goes into effect on Jan. 1, 2020 and OLS enforcement begins Jan. 1, 2021. To date, over 54,000 employers are required to comply with, and over 580,000 workers are protected by, at least some of the laws enforced by OLS. It is also likely that OLS will be tasked with enforcing laws that protect hotel workers, currently being considered by the City Council.

The 2020 Proposed Budget provides OLS with a number of technical adjustments, the biggest of which will cover tentative agreements with the Coalition of Unions.

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures	\$345,045
Revenues	\$345,045

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures	\$2,962
Revenues	\$2,962

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$79,212
Revenues	\$79,212

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer

Office of Labor Standards

of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Technical

Technical Adjustment for OLS Space Rent

Expenditures	\$(219,649)
Revenues	\$(219,649)

This is a technical adjustment to the baseline budget of the Office of Labor Standards in the amount of \$219,649. This adjustment corrects previous estimates for lease increase.

Legislative Department

Bruce Harrell, Council President

(206) 684-8888 TTY: (206) 233-0025

<http://www.seattle.gov/council/>

Department Overview

The Legislative Department is comprised of the Seattle City Council, as well as two primary divisions: Central Staff and the Office of the City Clerk. Each division supports various aspects of the Council and works with members of the public and City departments to facilitate and develop effective and responsive public policy. The Council and Legislative Department are part of the legislative branch of government, which also includes the Office of City Auditor, the Office of Hearing Examiner, and the Office of Inspector General.

The Council is composed of two at-large and seven district-elected seats for a total of nine, nonpartisan, elected Councilmembers. In November 2015, seven district Councilmembers were elected to a four-year term beginning in 2016. Two at-large Councilmembers were elected to an initial two-year term to align with the election for a four-year term with the Mayor and City Attorney election in 2017. This approach staggers the district and at-large elections two years apart in future years.

The City Council establishes city laws; creates, evaluates and approves policies, legislation, and regulations; approves the City's annual operating and capital improvement budgets; and provides oversight to the City's executive departments. Each Councilmember has a staff of legislative assistants who assist in this work.

Central Staff provides policy and budget analysis for Councilmembers and their staffs, as well as consultant contract services for the Legislative Department. The Office of the City Clerk advances principles of open government and inclusive access through effective facilitation of the legislative process and transparent, accountable stewardship of public information and the official record, including City Council proceedings and legislation. The City Clerk serves as ex-officio elections administrator and filing officer. The office manages the City's Boards and Commissions Registry Program; coordinates public records disclosure requests; and provides information technology, administrative and operational support to the Legislative Department.

Communications and Human Resources/Finance teams are also a part of the Legislative Department. Communications staff assist Councilmembers and the Council as a whole in communicating values, goals and issues to the public by providing marketing and public relations services, including website and social media management, strategic media relations and public affairs work. Human Resources/Finance staff provide employee relations, talent acquisition, employee development, performance management, benefits administration services, finance, budget, accounting, and payroll for the Legislative Department and Office of City Auditor.

Budget Overview

The 2020 Proposed Budget maintains support to the Legislative Department and preserves the services provided by the City Council and the City Clerk to residents and City departments. The budget includes an increase to enhance Central Staff's ability to provide legal, policy, and fiscal analysis to the City Council. Finally, technical adjustments have been made to bring the proposed budget into alignment with an Annual Wage Increase, a State Paid Family Medical Leave increase, and other citywide adjustments to internal service costs.

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$924,023

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$14,361

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$156,802

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates,

2003

Legislative Department

health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Proposed Operating

Add Funding for Central Staff Support to City Council

Expenditures	\$200,000
--------------	-----------

This item adds ongoing funding to enhance Central Staff's ability to provide legal, policy, and fiscal analysis to the City Council.

Total	3,089,940	3,838,153	3,619,966	3,777,539
Full-time Equivalents Total*	-	5.00	5.00	5.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services and Seattle Information Technology Department.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Citywide Indirect Costs	2,075,495	2,673,030	2,444,978	2,513,454

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department. This may include personnel costs related to department leadership and administration or other administrative costs such as external rent and operating supplies or services.

Expenditures/FTE	2018 Actuals	2019 Adopted	2020 Endorsed	2020 Proposed
Departmental Indirect Costs	1,014,445	1,165,123	1,174,988	1,264,085

2007

Office of the Mayor

Jenny A. Durkan, Mayor

(206) 684-4000

<http://www.seattle.gov/mayor/>

Department Overview

The Office of the Mayor works to provide leadership to the residents, employees, and regional neighbors of the City of Seattle and to create an environment that encourages ideas, civic discourse, and inclusion for the City's entire diverse population.

In the municipality of Seattle, the Mayor governs the Executive Branch as its chief executive officer. The many legal roles and responsibilities of the Mayor, and those working directly for the Mayor, are prescribed in the City Charter, state statutes and municipal ordinances. Elections for this nonpartisan office are held every four years.

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Budget Overview

The 2020 Proposed Budget increases the Office of the Mayor's budget by \$595,000. A transfer of public disclosure request staffing into the office adds \$188,000, and the remainder of the increase is related to Citywide changes, including a labor agreement, state benefit changes and central costs for services such as space and information technology.

Office of the Mayor

Incremental Budget Changes

Office of the Mayor

	2020 Budget	FTE
Total 2020 Endorsed Budget	7,111,434	37.50
Baseline		
2020 Coalition and Non-Rep Annual Wage Increase Base Budget	385,647	-
2020 State Paid Family Medical Leave Increase Base Budget	5,546	-
Citywide Adjustments for Standard Cost Changes	15,798	-
Proposed Operating		
Public Disclosure Request Staffing	188,290	2.00
Total Incremental Changes	\$595,281	2.00
Total 2020 Proposed Budget	\$7,706,715	39.50

Description of Incremental Budget Changes

Baseline

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$385,647

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$5,546

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Citywide Adjustments for Standard Cost Changes

Expenditures \$15,798

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

2010

Office of the Mayor

Proposed Operating

Public Disclosure Request Staffing

Expenditures	\$188,290
Position Allocation	2.00

Between 2015 and 2018, the number of public records requests (PDR) received by the Mayor's Office has more than doubled from 99 in 2015 to 223 in 2018. This budget transfers an existing 1.0 FTE Strategic Advisor 2 Exempt position, currently supporting Mayor's Office PDR requests, from the Department of Finance and Administrative Services to the Mayor's Office. A new 1.0 FTE Strategic Advisor 2 position and budget is also added to maintain the 2.0 FTE supporting Mayor's Office PDR requests, which is currently supported by a temporarily loaned position. This adjustment will better align PDR staff with department work.

Office of Sustainability and Environment

Jessica Finn Coven, Director

(206) 684-9261

www.seattle.gov/environment

Department Overview

The Office of Sustainability & Environment (OSE) develops and implements citywide environmental policies and programs that propel Seattle toward a sustainable, equitable, and carbon neutral future. OSE collaborates with a wide range of stakeholders to develop innovative environmental solutions that foster equity, vibrant communities, and shared prosperity. OSE develops policies and promotes green initiatives through three functional areas:

Citywide Coordination: Coordinates interdepartmental work on priority programs, policies, and outreach to advance the City's environmental goals. OSE's coordination work includes a focus on food systems, urban forestry, energy efficiency in City buildings, equity and environment, and environmental performance measurement. OSE is also responsible for administrative coordination of two prominent Boards and Commissions: the Urban Forestry Commission, and the Sweetened Beverage Tax Community Advisory Board.

Innovation & Research: Conducts research and develops the City's next generation of environmental and sustainability policies and programs. OSE's innovation and research includes a special focus on environmental equity, building energy, food policy, and transportation electrification, including implementing the Equity and Environment Agenda, Building Energy Benchmarking & Tune-Up program, Fresh Bucks food access program, and the Drive Clean Seattle program.

Climate Change Action Planning, Implementation and Measurement: Coordinates implementation of the Seattle Climate Action Plan to reduce Seattle's greenhouse gas emissions, including goal assessment, action planning, community outreach, and performance measurement. OSE's climate change planning and measurement work also includes implementing a climate change adaptation strategy that minimizes the disproportionate impacts of a changing climate while making Seattle less vulnerable and more resilient.

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Office of Sustainability and Environment

Budget Overview

The 2020 Proposed Budget for the Office of Sustainability & Environment (OSE) largely remains unchanged from the 2020 Endorsed Budget, focusing on the implementation of established initiatives and supporting ongoing policy and administrative functions. The 2020 Proposed Budget does include new initiatives in food policy and energy efficiency.

New initiatives: In 2020, OSE will implement the following new or expanded initiatives:

Fresh Bucks Program Expansion: In 2012, OSE established the Fresh Bucks Program, a program that increases the affordability of fresh fruits and vegetables to participants of the Supplemental Nutritional Assistance Program (SNAP). Fresh Bucks partners with local businesses, supermarkets, farmers markets, and healthcare clinics to provide financial incentives for consuming healthy food.

In 2015, OSE received \$1.6 million in federal grants through the Food Insecurity Nutrition Incentive (FINI) grant program to expand benefits for program participants. By 2016, Fresh Bucks had expanded to 29 locations, and launched Fresh Bucks Rx, partnering with medical providers to prescribe fruits and vegetables to food insecure patients.

In 2018, Fresh Bucks expanded program eligibility beyond the Federal Supplemental Nutrition Assistance Program participation, in alignment with other affordability programs. Also in 2018, \$480,000 of FINI grants supported direct incentives to Fresh Bucks participants. As part of the long-term strategy to sustain and grow the Fresh Bucks program, the City has identified resources from the Sweetened Beverage Tax as a natural nexus to support the program in 2019 and beyond. An additional \$923,000 from the Sweetened Beverage Tax was added in 2018 to support the program. This funding was originally reserved by the Mayor and Council in the 2018 Adopted Budget and released on recommendation of the Sweetened Beverage Tax Community Advisory Board through the 2018 Second Quarter Supplemental Budget Ordinance.

In 2020, an additional \$2,000,000 is provided to expand the Fresh Bucks voucher program, supported by new revenue from the Sweetened Beverage Tax. Please see the incremental change description below for more information about this expansion.

Oil Heat Conversion Expansion and Tax: Pending legislative action, the City will impose a new tax on residential heating oil to reduce carbon emissions and increase programmatic support to help homeowners convert from oil heat to electric heat pumps. The City estimates that about 18,000 homes rely on oil heating within the city limits. Funding from this tax would support an OSE conversion program to complete about 3000 conversions from oil heating to electric heat pump by 2028, partnering with Seattle City Light and the Seattle Office of Housing. This program will prioritize the conversion of low-income residents by providing support for the full cost of the conversion for qualified residents, and provides partial incentives to the remaining non-low income customers. This program also supports a training program for businesses that may be impacted by the tax.

Position support for Energy Efficiency: OSE will add two new sunset positions to the work program supporting the Municipal Energy Efficiency Project (MEEP), a capital project spanning multiple departments that seeks to improve building energy efficiency through capital projects in City-owned facilities. These positions are fully funded through existing revenue budgeted in the MEEP. For more detail about this project, please see the Municipal Energy Efficiency Project located in the Department of Finance and Administrative Services' 2020-2025 Proposed Capital Improvement Program.

Funding Climate Director: OSE has grown to support expansive climate change policy initiatives across the City through its Climate Action work. In continuing to support the Mayor's Climate Action Strategy and keep the City on track to meet objectives of the Paris Climate Accord, OSE will add \$175,899 to fund a Climate Director.

Ongoing initiative support: The 2020 Proposed Budget continues to fund existing initiatives in OSE, including:

- Equity and Environment Initiative

Office of Sustainability and Environment

- Duwamish Valley Program
- Climate Action Initiatives
- Drive Clean Seattle
- Building Energy Efficiency
- Food Policy and Programs

Please see previous years' budgets for a description of these initiatives.

Total 2020 Proposed Budget	\$11,578,103	28.50

Description of Incremental Budget Changes

Citywide Adjustments for Standard Cost Changes

Expenditures \$46,739

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including the Department of Finance & Administrative Services rates, Information Technology rates and Human Resources rates, health care, retirement and industrial insurance charges for the department. This adjustment also includes a transfer of resources from the department to the Human Resources Investigations Unit (HRIU) as part of the City's efforts to improve investigative processes and practices across the City departments. While the internal service rates are final for 2020, some of the other adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline

Supplemental Budget Changes

2016

Office of Sustainability and Environment

Expenditures \$680,000

This change completes a true-up of the 2020 Proposed Budget for any ongoing appropriation changes made in 2019. This change includes adding \$680,000 of appropriation in the Sweetened Beverage Tax Fund to replace expiring grant and one-time funding, and maintain current service levels for the Fresh Bucks program.

2020 Coalition and Non-Rep Annual Wage Increase Base Budget

Expenditures \$255,788

This centrally administered change adjusts appropriations to reflect the Annual Wage Increase, as outlined in the tentative agreement between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, retirement, overtime and temporary labor.

2020 State Paid Family Medical Leave Increase Base Budget

Expenditures \$4,454

Starting in January 2020, Washington State will offer paid family and medical leave benefits to all workers in the State of Washington, including City of Seattle employees. In 2020, the tentative agreement with the Coalition of Unions moves a portion of the cost responsibility to the employee in 2020, with the City paying the remainder. This item increases appropriations to account for the City's obligation for all employees.

Proposed Operating

Increase support for Fresh Bucks

Expenditures \$2,000,000

This change increases the funding for the Fresh Bucks program by \$2,000,000, tripling the number of eligible residents for the voucher component of the program to 6,000 recipients, for a total of over 12,000 served by all Fresh Bucks services. This supports OSE's Fresh Bucks voucher program, a key element of the Fresh Bucks Program's strategy to reach residents in the "food security gap" who experience food insecurity but do not qualify for other food assistance programs. OSE has identified continued demand for this program, with further expansion possible as funds become available.

Heating Oil Tax and Conversion Expansion

Expenditures \$595,357

This change will increase OSE's budget by \$593,425 to support activities in the Oil Heat Conversion Program, which currently provides subsidies, and will expand those subsidies alongside new training, education, communication, and support efforts to individuals wishing to convert from residential oil heating furnaces to electric heat pumps. This work expands OSE's current work on conversion, and will be absorbed into the existing program work. This budget is dependent on Council approval of a Heating Oil Ordinance which would impose a regulatory fee of \$.236 on each gallon of heating oil. The fee would generate funds to mitigate environmental and carbon pollution with specific focus on funding residential oil conversions to electric heat pumps, assisting in the conversion of about 3,000 homes through this program. Seattle Office of Housing and Seattle City Light will provide additional program support to implement these conversions, and Seattle Department of Finance and Administrative services will provide support for implementing a new tax.

Program Advisor for Energy Efficiency

Position Allocation 1.00

This change will add 1.0 FTE Strategic Advisor 1 position to the Municipal Energy Efficiency Program as a position with a sunset date. The position will be supported by Real Estate Excise Taxes currently allocated within the

2017

Office of Sustainability and Environment

Municipal Energy Efficiency Project CIP. This position will sunset December 31, 2026. Please see the Department of Finance and Administrative Services' 2020-2025 Proposed Capital Improvement Program for more detail on this project.

Administrative Support for Energy Efficiency

Expenditures	\$81,223
Position Allocation	1.00

This change will convert an existing temporary position, expiring in November 2019, that provides administrative and technical support to the Municipal Energy Efficiency Project, to a permanent position with a sunset date. Position costs will be revenue-backed by General Fund energy rebates earned through the work of the program and will sunset December 31, 2026. Please see the Department of Finance and Administrative Services' 2020-2025 Proposed Capital Improvement Program for more detail on this project.

Ongoing Funding for Climate Director

Expenditures	\$175,899
--------------	-----------

This change adds \$175,899 to OSE's budget to support a position responsible for implementing and monitoring the Climate Action Strategy released in April 2018 and the City's commitment to achieving the goals of the Paris Climate Accord. The position also oversees OSE's work on municipal and private building energy efficiency and energy benchmarking, Greenhouse Gas Inventory and Climate Action Plan reports, and coordinating the Mayor's Environment and Climate Subcabinet. In 2019, City Council modified the funding to this position to apply only through 2019. This change restores the funding for 2020 as ongoing support.

Proposed Technical

Transfer Sweetened Beverage Tax Baseline Budget to New Fund

Expenditures	-
--------------	---

This technical change reflects the requirements of Ordinance 125886 and transfers the baseline department budget for Sweetened Beverage Tax activity from the General Fund (00100) to the Sweetened Beverage Tax Fund (00155). These changes are net-zero.

Notes

Firefighters' Pension Fund, Police Relief and Pension Fund, and Seattle Public Library positions: Personnel figures are for informational purposes only. The Library's position list is established by the Library Board of Trustees, and positions for the Police and Firefighter Pension funds are set by their respective board members.

Cost Allocation Tables:

These tables provide information about how the City allocates internal service costs (i.e. overhead provided by City agencies to other City agencies) to customer agencies.

Cost Allocation

Central Service Departments and Commissions - 2020 Cost Allocation Factors

Central Service Department	Cost Allocation Factor
City Auditor	Audit hours spent on direct department projects averaged over prior two-year period.
City Budget Office	Percent of FTE time spent on cost allocation departments/funds.
Civil Service Commission	Five-year average of number of cases by department.
Office of Civil Rights	2010-2011 cases filed by department.
Office of Employee Ombud	Proportionate to budgeted FTE by department.
Office of Intergovernmental Relations	Staff time and assignments by department.
Office of Sustainability and Environment	Management assessment of FTE time on work programs.
Department of Finance and Administrative Services	Various factors and allocations. See Appendix B(1) for details on services, rates, and methodologies.
Seattle Information Technology	Various factors and allocations. See Appendix B(2) for details on services, rates, and methodologies.
Law Department	Two-year average of civil attorney and paralegal service hours by department (excludes hours that are covered by direct billing via MOAs), including proportionate amount of overhead.
Legislative Department	City Clerk's Office based on number of Legislative items; Central Staff and Legislative Assistants on assignments; City Council 100% General Fund or by MOA* and City Clerk based on workload.
Seattle Department of Human Resources	Various factors and allocations. See Appendix B(3) for details on services, factors, and methodologies.
State Examiner (State Auditor)	75% by Summit rows of data; 25% by authorized FTEs.
Emergency Management	Actual expenditure dollar spread.

*Memorandum of Agreement (MOA) on charges

Glossary

Appropriation: A legal authorization granted by the City Council, the City's legislative authority, to make expenditures and incur obligations for specific purposes.

Biennial Budget: A budget covering a two-year period. Under state law, a biennium begins with an odd-numbered year.

Budget - Adopted and Proposed: The Mayor submits to the City Council a recommended expenditure and revenue level for all City operations for the coming fiscal year as the Proposed Budget. When the City Council agrees upon the revenue and expenditure levels, the Proposed Budget becomes the Adopted Budget, funds are appropriated, and legal expenditure limits are established.

Budget - Endorsed: The City of Seattle implements biennial budgeting through the sequential adoption of two one-year budgets. When adopting the budget for the first year of the biennium, the Council endorses a budget for the second year. The Endorsed Budget is the basis for a Proposed Budget for the second year of the biennium, and is reviewed and adopted in the fall of the first year of the biennium.

Budget Control Level: The level at which expenditures are controlled to meet State and City budget law provisions.

Capital Improvement Program (CIP): Annual appropriations from specific funding sources are shown in the City's budget for certain capital purposes such as street improvements, building construction, and some kinds of facility maintenance. These appropriations are supported by a six-year allocation plan detailing all projects, fund sources, and expenditure amounts, including many multi-year projects that require funding beyond the one-year period of the annual budget. The allocation plan covers a six-year period and is produced as a separate document from the budget document.

Chart of Accounts: A list of expenditure, revenue, and other accounts describing and categorizing financial transactions.

Community Development Block Grant (CDBG): A U.S. Department of Housing and Urban Development (HUD) annual grant to Seattle and other local governments to support economic development projects, human services, low-income housing, and services in low-income neighborhoods.

Comprehensive Annual Financial Report of the City (CAFR): The City's annual financial statement prepared by the Department of Finance & Administration.

Cost Allocation: Distribution of costs based on some proxy for costs incurred or benefits received.

Cumulative Reserve Subfund (CRS): A significant source of ongoing local funding to support capital projects in general government departments. The CRS consists of two accounts: the Capital Projects Account and the Revenue Stabilization Account. The Capital Projects Account has six subaccounts: REET I, REET II, Unrestricted, South Lake Union Property Proceeds, Asset Preservation Subaccount - Fleets and Facilities, and the Street Vacation Subaccount. The Real Estate Excise Tax (REET) is levied on all sales of real estate, with the first .25% of the locally imposed tax going to REET I and the second .25% to REET II. State law specifies how each REET can be spent.

Debt Service: Annual principal and interest payments the City owes on money it has borrowed.

Errata: Adjustments, corrections, and new information sent by departments through the City Budget Office to the City Council during the Council's budget review as an adjunct to the Mayor's Proposed Budget. The purpose is to adjust the Proposed Budget to reflect information not available upon submittal and to correct inadvertent errors.

Glossary

Full-Time Equivalent (FTE): A term expressing the amount of time for which a position has been budgeted in relation to the amount of time a regular, full-time employee normally works in a year. Most full-time employees (1.00 FTE) are paid for 2,088 hours in a year (or 2,096 in a leap year). A position budgeted to work half-time for a full year, or full-time for only six months, is 0.50 FTE.

Fund: An accounting entity with a set of self-balancing revenue and expenditure accounts used to record the financial affairs of a governmental organization.

Fund Balance: The difference between the assets and liabilities of a particular fund. This incorporates the accumulated difference between the revenues and expenditures each year.

General Fund: A central fund into which most of the City's general tax revenues and discretionary resources are pooled, and which is allocated to support many of the operations of City government. Beginning with the 1997 Adopted Budget, the General Fund was restructured to encompass a number of subfunds, including the General Fund Subfund (comparable to the "General Fund" in prior years) and other subfunds designated for a variety of specific purposes. These subfunds are listed and explained in more detail in department chapters, as well as in the Funds, Subfunds, and Other section of the budget document.

Grant-Funded Position: A position funded 50% or more by a categorical grant to carry out a specific project or goal. Seattle Municipal Code 4.04.030 specifies that "categorical grant" does not include Community Development Block Grant funds, nor any funds provided under a statutory entitlement or distribution on the basis of a fixed formula including, but not limited to, relative population.

Neighborhood Matching Subfund (NMF): A fund supporting partnerships between the City and neighborhood groups to produce neighborhood-initiated planning, organizing, and improvement projects. The City provides a cash match to the community's contribution of volunteer labor, materials, professional services, or cash. The NMF is administered by the Department of Neighborhoods.

Operating Budget: That portion of a budget dealing with recurring expenditures such as salaries, electric bills, postage, printing, paper supplies, and gasoline.

Position/Pocket Number: A term referring to the title and unique position identification number assigned to each position authorized by the City Council through the budget or other ordinances. Positions may have a common title name, but each position has its own unique identification number assigned by the Records Information Management Unit of the Seattle Department of Human Resources at the time position authority is approved by the City Council. Only one person at a time can fill a regularly budgeted position. An exception is in the case of job-sharing, where two people work part-time in one full-time position.

Program: A group of services within a department, aligned by common purpose.

Reclassification Request: A request to change the job title or classification for an existing position. Reclassifications are subject to review and approval by the Classification/Compensation Unit of the Seattle Department of Human Resources and are implemented upon the signature of the Director of Human Resources, as long as position authority has been established by ordinance.

Reorganization: Reorganization refers to changes in the budget and reporting structure within departments.

SUMMIT: The City's central accounting system managed by the Department of Finance & Administration.

Sunsetting Position: A position funded for only a specified length of time by the budget or enabling ordinance.

TES (Temporary Employment Service): A program managed by the Seattle Department of Human Resources. TES places temporary workers in departments for purposes of filling unanticipated, short-term staffing needs, such as vacation coverage, positions vacant until a regularly-appointed hire is made, and special projects.

Type of Position: There are two types of budgeted positions. They are identified by one of the following characters: **F** for Full-Time or **P** for Part-Time.

2050

Glossary

- **Regular Full-Time** is defined as a position budgeted for 2,088 compensated hours per year, 40 hours per week, 80 hours per pay period, and is also known as one full-time equivalent (FTE).
- **Regular Part-Time** is defined as a position designated as part time, and requiring an average of 20 hours or more, but less than 40 hours of work per week during the year. This equates to an FTE value of at least 0.50 and no more than 0.99.

SUPPLEMENT TO 2020 PROPOSED BUDGET BOOK

Transportation Network Company (TNC) Tax

Overview

On September 19, 2019, Mayor Jenny A. Durkan announced a proposed tax on rides with Transportation Network Companies (TNCs) that originate in the City of Seattle. Proceeds from the tax, scheduled to go into effect on July 1, 2020, will be used to fund a variety of investments in affordable housing, transportation including transit, and a series of measures designed to support TNC drivers.

Due to the timing of the Mayor's proposal, the 2020 revenue and appropriations associated with the tax are not reflected elsewhere in the budget book. Legislation submitted with the 2020 Proposed Budget enacts the tax, adopts a spending plan for the proceeds, appropriates 2020 expenditures based on anticipated revenues, and enacts driver protections. The financial impacts are summarized below.

Revenue

If the TNC tax goes into effect on July 1, 2020 as planned, it is estimated to generate \$9,655,485 of General Fund revenue in the half-year of collection in 2020. Estimates for future years are found in the chart below.

Year	2020 (half-year)	2021	2022	2023	2024	2025
Est. Revenue	\$9,655,485	\$21,657,592	\$23,853,906	\$25,077,977	\$25,987,479	\$26,929,217

Revised General Fund Revenue tables are found on the following pages.

Appropriations

Before the tax is implemented, the Department of Finance and Administrative Services (FAS) will work to set up the accounting and tax infrastructure necessary to implement and enforce the tax beginning July 1, 2020. The department will receive \$1,546,000 in appropriations to do this work.

The remainder of the 2020 funds (\$8,109,485) are appropriated into Finance General, which is a mechanism to hold appropriations temporarily. It is anticipated that those funds will be moved from Finance General into the Seattle Department of Transportation, Office of Housing, Office of Labor Standards, and Department of Finance and Administrative Services in the first half of 2020.

2020 – Revenues and Appropriations

\$9,655,485 – Revenue to General Fund (00100) – Finance General

\$1,546,000 – Appropriations to Department of Finance and Administrative Services

\$1,365,370 to General Fund (00100) – City Finance Budget Summary Level (BO-FA-CITYFINANCE)

\$180,630 to General Fund (00100) – Regulatory Compliance and Consumer Protection BSL (BO-FA-RCCP)

\$8,109,485 – Appropriations to Finance General

General Fund (00100) – Reserves Budget Summary Level (BO-FG-2QD00)

SUPPLEMENT TO 2020 PROPOSED BUDGET BOOK

Description of Incremental Budget Changes

FAS Resource Needs for the Transportation Network Company (TNC) Tax

Expenditures	\$1,546,000
--------------	-------------

On September 19, 2019, Mayor Jenny A. Durkan announced a proposed tax on rides with Transportation Network Companies (TNCs) that originate in the City of Seattle. Proceeds from the tax, scheduled to go into effect on July 1, 2020, will be used to fund a variety of investments in affordable housing, transportation including transit, and a series of measures designed to support TNC drivers. This item appropriates \$1,546,000 to FAS to implement the tax. The revenue supporting this add is recognized in Finance General.

Transportation Network Company Tax Reserve

Expenditures	\$8,109,485
Revenues	\$9,655,485

On September 19, 2019, Mayor Jenny A. Durkan announced a proposed tax on rides with Transportation Network Companies (TNCs) that originate in the City of Seattle. Proceeds from the tax, scheduled to go into effect on July 1, 2020, will be used to fund a variety of investments in affordable housing, transportation including transit, and a series of measures designed to support TNC drivers. This item recognizes the anticipated 2020 revenue of \$9,655,485 to Finance General and creates a reserve of \$8,109,485 for those investments. The remaining \$1,546,000 is appropriated to the Department of Finance and Administrative Services to implement the tax.

* In the past, 10% of certain tax and fee revenues were shown as revenue to the Parks and Recreation Fund and 90% as General Fund. As of 2009, 100% of these revenues (depicted as "100%" in the table) are deposited into the General Fund. General Fund support to the Department of Parks and Recreation is well above the value of 10% of these revenues.

Reader's Guide to the 2020-2025 Proposed Capital Improvement Program

The City of Seattle's 2020-2025 Proposed Capital Improvement Program (CIP) includes an introduction, departmental sections, appendix, an index, and a glossary. The introduction provides information on the CIP, allocations, funding sources for capital projects, significant initiatives, support for neighborhoods and neighborhood plan projects, and policies guiding the City's capital investments.

Departmental sections comprise most of the CIP document and contain detailed information on approximately 628 projects. The following departments have sections in this book: Seattle Parks and Recreation, Seattle Center, Seattle Public Library, Seattle Department of Transportation, Seattle City Light, Seattle Public Utilities (divided into four sections: Drainage and Wastewater, Solid Waste, Technology Projects, and Water), Seattle Information Technology, and Finance and Administrative Services. Appendix A lists new or expanded capital facilities as required by the Growth Management Act. Appendix B lists all projects that will exceed \$5 million with their 2020 appropriation as required by Resolution 31203. Appendix C is a REET II funding report as required by RCW 82.46.035.

Reading CIP Project Pages

CIP project pages, located in the departmental sections of the CIP, provide the most detailed information about a project. The project pages contain the following information:

Project Type: Projects will have one of three project types: Discrete, Ongoing, or Debt Service. Discrete projects are those with a distinct start and end date and build an individual asset. Ongoing CIP projects are departmental CIP programs that build or maintain a group of similar assets. Debt Service projects show the dedicated funding stream to pay the debt service for a project or group of projects.

Project No.: Unique number identifying a project in the City's automated financial management system.

Start/End Date: Estimated Start and End year of a discrete project. Projects without a determined start or end date may show as "TBD" or "On Hold." Projects categorized as "Ongoing" in the Project Type field are programmatic and continue year after year, therefore they do not display a Start/End Date.

BCL (Budget Control Level)/Program Code, BCL/Program Name: A grouping of similar projects into department-specific programs. Also reflects the level at which expenditures are controlled to meet state budget law provisions.

Current Project Stage: The current stage of a discrete CIP project during budget planning (August of the budget development year).

Stage 1—Pre-project Development: All master planning, asset planning, and needs identification. Rough order of magnitude cost estimate¹ for CIP budget established at the end of Stage 1.

¹ The City's budget ordinance requires that a project be assigned a CIP ID number before spending may occur on a project. As a result, Stage 1 project cost estimates/budgets are "Rough Order of Magnitude" estimates based on previously constructed projects or high-level cost estimates which use generic assumptions. Departments refine cost estimates at the end of Stage 2.

Stage 2—Initiation, Project Definition & Planning: Define project and create Project Management Plan (or pre-design package) which sets the project baseline (scope, schedule and budget) from which a department measures variance.

Stage 3—Design: 30%-100% design work.

Stage 4—Procurement/Bid: Advertisement, bid review, bid award, and Notice to Proceed.

Stage 5—Construction: All construction activities. (Note: The term *Execution* is used for Seattle Information Technology).

Stage 6—Closeout: Final project closeout items, includes financial closeout.

Project Category: Projects are identified as New Facilities, Improvements to Existing Facilities, or Rehabilitation or Restoration of Existing Facilities. Technology projects, or those that do not fit into the categories above, are identified as New Investments.

Location: Street address, intersection, or general location of a project. If a project has multiple location entries, only one project location entry is included in the CIP.

Neighborhood District: The City is divided into 13 neighborhood districts. This field indicates in which (if any) neighborhood district(s), a project is located. Some projects are located in more than one neighborhood district or outside the city and are noted as such.

Council District: The City is divided into seven Council districts. This field indicates in which (if any) council district(s), a project is located. Some projects are located in more than one council district or outside the city and are noted as such.

Total Project Cost: The expected total project cost estimate of a Discrete project. The Total Project Cost includes any “out year” spending (spending outside the current six-year CIP).

Urban Village: This field indicates whether a project is located in an Urban Village, a designated geographic area expected to accommodate future population and job growth, as defined by the Comprehensive Plan’s growth management strategy.

Project Description: Information about the purpose, scope, and history of the project.

Resources: The Resources are sources of money supporting a particular project such as grants, private donations, debt, Real Estate Excise Taxes, etc. The Resources Table lists the project’s revenue sources, life-to-date (LTD) expenditures through the prior year; the current year revised budget (including Adopted Budget, carry-forward balances, abandonments, and supplemental appropriations); proposed appropriations; and estimated appropriation requests for the remaining five years of the CIP period.

Fund Appropriations/Allocations: This table lists the appropriating funds which are those funds through which the department has legal appropriation authority by year. Note that this level of detail on the project pages is for information only. The City appropriates funds at the Budget Control Level.

Unsecured Funding: The “Unsecured Funding” table shows the portion of the project cost that does not have committed funding from both internal and external sources. The “Unsecured Funding Strategy” discusses the department’s plan to secure funding for that portion of the project.

O&M Costs (Savings): Description of estimated increases or decreases in operations and maintenance costs as a result of a capital project. “NA” denotes that operations and maintenance costs are not calculated.

Capital Improvement Program

Overview

Capital Improvement Program Purpose

The Capital Improvement Program (CIP) is a six-year financial planning tool that identifies future capital investments and potential strategies for funding those investments. The CIP also satisfies various requirements of cities planning under the Growth Management Act.

Background

The City of Seattle owns and operates a variety of physical assets, ranging from community parks, roadways, bridges, office buildings, libraries, open space, fire stations, maintenance yards, facilities at Seattle Center, and more. The City must properly maintain these assets in order to ensure they are safe, lasting, and provide a welcoming and usable space to serve their intended purposes. The City's utility infrastructure is also included in the CIP, including electric, solid waste, water and wastewater utility assets. The City's capital infrastructure supports City operations, direct public services and programs, and in some cases, provides direct public benefits themselves.

Every year during the annual budget process, the City adopts a six-year CIP, which outlines anticipated investments over that timeframe. The 2020-2025 Proposed CIP totals \$7.2 billion over six years, with approximately \$1.4 billion of that amount designated for the 2020 budget year.

Capital Planning Policies

The City has historically based capital planning efforts on a set of criteria that help set priorities among potential capital programs. [Resolution 31203](#), adopted in June 2010, set out the following policies to guide the City's capital spending:

- preserve and maintain existing capital assets;
- support the goals of the City's plans;
- support economic development;
- consider external funding possibilities;
- consider revenue-generating possibilities;
- seek regional funding for regional projects;
- pursue cost-saving commitments; and,
- pursue conservation and sustainability investments.

Additional specific considerations include:

- compliance with regulatory requirements;
- coordination between departments and with other jurisdictions; and
- public safety and health.

Capital Subcabinet

The Capital Subcabinet is one of several subcabinets established by Mayor Durkan. The Subcabinet's function is to serve as a coordinated decision-making body whose goal is to guide the planning and implementation of infrastructure investments and address related non-infrastructure issues to ensure that the City delivers high-quality capital projects on scope, schedule and budget. The Directors of the Office of Planning and Community Development (OPCD) and the City Budget Office (CBO) co-chair the Capital Subcabinet. Membership is comprised of directors from key capital departments as well as other

non-capital departments who focus on outreach, economic, environmental, and race and social justice issues. Member departments include Seattle City Light (SCL), Seattle Public Utilities (SPU), Seattle Department of Transportation (SDOT), Seattle Department of Construction and Inspections (SDCI), Department of Neighborhoods (DON), Office of Economic Development (OED), Department of Finance and Administrative Services (FAS), Department of Parks and Recreation (DPR), and Office of Housing (OH). It also includes participation by other departments to address environmental and race and social justice issues.

Project Cost Estimate Review and Validation Process

The 2020-2025 Proposed CIP includes two projects that implement a new approach to early cost estimating: Northlake Retaining Wall (SDOT) and Elevator Rehabilitation and Replacement (FAS). The process was developed in 2019 through the work of the Capital Subcabinet. This is a new approach to budgeting projects in early stages of development and will provide Council and the public with a better understanding of the unknowns associated with each of the project.

The key elements to the process are:

- Discrete projects with an initial rough order of magnitude total project cost estimate over \$10 million will communicate a range of possible costs in the CIP rather than an exact dollar estimate.
- Departments will appropriate the estimated cost to reach 100% design and communicate a midrange “Financial Planning Estimate” for six-year financial planning purposes.
- At the 30% design milestone, the project will be baselined and a total project cost and project schedule will be agreed to. During the next budget cycle (or other Council action) the department will budget the full total project cost in the CIP.
- If the baseline total project cost estimate is under \$50 million the project will proceed through capital project delivery process according to current practice.
- If the 30% baseline total project cost is over \$50 million, the department will initiate a third-party review of the project cost. The department will bring the results of the third-party cost estimate review to the Capital Subcabinet to determine the next steps.

The Cost Estimate Review and Validation process will be adjusted according to the results of the pilot projects.

Capital Program Funding

Like all large municipalities, Seattle relies on a variety of sources to pay for capital projects. These include locally generated revenues (taxes, fees, voter-approved levies, and user fees), intergovernmental revenues (including state and federal grants), private funding (franchise utilities, philanthropy) and debt issuance. These traditional sources continue to provide the majority of funding for capital facility investments. The City’s level of capital investment is based on the mix and amount of financial resources available to the City.

Debt Financing

The City uses multiple forms of debt to finance large capital projects such as Limited Tax General Obligation Bonds (LTGO) also known as councilmanic bonds, Unlimited Tax General Obligation Bonds (UTGO) or voter-approved bonds, and revenue bonds. Unlike pay-as-you-go sources of funding, the issuance of debt requires revenues in future years to repay the principal and interest expenses. Councilmanic debt is a common financing tool used by the City, but those obligations must be repaid

from the same set of limited resources including Real Estate Excise Tax (REET), commercial parking tax (CPT) and General Fund revenues. See the “City Bond Issuance and Debt Service” in the Introduction section of the 2020 Proposed Budget for more information on debt financing.

Public Utility Funding

Both Seattle City Light and Seattle Public Utilities fund utility projects with revenues from utility rates. Each utility has adopted financial policies that determine what share of their capital investments are funded through cash, and what share from debt. These policies are designed to balance the portion of current investments that are paid by today’s ratepayers, versus future ratepayers who will also benefit from long-term capital investments.

Real Estate Excise Tax (REET)

Funding of the City’s general government capital program is highly dependent on revenue from REET. REET is a volatile revenue source that tracks closely to local economic activity. An active residential market combined with continued strength in commercial activity has led to robust REET revenues over the past several years.

Although REET revenues in recent years have been following a relatively stable trend, large and sudden fluctuations in this revenue source make it difficult to depend upon for ongoing capital needs. The current REET forecast shows continued growth in 2019 but leveling off in 2020 which may be an indicator of a pending decline. For this precise reason, the City maintains a reserve of REET funds to help offset fluctuations in revenue. The City dipped into this reserve in 2010, but through careful management of capital spending, the City was able to replenish the \$10 million target reserve level by the end of 2014. Maintaining this reserve is critical to ensure the City has sufficient funding to support core asset preservation work in the event of a future economic downturn.

Taking advantage of a state law change in 2019 ([HB 1219](#)), the Mayor’s 2020 Proposed budget will dedicate a portion of Real Estate Excise Tax (REET) revenues to support additional capital investments in new affordable housing. Starting in 2021, the City will provide \$5 million per year for a total of \$25 million over five years for this effort. Per City policy, REET revenues are generally targeted toward spending on the long-term maintenance of City facilities. While additional funding for affordable housing is clear a priority for the City, ongoing investments in our existing facilities is necessary to support the provision of other City services and to avoid costly projects that result from the neglect and deferred maintenance. The budget strikes a balance between these competing uses of REET revenues.

Seattle’s Recent History – Major Voter-Approved Levies and Capital Projects

In addition to reliance upon general tax sources, Seattle undertook several major capital projects during the last two decades using voter-approved funds and councilmanic debt. Voter-approved capital projects include improvements to Seattle Center and construction of new or expanded community centers and parks, new or remodeled downtown and branch libraries, new or remodeled fire facilities, parks improvements, and replacement of the Elliott Bay Seawall. The following is a list recent levies that are still actively funding projects:

- *The Move Seattle Transportation Levy:* The Move Seattle Levy, a nine-year \$930 million levy was approved by voters in 2015. The proposed budget appropriates \$140 million in 2020. Levy proceeds will be used to support safe routes, congestion relief, and maintenance and repairs of the City’s bridges and arterial roadways. A major financing strategy in the Move Seattle Levy is

the dependence on partnerships—leveraging external resources such as state and federal grants to accomplish transportation projects such as the S. Lander Street Grade Separation project.

- *Seattle Park District:* The passage of the Park District is the culmination of the Parks Legacy Plan project, led by the Parks Legacy Plan Citizens' Advisory Committee. The goal of the Park District is to provide long term, stable funding to support recreation programming, parks projects and the critical needs for investment in major and ongoing maintenance. In 2016, the Parks District began collecting property tax revenue, accumulating the first year of full funding for Park District projects. The Park District will provide over \$25 million in 2020 for major maintenance and capital projects.
- *The 2012 Central Seawall Excess Levy:* A 30-year, \$290 million bond levy provided a portion of the funding needed to construct Phase 1 of the Elliott Bay Seawall Project (from Washington Street to Virginia Street) and funds reconstruction of one of the public piers (Pier 62/63 and Waterfront Park). The final elements of the Seawall project will be complete in late 2019 or early 2020 as part of the Pier 62/63 replacement project.
- *The 2019 Library Levy:* A seven-year, \$123 million levy to support, maintain and improve core Library services. Included as part of the levy were resources for the preservation and maintenance of library facilities. The City Librarian and the Library Board of Trustees prepare annual progress reports that show how levy proceeds have been used each year. The levy provides an average of \$3.1 million annually for major maintenance and asset preservation projects; including maintenance necessary for building components such as roofs, floors, finishes, HVAC and mechanical systems. The levy also includes funding for earthquake retrofits at three Carnegie branches.
- *The 2008 Parks and Green Spaces Levy:* A six-year, \$146 million levy to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas. This levy expired at the end of 2014, but a new source of voter-approved revenue—the Seattle Park District—is now providing on-going funding to help address major maintenance needs, as well as park development, at the Department of Parks and Recreation (Parks). As of the beginning of 2019, the 2008 Parks and Green Spaces Levy Fund carried a balance of \$17 million. Parks will continue to spend down existing budget authority on project identified in the Levy throughout the biennium.

Funding Dynamics for Significant Future Capital Projects

Given general resource funding challenges, the City will continue to rely on mix of general government resources and voter-approved funding packages to complete major capital projects and to secure needed funding for basic asset preservation. The City has identified several major priority areas for which significant capital investments will be needed. The following sections describe these priority areas at a high level.

Public Safety Facilities

Planning for the future of Seattle's public safety facilities is critical to maintaining the high level of service expected of Seattle Fire Department (SFD) and Seattle Police Department (SPD). Both departments have a number of large capital facility needs, such as a new Fire Station Headquarters and neighborhood precinct projects that will accommodate anticipated police staffing growth. In addition to

maintenance and renovation work at existing facilities this CIP provides funding for a larger project to support more comprehensive improvements to facility needs in north Seattle. In addition to these investments there are ongoing maintenance projects, including work at Fire Station 31, which are essential to ensure the ongoing operations of both SFD and SPD.

Transportation

The City's existing transportation network faces an extensive backlog of major maintenance. Current funding is insufficient to maintain the City's road, bridges, signs, etc. In addition, through a series of long-term planning efforts the City has completed "Master Plans" that identify large potential investments in a transit network, bicycle facilities, freight projects and pedestrian-oriented infrastructure. The \$930 million Move Seattle Levy will address critical transportation programs such as safe routes, relief of congested roadways and maintenance and repair programs.

Waterfront

The City has developed a comprehensive plan for the improvement of Seattle's central waterfront. The removal of the Alaskan Way Viaduct provides an opportunity to reconnect the City to the waterfront and develop new open space to support the growth and economic development of central Seattle. There are five main capital projects encompassed in the Waterfront program for a total of \$726 million (not including utility costs).

Projects

The largest project—the Alaskan Way Main Corridor project—will construct a new surface street and an adjoining pedestrian promenade, providing access to the waterfront from Pioneer Square to Belltown. The Overlook Walk and East-West Connections project constructs the Overlook Walk, a new accessible connection between the Pike Place Market and the waterfront, and improvements to east-west streets connecting the waterfront and the rest of downtown Seattle. The program also includes projects to reconstruct parks located on piers along the waterfront (Waterfront Park and Pier 62/63 Park), expand the Seattle Aquarium and expand the Pike Place Market.

Funding

The 2020-2025 Proposed CIP identifies a mix of resources to fund these projects and other elements of the overall Waterfront redevelopment. In addition to general government resources in the form of REET, commercial parking tax, and general fund-supported debt, the funding plan calls for significant contributions from a Local Improvement District (LID), philanthropy, and WSDOT. The LID provides that property owners who benefit from the project pay a share of its cost. LID formation was approved in 2019 and will provide \$160 million of funding for the waterfront improvements.

Protecting and Creating Opportunities for Workers

The City considers not only what capital projects to fund, but also how to deliver them and achieve broader goals for fairness, equity and opportunity in the community. The Department of Finance and Administrative Services (FAS) leads several policy initiatives to ensure social responsibility and equity in the spending of City capital dollars.

Fair and equitable treatment of workers: FAS monitors and enforces fair and equitable treatment of workers in City construction contracts. In 2013, FAS increased its monitoring and enforcement of wage and labor conditions on City-contracted construction projects, including Office of Housing-financed

projects. The 2019 Adopted Budget provided funding to allow FAS to continue this program, including compliance monitoring for wage and labor violations for projects considered high-risk. It also includes funding to support the Acceptable Worksite program, which trains, teaches and enforce anti-harassment and anti-bullying interventions on City-funded construction projects.

Reduce barriers to construction jobs: The City's own spending on major capital investments can help drive employment within the local economy. Construction jobs and related positions offer living-wage jobs that can support individuals and families. The City's Priority Hire program provides training and opportunities for City residents to work on City-funded capital projects. For major capital projects, City contractors enter into Community Workforce Agreements that are intended to increase employment for women, people of color and those living in economically distressed areas of the City.

Women and Minority Owned Business (WMBE): The City continues to successfully address contracting equity for minority- and women- owned businesses. In 2011, FAS implemented a Citywide requirement on all public work bids and contracts above \$300,000 called the "Public Works WMBE Inclusion Plan" that continues to effectively encourage and enforce commitments by contractors to use WMBE firms. In 2014, FAS launched prompt pay initiatives which our WMBE firms report as very significant and meaningful for their business cash flow. The 2020 Proposed Budget maintains funding added in the 2019 Adopted Budget for FAS to procure technical assistance services for firms interested in doing business with the City, specifically requiring the selected organization to focus assistance to WMBE firms. The objective is to provide WMBE firms with business and technical guidance that helps them compete more successfully for public projects, including better equipping them to participate on Priority Hire projects.

2020-2025 Proposed Capital Improvement Program Summary

The 2020-2025 Proposed CIP totals \$7.2 billion for six years and includes approximately 532 projects¹. Approximately \$4.5 billion of the six-year total, or 62%, are utility projects managed by Seattle City Light (SCL) and Seattle Public Utilities (SPU), and mostly funded by utility rates. The Seattle Department of Transportation's CIP totals \$1.86 billion (26%) over the six-year period, while the remaining departments (Parks and Recreation, Finance and Administrative Services, Seattle Center, Seattle Public Library, and Seattle Information Technology Department) account for approximately \$899 million, or 12%, of the six-year CIP.

¹ The project total includes all projects with a CIP Project Page in the 2020-2025 Proposed CIP.

2020-2025 Proposed CIP by Department (000s)

Department	2019 Adopted	2020 Endorsed	2020 Proposed	2021-2025 Estimate	2020-2025 Total
Finance and Admin Services	35,355	34,586	33,129	179,791	212,919
Information Technology	36,982	34,354	32,734	79,195	111,928
Parks and Recreation	74,631	82,500	87,308	381,893	469,202
Seattle Center	13,429	11,059	11,585	52,012	63,597
Seattle Public Library	3,221	578	4,768	36,304	41,072
Seattle Dept of Transportation	344,283	406,274	404,626	1,452,839	1,857,465
Subtotal	507,901	569,351	574,149	2,182,034	2,756,183
City-owned Utilities					
Seattle City Light	351,394	368,210	378,049	1,869,315	2,247,364
SPU - Drainage & Wastewater	229,472	305,983	270,026	1,180,922	1,450,949
SPU - Solid Waste	6,432	24,894	30,859	63,648	94,507
SPU - Water	111,452	97,933	115,527	567,280	682,807
SPU- Technology*	12,873	11,200			
Subtotal	711,623	808,220	794,461	3,681,166	4,475,627
City Total	1,219,525	1,377,571	1,368,611	5,863,199	7,231,810

Note: 2019 Adopted totals are based on the 2019-2024 Adopted CIP. Not all funds above are appropriated; see the 2020 Proposed Budget for a list of capital appropriations by department.

*SPU – Technology projects are now included in 2020-2025 Proposed totals for three SPU funds.

2020 Proposed by Department - \$1,369 Million

The table below identifies funding sources for the 2020-2025 Proposed CIP by Revenue Source Group

2020-2025 Proposed CIP Revenues (000s)

Revenue Source Group	2019 Adopted	2020 Endorsed	2020 Proposed	2021-2025 Estimated
Bond Financed	48,106	86,642	51,063	207,127
Federal Funds	34,791	64,310	57,634	69,423
King County Funding	19,548	39,529	53,850	138,106
Other City Funds	79,973	51,763	66,100	259,487
Other Local Government	10,253	5,569	12,975	24,903
Private Funding	6,689	23,327	17,965	116,147
Real Estate Excise Tax	84,131	86,051	90,815	404,397
State Funding	59,540	92,962	96,943	92,090
Utility Funding	709,294	789,475	761,700	3,623,274
Voter-approved Funds (Seattle and King Co.)	167,200	137,943	159,567	559,455
To Be Determined		-	-	368,789
Grand Total	1,219,525	1,377,571	1,368,611	5,863,199

2020 Proposed CIP by Revenue Source - \$1,369 million

Asset Preservation

A 2002 Asset Preservation Study found that, despite achieving targets recommended by the 1994 Citizens' Capital Investment Committee, the City still lagged behind industry-recommended levels of investment in asset preservation. The four general government departments involved in the study (Finance and Administrative Services, Library, Parks and Recreation, and Seattle Center) are responsible

for approximately 6.9 million square feet of building space, 2.6 million square feet of parking space, and 240 million square feet of grounds (primarily green space) and work yards. These assets have a replacement value of approximately \$5 billion. Assuming an annual asset preservation funding target of 1.0% of the replacement value for buildings and 0.5% of the replacement value for other assets, the City should be investing about \$58 million per year in asset preservation. These percentage targets are consistent with those used by other jurisdictions that were polled as part of this study's review of best practices.

For 2020, the City will spend a total of \$55 million from the two Real Estate Excise Tax Funds and an additional \$45 million from various other resources on asset preservation for general government infrastructure in parks, libraries, civic buildings, and on the Seattle Center campus. Space rent charges continue to fund projects in the Department of Finance and Administrative Services as recommended by the 2002 Asset Preservation Study. The Department of Transportation will spend an additional \$11 million of REET resources and \$104 million of other transportation resources on infrastructure asset preservation during the 2020 budget period.

Cumulative Reserve Fund

The Cumulative Reserve Fund (CRF) is a significant source of ongoing local funding to support capital projects in general government departments. Real Estate Excise Taxes (REET) supports the majority of CRF spending.

The table below shows department allocations from CRF along with other special programs, including debt service payments, support for the Design Commission, and the City's Tenant Relocation Assistance Program. Further explanations of these special programs can be found in the 2020 Proposed Budget.

CRF Appropriations by Department (000s)

Department (in Thousands)	2019 Adopted	2020 Endorsed	2020 Proposed
Seattle Center	11,572	9,489	10,015
Seattle Department of Transportation	19,650	17,345	19,345
Seattle Public Library	562	578	578
Department of Parks and Recreation	30,595	44,217	45,162
Finance & Administrative Services	22,516	14,616	16,158
Office of Planning and Community Development	546	540	1,071
Seattle Department of Construction and Inspection	493	492	502
Human Services Department	-	-	1,500
Finance General *	5,157	4,631	7,181
Total	\$ 91,091	\$ 91,908	\$ 101,511

* Not all REET is appropriated out of the CIP

**Represents debt service on capital projects and funding for anticipated projects not yet reflected in the Capital Improvement Program (CIP)

Neighborhood Projects

As the City adapts to the impacts of unprecedented growth, and plans for yet further development, a focus on the livability of neighborhoods is essential. The 2020-2025 Proposed CIP reflects this focus, and as highlighted below, supports neighborhood-scale capital investments in several different ways.

Neighborhood Parks and Street Fund – Your Voice, Your Choice

Beginning in 1999, the City set aside approximately \$1 million per year from the Cumulative Reserve Fund (CRF) for major maintenance projects identified through neighborhood outreach. That amount was increased to \$2 million of CRF resources in 2017 as part of the City’s commitment to neighborhoods. These neighborhood projects are identified and prioritized through participatory budgeting—a new process called “Your Voice, Your Choice” initiated by the Department of Neighborhoods in 2017. The project selection process was still ongoing at the time the 2020 budget was developed. Once the selection process is completed a list of selected projects can be found on the [Your Voice, Your Choice](#) website.

Neighborhood Matching Fund

The 2020 Proposed Budget maintains funding to [Neighborhood Matching Fund](#) (NMF) grant programs. A number of CIP projects, particularly in the Department of Parks and Recreation, include funding from NMF.

The City created the NMF in 1988 to provide funding to Seattle neighborhood groups and organizations for a broad array of neighborhood-initiated improvement, organizing, or planning projects. Many of these projects also support citywide initiatives such as Race and Social Justice, Youth Violence Prevention, Environment and Sustainability, and Neighborhood Planning. Awards range from a few thousand dollars (Small Sparks projects are up to \$5,000, and the Community Partnership Fund projects range from \$5,001 to \$25,000), and NMF funds can cover all phases of a capital project except property acquisition. The NMF program requires a 1:2 match for capital projects, which means all awards leverage other private and public contributions. Matches consist of volunteer labor, donated materials, professional services, or money. The Department of Neighborhoods administers the granting process.

Art and Design Funding for City Capital Projects - 1% for Art Program The 1% for Art program, established by Seattle Municipal Code Chapter 20.32, requires the City deposit 1% of eligible CIP project budgets in the Municipal Arts Fund for the commission, purchase and installation of artworks throughout Seattle. The Office of Arts and Culture (ARTS) manages the 1% for Art program and the Municipal Art Fund. ARTS establishes the scope of work and budgets for new art projects and describes the status of ongoing public art projects in an annual [Municipal Art Plan \(MAP\)](#).

Municipal Art Fund revenues from the 1% for Art program can fluctuate significantly from year-to-year depending on changes in City capital investments. In 2020, the Municipal Art Fund is expected to receive approximately \$4.9 million from capital departments for the 1% for Art program, as described below. Actual 2020 receipts may vary because of project timing, City Council changes to the proposed CIP, expenditures, and prior year credits.

1% for Art Revenues (Estimated)	2020 Proposed
City Light	\$573,000
Seattle Public Utilities	\$1,993,000
Seattle Center	\$9,000
Parks & Recreation	\$157,000
Transportation	\$2,158,000
Total	\$4,890,000

Design Commission

Established in 1968, the [Seattle Design Commission](#) advises the Mayor, the City Council and appropriate City departments on design and environmental aspects of the City's CIP. Commission members are appointed by the Mayor for a renewable two-year term. Membership is comprised of two licensed architects, one professional fine artist, one appointee from the Get Engaged program, one lay member, and at least one and no more than two from each of the following categories, for a maximum total of five: professional urban planner, professional environmental or urban designer, landscape architect, and licensed professional engineer. The Design Commission is fully funded with funds from the Cumulative Reserve Fund.

Projects eligible for review include any on-or above-grade structure, including buildings and additions to buildings, bridges, park developments, street furniture, and all similar installations. The Commission reviews below-grade structures such as tunnels, arcades and underground passageways that are regularly visible to the public. Projects reviewed by the Commission must be financed in-whole or in-part with City funds, be on land belonging to the City, or be subject to approval by the City. Commission involvement in capital improvement projects begins as early in the planning process as possible, starting with participation in the consultant selection process and continuing through the many stages of project development. This includes project reviews at the scope briefing or pre-design stage, conceptual design, schematic design, design development, and sometimes construction documents stages.

Background of Capital Improvement Program Policy Drivers

As described above, City investments in capital projects are guided by a set of key policies reflecting the City's values and priorities. These policies shape how the City takes care of buildings and infrastructure, invests in capital projects in areas that have accepted growth as envisioned in the City's Comprehensive Plan, preserves the City's historic buildings, supports sustainable building practices, and ensures that all members of the community have access to the economic opportunities capital projects create. The following section details some of these key policies.

Sustainable Building Policy

In February 2000, the City Council adopted a Sustainable Building Policy for the City of Seattle ([Resolution 30121](#)) which articulated the City's commitment to environmental, economic and social stewardship and set the expectation that new municipal facilities meet established green building standards. Specifically, it called for all new construction and major remodel projects over 5,000 square feet to achieve a LEED Silver rating. When adopted, this policy was the first of its kind in the nation and represented a groundbreaking approach to demonstrating City leadership and transforming the marketplace.

Since 2000, the green building community has experienced exceptional growth in expertise and capacity. Recognizing this change, in 2011 the City passed an updated Sustainable Building Policy ([Resolution 31326](#)). The update represents a comprehensive approach that reflects advances in the green building industry, aligns the policy with the City's increased attention to climate change, addresses a greater range of project types, and ensures that Seattle continues to provide leadership that advances sustainable development in both the public and private sectors. The updated policies include the following requirements.

- For new construction, additions and major renovation projects 5,000 square feet or greater
 - The minimum required green building rating is LEED Gold.
 - There are minimum requirements for energy and water efficiency, construction waste reductions, and bicycle amenities.
- For tenant improvement projects 5,000 square feet or greater, where the scope includes mechanical, electrical, and plumbing:
 - The minimum required green building rating is LEED Gold.
 - There are minimum requirements for water efficiency and construction waste reductions.
- Completion of a Capital Green checklist is required for projects smaller than 5,000 square feet or those otherwise not eligible for a LEED rating.
- City departments are encouraged to test new approaches and standards, such as the Living Building Challenge and the Sustainable Sites Initiative.
- Annual reporting of performance under the policy is required by March 31st of each year.

Additionally, the resolution directs City departments to evaluate and improve existing standards and processes that relate to tenant improvements, leasing, and site management.

City of Seattle Comprehensive Plan

The Comprehensive Plan is a 20-year vision and roadmap for Seattle's future. The plan guides City decisions on where to build new jobs and houses, how to improve our transportation system, and where to make capital investments such as utilities, sidewalks, and libraries. The Plan is the framework for most of Seattle's big-picture decisions on how to grow while preserving and improving our neighborhoods. The update of the City's Comprehensive Plan "[Seattle 2035](#)" was passed by the City in October 2016. The City will begin an update to its Comprehensive Plan in 2020.

The Comprehensive Plan helped inform the development of the 2020-2025 Proposed CIP as departments have taken special note of capital projects in neighborhoods targeted for substantial growth in the future or that have received substantial growth in the last few years. This effort is intended to make sure areas receiving growth have the appropriate physical infrastructure to accommodate such growth, while balancing the major maintenance of existing facilities, such as power distribution systems, pipes, community centers, swimming pools, libraries, and streets that are located throughout the City, not just in targeted growth areas.

Federal and State Regulatory Requirements

The City's utilities have several facility projects in their Capital Improvement Programs to meet federal and state regulatory requirements. The City of Seattle must abide by the City's two National Pollutant Discharge Elimination System (NPDES) permits, one for storm water and one for combined sewer

system. The City is required, for example, to invest hundreds of millions of dollars in the combined sewer/storm water system over the next several years to control the number of combined sewer overflows (CSOs) into receiving bodies of water, including Lake Washington and Puget Sound. City Council recently approved a CSO Consent Decree with the Environmental Protection Agency (EPA) and the Department of Ecology (DOE). This Consent Decree outlines how the City will become compliant with EPA and DOE regulatory requirements regarding sewage releases from the city conveyance system.

City Light operates its hydroelectric dams and powerhouses under licenses from the Federal Energy Regulatory Commission. Licenses include Settlement Agreements that require City Light to perform mitigation and public benefit activities. City Light is currently completing Skagit Mitigation; is well under way with Boundary Relicensing; and began Skagit Relicensing in 2019. To meet North American Electric Reliability Corporation (NERC) security standards, City Light is proposing substation and hydro facility improvements such as access cards, fencing, camera coverage, and vehicle and pedestrian gates.

City Light also complies with a wide range of permitting requirements and environmental regulations. Examples include the mitigation of soil contamination at former substations, and ongoing environmental mitigation in the Endangered Species Act project. Street-use permits and regulations are a major part of City Light projects that expand and repair the electric distribution system.

Endangered Species Compliance

The Cedar River Watershed Habitat Conservation Plan (HCP) is a 50-year, ecosystem-based plan that was prepared to address the declining populations of salmon, steelhead and other species of fish and wildlife in the Cedar River basin. The HCP was prepared under the Endangered Species Act and is designed both to provide certainty for the City of Seattle's drinking water supply and to protect and restore habitats of 83 species of fish and wildlife that may be affected by the City of Seattle's water supply and hydroelectric operations on the Cedar River. Seattle Public Utilities is continuing to implement its commitments under the HCP, which include downstream habitat protection and restoration, upland forest restoration, logging road decommissioning, and ongoing monitoring. City Light is also acquiring salmon habitat in the Green/Duwamish, Skagit, and Snohomish watersheds.

Americans with Disabilities Act

The United States Department of Justice (DOJ) conducted an audit of select City of Seattle facilities, practices and procedures, in order to assess City compliance with the Americans with Disabilities Act (ADA), and reported its findings to the City. While the City is largely in compliance, there are some elements within facilities that the DOJ has requested that the City update or alter to improve accessibility for individuals with disabilities. The City is working on an update to its ADA Transition Plan that will guide the development of a long-term strategy that manages the City's most critical public-facing ADA deficiencies first and maximizes accessibility to the greatest extent possible.

A project manager added in 2011 will continue to coordinate and oversee implementation of ADA improvements in certain City facilities, determine and report compliance to DOJ, and review and modify as needed the facilities design and construction process with regard to the ADA. The City is in the process of moving towards a new approach to ADA improvements in which these improvements are included in ongoing maintenance and other remodeling work.

In order to provide additional proactive monitoring of compliance with ADA standards for new capital projects, in 2013 the City added additional staff dedicated to monitoring ADA compliance of new projects. An additional position was added in 2014 to the Department of Parks and Recreation,

dedicated to ADA compliance coordination, and in 2015 the Seattle Department of Transportation added one strategic advisor and funding for an ADA transition plan to ensure curb ramp compliance. The 2020 budget includes funding for two additional curb ramp inspectors in SDOT to ensure ramps are constructed correctly to ADA standards.

Historic Preservation

Seattle's commitment to historic preservation began with citizen efforts in the 1960s to block the demolition of two of Seattle's oldest neighborhoods—Pike Place Market and Pioneer Square. Both neighborhoods were threatened with proposals that would have irreversibly changed the character of the districts. The Pike Place Market was faced with an Urban Renewal Plan that would have demolished it, while Pioneer Square was threatened with a major roadway project. In 1970, the City Council created the Pioneer Square Preservation District, Seattle's first historic district. Then, in 1971, voters approved an initiative to create the Pike Place Market Historical District. In 1973, the City Council adopted a Landmarks Preservation Ordinance to safeguard properties of historic and architectural significance throughout the City, and more than 450 buildings, sites, and objects have now been designated as City landmarks.

The City of Seattle currently owns or maintains many of those landmarks, including libraries, park buildings, and fire stations. In 2001, the City began a comprehensive effort to survey and inventory both City-owned properties and privately-owned properties throughout the City. To date, the Department of Neighborhoods has completed surveys and inventories in 20 of the City's neighborhoods including Ballard, Belltown, Cascade, Central, Columbia City, Denny Triangle, Downtown, Fremont, Georgetown, Mount Baker, North Beacon Hill, North Rainier, Pike-Pine, Pioneer Square, Queen Anne, South Lake Union, South Park, South Seattle, University, Wallingford, Waterfront, as well as The University of Washington, city-owned properties, pre-1906 residential buildings, and neighborhood commercial buildings throughout the City. The results of those efforts are available in a searchable database on the [Department of Neighborhoods](#) website.

Parks and Recreation

Overview

Seattle Parks and Recreation (SPR) manages a 6,414-acre park system of over 485 parks and extensive natural areas. SPR provides athletic fields, tennis courts, play areas, specialty gardens, and more than 25 miles of boulevards and 120 miles of trails. The system comprises about 12% of the city's land area. SPR also manages many facilities, including 27 community centers, eight indoor swimming pools, two outdoor (summer) swimming pools, four environmental education centers, two small craft centers, four golf courses, an outdoor stadium, and much more.

Seattle's parks and recreation system provides numerous benefits to the people of Seattle—healthy people, a healthy environment, and strong communities. These benefits are grounded in SPR's values of access, opportunity, sustainability and equity and underlie the outcomes SPR aims to achieve. For Seattle to remain a vibrant city that is attractive to residents, visitors and businesses, it needs to maintain a great park system with healthy open spaces and meaningful recreational opportunities—which is why preserving the legacy of Seattle's parks and recreation system is so vital.

Thematic Priorities

SPR's CIP is focused on promoting healthy people, a healthy environment, and strong communities by preserving, enhancing, and expanding the physical assets where all of the people of Seattle can play, learn, contemplate, and build community. As described in the Project Selection Criteria section below, SPR uses an Asset Management Plan which measures each potential capital project by criteria including safety, asset preservation, race and social justice, legal obligation, and improvements in efficiency to set priorities for capital projects. Each of these criteria is a direct reflection of SPR's core values of access, opportunity, sustainability, and equity.

Aligning Capital Investments with Growth and/or Community Planning

Seattle's Comprehensive Plan, "Seattle 2035," is a 20-year vision and roadmap for Seattle's future that guides City decisions on where to build new jobs and housing, how to improve the transportation system and where to make capital investments such as utilities, sidewalks, parks and open space and libraries. The Comprehensive Plan is the framework for most of Seattle's big-picture decisions on how to grow while preserving and improving our neighborhoods.

A Parks and Open Space element is now included in Seattle's Comprehensive plan. There are parks-related policies are included in multiple areas within the plan. SPR has updated its 2017 Parks and Open Space Plan to be consistent with Seattle 2035. In addition to the City-wide Comprehensive Plan, there are myriad other plans for specific programs and amenities in the City that affect parks. SPR participates in shaping those plans to help continue developing an integrated open space and recreation system in Seattle.

Seattle's Climate Action Plan provides a framework for meeting Seattle's climate protection goals, including the overarching goal of becoming carbon neutral by 2050. SPR's role involves maximizing the benefits of the bicycle and pedestrian master plans, meeting building energy plan goals, such as LEED compliance, and fulfilling urban forest restoration goals, such as those outlined in the Green Seattle Partnership.

SPR is committed to developing and managing an environmentally sustainable park system. This means using energy and utilities with conservation in mind in all facilities, effectively managing the use of water for irrigation and other purposes, creating efficiently-maintained landscapes, and operating clean and safe park facilities.

These principles have led SPR to undertake energy conservation improvements to various facilities, make investments that preserve the integrity of facilities, to make improvements that ensure public safety in the parks, and to address various code deficiencies.

Project Selection Criteria

SPR's capital priorities are informed by two processes. First, in the planning and development of the 2015-2020 Seattle Parks District cycle, staff created a six-year spending plan that identifies specific projects and maintenance priorities. This plan was developed with input from the Parks Legacy Committee, the Mayor's Office, the City Budget Office, and City Council. These priorities will be implemented as generally described in the spending plan and in accordance with the Park District's agreement with the City. Second, SPR uses an Asset Management Plan (AMP) to identify and rank necessary major maintenance projects.

The AMP is a set of projects to address facility needs. SPR identifies projects through ongoing condition assessments, consultant studies, work order analyses (to identify key problem areas), and intradepartmental information sharing of facility maintenance issues and needs. Every two years, SPR reviews and updates the AMP. While SPR's planning staff prepares and coordinates the AMP planning process and document development, the process involves a collaborative approach throughout the department to develop project scopes and budget estimates.

Typically, department staff score and rank all of the projects included in the asset management plan using the following six criteria:

Code Requirements: The project brings a facility or element up to federal, state, and Seattle code requirements (such as ADA, water quality, or fire suppression) or meets other legal requirements.

Life Safety: The project will eliminate a condition that poses an imminent threat of injury. Examples of safety hazards are lack of seismic elements, failing piling, outdated play equipment, emergency management elements, or a documented environmental health hazard.

Facility Integrity: The project will help keep the facility operational and extend its life cycle by repairing, replacing, and renovating systems and elements of the facility, including building envelope (roof, walls, windows), electrical, plumbing, storm and sewer line replacement, and synthetic turf replacement.

Improve Operating Efficiency: The project will result in reduction of operating and maintenance costs including energy and water savings.

Equity: The project will preserve or enhance an asset which serves low income and racially diverse communities.

Other: Projects that have a unique element (e.g. leverage other funds) and/or are known needs that do not fit the other priorities.

2020-2025 CIP Highlights

SPR's 2020-2025 Proposed CIP budget is \$87.3 million in 2020 and reflects a wide range of discrete projects and ongoing programs with a mix of funding sources.

The 2020 CIP maintains REET funding allocated during the 2019-2020 budget process, including \$10 million of REET backfill for the Park District capital realignment. Remaining REET funding is prioritized for various SPR projects including:

- ongoing programs (i.e. Environmental Remediation, Pavement Restoration, Play Area Safety, etc.);
- contractual financial commitments with internal or external organizations (i.e., Gas Works Park Remediation, etc.);
- ballfield synthetic turf replacements; and
- new or emerging projects.

New REET investments in 2020 include \$1 million to help fund capital improvements at Building 18 in Magnuson Park on behalf of Outdoors For All, and a transfer of \$881,449 from the Department of Finance and Administrative Services (FAS) for SPR's continued work on projects related to the Municipal Energy Efficiency Program.

The 2020 Endorsed CIP allocated \$1 million for American with Disabilities Act (ADA) improvements in order for SPR to address citywide ADA needs including items on FAS' ADA Barrier Removal Schedule (BRS). The 2020 Proposed CIP supplements this budget with \$700,000 of one-time Community Development Block Grant funding. ADA improvements are expected to be a continuing funding obligation in the coming years and ongoing funding will be considered as part of the next 6-year Park District funding cycle (2021-2026).

Other funding in 2020 includes \$3 million in REET in 2020 for the Lake City Community Center which includes planning, feasibility analysis, design, and construction. The addition of this supplemental funding will allow for a broader scope in this first construction phase but does not fully fund project construction. The 2020 CIP also allocates \$1 million to renovate the Bitter Lake Play Area in 2020.

The CIP also invests \$1.3 million of REET in 2020 to fully develop the land-banked site at North Rainier into a park. Since the original Park District plan to develop 14 land-banked sites, Parks has acquired several additional parcels adjacent to the original North Rainier parcels and did not have sufficient Park District resources to fully develop all of them. This supplemental REET funding will allow Parks to fully develop the expanded land-bank site at North Rainier and will enable the department to meet its commitment of having all 14 land-banked sites open or in development by the end of 2020.

Parks faces the significant challenge of replacing the bulk of its synthetic turf field inventory. Planned play fields for replacement over the 2019-2020 biennium include Queen Anne Bowl, Georgetown, Delridge, Lower Woodland #2 and #7, Magnuson #6, and Miller. Parks also continues to convert grass fields to synthetic turf to increase playability year-round and is allocating \$3 million of REET in 2020 toward a conversion of Queen Anne playfield (approximately half of the full conversion cost).

Finally, the 2020-2025 Proposed CIP makes a technical adjustment to restore baseline funding (\$2.2 million per year) from the King County Parks Levy; this budget had temporarily been removed from the CIP pending renewal of the King County Parks Levy by voters in August 2019. Other technical adjustments include a shift in planned spending for the Aquarium Expansion Project and the appropriation of revenue-backed King County Conservation Futures Tax funding for future property acquisitions.

CIP Revenue Sources

Funds for the development of the system and for ongoing asset management come from a variety of sources. The two largest funding sources for Park's capital work in 2020 are the Park District and REET. The majority of the remaining funding comes from Community Development Block Grants, the Central Waterfront Improvement Fund, King County, and General Fund to pay debt service. Other funding includes the 2008 Parks and Green Spaces Levy, the Cumulative Reserve Subfund, and other special fund sources, grants, and private donations.

Seattle Park District

In August 2014, the voters of Seattle passed a ballot measure creating the Seattle Park District (a metropolitan park district). The Park District is a taxing authority and provides an ongoing revenue source to fund increased parks and recreation services and capital projects. The Park District has the same boundaries as the City of Seattle. The City Council members, acting *ex officio* and independently, comprise the governing board (the District Board). In 2020, Park District dollars will be used towards asset preservation and major maintenance.

Real Estate Excise Taxes (REET)

REET funding is used for asset preservation purposes. In addition to the key investments highlighted above, REET is used to address various ongoing capital programs, such as boiler replacement, electrical system upgrades, small irrigation upgrades, trail maintenance, athletic field and ballfield turf maintenance and improvements, small roofing replacement, paving restoration, landscape and forest restoration, and others. It also funds replacement of aging field lighting systems and certain aquarium infrastructure projects.

2008 Parks and Green Spaces Levy

The 2008 Parks and Green Spaces Levy was a six-year \$145.5 million levy intended to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas. The levy package, largely modeled after the successful 2000 Pro Parks Levy, provided for acquisition of new parks and green space and for development and improvement of various parks throughout the city. This included renovation of 23 play areas, park development atop lidded reservoirs, renovation of several existing parks and cultural facilities, and an environmental category to provide funding for the Green Seattle Partnership, community gardens, trails, and improved shoreline access at street ends. An Opportunity Fund Category funded other community-identified projects. This levy ended in 2014 but continues to collect revenues on delinquent property taxes. The capital budget does not include any new appropriations of levy funds, but SPR will continue to spend down existing appropriations.

Summary of Upcoming Budget Issues and Challenges

In 2018, SPR learned that Pier 63 had deteriorated to a point where significant reconstruction will be required sooner than originally anticipated. The original plan for Piers 62/63 was to rebuild Pier 62 (the southerly pier) and add a floating boat dock while retaining the existing Pier 63 and deferring the reconstruction until sometime in the future. Construction on Pier 62 and the floating dock will be completed at the end of 2019. Public access to Pier 63 will be permanently prohibited once Pier 62 is re-opened to the public. There is currently no funding for work on Pier 63. SPR will continue to monitor this issue in partnership with Office of the Waterfront.

Future Projects/What is on the Horizon

Traditionally, SPR had not had sufficient resources to support ongoing asset management of the parks and recreation system, and over the years has accumulated a large major maintenance project backlog. A major maintenance project is a capital investment intended to preserve a facility. Typically, these projects are expensive and long lasting, cost at least \$20,000, and are designed to function for at least 15 years. Projects can

take between one to three years to complete. A backlog exists because the number of projects has historically outpaced funding.

Fortunately, in August 2014, Seattle voters passed the Seattle Parks District, and more than half of Park District funding is used to support capital projects – of that, nearly half will address major maintenance. This is a substantial investment allowing Parks to systematically address the major maintenance needs of the system. The backlog is not a finite list of projects, and the department will continue to update it as more facility assessments are completed and projects come to the end of their useful life. Because there is not a beginning and end to major maintenance and preserving the system's assets, SPR will establish six-year goals to show progress over the long term. The first six-year plan ends in 2020, and SPR has started planning for the next six-year Park District plan.

In conjunction with the above, SPR has allocated resources to build capacity for asset management planning and tracking and to centralize capital planning efforts for consistency and better implementation of public involvement and project-delivery efforts. Through efforts over the past several years, SPR implemented an Asset Management and Work Order System to further improve the tracking of capital assets. This system allows SPR to integrate separate data systems and give the department the tools for better data collection, analysis, and decision making and better integration with the citywide accounting system upgrade. This Asset Management Work Order System is now the system of record for capital planning for SPR, and the breadth of capital project and asset information contained and updated within it continues to expand.

Activating and Connecting to Greenways

Project No:	MC-PR-21004	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops safe, inviting connections between parks and greenways which are residential streets that are dedicated connectors for pedestrians, cyclists, and other non-motorized travel, as identified in the Bicycle and Pedestrian Master Plan documents. Typical improvements include crosswalks, benches, greenway park entrance improvements, non-motorized paths and loops within parks, and related work. Parks will work with the Seattle Department of Transportation (SDOT) to activate and enhance connection points between parks. This project improves safety and access to and from the parks, encourages partnerships with neighborhood and community groups, business, and other stakeholders. This project is part of the Metropolitan Parks District measure put before voters in 2014.

ADA Compliance - Parks

Project No:	MC-PR-41031	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for ADA improvements at a number of parks facilities. Work will be focused on selected community centers (e.g., Bitter Lake, Delridge, Garfield, Jefferson, Meadowbrook, Miller and others) and will consist of adjustments to signage, door closures, restroom fixtures, and other features. Signage will be added where needed as well. Similar work will be undertaken at Discovery Park Environmental Learning Center and other facilities to the degree that funding allows.

Aquarium - Pier 59 Piling Replacement and Aquarium Redevelopment Debt Service

Project No:	MC-PR-31002	BSL Code:	BC-PR-30000
Project Type:	Debt Service	BSL Name:	Debt and Special Funding
Project Category:	Rehabilitation or Restoration	Location:	1483 Alaskan Wy
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	2005 - 2025	Neighborhood District:	Downtown
Total Project Cost:	\$36,979	Urban Village:	Downtown

This project supports debt service payments on 20-year Limited Tax General Obligation (LTGO) bonds that were issued in 2005 to pay for the replacement of the entire pier piling system of Pier 59, interior infrastructure improvements, and development of portions of the Aquarium by the Seattle Aquarium Society. The pier and Aquarium work was part of an overall plan to repair and redevelop the Aquarium and the Central Waterfront area, and to construct a new Aquarium entrance, exhibits, and visitor services on a portion of the pier. This work enhanced and extended the useful life of Pier 59 and the Aquarium.

Aquarium Expansion

Project No:	MC-PR-21006	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Rehabilitation or Restoration	Location:	1483 Alaskan WAY
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2015 - 2023	Neighborhood District:	Downtown
Total Project Cost:	\$34,040	Urban Village:	Downtown

The Seattle Aquarium is owned by Seattle Parks and Recreation and operated by the non-profit Seattle Aquarium Society (SEAS). SEAS is planning a major expansion to the Aquarium's existing footprint to add new programming and visitor capacity. This project will provide a new Ocean Pavilion that will integrate with improvements made by The Office of the Waterfront along the Central Waterfront. SEAS also intends to make improvements to piers 59 and 60 to improve exhibit space and operations efficiency. Design and construction of the project is led by SEAS and coordinated with City investments by the Parks Department and Office of the Waterfront. This project is part of the overall waterfront improvement program and appropriates City matching funds for SEAS' project. Funding depicted in the table below represents committed funding for design. The City has committed to provide up to \$34 million to SEAS for design and construction, contingent upon provision of a detailed funding plan for review by the City by 2018. (Interfund Loan repaid with REET and shown as double budgeted in appropriation table.)

Aquarium Major Maintenance

Project No:	MC-PR-41004	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	1483 Alaskan WAY
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This ongoing project provides funds for major maintenance at the Aquarium and other related items. Typical projects include seawater pump replacement, tank repairs, energy efficient systems upgrades, exterior decking repairs, Americans with Disabilities (ADA) access improvements, roofing and seismic upgrades, and related work. The facility was constructed in 1980, and a partial addition was installed on Pier 59 portion of the building in 2006. Due to the harsh saltwater environment, Aquarium facilities have a shorter lifespan than similar facilities not located over saltwater. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, and improve the overall Aquarium experience for the public. This project is part of the Seattle Park District measure put before voters in 2014.

Arboretum Waterfront Trail Renovation

Project No:	MC-PR-61003	BSL Code:	BC-PR-60000
Project Type:	Discrete	BSL Name:	SR520 Mitigation
Project Category:	Improved Facility	Location:	2300 Arboretum DR E
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2014 - 2021	Neighborhood District:	East District
Total Project Cost:	\$1,330	Urban Village:	Not in an Urban Village

This project renovates the portion of the trail from the existing MOHAL parking lot to the western edge of Foster Island. Project elements include upland and wetland restoration, invasive species removal, native plant re-vegetation, and related repairs. This restoration will improve the health of the ecosystem and provide a more enjoyable pedestrian and bicycling experience.

Athletic Field Replacements

Project No:	MC-PR-41070	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	N/A
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This program replaces field surfacing systems for fields at the end of their lifecycle. These replacements may include replacement or addition of natural turf, fiber carpets, drainage features, infill material, shock attenuation layers or related features and allow the continued safe and playable use and scheduling of playfields for sports and other activities.

Ballfield Lighting Replacement Program

Project No:	MC-PR-41009	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides funding to conduct core testing of wood light poles at various ballfields, replace deteriorated wooden poles with metal poles, install new electrical systems, and perform other related work. The new lighting systems will reduce light spillover and energy efficient. This is a long-term program to replace all deteriorated wood light poles over the next several years at a total estimated cost of \$6 million. Future funding for this program depends on available resources.

Boiler and Mechanical System Replacement Program

Project No:	MC-PR-41007	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces boilers, mechanical systems, and any related work necessary in facilities throughout the Parks system. Costs for certain boiler and mechanical systems replacements may be eligible for reimbursement from Seattle City Light or Puget Sound Energy. This project extends the useful life of the boilers and assures that Department facilities are not closed due to boiler and mechanical systems failure.

Comfort Station Renovations

Project No:	MC-PR-41036	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project renovates selected comfort stations for improved ADA access, ventilation and finishes (walls and floors), and security. The renovations also may include reconfigured stalls, new toilets, urinals, and sinks, ADA accessories, paint and finishes, and related work, depending on the needs of a particular site. In some cases, a comfort station may be replaced with a prefabricated unit. More park users will have access to these facilities, and the improvements will make them more inviting and comfortable.

Community Center Rehabilitation & Development

Project No:	MC-PR-41002	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for improvements at 27 community centers, the oldest of which is 103 years old. Typical improvements include renovation, upgrades, or replacement of major building systems, roof and building envelopes, seismic upgrades, painting, energy efficient lighting and other environmentally sustainable building components, Americans with Disabilities (ADA) access improvements, and related work. In some instances, facilities will be replaced or remodeled to improve programming space. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, improve the overall community center experience for the public, and meet today's and future recreation needs. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Develop 14 New Parks at Land-Banked Sites

Project No:	MC-PR-21003	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops 14 new parks on land-banked sites that were acquired under prior levies. Depending on the size, location, and type of park, new elements could include trees and landscaping, paths, plazas, a play area, site furniture, lighting, and related improvements. Each newly developed park will improve the neighborhood and contribute to improved health for park users, and will have environmental benefits. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Duwamish Waterway Park Improvements

Project No:	MC-PR-21014	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	10th Ave S / S Elmgrove
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2019 - 2021	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$950	Urban Village:	Greater Duwamish

This project will make major improvements to Duwamish Waterway Park, including installation of a new play area, renovation of grill/picnic areas, addition of pathways and a drinking fountain, and related work. This project is part of the Building for the Future BSL, and uses donated funds from the Seattle Parks Foundation.

Electrical System Replacement Program

Project No:	MC-PR-41008	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project renovates electrical systems throughout the park system to reduce fire hazards and performs other related work. Future funding depends on specific projects and available resources, including grants. This project extends the useful life of electrical systems in various Parks facilities and increases the safety of these systems.

Emma Schmitz Sea Wall Replacement-2008 Levy

Project No:	MC-PR-16008	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Rehabilitation or Restoration	Location:	4503 Beach DR SW
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2014 - 2020	Neighborhood District:	Southwest
Total Project Cost:	\$1,250	Urban Village:	Not in an Urban Village

This project, funded with 2008 Parks Levy funds redirected from the Seattle Asian Art Museum renovation project, is Seattle Parks' share of the replacement or repair of the seawall which is failing. The Army Corps of Engineers is funding a study to determine the best option for replacement or repair of the seawall. It is anticipated that the cost of the project will be less than \$2 million. Parks and the Army Corps will share the costs of the project (Parks 35% and Army Corps 65%).

Gas Works Park - Remediation

Project No:	MC-PR-31007	BSL Code:	BC-PR-30000
Project Type:	Ongoing	BSL Name:	Debt and Special Funding
Project Category:	Rehabilitation or Restoration	Location:	2101 N Northlake Wy
Current Project Stage:	N/A	Council District:	Council District 4
Start/End Date:	N/A	Neighborhood District:	Lake Union
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides ongoing monitoring efforts to ensure the measures constructed for remediation of soils at Gas Works Park were effective. Monitoring activities include maintenance and operation of the air sparging, SVE systems, soil cap, and other institutional controls; groundwater testing; quarterly reports; and other related work. The project also provides for ongoing monitoring for as long as 20 years from installation, effectively until 2021. All measures of the Compliance Monitoring Project must be executed in accordance with the Consent Decree established in 1998, requiring the Seattle Department of Parks and Recreation, Puget Sound Energy, and the Department of Ecology to implement a Cleanup Action Plan.

Green Space Acquisitions- 2008 Parks Levy

Project No:	MC-PR-12001	BSL Code:	BC-PR-10000
Project Type:	Ongoing	BSL Name:	2008 Parks Levy
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for acquisition of properties to fill gaps in existing public ownership and preserve continuity in existing public ownership. The project scope targets acquisitions in the following designated green spaces: Arroyos Natural Area, East Duwamish Greenbelt, Northeast Queen Anne Greenbelt, Ravenna Woods, Thornton Creek Watershed, and West Duwamish Greenbelt. These acquisitions will enhance livability and increase opportunities for the public to enjoy nature. They also implement the Parks Strategic Action Plan by encouraging long-term stewardship of natural resources. Levy funds are expected to be supplemented by grants and funds from other sources for these acquisitions. This project is part of the 2008 Parks Levy.

Start/End Date:	2014 - 2021	Neighborhood District:	Southwest
Total Project Cost:	\$1,193	Urban Village:	Admiral District

This project, funded with 2008 Parks Levy funds redirected from the Seattle Asian Art Museum renovation project, renovates the building to include an updated kitchen, interior space renovations, new electrical, water and sewer services, exterior and seismic upgrades, ADA improvements, and other related work. Combined, these major systems and programmatic renovations will allow the building to operate more efficiently, and increases the opportunities for more facility rentals.

HVAC System Duct Cleaning Program - Large Buildings

Project No:	MC-PR-41028	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides periodic (every two to five years) cleaning of the air ducts in the heating, ventilation, and air conditioning (HVAC) systems in pool natatoriums, community centers, and other Department-owned buildings. This maintenance increases the lifespan of these systems and reduces potential future major maintenance projects.

Improve Dog Off-Leash Areas

Project No:	MC-PR-51002	BSL Code:	BC-PR-50000
Project Type:	Ongoing	BSL Name:	Maintaining Parks and Facilities
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project improves the City's 14 existing off-leash areas, most of which have aging infrastructure. In 1996, seven sites were selected as pilot off-leash areas. In 1997, four of them (Blue Dog Pond, Genesee, Golden Gardens, and Westcrest were selected as the first permanent sites. By 2011, there were a total of 11 off-leash areas, and three more have been added since then (Magnolia Manor, Kinnear, and Denny). Typical projects will improve Americans with Disabilities (ADA) access, address drainage and erosion issues, update aging infrastructure, and related work. This project is part of the Seattle Park District measure put before voters in 2014.

Irrigation Replacement and Outdoor Infrastructure Program

Project No:	MC-PR-41020	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds engineering and other studies of the Department's park irrigation and outdoor infrastructure systems (e.g., water mains, irrigation and drainage lines, sanitary and storm sewers, electrical utilities, roads, paths, trails, retaining walls, bridges, saltwater piers, and related infrastructure); associated cost estimating; related staff and consultant support for developing and prioritizing projects within the Department's Asset Management Plan; and implements replacement projects at various sites. Specific projects are determined by the study and operational considerations. This project provides conservation benefits by reducing water loss due to leaking systems, allocating water flow more efficiently through improved technology, and implementing other related work. It also extends the useful life of the infrastructure.

Start/End Date:	2018 - 2021	Neighborhood District:	North
Total Project Cost:	\$16,500	Urban Village:	Lake City

This project will replace the current Lake City Community Center with a new facility and perform other related work. The new Lake City Community Center will be more accessible for all users, more inviting and comfortable, and include improved recreation spaces. The project will begin with a feasibility study that will identify the probable costs associated with a variety of options such as underground parking, gym size, possible childcare rooms and facilities, and number of floors and other recreation spaces. Funding for construction of this project is anticipated to be included in the 2021 -2026 Seattle Park District spending plan. This plan will be adopted in the Fall of 2020.

Magnuson Park Building #406 Roof Replacement-2008 Levy

Project No:	MC-PR-16012	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Rehabilitation or Restoration	Location:	7400 Sand Point WAY NE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 4
Start/End Date:	2014 - 2020	Neighborhood District:	Northeast
Total Project Cost:	\$1,352	Urban Village:	Not in an Urban Village

This project, funded with 2008 Parks Levy funds redirected from the Seattle Asian Art Museum renovation project, replaces the Built Up Roofing (BUR) system with a rubberized/EPDM roofing system with 20KW photovoltaic panels, and performs other related work. The system will supply power into the electrical system for the building, which will reduce the amount of utility power used. At certain times, the system may produce more power than is being used by the building, resulting in a credit for power used. This project eliminates a leaky roof and will make the facility more energy efficient.

Major Maintenance Backlog and Asset Management

Project No:	MC-PR-41001	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for major maintenance projects for assets in all of the city parks and recreation facilities, including athletic fields, play areas, swimming pools, trails, buildings, accessibility elements, outdoor infrastructure, and related work. This project also funds a new integrated asset management and work order system to better track and forecast long-term asset and maintenance needs. The project also increases Parks' ability to remove property encroachments. Typical major maintenance improvements may include, but are not limited to renovating buildings, Americans with Disabilities (ADA) access improvements, replacing play area structures, forest, landscape, trail maintenance and improvements, swimming pool repairs, athletic field refurbishment, and installation of energy efficient lighting, and related major maintenance work. These projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, reclaim Parks property, and improve the overall park experience for the public. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Major Projects Challenge Fund

Project No:	MC-PR-21002	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding to leverage community-generated funding for renovation or development of large projects of Parks' facilities where other City funding is unavailable, often times due to the magnitude of the project. These projects will require matching funds, so the leveraging will stretch the City's funding, and more great community-generated projects can be accomplished. The community will benefit from new and/or improved facilities that can better accommodate current and projected park and recreation needs and demands. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Marra-Desimone Park Development

Project No:	MC-PR-16004	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	New Facility	Location:	9026 4th AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2013 - 2020	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$1,100	Urban Village:	Not in an Urban Village

This project provides for development of Marra-Desimone Park, which includes the Marra Farm, Seattle's largest site for urban gardening. It implements elements of the "Long-Range Development Plan for Marra-Desimone Park" (2008), and may include enhancement of the existing farm area, development of community and recreation space on the eastern side of the park, paths, and gateway features. This project is part of the 2008 Parks Levy.

Municipal Energy Efficiency Program - Parks

Project No:	MC-PR-41030	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide Multiple Locations
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for investment in more energy efficient building systems and other facility efficiency improvements. By making these investments the City expects future savings in utility and labor costs, and significant progress toward carbon neutrality. This program is intended to fund facility retrofit projects identified by energy audits conducted in 2010 (funded by the City's Energy Efficiency and Conservation Block Grant) and similar projects identified by the department. Depending on project demand and available funding, additional resources may be added in the future.

Neighborhood Park Acquisitions- 2008 Parks Levy

Project No:	MC-PR-14001	BSL Code:	BC-PR-10000
Project Type:	Ongoing	BSL Name:	2008 Parks Levy
Project Category:	New Facility	Location:	Multiple Locations
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for acquisition of property to create new urban parklands in Seattle's most densely-developed neighborhoods as identified in Seattle Parks and Recreation's 2006 Gap Analysis. New park land acquisition enhances livability and increases opportunities for the public to enjoy the outdoors. The acquisitions also implement the Parks Strategic Action Plan. Levy funds are expected to be supplemented by grants and funds from other sources and are not expected to be sufficient to complete acquisitions in all the targeted areas. This project is part of the 2008 Parks Levy.

This ongoing program provides funding for small projects identified by citizens, neighborhood groups, or other community organizations. Projects address requests which are typically under \$50,000, and may be used for major maintenance activities performed in conjunction with development-oriented Neighborhood Matching Fund (NMF) projects. This program enables the Department to respond quickly to community requests for repairs in neighborhood parks.

Northwest Native Canoe Center Development

Project No:	MC-PR-15010	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Improved Facility	Location:	860 Terry AVE N
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 3
Start/End Date:	2014 - 2021	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$750	Urban Village:	South Lake Union

This project, part of the 2008 Parks Levy Opportunity Fund, develops a carving shed which includes a living roof, and installs a carved "Welcome" figure on the beach. The project provides insight into distinctive varieties of Native American culture in a location at Lake Union where Native carvers are safe, and the public is welcome. This is the first phase of a two building development.

Park Land Acquisition and Leverage Fund

Project No:	MC-PR-21001	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funds for land acquisition, leveraging capital projects, pre-acquisition activities (including planning, title searches, appraisals, negotiations, and community involvement), associated with acquisitions of specified real property, and related work. The project also serves as a match to leverage other funding sources such as King County Conservation Futures. The City is growing and there is a need to add parkland to meet park and open space goals and improve the quality of life for Seattle residents. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Parks Central Waterfront Piers Rehabilitation

Project No:	MC-PR-21007	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Rehabilitation or Restoration	Location:	Alaskan Way
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 7
Start/End Date:	2016 - 2024	Neighborhood District:	Downtown
Total Project Cost:	\$100,217	Urban Village:	Downtown

The Waterfront Park and Pier 62/63 are public park facilities that provide public access to Elliott Bay and host a range of public events, markets and performances. Both piers need a full seismic upgrade to meet current life safety codes, and Waterfront Park needs significant access improvements. Waterfront Park is envisioned as a flexible public recreation and open space. Pier 62/63 is anticipated to be more heavily programmed, with a flexible activity rink, events, and performances. The Department of Parks and Recreation (DPR) owns the piers, but the Office of the Waterfront will lead the rehabilitation. The Pier 62/63 Phase 1 Rebuild will be the first element completed in this project, with construction anticipated to be completed at the end of 2019. This project is part of the overall Central Waterfront program. (Interfund Loan will be repaid with Local Improvement District Bonds.)

Parks Maintenance Facility Acquisition - Debt Service

Project No:	MC-PR-31006	BSL Code:	BC-PR-30000
Project Type:	Debt Service	BSL Name:	Debt and Special Funding
Project Category:	Improved Facility	Location:	4201 W Marginal Wy SW
Current Project Stage:	N/A	Council District:	Council District 1
Start/End Date:	1999 - 2022	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$9,770	Urban Village:	Not in an Urban Village

This project funds debt service payments on 20-year bonds issued in 2002 to pay for the acquisition of the Westbridge Building, a facility that replaced the Department's primary maintenance facility at Roy Street. The replacement of the Roy Street facility assures a safe and efficient location for the Department's professional trades and a portion of the maintenance crews and management staff.

Parks Upgrade Program

Project No:	MC-PR-41029	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides minor capital improvements to low-income area parks throughout the City. Conservation Corps Program staff perform this work, providing training opportunities for low-income, homeless, and other at-risk community members. Program elements include provision of ADA improvements to parks and park restrooms, accessible drinking fountain installation, basketball court construction, bench and picnic table installation, tree purchase and planting, and other small-scale capital projects. Funding is also targeted to projects that can be integrated with other community-identified amenities.

Pavement Restoration Program

Project No:	MC-PR-41025	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds various project activities, including, but not limited to, seal-coats to new pavement to extend its lifespan, pavement patching, sub-grade repairs, overlays to small areas, and repairs associated with pavement failures (e.g., heaving, sinking, cracking, and root invasion). Improvements reduce damage to asphalt, lengthen pavement lifespan, and reduce safety hazards such as uneven pavement.

Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program renovates play areas, makes ADA improvements, installs safety upgrades, and performs other related work. The program focuses on addressing safety issues at two to four play areas per year. Primarily, the program is focused on installing proper safety surfacing at children's play areas throughout the parks system. Future funding for this program depends on specific projects and available resources, including grants. This program extends the useful life and improves the safety of the play areas.

Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project revitalizes the City's 82 P-Patch Community Gardens. Typical projects will improve the paths, improve the planting beds and common areas, improve Americans with Disabilities (ADA) access, update aging infrastructure, and related work. The first P-Patch was constructed in 1973, and more have been added in the past 40 years. The individual projects will address safety and code requirements, extend the life of the asset, improve accessibility, and contribute to better air quality. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Saving our City Forests

Project No:	MC-PR-41003	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project restores and maintains Seattle's 2,500 acres of urban forests. Seattle's trees are aging and inundated with invasive plants, including English ivy, Himalayan blackberry, Scot's broom, and knotweed. This project expands Parks' capacity to restore forest land, and to provide the ongoing monitoring and maintenance work necessary to keep restored areas from being overrun by invasive plants. A healthy urban forest contributes significantly to the health of the environment by cleaning air and water, filtering and retaining storm water, and providing a respite from the built environment. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Start/End Date:	2008 - 2019	Neighborhood District:	Southeast
Total Project Cost:	\$921	Urban Village:	Not in an Urban Village

This project provides for the restoration of old growth forest in Seward Park as part of the Green Seattle Partnership. The restoration work will be guided by the established vegetation management plan for Seward Park. This additional work is being funded by a private donation of \$1 million. The donation will be made to the Seattle Foundation over the course of 3 to 4 years and dispersed to Parks over a period of 10 to 11 years.

Smith Cove Park Development

Project No:	MC-PR-21005	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	W Galer ST
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2015 - 2021	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$6,966	Urban Village:	Not in an Urban Village

This project, funded by the MPD, develops the 4.9 acre waterfront portion of Smith Cove Park located just west of Pier 91 on Elliott Bay. The park will be developed following a planning and design process for the site. These amenities may include paths, landscaping, waterfront access points, a play area, and related improvements. Some improvements will also be made to the existing part of Smith Cove Park (west of this site), currently used for sports such as soccer. The improved park will provide waterfront access and ADA accessibility, provide enhanced opportunities for active recreation, increase environmental-sensitivity, and make the park inviting and usable for more people.

South Park Campus Improvements

Project No:	MC-PR-21013	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	8319 8th AVE S
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 1
Start/End Date:	2019 - 2021	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$1,800	Urban Village:	South Park

This project will implement the South Park Site Plan approved by Seattle Parks and Recreation in March 2018, by renovating and relocating numerous park elements. The site plan calls for the existing play area and wading pool to be demolished and replaced with a new play area and spray park in new locations within the site. The existing grass playfield will be renovated and upgraded with synthetic turf and lighting. The project may also include the replacement of the existing sport courts, installation of a loop trail and planted buffer, new fencing and related work. Partial funding for this project is anticipated from various public and private sources in the forms of grants and donations. Once the project is completed, these improvements will increase safety and site capacity, support more active uses and types of healthy outdoor play, and provide opportunities for programming throughout the year. The total estimated cost for this project is \$9.8 million. This project will be funded by public and private sources. With the addition of the Real Estate Excise Tax (REET) funding in 2019, the project is expected to be fully funded.

This ongoing project renovates sport courts including tennis, basketball, and pickleball courts throughout the City. The program focuses on crack repair, color coating, providing new posts, standards, and nets, and completing less expensive repairs. Between one and three courts are renovated each year that are selected based on user complaints and staff evaluation of conditions.

This ongoing project implements a comprehensive trail renovation strategy. Funding addresses trail failures throughout the park system to correct safety problems, prevent further erosion and deterioration, and perform other related work. The project leverages community support by providing technical assistance, training, and materials to district staff and volunteers who are engaged in other trail-related projects.

Urban Forestry - Forest Restoration Program

Project No:	MC-PR-41022	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program develops forest and vegetation management plans, implements restoration projects at sites throughout the City's park system, removes hazardous trees, and performs other related work. Restoration projects, with much of the work being performed by citizen volunteers, may include removal of invasive plants, such as English ivy and Himalayan blackberry, followed by replanting with native plants. Future funding for this program depends on available resources. This project enhances Seattle's urban forest and supports the Green Seattle Partnership to increase overall City tree canopy and the Restore Our Waters Strategy to improve Seattle's aquatic environments.

This ongoing project is a collaborative effort between the City of Seattle and Forterra to restore 2,500 acres of forested park lands in Seattle by 2025. Restoration for each acre occurs over a three-year period and includes clearing invasive plants, replanting the area with native plants, caring for the plants through establishment, and other related work. This project supports the Green Seattle initiative.

Utility Conservation Program

Project No:	MC-PR-41010	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project implements energy conservation projects in collaboration with Seattle City Light, Seattle Public Utilities, and Puget Sound Energy. Projects may include lighting, heating, and water use renovations at various facilities throughout the Parks system. These projects result in energy savings and better air and water quality, and support the Climate Protection Initiative by reducing greenhouse gas emissions. The cost of these projects is expected to be recovered within approximately five years through reduced utility costs and rebates from the three utilities. Rebates and other additional resources will be pursued to fund future conservation projects.

Victor Steinbrueck Parking Envelope

Project No:	MC-PR-41044	BSL Code:	BC-PR-40000
Project Type:	Discrete	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	2001 Western Ave
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2017 - 2021	Neighborhood District:	Downtown
Total Project Cost:	\$5,000	Urban Village:	Downtown

This project will replace the existing membrane between the westerly portion of Victor Steinbrueck Park and the Unico parking garage below, and other related items. The membrane is a waterproofing layer that keeps stormwater and irrigation that falls on the park from entering the garage below and damaging the concrete structure. The membrane was installed in 1981 when the park was originally constructed on top of the parking garage. These membranes typically last no more than 30 years; the existing membrane has failed and no longer prevents water from entering the garage below. The membrane replacement requires the removal and subsequent replacement of all the park improvements above and the installation of a new drainage system. The new membrane will provide a waterproofed foundation for the associated park renovation project.

W Magnolia PF South Athletic Field Conversion

Project No:	MC-PR-41066	BSL Code:	BC-PR-40000
Project Type:	Discrete	BSL Name:	Fix It First
Project Category:	Improved Facility	Location:	2550 34th Ave W
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	2024 - 2026	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$8,875	Urban Village:	Not in an Urban Village

This project converts an existing grass athletic field of approximately 135,500 square feet to synthetic turf, replaces lighting, installs drainage improvements, and performs related work. This improvement allows for enhanced use and scheduling of the playfield for soccer, lacrosse, baseball, and other activities.

Total Project Cost:	\$647	Urban Village:	Downtown

This project will create improvements to City Hall Park that enhance circulation and focus on park activation and preservation. Potential improvements may include pathway renovation, furnishing replacement, lighting upgrades, irrigation renovation and related work. This project is part of the Building for the Future Budget Summary Level, and uses REET funding only for planning and design at this time. Potential rebuilding or renovation of the Prefontaine fountain and plaza will also be assessed in the planning process.

Zoo Major Maintenance

Project No:	MC-PR-41005	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	601 N 59TH ST
Current Project Stage:	N/A	Council District:	Council District 6
Start/End Date:	N/A	Neighborhood District:	Northwest
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project preserves the Zoo facilities to enable it to operate efficiently, and to offer a world-class experience to the patrons. Typical projects include exhibit renovation or replacement, water, electrical, irrigation, and sewer systems replacement, energy efficient improvements, pavement and grounds restoration, Americans with Disabilities (ADA) access improvements, and related work. The oldest buildings at the Zoo were constructed in the 1930s and others have been built in subsequent decades. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, and improve the overall Zoo experience for the public. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Seattle Center

Overview

Seattle Center's Capital Improvement Plan (CIP) is at the heart of the Center's purpose "to create exceptional events, experiences and environments that delight and inspire the human spirit to build stronger communities." The Center's CIP repairs, renews, and redevelops the facilities and grounds of Seattle Center to provide a safe and welcoming place for millions of annual visitors.

Seattle Center is a 74-acre campus in the middle of the City. It is the largest visitor destination in Washington state, attracting an estimated 12 million visits each year to attend arts, sporting, educational, and cultural events and festivals, and to enjoy the grounds and open spaces. There are 24 buildings and three parking garages on the campus. Seattle Center is also a major urban park with lawns, gardens, fountains, a children's play area, and a variety of plazas and open spaces. The Seattle Center Monorail runs between the Seattle Center campus and downtown Seattle. The City owns the Monorail, which is operated by Seattle Monorail Services on behalf of the City. The Space Needle, the Pacific Science Center, the Museum of Pop Culture, the Chihuly Garden and Glass Exhibition, and the Seattle Public Schools' Memorial Stadium and an adjacent parking lot are also part of the campus but are privately owned and operated.

The origins of a civic campus at Seattle Center go back to the 1920s, with Mayor Bertha Landes presiding over the groundbreaking for the Civic Auditorium, Civic Ice Arena and Civic Field. In the 1930s the Washington State Armory was built. Memorial Stadium was constructed in the 1940s. In the late 1950s and early 1960s the site for the 1962 Seattle World's Fair was created, expanding the size of the campus to roughly what we know today. One result of this long history as a civic gathering place is aging infrastructure. Some facilities have been significantly renovated (e.g., Civic Auditorium into the Opera House for the World's Fair, and into McCaw Hall in 2003, and the Civic Ice Arena/Mercer Arena site into the new Seattle Opera at the Center facility in 2018), while others remain in need of major renovation and redevelopment (e.g., Memorial Stadium).

In 2008, following a two-year community process, the City Council adopted the Seattle Center Century 21 Master Plan. The Master Plan provides a roadmap for the redevelopment of Seattle Center around a set of design and planning principles including increased open space; sustainable design and operations; opening the edges of the campus to the surrounding community; enlivening the campus throughout the day; being pedestrian friendly and accessible to all; and continuing to provide a diversity of programming and attractions for all parts of our community. The master plan is expected to be supported, as Seattle Center redevelopment has in the past, by a mix of public and private funding.

In 2015, Seattle Center began a multi-year facility condition assessment (FCA) program to identify current and future capital investment needs. Seattle Center's Proposed 2020-2025 CIP is in large part driven by the FCA program, with funds allocated for renovation of campus infrastructure, including roofs, elevators, sewer lines, parking structures, and the International Fountain. Seattle Center's Proposed 2020-2025 CIP Budget is \$63.6 million.

Seattle Center staff plan and implement capital projects to minimize the impact on events that occur throughout the year, including four major festivals between May and September.

Thematic Priorities

Seattle Center's Proposed 2020-2025 CIP focuses on four primary themes:

- renovating basic infrastructure;
- preparing for a new Arena in the summer of 2021;
- preserving heavily used visitor amenities; and
- planning for the next phase of campus development – Memorial Stadium.

Renovating Basic Infrastructure

Asset preservation investments in campus facilities are at the core of Seattle Center’s CIP. The Proposed 2020-2025 CIP prioritizes needs identified in the latest phase of facility condition assessments including:

- roof replacement for the Cornish Playhouse and Seattle Children’s Theatre;
- Campus HVAC control system upgrades;
- Armory exterior renovation;
- Mercer Garage deferred major maintenance; and
- phased renovation of the International Fountain.

Preparing for a New Arena in 2021

In 2019, construction began on a new, privately-funded Arena. Seattle Center’s Proposed CIP includes several Arena-related elements:

Mercer Garage – The City’s lease agreement with ArenaCo for a privately-funded renovation of the Arena commits the City to operation of the Mercer Garage until 2035. Seattle Center’s CIP prioritizes improvements to the Mercer Garage, including deferred major maintenance repairs and installation of a new Parking Access and Revenue Control (PARC) system in both the Mercer and 5th Avenue North garages in conjunction with ArenaCo installing a compatible system in the First Avenue North garage, in time for the Arena opening in the summer of 2021.

Skatepark Relocation – Seattle Center’s 2019-24 Adopted CIP included funding to replace the former Seattle Center skatepark facility, which was located within the footprint of the new Arena. The replacement skatepark facility is scheduled to open in the summer of 2020. It will be located on a closed portion of Broad Street just east of the main Seattle Center campus. ArenaCo is providing partial funding for skatepark relocation.

Northwest Courtyard – The public open space north of the new Arena will be heavily impacted by Arena construction. The City is renovating the Dupen Fountain and is working in conjunction with ArenaCo on a renovation plan for the upper Northwest Courtyard area, so the quality of the public open space at the north end of the Arena matches that at the west, south and east. Seattle Center’s Proposed CIP includes funding for Northwest Courtyard renovation. Additional funding will come from ArenaCo.

Monorail Station Improvements – In 2018, Seattle Center, in conjunction with Seattle Monorail Services and VIA Architecture, completed a feasibility study for improvements at both Monorail stations that would increase the capacity of the Monorail system to move passengers before and after large events at Seattle Center and to improve the passenger experience. The Monorail Transit Asset Management Plan and Capital and Major Maintenance Program Plan, a 5-year capital plan for the Monorail system, includes \$2.5 million for station improvements.

Preserving Visitor Amenities

To complement the construction of a new, world-class arena, Seattle Center's Proposed CIP prioritizes investments in highly visible and heavily-used free public facilities in order to continue to delight and inspire the millions of annual visitors to the campus. These include:

International Fountain – Voted a few years ago as the top public fountain in the country, the International Fountain is the centerpiece of the Seattle Center campus and a very popular free attraction for the public. Seattle Center's CIP includes funding for phased renovation of International Fountain systems over multiple years.

Dupen Fountain – A short walk from the International Fountain is the Dupen Fountain, a favorite gathering place on the Seattle Center campus since the 1962 World's Fair, featuring the artwork of Everett Dupen. While the adjacent Arena is under construction, Seattle Center will carry out a full renovation of the Dupen Fountain.

Planning for the Next Phase of Campus Development – Memorial Stadium

In follow-up to the November 2017 Public Process Partnership Agreement with Seattle Public Schools, discussions continue between the City and Seattle Public Schools regarding the possible redevelopment and joint use of the Memorial Stadium site. Creating new public open space in the center of the Seattle Center campus is at the heart of the Seattle Center Century 21 Master Plan.

Aligning Capital Investments with Growth and/or Community Planning

The Seattle Center campus is located within the Uptown Urban Center. In 2015-16 Seattle Center participated with the Office of Planning and Community Development (OPCD) and the Uptown community on the development of the Uptown Urban Design Framework (UDF). The design principles of the Seattle Center Century 21 Master Plan are incorporated into the UDF. After completion of the UDF, Seattle Center partnered with OPCD and the Uptown community on the Seattle Center and Uptown Strategic Parking Study and the Uptown Rezone Environmental Impact Statement (EIS) process. Capital projects which invest in the facilities and grounds of the 74-acre Seattle Center campus support the growth of the Uptown Urban Center as well the South Lake Union and Belltown neighborhoods. Capital projects starting or underway in 2020 which support growth in the neighborhoods surrounding Seattle Center include:

- Skatepark Relocation
- Northwest Courtyard Public Open Space Improvements
- Monorail Station Improvements
- Artists at Play Children's Play Area Refurbishment
- International Fountain Improvements
- Memorial Stadium Planning/Seattle Center Century 21 Master Plan Update

Project Selection Criteria

For each two-year budget cycle, a broad cross-section of Seattle Center staff members engage in the process of identifying the highest priority asset preservation and improvement needs on the campus. This includes staff members who maintain facilities, rent facilities to clients, provide technical support for events, manage parking and public assembly facilities, and manage capital projects. Projects are prioritized around a set of criteria, including public and staff safety, regulatory requirements, failing

building systems, asset preservation, master plan implementation, reducing operating costs and/or increasing revenue potential, leveraging non-City funds, and race and social justice. Historically, Center's three operating boards (Armory, Campus, and McCaw Hall) have played a central role in identifying and prioritizing capital needs in the facilities they oversee. The Seattle Center Executive Team takes all of this information and prioritizes projects across the entire Seattle Center campus within funding targets provided. Seattle Center's program of facility condition assessments, utilizing a number of specialty consultants, is a key source of information for identifying current and future capital needs at Seattle Center to inform capital investment priorities.

2020-2025 Proposed CIP Highlights

Seattle Center's Proposed CIP Budget for 2020 is \$11.6 million. The Center's CIP prioritizes funding to address needs identified in the latest phase of facility condition assessments, including roofs, parking structures, and the International Fountain. The CIP also includes funding for asset preservation investments in McCaw Hall and the Monorail, guided by the McCaw Hall Capital Renewal/Major Maintenance Plan and the Seattle Center Monorail Transit Asset Management Plan and Capital and Major Maintenance Program Plan. Asset preservation investments in 2020 include:

Armory – An ongoing program of renovation of the Seattle Center Armory continues in 2020 and is currently focused on an exterior renovation of this 1939 building. REET I funding in 2020 for Armory Rehabilitation is \$720,000. In addition, for the costs of Armory food court renovations completed in 2012, Seattle Center will pay debt service of \$380,000 in 2020. The final debt service payment will be in 2021.

General Site Improvements – In 2020, \$450,000 in REET I funding is allocated for phased renovation of the International Fountain and for campus security and technology infrastructure improvements.

McCaw Hall – Annual REET I allocations for McCaw Hall asset preservation are matched 100% by the resident tenants of McCaw Hall, the Seattle Opera and Pacific Northwest Ballet, to carry out the McCaw Hall Capital Renewal/Major Maintenance Plan, under the direction of the McCaw Hall Operating Board. The total of REET I and privately donated funds for McCaw Hall asset preservation in 2020 is \$614,000.

Monorail Renovation – In 2020, \$1,255,000 of Federal Transit Administration grant funds and local matching funds is allocated to continue implementation of the Seattle Center Monorail Transit Asset Management Plan and Capital and Major Maintenance Program Plan for renovation of the Monorail trains, guideways and stations.

Open Space Restoration and Repair – In 2020, \$900,000 of REET I funding is allocated for renovation of public open spaces, including renovation work in the public open space north of the new Arena, in conjunction with ArenaCo.

Parking Repairs and Improvements – The City's Lease with ArenaCo for the Arena at Seattle Center commits to operation of the Mercer Garage until 2035. Seattle Center's CIP prioritizes the Mercer Garage in 2020, including deferred major maintenance repairs and installation of a new Parking Access and Revenue Control (PARC) system in both the Mercer and 5th Avenue North garages in conjunction with ArenaCo installing a compatible system in the First Avenue North garage, in time for the Arena opening in the summer of 2021. In 2020, \$2,400,000 in REET I funding is allocated for this work.

Roof Replacements – In 2020, \$3,445,000 of REET I funding is allocated for roof replacement at the Cornish Playhouse, the highest priority identified in a facility condition assessment of campus roofs.

Utility Infrastructure – Renovation of campus utility infrastructure in 2020 includes upgrades to the campus Energy Management and Control System, and HVAC efficiency improvements. REET I funding in 2020 for campus utility infrastructure is \$640,000.

Municipal Energy Efficiency Program – The 2020-25 Proposed CIP transfers \$526,105 of Municipal Energy Efficiency Program (MEEP) funding to Seattle Center. Previously, this funding was budgeted centrally in the Department of Finance and Administrative Services. MEEP is managed by the Office of Sustainability and Environment in support of the City’s goal to reduce building energy use and uses REET for its funding source.

CIP Revenue Sources

Seattle Center’s Proposed 2020-2025 CIP is funded from a combination of revenue sources including Real Estate Excise Tax (the primary funding source for 2020-2025), federal grants, and private funds. Over the years other key funding sources for Seattle Center included voter-approved property tax levies, Washington State and King County funds, and proceeds from property sales, in addition to private funds. Following the adoption of the 1990 Seattle Center Master Plan, two voter-approved levies raised \$62 million for implementing the master plan. This amount in turn leveraged \$500 million in non-City funds, including \$440 million from private sources. The Seattle Center campus is experiencing another wave of private investment, including KEXP, the Opera at the Center, Space Needle renovation, and the renovation of the Arena at Seattle Center.

Summary of Upcoming Budget Issues and Challenges

The biggest challenges facing Seattle Center’s CIP are aging infrastructure and funding constraints. Seattle Center buildings date from the 1930s and some underground sewer lines within the campus are over 100 years old. While some facilities have been significantly renovated, others remain in need of major renovation. Seattle Center is carrying out a program of facility condition assessments to identify current and future needs for capital renovation and replacement. The 2020 Proposed CIP addresses priority needs identified in these condition assessments. Additional funding will need to be identified to address future needed asset preservation investments in Seattle Center facilities.

Real estate excise tax is the primary funding source for Seattle Center’s CIP. Real estate markets run in cycles, as Seattle Center experienced from 2009-2012, when annual REET revenue allocated to Seattle Center dropped below \$500,000 in three of the four years. Although City of Seattle REET revenues have been strong in recent years, due to a robust commercial and residential real estate market, an economic downturn could jeopardize this important resource for Seattle Center’s capital work. In the past, Seattle Center has augmented REET funding with proceeds from property sales, voter-approved levies, and private funding. The availability of these other funding sources is uncertain going forward.

In 2008, following a two-year community process, the City Council adopted the Seattle Center Century 21 Master Plan. The Master Plan provides a roadmap for the redevelopment of Seattle Center around a set of design and planning principles. Implementation of the plan is expected to be supported by a mix of public and private funding. A challenge in the coming years is how to fund the remaining vision of the master plan as well as maintain existing capital assets.

Future Projects/What is on the Horizon

In follow-up to the November 2017 Public Process Partnership Agreement with Seattle Public Schools (SPS), discussions continue between the City and Seattle Public Schools regarding redevelopment and joint use of the Memorial Stadium site. Creating new public open space in the center of the Seattle Center campus is at the heart of the Seattle Center Century 21 Master Plan, and is one of the City's priorities for a future City-SPS redevelopment partnership.

Seattle Center skilled trades staff are based in a leased facility located just off the Seattle Center campus. At some point in the future this leased facility will no longer be available. Seattle Center is looking to relocate its skilled trades staff within the Seattle Center campus, perhaps as part of development of the Memorial Stadium site.

A light rail station will be located on or adjacent to the Seattle Center campus as part of Sound Transit 3 (ST3). Seattle Center is participating in Sound Transit's efforts to identify a preferred site for the Seattle Center station and is providing suggestions regarding where station ingress and egress could potentially occur on the Seattle Center campus.

Seattle Center has aging infrastructure dating to the 1930s. Initial facility condition assessment work completed by Seattle Center prioritized funding in 2019 and 2020 for roof replacement, Mercer Garage seismic upgrades, renovation of selected elevators and sewer lines, and renovation of the International Fountain. Seattle Center will need to address other major maintenance needs on the campus in future CIPs.

Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	N/A	Urban Village:	Uptown

This ongoing project provides for the repair and improvement of Seattle Center's parking facilities. Typical improvements may include, but are not limited to, concrete repairs, garage resealing, elevator renovation and repair, signage improvements, installation of emergency phones, and installation of electronic parking access and revenue control systems.

Skatepark Relocation

Project No:	MC-SC-S1901	BSL Code:	BC-SC-S03P01
Project Type:	Discrete	BSL Name:	Building and Campus Improvements
Project Category:	Rehabilitation or Restoration	Location:	Seattle Center Campus
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2018 - 2020	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$2,200	Urban Village:	Uptown

This project provides for the replacement of the former Seattle Center Skatepark at a new location on a closed portion of Broad Street, just east of the main Seattle Center campus. The former skatepark was within the footprint of the Arena construction project. ArenaCo, the developer of the Arena, is contributing to the cost of the skatepark replacement.

Seattle Public Library

Overview

The Seattle Public Library's facilities include 26 branch libraries and the Central Library, as well as leased storage and shops space. In 2008, the Library completed the final building projects of an extensive, system-wide capital program, known as "Libraries for All" (LFA). The LFA program increased the amount of physical space by 80% to a total of over 600,000 square feet, greatly increasing the demands on the Library's major maintenance program.

The subsequent 2012 Library Levy provided an essential seven-year funding stream to maintain the five new and 22 updated libraries that had been renovated, expanded or replaced during LFA. As the 2012 levy concludes at the end of 2019, the Library is preparing to embark on a new seven-year asset preservation program which will also include seismic retrofits at three century-old Carnegie-era branches.

The Library's buildings can be divided into four major categories:

1. There are ten buildings designated as historic landmarks, including seven Carnegie-era libraries (built in the early 1900s) and three modern buildings.
2. Eleven branch libraries are either LFA new construction (eight buildings) or non-landmarked buildings developed between the 1950s and the 1970s (three buildings).
3. Five small library branches are essentially storefronts, four of which are part of larger buildings.
4. The Central Library is a 12-story 363,000 square foot building that serves as headquarters and hub of the library system. It houses the materials distribution system, Library administration, a 425-seat auditorium and public meeting rooms, large public areas for reading and access to 330 public computers, a data center housing system-wide servers, and the Central Library collection of books and materials.

The Library Major Maintenance program provides ongoing funding for work that preserves or improves building integrity, efficiency and functionality.

Thematic Priorities

The Library's Capital Improvement Program (CIP) projects generally fall into one or more categories: asset preservation, operational efficiency, environmental stability, public service improvements, and safety and security.

Asset Preservation

The overriding priority of the Library's capital program is to extend the useful life of its buildings. Roughly \$3 million of the Library's \$3.69 million 2019 Library Levy planning capital spending for 2020 can be predominantly classified as asset preservation work. As the Library's buildings have all surpassed the ten-year mark since LFA, they require attention to flooring, casework, finishes and restroom fixtures. Major repairs and replacement to roofs, building envelopes, HVAC and other critical building systems, doors, windows, flooring and casework are also examples of asset preservation items funded through the Library's CIP budget.

New 2020 projects include major mechanical system/HVAC maintenance scheduled for Ballard, Fremont and Greenwood branches; roof repairs and fall protection for Lake City; interior refresh/refurbishment for Northeast and Queen Anne; and carpet/flooring at Southwest. Multi-year projects at branches that may carry into 2020 include window restoration at two century-old Carnegie branches (Queen Anne, West Seattle) and exterior work/access improvements at the Douglass-Truth branch. At Central Library, several projects that were in the planning stages during 2019 will move to construction in 2020, including upgrades to the freight/materials elevator; security camera upgrades throughout the building; parking garage door replacement; and 4th Avenue plaza berm repair.

While these projects are essential for preserving the Library's physical assets, many of them also contribute to the Library system's other essential themes: operational efficiency, environmental sustainability, and improved service to the public.

Library Operational Efficiency; Environmental Sustainability; Safety and Security of Public/Staff

The Library delivers direct services to Seattle residents, who expect highly functional and welcoming library buildings. Major maintenance work carried out under these priorities supports:

- upgrades to help the Library reduce operating costs while minimizing impact to the public;
- renovations to enhance the environmental sustainability of Library buildings; and
- repairs and improvements that augment the safety of library facilities (immediate safety concerns and building integrity are highest priority).

The most significant 2020 projects in this area, totaling \$600,000, are security upgrades throughout the system and upgraded security cameras and servers for Central.

Public Service Improvements

There are no specific "Reimagining Spaces" projects scheduled for 2020, though scheduled asset preservation projects will also likely improve the patron experience at several branches, including the interior refresh/refurbishment efforts planned for Northeast and Queen Anne branches, and new carpet/flooring at Southwest. Larger scale public service improvements will happen concurrently with the three projects to improve seismic stability (Green Lake, University and Columbia) scheduled over the life of the seven-year renewal levy.

Project Selection Criteria

In selecting major maintenance work to accomplish each year, the Library evaluates the preservation of building integrity, impact on safety to the public and staff, importance of the work to core library building functions, operational efficiency gains (both economic and environmental), and opportunities to improve or preserve service to the public.

The Library conducts condition assessments and updates information based on inspection by the capital program manager and facilities maintenance staff. The Library obtains professional evaluations of roofs, mechanical, HVAC and lighting systems to flag deficiencies and identify areas where the capital program may be able to reduce operating costs. Library public services managers develop proposals to change

the functional use of library space. These proposals are evaluated for feasibility, cost and urgency, and the capital program works with Library services managers to scope alternatives. Public input also plays a role in project planning. The Library leadership team has ultimate responsibility for authorizing and prioritizing functional building modifications.

Many library facilities are open seven days per week, which requires careful planning and staging of projects to keep libraries open as much as possible while capital improvement work is underway. Flexibility is critical to respond to building issues as they emerge.

CIP Highlights

The first year of the Library's 2020-2025 CIP provides a base level of support for asset management during the period when all buildings have surpassed the ten-year mark from their LFA construction or renovation. The 2019 Library Levy provides \$3.69 million and Real Estate Excise Tax (REET) provides \$578,000 for a total of \$4,768,000 in 2020.

Several projects planned for 2019 (the final year of the 2012 levy) will carry into 2020. Multi-year projects at branches that may carry over from 2019 into 2020 include window restoration at two century-old Carnegie branches (Queen Anne, West Seattle) and exterior work and access improvements at Douglass-Truth. Roof, envelope and window repair necessary at Green Lake, University and Columbia branches had been in various planning stages; that work will now be integrated into each branch's seismic retrofit, which will be predominantly funded by the 2019 Library Levy over the next seven years. New 2020 projects include major mechanical system/HVAC maintenance is scheduled for Ballard, Fremont and Greenwood branches. Roof repairs and fall protection work are planned for Lake City. Interior refresh/refurbishment is slated for Northeast and Queen Anne, carpet/flooring is scheduled for Southwest. System-wide AMAG security upgrades are also planned for 2020.

The iconic Central Library often requires a significant portion of CIP funds, usually distributed over multi-year projects. Historically, larger, complex and challenging projects have been planned and staged sequentially to minimize the impact on Library services to patrons. Several projects that were in the planning stages during 2019 will move to construction in 2020, including upgrades to the freight/materials elevator; security camera upgrades throughout the building; parking garage door replacement; and 4th Avenue plaza berm repair.

Real Estate Excise Tax (REET) revenue plays a vital role in supporting projects that are beyond the scope of the Library's Levy-funded major maintenance program. The REET appropriated in 2020 in the Library's CIP will be used for the Library's upcoming seismic projects for buildings with unreinforced masonry (URM).

CIP Revenue Sources

Historically, Real Estate Excise Tax (REET) was the primary source of funding for the Library's CIP, with an additional smaller allocation from the General Fund. In 2012, the Library worked with the Mayor and City Council to develop a Library Levy proposal that voters approved in August of that year. One of the core areas the levy funds is major maintenance. Upon passage of the 2012 Library Levy, the City shifted most major maintenance funding from REET/General Fund to the levy, which provided a significant increase in major maintenance funding for major maintenance. The 2019 Library Levy continues support

to preserve the Library's capital assets, including significant investments in seismic upgrades for three branches.

Levy funding is insufficient to fully cover costs associated with programmatically driven or reimagining projects, significant building infrastructure renovations, or replacement of major building systems at the Central Library and larger branches. Since passage of 2012 Levy, Real Estate Excise Tax revenue has continued to provide additional funding for targeted efforts, such as the Library's Reimagining Spaces initiative (which aims to enhance Library physical spaces to better address patron and community needs) or large-scale major maintenance requirements not anticipated during the planning of the levy. The Proposed 2020-2025 CIP continues REET support for Library capital projects and will be used for upcoming seismic-retrofit projects.

Summary of Upcoming Budget Issues and Challenges

Aging Buildings and Infrastructure

Library buildings are the most intensively-used City facilities in Seattle. The Central Library hosts over 1.3 million visitors annually, with library branches serving over 3.8 million visitors. The Library's historic landmark buildings have unique features such as brick facades, slate roofs and other details. It is important to use designs and materials consistent with their landmark status – all factors that increase major maintenance costs. The Central Library poses a different set of challenges. A building of its size, complexity and intensity of use requires significant annual major maintenance to preserve core functionality and continually improve building efficiency. All of these factors were considered in establishing the major maintenance component of the 2012 Library Levy and the 2019 Library Levy.

The LFA improvement projects were completed on a rolling basis over the course of a decade starting in the late 1990s, and a dozen years have passed since the last LFA project was completed in 2007. The Library developed a projection of annual asset preservation requirements by focusing on the year in which each building reaches the 10-year mark from its LFA construction or expansion/renovation, and has updated the prospective schedule of major maintenance for the levy renewal. Typically, 10 to 15 years after new construction or major renovation is a critical milestone for renewal of mechanical systems, building envelopes/roofs, and interiors. The Library continually assesses the status of many of its systems at this point and will replace, repair or upgrade components as warranted.

Seismic Preparedness

A 2016 survey conducted by the Seattle Department of Construction and Inspections (SDCI) identified seven unreinforced masonry (URM) facilities in the Library's property portfolio requiring seismic retrofit to reduce the risk of injury and loss of life during an earthquake. The survey classified buildings into three categories of vulnerability (critical, high, and medium) with regard to life safety impacts. Three of the seven Library facilities - Green Lake, University and Columbia - fell within the high-vulnerability category (with the balance in the medium-vulnerability category) and the Library Board of Directors identified those branches as a critical issue to be addressed. The 2019 Library Levy funds seismic retrofits for those three Carnegie-era branches over the next seven years, with \$500,000 in planning funds allocated for 2020.

As the URM projects will necessitate closure of the branches for a year or more, other needed building improvements will also be scheduled concurrently. Work may entail roof and envelope restoration;

elevator and mechanical system upgrades; interior renovation (including electrical, carpeting, furniture and finishes); and efforts to ensure ADA compliance and equitable access.

Adjusting to a Changing Climate

The Library is also adapting to a changing climate. Several branches – including most of the landmarked branches – are not air-conditioned, and rising summer temperatures can lead to closures which impact patrons and Library operations. The Library is exploring logistics and funding options to add air conditioning to high-use branches that currently lack air-conditioning.

Future Projects / What is on the Horizon

Offsite Multi-Use Facility

For the past several years, the Library has sought a permanent location for its off-site maintenance shop, storage functions and Library delivery vehicle parking. The Library is in the fourth year of its five-year lease at 6345 6th Avenue South; the facility is being used to consolidate the Library's building maintenance, custodial, landscaping and storage facilities in the near-term. While the Library would prefer to own (rather than lease) such a multi-use facility, this lease provides time for the Library to continue its search for a permanent site with the assistance of the Department of Finance and Administration's Property Management Division. Ideally, a permanent site would allow flexibility to add other services as operational needs evolve. Proceeds from the 2017 sale of the Library's Queen Anne Storage facility, as well as funds from property sales during the Library's "Library's For All" initiative, will be used to offset the cost of purchasing a new multi-use facility.

Project Summary

Central Library Infrastructure Improvements

Project No:	MC-PL-B3013	BSL Code:	BC-PL-B3000
Project Type:	Ongoing	BSL Name:	Capital Improvements
Project Category:	Improved Facility	Location:	Central Library 1000 4th Ave
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides for improved infrastructure at the 363,000 square foot Central Library. Central requires substantial infrastructure work to achieve operational efficiency and set the stage for its eventual programmatic re-imagining. Changes to Central also require additional lead time for planning and design, due both to its unique physical configuration/infrastructure and iconic architectural status. Typical improvements may include, but are not limited to, structural and mechanical repairs or improvements, safety and security upgrades, lighting and signage enhancements, and wall and floor surface repairs.

Library Major Maintenance

Project No:	MC-PL-B3011	BSL Code:	BC-PL-B3000
Project Type:	Ongoing	BSL Name:	Capital Improvements
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides for major maintenance to Library facilities, which include the 363,000 square foot Central Library and 26 branch libraries as well as storage/shops facilities. Typical improvements may include, but are not limited to, structural and mechanical repairs or improvements, safety and security upgrades, lighting and signage improvements, wall and floor surface repairs, landscape and exterior hard surface repairs, and projects that enhance service delivery or facilitate operational cost-savings at our libraries. This project preserves building integrity and improves functionality, and provides responsible management of the Library’s building assets to ensure their long-term operational use. The project was created in 2009 in connection with midyear budget reductions to facilitate efficient asset management.

Total Project Cost:	\$2,855	Urban Village:	Not in an Urban Village

One of the Library's long-term goals has been to consolidate the maintenance shop, storage and vehicle fleet parking at one location to maximize operational efficiencies. Proceeds from property sales during the Libraries for All construction program were reserved in a special fund (the Library Capital Subfund) for this purpose. Revenue from the sale of the Library's former storage location (Queen Anne Storage) was also designated for this purpose by a Q3 2015 Library Board resolution. The Library Capital Subfund is being converted into this CIP project to allow expenditure of the funds as directed by the Library Board.

Seattle Department of Transportation

Overview

The Seattle Department of Transportation (SDOT) is responsible for building and maintaining a safe, reliable, efficient and socially equitable transportation network. In addition, SDOT maintains and improves critical transportation infrastructure of regional, statewide, and national significance in cooperation with external partners. Achieving transportation excellence helps support businesses, improves access to services and opportunity, enhances quality of life, and builds a more sustainable community. This is accomplished by:

- preserving existing transportation infrastructure and using it to its fullest capabilities;
- moving people and goods efficiently and safely, using technology wherever possible to overcome transportation challenges;
- making transit, bicycling, and walking convenient and attractive and reducing reliance on the automobile;
- shaping future transportation improvements that reflect Seattle's role and connections to the region;
- incorporating environmental excellence and climate protection into every decision, project, and program;
- promoting the livability of our neighborhoods and communities;
- guiding investments that contribute to the economic vitality of neighborhood businesses and industries in Seattle and the region; and
- managing resources wisely with performance measures.

The replacement value of the City's transportation infrastructure is estimated to be approximately \$23 billion. Major system assets include:

- 1,548 lane-miles of arterial streets;
- 2,396 lane-miles of non-arterial streets;
- 124 bridges;
- 502 stairways;
- 613 retaining walls;
- 22 miles of seawalls;
- 1,085 signalized intersections;
- 46 miles of multi-purpose trails;
- 361 miles of on-street bicycle facilities;
- more than 191,000 signs;
- 41,000 street trees;
- 1,581 pay stations;
- 2,293 miles of sidewalks; and
- 31,319 curb ramps.

The 2020 Proposed Budget and the 2020-2025 Proposed Capital Improvement Program (CIP) emphasize transportation safety, efficient mobility of goods, and mobility for people of all ages and abilities. It is worth noting that Seattle is experiencing significant population growth and increasing density; to address these changes, the proposed CIP includes investments to move people and goods efficiently. SDOT is working hard to develop facilities to move people and freight. Transit projects are on the forefront with numerous projects to support transit services including a new pedestrian bridge to facilitate non-motorized travel to the new Northgate Light Rail Station, a multimodal corridor along

Roosevelt Way to improve connections with new stations, and the new Madison Street Bus Rapid Transit line. Planning will continue for the City Center Connector Streetcar, connecting the South Lake Union and First Hill Streetcar lines, along with a new Sound Transit Light Rail alignment between West Seattle, Downtown, the Seattle Center, Interbay, and Ballard. Freight movement will improve with the new S. Lander Street Grade Separation, a rebuilt Alaskan Way, and continued spot improvements. Additional investments on the City's bridges includes replacing the Fairview Avenue Bridge and studying improvements needed for 13 additional bridges. SDOT continues to invest in pedestrian and bicycle infrastructure to increase safety for both pedestrians, riders and motorists, through new protected bike lanes, new sidewalks, and improved street crossings.

The voters of Seattle approved the Move Seattle Levy in 2015; in November 2018, SDOT published the Move Seattle Levy Workplan, which documented updated deliverable commitments, delivery plans, schedule assumptions, risk considerations, and spending plans for all 30 Levy subprograms. The 2020-2025 Proposed CIP incorporates these Workplan strategies, and applies updated schedule, risk, and spending assumptions for new developments that have occurred since November 2018. A table summarizing the Move Seattle Levy investments (both operating and capital) can be found in the Seattle Department of Transportation section of the 2020 Proposed Budget.

The 2020 Proposed Budget and the 2020-2025 Proposed CIP outline investments in critical transportation infrastructure needs and include planned spending of more than \$1.8 billion during the six-year planning period. Key work includes street paving and resurfacing; building new sidewalks and curb ramps; school safety improvements; implementation of the Bike, Pedestrian, and Transit Master Plans; investments to facilitate freight mobility; traffic cameras and signals; bridge projects such as bridge replacement, maintenance, and seismic retrofitting; and support for the Seawall and Waterfront Program. For details, please see the associated explanations below.

Street Paving and Resurfacing: The proposed CIP includes funding for the following projects:

- \$6.7 million in 2020 for Arterial Major Maintenance;
- \$40.1 million in 2020 for Arterial Asphalt & Concrete Program Phase II; and
- \$1.8 million in 2020 for Non-Arterial Street Resurfacing and Restoration.

In 2020, the Arterial Asphalt & Concrete Program Phase II (AAC) is scheduled to start construction on the following streets: NW Market St, 15th Ave NE, and NE Pacific St. The AAC project will continue construction of new pavement on 35th Ave SW and Avalon Way SE, as well as in the Green Lake/Wallingford area (Green Lake Loop, N/NE 50th St, N/NE 40th St, N/NE 80th St, and Stone Way).

In addition to major contract paving, SDOT crews will undertake approximately six lane-miles of paving on Arterial Major Maintenance (AMM) and another three lane-miles on Non-Arterial Street Resurfacing and Restoration (NASRR).

Pedestrian Master Plan Investments: The 2020-2025 Proposed CIP includes five projects that are solely dedicated to advancing the recommendations of the Pedestrian Master Plan.

- The Pedestrian Master Plan—Crossing Improvements Project funds pedestrian crossing improvements. The proposed CIP includes \$3.5 million in 2020 for this project.

Seattle Department of Transportation

- The Pedestrian Master Plan–New Sidewalks Project includes \$12.2 million in 2020 to design and construct new sidewalks. Of the total, \$4.2 million in 2020 is funded by ticket revenue generated from fixed automated cameras located near school zones. These funds will be used to construct sidewalks within Seattle Public Schools walk zones. The remaining \$8 million is eligible for use anywhere in Seattle.
- The Pedestrian Master Plan–School Safety Project emphasizes pedestrian improvements in school zones and is partially funded by the School Safety Traffic and Pedestrian Improvement Fund (SSTPIF). This fund was created to fund school safety infrastructure improvements, school zone camera installation and operation, school zone warning beacon maintenance, school safety program administration, and safety education. The proposed CIP includes \$4 million in 2020 for capital improvements dedicated to school zones. These capital improvements may include school zone signing, crosswalk maintenance, curb bulb and curb ramp replacement and maintenance, sidewalk maintenance, and changes to traffic circulation around schools.
- The Pedestrian Master Plan–Stairway Rehabilitation Program includes \$1.5 million in 2020 from various local funding sources, including Move Seattle funds. The program rebuilds and/or rehabilitates stairways to the latest standards, adding proper width, step height, grip rail, landings, and other features required by the Americans with Disabilities Act.
- The SDOT ADA Program includes \$14.1 million of local funding to deliver ADA-compliant curb ramps and accessible pedestrian signals. Total budget for 2020 includes \$7.2 million in additional funding to support the City in meeting the annual ADA-compliant curb ramp requirement of 1,250 ramps per year. \$5.1 million of the funding for this increase was made available from anticipated savings from the South Lander Street Grade Separation project due to a higher than anticipated grant to local funding ratio; these funds are eligible for use anywhere in Seattle. The remaining \$2.1 million is funded by ticket revenue generated from fixed automated cameras located near school zones. School Safety Traffic and Pedestrian Improvement funds will support the installation of curb ramps at approximately 12 intersections near Seattle Public Schools.

The table below shows a summary of the Pedestrian Master Plan investments:

Pedestrian Master Plan Projects	2020
Pedestrian Master Plan - Crossing Improvements	\$3,455,901
Pedestrian Master Plan - New Sidewalks	\$12,206,675
Pedestrian Master Plan - School Safety	\$4,040,002
Pedestrian Master Plan - Stairway Rehabilitation	\$1,449,810
SDOT ADA Program	\$14,060,324
Total	\$35,212,712

Bicycle Master Plan Investments: The Bicycle Master Plan includes three projects specifically focused on advancing the Bike Master Plan recommendations, for a total 2020 investment of \$19.2 million. These projects support the Bicycle Master Plan goals of safety, connectivity, ridership, equity, and livability. Typical project types include neighborhood greenways, protected bicycle lanes, other types of bicycle lanes, trail improvements, and bicycle parking, as well as spot improvements and programs that promote safety and encourage riding. In 2018, the Bike Master Plan Implementation program was split

Seattle Department of Transportation

into three programs for clarity: Bike Master Plan–Greenways, Bike Master Plan–Protected Bike Lanes and Bike Master Plan–Urban Trails & Bikeways.

The table below shows a summary of the Bicycle Master Plan investments:

Bike Master Plan Projects	2020
Bike Master Plan - Greenways	\$9,367,903
Bike Master Plan - Protected Bike Lanes	\$8,670,267
Bike Master Plan - Urban Trails & Bikeways	\$1,236,594
Total	\$19,274,764

In addition to the projects solely dedicated to delivering the Pedestrian and Bicycle Master Plans, there are many SDOT capital projects that indirectly contribute improvements that advance the plans. The table below shows the total budget for projects that support the Pedestrian and Bicycle Master Plans; note that the total budget also include other investments within that projects objective. For example, the Vision Zero project invests in pedestrian, bike, signals, painting, and street design improvements.

Projects that Support the Bike & Pedestrian Master Plan	2020
23rd Avenue Corridor Improvements	\$1,720,151
Burke-Gilman Trail Extension	\$5,106,779
Delridge Multimodal Corridor	\$15,226,743
Heavy Haul Corridor	\$4,000,001
Highland Park Intersection Improvements	\$900,000
Madison Street Bus Rapid Transit	\$29,824,006
Market / 45th Multimodal Corridor	\$4,721,199
NE 43rd Street Improvements	\$1,228,410
Neighborhood Large Projects	\$516,755
Neighborhood Parks Street Fund - Your Voice, Your Choice	\$2,912,629
Overlook Walk and East-West Connections Project	\$14,088,000
Rainier / Jackson Multimodal Corridor	\$932,499
Roosevelt Multimodal Corridor	\$8,085,609
Route 40 Northgate to Downtown Transit Improvements	\$494,869
S Lander St. Grade Separation	\$29,429,556
Sidewalk Safety Repair	\$3,807,479
Transit Corridor Improvements	\$3,634,006
Vision Zero	\$4,140,376
Grand Total	\$130,769,067

Several projects noted above include funds programmed in anticipation of the sale of the City's 800/816 Mercer ("Mercer Megablock") properties in late 2020. Of the total anticipated proceeds, \$54.7 million has been set aside to fund transportation initiatives; of that, \$16.7 million is specifically reserved to

Seattle Department of Transportation

advance vision zero, pedestrian, and bike priorities. As part of the 2020-2025 Proposed CIP, SDOT has programmed these funds as follows:

Project Name	Const Year	Amount (\$ millions)	Proposed Spending Plan (\$ millions)				Scope of Work
			2020	2021	2022	2023	
Pedestrian Master Plan – Crossings	2020	\$1.7	\$0.7	\$1.0			New sidewalks, curb bulbs, and curb ramps at five intersections
NE 43 rd Street Improvements	2021	\$0.65		\$0.65			Construction of pedestrian, bicycle, and transit-only street between Light Rail Station and UW
Pedestrian Master Plan – Crossings	2020-2021	\$0.5	\$0.1	\$0.4			New curb bulbs, curb ramps, and sidewalk repair at three intersections
Bicycle Master Plan – Greenways	2022-2023	\$2.0		\$1.0	\$1.0		Traffic calming, new curb bulbs, curb ramps, and wayfinding near Seattle Center
Highland Park Way Safety Corridor	2021-2022	\$3.5	\$0.5	\$1.5	\$1.5		New traffic signal at Highland Park Way and SW Holden Street with traffic calming, new sidewalks and curb ramps
Bicycle Master Plan – Protected Bike Lanes	2022-2023	\$8.35	\$0.5	\$1.0	\$3.0	\$3.85	Funds will be prioritized for projects listed in the 2019 BMP Implementation Plan as funded through design and/or planning, including protected bike lanes, neighborhood greenways, and trails.
		\$16.7	\$1.8	\$5.55	\$5.5	\$3.85	Total

Transit Projects:

The 2020 Proposed CIP contains six of the seven Transit-Plus Multimodal Corridor projects the City committed to improve to as part of the Move Seattle Levy program. These projects include redesigning major streets with more frequent and reliable bus service as well as upgrading paving, signals, and other improvements to improve connectivity and safety for all travelers, whether walking, biking, driving, or taking transit.

The Transit-Plus Multimodal Corridor projects include (in order of scheduled delivery): Delridge Way SW – RapidRide H Line, Madison BRT – RapidRide G Line, Route 7 Transit-Plus Multimodal Corridor (Rainier), Route 44 Transit-Plus Multimodal Corridor (Market/45th), RapidRide Roosevelt, Route 40 Transit-Plus Multimodal Corridor (Fremont/Northgate). These projects rely on a variety of levy, local, and leveraged funding, including still-to-be secured FTA Small Starts grants for the Madison and Roosevelt projects. The seventh project, 23rd Bus Rapid Transit, is in early planning stages and is not yet reflected in the CIP.

Seattle Department of Transportation

In addition to the large capital Transit-Plus Multimodal Corridor projects, the proposed CIP includes budget for transit spot improvements throughout Seattle. These spot improvements focus on operational efficiencies (which help reduce travel time and therefore, operational costs), safety, and access enhancements (which improve the rider experience while ensuring safe conditions for riders of all abilities). Investments include installing queue jumps, bus-only lanes, in-lane stops/bus bulbs, and bus stop access amenities.

The table below shows a summary of transit related investments:

Transit Projects	2020
23rd Avenue Corridor Improvements	\$1,720,151
BRT Concepts Design	\$219,495
Delridge Multimodal Corridor	\$15,266,743
Lynnwood Link Extension	\$59,999
Madison Street Bus Rapid Transit	\$29,824,006
Market / 45th Multimodal Corridor	\$4,721,199
Rainier / Jackson Multimodal Corridor	\$932,499
Roosevelt Multimodal Corridor	\$8,085,609
Route 40 Northgate to Downtown Transit Improvements	\$494,869
Sound Transit - East Link	\$70,000
Sound Transit 3	\$1,802,326
Transit Corridor Improvements	\$3,634,006
Grand Total	\$66,790,902

Streetcar Projects: In 2018, having reached 30% design, the Center City Connector project was put on hold while an independent review and engineering analysis was performed. The project was subsequently restarted in January of 2019 with the understanding that additional scope elements to accommodate a larger and heavier vehicle specification would be needed. In August 2019, the City Council approved a \$9 million appropriation in order to advance those additional scope elements to 30% design and establish a new baseline scope, schedule and cost for the entirety of the project. The \$9 million in funding is supported by an interfund loan that will be repaid from the expected 2020 sale of the 800/816 Mercer (Megablock) properties. The project anticipates reaching the 30% design milestone by year-end 2020.

Freight Projects: The most significant freight investment in the proposed CIP is the South Lander Street Grade Separation Project which is now in construction. The \$96 million project will enhance mobility and safety by building a new grade-separated crossing over the BNSF Railway Company tracks in SODO. The project is supported by federal and state grants, local funds including Move Seattle Levy and utility funding, as well as partnerships with BNSF and the Port of Seattle. The proposed CIP reflects updated estimates of grant and partnership utilization as well as a reduced project cost, which has made local funds available to resolve emerging transportation needs, including:

- \$2 million of bond funding repurposed for design of the Northlake Retaining Wall;
- \$5.1 million of REET funding to support the City in meeting the ADA consent decree;

Seattle Department of Transportation

- \$4.1 million of Move Seattle Levy funding to resolve a funding gap in the Northgate Bridge and Multi-Use Path project; and
- \$903,000 of Move Seattle Levy funding to fully fund Phase 1 of the Heavy Haul Network Program—East Marginal Way project.

The Heavy Haul Network Program—East Marginal Way project has been segmented into at least two phases to maximize grant utilization and deliver safety improvements as quickly as possible. The first phase will create separation between freight and bicycle traffic and make signal improvements aimed at increasing safety for both modes. 100% design for Phase 2 and the Central Segment will occur concurrently with design of Phase 1 due to a recently secured \$4 million Federal Highways Administration grant. Phase 2 reconstructs the North Segment of the roadway to Heavy Haul pavement standards in order to support freight traffic, while the future Central Segment makes a non-motorized connection south to Diagonal Ave S. While Phase 1 is fully funded, SDOT continues to pursue funding options for future phases, including federal grants, contributions from the Port of Seattle, and potential reallocation of project savings from other Move Seattle Levy projects as they reach completion.

The 2020-2025 Proposed CIP also includes \$14 million of Move Seattle Levy funds (over the 9-year life of the Levy) for the Freight Spot Improvements project. This project provides smaller-scale vital freight spot improvements such as pavement repairs in industrial areas, turning radius adjustments, and other signage and operational improvements to facilitate movement of freight throughout the city. Funding allocation varies year to year based on planned projects.

The table below shows a summary of the Freight Master Plan investments:

Freight Master Plan Projects	2020
Freight Spot Improvement Program	\$5,323,212
Heavy Haul Corridor (East Marginal Way)	\$4,000,001
S Lander St. Grade Separation	\$29,429,556
Grand Total	\$38,752,769

Bridge & Structures Projects:

Bridge Rehabilitation and Replacement: The City owns 124 bridges and maintaining all of them in appropriate condition is a major challenge. The 2020-2025 Proposed CIP includes Move Seattle Levy funding to construct the replacement of the Fairview Avenue N Bridge (included in the Bridge Rehabilitation and Replacement CIP project), which is the last vehicular timber bridge on an arterial in Seattle. The funding is leveraging state and federal grants. It also funds the planning and design of the next phase of the bridge rehabilitation program. The program completed the permanent removal of the Post Alley Bridge and the reconstruction of Post Alley in 2018 and is studying improvements needed for 13 other bridges, which also includes the Duwamish Waterway N, Magnolia, and Thornton Creek bridges. There is also funding set aside for the improvement of pedestrian and bicycle safety on City-owned bridges.

Bridge Seismic: The Move Seattle Levy also provides funding for the next phase in the Bridge Seismic program. Sixteen bridges are being evaluated as part of this current bridge seismic retrofit program;

2020-2025 Proposed Capital Improvement Program

these bridges are located throughout the city. The proposed CIP also includes \$2.1 million annually for the Bridge Painting program, which is a critical asset preservation project for the City's 20 structural steel bridges.

Bridge Load Rating: Another investment in the 2020-2025 Proposed CIP relates to bridge load rating standards, which were revised by the Federal Highway Administration in November 2013. The revised standards require the SDOT to re-evaluate the load ratings for 69 bridges by 2022 at a cost of \$25,000 to \$175,000 per bridge. The proposed CIP includes \$1.1 million of funding in 2020 to continue addressing this mandate. SDOT will also be addressing additional load rating requirements specific to Emergency Vehicles, which were mandated in November 2016 by the Federal Highway Administration. The funding impact to address Emergency Vehicles as part of the currently mandated list of bridges as well as all of the City's remaining bridge assets is still being assessed.

Northgate Bridge and Cycle Track: Lastly, the proposed CIP provides funding to start construction on the Northgate Bridge and Multi-Use Path. The proposed CIP increases funding for the Northgate Bridge project to advance through construction. The Northgate Bridge funding gap is due to additional permitting requirements in the form of a supplemental culvert replacement project, permitting delays, unforeseen costs for WSDOT permits, increased railing procurement costs, and construction bids in excess of the engineer's estimate. The Northgate Bridge project is a cornerstone of the Move Seattle Levy, representing nearly 3% of the entire 9-year levy (fund) portfolio and SDOT is deeply committed to building the project.

As mentioned previously SDOT has identified grant funding that can be leveraged more than previously expected for the S. Lander Street Grade Separation project, freeing up \$4.1 million of Move Seattle Levy funds that, along with \$7.5 million from the Bridge Rehab and Replacement project (Fairview). These monies will help resolve a funding gap in the Northgate Bridge project. Funds from the Bridge Rehabilitation and Replacement project are available to fund the Northgate Bridge Project without any reduction in scope to the Fairview Bridge Replacement effort. The City took advantage of low cost financing from the Public Works Trust Fund and grant funding, to better leverage the Move Seattle Levy dollars allocated to the project.

Retaining Wall Repair and Restoration: In addition to bridges, SDOT also maintains more than 600 retaining walls throughout Seattle. The 2020-2025 Proposed CIP includes \$2 million of repurposed bond funding and \$2 million of street vacations funding to reach 100% design on a new Northlake Retaining Wall Project. This critical structure is a 452-foot-long lake front timber structure that was constructed in 1951 and is located along the north shoreline of Lake Union adjacent to North Northlake Way. The wall currently shows signs of advanced deterioration, overstress, and some sections of structural failure. The current calculated capacity/demand ratio is 0.1 where 1.0 represents stability. This presents a significant risk to public safety given the right-of-way supported by the wall, the private structures directly offshore and adjacent to the wall, and the close proximity (immediately adjacent and up to 50 feet onshore) of overhead power lines and subsurface gas, sewer, drainage, and water utility infrastructure. This project is part of a pilot project where funding will be appropriated by stage, with milestone-based review from City Council. See the Capital Subcabinet section in the CIP Overview for a description of the pilot process.

Seattle Waterfront Capital Projects: The four major capital projects in the SDOT budget related to the downtown waterfront are the Alaskan Way Viaduct Replacement Project; the Elliott Bay Seawall Project; the Alaskan Way Main Corridor; and the Overlook Walk and East-West Connections Project.

Seattle Department of Transportation

Additionally, separate capital projects exist within the Department of Parks and Recreation (Parks Central Waterfront Piers Rehabilitation, Aquarium Expansion).

The Alaskan Way Viaduct Replacement Project includes SDOT's costs related to design review, permitting issuance and administration, and construction support and acceptance for this WSDOT-led program, including the SR-99 Bored Tunnel, projects to reconnect the street grid at the north and south tunnel portals, the Battery Street Tunnel Decommissioning, and the Viaduct Demolition.

The Elliott Bay Seawall Project replaces the current seawall from Washington to Virginia Streets (also known as the Central Seawall). It also strengthened the pier support for Fire Station 5, which is currently attached to the existing seawall. The project was substantially completed in 2017 but has a few project elements that will be completed as part of the Pier 62 rebuild contract.

The Alaskan Way Main Corridor and the Overlook Walk and East-West Connection Projects are led by the Office of the Waterfront and Civic Projects. The Alaskan Way Main Corridor Project includes the design and construction of the Alaskan Way/Elliott Way surface street, the adjoining pedestrian promenade along the waterfront and several east-west connections that are primarily funded by WSDOT. The Overlook Walk and East-West Connections Projects include the Overlook Walk that provides pedestrian connections between the waterfront and the Aquarium and Pike Place Market. The project also focuses on the east/west streets that connect the downtown to the waterfront area and the Union Street pedestrian bridge.

The City began construction of the Alaskan Way Main Corridor Project in summer 2019 and substantial completion is anticipated to occur in late 2023. Construction of the Overlook Walk and East-West Connection Projects are anticipated to begin in 2020 and 2021.

CIP Revenue Sources

Multiple funding sources support the Transportation CIP, including:

- Move Seattle Levy;
- Gas Tax;
- Multimodal funds;
- Real Estate Excise Tax;
- Commercial Parking Tax;
- Seattle Transit Benefit District
- Vehicle License Fees
- Long-term financing (general obligation bonds);
- Public Works Trust Fund Loans;
- Street vacation revenues;
- School Safety and Pedestrian funds;
- Street use fees;
- Property sale proceeds;
- Federal and state grants; and
- Funds from various funding partners, such as Sound Transit, the Port of Seattle and the Washington State Department of Transportation.

In 2020, the SDOT proposed CIP budget is \$405.6 million from the following sources:

Local Revenues

Local funding sources for the Transportation CIP include Move Seattle Levy proceeds, Gas Tax, Multimodal funds, Cumulative Reserve Real Estate Excise Tax (REET) I & II, Commercial Parking Tax, School Safety Traffic and Pedestrian Improvement funds, and the \$20 and \$60 Vehicle License Fees. These revenues are for programs that improve or maintain the City's transportation system or to provide local matching funds to SDOT's funding partners on large capital projects.

Emerging Needs: Funding Reallocations

As part of the annual budget development process, SDOT evaluates updated project costs, leverage opportunities, and new mandates against available resources. The 2020-2025 Proposed CIP takes advantage of several opportunities to adapt resources to emerging needs, many of which are discussed throughout this document. For reference, the table below summarizes material funding reallocations within the 6-year planning period. Reallocations do not impact scope or delivery timeframe for donating projects.

Reallocating From	Funding Source	Reallocating to	Purpose of Reallocation	Amount
Bridge Rehab and Replacement	Move Seattle Levy	Northgate Bridge and MUP	Resolve funding gap	\$7.5 million
South Lander Grade Separation	Move Seattle Levy	Northgate Bridge and MUP		\$4.1 million
South Lander Grade Separation	REET II	SDOT ADA Program	Fund additional ramps to meet Consent Decree	\$5.2 million

Seattle Department of Transportation

Reallocating From	Funding Source	Reallocating to	Purpose of Reallocation	Amount
South Lander Grade Separation	Bonds	Northlake Retaining Wall	Fund design of critical infrastructure project.	\$2 million
South Lander Grade Separation	Move Seattle Levy	Heavy Haul (East Marginal Way, Phase I)	Fully fund Phase I through construction, as well as design of Phase II	\$903,000
23rd Ave Corridor (Phase II)	Move Seattle Levy	Heavy Haul (East Marginal Way, Phase I)		\$600,000
Next Gen ITS Improvements	Move Seattle Levy	Ctr Cty Gateway & S Michigan St ITS	Provide grant match (sister projects)	\$2.7 million

Thematic Priorities

SDOT's vision for Seattle is a thriving, equitable community powered by dependable transportation. The organization's mission is to deliver a transportation system that provides safe and affordable access to places and opportunities. To accomplish this, SDOT prioritizes services and capital projects based on the core principles in the City's 10-Year Strategic Vision for Transportation - Move Seattle. The goal of the strategic vision is to organize actions around SDOT's core values:

1. **Equity** –transportation must meet the needs of communities of color and those of all incomes, abilities, and ages. Our goal is to partner with our communities to build a racially equitable and socially just transportation system.
2. **Safety** –everyone should be able to move safely throughout the City. Our goal is to create safe transportation environments and eliminate serious and fatal crashes in Seattle.
3. **Mobility** –transportation choices are critical to access opportunity. Our goal is to build, operate, and maintain an accessible transportation system that reliably connects people, places, and goods.
4. **Sustainability** –environmental health should be improved for future generations through sustainable transportation. Our goal is to address the climate crisis through a sustainable, resilient transportation system.
5. **Livability** –transportation is essential to support daily life. Our goal is to manage our streets and sidewalks to enrich public life and improve community health.
6. **Excellence** –in exceeding the expectations of the communities we serve. Our goal is to build an SDOT team committed to excellence and equipped with skills to meet the challenges of today and tomorrow.

Transportation projects are initiated through a number of methods including planning processes (modal, subarea, neighborhood planning), preservation, operations and safety needs assessment, regulatory requirements, elected official direction and, in some instances, from neighborhood input such as the Neighborhood Street Fund (Your Voice, Your Choice) program.

Stakeholders have significant input in development of all SDOT plans through public involvement processes. Seattle's Pedestrian, Bicycle, Transit and Freight Advisory Boards also consulted regularly to provide input on project/program needs. Since 2016, the Move Seattle Levy Oversight Committee has reviewed SDOT's program and project priorities and financial plans, and made recommendations to the department, the Mayor, and the City Council on the allocation of resources. Representatives from SDOT regularly meet with the Oversight Committee, who review to provide updates and solicit input on the

Seattle Department of Transportation

allocation of resources. Prior to 2016, the Bridging the Gap Oversight Committee performed the same advisory function.

Many factors can affect SDOT's project and funding decisions, including regulatory requirements, state and federal law (such as the Americans with Disabilities Act), and construction seasons. Opportunities to leverage the City's limited funding with grants or coordinating projects with other agencies can also affect SDOT's decisions.

In every case, SDOT strives to implement the City's policy goals laid out in Seattle's Comprehensive Plan and individual policy initiatives such as Complete Streets, the Race and Social Justice Initiative, and the Environmental Management Initiative. SDOT's Transportation Strategic Plan, modal plans and subarea plans provide an overall framework for implementing these goals.

Seattle Department of Transportation

23rd Avenue Corridor Improvements

Project No:	MC-TR-C037	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	23rd AVE S/E John ST/Rainier AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2013 - 2022	Neighborhood District:	Central
Total Project Cost:	\$62,517	Urban Village:	23rd & Union-Jackson

This multi-phase project will reconstruct sidewalks, enhance the pedestrian environment, reconstruct pavement, upgrade signalized intersections, upgrade controller cabinets to meet transit signal priority (TSP) needs, and accommodate Intelligent Transportation Systems (ITS) upgrades. Activities include the following: install ITS to provide travel time information; install fiber communication as needed along the corridor to relay information back to the Traffic Management Center; and install poles for support of future trolley wires in two gap segments of the trolley network. The project will also include design and construction of a 3-lane cross section (with 4 lanes at isolated intersections) between John Street and Rainier Ave South, as well as a greenway facility on a parallel street to facilitate north-south bicycle travel. The project includes a Vision Zero element to construct new traffic signals; parking modifications; new curb ramps; traffic calming; speed reduction; pedestrian safety; and transit stop improvements. Phases I and II are substantially complete. The final Vision Zero phase is in design.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

35th Avenue SW Paving

Project No:	MC-TR-C099	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	35th Ave. SW from SW Morgan St to SW Roxbury
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 1
Start/End Date:	2023 - 2025	Neighborhood District:	Delridge
Total Project Cost:	\$35,000	Urban Village:	West Seattle Junction

This project will resurface and reconstruct 35th Ave. SW from SW Morgan St. to SW Roxbury St.

Unsecured Funding:	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total
To Be Determined	-	-	-	-	-	35,000	-	-	35,000
Total:	-	-	-	-	-	35,000	-	-	35,000

Unsecured Funding Strategy: Funding for this project was not included as part of the Levy to Move Seattle paving commitments; the project is also not likely to rank highly for grant funding. Funding for this project may depend upon identification of new/incremental revenue sources.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by bringing assets to a new or like new condition.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

3rd Avenue Corridor Improvements

Project No:	MC-TR-C034	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	3rd AVE
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project makes multimodal improvements in the Third Avenue downtown corridor. Improvements include expanding the northbound bus stop area at Pine Street adjacent to Macy's department store, designing and constructing additional streetscape improvements, remarking numerous crosswalks, and installing pedestrian countdown signals.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Accela Permitting System

Project No:	MC-TR-C001	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project will migrate SDOT permitting operations from the Hansen 7 system to the new Citywide Accela permitting platform. The vision for Accela is to create a fully integrated permitting system that provides an online, all in one place experience for Seattle customers and staff. Once the initial migration is complete, this project will provide ongoing funding for routine system improvements as well as periodic major upgrades needed to stay current with changing technology.

Resources	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total
User Fees	6,683	10,498	5,296	679	1,000	1,000	1,000	1,000	27,156
Total:	6,683	10,498	5,296	679	1,000	1,000	1,000	1,000	27,156
Fund Appropriations / Allocations ¹	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total
Transportation Fund	6,683	10,498	5,296	679	1,000	1,000	1,000	1,000	27,156
Total:	6,683	10,498	5,296	679	1,000	1,000	1,000	1,000	27,156

O&M Impacts: Maintenance for the permitting system is paid for via a central cost allocation from Seattle IT and then recovered against SDOT projects through overhead allocations. The \$1M annual budget after 2021 represents a sinking fund for eventual system replacement.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Accessible Mt. Baker Implementation

Project No:	MC-TR-C002	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2017 - 2023	Neighborhood District:	East District
Total Project Cost:	\$2,924	Urban Village:	Madison-Miller

The project will transform the Mt. Baker station area into a safer and comfortable place for people to walk, bike, and make transit connections; and for the Mt. Baker Town Center to take root and flourish. In addition to prioritizing walking and biking, the project will maintain transit and freight reliability and create more predictable conditions for people driving.

Alaskan Way Main Corridor

Project No:	MC-TR-C072	BSL Code:	BC-TR-16000
Project Type:	Discrete	BSL Name:	Central Waterfront
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$370,720	Urban Village:	Multiple

This project designs and constructs the rebuilt Alaskan Way/Elliott Way surface streets and the adjoining pedestrian promenade along the Seattle waterfront following the demolition of the Alaskan Way Viaduct. The State of Washington has built a deep bore tunnel to replace the Alaskan Way Viaduct (Viaduct) and has relocated State Route (SR) 99 into the tunnel. The State is responsible for demolishing the Viaduct and decommissioning the Battery Street tunnel. The City of Seattle is responsible for the Alaskan Way/Elliott Way surface street and the promenade. The project also includes replacement of and improvements to four key connections impacted by the Viaduct removal, namely Seneca Street, Columbia Street, and the Marion Street and Lenora pedestrian bridges. This project is part of the overall waterfront improvement program. Construction of these improvements began in 2019.

This project includes funding from the Waterfront Local Improvement District (LID #7651) formed by City Council via Ordinance 125760 in January 2019. (Interfund Loan will be repaid by Local Improvement District Bonds (\$5.65 million), LTGO Bonds (\$3.98 million), Private Funding/Donations (\$919,000) and Private Utilities (\$1.1 million.)

O&M Impacts: This project replaces aging infrastructure along the Central Waterfront providing an O&M benefit. It also builds new infrastructure for several City departments. The maintenance of the new public open space and pedestrian promenade will be funded primarily with Metropolitan Park District funds set-aside for this purpose.

Alaskan Way Viaduct Replacement

Project No:	MC-TR-C066	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	ALASKAN WY VI SB
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2001 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$97,310	Urban Village:	Multiple

This project funds the City's involvement in the replacement of the Alaskan Way Viaduct with the bored tunnel hybrid alternative. Replacement of this structure will enhance overall safety, as this structure is seismically vulnerable. In prior years, this project included design of the Central Seawall and Waterfront Improvements. For transparency purposes, the Seawall and Waterfront work was reflected in three new capital projects, Elliott Bay Seawall Project (MC-TR-C014), Alaskan Way Main Corridor Program (MC-TR-C066), and the Overlook Walk and East-West Connections Program (MC-TR-C073).

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Arterial Asphalt & Concrete Program Phase II

Project No:	MC-TR-C033	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

The Arterial Asphalt and Concrete Program maintains Seattle's 1,581 lane miles of arterial streets through resurfacing and reconstruction projects. The Department uses a pavement management system to track the condition of arterial street pavement, to develop maintenance needs and establish priorities, and to select the streets to be rehabilitated each year. This project improves the quality and condition of the City's arterials.

Arterial Major Maintenance

Project No:	MC-TR-C071	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project repairs and/or replaces deteriorated pavement on arterial streets. Arterial Major Maintenance paving work typically spans one to three city blocks. It allows the City to respond quickly and cost effectively to pavement issues that are too large to be addressed with a pothole repair but too small to be efficiently contracted. Project prioritization is based on pavement condition; cost; transit, bicycle, pedestrian and freight use; traffic volume; coordination opportunities; complaints and claims; and geographic balance across the city. The work extends the service life of existing pavement structures.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Ballard to Downtown High Capacity Transit and Ship Canal Crossing Project

Project No:	MC-TR-C080	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Downtown Ballard
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2013 - 2017	Neighborhood District:	Multiple
Total Project Cost:	\$800	Urban Village:	Multiple

This project will develop recommendations for implementation of high capacity transit alternatives between Ballard and Downtown Seattle. The project will build on the Ballard-Fremont-South Lake Union-Downtown corridor identified in the Transit Master Plan. The work will be done in conjunction with Sound Transit. The project will also develop conceptual designs and cost estimates for a new ship canal crossing for transit, pedestrians, and bicycles.

The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Bike Master Plan - Greenways

Project No:	MC-TR-C063	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program creates routes on residential streets that are optimized for safer and more comfortable walking and biking for people of all ages and abilities. Typical improvements include curb ramps, speed humps, crosswalks, median islands, shared lane markings, stop signs, traffic signals, pavement and sidewalk repair, and wayfinding signs. The goals of the program are to design streets with lower vehicle speeds and volumes; to increase the number of people walking and biking on residential streets; and to improve walking and biking access to schools, trails, parks, transit and neighborhood businesses.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Bike Master Plan - Protected Bike Lanes

Project No:	MC-TR-C062	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program implements the Seattle Bicycle Master Plan. Typical improvements may include installing bike lanes and sharrows, bicycle route signing, completing key links in the urban trails network, adding bicycle/pedestrian signals to complete the network, and reconstructing key sections of the trails. The goals of the program are to increase bicycle safety and access while reducing bicycle crashes. This program includes funding for street improvement and trail construction and is consistent with the focus in the City's Transportation Strategic Plan (TSP) on encouraging walking and biking. The Accelerated Move Seattle Levy - Lid Lift Revenues represent spending that is in excess of available levy funds; consequently, Move Seattle appropriations are reduced in future years so that the total Move Seattle funding and expenditures are balanced over the nine years of the levy. LTD actuals may include the BMP spot improvements, Urban Trails, and Neighborhood Greenways, which were previously combined with this project's budget.

Bridge Load Rating

Project No:	MC-TR-C006	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This program rates bridges for safe load-carry capacity as part of a federally mandated program. The work on this project, performed by both City staff and consultants, ensures public safety. Due to new load rating standards issued by the FHA on November 13, 2013 for Specialized Hauling Vehicles (SHV), additional funding was added to the program as part of the 2015-2020 Proposed CIP. The requested funding needed to meet these new standards was provided in 2019; however, shortly after signing the FAST ACT in 2015, FHWA submitted a 2016 memo that required bridge load ratings to consider Emergency Vehicles if they are at least one road-mile access to and from the National Network of highways. The program is currently assessing whether additional funding beyond 2021 will be needed to meet this mandate.

This ongoing asset preservation program provides for the periodic painting of each of the City's 20 structural steel bridges. The painting cycle is initially determined by applying Federal Highway Administration standards for coating life and is supplemented by annual physical inspections to assess the rate of deterioration.

Bridge Rehabilitation and Replacement Phase II

Project No:	MC-TR-C039	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This asset preservation program funds major bridge rehabilitation or bridge replacement. The current program, funded by the Levy to Move Seattle, is focused on planning studies. The objective of these bridge planning studies is to identify if the bridge should be rehabilitated or replaced and provided planning level costs to allow for the City and the Program Owner to prioritize the list of bridges.

Bridge Seismic - Phase III

Project No:	MC-TR-C008	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

The program prioritizes and implements seismic retrofits to bridges based on traffic importance and seismic vulnerability. Concept level analysis and evaluation is performed to develop a retrofit strategy and cost estimate. As funding allows, full retrofit design and construction phases are implemented. If full funding is not available, seismic retrofits are scaled to a level that provides some seismic resiliency to the bridge structure. As part of the evaluation process a cost-benefit assessment is made to determine if replacing the structure is a more appropriate course of action then seismically retrofitting the structure. 16 bridges are part of the current phase of the program which is funded by the Levy to Move Seattle.

BRT Concepts Design

Project No:	MC-TR-C010	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2016 - 2021	Neighborhood District:	Multiple
Total Project Cost:	\$2,500	Urban Village:	Multiple

This project will advance the concept designs for Seattle's RapidRide Expansion program. In order to deliver the seven new RapidRide lines, this work includes assessment and development of corridor design, detailed line and network ridership forecasting, capital cost estimates, traffic and environmental analysis, modal integration, and funding plans.

Burke Gilman Trail Improvements - UW Campus

Project No:	MC-TR-C086	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 4
Start/End Date:	2017 - 2019	Neighborhood District:	Northeast
Total Project Cost:	\$750	Urban Village:	University District

The project will implement spot improvements to the Burke-Gilman Trail north of the campus including pavement repair and crossing upgrades. If needed, a portion of the funding will be available to help the University complete design of the second phase of upgrades to the campus portion of the trail.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by bringing assets to a new or like new condition.

Burke-Gilman Trail Extension

Project No:	MC-TR-C044	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 6
Start/End Date:	1995 - 2020	Neighborhood District:	Ballard
Total Project Cost:	\$36,772	Urban Village:	Ballard

This project extends the Burke-Gilman Trail from its current terminus at Eighth Avenue NW to Golden Gardens Park. The segment from Eighth Avenue NW to 11th Avenue NW was constructed in 2001. The Ballard Locks to NW 60th Street segment was constructed in 2005. The NW 60th Street to Golden Gardens segment was constructed in 2008. The "Missing Link" segment from 11th Avenue NW to the Ballard Locks was planned for construction in 2011 and 2012 but has been delayed due to ongoing litigation. Project completion is anticipated in 2020.

Center City Gateway and South Michigan Street Intelligent Transportation Systems (ITS)

Project No:	MC-TR-C012	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	S Spokane ST/Western Ave/E Marginal Way/Stewart
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2015 - 2021	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$16,267	Urban Village:	Not in an Urban Village

The project will install traffic cameras, upgraded signals, vehicle detection devices and fiber communication in the Center City Gateway ITS and South Michigan Street ITS projects. The project will also construct an ITS corridor along Denny Way between Western Ave and Stewart including traffic signal modifications and closed-circuit television cameras, a dynamic message sign and ADA compliant ramps. A robust and reliable Intelligent Transportation System ensures that all modes of transportation can move through the City in a safe and sustainable manner.

Center City Streetcar Connector

Project No:	MC-TR-C040	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2012 - 2026	Neighborhood District:	Multiple
Total Project Cost:	\$271,000	Urban Village:	Multiple

The Center City Connector is a 1.27-mile segment of the Seattle Streetcar that will link the South Lake Union and First Hill Streetcar lines, creating a system that will connect over a dozen Seattle neighborhoods in Seattle's Center City. The project includes procurement of up to ten additional streetcars and design and construction of track and guideway; station shelters and platforms; overhead contact system; traction power substation; storage facility expansion; roadway and drainage; ADA curb ramps; curb space management; and urban streetscape.

An interfund loan of \$9,000,000 will enable this project to reach 30% Design. The SDOT portion of total project costs is currently estimated to be \$271 million. Of this amount, \$262 million is included in the 2020-2025 CIP budget with an additional \$9 million in estimated costs in 2026.

Unsecured Funding Strategy: SDOT will continue to work with the Mayor's office and City Council to identify possible funding solutions to complete the Center City Connector project. In addition to the unsecured funding shown below, \$8.5M is also unfunded in 2026.

O&M Impacts: The Center City Connector would combine the two existing lines into a single Streetcar network. SDOT is currently working in collaboration with King County Metro on an operation plan for a single line. We expect to have an estimate of annual operating costs when the Center City Connector project reaches 30% design.

Delridge Way SW - RapidRide H Line

Project No:	MC-TR-C042	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Delridge AVE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2016 - 2022	Neighborhood District:	Delridge
Total Project Cost:	\$34,300	Urban Village:	Not in an Urban Village

This project improves pavement conditions, enhances safety, and improves traffic operation for all modes. The project will add transit lanes and improve transit speed and reliability. It includes protected bike lanes, sidewalk improvements, and amenities for walkers and transit riders along the corridor. It will streamline traffic operations and improve multimodal connections between transit, freight, pedestrians, and general-purpose vehicles.
Note: The project title is changing from "Delridge Multimodal Corridor" to "Delridge Way SW - RapidRide H Line".

Project Category:	Rehabilitation or Restoration	Location:	Alaskan WAY
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2013 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$373,608	Urban Village:	Multiple

This project, created in 2013, is a critical public safety project to replace the existing seawall from S. Washington Street to Virginia Street with a structure that meets current safety and design standards. The project will also improve the nearshore ecosystem of Elliott Bay and provide opportunities for recreation and shoreline access. Costs incurred prior to 2013 are included in the Alaskan Way Viaduct Replacement project (MC-TR-C066).

Fauntleroy Way SW Boulevard

Project No:	MC-TR-C046	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Fauntleroy WAY SW/35th AVE SW/SW Alaska ST
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2012 - 2022	Neighborhood District:	Southwest
Total Project Cost:	\$17,954	Urban Village:	West Seattle Junction

This project transforms Fauntleroy Way SW into a boulevard. The project elements include: a planted median, signature lighting fixtures, a protected bicycle facility, a pedestrian zone with sidewalks and planting areas including street trees, pedestrian lighting, potential stormwater infrastructure and art, as well as safety improvements for crossing movements for all modes. These safety improvements include bicycle and pedestrian crossings, signals, reconfigured intersections and bulbs, and pavement improvements. This project is on-hold pending Sound Transit decision on the West Seattle Extension alignment and does not have an expected Completion Date as a result.

Start/End Date:	2009 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$140,700	Urban Village:	Multiple

This project constructs a modern, low-floor streetcar system connecting First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station and the Capitol Hill Station (at Broadway and John Street). The system will provide reliable, frequent service with headways of approximately 10 minutes during peak periods.

O&M Impacts: The First Hill Streetcar line opened in February 2016. For more information related to O&M impacts, please refer to Semi-Annual Streetcar Operations Reports.

Freight Spot Improvement Program

Project No:	MC-TR-C047	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project includes small scale mobility improvements to the City's street system to improve connections between port facilities, railroad intermodal yards, industrial businesses, the regional highway system, and the first and last miles in the supply chain. Project types include turning radius adjustments, channelization changes, left-turn improvements, and signage to direct freight to destinations and alert drivers to steep grades or sharp turns.

Unsecured Funding Strategy: Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by improving asset condition.

Georgetown to South Park Trail

Project No:	MC-TR-C096	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2018 - 2021	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$2,400	Urban Village:	South Park

This project will create a walkable, bikeable path uniting the Georgetown and South Park neighborhoods. The path will enhance walkability between Georgetown and South Park's historic Main Streets. Funding covers preliminary engineering, design, and outreach.

Resources	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total

Unsecured Funding Strategy: Current funding provides for preliminary engineering, design and outreach. SDOT will evaluate the project for future funding opportunities following the preliminary planning and design phase.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Graham Street Station

Project No:	MC-TR-C082	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	MLK between Graham and Morgan
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 2
Start/End Date:	2016 - 2024	Neighborhood District:	Southeast
Total Project Cost:	\$10,000	Urban Village:	Columbia City

This project funds the City's portion of an infill light rail station on the Sound Transit Central Link line near Martin Luther King Jr. Way South at South Graham Street, between the existing Columbia City and Othello Stations. The station would be in the northern portion of the MLK at Holly St Residential Urban Village. Funding from the Move Seattle Levy package is used to leverage a future partnership with Sound Transit.

Hazard Mitigation Program - Areaways

Project No:	MC-TR-C035	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Pioneer Square

This ongoing asset preservation program funds ongoing inspection and repair/reconstruction of areaways to reduce risks to City facilities and the general public. Areaways are usable space, generally in the street right-of-way, constructed under sidewalks between the building foundation and street wall. Typical improvements may include, but are not limited to, repairs to the existing areaway and/or filling the areaway in order to eliminate the asset. Currently the program is conducting a comprehensive evaluation of areaways, specifically within the Pioneer Square District, where load restrictions within the curb lane has been implemented due to the severity of the deterioration.

Hazard Mitigation Program - Landslide Mitigation Projects

Project No:	MC-TR-C015	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project enables SDOT to address and repair landslide concerns that affect the right-of-way. The Landslide Mitigation Program provides SDOT with staff and resources to identify and prioritize landslide concerns, to undertake reconnaissance engineering and geotechnical studies of problem areas, and to make repairs at the highest priority locations, usually where landslide concerns have caused the roadway to be partially or completely closed.

Heavy Haul Network Program - East Marginal Way

Project No:	MC-TR-C090	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	E Marginal WAY
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2016 - 2024	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$59,181	Urban Village:	Not in an Urban Village

This program supports freight mobility by funding roadway improvements on the Heavy Haul Network (Ordinance 124890) to meet the needs of freight transported on our streets between Port facilities, rail yards, and industrial businesses. The initial project under this Program is the E Marginal Way Corridor Improvement project, which will be a multi-phase project. Phase I constructs a separated bicycle/pedestrian facility between S Atlantic St and Spokane St. Phase II includes roadway reconstruction, signal and ITS enhancements and safety measures to reduce conflicts between freight and non-motorized users. The Port of Seattle, through Memorandum of Understanding, is to provide partnership funding.

Note: The project title changed from "Heavy Haul Network Program" to "Heavy Haul Network Program - East Marginal Way"

Unsecured Funding Strategy: SDOT plans to pursue a \$15M federal INFRA grant and anticipates a \$10M contribution from the Port of Seattle. SDOT is reviewing funding options for the remaining \$12.7M.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by improving asset condition. Since it also builds new assets, SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Highland Park Intersection Improvements

Project No:	MC-TR-C100	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Highland Park Way SW and SW Holden ST
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 1
Start/End Date:	2019 - 2022	Neighborhood District:	Southwest
Total Project Cost:	\$4,100	Urban Village:	Not in an Urban Village

This project would mitigate collision and congestion issues at the intersection of Highland Park Way SW and SW Holden St. There are currently two alternatives being considered for this work. One alternative would be installing a new traffic signals, sidewalks, curb ramps and marked crosswalks. SDOT estimates the cost of this alternative at \$3M. The other alternative would install a roundabout at this intersection. After advancing design of the roundabout, we now know that significant grading is needed to accommodate the roundabout and avoid new safety issues. This has pushed the cost estimate to \$7.3M. The name of this project has been changed from Highland Park Roundabout to Highland Park Intersection Improvements. The name change occurred as part of the second quarter 2019 Supplemental Amendment-Attachment A.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

King Street Station Tenant Improvements

Project No:	MC-TR-C049	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	301 S Jackson ST
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 2
Start/End Date:	2016 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$5,150	Urban Village:	Pioneer Square

This project will make tenant improvements to King Street Station to make uninhabited spaces ready for occupation. Tenant improvements will include installation of HVAC and electrical connections, bathrooms, office space, finishes, and restoration of historic areas. The tenant improvements will incorporate features consistent with the City's Sustainable Building Policy and the full restoration and rehabilitation of the building, which was completed by SDOT in 2013.

Madison BRT - RapidRide G Line

Project No:	MC-TR-C051	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Madison ST/Alaskan Way/Martin Luther King Junior W
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2013 - 2022	Neighborhood District:	Multiple
Total Project Cost:	\$121,297	Urban Village:	Multiple

This project will include concept design and environmental review of high-capacity transit and multimodal improvements in the Madison corridor between Alaskan Way and Martin Luther King Jr. Way, connecting the Central Area with the First Hill, Downtown, and Waterfront neighborhoods. The project is identified as a priority in the Transit Master Plan. The purpose is to improve transit capacity, travel time, reliability, connectivity, comfort, visibility, and legibility in the Madison corridor.

Note: The project title is changing from "Madison Street Bus Rapid Transit" to "Madison BRT - RapidRide G Line"

Magnolia Bridge Replacement Project			
Project No:	MC-TR-C083	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	15th Ave NW and Magnolia Way W.
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	TBD	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	TBD	Urban Village:	Ballard-Interbay Northend

The environmental analysis for replacing this bridge evaluated several possible alternatives including rehabilitation of the existing structure. In 2007, an environmental assessment was published and described the preferred alternative, a new bridge south of and adjacent to the existing bridge. The Type, Size, and Location (TS&L) Report was completed in 2007, selecting a concrete box girder supported on flared columns as the appropriate structure type for this new bridge. The Levy to Move Seattle provided limited funds to conduct a plan study that would evaluate a more cost effective alternative than a "1-to-1" replacement. Even with the reduced cost for pursuing an alternative option than a full replacement, total project cost and a funding strategy to move the project forward is unclear. The project is currently on hold.

Mercer Corridor Project West Phase

Project No:	MC-TR-C017	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	Mercer ST/Elliott AVE W/Dexter AVE N
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2010 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$92,011	Urban Village:	Multiple

This project converts Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared use path between Dexter Ave and 5th Ave North. Roy Street, between Fifth Ave N and Queen Anne Ave, will also be converted to a two-way street with on-road bicycle lanes.

NE 43rd Street Improvements

Project No:	MC-TR-C074	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	NE 43rd ST
Current Project Stage:	Stage 3 - Design	Council District:	Council District 4
Start/End Date:	2017 - 2021	Neighborhood District:	Northeast
Total Project Cost:	\$5,084	Urban Village:	University District

This project will implement streetscape and pedestrian improvements on NE 43rd Street between Brooklyn Ave NE and 15th Ave NE to improve access to the Link Light Rail station, which is scheduled to open in 2021. The project will transform the operation of NE 43rd St between Brooklyn Ave NE and University Way NE to one-way westbound transit-only travel and between University Way NE and 15th Ave NE to one-way westbound, all vehicle travel. The roadway will be optimized for pedestrians with a curb-less roadway section, widened sidewalks, pedestrian illumination, bio retention, and rain gardens. A protected bike lane will be provided for eastbound bike traffic and westbound bicycle traffic will share the travel lane with westbound traffic. The project is scheduled to begin construction in the summer of 2020.

Neighborhood Parks Street Fund - Your Voice, Your Choice

Project No:	MC-TR-C022	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program identifies projects estimated less than \$100,000 that are prioritized through participatory budgeting in each of the 7 council districts. Typical improvements may include, but are not limited to, sidewalk construction, repairs and replacement, installation of curb bulbs or other traffic calming devices, and improvements to crosswalks. The program enhances the safety, quality, and condition of the pedestrian and neighborhood environments. This project was formerly known as "NPSF Neighborhood Parks Street Fund" and "NSF/CRS Neighborhood Program."

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Neighborhood Traffic Control Program

Project No:	MC-TR-C019	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program installs traffic calming devices citywide, primarily neighborhood traffic circles, in response to investigations of citizen requests. The program also installs some mid-block traffic calming devices such as speed humps, residential street speed limit signs, and warning signs.

Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project installs new traffic signals or significant capital improvements to existing signals to improve traffic flow, reduce the frequency and severity of traffic collisions, and support pedestrian, bicycle or transit activity. Location choices are based upon pedestrian, bicycle, and vehicle volumes; school, senior citizen, and handicapped accessible crossing requirements; transit speed and reliability; and collisions frequency criteria.

Non-Arterial Street Resurfacing and Restoration

Project No:	MC-TR-C041	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project repairs and/or replaces deteriorated asphalt pavement and/or concrete panels on non-arterial streets. Project locations are chosen annually based upon the degree of deterioration as confirmed by Department staff field observations, citizen service requests, claims, and potential City liability. High priority is given to non-arterial streets used by transit, in areas with heavy pedestrian and bicycle traffic, and which serve business and industry.

Northlake Retaining Wall

Project No:	MC-TR-C102	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Northlake Way @ Stone Way
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 4
Start/End Date:	2019 - 2023	Neighborhood District:	Not in a Neighborhood District
Total Project Cost Range:	20,000 - 35,000	Urban Village:	Fremont

This project will repair the Northlake Retaining Wall, which is a 452-foot-long lake front timber structure that was constructed in 1951 and is located at the north end of Lake Union adjacent to North Northlake Avenue. The wall currently shows signs of advanced deterioration, overstress, and some sections of structural failure. The current calculated capacity/demand ratio is 0.1 where 1.0 represents stability. This presents a significant risk to public safety given the right-of-way supported by the wall, the private structures directly outshore and adjacent to the wall, and the close proximity (immediately adjacent and up to 50 feet inshore) of overhead power lines and subsurface gas, sewer, drainage, and water utility infrastructure.

To Be Determined	-	-	-	15,000	8,000	500	-	-	23,500
Total:	-	-	-	15,000	8,000	500	-	-	23,500

Financial Planning Strategy: The estimated cost to reach the 100% design level is \$4,000,000, \$2,000,000 of which will be funded by LTGO bonds. The remaining \$2,000,000 needed to reach 100% of design will be funded with Street Vacations proceeds.

At 30% design, SDOT will reevaluate the total project cost and the financial planning strategy for the remaining costs of the project, which will include local funding, debt financing, and grant funding.

O&M Impacts: There will be ongoing operations and maintenance (O&M) costs for SDOT to maintain the retaining wall after full replacement. The estimate is \$50,000/year over the 75-year design life of the structure which includes labor (maintenance, engineering, and inspection) and non-labor (materials). This would be added to the Bridge/Structures Maintenance O&M budget. An O&M BIP will be submitted along with subsequent BIPs for the final design phases in the future.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Overlook Walk and East-West Connections Project

Project No:	MC-TR-C073	BSL Code:	BC-TR-16000
Project Type:	Discrete	BSL Name:	Central Waterfront
Project Category:	New Investment	Location:	Multiple
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Downtown
Total Project Cost:	\$184,340	Urban Village:	Downtown

Removing the Alaskan Way Viaduct provides the opportunity for the City to improve key connections between the downtown core and the waterfront. The specific east/west streets targeted for improving connections include: Bell Street, King Street, Main Street, Pike Street, Pine Street, Railroad Way, Union Street, Washington Street, and Yesler Way. In addition to these east/west street connections, the waterfront improvement program also includes Overlook Walk, which would provide a pedestrian oriented connection between the waterfront, the Aquarium and Pike Place Market with ADA access, views, and public open spaces. This project is part of the overall waterfront improvement program. Expenditures to the Local Improvement District Bonds revenue source that occur prior to 2019 represent anticipated future bond sales. This project includes funding from the Waterfront Local Improvement District (LID #7651) formed by City Council via Ordinance 125760 in January 2019. (Interfund Loan will be repaid by Local Improvement District Bonds.)

O&M Impacts: This project includes a mix of upgrading existing streets and building new infrastructure. O&M for new public open spaces, such as the Overlook Walk will be funded by the Metropolitan Park District.

Pay Stations

Project No:	MC-TR-C024	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Investment	Location:	Various
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2004 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$31,320	Urban Village:	Multiple

This project funds the installation of parking pay stations to manage on-street parking and improve access for visitors and customers in commercial and retail areas. From 2015 through 2019, SDOT replaced its aging pay stations through a new vendor with a combination of brand-new pay stations and retrofit pay stations (keeping the older stainless-steel housing where possible but installing new technology and software.) SDOT has adopted an "Asset Lite" strategy, replacing 15%-20% fewer pay stations, while keeping at least one pay station on every block. Through the end of 2019, SDOT installed 1,030 new pay stations and 580 retrofit pay stations. The project includes the transition from pay and display payment to pay-by-plate payment, which was accomplished at the end of 2019. As other neighborhood parking plans are completed through SDOT's Community Access and Parking Program, and paid parking is otherwise expanded to new areas, supplemental budget may be requested for this project to purchase and install parking pay stations in these new areas.

O&M Impacts: The Parking Program has an established O&M budget to maintain pay stations and implement parking policies. These O&M resources are needed to ensure the revenue produced from the pay stations is received.

Pedestrian Master Plan - Crossing Improvements

Project No:	MC-TR-C061	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program implements the Pedestrian Master Plan. Typical improvements may include the installation of new marked crosswalks, curb bulbs, pedestrian signals, curb ramps, and pedestrian lighting. The goals of the program are to reduce the number and severity of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges. 2338

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Pedestrian Master Plan - New Sidewalks

Project No:	MC-TR-C058	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project enhances the pedestrian environment in Seattle's neighborhoods by dedicating funding to construct new sidewalks. The New Sidewalk Program draws funding from the School Safety Traffic and Pedestrian Improvement (SSTPI) Fund and the Move Seattle Levy to improve sidewalks and the pedestrian environment near schools. Additional funding is drawn from other sources to pay for new sidewalk construction that are not in a Seattle Public School walk zone.

Pedestrian Master Plan - School Safety

Project No:	MC-TR-C059	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project improves pedestrian and bicycle safety around schools. The work typically includes school zone signing and 20mph flashing beacons; new crosswalks; curb bulbs; crossing beacons and pedestrian signals; new sidewalks and maintenance; traffic calming; changes to traffic circulation around schools; installation of school zone cameras; and school walking route maps. The base level of transportation funding provides improvements at approximately three to four schools per year. The project also funds safe biking and walking education and traffic safety outreach campaigns. Operation of school zone cameras is directly funded from the Seattle Police Department budget.

RapidRide Roosevelt

Project No:	MC-TR-C013	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$85,057	Urban Village:	Multiple

This project will provide a high-quality service connecting Downtown Seattle with the neighborhoods of South Lake Union, Eastlake, University District, and Roosevelt. This project also includes protected bike lanes, streetscape improvements and intersection improvements including ADA-compliant curb ramps to provide connections to upgraded RapidRide stations.

Note: The project title is changing from "Roosevelt Multimodal Corridor" to "RapidRide Roosevelt"

Unsecured Funding Strategy: The Roosevelt RapidRide program is currently competing for a \$45 million Small Starts grant from the Federal Transit Administration. Our application has been highly rated by FTA, but the process for securing the funding is highly involved and requires extensive work with the FTA throughout the design process. We are working to secure a Small Starts grant agreement in 2021.

The Roosevelt RapidRide program is also competing for \$6 million in Regional Mobility grant funding from WSDOT. During WSDOT's last award cycle, we were not awarded funding, but our project was prioritized as 1st on the contingency list, should the funding become available.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Retaining Wall Repair and Restoration

Project No:	MC-TR-C032	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing asset preservation program provides funding for City crews to repair or reconstruct retaining walls owned and located within the public right-of-way. The repairs/reconstruction are crucial to preserving the adjoining sidewalks and roadways. The repair of more expensive retaining walls within the program is currently underfunded; however, the program is currently funding an evaluation of the Northlake Retaining Wall in Fremont.

Project Category:	New Investment	Location:	Various
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2018 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$42	Urban Village:	Multiple

This project will begin design of transit-related elements from Rainier Avenue South to NE 50th Street. The project includes two elements: 1) electrification of two gaps in the electric trolley network in order to convert King County Metro's Route 48 South to electric trolley bus operation and 2) transit operational, facility and access improvements along the two segments of Route 48 South. Elements could include bus stop improvements, thicker pavement at bus stops, upgrades to passenger amenities, and access improvements for pedestrians and cyclists connecting to bus stops.

Seawall Maintenance

Project No:	MC-TR-C098	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Alaskan WAY
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Multiple

This project will provide critical ongoing structural maintenance of the Elliott Bay Seawall, which is nearing completion. Replacement of existing assets, such as the Seawall, generally require minor maintenance, especially in the early years after the project is complete. However, the Seawall project is an exception as the asset has new features to maintain and the City, as part of its permit obligations, has committed to monitoring the performance of the habitat features over the next ten years and taking adaptive measures if performance goals are not met.

Shoreline Street End Program

Project No:	MC-TR-C011	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project will maintain and improve Seattle’s designated shoreline street ends. There are currently 142 shoreline street ends throughout Seattle. Shoreline street ends are community assets, which provide the opportunity for residents and visitors to experience and enjoy Seattle’s shorelines. This project improves public access, protects unique views, and enhances habitat to create long-lasting assets.

Sidewalk Safety Repair

Project No:	MC-TR-C025	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project rehabilitates sidewalks damaged by street trees or where there are serious safety concerns as evidenced by claims, service requests, and potential City liability. The project includes opportunities for public/private partnerships with citizens, property owners, and businesses. Asset management principles are used to guide repair needs and establish priorities for maintaining the sidewalk (or walkway), curbs, curb ramps, and in some cases, a filler strip between the sidewalk and curb.

Signal Major Maintenance

Project No:	MC-TR-C026	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project addresses major work related to the basic infrastructure at traffic signals such as poles, span wires, mast arms, wiring, equipment interconnectivity, video equipment and cabinets to improve and upgrade the traffic signal system. The project also is used for replacement of signal cabinets. The expected life of a signal is 30 years; currently there are more than 1,100 signals within the City.

Sound Transit - East Link

Project No:	MC-TR-C004	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides design review, permitting, and construction support services for the Sound Transit East Link Extension project. It will provide a connection from the Eastside to downtown Seattle, Sea-Tac Airport and the University of Washington. Ten stations will serve Seattle, Mercer Island, Bellevue, Bel-Red and Overlake in Redmond.

SPU Drainage Partnership - Broadview Pedestrian Improvements

Project No:	MC-TR-C036	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 5
Start/End Date:	2016 - 2022	Neighborhood District:	Northwest
Total Project Cost:	\$8,000	Urban Village:	Bitter Lake Village

This project funding will be used to install pedestrian improvements as part of SPU's larger Broadview Sewer and Drainage Improvement project. The Broadview sewer system was built in the 1950's and cannot handle the combination of additional flow from the homes and business that have developed since then and the additional storm water that is entering the system from downspouts directly connected to the sewer system as well as additional storm water entering through deteriorated pipes. This area is also lacking conventional sidewalks and would benefit from pedestrian improvements. The overall project goal is to reduce the potential for sewer backups and surface flooding for the Broadview neighborhood while improving the pedestrian environments.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by improving asset condition.

SPU Drainage Partnership - South Park

Project No:	MC-TR-C054	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	TBD
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2016 - 2021	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$10,000	Urban Village:	South Park

This funding will be used to partner with SPU's South Park Drainage Improvement projects. SPU is planning to install a pump station to control flooding in the South Park area. However, that alone will not control flooding. Many streets in the area are in poor condition and don't have a street drainage collection system. This funding will allow SPU and SDOT to partner to install the needed collection systems and repair the deteriorated roads.

Total:	4,180	5,875	109	806	1,984	1,984	1,984	-	16,923

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges. For SDOT, the annual O&M cost to support new City-owned and maintained infrastructure built by the next major phase of the SR-520 program is estimated at \$56,000. The SR-520 program will also replace existing City infrastructure, such as new street and sidewalk pavement, which will reduce SDOT annual O&M costs in the near term.

Street Lighting Program

Project No:	MC-TR-C076	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides funding for the right of way (ROW) lighting components of transportation projects, where the cost of those components will ultimately be borne by the City's General Subfund. The project enables the Seattle Department of Transportation, the Department of Finance, and Seattle City Light to plan for these costs. Funding is provided from the Light Fund, which recovers these costs through streetlight rates charged by Seattle City Light to the City's General Subfund. SDOT develops project specific estimates of the cost of lighting components in the year prior to construction. No projects are budgeted for 2019 and 2020. For 2021 through 2025, the funds displayed below have not yet been allocated to specific projects but will be allocated once detailed project cost estimates are developed.

O&M Impacts: This CIP supports urban forestry staff to maintain landscapes installed by SDOT capital projects.

Vision Zero

Project No:	MC-TR-C064	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

Vision Zero is an approach to traffic safety, with the goal of ending traffic deaths and serious injuries. At the core of Vision Zero is the belief that death and injury on city streets is preventable. Collisions are often the result of poor behaviors and unforgiving roadway designs. This project approaches the problem from the angle of creating street designs that emphasize safety, predictability, and the potential for human error, and will complete 12-15 corridor safety projects over 9 years to improve safety for all travelers on our highest-crash streets. Corridors identified as part of the Move Seattle Levy include: 65th St., Rainier Ave S, 35th Ave SW, SW Roxbury St, Greenwood/Phinney, 1st Ave/1st Ave S, 12th Ave/12th Ave E, Aurora Ave N, Lake City Way, Sand Point Way, E Marginal Way, Airport Way, 35th Ave NE, 15th Ave NE, MLK Jr. Way S, and 5th Ave NE.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Seattle City Light

Overview

Seattle City Light (SCL) is a municipal electric utility, owned by the residents of Seattle and run by the City's elected officials. The utility serves a population of over 906,000 people living in a 131 square-mile area, which includes the City of Seattle and several adjoining jurisdictions. To serve these customers, City Light owns, maintains, and operates a multi-billion-dollar physical plant. The physical plant includes:

- a power supply generation system consisting of seven hydroelectric plants on the Pend Oreille, Skagit, Cedar, and Tolt rivers with a combined capacity of almost 2,000 megawatts;
- 656 miles of high-voltage transmission lines linking these plants to Seattle;
- a distribution system with 15 major substations and more than 2,500 miles of overhead and underground cable;
- a state-of-the-art System Control Center coordinating these activities; and
- billing and metering equipment tracking approximately 461,000 accounts.

City Light's Capital Improvement Program (CIP) is the vehicle for repairing, upgrading, and expanding this infrastructure. The CIP funds a variety of safety improvements, mitigation activities, and licensing requirements. The goal of the utility's capital program is to ensure that the facilities required to serve City Light customers with low-cost, reliable power, are in place. Funding for the CIP comes primarily from retail electricity sales, sales of surplus power on the wholesale market, and the sale of revenue bonds.

The last Strategic Plan for City Light (2019-2024) established spending priorities and a six-year rate path for the utility and guides development of City Light's \$2.2 billion 2020-2025 Proposed CIP budget.

Thematic Priorities

The City Light Strategic Plan identifies four strategic priorities: customer service, affordability, clean energy and core utility business.

- **Customer Service** – Upgrade customer service practices to meet evolving customer needs and expectations by modernizing customer service.
- **Affordability** – Keep customers' bills affordable and stable by implementing strategies to control costs, capture new revenues, and restructure rates.
- **Clean Energy** – Deliver robust and innovative programs to promote the efficient use of clean energy and protect the shared ecosystem.
- **Continuing Progress on Our Core Business** – Invest in our infrastructure and workforce to provide a consistent level of service, reliability, and response.

The first three priorities are areas of strategic focus where City Light must make changes to respond to industry challenges. The initiatives that support each of these priorities are new efforts but will be funded within existing budget and staffing levels. City Light's fourth priority is to continue to maintain and improve our core business.

City Light's CIP projects implement these objectives in the following ways:

Preserve Hydroelectric Generation Assets

We need to maintain our hydroelectric generation assets through prudent and systematic investments

and maintenance. Current planned enhancements include: dam safety; outage management processes; long-term planning for small legacy hydroelectric projects such as Cedar Falls; improvements of ancillary systems and facilities including powerhouse systems; and Boundary Master Plan and Skagit Master Plan facilities improvement plans.

Relicensing

Acquire new federal licenses to continue to operate three City Light hydroelectric projects: Skagit, Newhalem, and South Fork Tolt. License renewal applications for these projects will be filed in 2023, 2025, and 2027, respectively.

Enhanced Grid Performance & Cybersecurity

As customers have added new distributed resources, utilities – including City Light - have been improving their operational technology (OT) infrastructure. Protection of the electrical grid from cyber threats is also an ongoing challenge. City Light is responding by continuing to upgrade its OT infrastructure and energy grid to protect against cybersecurity risks and improve power grid operations.

Preserve Transmission & Distribution Infrastructure

City Light intends aims to implement industry best practice system improvements through prudent investment and maintenance. Planned enhancements to improve reliability include incorporating new technologies such as smart grid and advanced grid analytics. Specific efforts include: implementing metric driven, cost-benefit analysis supported planning for transmission, substation and distribution projects; developing corporate asset data management procedures; and maximizing benefits derived from our asset management capabilities.

Reliability for a Growing City

Various investments to maintain and upgrade the transmission and distribution systems will improve reliability and ensure City Light has enough capacity to serve our growing city. Specific efforts include: relocating wires and other facilities underground to accommodate changes along the downtown waterfront; adding capacity for the expanding University of Washington and new Sound Transit light rail; adjusting electrical grid operations to realize systemwide benefits from the new Denny substation; and replacing failing underground wires to bring them up to modern standards.

City Light's Commitment to Race & Social Justice

City Light takes its lead from the Citywide Race and Social Justice Initiative (RSJI) to end institutionalized racism in City government. Reaffirmed by Mayor Durkan's [Executive Order 2017-13](#), and in partnership with the community, the Initiative works to change the underlying system that creates race-based disparities in our community and to achieve racial equity in City operations, public engagement and service. As a part of a municipality committed to inclusive public service, race and social justice is considered in all utility programs.

Project Selection Criteria

City Light participates in an extensive planning process to ensure project funding best meets customers' current and future needs. The 2020-2025 CIP is based on the proposed 2019-2024 Strategic Plan. Project ideas to implement the Strategic Plan and accomplish baseline service delivery come from throughout City Light. Staff members in the operational divisions are responsible for creating official proposals. Members of each of the utility's organizational lines of business (e.g., power supply, transmission and distribution, and customer service) prioritize capital spending within their divisions and then submit recommended projects through a centralized capital budgeting

system.

City Light management compares proposals against criteria that evaluate the projects' costs, benefits, and risks. The utility gives priority to mandatory requirements and projects currently underway before considering future projects and new initiatives. Utility staff develops business cases for projects with a total project cost over \$1 million to document the project expectations and rationale and provide a cost-benefit analysis of alternatives.

Availability of funding and labor resources limits the CIP. City Light management seeks to balance the overall needs of the utility within these constraints and may rescope, reschedule, or defer projects in its six-year CIP. City Light intends to revisit the adopted Strategic Plan every two years to maintain transparency and set direction for future CIP development.

2020-2025 Proposed CIP Highlights

The 2020-2025 Proposed CIP budget outlines \$2.2 billion in capital spending over six years for power supply, transmission, distribution, customer services, and central utility needs. In 2020, approximately \$51 million of this spending is in response to external projects, including suburban undergrounding requests, maintenance of the streetlight system, infrastructure relocations due to transportation projects, and other reimbursable customer-requested work.

City Light monitors and refines CIP project spending plans throughout the year and reports progress to the Mayor and City Council quarterly. City Light submits all significant project changes to the Mayor and the City Council for approval through the quarterly supplemental budget process.

**2020-2025 Proposed CIP
Summary of CIP Project Allocations (in 1,000s)**

Program/SubProgram	2020	2021	2022	2023	2024	2025

A selection of projects from each Program follows.

Central Utility Projects

Projects in this program provide for centralized billing and customer service systems, financial and information technology systems that are critical to the utility's operation, and vehicle fleets and facilities that are not part of the power generating plant (e.g., equipment shops, service centers, and maintenance yards).

For 2020, the CIP includes \$28.3 million in funding for 24 Central Utility Projects.

BIP in 2020 to add \$600,000 in funding for Mc-CL-XF9237 Electric Vehicle Infrastructure.

Highlights ordered by 2020 Proposed Budget include:

- **Equipment Fleet Replacement (MC-CL-XF9101): \$7,182,282**
This ongoing project replaces, updates, and expands City Light's light and heavy-duty mobile equipment fleet. This project also funds the replacement of light-duty vehicles owned by City Light, including those previously leased from the Fleets & Facilities Department and that are now owned by City Light.
- **North and South Service Center Improvements (MC-CL-XF9107): \$4,012,810**
This ongoing project improves office, shop, and storage areas in the North and South Service Centers. The project increases efficiency, productivity, safety improvements and optimal use of space.

- Miscellaneous Building Improvements (MC-CL-XF9007): \$3,986,985
This ongoing project capitalizes on emergent opportunities to make improvements to City Light's buildings and facilities. The project protects employees and customers from health and safety hazards and permits SCL to meet safety and health code requirements.
- Workplace and Process Improvement (MC-CL-XF9159): \$2,096,339
This ongoing project funds alterations that preserve workplace efficiency. The project focuses on adapting exterior workspaces and interior building elements to support business process improvements for work groups. Interior systems improvements include things like flooring replacements, interior remodeling, computer network cabling upgrades, uninterruptible power systems and computer flooring. Exterior system improvements include fencing, security systems, paving and striping, and exterior building components.
- Safety Modifications (MC-CL-XF9006): \$1,529,161
This ongoing project modifies City Light's facilities and provides equipment to correct imminent and critical safety hazards. The project includes upgrades and revisions to systems, equipment and operations, properties and facilities, as needed to comply with safety regulations and best practices for a safe, efficient, and secure work environment.
- Building Envelope Upgrades (MC-CL-XF9072): \$1,441,498
The ongoing project updates or replaces information security systems that are at high risk of failure. The project enhances vulnerability and intrusion detection as well as response capabilities and procedures. The project provides (by way of illustration but not limitation) for implementation of systems to replace or upgrade firewalls, routers, switches, operating systems, intrusion detection capabilities, security information and event management, Linux patching procedures, Dynamic Host Configuration Protocol server, Domain Name System server, internal vulnerability scanning, and physical security cameras and networks for SCL locations.
- Office Furniture and Equipment Purchase (MC-CL-XF9103): \$1,130,691
This ongoing project provides office equipment and furniture costing more than \$5,000 each. This project furnishes newly created or modified space under the Workplace and Process Improvement program, and replaces aging office furnishings with modular office workstations, conference room ensemble furniture, and major office machines. This project enhances worker safety and morale by purchasing ergonomic furniture and providing modern workspaces.

Distribution: Projects in this program include improvements to City Light's distribution substations, relays, feeders, network distribution systems, overhead and underground radial distribution systems, service connections, customer meters, and other facilities related to the distribution system.

For 2020, funding is added to support Underground Equipment Replacements, and University of Washington Capacity Additions.

For 2020, the CIP includes \$199.7 million in funding for 55 projects in Distribution.

Highlights ordered by 2020 Proposed Budget include:

- Pole Attachments (MC-CL-YR8452): \$16,614,057
This ongoing project funds utility crews and engineers to prepare City Light poles for the attachment of other communication infrastructure. This project provides revenues through pole attachment fees and construction costs, which are fully reimbursable.
- Medium Overhead and Underground Services (MC-CL-ZS8366): \$16,334,900
This ongoing project provides medium size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of 50 KVA to 2.5 MVA and 26 kV radial services. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely, and cost-effective manner.
- Overhead Equipment Replacements (MC-CL-YR8351): \$12,636,335
This ongoing project replaces older equipment in City Light's distribution system that is nearing the end of its usable life, is overloaded, or no longer has an available supply of spare parts. These items include, but are not limited to, poles, cross-arms, transformers, and open-wire secondaries
- Denny Substation - Network (MC-CL-YN8404): \$11,262,083
This ongoing project provides network system design and construction, engineering design at the substation network interface, and underground conversion of the streetlight, traffic signals, and telecom and fiber optic systems.
- Network Additions and Services: Broad Street Substation (MC-CL-ZS8363): \$11,000,000
This ongoing project provides electrical service connections and related improvements in response to customer service requests within the Broad Street network areas. The project performs capacity additions work associated with service connections to customers including condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. The project also replaces or installs network transformers, network protectors and specialty transformers, and performs short duration system improvement work identified during operations, including retrofitting in-building vaults.
- Underground Equipment Replacements (MC-CL-YR8353): \$10,412,579
This ongoing project replaces and improves underground electrical system equipment that is failing or approaching the end of its useful life. This project enhances distribution system reliability, avoiding unplanned outages or interruption of service due to equipment failure.
- Network Additions and Services - Denny (MC-CL-ZS8405): \$9,468,484
This ongoing project provides electrical service connections and related improvements in response to customer service needs within the North Downtown network area. The project provides civil and electrical design assistance to customers to connect existing and proposed buildings to the North Downtown network system. This project also performs capacity addition work associated with service connections, and replaces or installs network transformers, network protectors, and bus ties switches.
- Substation Breaker Replacements and Reliability Additions (MC-CL-YS7779) \$7,422,677
This ongoing project funds the review of City Light's inventory of approximately 400 transmission and distribution voltage circuit breakers. It determines which have the greatest wear, gas or oil

leaks, maintenance cost, and service stress. It replaces those circuit breakers with the highest failure risk.

- Substation Equipment Improvements (MC-CL-YS7752): \$5,711,556
This ongoing project adds, replaces and upgrades substation equipment, particularly the substation electrical and control equipment. The project maintains or improves system reliability, permits compliance with high voltage and environmental regulations, and ensures safe work sites. The project allows remote control and monitoring of substation equipment from the System Control Center, which facilitates faster response time to correct system instability or outages.
- Overhead Customer Driven Capacity Additions (MC-CL-YR8355): \$5,594,827
This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old line segments, relocates lines for construction clearances, and replaces rotten and damaged poles in the distribution system. This work is driven by specific customer projects for their direct benefit and is therefore reimbursable.
- Underground Customer Capacity Additions (MC-CL-YR8360): \$5,292,808
This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground line and may replace rotten and damaged poles in the distribution system that have underground facilities beneath them. This work is driven by specific customer projects, for their direct benefit, to identify and upgrade feeders that are impacted before the new load from those projects comes online. City Light is reimbursed by the customers for this work.
- Network Additions Services: First Hill, Mass, Union & Univ (MC-CL-ZS8364): \$5,000,000
This ongoing project provides electrical service connections and related improvements in response to customer service requests within the First Hill, Massachusetts, Union, and University District network areas. The project performs capacity additions work associated with service connections to customers, including condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. The project also replaces or installs network transformers, network protectors and specialty transformers, and performs short-duration system improvement work identified during operations, including retrofitting in-building vaults.

External Projects: Projects in this program respond to requests from local jurisdictions to relocate distribution services from overhead to underground systems per the terms of franchise agreements; maintain and upgrade the streetlight system; relocate utility infrastructure in response to major transportation projects; and provide capital improvements in response to other customer-requested service needs. Allocation changes reflect revised scope and schedule projections provided by the transportation project managers.

For 2020, the CIP includes \$51.1 million in funding for 14 External Projects.

Highlights ordered by 2020 Proposed Budget include:

- Alaskan Way Viaduct and Seawall Replacement - Utility Relocations (MC-CL-ZT8307): \$21,958,917
This project allows the City to comply with its requirements to relocate Seattle City Light's infrastructure associated with the replacement of the Alaskan Way Viaduct and improvements to the Seawall and Central waterfront.

- Streetlight LED Conversion Program (MC-CL-ZL8441): \$7,320,812
This ongoing project upgrades streetlights with LED fixtures, which will reduce annual energy consumption by 40% (for those lights replaced), provide greenhouse gas avoidance of 5,446 metric tons of carbon per year, and reduce maintenance cost of the utility's streetlight system. With a total system conversion, it is estimated that annual operating costs will be reduced \$3.7 million per year. The savings in energy and maintenance costs will pay for the initial investment within the life of the new system
- Transportation Streetlights (MC-CL-ZL8377): \$7,047,261
This ongoing project relocates Seattle City Light owned streetlights as required by City of Seattle transportation projects.
- Streetlights: Arterial, Residential and Floodlights (MC-CL-ZL8378): \$4,082,472
This ongoing project provides street lighting as requested by various taxing jurisdictions and other customers. Streetlights and floodlights are provided in public right of way, and on private property, for either public or private benefit.
- Overhead and Underground Relocations (MC-CL-ZT8369): \$4,675,861
This ongoing project moves electrical lines to accommodate or take advantage of transportation-related projects, street vacations, or other projects being constructed by non-City Light agencies. This project addresses modifications to the distribution system, including replacement or modifications of old line segments, poles, and underground facilities, as necessary. Some project costs are paid by City Light and some are paid by the requesting agencies, depending on the circumstances.
- Waterfront Seattle Streetlights (MC-CL-ZL8481): \$3,828,095
This project funds the street lighting associated with the bored tunnel hybrid plan for the Alaskan Way Viaduct replacement which is a project that will result in the City rebuilding Alaskan Way, led by the Office of the Waterfront.

Power Supply: Projects in this program include improvements to City Light's dams, generators, powerhouses, and other related projects. In addition, the program contains projects designed to help City Light comply with federal licensing and environmental mitigation requirements at the utility's dams. City Light sequences work on major power production equipment (i.e., generator rebuilds and runner replacements) to reduce the impact to power generation and level capital spending.

For 2020, the CIP includes \$90.7 million in funding for 53 projects in Power Supply

Highlights ordered by 2020 Proposed Budget include:

- Boundary - Licensing Mitigation (MC-CL-XB6987): \$14,386,199
This ongoing project implements Protection, Mitigation and Enhancement measures (PMEs) required by the terms and conditions of the license issued by FERC in 2013. The license allows for the continued operation of the Boundary Hydroelectric Project, Seattle City Light's largest generating station producing approximately 25% to 40% of the City's power supply.
- Boundary Powerhouse – Unit 52 Generator Rebuild (MC-CL-XB6535): \$11,437,504
This project provides rewinding and refurbishing of the Boundary Powerhouse Unit 52 generator, which is part of a programmatic series of projects to maintain and extend the useful life of the Utility's aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, and rotor poles. Mechanical upgrades such as seal rings and wicket gates may also be

installed. This project also provides replacement of the carbon dioxide fire-suppression system with a water sprinkler system to improve worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.

- Boundary Powerhouse Generator Step-up Transformer Replacement (MC-CL-XB6493): \$7,634,677
This project replaces six existing step-up transformers at Boundary Dam, which are 50 years old and have exceeded their reliable service life. This project also purchases a spare transformer because normal delivery time for transformers from order to on-site is 18 to 24 months. This project enhances long-term reliability and allows for City Light to avoid a prolonged loss of generation
- Boundary Powerhouse - Unit 54 Generator Rebuild (MC-CL-XB6353): \$6,925,324
This project provides rewinding and refurbishing of the Boundary Powerhouse Unit 54 generator, which is part of a programmatic series of projects to maintain and extend the useful life of the Utility's aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, rotor poles, etc. Mechanical upgrades such as seal rings and wicket gates may also be installed. This project also provides replacement of the carbon dioxide fire-suppression system with a water sprinkler system to improve worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.
- Skagit - Relicensing (MC-CL-XS6986): \$6,056,553
This ongoing project provides support of the relicensing activities for the Skagit River Hydroelectric Project including support of staff, environmental studies, documentation, and consultation. Relicensing work will begin in 2019. The current FERC license for the Skagit Project expires in 2025, and the license application is due for submission to FERC in May 2023.
- Boundary Facility - Minor Improvements Program (MC-CL-XB6401): \$4,775,554
This ongoing project provides financial coverage for emergent capital projects, specifically related to Boundary Facilities. This project shows increased project allocations in years 2015 to 2017. This increase reflects anticipated baseline CIP spending levels for the Boundary Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects.
- Skagit Facility - Minor Improvements Program (MC-CL-XS6405): \$3,770,005
This ongoing project provides financial coverage for emergent capital projects related to all Skagit Facilities. In addition, this project funds scheduled, small capital projects that have cost estimates less than \$25,000.
- Skagit Facilities Conservation (MC-CL-XS6515): \$3,234,148
This project provides funding for structural improvements to existing facilities at Skagit, both residential and commercial. It replaces lights, windows, and HVAC systems, insulates buildings, and performs related work. The project dramatically reduces the amount of energy expended to keep structures warm or cool depending upon the season.
- Ross Dam AC/DC Distribution System Upgrade (MC-CL-XS6373): \$3,178,381
This project upgrades aging AC electrical distribution system at Ross Dam with a new electrical distribution system. It installs conduit, ducting, distribution panels and wire. It improves the 4 kV system, improves lighting, and provides improvements on top of the dam including a center substation room, emergency generator, valve houses, and a 130-volt battery bank. New conduit and conductors improve reliability of spillgate operations and other dam operations requiring electric

power. New electrical equipment, new lighting, and the addition of emergency lighting allow staff greater operational flexibility, safety, and efficiency.

Transmission: Projects in this program include transmission capacity and reliability projects to deliver power from City Light's dams to its distribution system and the regional power grid. City Light owns and maintains 656 miles of transmission capacity that connect the Skagit facilities to Seattle. City Light also leases additional transmission capacity to connect to the Boundary, Cedar Falls, and Tolt hydroelectric projects.

For 2020 the CIP budget includes \$8.4 million in funding for five projects in Transmission.

Highlights ordered by 2020 Proposed Budget include:

- Transmission Line Inductor Installation (MC-CL-YT8461): \$6,684,780
This project addresses the issue of increased electric transmission congestion load growth in the Puget Sound Area. The project funds the installation of inductors or phase shifting transformers which curtail the flow of power through the Seattle area, while improving customer and asset strengths and maintaining reliability.
- Transmission Reliability (MC-CL-YT7104): \$925,000
This ongoing project replaces the worst 1% of City Light's transmission structures and conductors each year. This project also provides engineering, construction, and related work; improving and maintaining the reliability of the overhead or underground transmission system.

CIP Revenue Sources

Retail electricity sales and surplus energy sales on the wholesale market fund a large part of City Light's CIP. Other funding comes from direct customer billing (including service connections and other customer requested work) and assorted fees. City Light also finances a portion of the CIP through the sale of revenue bonds. City Light's policy is to limit debt financing to 60% of any given six-year CIP ([Resolution 31187](#)).

Summary of Upcoming Budget Issues and Challenges

Budget Issues

Even though the Seattle area is experiencing a construction and population boom, customer electricity consumption is not following suit. Instead, due to energy efficiency programs and policy successes, consumption continues to decline, creating revenue challenges for City Light. In addition, new wholesale revenue is the lowest in recent history due to dry/drought conditions and energy purchases at high market prices. To limit cost increases to our customers, City Light will continue to look for ways to reduce capital spending over the six-year horizon, including utilizing a project prioritization process.

Challenges

There are several challenges that will transform our business over the next decade:

- *New technologies are transforming how people use electricity.* Commercialization of energy technologies pose a potential risk to City Light. New options and products for controlling

consumption, generating, and storing electricity will impact how customers interact with their local utility.

- *Retail energy consumption is declining.* Advances in energy efficiency have reduced consumer energy demand. Due in part to energy efficient building codes and new technologies, today's multifamily units consume approximately half as much energy as older single-family homes.
- *Power supply assumptions are changing.* Low wholesale market prices coupled with rising costs of hydro operations are quickly eroding the market advantage afforded by City Light's hydroelectric resources.
- *Impact of retirements and legacy practices.* As more employees become eligible for retirement and workflows are not documented or digitized, City Light risks the loss of institutional memory, costly service interruptions and a potential impact to service delivery.
- *Climate change continues, and clean energy is more valuable than ever.* Weather pattern changes affect reservoir levels and seasonal energy consumption, leading to increasing volatility of energy supply and demand.

Future Projects/What is on the Horizon

- New project in the 2020-2025 Proposal is the Energy Management System Upgrade.
- Expanded transportation electrification programs to meet City Light's Strategic Plan priorities to become a clean, renewable-powered city and the mayoral priority Drive Clean Seattle.
- Grid Modernization to develop and implement a strategy to modernize and optimize City Light's grid including both near-term and long-term actions, such as transmission and distribution automation, distributed energy resource development and integration, grid edge and behind-the-meter technology, and other utility technology projects. Taken together, these efforts will be intended to help position the utility for emerging business and operational realities, and reshape the grid's architecture to meet our customer-owners' energy needs and choices today and in the future
- The transition to the new 5G networks will increase requests to attach to City Light poles. The impact of the required fiber optic deployments to support 5G will touch nearly every pole in City Light's distribution system.

Advanced Metering Infrastructure

Project No:	MC-CL-ZS8426	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2015 - 2019	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$100,374	Urban Village:	Not in an Urban Village

This project replaces approximately 400,000 existing meters with Smart Meters allowing two-way communication between Seattle City Light and its customers, residential or commercial. Smart Meters continuously record and transmit consumption data to the utility. They also automate meter reading, increase customer service, heighten billing capacity, reduce energy consumption, improve outage restoration efficiency, and support rate structure flexibility. Implementation of the project positions the utility to comply with North American Electric Reliability Corporation (NERC) and Federal Energy Regulatory Commission (FERC) programs and requirements.

Alaskan Way Viaduct and Seawall Replacement - Utility Relocations

Project No:	MC-CL-ZT8307	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	SR 99 / Battery St
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 7
Start/End Date:	2002 - 2023	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$257,145	Urban Village:	Not in an Urban Village

This project allows the City to comply with its requirements to relocate Seattle City Light's infrastructure associated with the replacement of the Alaskan Way Viaduct and improvements to the Seawall and Central waterfront.

Battery Storage Pilot

Project No:	MC-CL-YR8484	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds the installation of a grid-connected utility-scale battery. City Light will either work independently or with a partner to develop and demonstrate this new technology. This project gives City Light an opportunity to explore the storage technology and its impact on our local grid.

Boundary - Access Road Stability Improvements

Project No:	MC-CL-XB6615	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2025	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$9,619	Urban Village:	Outside City of Seattle

This project constructs a substantial slope stabilization in the area of the West Access Road cut to limit maintenance inputs, ensure continued access to the powerhouse, and improve safety (present debris flows occasionally contain larger sized rocks). The relocated portions of the West Access Road's slopes have continued to ravel since relocation occurred in the early 00's There is a risk that the slope could fail in a more conclusive fashion and block access to the powerhouse. Additionally, the upslope interceptor ditch (a concrete channel) suffered undermining erosion causing the concrete to subside and not perform well at channelizing and conveying sheet flow away from the slope face.

Boundary - Entrance Improvements

Project No:	MC-CL-XB6601	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2019	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$2,956	Urban Village:	Outside City of Seattle

This project provides safety for employees at the security entrance to the Boundary Hydro Project, those working at the site, the security guard, and visitors. This project provides realignment of the access road to the security gate so the guard station is accessed between lanes of incoming and outgoing traffic instead of from the road shoulder. This increases the guardsâ€™ view of approaching traffic and allows traffic more time to slow down when approaching the guard station. This project also provides a permanent building with water service, a restroom, and an electrical room as well as new signage.

Boundary - Level 6 Deck Stabilization

Project No:	MC-CL-XB6604	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$3,221	Urban Village:	Not in an Urban Village

This project installs a new system of rock bolts and other forms of rock anchors to improve the structural stability of the Level 6 Deck on Boundary Dam. This portion of the dam is attached to and supported by the adjacent rock. A recent inspection revealed a weakness in the current attachments and use of the deck by heavy equipment is restricted until these improvements are made. This project also includes stabilization of rock blocks in the powerhouse machine hall.

Boundary - Licensing Mitigation

Project No:	MC-CL-XB6987	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Investment	Location:	10382 Boundary Rd, Metaline, WA 99153
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project implements Protection, Mitigation and Enhancement measures (PME) required by the terms and conditions of a settlement agreement and new license to be issued by the Federal Energy Regulatory Commission (FERC). The license allows for the continued operation of the Boundary Hydroelectric Project, Seattle City Light's largest generating station producing approximately 25 to 40% of the City's power supply.

Boundary - Unit 56 Exciter Replacement

Project No:	MC-CL-XB6603	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$1,976	Urban Village:	Outside City of Seattle

This project provides installation of a new electrical exciter on the Boundary Powerhouse Unit 56 Generator. The unit's schedule for a rewind started in 2014, increasing the capacity of the unit. The project also provides an upgraded exciter needed to reliably realize the additional capacity over the new life of the unit.

Boundary Control Room Alarm system replacement

Project No:	MC-CL-XB6637	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$840	Urban Village:	Not in an Urban Village

This project replaces the system of alarms and annunciator panels in the Boundary Control room with a modern system that integrates with the current automation system. The current system of alarms and annunciator panels is not functioning properly, and is outdated. Alarms will be routed to PH Operator terminals where information will be displayed as to the nature of the alarm. Due to the large number of circuits that will need to be replaced, it is assumed that this project will be implemented in phases over four years, starting in 2018.

Boundary Crane Improvements

Project No:	MC-CL-XB6620	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$7,405	Urban Village:	Not in an Urban Village

This project rehabilitates and modernizes control systems and other components on two bridge cranes at the Boundary Powerhouse. The controls have exceeded their useful life and other systems, such as fall protection, are not up to current safety codes. A comprehensive crane assessment may identify additional systems requiring replacement, rehabilitation, or repair. These cranes are critical to the operation and maintenance of the six hydroelectric generators at Boundary and are directly linked to generator availability. This work supports upcoming rewind projects on Boundary Units 51, 52 and 54.

Boundary DC Panel Upgrade

Project No:	MC-CL-XB6628	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$911	Urban Village:	Not in an Urban Village

This project replaces and upgrades DC panels at Boundary. The panel capacity has been maxed out from the addition of many control circuits over the past several years, resulting in multiple circuits being connected to the same breaker. The work will include a load study, design of new main and sub panels, and construction. These panels provide back-up service to critical equipment via batteries in the event of a power failure in the powerhouse.

This ongoing project provides financial coverage for emergent capital projects, specifically related to Boundary Facilities. These projects are, by definition, unforeseeable, unscheduled, unpredictable, and occur on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2017. This increase reflects anticipated baseline CIP spending levels for the Boundary Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects.

Start/End Date:	2008 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$3,039	Urban Village:	Not in an Urban Village

This project constructs an intermediate switchyard at Boundary, installs new cables routed through tunnels to the surface from the Boundary Dam transformers to the switchyard, and constructs a transmission line from the switchyard to the BPA Switching Station. This project mitigates the likelihood of rock fall damage to a transformer, the bonnet over the transformer, transformer equipment, conductors, or outriggers. It reduces the likelihood of damage from such an incident which could be catastrophic and result in extended outages, personal injury, and death.

Boundary Powerhouse Exhaust system

Project No:	MC-CL-XB6634	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2022 - 2023	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$823	Urban Village:	Not in an Urban Village

This project replaces and improves the existing Boundary powerhouse exhaust system. Boundary powerhouse is located in a rocky cavern and relies on a mechanical exhaust system to maintain air quality in the various levels of the powerhouse.

Boundary Powerhouse Generator Step-up Transformer Replacement

Project No:	MC-CL-XB6493	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Facility	Location:	10382 Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2010 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$47,128	Urban Village:	Not in an Urban Village

This project replaces six existing step-up transformers at Boundary Dam, which are 50 years old and have exceeded their reliable service life. This project also includes a spare transformer as normal delivery time for transformers from order to on-site is 18 to 24 months. This project enhances long term reliability and allows for City Light to avoid a prolonged loss of generation capacity.

Start/End Date:	2022 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,323	Urban Village:	Not in an Urban Village

This project upgrades the controls for Boundary sluice gates to allow for remote operation. Boundary's sluice gates are being used more under our new license because they help meet Total Dissolved Gas requirements in the tailrace. This has created a need for modern controls that include remote operation capability.

Boundary Station Service Transformer Replacement

Project No:	MC-CL-XB6627	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$8,536	Urban Village:	Not in an Urban Village

This project replaces two aging station service transformers at Boundary. It is assumed that they will be specified and procured together but installed in two sequential years. Station service transformers provide power to the powerhouse, dam and service area. It is likely that the rating of the transformers will need to be increased to accommodate load increases associated with the addition of new circuits in the powerhouse for automation, controls and machine monitoring.

Boundary Sump Pump Drive Replacement

Project No:	MC-CL-XB6633	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,211	Urban Village:	Not in an Urban Village

This project replaces and modernizes drive systems for sump pump at Boundary powerhouse. Portions of Boundary powerhouse are below the level of the tailrace and we rely on a series of sump pumps to keep the powerhouse dry. We have recently completed a project to replace the sump pumps, but now need to replace and modernize the drive systems for each pump. One drive system will be replaced per year, starting in 2020, and the final one will be in service in 2024.

Start/End Date:	2021 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,089	Urban Village:	Not in an Urban Village

This project installs hybrid fire suppression system in Boundary units 53, 55, and 56. City Light Generation has recently determined that we will install hybrid-type fire suppression systems on our hydro generators. The system has been installed at Diablo powerhouse and is planned under separate projects for Boundary Units 51,52, and 54 when they undergo rewinds. Boundary Units 53,55 and 56 have already been rewound, but did not have fire suppression installed. The timing of the installations is assumed to be one unit per year beginning in 2023.

Project Category:	Rehabilitation or Restoration	Location:	500 Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces or restores exterior moisture and thermal barrier components of buildings such as roofing and insulation systems, exterior siding and cladding systems, windows and exterior doors. This project allows for the proactive replacement of building exteriors in order to avert costly structural damage and prevent the growth of toxic mold inside wall cavities and ceiling spaces that can easily render a building uninhabitable. The project also enhances operational efficiency by mitigating emergency repairs which disrupt utility operations.

Cedar Falls - Bank 6 Replacement

Project No:	MC-CL-XC6573	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Cedar Falls
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2018 - 2022	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$15,000	Urban Village:	Outside City of Seattle

This project builds a new substation at Cedar Falls and replaces the 60 yr old Bank 6 power step up transformer at Cedar Falls. Bank 6 provides the connection between our Cedar Falls Generating Units 5 and 6 and the transmission system. The aging transformer is water cooled posing an environmental hazard to the cities drinking water supply and the switchyard does not meet electrical clearance safety standards. The transformer and switchyard are approaching the end of their useful lives and the goal of this project is to replace them to resolve reliability, environmental and safety issues.

Cedar Falls Powerhouse - Penstock Stabilization

Project No:	MC-CL-XC6358	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2007 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$3,861	Urban Village:	Not in an Urban Village

This project installs a seismic upgrade of penstock bridges, repairs sagging or broken penstock support saddles, and refurbishes the exterior surfaces to extend the life of two 78-inch diameter steel penstocks. It also reduces risks of damage from earthquakes and restores the exterior coating on the pipes in the areas where the penstocks are buried. Any penstock failure will likely damage the environment and Seattle's water supply, and could jeopardize the City's ability to fulfill its obligation to regulate fish flows in the Cedar River.

Cedar Falls Powerhouse - Unit 5/6 Generator Protective Relay

Project No:	MC-CL-XC6450	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2007 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,367	Urban Village:	Not in an Urban Village

This project upgrades the present generator protection for Units 5 and 6, which lacks some basic protection elements to protect it from abnormal frequency and voltages. Upgrading and reconfiguring the protective relays is critical to preparing the new Cedar Falls substation for operation. This project replaces existing protective relays, upgrades the generator protection packages, and replaces the electrical and mechanical lockout relays. The project permits City Light to comply with the North American Electric Reliability Council (NERC) and the Western Electricity Coordinating Council (WECC) regional requirements for maintaining the generator in-service during system disturbances.

Cedar Falls Powerhouse - Valvehouse Rehabilitation

Project No:	MC-CL-XC6324	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2024 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$646	Urban Village:	Not in an Urban Village

This project provides rehabilitation to the Cedar Falls Valvehouse. The extent of the rehabilitation is yet to be determined, but could include exterior structural improvements, replacement of windows, oil spill prevention, and interior remodeling.

Cedar Falls Rehabilitation

Project No:	MC-CL-XC6625	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Cedar Falls
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,270	Urban Village:	Not in an Urban Village

This project funds the rehabilitation of the Cedar Falls Hydroelectric Project, which includes completion of the Cedar Falls project analysis, equipment inspections, penstock analysis, building analysis which will uncover items City Lights as a dam owner must address. These items will ensure public safety, employee safety, and environmental stewardship.

Cedar Falls/South Fork Tolt - Minor Improvements Program

Project No:	MC-CL-XC6406	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides financial coverage for emergent capital projects related to the Cedar Falls and South Fork Tolt Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. These projects are, by definition, unforeseeable, unscheduled, unpredictable, and occur on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2018. This increase reflects anticipated baseline CIP spending levels for the Cedar Falls and South Fork Tolt Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects for the next year's CIP.

Center City Connector Streetcar City Light

Project No:	MC-CL-ZT8470	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	City Wide
Current Project Stage:	Stage 4 - Procurement/Bid	Council District:	Multiple
Start/End Date:	2015 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$19,259	Urban Village:	Multiple

This project provides power relocations & service for the proposed SDOT Center City Connector Streetcar project. City Light has buried primary distribution power cables, some of which are encased in old clay tile ducts, which do not meet current standards, and are unlikely to be able to withstand the forces generated by the streetcar's operation. Any streetcar alignment to be built across such old facilities would likely need a reinforced roadbed for SCL facilities to withstand the additional weight.

Start/End Date:	2008 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$72,813	Urban Village:	Not in an Urban Village

This project designs and constructs transmission lines to support the new Denny Substation. These transmission lines are created by dividing the existing Pine to Broad Street transmission line into two transmission lines. The remaining new lines will come from the Canal and Massachusetts substations. This project also provides for undergrounding the transmission lines.

Diablo - Load Interrupters Replacement

Project No:	MC-CL-XS6532	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 126 Stte Highway 20
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2019	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$6,072	Urban Village:	Outside City of Seattle

This project replaces load interrupters at Diablo Banks Generators No. 31 and 32. The existing 230kV load interrupters have reached the end of their useful life and need to be replaced. This project will replace the load interrupters with SF6 Gas Insulated circuit breakers.

Start/End Date:	2011 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$7,255	Urban Village:	Not in an Urban Village

This project provides updated line protection schemes on the Diablo Facility D1, D2, & D3, R1 and R2 Lines, utilizing electro-mechanical relays. The project also replaces existing relays, which are approaching the reasonable service life and lack essential fault location capability. The project replacements include microprocessor based digital relays, fault location and event reporting, lockout and test switching capabilities, and communication assisted transfer trip utilizing the mirrored bits function of the digital relays.

Distribution Automation

Project No:	MC-CL-YR8425	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project automates radial distribution feeders, which includes installation of equipment to provide remote control of operations of switches on power lines and gather real time data on conditions in distribution power lines. The installation of strategically placed switches provides the ability to automatically perform outage restoration, shift blocks of load to maximize efficiencies of feeders, and reconfigure the feeder grid. Typical operation involves remotely detecting that a feeder fault has occurred, locating the damaged portion of the feeder between two remote controlled line switches, isolating the damaged portion of the feeder by opening appropriate remote controlled line switches, and re-energizing undamaged portions of the feeder via the primary feeder source and one or more backup sources using automatically controlled tie switches.

Project Category:	New Facility	Location:	Citywide
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Citywide
Start/End Date:	2019 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$94	Urban Village:	Multiple

This project provides installation of the Distribution Management System (DMS) beginning in 2019. This comprehensive software application enables Power Dispatchers to operate automated distribution devices more effectively by interfacing with the Utility's Energy Management System (EMS), Outage Management System (OMS), Customer Information System, and the Geospatial Information System. The DMS will improve planning, coordination, and operations by enabling dispatchers to improve their switching operations for planned shutdowns. It will also make it easier to prepare planned outages and reduce the area needed for an outage.

Electric Vehicle Infrastructure

Project No:	MC-CL-XF9237	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Investment	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds the implementation of two charging infrastructure pilot programs in 2017: one focuses on public DC fast chargers and one focuses on residential charging. This project rolls out 10 to 20 public DC fast charging stations for Electric Vehicles within its service territory, at either City-owned property or private sites. City Light owns and installs the public charging infrastructure. Through the residential pilot, City Light installs 200-300 stations in customers' homes that create a service that lowers the initial cost and uncertainty of installing at-home charging. This program model offers customers a manageable monthly cost, while allowing the utility to better understand load management options like demand response. These programs allow customers access to carbon-neutral electricity that customers are demanding, better utilize current utility assets and contribute to the aggressive goals of the Drive Clean Seattle Initiative.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project protects and restores fisheries habitat in the Skagit and Tolt river basins. It implements the Endangered Species Act (ESA) Program for recovery of listed fish species that are potentially affected by City Light projects. The project includes land purchase, restoration, assessment, and management. The project reduces the likelihood of third party lawsuits under ESA and the reopening of claims by Federal agencies, e.g. the U.S. Fish and Wildlife Service, seeking additional measures to protect and restore the listed species.

Total Project Cost:	\$1,650	Urban Village:	Not in an Urban Village

This funds the upgrade to maintain the SCL vendor supported Energy Management System (EMS) for Supervisory Control and Data Acquisition (SCADA) for power system operation that is current with industry technology, cyber security and regulatory compliant for highly available and reliable system operation. The EMS Replacement Project was deployed in 2016 with a planned investment objective to maintain current vendor support with software and hardware. In 2020 the EMS software and hardware will be over 5 years old. To maintain optimum support, it is recommended that software upgrades occur every 2-3 years and hardware upgrades every 5 years.

Total Project Cost:	\$11,736	Urban Village:	Multiple

This project plans, builds, deploys, and provides ongoing management of an enterprise document management system that effectively and efficiently captures, secures, shares, and distributes digital and paper based documents and reports. The project streamlines collaboration, automates routine tasks, and lowers costs related to creation, management, and storage of business documents. The project provides the governance and audit capabilities needed to minimize the risks and costs associated with regulatory and legal compliance.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds improvements to prevent air and water pollution at City Light facilities. The project implements cost appropriate solutions for identified environmental programs and provides facilities for meeting environmental and remediation concerns. Typical projects include ventilation for painting operations, storage equipment for toxic material, containment provisions to provide protection in the event of a spill or leak, and handling equipment to enable safe movement of hazardous items.

Generation Federal Reliability Standards Improvements

Project No:	MC-CL-XP6470	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Facility	Location:	500 Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2007 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$9,552	Urban Village:	Not in an Urban Village

This project provides compliance with emergent power production (Generation) regional reliability standards mandated by the North American Electric Reliability Corporation (NERC) and its regional compliance partner, the Western Electricity Coordinating Council (WECC). Typical improvements may include, but are not limited to, power system stabilizers, generator and control system testing equipment, cyber security equipment, and system disturbance monitoring equipment. The project mitigates the probability of financial penalties of up to \$1 million per day per violation for failure to comply. Publication of new and revised standards requires an on-going project level effort to put improvements into service which keep generation equipment and operations in full compliance.

Gorge Crane Rehabilitation

Project No:	MC-CL-XS6639	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 121 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2021 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,800	Urban Village:	Not in an Urban Village

This project refurbishes or replaces mechanical and electrical systems for the Gorge powerhouse cranes and will provide safety upgrades to comply with current code. The Gorge powerhouse crane has never undergone a major refurbishment. The three Gorge generating units are planned for overhauls within the next ten years, and will require a reliable crane. The crane control system is being modernized to allow for better control and accuracy.

Gorge U21-24 overhauls

Project No:	MC-CL-XS6640	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 121 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2022 - 2026	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$42,227	Urban Village:	Not in an Urban Village

This project overhauls Gorge units 21 - 24. The final scope of work will be determined during project chartering, but is expected to include replacing the stator winding, stator core, and excitation system. Refurbishment is expected for rotor components and other mechanical components. Planning is currently forecast to start in 2022 which would mean construction on the first unit would likely begin in 2025.

Information Technology Infrastructure

Project No:	MC-CL-WF9915	BSL Code:	BC-CL-W
Project Type:	Ongoing	BSL Name:	Financial Services - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds replacement and improvement of the Utility's information technology infrastructure. This infrastructure provides applications, data storage, and print services to the utility, and supports activities and applications including Microsoft Outlook, remote connectivity, electronic communications and recording of power marketing transactions (E-tagging), the City InWeb and network, common and City Light applications, UNIX services, and infrastructure change management. Components purchased by this project include servers, network and communications equipment, disk storage, and application and operating system software. Infrastructure is upgraded or replaced based upon a combination of factors, such as maintenance schedules, equipment warranties, availability of vendor support, Gartner recommendations, application growth, and security demands.

Interbay Substation - Development

Project No:	MC-CL-YS7756	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	17th Ave West
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	2019 - 2025	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$1,441	Urban Village:	Ballard-Interbay Northend

This project plans, designs, and constructs a 26 kV substation in the Interbay area. This project installs 2-100 MVA transformers into a facility large enough to accommodate a third transformer at the site if required in the future. The project adds to the distribution network and provides a new path for power to the area. It provides assurance to the developers who are interested in projects in the SLU district that City Light will be able to serve their needs reliably.

Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds replacement and improvement of the Utility's information technology infrastructure. This infrastructure provides applications, data storage, and print services to the utility, and supports activities and applications including Microsoft Outlook, remote connectivity, electronic communications and recording of power marketing transactions (E-tagging), the City InWeb and network, common and City Light applications, UNIX services, and infrastructure change management. Components purchased by this project include servers, network and communications equipment, disk storage, and application and operating system software. Infrastructure is upgraded or replaced based upon a combination of factors, such as maintenance schedules, equipment warranties, availability of vendor support, Gartner recommendations, application growth, and security demands.

The ongoing project updates or replaces information security systems that are at high risk of failure. The project enhances vulnerability and intrusion detection as well as response capabilities and procedures. The project provides (by way of illustration but not limitation) for implementation of systems to replace or upgrade firewalls, routers, switches, operating systems, intrusion detection capabilities, security information and event management, Linux patching procedures, Dynamic Host Configuration Protocol server, Domain Name System server, internal vulnerability scanning, and physical security cameras and networks for SCL locations.

Massachusetts Street Substation - Networks

Project No:	MC-CL-YN8202	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	1555 Utah Ave S
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Greater Duwamish
Total Project Cost:	N/A	Urban Village:	Greater Duwamish

The ongoing project increases Massachusetts Street Substation network capacity. It funds a programmatic approach for comprehensive management of underground network assets serving customers in Pioneer Square and the area bounded by University Street, Third Avenue, Terrace Street, and the Freeway. The project funds completion of engineering design and analysis work required before construction of any civil facilities into which feeders can be relocated from the Alaskan Way Viaduct. This project defers the need date for a new network substation until no further capacity is available from Union Street and the other network substations. It provides sufficient and reliable electrical capacity for the growing power needs of City Light customers.

Network Additions and Services: First Hill, Massachusetts, Union & University

Project No:	MC-CL-ZS8364	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	1555 Utah AV S
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides electrical service connections and related improvements in response to customer service requests within the First Hill, Massachusetts, Union, and University District network areas. The project performs capacity additions work associated with service connections to customers, including condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. The project also replaces or installs network transformers, network protectors and specialty transformers, and performs short-duration system improvement work identified during operations, including retrofitting in-building vaults.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project upgrades City Light's remote vault monitoring capability for the Hazeltine system. The project provides remote monitoring of network transformers, protectors, vaults, and supports daily utility operations. The project enhances the network monitoring capability by allowing an alarm to be sent to the System Control Center within 30 seconds of an abnormal electrical component or environmental condition occurrence.

Start/End Date:	2015 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$63,741	Urban Village:	Downtown

This project replaces the existing Consolidated Customer Service System (CCSS) application with a more current and viable technology solution. The CCSS provides Customer Information System (CIS) processing and support for Seattle City Light, Seattle Public Utilities, the City's Utility Call Center, and other customer service staff. The existing system does not support the current business model and direction of the City of Seattle's utilities, and is no longer supported by the vendor. The project preserves and enhances the City's ability to continue to deliver this critical function into the future.

Outage Management System Phase II Implementation

Project No:	MC-CL-YD9967	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2017 - 2021	Neighborhood District:	Multiple
Total Project Cost:	\$6,195	Urban Village:	Multiple

This project funds City Light's Outage Management System (OMS) upgraded in order to maintain its availability as it be available 100% of the time. However, its application, operating system, and database have aged to the point where OMS' availability is at risk. It was fielded in 2011 and has not been significantly modified since. The upgrade of OMS will bring it to a currently supported product version (application, OS, database, physical infrastructure, etc.). The scope of this project is to cover as much as possible of the as-is system, with an additional change to integrate with the ongoing deployment of the Advanced Metering Infrastructure (AMI) initiative.

Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces the 4 kV electrical equipment remaining in the electrical distribution system with new, efficient and reliable 26 kV distribution equipment. This project increases capacity to deliver power to City Light customers, rebuilds and maintains the backbone of City Light's system, saves energy by reducing transformer and line losses, improves quality and reliability of service to customers, and releases unit substation properties for better neighborhood uses.

This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old line segments, relocates lines for construction clearances and replaces rotten and damaged poles in the distribution system. This work is driven by specific customer projects, for their direct benefit, to identify and upgrade feeders that are affected before the new load from those projects comes online. City Light is reimbursed by the customers for this work.

PCB Tracking and Condition Assessment Project

Project No:	MC-CL-YR9974	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the purchase and implementation of a system capable of storing and analyzing complex asset condition assessment data, including inspection, testing and sampling results. This project will replace the current XFMR transformer system and would also track the environmental impacts of related transformers. This project was formerly known as "Asset Condition Assessment and Test Tracking System."

PeopleSoft Reimplementation - City Light

Project No:	MC-CL-WF9970	BSL Code:	BC-CL-W
Project Type:	Discrete	BSL Name:	Financial Services - CIP
Project Category:	Improved Facility	Location:	System wide
Current Project Stage:	Stage 6 - Closeout	Council District:	Citywide
Start/End Date:	2015 - 2019	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$27,176	Urban Village:	Not in an Urban Village

The PeopleSoft reimplementation and upgrade is a City-wide effort to replace the City's accounting system with an upgraded version of the PeopleSoft software. In addition to City Light's costs for the upgrade, reflected in the 2013-2020 Strategic Plan - FinMAP CIP Project 9961, this project includes \$6.2M from the 2014 Strategic Plan update, which is a 25% allocated share of the City's Financial and Administrative Services departments estimated project costs.

Ross - 480V AC Station Service Switchgear Replacement

Project No:	MC-CL-XS6580	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Improved Facility	Location:	Ross Powerhouse
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2020 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$690	Urban Village:	Outside City of Seattle

This project funds the mitigation of safety hazards at the Ross switchyard by replacing all 480kV circuit breakers with new breakers that allow for remote operation. Policy changes and regulations related to electrical Arc Flash hazards have highlighted safety issues related to this equipment. This project proposes to upgrade and modernize all of the existing 240V and 480V main breakers for all station service switchgear at three powerhouses (Gorge, Diablo, and Ross) at our Skagit Hydro Project.

Ross Dam - AC/DC Distribution System Upgrade

Project No:	MC-CL-XS6373	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 128 State Highway 20
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2005 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$11,324	Urban Village:	Not in an Urban Village

This project upgrades aging AC electrical distribution system at Ross Dam with a new electrical distribution system. It installs conduit, ducting, distribution panels and wire. It improves the 4 kV system, improves lighting, and provides improvements on top of the dam including a center substation room, emergency generator, valve houses, and a 130-volt battery bank. New conduit and conductors improve reliability of spillgate operations and other dam operations requiring electric power. New electrical equipment, new lighting, and the addition of emergency lighting allow staff greater operational flexibility, safety, and efficiency.

Start/End Date:	2008 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$512	Urban Village:	Not in an Urban Village

This project replaces the five Ross Dam Powerhouse Programmable Logic Controllers (PLC). There is one PLC for each of the four generator units, and a fifth PLC monitoring other critical powerhouse equipment. The project improves City Light's ability to make programming enhancements commensurate with operational and regulatory needs, assures comprehensive and correct documentation, and delivers a 24VDC system that eliminates the need of LOTO (Lock-Out/Tag-Out) safety procedures. It provides redundancy, which yields the ability to perform remote start-stop and other control functions of the generators.

Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing program plans, designs and implements projects, improving the physical security of City Light critical facilities, in order to mitigate unauthorized access and criminal activities that could cause significant system damage, power outages, and other related disruptions to the electrical system. The project reduces the risk of sabotage, vandalism, theft, and terrorism that can result in the loss of valuable infrastructure for generation and distribution of power. The project also reduces risk of noncompliance with North American Reliability Council (NERC) 1200 Standards, adopted May 2, 2006, to improve security at critical facilities that house command and control systems. It enhances reliability of the power system in the Pacific Northwest, reduces the risk of lost revenues, and reduces the jeopardy to public safety and emergency response due to loss of lifeline services such as medical services, water and wastewater systems, communications, law enforcement, banking, transportation system, etc.

Seismic Mitigation

Project No:	MC-CL-XF9134	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Outside City of Seattle
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds structural upgrades to buildings. This project is for miscellaneous, unidentified seismic issues other than the Georgetown Steam Plant, Service Centers and Substations, which are funded through other projects. The project protects City Light's assets, employees, customers, visitors, equipment, and materials.

Skagit - Babcock Creek Crossing

Project No:	MC-CL-XS6514	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$1,662	Urban Village:	Outside City of Seattle

This project will construct a permanent and more stable crossing across Babcock Creek, near Newhalem. The road to Babcock Creek provides access to a critical communication tower and currently only has a temporary bridge crossing it. The permanent crossing will be either a bridge or vented ford.

Start/End Date:	2015 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$5,764	Urban Village:	Outside City of Seattle

This project provides design and construction of several new structures to support industrial and recreational boat operations on our Skagit reservoirs. Structures include a new tour dock, new dry dock, additions to the existing boat houses and a new barge landing in Diablo. The project provides improved visitor access for the Skagit Boat Tour, safer boat fueling facilities, reduced impact of snowfall on boats, consolidated barge landings, and improved dry docks.

Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This ongoing project provides support of the relicensing activities for the Skagit River Hydroelectric Project including support of staff, environmental studies, documentation, and consultation needed to submit an application to relicense the project. Relicensing work will begin in 2019. The current Federal Energy Regulatory Commission (FERC) license for the Skagit Project expires in 2025, and the license application is due for submission to FERC in May 2023.

Skagit - Sewer System Rehabilitation

Project No:	MC-CL-XS6232	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 126 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$8,865	Urban Village:	Not in an Urban Village

This project replaces or repairs numerous sewer pipe breaks, leaks, and sags in the combined Skagit River sewer/drainage collection system, located at the Diablo Dam site and also provides major renovations to the aging Newhalem wastewater treatment plant. This project eliminates potential overloads in the sewage treatment plant that can cause pollution of the Skagit River and surrounding soil contamination.

Skagit Facilities Plan

Project No:	MC-CL-XS6520	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2010 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This project implements a comprehensive facility plan to optimize buildings and structures at two Skagit town sites. The project preserves essential facilities that support SCL's power production needs, and retains important civic, cultural, and historic features in keeping with the historic preservation requirements of the Skagit FERC Licensing agreement. The project will reduce operational costs by dismantling and removing surplus facilities that require significant on-going maintenance.

Skagit Powerhouses - Install Protection Relays

Project No:	MC-CL-XS6415	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	500 Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2005 - 2026	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$10,179	Urban Village:	Not in an Urban Village

This project enhances generating reliability by adding protective relays to generating systems at the Ross, Diablo, and Gorge plants, whose generator protective relays do not meet present IEEE Standards. The project funds the addition of microprocessor relays to the existing system, certain auxiliary protective equipment, and modifies the design of the existing protection system to upgrade functionality. This will limit the potential for damage when surges and faults occur in transmission lines due to lightning strikes, load rejections, and other unexpected events.

This ongoing project provides small size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of less than 50 KVA and 26 kV radial services. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely, and cost effective manner as a means to fulfill its commitment to be a customer and community-focused organization.

Total Project Cost:	\$511	Urban Village:	Not in an Urban Village

This project provides expansion of the AutoLab in the Seattle Municipal Tower to what is now the Central Files Room. The extra space will be used as an equipment lab for Power Production electrical engineers to conduct necessary testing of cyber security, remote monitoring and automation equipment in a simulation environment. The testing will be conducted prior to installing and activating the equipment at our generation sites. This project also provides required HVAC upgrades as well as the installation of equipment racks, wire ways, and access security.

Solar Microgrid for Resilience

Project No:	MC-CL-XF9238	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Investment	Location:	TBD
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	TBD
Start/End Date:	2016 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$5,148	Urban Village:	Not in an Urban Village

This project provides construction of an islandable microgrid located at a City of Seattle designated emergency shelter such as a community center, where a solar photovoltaic (PV) system coupled with an appropriately-sized battery energy storage system will be installed. The project provides backup power to support critical emergency facilities and services during extended power outages when electricity distribution facilities are down due to a catastrophic event, such as an earthquake, severe windstorm (or associated flooding), fire or landslide. Smart microgrids improve resiliency and reliability, minimize carbon footprints, and reduce costs. This project positions City Light as one of the utilities in the forefront of an innovative application of microgrids and serve as a testbed for testing and operating not just the microgrid, but the solar and battery energy storage system equipment as well. The Washington State Dept. of Commerce will grant the utility approximately half of the funding to cover the costs for this project.

Sound Transit - City Light System Upgrades

Project No:	MC-CL-ZT8475	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Improved Facility	Location:	City Wide
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Multiple
Start/End Date:	2017 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$181	Urban Village:	Multiple

This project increases the capacity of City Light power distribution systems to serve increased power requirements projected for Sound Transit's Link system. Initial upgrades will be in the Capitol Hill Sound Transit Station area. Construction there may be underway in 2017. Other areas projected to need power distribution system upgrades include area between the International District Station and Lake Washington, the University of Washington Station area, areas in the Rainier valley, and some areas along the proposed Lynnwood Link line.

Sound Transit 3 - City Light

Project No:	MC-CL-ZT8467	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the engineering and construction of relocated and/or new Seattle City Light facilities required for two new light rail lines and related transit facilities from downtown Seattle to Ballard and West Seattle, approved in November 2017 as part of the Sound Transit 3 initiative. City Light activities include engineering and construction of electric power feeder relocations and upgrades, power services for the planned light rail lines, and various other tasks. Sound Transit's plans will require City Light work through several future budget cycles.

Sound Transit Light Rail East Link - City Light

Project No:	MC-CL-ZT8450	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	I-90
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2011 - 2019	Neighborhood District:	Central
Total Project Cost:	\$2,169	Urban Village:	Not in an Urban Village

This project plans for and relocates City Light's electrical facilities, as required by state law, enabling Sound Transit's construction of the East LINK light rail line from Seattle's International District Station to the Bellevue Redmond area. The department also plans to work with Sound Transit on a memorandum of agreement regarding cost reimbursement for its work, which is expected to be 100% reimbursable in keeping with past work with Sound Transit.

Sound Transit Lynnwood - City Light

Project No:	MC-CL-ZT8471	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	City Wide
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2023	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$7,320	Urban Village:	Outside City of Seattle

This project supports Sound Transit's Lynnwood Link, which will extend from the Northgate Transit Center at 5th Ave NE & NE 100th Street to our service area boundary at NE 200th Street, near the I-5 Right of Way. This project will include 100 blocks of relocations, a significant fraction of which will convert lines from overhead to underground. The project will install two feeders for each of the light rail line's traction power stations and upgrade the radial system's capacity where needed to serve the new load. The low and medium power service connections for the line's stations will be handled through the existing service projects, ?business as usual.?

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project will replace 1,603, or 33 percent, of the highest priority streetlights and related underground infrastructure identified in the Streetlight Horizon Plan over the six-year planning horizon. Streetlight infrastructure that will be replaced includes poles, fixtures, conduits, hand holes, and wiring. Emphasis will be placed on standardization of fixtures, construction materials, and construction methods. This project will provide the engineering resources needed to prioritize replacements, develop estimates, and manage and track construction.

Streetlight LED Conversion Program

Project No:	MC-CL-ZL8441	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project upgrades streetlights with LED fixtures, which will reduce annual energy consumption by 40% (for those lights replaced), provide Greenhouse Gas avoidance of 5,446 metric tons of carbon per year, and reduce maintenance cost of the Utility's streetlight system. With a total system conversion, it is estimated that annual operating costs will be reduced \$3.7 Million per year. The savings in energy and maintenance costs will pay for the initial investment within the life of the new system.

Substation Automation

Project No:	MC-CL-YS8424	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces and upgrades substation automation systems, including Remote Terminal Units (RTU) and annunciators, in each of City Light's fourteen substations, and upgrades equipment at two substations annually. The project reduces the likelihood and length of system outages due to failure as the current equipment is wearing out and cannot be replaced in kind because the equipment is no longer manufactured. The project also enhances energy efficiency, and reduces the probability of fines from appropriate governing bodies if loss of a substation, due to equipment failure, causes instability of the western interconnection grid and/or loss of load.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds the review of City Light's inventory of approximately 400 transmission and distribution voltage circuit breakers. It determines which have the greatest wear, gas or oil leaks, maintenance cost, service stress, and fault interrupting history. It replaces those circuit breakers with the highest failure risk. This project also replaces transformer bank breakers at Union Street substation to support load growth.

Substation Comprehensive Improvements

Project No:	MC-CL-XF9161	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	New Facility	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds substation improvements identified in City Light's Comprehensive Facilities Plan, seismic fitness reports, and periodic inspections targeting transmission and distribution buildings. The project implements items necessary to support assigned personnel, such as lunchroom and locker room facilities required by the union contracts, as well as structural and mechanical corrections and enhancements at substation facilities.

Substation Equipment Improvements

Project No:	MC-CL-YS7752	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project adds, replaces and upgrades substation equipment, particularly the substation electrical and control equipment. The project maintains or improves system reliability, permits compliance with high voltage and environmental regulations, and ensures safe work sites. The project allows remote control and monitoring of substation equipment from the System Control Center, which facilitates faster response time to correct system instability or outages.

Substation Transformer Replacements

Project No:	MC-CL-YS7776	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	2136 N 163rd St, Shoreline
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds the review of power transformers at substations and determines dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault interrupting history. The project replaces transformers with the highest failure risk, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project builds or replaces communications infrastructure consisting of fiber optic rings, digital microwave, telephone networks, and two-way radio systems. This project provides City Light with command and control capabilities for the operation of the electrical system. This project ensures the safe, reliable, and efficient operation of the system and positions City Light to meet the Federal Energy Regulatory Commission's vital communications systems requirements.

Underground Customer Driven Capacity Additions

Project No:	MC-CL-YR8360	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground line segments, and may replace rotten and damaged poles in the distribution system that have underground facilities beneath them. This work is driven by specific customer projects, for their direct benefit, to identify and upgrade feeders that are impacted before the new load from those projects comes online. City Light is reimbursed by the customers for this work.

Underground System Capacity Additions

Project No:	MC-CL-YR8361	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground lines, and may replace rotten and damaged poles in the distribution system with underground facilities beneath them. This work identifies and upgrades the feeders that are impacted by increased loads, as needed, before those load increases come online. City Light customers pay for a portion of this work.

Utility Program and Customer Tracking System

Project No:	MC-CL-ZF9928	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Investment	Location:	System Wide
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Citywide
Start/End Date:	2019 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,271	Urban Village:	Not in an Urban Village

This project implements a new system for the Customer Energy Solutions (CES) Division that will centrally manage and facilitate its resource acquisition, small-scale renewables, electric transportation, and value-added programs and services. This system will assist managing programs and service offerings in a more efficient manner and to manage customer engagement in a more robust manner. This system will expedite business workflow, application processing, document storage, savings and incentive calculations, customer touchpoint preservation, and reporting. The system is a combination of software modules that is built on top of a Salesforce platform. The system is also being designed to have some integration capability with City Light's Customer Care and Billing system and PeopleSoft 9.2. As such, the tool has potential to be leveraged more widely by the utility and the City as a whole and is being built to be scalable and extensible. This potential will be explored and incorporated into future phases of development to broaden the reach of this system or its components. Implementing this Utility Program and Customer Tracking System was identified as a mission critical strategic priority for CES.

Vegetation Management Compliance System

Project No:	MC-CL-YD9978	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2018 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$850	Urban Village:	Not in an Urban Village

This new project provides funding for a Vegetation Management Compliance System for planning, tracking, and necessary documentation required to meet WECC and NERC Vegetation Management compliance requirements. These requirements are a WECC recommendation from the 2017 WECC Audit. Auditors noted that SCL was the only utility of its size to not automate Vegetation Management compliance work.

Western Energy Imbalance Market

Project No:	MC-CL-XP9976	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply & Environ Affairs - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2017 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$13,993	Urban Village:	Not in an Urban Village

This project provides funding to allow City Light to participate in the Western energy imbalance market (EIM) run by the California Independent System Operator (CAISO). City Light will need IT systems, an implementation agreement with CAISO, possible additional staff and training to participate in the market. Participation will allow City Light to more efficiently use generation and transmission assets, buy and sell energy in shorter term increments, and use pricing to match loads and resources across more buyers and sellers than existing markets currently permit. By doing this, City Light will more effectively integrate renewable energy across the West due to its flexible hydro capacity. City Light is planning to begin participating in the market in the spring of 2019.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds alterations that preserve workplace efficiency. The project focuses on adapting exterior work spaces and interior building elements to support business process improvements for occupant work groups. Interior systems improvements could include flooring replacements, interior remodeling, computer network cabling upgrades, uninterruptible power systems and computer flooring. Exterior system improvements could include fencing, security systems, paving and striping, and exterior building components.

Seattle Public Utilities

Drainage and Wastewater

Overview

Seattle Public Utilities (SPU) maintains the network of sewer and drainage systems throughout the City of Seattle. These systems include approximately:

- 448 miles of sanitary sewers
- 968 miles of combined sewers
- 68 Pump Stations
- 5.5 miles of wastewater force mains
- 85 City-owned and permitted Combined Sewer Overflow points
- 38 Combined Sewer Overflow control detention tanks/pipes
- 481 miles of storm drains / 290 storm drain outfalls
- 33,750 catch basins
- 65 miles of ditches, 128 miles of culverts
- 30 miles of stream channel (49 creeks, 6 of which are salmon bearing)
- 9 acres of green stormwater infrastructure
- 17 detention/treatment ponds
- 295 drainage flow control facilities
- 578 water quality structures

The Drainage and Wastewater (DWF) CIP is the vehicle for rehabilitating, replacing, improving, and expanding this infrastructure, as well as constructing projects that protect, conserve, and enhance our region's environmental resources. Planned spending in the DWF CIP is approximately \$1.45 billion over the next six years, from 2020 to 2025.

Thematic Priorities/Project Selection Criteria

The goal of the DWF CIP is to construct facilities that reduce the frequency of flooding and sewer backups for customers and improve water quality and habitat in the environment by reducing sewage overflows and the impacts of stormwater pollution. Projects in the DWF CIP are guided by various Federal regulations, City policies, long-term plan documents, and the SPU Asset Management Committee (AMC) benefit criteria. Many DWF CIP projects are outlined in the Wastewater System Plan, the Comprehensive Drainage Plan, and the Plan to Protect Seattle's Waterways. In addition to candidate capital projects identified from these planning documents (e.g., comprehensive plans, program plans), projects are identified from external projects and opportunities, and emergencies or other unexpected events. All potential capital projects are prioritized for consideration into the CIP budget. Priority rankings are based on the following set of criteria:

- **Public Health, Safety & Environment:** The overriding priority for the DWF is maintaining public health and safety. The importance of this project in providing or improving services to customers and decreasing our impact on the environment. Examples of highly ranked projects in this category include the South Park Pump Station, Localized Flood Control program, Sanitary Sewer Overflow Capacity program, South Park Water Quality Facility, and NDS Partnering.
- **Infrastructure Reliability & Risk:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Pipe Rehabilitation and Pump Station improvement programs.

SPU – Drainage and Wastewater

- **Regulatory, Mandates, Legal Agreements:** The City of Seattle/SPU must meet State and Federal regulatory requirements to comply with the Clean Water Act (CWA) and the Consent Decree that was entered in court on July 3, 2013, between the City, the U.S. Environmental Protection Agency (EPA), and the U.S. Department of Justice (DOJ). The two most significant regulatory drivers associated with the CWA are the National Pollutant Discharge Elimination System (NPDES) Waste Discharge Permit (aka NPDES CSO Permit) and the NPDES Phase I Municipal Stormwater Permit (aka NPDES MS4 Permit). This ranking category considers the degree to which the project is driven by Federal, State, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include the Ship Canal Water Quality Project, CSO Retrofits, South Park Water Quality Facility, and NDS Partnering.
- **External Drivers and Opportunities:** SPU’s responsiveness to, or engagement with, the projects of other Departments or Jurisdictions, or opportunities to provide multiple benefits, address service equity, or reduce ratepayer costs through outside funding opportunities. Examples of highly ranked projects in this category include the Move Seattle projects.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each LOB, with reviews by key internal stakeholders. Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects at the margin will be included, excluded or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

To aid SPU in making responsible decisions on behalf of ratepayers prioritized projects must then be justified through a business case process that establishes that a problem or opportunity is timely and important and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental, and social) of life-cycle benefits and costs. The process also recognizes that a project may be a “must do” project (e.g. required by regulations). Business Cases must be approved by the SPU CEO/General Manager and Asset Management Committee.

DWW Priorities that are also Mayor/Council Priorities

Improvements to DWW infrastructure result in safer communities, a healthier environment, and regulatory compliance which are goals inherent within the Mayor’s key values (safe, affordable, vibrant and interconnected City that fosters innovation).

- **Aligning Capital Investments with Community Planning.** SPU has aligned planning for the South Park Water Quality Facility with the Office of Planning and Community Development’s Open Space planning in the S. Park Urban Village area and the Duwamish Valley Action Plan.
- **Aligning Capital Investments with Transportation Department’s modal plan.** SPU has several projects to facilitate citywide interconnectivity efforts.
 - Primary investments are around supporting transportation led projects as part of the Move Seattle Levy, described below within the shared costs projects Budget Control Level (BCL).
 - SPU is also leading a joint SPU/SDOT project in the South Park industrial area providing long desired Drainage Conveyance and Roadway infrastructure.

SPU – Drainage and Wastewater

- The NDS Program, described below, collaborates with SDOT and has identified numerous joint sidewalk/bioretention project locations.
- **Expand use of Green Stormwater Infrastructure** has been identified by Mayor and Council as a priority. Projects that will help achieve the Citywide stretch goal to manage 700MG of stormwater annually with GSI by 2025, include the following:
 - The Natural Drainage Systems (NDS) Partnering program will use bioretention to reduce storm water pollution in creeks and to improve neighborhoods. The NDS Partnering Program will build natural drainage systems along approximately 66 blocks (330' block equivalents) in the Longfellow, Thornton, and Pipers Creek watersheds. The first of these projects was 30th Ave NE, with construction led by SDOT, which was completed in 2019.
 - GSI in Urban Villages Program. SPU and Council created the GSI in Urban Villages Program to complement proposed up zones through HALA, as well as the City's overall growth strategy. This new program has flexibility to address a variety of system problems within urban villages and urban centers, including flooding, sewer backups, water quality, and creek protection. The first GSI in Urban Villages project will be the Cloverdale Bioretention project to be constructed in 2020
 - RainWise Program fights water pollution by offering rebates to property owners for controlling stormwater at residences, schools, and businesses. This program was developed by SPU but is now delivered jointly with King County Wastewater Treatment Division. Over 1,500 Seattle residents and businesses have installed voluntary rain gardens or cisterns through this program, managing over 26 million gallons of runoff every year.

CIP Highlights

--------------	----------------	----------------	----------------	----------------	----------------	----------------	------------------

Protection of Beneficial Uses: This program makes improvements to the City’s drainage system to reduce the harmful effects of stormwater runoff on creeks and receiving water bodies and preserve the storm water conveyance function of our creeks through stream culvert repair and rehabilitation. The program includes projects to meet regulatory requirements, primarily NDS Partnering Projects (a key component of Seattle’s Plan to Protect Seattle’s Waterways) which improves water quality with GSI approaches while partnering with SDOT to provide streetscape enhancements. The program also includes projects that are part of the SPU and Council created GSI in Urban Villages Program. Funding in the DWF CIP is focused on cost effective stormwater and water quality projects such as NDS Partnering, GSI in Urban Villages projects, Capitol Hill Water Quality project, and the Taylor Creek Culvert Replacement project.

Sediments: The City of Seattle is a Potentially Responsible Party (PRP) for cleanup liabilities for contaminated sediments at the Lower Duwamish Waterway Superfund Site, the Harbor Island Superfund Site, and Gas Works Park because of alleged historic contributions from Combined Sewer Overflows (CSO) and storm drain discharges, or other City-owned facilities. The City continues to work with EPA, the Washington State Department of Ecology, King County, and other PRPs on an assessment of contaminants and sources. The Sediments program provides funding for studies and analysis for cleanup of contaminated sediment sites in which the City is a participant, for engineering design and construction of actual cleanup of contaminated sites, , and for liability allocation negotiations. The study phase of sediment remediation projects often requires multiple years before specific cleanup actions are defined. Current projections reflect cleanup construction adjacent to Gasworks Park, the Duwamish Waterway Sediment Remediation, and East Waterway Remediation projects beginning in 2024 based on preliminary schedules.

Combined Sewer Overflows: This program consists of projects that are mandated by State and Federal regulations to control combined sewer overflows (CSOs) into the City's receiving waters. During heavy rainfall events, the combination of stormwater (about 90 percent of the volume) and sewage may exceed the capacity of the combined sewer system (CSS) and overflow into our waterways – causing a combined sewer overflow (CSO). CSOs spill a mixture of raw sewage and stormwater into local waterways at 85 outfalls throughout the City. These spills violate water quality standards, create unacceptable risk to public health, contaminate sediment and habitat for endangered species and pollute the Puget Sound.

Annual CSOs have been reduced from 20-30 billion gallons per year by both the City and the County in 1970 to about 1 billion gallons per year, today. The City’s overflows account for 100-200 million gallons per year. SPU currently does not meet regulatory mandates that limit CSOs to one untreated overflow per outfall location per year. SPU is required by State and Federal law to achieve control of CSOs by 2030. The LTCP, also called the Plan to Protect Seattle’s Waterways, was approved by regulators in May 2015. Ultimately the Consent Decree requires completion of construction of all CSO reduction projects by December 2030. CSOs must be proven to be controlled one year after completion of construction. Continuing investments in CSO control will enable SPU to achieve compliance with the 2030 milestone.

Projects in the CSO Program include large infrastructure projects (e.g. storage structures, pipes, tunnels, wet weather treatment plants, stormwater separation, pump stations, etc.), smaller retrofits, construction of Green Stormwater Infrastructure (GSI) for CSO control, and development and implementation of regulatory required plans such as the Plan to Protect Seattle’s Waterways. The

SPU – Drainage and Wastewater

largest project in the DWF CIP is the Ship Canal Water Quality Project (SCWQP). The SCWQP consists of a 2.7-mile-long, approximately 18-foot-diameter tunnel that, when completed, will capture and store approximately 75 million gallons of sewage and stormwater flows from Ballard, Fremont, Wallingford and Queen Anne.

Other key efforts in the program include Pump Station 13 Upgrade and Force Main Rehabilitation and Pump Station 22 Retrofit and Force Main Upgrade. Planning work is underway and will continue through the coming years for additional CSO reduction efforts to meet CSO Consent Decree compliance date requirements. SPU currently expects to spend approximately \$567 million over the next six years on CSO reduction projects. The majority of this spending is associated with the SCWQP.

Rehabilitation: This program consists of projects that repair, rehabilitate or replace existing drainage and wastewater assets to maintain or improve the current functionality level of the system. Assets that are addressed include:

- pump station structures, airlift conversions, major mechanical, ventilation and electrical components;
- drainage facilities including water quality structures, flow control structures and large surface water facilities; and
- drainage and wastewater conveyance pipes and structures (catch basins, maintenance holes and sandboxes).

Work within this program is a critical component to achieving SPU's Consent Decree target of four sanitary sewer overflows per 100 miles of sewer pipe annually. Individual projects are defined by the type and method of rehabilitation and/or replacement and include emergency rehabilitation, no-dig pipe lining rehabilitation by crews or contract, full mainline dig pipe replacement by contract, dig point sewer pipe and structure rehabilitation by crews or contract, and pump station repairs or replacement by crew or contractor.

This proposed budget will include a new drainage facility master project to rehabilitate or replace water quality structures, flow control structures and large surface water facilities by crew or contractor.

Flooding, Sewer Back-up, and Landslides: This program is responsible for preventing and alleviating flooding and sewer backups in the City of Seattle, with a primary focus on the protection of public health, safety, and property. The program area is focused on planning, design, and construction of new pipes, ditches, culverts, detention facilities, and GSI that control and/or convey storm runoff to the ultimate discharge locations of creeks, lakes, and the Puget Sound. This program also involves protecting SPU drainage and wastewater infrastructure in landslide prone areas, both from impending small landslides, and providing drainage improvements where surface water generated from the City right-of way is contributing to small landslides. Lastly, this program also includes sewer capacity projects that reduce sewer backups and helps lower the risk of exceeding the Consent Decree target of four sanitary sewer overflows per 100 miles of sewer pipe per year. Major projects in this program include the Pearl Street SSO reduction project, the 12th Avenue drainage project, and the South Park Water Quality and Pump Station project. The South Park Water Quality Facility is a regulatory commitment within the Plan to Protect Seattle's Waterways.

Shared Cost Projects: This program includes individual capital improvement projects which typically benefit multiple Lines of Business (LOB) (e.g. the Water LOB and the Drainage and Wastewater LOB) and whose costs are "shared," or paid for by more than one of SPU's utility funds.

The Proposed Budget for the Shared Cost program includes budgets for a number of interdepartmental projects including the Alaskan Way Viaduct and Seawall Replacement, Move Seattle, Center City Streetcar, and Sound Transit Link Light Rail. This BCL also includes funding for SPU Facility Improvements such as the South Operations Center, the North Operations Center, and a new dewatering facility near the South Transfer Station. Other programs in this BCL include DWW Heavy Equipment Purchases, 1% for the Arts, and several smaller projects.

Technology: The Technology capital portfolio is managed in six program areas, which provide a department-wide view of technology investments to address SPU's strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing
- Enterprise Information Management
- IT Infrastructure
- Project Delivery & Performance
- Science & System Performance
- Asset Information Management

Investments in 2020 address several of SPU's key initiatives, including:

- Financial Management and Internal Controls
- Operational Excellence and Performance Management
- An Easy and Engaged Customer Experience
- Data-driven Decision Support
- Project Delivery/Project Controls

In 2020, SPU will focus its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the New Customer Information System already in place, the next major projects for SPU within the Customer Contact and Billing Program would be the Utilities Customer Self-Service (CSS) Portal project as well as other projects such as the Customer Contact & Billing (CCB) Upgrade, and the CIS Reporting. Other projects slated would be enhancements to SPU's Enterprise Project Management System (EPMS) as well as the Development Systems Integration project, and the Maximo Business Intelligence (BI) upgrade along with other projects that have been deferred in previous years

CIP Revenue Sources

Historically, the DWF CIP has been funded primarily by revenue bonds serviced by ratepayers. However, DWF financial policies adopted in 2003 gradually increase cash contributions from SPU to fund the CIP. By 2007, a 3-year average of 25 percent of total CIP costs were funded by a cash contribution, with the remaining capital needs being debt financed.

SPU's DWF CIP is funded largely by Drainage and Sewer ratepayers. SPU issues bonds, serviced by ratepayers that cover approximately 75 percent of the CIP, with the remainder funded by cash. DWF rates were approved by the Mayor and City Council in 2018 for the three-year period of 2019-2022.

SPU – Drainage and Wastewater

SPU also actively seeks grants and low-interest loans. Loans like this offer a lower interest rate than what SPU can borrow/issue debt and offset the need to draw down extra dollars from the construction fund. SPU also receives Remedial Action Grants from the Washington State Department of Ecology for up to 50 percent of sediments cleanup project costs.

Summary of Upcoming Budget Issues and Challenges

The biggest challenge for DWF will be continuing to manage priority projects while still complying with regulatory requirements from the EPA, and Washington State Department of Ecology (DOE) - all within the financial limitations of the Fund.

The City negotiated a Consent Decree between the City, the EPA, and the DOJ for compliance with the CWA and State regulations. The Consent Decree was entered in court on July 3, 2013 and includes deadlines for development and implementation of the LTCP and will drive spending in the CSO Reduction Program over the next several years. The Consent Decree also includes requirements to implement a Capacity Management, Operations and Maintenance (CMOM) Program, which drives operations and maintenance spending and CIP spending in the Rehabilitation Program. Additionally, an NPDES permit for stormwater includes requirements to help protect local waterways and the Puget Sound from damaging pollutants and excessive runoff. This increased regulatory emphasis on protecting and improving water quality has resulted in the need for the City to make substantial investments in detention, water quality treatment (e.g., GSI), CSO retrofits, pipe and pump station rehabilitation, and inflow/infiltration reduction.

- Detention: This focuses on storing stormwater and/or sewage during a rainfall event and can be accomplished through detention ponds (for stormwater), GSI (for stormwater) or underground tanks or tunnels (for both wastewater and stormwater). Detention can be added to the drainage system to offset the impacts of larger storms that overwhelm the conveyance capacity of the combined sewer system and can result in backups of sewage, localized flooding and releases of untreated sewage.
- Water Quality Treatment: This focuses on removing pollutants and can be accomplished through GSI or the use of technology such as specialized media filters. GSI is the use of green solutions to help reduce untreated overflows by allowing stormwater to infiltrate slowly into the ground, cutting the volume of stormwater entering the system, and providing water quality treatment through natural processes as the polluted runoff comes in contact with the soil and vegetation. The use of GSI is required as part of development through Seattle's NPDES permit and Stormwater Code.
- CSO Retrofits: This focuses on optimizing the existing collection, pumping and storage systems, using low-cost repairs and modifications to reduce overflows to waterways.
- Pipe and Pump Station Rehabilitation: This consists of repairing, rehabilitating, or replacing existing gravity sewer pipes, wastewater pump stations, and/or force mains that have deficiencies or have reached the end of their useful life.
- Inflow/Infiltration Reduction: This focuses on filling in cracks in sewer lines that allow groundwater to enter the system. It also addresses parts of the system where there are direct stormwater connections to the sanitary sewer system which can/should be directed to a

SPU – Drainage and Wastewater

separated stormwater system. By reducing inflow/infiltration, it is possible to reduce the frequency and volume of SSOs and sewer backups.

Other challenges DWF faces in meeting its obligations:

- 1) Addressing public expectations: it is challenging to address public expectations around our basic service level programs, such as flooding and system capacity. The funding for these programs is below the program need, but unable to be increased at this time due to the demand on our budget from our regulatory requirements. The separated drainage and wastewater systems are at capacity during storm events, or lacking the fundamental infrastructure at various locations across the City. The impacts can range from very serious (basement sewer back-ups) to nuisance (limited street or yard flooding) issues.
- 2) Construction Costs: due to market conditions and building large infrastructure in dense urban areas costs to construct drainage and wastewater infrastructure have increased significantly putting additional pressure on the portfolio.

Future Projects/What is on the Horizon

Over the next 10 years the DWF CIP will be driven largely by regulatory requirements, major transportation projects, and Operations Crew Facilities. Major projects include the completion of the Ship Canal Water Quality Project, sediment remediation, and other projects necessary under the LTCP/Plan to Protect Seattle's Waterways, and localized flooding reduction in Broadview, and flood reduction and water quality improvements in South Park.

SPU is moving forward with a comprehensive planning effort, the Integrated System Plan, to better identify the highest priority locations and potential funding and financing strategies. The Integrated System Plan will be a 50-year plan for managing and improving Seattle's drainage and wastewater systems. Through this planning effort, SPU will identify the partnerships, programs, and projects that will improve the performance and resilience of our drainage and wastewater systems while optimizing social and environmental co-benefits for the City. We are developing our plan through technical analysis, robust community engagement and an integrated approach to planning. By the end of 2022, SPU will have near- and long-term plans for drainage and wastewater programs, partnerships, and infrastructure investments over the next 50 years. This planning is part of building a better Seattle by providing drainage and wastewater services that are affordable, safe, green, and just in a climate uncertain future.

Creek Culvert Replacement Program

Project No:	MC-SU-C3314	BSL Code:	BC-SU-C333B
Project Type:	Ongoing	BSL Name:	Protection of Beneficial Uses
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides for the repair and replacement of stream culverts that are part of SPU's critical drainage infrastructure. Culverts are prioritized for repair or replacement based on structural condition. Projects are then sequenced based on prioritization and other factors such as readiness to proceed, ability to address other drainage needs (e.g., flooding, maintenance), potential partnerships, synergies with other projects and availability of funding.

GSI for Protection of Beneficial Uses

Project No:	MC-SU-C3316	BSL Code:	BC-SU-C333B
Project Type:	Ongoing	BSL Name:	Protection of Beneficial Uses
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides construction of Green Stormwater Infrastructure (GSI) within the separated stormwater system. Work includes right-of-way retrofits with bioretention and/or biofiltration for water quality treatment and flow control, as well as potential expansion of private property incentives for construction of properly sized and installed rain gardens or cisterns (RainWise program) into creek watersheds. The Natural Drainage Systems Projects within this program will achieve the water quality goals for the NDS Partnering Program identified in Seattle’s Plan to Protect Seattle’s Waterways (the Long Term Control Plan requirement within our Consent Decree) while coordinating with SDOT and community groups to deliver co-benefits such as sidewalks. The program also includes projects that are part of the SPU and Council created GSI in Urban Villages Program which will deliver multi-purpose green infrastructure projects in urban villages and urban centers through community partnerships and development synergies.

This ongoing project develops drainage related projects to improve the water quality, stream function and habitat in the streams and receiving waters of Seattle. Projects include stream and habitat restoration to reduce flooding, culvert repair and replacements to protect public safety, and green stormwater infrastructure projects to address flooding and control and clean runoff to streams.

Sediment Remediation

Project No:	MC-SU-C3503	BSL Code:	BC-SU-C350B
Project Type:	Ongoing	BSL Name:	Sediments
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing program provides for City of Seattle participation in cleanup of contaminated sediment sites at multiple locations across Seattle for which the City's drainage and wastewater utilities may have some liability. Typical phases of such projects include preliminary studies and analyses, preliminary engineering for actual cleanup efforts, and liability allocation negotiations. This program enhances the natural environment of Seattle and addresses both State and Federal regulatory agency requirements.

Long Term Control Plan

Project No:	MC-SU-C3604	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project supports the ongoing implementation of SPU's Combined Sewer Overflow (CSO) Reduction Long Term Control Plan (LTCP) in accordance with SPU's National Pollutant Discharge Elimination System (NPDES) permit and the Federal CSO Control Policy. On May 1, 2012, the Environmental Protection Agency/Department of Justice issued a draft Consent Decree to the City of Seattle which requires the development and submission of a Long-Term Control Plan for approval by May 30, 2015. It further stipulates that all CSO Control Measures are to be constructed as expeditiously as practicable, and in no event later than December 31, 2030. The Consent Decree also allows the City to propose storm water control project(s) as part of an Integrated Plan, in addition to the CSO Control Measures. The LTCP identified projects and programs to reduce the number and volume of CSOs, meet receiving water quality standards, and protect designated beneficial uses. The LTCP includes flow characterization, monitoring, and hydraulic modeling; development of CSO control alternatives; development of control alternatives that takes into consideration costs and performance; operational plan revisions; public participation; implementation schedule; and post-construction monitoring.

S Henderson CSO Storage

Project No:	MC-SU-C3609	BSL Code:	BC-SU-C360B
Project Type:	Discrete	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	S Henderson St.
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 2
Start/End Date:	2001 - 2019	Neighborhood District:	Southeast
Total Project Cost:	\$59,557	Urban Village:	Not in an Urban Village

This project provides construction of combined sewer overflows (CSO) facilities in the Henderson area in the southeast part of Seattle. Facilities will be built to meet level of service requirements for CSOs and comply with State and Federal regulations.

Green Stormwater Infrastructure Program

Project No:	MC-SU-C3610	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides construction of Green Stormwater Infrastructure (GSI) as a component of combined sewer overflow (CSO) reduction within the uncontrolled CSO basins. Work includes roadside bioretention and the RainWise program. RainWise provides financial incentives to private property owners within our uncontrolled CSO basins for construction of properly sized and installed raingardens or cisterns. The program supports the City's current regulatory strategy for compliance with CSO National Pollutant Discharge Elimination System (NPDES) permit.

CSO Facility Retrofit

Project No:	MC-SU-C3611	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project retrofits, upgrades, and modifies existing Combined Sewer Overflows (CSO) reduction facilities in Seattle CSO basins. Retrofit projects cost-effectively optimize and maximize existing system operation to minimize CSOs to the greatest extent possible, reducing long term CSO storage needs. This project assists in achieving State Department of Ecology's requirement of an average of no more than one CSO event per outfall per year.

Total Project Cost:	N/A	Urban Village:	Multiple

This project is for future combined sewer overflow (CSO) reduction projects that will be identified through the CSO Long-Term Control Plan (LTCP) Update. Future projects are most likely to include underground storage projects, wastewater lift station improvements, and/or wastewater conveyance system improvements. Planning for the projects began in 2018, and the projects should complete their construction by 2030.

Ship Canal Water Quality Project

Project No:	MC-SU-C3614	BSL Code:	BC-SU-C360B
Project Type:	Discrete	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	West Ship Canal
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2014 - 2027	Neighborhood District:	Multiple
Total Project Cost:	\$570,000	Urban Village:	Multiple

The City of Seattle (the City) has prepared a comprehensive strategy, called The Plan to Protect Seattle's Waterways (the Plan) to reduce overflows and discharge of pollutants from combined sewers and the storm drain system. The City must control sewer discharges to protect public health, the environment, to comply with the Clean Water Act, the United States District Court Consent Decree, and State regulations. On May 29, 2015, the City submitted the plan to EPA and Ecology for approval. The largest project identified in the Plan is the Ship Canal Water Quality Project. This project is a joint project between SPU and King County to design and construct a storage tunnel to capture Combined Sewer Overflows for 5 SPU outfalls and two King County outfalls. The tunnel will be 2.7 miles long and run from Wallingford to Ballard. The tunnel will be approximately 18 feet in diameter and have a storage volume of about 30 million gallons. The purpose of the project is to bring all seven outfalls into compliance with the State's control standard of one untreated overflow per year per outfall on a 20-year moving average. Note all City/County funding allocations are for informational purposes, only. Actual resource allocations will be determined through ongoing project governance agreements and interagency coordination between the City and King County.

Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides for improvements and upgrades to the 68 SPU-owned wastewater pump stations and force mains. Typical improvements may include, but are not limited to, replacement of existing pump station assets including pumps, motors, and valves, and installation of new assets such as SCADA systems, generators, and emergency plugs. This project enhances and extends the useful life of the existing pump stations which protects water quality.

Total Project Cost:	N/A	Urban Village:	Multiple

SPU operates and maintains approximately 1,423 miles of wastewater conveyance (combined and separated) pipe. The age of this infrastructure varies; however, significant portions of the system were constructed prior to 1950. This ongoing program repairs, replaces, rehabilitates and renews the conveyance system by SPU crews and various contracting construction projects.

Sanitary Sewer Overflow Capacity

Project No:	MC-SU-C3804	BSL Code:	BC-SU-C380B
Project Type:	Ongoing	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program is designed to improve sanitary sewer service to Seattle customers by addressing current and projected capacity limitations of the wastewater system through capital project improvements. Such improvements may include demand management measures such as infiltration and inflow (I/I) reduction, increased conveyance capacity, and individual customer measures such as installation of backflow preventers or grinder pumps to reduce the risk that customers will experience backups of sewage into their homes and businesses during storm events.

South Park Stormwater Program

Project No:	MC-SU-C3806	BSL Code:	BC-SU-C380B
Project Type:	Discrete	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	698 S Riverside DR
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2006 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$134,876	Urban Village:	Greater Duwamish

This program constructs a pump station (PS), a water quality facility (WQF), and additional drainage conveyance in South Park. The PS will allow the existing storm drain outfall to drain the system when the tide is high and will support future drainage projects. The WQF will treat most stormwater flows from the basin, reducing pollutant loading to the Duwamish. Excessive flows will bypass the WQF and be pumped directly to the river. This program was formerly titled "South Park Pump Station."

Project Category:	Improved Facility	Location:	Thornton Creek
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2008 - 2019	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$7,907	Urban Village:	Not in an Urban Village

This project provides creek realignment, floodplain excavation, culvert replacement, and riparian plantings at the confluence of the north and south branches of Thornton Creek. SPU has acquired a number of flood prone properties in this area over the last decade. Using these properties, this project increases culvert capacity, floodplain area and flood storage, and provides stream habitat benefits. The project will help alleviate flooding and reduce maintenance at Meadowbrook Pond.

Broadview Long-Term Plan

Project No:	MC-SU-C3812	BSL Code:	BC-SU-C380B
Project Type:	Ongoing	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	Broadview
Current Project Stage:	N/A	Council District:	Council District 5
Start/End Date:	N/A	Neighborhood District:	Northwest
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

The Broadview Long-Term Plan had been an ongoing program to address longstanding drainage and wastewater problems. The current funded capital project within that program is the 12th Avenue NW Drainage Basin project, which addresses public and private flooding problems in that area by providing stormwater detention and green infrastructure.

Seattle Public Utilities

Solid Waste

Overview

Seattle Public Utilities (SPU) collects and disposes of solid waste generated within the City of Seattle. To fulfill this responsibility, the City owns and manages the following significant infrastructure:

- two transfer stations;
- one recycling and re-use facility;
- two household hazardous waste facilities;
- a fleet of trucks and heavy equipment; and
- three closed landfills previously used by the City.

The Solid Waste Fund (SWF) Capital Improvement Plan (CIP) is the planning tool for rehabilitating, replacing, improving, and expanding infrastructure, as well as constructing projects that protect, conserve, and enhance our region's environmental resources. Planned spending in the SWF CIP is approximately \$95 million over the next six years, from 2020 through 2025.

Major anticipated projects include:

- constructing a recycling/re-use facility at the South Recycling Center at or adjacent to the South Transfer Station (this was previously called South Transfer Station Phase 2 or STS2) (2015-2021); and
- cleanup of the historic South Park Landfill (2015-2021) at the South Park Development Project.

These projects comprise approximately 62% of the SWF CIP. Other significant projects include the Waste Removal project at the Midway Landfill, replacing two compactors, and SPU's annual equipment investment.

Thematic Priorities

The SWF places a high priority on managing environmental issues and addressing regulatory requirements related to current and historic solid waste facilities while protecting employees and customer health and safety.

- Managing environmental issues and regulations: SPU is required to improve former landfill sites and act as necessary when conditions change. For example, underground gas levels at these sites are monitored. When increasing gas levels are detected, SPU implements improvements to extract the excess gas or otherwise mitigate the environmental impacts of the gas increase. Landfill projects are also triggered by Washington State Department of Transportation improvements to Interstate-5 that require modification to landfill infrastructure in the right-of-way and support of Sound Transit projects that impact the Midway Landfill. Additionally, the new transfer stations are designed to reduce the environmental impacts of the existing stations on neighboring communities.

Project Selection Criteria

SPU identifies candidate capital projects from several sources – planning (e.g., comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events. Under SPU's Asset Management System, projects must be justified through a business case process that

establishes that a problem or opportunity is timely and important and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental, and social) of life-cycle benefits and costs. The process also recognizes that a project may be a “must do” project (e.g. required by regulations).

Prioritization of SPU projects are based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which the project is driven by Federal, State, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the South Park Development project and Kent Highlands and Midway Landfills programs.
- **External Drivers:** SPU’s responsiveness to, or engagement with, the projects of other departments or jurisdictions, and the specific mandates of the City Council and Mayor. An examples of a project in this category is the 1% for Arts program.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. An example of a highly ranked project in this category is the South Recycling Center project.
- **Level of Service:** The importance of this project in providing or improving services to customers. An examples of a highly ranked project in this category is the South Recycling Center project.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits that were not otherwise recognized, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, or outside funding.

Every project is rated against each criterion. Criteria are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each LOB, with reviews by key internal stakeholders. The ranking scheme and criteria are the same for all LOBs and are approved by the SPU General Manager/CEO and Asset Management Committee. Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects at the margin will be included, excluded or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

CIP Highlights

2020-2025 Proposed Water Fund CIP by BCL

(In '000s; total may not sum due to rounding)

BCL	2020	2021	2022	2023	2024	2025	Total
New Facilities	18,442	24,398	9,760	6,607	553	312	60,072
Rehabilitation & Heavy Eqpt	8,390	1,245	675	550	525	450	11,835
Shared Cost Projects	2,317	1,562	3,276	1,939	2,320	1,582	12,996
Technology	1,710	1,865	1,508	1,508	1,508	1,508	9,604
Total	30,859	29,069	15,219	10,603	4,905	3,852	94,507

New Facilities: This program includes the planning, design, and construction of new facilities to enhance solid waste operations. In 2020, SPU will continue to implement its Solid Waste Facilities Master Plan. The key project drivers of the New Facilities budget are the South Recycling Center and South Park Development projects.

Rehabilitation and Heavy Equipment: This program includes design and construction of projects that repair and/or upgrade solid waste facilities other than the transfer stations. The key drivers of this budget level are the Midway project and new funding for the Solid Waste Comprehensive Plan Update as required by the Washington State Department of Ecology.

Shared Cost Projects: This program includes individual capital improvement projects that typically benefit multiple Lines of Business (LOB) (e.g. the Water LOB and the Drainage and Wastewater LOB) and which costs are "shared," or paid for by more than one of SPU's utility funds. Key driver for this budget includes heavy equipment purchases, which reflects the best estimate of the required fleet of trucks and heavy equipment for the transfer stations.

Technology: The Technology CIP is managed in six program areas that provide a department-wide view of technology investments to address SPU's strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing;
- Enterprise Information Management;
- IT Infrastructure;
- Project Delivery & Performance;
- Science & System Performance; and
- Asset Information Management.

Investments in 2020 address several of SPU’s key initiatives, including:

- Financial Management and Internal Controls;
- Operational Excellence and Performance Management;
- An Easy and Engaged Customer Experience;
- Data-driven Decision Support; and
- Project Delivery/Project Controls.

In 2020, SPU will continue focusing its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the New Customer Information System (CIS) already in place, the next major projects for SPU within the Customer Contact and Billing Program include the Utilities Customer Self-Service Portal project, the Customer Contact and Billing Upgrade, CIS Workflow, and the CIS Reporting. Other projects slated would be enhancements to SPU’s Enterprise Project Management System and the Development Systems Integration project, and the Maximo Business Intelligence upgrade along with other projects that have been deferred in previous years.

CIP Revenue Sources

Much of the SWF CIP is funded through bond proceeds and current cash contributions, the mix of which is determined by SWF financial policies, the overall financial health of the SWF, and the best value and equity to ratepayers. SPU issued debt in 2014, 2015, and 2016. SPU is not planning any SWF bond issuances until after 2022 and will use current cash contributions and existing cash on hand to pay for the CIP. Cash contributions to construction and repayment of debt come from rate-based charges to customers whose solid waste services are handled by the City’s solid waste infrastructure and programs.

SPU also actively seeks grants, low-interest loans, and other funding sources whenever possible and prudent. The Solid Waste Utility is currently in the middle of a capital-intensive historic landfill remediation process and the South Recycling Center project. These projects are the primary drivers of CIP spending and have required rate increases for financing.

Summary of Upcoming Budget Issues and Challenges

Solid Waste faces logistical and financial issues as it reconstructs its primary facilities and addresses site cleanup efforts.

- Logistics: SWF is focusing on developing the South Recycling Center and must continue to use the site for trailer parking and household hazardous waste collection during construction.
- Financial Challenges: Developing the South Recycling Center along with site remediation efforts puts considerable short-term financial strain on the SWF. While the SWF is funding and building these major projects, it is working to address environmental stewardship by encouraging waste reduction and recycling, which results in declining demand for services.

Future Projects/What is on the Horizon

Once the South Recycling Center is completed, the core SWF CIP is expected to approximate lower spending levels. General SWF CIP spending will return to between \$5 and \$10 million annually after this project is completed, compared to a high of \$25 million planned for 2022.

Once the South Recycling Center is completed, annual costs for repairs and upkeep are projected to decrease initially and then increase as equipment replacement/renewal projects are required. Part of the project scope is to retain enough space to take advantage for future technologies and innovations, and possibly construct a Material Recovery Facility or some other waste reduction or recovery facility in the future to increase the recycling rate and help SPU achieve its environmental goals.

South Recycling Center

Project No:	MC-SU-C2302	BSL Code:	BC-SU-C230B
Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	8100 2nd AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2006 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$43,202	Urban Village:	Greater Duwamish

This project transforms the existing South Recycling and Disposal Station to a recycling and reuse area. The existing transfer station building and associated facilities will be demolished and replaced with new recycling facilities, a reuse facility, parking and storage area for transfer trailers, and other solid waste facilities.

Miscellaneous Station Improvement

Project No:	MC-SU-C2303	BSL Code:	BC-SU-C230B
Project Type:	Ongoing	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides modifications, upgrades and wear replacement for the two new City Transfer Stations. The new facilities will require periodic capital upgrades and replacement to extend the useful life of these assets. Examples of this work include improvements to the South Transfer Station (STS) wheelwash and floor drain system to meet regulatory requirements and replacement of the wear surface on the STS tipping floor or modifications to optimize the NTS facility.

Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	8100 2nd Ave S
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2007 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$22,377	Urban Village:	Greater Duwamish

This project studies, plans, designs and constructs remediation of the historic South Park Landfill site to minimize environmental impacts. SPU owns a portion of the site on which the landfill once operated, and was a historic operator of the landfill at one time. This project will meet the requirements of a Washington Department of Ecology Agreed Order for study of and cleanup planning for the historic South Park Landfill.

North Transfer Station Rebuild

Project No:	MC-SU-C2306	BSL Code:	BC-SU-C230B
Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	N. 34th St.
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 4
Start/End Date:		Neighborhood District:	Lake Union
Total Project Cost:	\$111,015	Urban Village:	Not in an Urban Village

The project constructs a new North Recycling and Disposal Station to replace the existing, aging facility. The new facility will meet customer and employee needs, regulatory requirements, and waste management goals for at least the next 50 years. Safety, operational, and capacity concerns at the existing transfer station necessitate building a new facility. The new facility will benefit the public by providing reliable transfer of solid waste from the City and preventing the accumulation of waste and unsanitary conditions within the City.

Kent Highlands

Project No:	MC-SU-C2402	BSL Code:	BC-SU-C240B
Project Type:	Ongoing	BSL Name:	Rehabilitation & Heavy Equipment
Project Category:	Improved Facility	Location:	Kent Highlands
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program funds compliance activities related to the Kent Highlands landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Kent Highlands landfill closure project, as well as various landfill improvements. The environmental and feasibility studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The landfill improvements include replacement of existing flares, drainage improvements, groundwater protection and water treatment.

Resources	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total

Midway Landfill

Project No:	MC-SU-C2403	BSL Code:	BC-SU-C240B
Project Type:	Ongoing	BSL Name:	Rehabilitation & Heavy Equipment
Project Category:	Improved Facility	Location:	Kent
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program funds compliance activities related to the Midway landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Midway landfill closure project. The studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The flare improvements are also a regulatory requirement. To ensure that SPU maintains regulatory compliance, a smaller flare or new technology will be required. The current telemetry used to monitor the environmental control systems at the Kent Highlands Landfill and the Midway Landfill, both Superfund sites, are nearly obsolete and the equipment is no longer supported. In addition, the current system only transmits alarm conditions and does not have any data acquisition functionality. This program funds a replacement system that will allow remote data acquisition as well as alarm functionality.

Seattle Public Utilities

Water

Overview

Seattle Public Utilities (SPU) delivers an average of approximately 122 million gallons of drinking water per day to 1.5 million people and businesses in Seattle and 18 surrounding cities and water districts, plus the Cascade Water Alliance. The water system infrastructure includes:

- the Cedar and South Fork Tolt supply sources;
- three groundwater wells;
- two primary water treatment plants;
- 11 booster chlorination facilities;
- 327 million gallons of treated water storage;
- 31 pump stations;
- approximately 1,900 miles of transmission and distribution system pipelines;
- almost 200,000 meters and service connections;
- more than 21,000 distribution system valves;
- about 18,000 hydrants;
- monitoring and control systems; and
- various buildings and other related facilities.

In addition to replacing and improving the supply, treatment, transmission and distribution systems, the capital program includes investments in watershed stewardship projects, Cedar River Watershed Habitat Conservation Plan implementation, water conservation programs, vehicles, heavy equipment, and technology.

Planned spending in the Water Capital Improvement Program (CIP) is \$682 million over the next six years. Major projects include:

- water system improvements associated with transportation projects, including Move Seattle, Center City Streetcar, Lander Street Grade Separation project, East Marginal Way Heavy Haul Corridor project, and Madison Bus Rapid Transit project;
- operational and regional facility construction;
- replacement of the Bitter Lake and Lake Forest Park Reservoirs floating covers; and
- addressing a slide area through which the Tolt Pipelines pass, upstream of the Tolt Treatment Plant.

The 2020-2025 Proposed CIP also includes many ongoing programs, such as improving the distribution and transmission system water mains, valves, steel storage tanks, and pump stations; watershed stewardship and conservation projects and programs; and facilities, vehicles, and heavy equipment investments. In addition, it includes initial funding for a water system seismic improvement program stemming from the recent completion of SPU's water system seismic study.

SPU funds Water capital projects through a combination of cash and issuance of bonds. The primary source of cash and debt repayment funds come from sale of water charged to retail and wholesale customers in the region. SPU is also in the final review and approval stages of its Water System Plan 2019, a Washington Department of Health (WDOH) regulatory requirement. This Water System Plan for 2019 will include many elements as well as providing plans for SPU's capital needs for the next 20 years.

Thematic Priorities

The overarching goal of the Water CIP is to ensure that the water system is properly maintained, upgraded, and expanded to reliably deliver high-quality, safe drinking water to customers, protect the environment, and comply with regulations. The primary themes driving the CIP in the next six years are asset preservation, health and human safety, environmental sustainability, and race and social justice.

- SPU is committed to making **asset preservation** investments to create or enhance operational efficiency. SPU uses asset management principles to determine the timing of rehabilitation or replacement of its infrastructure. Projects that fall into this category vary, ranging from water main replacement related to transportation projects to rehabilitation of steel storage facilities.
- SPU’s commitment to **health and human safety** is also addressed through SPU’s reservoir covering projects. Consistent with Ordinance 120899 and required by state regulators, SPU has finished replacing its open finished drinking water reservoirs with underground structures that will improve water quality and system security. Additionally, SPU will begin constructing new covers on the Lake Forest Park and Bitter Lake reservoirs to replace the existing floating covers that will have reached the end of their useful life. Finally, as a result of a recently completed seismic study, two reservoirs will remain uncovered – Roosevelt and Volunteer – and are disconnected from the drinking water system, filled with treated water and available for emergency storage needs after major emergencies such as earthquakes.
- SPU is committed to **environmental sustainability**. This can best be seen in SPU’s responsibilities as outlined in the 50-year Habitat Conservation Plan (HCP), an agreement between local, state and federal agencies. The HCP seeks to ensure the long-term ecological integrity of the Cedar River Watershed, which supplies the majority of the City’s drinking water. It simultaneously addresses the needs of protected wildlife species in and along the Cedar River. Investments in the regional conservation and low-income conservation programs also help in management of our natural resources, while helping customers reduce their utility bills.
- SPU is also committed to **race and social justice**. One example of this commitment is the Low-Income Water Conservation Program. This ongoing program provides water use efficiency resources to the City’s low-income customers to implement water conservation measures. Typical improvements consist of installing water-efficient fixtures, primarily low water use toilets, but also faucet aerators and common-area efficient clothes washers.

Project Selection Criteria

SPU identifies candidate capital projects from several sources – planning (e.g. comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events. Under SPU’s Asset Management system, projects must be justified through a business case process that establishes that a problem or opportunity is timely and important, and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental and social) of life cycle costs and benefits. The process also recognizes that a project may be a “must do” project (e.g. required by regulation).

SPU prioritizes its capital projects into three categories – Priorities 1, 2 and 3, with 1 being the most important and critical. Some projects are part of an externally driven project. Typically, SPU lacks control over the timing of externally driven projects.

Priority rankings are based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which a project is driven by federal, state, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the reservoir covering programs and the Habitat Conservation Program.
- **External Drivers:** SPU’s responsiveness to, or engagement with, projects of other Departments or Jurisdictions, and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include the Alaskan Way Viaduct and Mercer Corridor projects.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Watermain Rehabilitation, Distribution System Improvements and Tank Improvements programs.
- **Level of Service:** The importance of a project in providing or improving services to customers. Examples of highly ranked projects in this category include the Water Infrastructure – New Taps and Service Renewals programs.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits not otherwise captured, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, outside funding.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each Line of Business (LOB), with review by key internal stakeholders. The ranking scheme and criteria are the same for all LOBs and are approved by the SPU GM/CEO and Asset Management Committee. Project priority rankings are used to clarify and document which projects are most important (and why), to help determine which projects at the margin will be included or excluded (or deferred) from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

CIP Spending by Major Category

2020-2025 Proposed Water Fund CIP by BCL
(In '000s; total may not sum due to rounding)

BCL	2020	2021	2022	2023	2024	2025	Total
Distribution	34,137	33,578	31,518	30,205	46,402	50,002	225,842
Transmission	15,612	16,071	4,878	7,131	5,206	18,187	67,085
Watershed Stewardship	1,290	594	65	75	175	175	2,374
Water Quality & Treatment	9,525	7,210	13,750	21,600	9,100	3,000	64,185
Water Resources	8,464	12,674	4,350	4,535	2,758	2,222	35,004
Habitat Conservation Program	3,488	2,815	1,841	2,115	1,195	1,004	12,459
Shared Cost Projects	37,740	42,067	60,533	26,234	45,063	37,291	248,929
Technology	5,271	4,685	4,244	4,244	4,244	4,244	26,930
Total	115,527	119,695	121,178	96,140	114,142	116,126	682,807

Distribution: Projects and programs in this category relate to rehabilitation and improvements to the City's water mains and appurtenances, water storage tanks, pump stations, and other facilities that are part of the system that distributes treated water throughout the City of Seattle and to retail customers outside of the City.

Decreases in the **Distribution BCL** in 2020 are primarily due to a decrease in new taps and delay of pump stations improvement to outyears. It is offset by increased costs for SW Spokane Street water main rehabilitation and other water main rehabilitation projects at multiple worksites across the city. Additionally, revised cost estimates based on more detailed analysis have been generated for interior/exterior recoating and safety upgrades to the Beverly Park elevated tank.

Transmission: The purpose of this program category is to rehabilitate and improve the City's large transmission pipelines that bring untreated water to the treatment facilities and convey treated water from the treatment facilities to Seattle and to other local utilities that purchase a portion of SPU's supply for their customers.

Increases in the **Transmission BCL** in 2020 are primarily due to the initiation of the new transmission system seismic improvements program.

Watershed Stewardship: Projects and programs in this category improve protection of our sources of drinking water, provide habitat protection and restoration, sustain the environment, and enhance environmental quality, both locally and regionally. Most of the projects in this program category are located within the Cedar and Tolt River municipal watersheds.

- The Cedar River Municipal Watershed is 90,638 acres of land owned by the City of Seattle and provides about 65% of the drinking water used by 1.5 million people in the greater Seattle area supplied by SPU. The City of Seattle is required by law to maintain a clean drinking water supply. To that end, the City restricts public access and management is guided by a Habitat Conservation Plan. The Cedar River Watershed is an unfiltered surface water supply which produces some of the best water in the world.
- The South Fork Tolt River Watershed is the second supply watershed in SPU’s freshwater supply system. Located in the foothills of the Cascades in east King County, it first came on-line in 1964, and since 1989 has also supported a small Seattle City Light hydro-electric facility. The Tolt Treatment Facilities, which includes filtration, can provide up to 120 million gallons of drinking water per day.

Increases in the **Watershed Stewardship BCL** due to the delay of the Taylor Creek Trestle and Bridge construction project by one construction season. This project was previously scheduled for construction in 2019. The project is being delayed in hopes of receiving favorable bids well in advance of construction and due to a shortfall in staffing resources. The diminished condition of both the trestle and the 9 Road bridge has created a potentially unsafe working environment and could compromise emergency response required as part of management of the City’s drinking water supply and fish habitat. The removal of the trestle and replacement of the 9 Road bridge will increase emergency response, safety, water quality, fish habitat, large woody debris movement into the Cedar system and provide a main haul route for transportation of larger loads across the lower watershed.

Water Quality and Treatment: The purpose of this program category is to construct, rehabilitate or improve water treatment facilities, and cover the remaining open water reservoirs. State and federal drinking water regulations and public health protection are key drivers of investments in this program category. To comply with regulations, SPU has invested hundreds of millions of dollars in building two new primary treatment facilities and covering two and burying five reservoirs that contain already treated water that is distributed directly to Seattle retail and wholesale customers for drinking purposes.

The shift in the **Water Quality & Treatment BCL** due to an updated cashflow projection for the Lake Forest Park Reservoir Covering Project. The plan is for another floating cover instead of the aluminum roof previously considered. Construction of the replacement of the Lake Forest Park Reservoir cover is anticipated to start in 2020. Bitter Lake Reservoir cover replacement is anticipated to start in 2022 - 2024.

Water Resources: The purpose of this program category is to manage our water resources to meet anticipated demands and in-stream flow requirements – the amount of water provided to the river to support aquatic habitat, wetlands, riparian vegetation, and water quality – and to promote residential and commercial water conservation. The requirements for in-stream flows are detailed in agreements with state and federal agencies and include provisions for minimum stream flows in the Cedar and South Fork Tolt Rivers. Examples of the types of projects in this category include the Dam Safety Program and Sockeye Broodstock Weir and other improvements associated with the hatchery and fish ladder.

Increases in the **Water Resources BCL** in 2020 are due to increased costs of Tolt Valve 15 replacement, an upgrade required by the Federal Energy Regulatory Commission (FERC).

Habitat Conservation Program: This program category includes projects and programs directly related to implementation of the Cedar River Watershed Habitat Conservation Plan. The Habitat Conservation Plan benefits the utility and the ratepayers it serves by providing legal certainty under the Endangered Species Act for the City’s continued operations within the Cedar River Watershed, which supplies 65% of the SPU’s drinking water. The Habitat Conservation Program requires SPU to invest \$100 million over 50 years, with \$60 million in the first decade, on approximately 30 capital projects and 60 O&M activities in three areas: management of in-stream flows for people and fish, forest and land conservation activities, and mitigation for the blockage of salmon and steelhead fish as they return to the Cedar River to spawn. The Water Fund’s CIP projects in this area are grouped into eight categories: road improvements and decommissioning, stream and riparian restoration, upland forest restoration, Landsburg fish passage, Cedar River sockeye hatchery, improvements to the Ballard Locks for fish passage and water conservation, fish habitat protection and restoration in the lower Cedar River below the municipal watershed boundary, and evaluation of Cedar permanent dead storage in Chester Morse Lake.

Increases in 2020 in the **Habitat Conservation Program BCL** are due to the Downstream Fish Habitat program. These funds will be expended on land acquisition and restoration to improve salmon habitat as part of the City’s Cedar River Habitat Conservation Program commitments. A portion of this amount may be grant funded. Also, there is an increase of \$1.7M in 2020-2023 for Streams and Riparian Restoration that replaces old culverts with new culverts or small bridges to provide improved fish passage.

Shared Cost Projects: This program includes individual capital improvement projects which typically benefit multiple lines of business (e.g. the water line of business and the drainage and wastewater line of business) and whose costs are "shared," or paid for, by more than one of SPU's utility funds. For the next six years, the Shared Cost program includes funding for several interdepartmental programs and projects including Move Seattle, Alaskan Way Viaduct and Seawall Replacement. Funding is also included for SPU’s Heavy Equipment Purchases and several smaller projects.

The **Shared Cost Projects BCL** increases in 2020 is primarily due to the Cedar Falls Facility Improvement projects and Spoil Yard Property Purchase project, accelerating projects forward.

Technology: The Technology capital portfolio is managed in six program areas, which provide a department-wide view of technology investments to address SPU’s strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing;
- Enterprise Information Management;
- IT Infrastructure;
- Project Delivery & Performance;
- Science & System Performance; and
- Asset Information Management.

Investments in 2020 address several of SPU’s key initiatives, including:

- Financial Management and Internal Controls;

- Operational Excellence and Performance Management;
- An Easy and Engaged Customer Experience;
- Data-driven Decision Support; and
- Project Delivery/Project Controls.

In 2020, SPU will focus its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the New Customer Information System already in place, the next major projects for SPU within the Customer Contact and Billing Program would be the Utilities CSS Portal project as well as other projects such as CIS Workflow and the CIS Reporting. Other projects slated would be enhancements to SPU's Enterprise Project Management System (EPMS) as well as the Development Systems Integration project, along with other projects that have been deferred in previous years

CIP Revenue Sources

SPU's Water CIP is funded largely by Water ratepayers. About 68% of the Water Fund's operating revenues come from retail ratepayers, split approximately evenly between residential and commercial customers. Another 24% of the Water Fund's overall revenues come from wholesale purveyors who serve surrounding jurisdictions. The remaining 8% consists of non-rate revenue, which include such items as tap fees received. SPU issues bonds, serviced by ratepayers, which in the current period covers 31% of the CIP, with the remainder funded by cash, i.e.: directly by ratepayer revenue.

SPU actively seeks grants, low interest loans, and other funding sources whenever possible. And, as mentioned above, SPU also receives payments from developers that are intended to offset the cost of installing new taps when they connect newly constructed buildings to SPU watermain. These "tap fees" are a volatile revenue source, trending with the construction-related sectors of the economy.

Summary of Upcoming Budget Issues and Challenges

These important issues create financial challenges and opportunities for the Water Fund in the future.

Water Conservation: The City of Seattle, Seattle residents and businesses, and Seattle's wholesale water partners have worked together to reduce water consumption. As a result, consumption has declined since the 1980's and is projected to flatten out. In 2018, consumption was 30% below the peak of 1984, despite serving a larger population. Seattle currently has some of the lowest per capita water consumption in the nation. While this accomplishment helps contribute to a sustainable future for the region, it puts financial pressure on the utility because fixed costs, including the costs of the CIP, need to be distributed across fewer units of water sold. This trend also puts pressure on SPU management and employees to deliver services as efficiently as possible. In the future, it may also influence water rate design.

Transitioning from Major Projects toward Asset Management: The Water Fund is transitioning from a period of building large capital projects, in response to regulatory requirements, to a time of physical infrastructure rehabilitation. Past investments include water treatment facilities for the Tolt and Cedar water supplies, coverings for seven open reservoirs in response to federal/state regulations, construction of a second pipeline for the Tolt system, and investments to meet federal requirements embodied in the Cedar River Watershed Habitat Conservation Plan. These investments helped secure the supply and distribution of high-quality drinking water and provide appropriate stewardship of the watersheds

consistent with federal and state requirements.

The City of Seattle is now better positioned than many water utilities in the nation in terms of regulatory compliance. Residents, businesses and rate payers will benefit from these investments for years to come. Although the focus will shift from major projects to physical infrastructure rehabilitation, the utility will be paying debt service over the next several budget cycles on the bonds that were issued for these major projects. Against the backdrop of these trends, the 2020-2025 Water CIP has been developed to:

- provide for water system modifications associated with various Seattle and regional transportation projects;
- recognize the need to look harder at the water system’s resiliency in a major earthquake event and begin to make strategic investments to reduce risk;
- preserve the transmission and distribution systems through careful investment in aging infrastructure renewal;
- provide stewardship of the watersheds, to ensure a reliable source of high-quality drinking water;
- comply with federal and state regulations governing water quality, system reliability, and habitat protection in the watersheds in which SPU operates; and
- prioritize projects to deliver on infrastructure and regulatory requirements within the limited resources of the Water Fund.

Future Projects/What is on the Horizon

The Water CIP has completed a multi-decade period of investments in major infrastructure projects. These projects have positioned SPU to meet drinking water quality and environmental regulations. Projects have included the Tolt and Cedar Water Treatment Facilities, Tolt Pipeline 2, Reservoir Covering Program, the Cedar River Watershed HCP, and a new Water Quality Laboratory. SPU has also made a major reinvestment in the Supervisory Control and Data Acquisition System which is used to monitor and control the regional and retail water system. However, these investments have also led to increasing debt service payments that constrain future budgets.

The 6-year CIP funds the work to replace floating covers at the Lake Forest Park and Bitter Lake reservoirs, address the Tolt Pipelines slide area, and construct Operational and Regional Facilities. Beyond these projects, emphasis will be on asset management-based rehabilitation and replacement of distribution system infrastructure (e.g. mains, valves, hydrants, meters), as well as water system infrastructure improvements related to transportation projects, such as the Move Seattle Levy.

Additionally, SPU recognizes the need to look harder at the water system’s resiliency in a major earthquake event and begin to make strategic investments to reduce risk. SPU recently completed a seismic analysis that defined recovery time to agreed levels of service and developed a prioritized list of recommended investments to improve resiliency. Those capital and operational and maintenance improvements will be developed over the course of the next several decades, and initial funding to begin implementation of those improvements is included in this capital program.

Project Summary

Water Infrastructure-Service Renewal

Project No:	MC-SU-C1109	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces existing plastic or galvanized water services in the City's water distribution system. Service replacement may occur as a result of leaking, failing, or to reduce damage in case of failure of the water service. This project improves Seattle's water system and extends the life of the system.

Water Infrastructure-Hydrant Replace/Relocate

Project No:	MC-SU-C1110	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project renews or replaces existing hydrants in the City's water distribution system. In general, hydrant renewal or replacement may occur as a result of hydrant malfunction, catastrophic failure due to vehicle damage, or to meet SPU criticality criteria such as spacing, location, cost, opportunity projects, or flow and pressure problems. This project improves access to fire hydrants for the Seattle Fire Department (SFD) and helps to reduce the damage as a result of fire by locating fire hydrants in alternate or additional locations.

Water Infrastructure-Water Main Extensions

Project No:	MC-SU-C1111	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project assists developers by adding new water mains to the water system in order to serve new residential and commercial developments. Most of the costs are recovered through standard charges. The benefit of this project is that water service is provided to new housing and businesses throughout Seattle.

Water Infrastructure-New Hydrants

Project No:	MC-SU-C1112	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project installs new hydrants in the City's water distribution system. In general, new hydrants are installed to meet service requests made by private property owners and to comply with Washington Administrative Code (WAC) or Seattle Fire Department (SFD) requirements. This project helps to reduce the damage as a result of fire by locating new fire hydrants throughout the City's direct service area.

Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project installs new drinking water services throughout the City of Seattle. This project provides new connections to existing water mains with no interruption of service to adjacent existing customers, and the installation of metered water service lines from the new tap to the new customer's property lines. This project meets City responsibility for new service connections in the Seattle Municipal Code (SMC) to provide reliable drinking water supply to customers.

Distribution System Improvements

Project No:	MC-SU-C1128	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project improves service reliability, pressure, capacity, and fire flow in the City's water distribution system. Typical improvements may include, but are not limited to, booster pump station installation, creation of new service zones, and tank elevation or replacement, as well as additional water main pipelines and pressure reducing valves. These improvements to service levels meet Washington Department of Health (DOH) regulations and SPU's Distribution System Pressure Policy to provide greater than 20 psi service pressure. These improvements provide higher flow of water for fire protection which improves public safety and results in smaller and shorter fires.

Watermain Rehabilitation

Project No:	MC-SU-C1129	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Regional
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces or rehabilitates existing water mains in Seattle. Replacements occur when leaks and breaks become too frequent and the cost of ongoing repairs is no longer cost effective. The benefits of this program can include improved service reliability, fire flow, water quality and lower maintenance costs. These benefits vary depending on the specific water main and site conditions.

Tank Improvements

Project No:	MC-SU-C1134	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project implements water quality, seismic, and other improvements to steel water tanks in Seattle. Functional water tanks are essential to public health protection as they assure that the distribution system is under pressure at all times, even when pump stations or control valves malfunction. Depressurization of the water system may result in siphoning back contaminants from faulty private systems and from the ground into the water pipes.

Distribution System In-Line Gate Valve

Project No:	MC-SU-C1136	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces line valves in the water distribution system throughout the City of Seattle that fail or are obsolete due to age or lack of replacement parts. The replacement of these gate valves extends the useful life of the water main and restores the performance of the water distribution system. This ongoing project also adds valves within the system to enhance system performance, enhance operational control, and reduce the number of customers whose service is interrupted during a water main shut down.

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for modifications and relocations of existing Distribution System assets resulting from third party project impacts to Distribution System infrastructure located in the right-of-way or on public property. The costs are recovered from third parties and primarily other public utilities and agencies through Memorandums of Agreement and standard charges. This project covers all Distribution System modifications and relocations that are funded by third parties excluding Water main Extension project projects. The benefit of this project is accommodation of third party development by relocating or modifying existing Distribution System infrastructure, while retaining a Distribution System that continues to provide cost effective service to the ratepayer.

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides customer incentives for residential, commercial, institutional, and industrial water efficiency capital improvements. Typical examples include, but are not limited to, water efficient toilets and urinals, clothes washers, landscape irrigation devices, upgrades in industrial process water, and replacing water-cooled equipment with air-cooled versions. The project benefits both existing and future ratepayers. Water conservation provides low-cost options for meeting potential challenges from climate change, managing Seattle's drinking water resources, and customer efficiency and potential cost savings on water bills.

Instream Flow Management Studies

Project No:	MC-SU-C1608	BSL Code:	BC-SU-C160B
Project Type:	Ongoing	BSL Name:	Habitat Conservation Program
Project Category:	Improved Facility	Location:	Cedar River Watershed
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides research and monitoring to examine the effects of instream flows on salmon species in the Cedar River. This ongoing project monitors flow compliance, verifies accretion flows downstream of Landsburg, improves flow-switching criteria, and develops a better understanding of relationships between stream flow and aquatic habitat. This ongoing project is a requirement of the Cedar River Habitat Conservation Plan (HCP).

Meter Replacement

Project No:	MC-SU-C4101	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds replacement of existing water meters when they fail or become obsolete. Meters measuring up to two inches are replaced when they stop running. Meters measuring three inches or more are repaired when possible, but are replaced when repair costs exceed replacement costs. Accurate water meters ensure that customers are billed fairly for the water they use. Since water meters also are used to bill customers for their wastewater discharges, 48 percent of the funding is allocated to the Drainage and Wastewater line of business.

Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2001 - 2025	Neighborhood District:	Multiple
Total Project Cost:	\$87,519	Urban Village:	Multiple

This project relocates, replaces, and protects water infrastructure affected by the replacement of the Alaskan Way Viaduct and Seawall. This project encompasses many sub-projects which are collectively known as the Alaskan Way Viaduct and Seawall Replacement project (AWVSR project). The Washington State Department of Transportation (WSDOT) is the lead for the SR-99 replacement, while the City of Seattle is the lead on development of the waterfront public space, implementation of the new surface Alaskan Way, and design and construction of the seawall.

Project Category:	Improved Facility	Location:	2700 Airport Way South
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Greater Duwamish
Total Project Cost:	N/A	Urban Village:	Greater Duwamish

This ongoing facilities project renovates, rehabilitates, replaces existing buildings, and constructs new facilities at the Operations Control Center located at 2700 Airport Way South to improve the efficiency and effectiveness of the field crews delivering utility services to customers. Typical improvements include, but are not limited to, roof and other exterior replacements, improvements to public spaces, office and crew spaces and lighting, and heating and ventilation systems. These improvements increase the useful life of the facility, preserve the value of the asset, and provide a safe work and public space environment.

Operational Facility - Construction

Project No:	MC-SU-C4106	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing facilities project renovates, rehabilitates, replaces existing buildings, and constructs new facilities at various locations within the city limits to address deficiencies, failures, and functional changes in the SPU Lines of Business. Typical improvements include, but are not limited to, roof replacements, exterior wall or cladding replacements, and improvements to administrative office space, crew and shop space, lighting, heating and ventilation systems, and facilities structures. These improvements increase the useful life of the facilities, preserve the value of the assets, and provide a safe working environment.

This ongoing project provides for electronic and mechanical system upgrades as required at various City facilities. The drinking water Supervisory Control and Data Acquisition (SCADA) system was installed in 2005 throughout King County. System components include, but is not limited to, treatment/flow/pressure sensors, remote control pumps/valves used in the conveyance and quality of drinking water and the delivery of water to fire hydrants, also known as "fire flow".

This ongoing project provides SPU staff with new and replacement heavy equipment that is used throughout Seattle and King County. Typical purchases include backhoes, graders, loaders, dozers, service trucks, and dump trucks. This equipment transports work crews and tools to job sites and supports the safe and efficient replacement, repair, and maintenance of infrastructure that delivers high quality drinking water to 1.5 million customers in King County.

1% for Arts

Project No:	MC-SU-C4118	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	New Investment	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for Seattle Public Utilities' 1% for Arts contribution. Eligibility is determined at the individual project level with payment occurring from this project. Funds contributed to the 1% for Arts project allow for the commission, purchase, and installation of art on City-owned properties that is accessible to the public. The Municipal Arts Plan, which is prepared annually, describes the status of ongoing art projects and establishes the scope of work and allocations for new art projects.

Emergency Storms Program

Project No:	MC-SU-C4120	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds water and drainage & wastewater infrastructure capital improvement projects resulting from previous and possible future storm events. Projects within this project are potentially Federal Emergency Management Agency (FEMA) reimbursable and need to be separated for tracking and reimbursement purposes. Typical improvements include but are not limited to repairing and improving roads, bridges, and other stream crossing structures in the City's Municipal Watersheds, as well as replacing damaged equipment, such as pumps and security gates, and stabilizing debris slide areas and stream banks.

This ongoing IT asset management project ensures the availability, reliability, and security of SPU's corporate computing infrastructure. The project acquires and maintains SPU-owned and managed servers, local networks, shared storage and backup systems, operating software, and communications infrastructure.

This ongoing project provides technology applications and application upgrades in support of improvements to project delivery and performance. Planned projects include continued development of an Enterprise Project Management System, replacement of the Engineering Support Contract Payments system, and SPU's share of costs for the City's central financial system upgrades. Future projects may include development of new Enterprise Resource Planning systems such as HR provisioning and financial reporting. This project will result in an improved ability to plan and deliver projects on schedule and within budget.

This ongoing project will provide new and improved technology applications and accompanying data management tools to support the gathering, monitoring, tracking and analysis of science and engineering information. Several planned projects include replacement of obsolete regulatory compliance tracking applications, upgrades to field monitoring equipment, and the integration of SCADA data with other data systems. This project enhances SPU's ability to control water quality and comply with environmental and health regulations.

Finance and Administrative Services

Overview

The Department of Finance and Administrative Services (FAS) Capital Improvement Program (CIP) is the department's blueprint for planning, replacing, maintaining, remodeling and upgrading FAS-managed facilities and IT infrastructure. These assets are used by City departments, as well as certain nonprofit organizations that serve the public, to deliver critical services to Seattle residents.

FAS' proposed CIP includes appropriations for ongoing capital programs and specific capital projects with multiyear durations. Multiyear projects are identified by multiple priorities, including City goals (e.g., greenhouse gas reduction, public safety), code compliance and severity of system deficiencies and importance to tenant department operations. Planned schedules and funding commitments for these types of multiyear projects are typically made every year in conjunction with the annual budget process. The six-year FAS 2020-2025 CIP includes approximately \$82 million in funding for new and existing projects and programs.

Thematic Priorities

FAS is responsible for the operation and maintenance of approximately 3.2 million square feet of building space throughout the city, including municipal courts, police and fire facilities, shops and fleet maintenance facilities, high-rise office space in the civic core, parking garages and some of the City's community-based public service facilities. FAS' capital investments either improve or enhance the operational capacity of these mission-critical systems and facilities. FAS' CIP addresses the following priorities:

- **Asset preservation** – As authorized in Ordinance [121642](#), FAS dedicates annual funding to support the replacement of existing building systems, guided by strict policies to ensure those funds are used exclusively to preserve, extend or replace failing and existing components such as roofs, windows, structures, electrical capacity, boilers or other systems at the end of their useful lives.
- **Life and safety issues** – High priority is given to projects intended to ensure continuity of service at facilities that provide emergency or other essential services (e.g., replacing generators near the end of their useful lives at essential facilities, such as police or fire stations). Projects that mitigate potential threats to human life and safety, such as mold and lead abatement and other hazardous conditions in building interiors and structural failures, also receive priority.
- **Federal, state and local requirements** – FAS must consider regulatory requirements in assessing capital needs when replacing existing, failing systems in FAS-managed facilities. One example is the Washington Administrative Code requirement to upgrade fire alarm panels and install fire sprinklers when substantial alterations are made in the course of upgrading or modernizing an existing building. Substantial alterations may also require facility improvements mandated by the Americans with Disabilities Act (ADA), which meet the City's dual goals of compliance with federal requirements and provision of equitable access to all.
- **Race and Social Justice Initiative (RSJI)** – FAS integrates the City's social equity contracting requirements into all aspects of the execution of CIP projects. Women- and minority-owned business (WMBE) vendors, construction contractors and subcontractors may be contracted for design and construction work, furthering the City's goal to promote contracting with WMBE businesses. FAS works within the inclusion plan guidelines published by City Purchasing and Contracting Services for consultant, contracting and purchasing work. Additionally, Priority Hire, a

Finance and Administrative Services

community workforce agreement (CWA) and apprenticeship rules for construction contracts over \$5 million furthers FAS' compliance with the City's community workforce goals and RSJI targets.

- **Sustainability**—Several City sustainability policies guide FAS, as a building owner, to focus on meeting the energy-efficiency requirements of the Seattle Energy Code, achieving cost-effective measures to reduce energy use and incorporating other sustainable strategies required by regulations. FAS will continue to address new sustainability efforts, such as “Drive Clean Seattle” and the “2030 Challenge,” by proposing additional projects to reduce energy use and greenhouse gas emissions to meet sustainability goals.

Aligning Capital Investments with Growth and/or Community Planning

FAS' 2020-2025 Proposed CIP focuses primarily on preserving existing City assets and infrastructure, and not primarily on implementing modal or master community/area planning efforts. However, FAS CIP projects that do span city districts include implementing accessibility improvements on FAS properties and eliminating FAS' highest priority public-facing ADA barriers. Additionally, the proposed development of additional electric vehicle charging stations will further the City's commitment to reducing greenhouse gases.

Project Selection Criteria

Projects to be considered for inclusion in the FAS CIP fit the priority themes above and adhere to the capital and asset preservation policies adopted in Resolution [31203](#). They typically fall into two categories: projects that improve or enhance operational effectiveness or projects that preserve the City's capital assets. FAS solicits requests from its tenant departments for facilities-related projects that create or enhance operational effectiveness, vets them for timeliness and appropriateness and evaluates each request on its own merit. FAS also seeks executive direction regarding projects that increase departments' operational capacity and other areas of opportunity to consider when planning the City's CIP priorities.

Asset preservation work is planned on a six-year cycle and evaluated for specific project development and execution. Department staff uses a custom database known as the Unifier Asset Management and Preservation System (Unifier), to maintain building-specific facilities condition indices and known building deficiencies in the more than 100 FAS-managed buildings.

Every year FAS revises the list of facility asset preservation projects that need to be addressed. This list is compiled from annually updated asset management data generated by building condition assessments, energy audits, performance metrics and other capital planning studies. Unifier allows FAS' various operational work units to collaborate in the scheduling and tracking of preventative maintenance activities. The system organizes tasks such as work-order management, facility maintenance, lease management and maintenance of property information. Elements that extend the useful life of improvements, increase tenant comfort and reduce utility bills are integrated into existing projects where feasible.

2020-2025 CIP Highlights:

FAS' 2020-2025 Proposed CIP includes funding adjustments over six years for existing capital projects and programs focused on asset preservation of FAS properties and infrastructure, improving accessibility to City resources and services and improvements to public safety facilities. Below are specific projects with funding adjustments:

Finance and Administrative Services

- **Seattle Municipal Tower Elevator Rehab** – As with much of the major system infrastructure in the SMT, the 30-year old elevators and their control systems are nearing the end of their useful lives. Design work for this program commenced in 2019, but, due to the magnitude and phasing requirements, this project will span multiple years. The current project estimate is \$30 million. A design milestone review concluding in the second quarter of 2020 will allow for a better alignment of scope and updated project cost estimate.
- **Americans with Disabilities Act (ADA) Improvements** – With FAS’ barrier removal database and execution strategies complete, FAS will begin implementing a multiyear program that eliminates barrier deficiencies in FAS properties to improve public access to City services and resources. FAS’ current cost estimate for the ADA projects through 2025 are \$17 million.

CIP Revenue Sources

The 2020-2025 Proposed CIP is supported by funding sources including limited tax general obligation (LTGO) bonds, REET I and space rent charges by FAS to City departments. One example of the use of LTGO bond funding is proposed to support the SMT Elevator Rehab Project, with related debt service to be paid from space rent charges by FAS to City departments. REET I funds will help address accessibility barriers to improve public access to City resources in 2020 and 2021, and for future debt payment for public safety facilities in 2022, 2023 and 2024.

Summary of Upcoming Budget Issues and Challenges

FAS’ most pressing CIP budget issues continue to involve the age and condition of many City-owned buildings and responding to federal, state and local code requirements and City sustainability goals, among other challenges. Below are specific programs and projects related to FAS budget challenges:

- **Asset preservation** – The FAS Asset Preservation Program, created by Ordinance [121642](#), dedicates funds derived from space rent to replace building systems in 100 City buildings inside and outside of the downtown core. The Asset Preservation (AP) Program has historically been funded at a level of \$4 million annually. This funding level is short of the annual funding level of \$12 million that FAS’ current models suggest to adequately address deficiencies and deferred major maintenance work, estimated at more than \$100 million. In 2019, additional REET I funding of \$2.5 million was added to the CIP. This is a significant step forward in allowing FAS to address asset preservation needs and has allowed additional projects such as the City Hall LED lighting upgrade work to be undertaken. FAS will continue to assess major maintenance needs and seek additional funding for larger projects when necessary. FAS will continue prioritizing available asset preservation funding on its most pressing infrastructure and/or operational needs and will likely seek additional funding starting 2021.
- **Accessible facilities** – FAS-managed facilities are occupied by City departments providing programs and services to the public. It continues to be a priority for FAS to ensure these facilities are accessible. After completion of the FAS Barrier Removal Transition Plan in 2018, FAS is developing a multiyear program to execute improvements in the priority facilities. The improvements will comply with the federal ADA for Title II facilities. The City continues to invest to achieve the goals outlined in the barrier removal transition plan.
- **Building, Energy and Land Use codes and City sustainability goals** – FAS remains a major partner to achieve the sustainability and environmental goals set forth by the City. FAS must continue to provide reliable, compliant and structurally sound facilities which are used by City departments and

Finance and Administrative Services

accessed by the public. These investments require diligence by FAS to incorporate strategies and evaluate cost effective methods which strive to achieve code compliance, energy efficiency and accessibility in the operations, maintenance and infrastructure improvements of its buildings.

- **Public safety** – The City has a number of immediate needs in FAS-managed public safety facilities. These include the Seattle Fire Department Headquarters, Seattle Police capacity in North Seattle, fire service in South Lake Union and necessary emergency management improvements at facilities across the city. The future of public safety response has been an ongoing priority for CIP planning, and will continue to be a central component of future CIP planning cycles.

Future Projects/What Is on the Horizon

City facilities must be accessible, reliable, well maintained and responsive to the needs of operating departments to ensure public safety and the delivery of critical services to customers. However, FAS faces a continued challenge in adequately funding asset preservation and major maintenance requirements at the City's aging facilities, including the 30-year old Seattle Municipal Tower, Seattle Fire Department (SFD) headquarters and FAS' shops and yards.

One such challenge relates to planning for public safety facilities overall, especially in the face of population growth and new economic development in Seattle. It remains a challenge to determine the relative priority of asset preservation work on existing public safety facilities (such as at the aging SFD Headquarters facility) compared to possible new public safety facility investments, such as acquiring or developing a new facility for SFD Headquarters, developing a first station in South Lake Union and improving or expanding facilities that serve the Seattle Police Department.

Another challenge is ensuring that capital projects are accurately budgeted and fully funded in the face of continued rising costs of construction. Furthermore, the City's public works requirements on capital projects have brought unique challenges to contractors bidding on public work. These requirements, such as a community workforce agreement, sustainability, energy efficiency, ADA and RSJI, have also increased project and related administration costs. FAS continues to work to find the balance of supporting these important policy goals while delivering capital projects on time and within budget.

Finance and Administrative Services

ADA Improvements - Citywide

Project No:	MC-FA-ADAIMPCTY	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	Multiple City facilities
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2012 - 2018	Neighborhood District:	Multiple
Total Project Cost:	\$1,335	Urban Village:	Multiple

FAS technical assistance, consultant engagement and City policy work will continue under the ADA Improvements Citywide Project in 2018. Policy guidance from FAS will provide the necessary support to the departments prioritization and implementation of ADA improvements as identified in the Citywide Transition Plan.

ADA Improvements - FAS

Project No:	MC-FA-ADAIMPFAS	BSL Code:	BC-FA-ADAIMPR
Project Type:	Ongoing	BSL Name:	ADA Improvements
Project Category:	Improved Facility	Location:	FAS facilities
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project is the FAS American with Disabilities Act (ADA) ongoing program that will address specific ADA improvements and upgrades at various FAS-owned and operated facilities. Past work has included reconfiguration of restrooms, meeting rooms and other spaces, reconfiguration of facility amenities such as drinking fountains and various public access routes to sites, buildings and public spaces. Future funding allows FAS to implement its long-term strategy that resolves the most critical public-facing ADA deficiencies first and maximizes accessibility to the greatest extent possible.

Asset Preservation - Schedule 1 Facilities

Project No:	MC-FA-APSCH1FAC	BSL Code:	BC-FA-APSCH1FAC
Project Type:	Ongoing	BSL Name:	Asset Preservation - Schedule 1 Facilities
Project Category:	Rehabilitation or Restoration	Location:	Multiple City facilities
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This ongoing program provides for long term preservation and major maintenance to the FAS schedule 1 facilities. Schedule 1 facilities are comprised of existing and future office buildings located in downtown Seattle, including but not limited to City Hall, the Seattle Municipal Tower and the Justice Center. Typical improvements may include, but are not limited to, energy efficiency enhancements through equipment replacement, upgrades/repairs to heating/ventilation/air conditioning systems, upgrades/repairs to electrical systems, upgrades/repairs to fire suppression systems, roof repairs or replacement, and structural assessments and repairs. This work ensures the long-term preservation of the operational use of the facilities.

Benaroya Hall Transforming Soundbridge

Project No:	MC-FA-BENSNDBDG	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	1301 3rd Ave.
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 7
Start/End Date:	2017 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$1,500	Urban Village:	Downtown

This project provides City resources to fund a portion of the Benaroya Hall capital project to transform the Soundbridge learning space into OCTAVE 9. OCTAVE 9 is envisioned as a performance and learning environment that uses the latest audio-visual technology to allow viewers to see performances on-line. Full construction work includes, but is not limited to, demolition, complete construction of the interior finishes, including electrical, cabling, HVAC and renovations of the restrooms.

City Facilities Project Delivery Services

Project No:	MC-FA-CTYPDS	BSL Code:	BC-FA-FASPD
Project Type:	Ongoing	BSL Name:	FAS Project Delivery Services
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides pass-through budget authority for FAS to provide design and construction management services, as requested by City departments, at facilities that are neither managed nor leased by FAS. Typical work may include, but is not limited to, the following services: predesign, programming, master planning, conceptual planning, architectural and engineering design and construction administration. FAS proposes to use the second and fourth quarterly supplemental budget process to "right size" the pass-through budget authority for this project. This approach allows FAS to meet the present needs of departments that have funding for their projects and is consistent with year-end accounting and budgetary requirements.

City Hall and Seattle Municipal Tower Tenant Improvements

Project No:	MC-FA-CTYHLTIMP	BSL Code:	BC-FA-GOVTFAC
Project Type:	Ongoing	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	Multiple City Facilities
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project provides predesign, design, and construction services for developing or reconfiguring space and other adjacent functions in the Downtown Civic Campus. Work may include, but is not limited to, working with project sponsors to catalog space and equipment needs, energy efficiency improvements, developing planning options, developing project cost estimates, and construction. Work may also include analysis of how vacated space in other facilities might be utilized for other city uses.

Drive Clean Seattle Fleet Electric Vehicle Infrastructure

Project No:	MC-FA-DRVCLNFLT	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2016 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$7,852	Urban Village:	Multiple

This project funds FAS's capital work efforts towards meeting the Drive Clean Seattle (DCS) initiative, a comprehensive transportation electrification strategy to transition Seattle's transportation sector from reliance on fossil fuels to the maximal use of clean, carbon-neutral electricity. Work will include but is not limited to, the design, permitting, and construction of 150 electric vehicle charging stations in the Seattle Municipal Tower to provide capacity for the conversion of City fleet to electric vehicles. Future work may include the installation of charging stations at additional sites.

Resources	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total
Real Estate Excise Tax I	1,487	5,365	1,000	-	-	-	-	-	7,852
Total:	1,487	5,365	1,000	-	-	-	-	-	7,852

Fund Appropriations / Allocations¹	LTD Actuals	2019 Revised	2020	2021	2022	2023	2024	2025	Total
REET I Capital Fund	1,487	5,365	1,000	-	-	-	-	-	7,852
Total:	1,487	5,365	1,000	-	-	-	-	-	7,852

O&M Impacts: FAS expects a temporary O&M cost increase for increased power usage as EV charging stations are utilized. FAS will develop a method for recovering costs from departments. Costs to departments will be offset by fuel savings.

Electronic Records Management System

Project No:	MC-FA-EMALARCH	BSL Code:	BC-FA-A1IT
Project Type:	Discrete	BSL Name:	Information Technology
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Multiple
Start/End Date:	2014 - 2018	Neighborhood District:	Multiple
Total Project Cost:	\$2,786	Urban Village:	Multiple

This project is a multi-year initiative to address a citywide need for an electronic records management system that will manage the retention of electronic records in all formats, provide efficient search and delivery tools for responding to business needs, public records requests and other legal matters, and allow direct online access to records of wide public interest. The project will begin with the replacement of the City's current email archiving system and be followed by additional phases expanding electronic records management capabilities.

Energy Efficiency for Municipal Buildings

Project No:	MC-FA-ENEFFMBLD	BSL Code:	BC-FA-EXTPROJ
Project Type:	Ongoing	BSL Name:	FAS Oversight-External Projects
Project Category:	Improved Facility	Location:	Multiple City facilities
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project funds energy efficiency work across City facilities, managed by the Office of Sustainability and Environment (OSE), in support the City's goal to achieve a 20% reduction in building energy use by the year 2020. OSE will implement a package of energy efficiency projects, as well as continue a suite of O&M improvements, program management, measurement and tracking, and building assessments. The energy efficiency upgrades are expected to generate utility rebates paid by Seattle City Light and Puget Sound Energy, to be deposited into the General Subfund and shown here as future General Subfund revenue. Work may include but is not limited to, building tune-ups, facility improvements, building energy upgrades, and energy efficiency measures.

Total Project Cost:	N/A	Urban Village:	Multiple

This project provides funding for FAS to implement information technology (IT) proposals, to replace existing FAS IT systems that are at the end of their useful lives, accommodate new programmatic and operational needs, and allow the department to function efficiently. FAS coordinates development and implementation of these proposals with the Seattle Information Technology Department. In 2019-2020, specific projects include replacing FAS' department-wide budget system, developing a new risk management information system, replacing the Seattle Animal Shelter's PetPoint system (used to manage various functions including licensing, case management, and enforcement), and assessing and replacing FAS' Capital Projects Information Management System.

Start/End Date:	2018 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$1,000	Urban Village:	Downtown

This project addresses the sheltering needs of the unsheltered homeless in Seattle by developing sheltering facilities and authorized encampments in support of the City’s Bridge Housing Investment Strategy to increase the supply of interim or “bridge” shelter and housing for people currently living unsheltered. The project supports costs related to acquiring or leasing property, as well as to design and construction of new facilities and improvements to existing facilities and properties.

Fire Facilities South Lake Union

Project No:	MC-FA-PSFSSLU	BSL Code:	BC-FA-PSFACFIRE
Project Type:	Discrete	BSL Name:	Public Safety Facilities Fire
Project Category:	New Facility	Location:	TBD
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Multiple
Start/End Date:	2017 - 2019	Neighborhood District:	Lake Union
Total Project Cost:	\$1,000	Urban Village:	Multiple

This project provides for site evaluation and acquisition (and potential future design and construction) for a new Marine Emergency Response facility for a freshwater and land-based fire apparatus in the vicinity of the South Lake Union and Denny Triangle neighborhoods. Due to recent population growth in these neighborhoods, there is an ever-increasing need to site a new facility. Initial funding in 2018 supports the City's acquisition of a parcel and/or design and pre-planning costs. The total cost of developing the facility has not yet been determined.

Fire Station 32

Project No:	MC-FA-FFERPFS32	BSL Code:	BC-FA-NBHFIRE
Project Type:	Discrete	BSL Name:	Neighborhood Fire Stations
Project Category:	Improved Facility	Location:	3715 SW Alaska St
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 1
Start/End Date:	2010 - 2019	Neighborhood District:	Southwest
Total Project Cost:	\$12,929	Urban Village:	West Seattle Junction

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 32 in a three-story structure at its existing site. It also provides temporary quarters for firefighters while the fire station is under construction. The existing Fire Station 32 is seismically vulnerable and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project supports firefighters in the provision of high-quality emergency services to the West Seattle community and will protect them in the event of an earthquake.

Fire Station 5

Project No:	MC-FA-FS5	BSL Code:	BC-FA-PSFACFIRE
Project Type:	Discrete	BSL Name:	Public Safety Facilities Fire
Project Category:	Improved Facility	Location:	925 Alaskan Way
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2014 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$8,801	Urban Village:	Downtown

This project, located on the downtown Seattle waterfront, provides a seismic and safety upgrade for Fire Station 5 and makes functional improvements to the facility and building systems. The project renovates the fire station to protect fire fighters in the event of an earthquake and allows them to provide high-quality marine and land-based emergency service. The project is timed to coincide with the Seawall replacement project as this facility is physically attached to the Seawall structure.

Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides funding for long term public safety facility needs in North Seattle. These funds are for planning, design, and possible construction of facilities, as well as potential debt service for larger bond funded projects. Due to the current age of both police and fire facilities, along with expected growth in Northgate and other areas in North Seattle, planning for future improvements is critical to maintaining emergency response.

Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project provides for various facility improvements. Work may include, but is not limited to, space reconfigurations, reconfigurations of amenities such as drinking fountains, improvements to facility infrastructure such as assisted listening loops, and improvements to various access routes to the site, building, and other public spaces. Three new project phases will commence in 2018, 2019, and 2020. Each project will improve the security of the courthouse based upon the findings of two U.S. Federal Marshal Service Security Surveys.

Seattle Municipal Tower Chiller Plant Replacement

Project No:	MC-FA-SMTCHLRPL	BSL Code:	BC-FA-APSCH1FAC
Project Type:	Discrete	BSL Name:	Asset Preservation - Schedule 1 Facilities
Project Category:	Rehabilitation or Restoration	Location:	700 Fifth AVE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2018 - 2020	Neighborhood District:	Downtown
Total Project Cost:	\$18,500	Urban Village:	Downtown

This project replaces the chiller plant in the Seattle Municipal Tower (SMT). The project will require a multi-year execution plan to allow for permitting, design, procurement and construction to occur during the windows of opportunity when cooling is not required. This highly technical, complex construction effort is a once-in-a generation endeavor. With a dwindling supply of spare parts for maintenance and repairs, it is no longer feasible to defer this critical work, and delaying the project would put FAS at risk of not being able to provide essential cooling to City of Seattle offices and other building tenants. Project costs shown here are exclusive of \$1 million expended on preliminary work on this project in 2018. Those funds are included in the Asset Preservation - Schedule 1 Facilities project (MC-FA-APSCH1FAC).

Seattle Municipal Tower Elevator Rehab

Project No:	MC-FA-SMTELVHRB	BSL Code:	BC-FA-APSCH1FAC
Project Type:	Discrete	BSL Name:	Asset Preservation - Schedule 1 Facilities
Project Category:	Rehabilitation or Restoration	Location:	700 Fifth AVE
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	2019 - 2022	Neighborhood District:	Downtown
Total Project Cost Range:	28,000 - 32,000	Urban Village:	Downtown

This project will improve the operation, reliability, and system performance of the Seattle Municipal Tower (SMT) elevators. The work will bring the SMT elevators to current building codes and into compliance with Americans with Disabilities Act (ADA) requirements. This project is envisioned to be a multi-year effort that must be phased to minimize impacts on SMT ongoing building operations, and on the approximately 4,000 city staff who work in the building and the public who visit the SMT to access City services.

Financial Planning Strategy: The estimated cost to complete bid documents for this Design-Build contract is \$2,500,000, \$1,500,000 of which is funded with LTGO bonds. The remaining \$1,000,000 was funded with REET 1.

At 30% design FAS will reevaluate the total project cost and the financial planning strategy for the remaining costs of the project, which could include local funding and debt funding.

The current mid-point for the financial planning estimate is \$30,000,000 including the \$2,500,000 currently appropriated for design.

Seattle Municipal Tower IDF Infrastructure Upgrades

Project No:	MC-FA-SMTIDFINF	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	700 Fifth AVE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2015 - 2020	Neighborhood District:	Downtown
Total Project Cost:	\$2,500	Urban Village:	Downtown

This project provides electrical, cooling, and fire separation upgrades for 15 existing Intermediate Distribution Frame (IDF) rooms in the Seattle Municipal Tower (SMT) that house network, telephone and security systems. The resultant electrical and cooling capacity increases will allow the systems in the room to be upgraded now (in the case of Voice over IP phones) and in the future. In addition to these capacity infrastructure upgrades, fire separations will be established for the rooms. This project will enhance the reliability of the systems housed in the IDF rooms by improving the infrastructure that serves them and protecting the rooms from potential damage caused by events outside of the rooms.

Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project preserves or extends the useful life or operational capacity and provides for improvements to FAS-owned Police facilities including, but not limited to, the East Precinct, the North Precinct, the West Precinct, the Mounted Patrol Facility, the Harbor Patrol Facility, and the K-9 Facility. Typical work may include, but is not limited to, upgrades to heating, ventilation, air conditioning upgrades, equipment replacement, siting, pre-design, test-to-fit analyses, and structural assessments and repairs. These improvements support police service by extending the operational life of old police facilities, complying with regulatory requirements, or addressing capacity problems.

Total Project Cost:	\$400	Urban Village:	Multiple

The Seattle License Information System (SLIM) manages the issuance and renewal of business licenses and the collection of revenue from fees and taxes. SLIM is now outdated and can no longer adequately meet the needs of expanding business license, tax collection, and enforcement processes and needs to be upgraded. Recommendations for a SLIM replacement will be considered as the Multi-City Business License and Tax Portal project is implemented.

Information Technology

Seattle Information Technology Department

Overview

The Seattle Information Technology Department (Seattle IT) aims to be a best-in-class digital service delivery team for City of Seattle departments and the residents it serves. Seattle IT provides powerful technology solutions to the City and public; including, data, telephone, and radio networks; applications and application infrastructure; desktop, mobile and printing devices; cloud services; website and internet connections; television channel; data centers, servers, storage, and backup. Seattle IT also manages designated projects on behalf of the City, other departments, and regional partners.

Seattle IT's Capital Improvement Program (CIP) supports major maintenance, improvements, replacements and upgrades to the City's existing technology systems, as well as the development and implementation of new projects. Details for 2020 are provided in the following table.

CIP Program Name	2020 Proposed	Planned Spending
<i>Discrete Projects</i>		
Citywide Contract Management System	\$79,000	Replace multiple contract management systems in use across departments with one Citywide system.
Criminal Justice Information System Projects	\$10,000,000	Implement case management systems for agencies including Seattle Municipal Court, the Hearing Examiner and the City Attorney.
HRIS Replacement	\$604,000	Upgrade Seattle's current Human Resources Information System.
SMT Remodel- IT	\$2,300,000	Renovate several floors of the Seattle Municipal Tower to meet City office space standards.
<i>Ongoing CIP Programs</i>		
800 MHz Radio Network Program	\$687,000	Maintain radio network infrastructure and public safety radios.
Applications Development-SPD	\$2,675,000	Replace existing SPD computer-aided dispatch system and mobile application used by 911 and officers in the field.
Applications Development- SDOT	\$174,000	Replace the Seattle Department of Transportation's Budget System.
Computing Services Architecture	\$2,797,000	Computer equipment related to a new Unified Communication System (to replace the City's current telephone system) as well as routine equipment replacement and upgrades for servers, storage, and facility infrastructure.
Data & Telephone Infrastructure	\$8,843,000	Network equipment related to Unified Communication System and routine equipment replacement and upgrades.
Enterprise Computing	\$0	Enterprise Computing merged with Computing Services Architecture in a 2019 Supplemental Budget change.
Fiber-Optic Communication Installation & Maintenance	\$4,245,000	Fiber installation and maintenance.
IT Security	\$0	Transfer budget for the CIP project for systems upgrades and replacements to the Seattle IT operating budget.
Seattle Channel Maintenance & Upgrade	\$328,000	Equipment replacement and maintenance.
Technology Management Tools	\$0	Reduce budget for the CIP project to transfer the funds to the operating budget.
Department Total	\$32,732,000	

CIP Revenue Sources

Seattle IT's CIP has been funded through a variety of revenue sources, including:

- **Rates and Allocations:** There are multiple services within the department that are cost-allocated based on a percentage of use for the service provided or billed directly to a department based on the actual cost of time and labor or quantity of materials provided. Seattle IT's proposed budget also includes some projects that are funded using proceeds from general obligation bonds. Rates and allocations provide the funds to repay the debt service on these bonds.
- **State and Federal Grants:** Federal and state grants have been used to finance system replacements and new capabilities. In some cases, Seattle IT has been the direct recipient of the funds; in others, Seattle IT has managed grant-funded projects for customers. The use of grant funding for the Seattle IT CIP has been intermittent.
- **Cable Franchise Fees:** Seattle IT collects Cable Franchise Fee revenues that are set in franchise agreements with the cable providers. Some of this revenue has been used to fund the CIP Program which supports the Seattle Channel. Cable Fees have historically provided less than 1% of Seattle IT's CIP program.
- **Reserves:** In some instances, Seattle IT's rates and allocations include the collection of funds which are accumulated and held in a reserve in Seattle IT's Fund balance. Currently, this is only done for the 800 MHz radio system, although it has been considered for other areas. Expenditures of these reserve funds appear in the Seattle IT CIP program. Historically, there is a low level of spending for ongoing Operations & Maintenance items with intermittent large expenditures associated with major replacements and upgrades.
- **Private Dollars:** In the past, Seattle IT projects have occasionally included funding from external non-public sources. Such instances are highly intermittent, usually for relatively small dollar value and not projected to continue at any appreciable level.
- **Levy:** In the past, Seattle IT received some CIP funding from a levy for the development, acquisition and installation of the 800 MHz emergency radio communication system. Going forward, the future replacement and upgrade of the county-wide radio system involves a new levy. Outside of that, no additional levy funding is anticipated.
- **Bonds & Future Bond Proceeds:** Seattle IT occasionally utilizes funding from City bond sale proceeds to implement significant capital projects in the CIP. Rates and allocations typically provide the funds to repay the debt service on these bonds.
- **Use of Fund Balance:** Seattle IT may use existing fund balance or planned carryforward to implement some projects in its CIP.
- **To Be Determined:** Occasionally, Seattle IT's CIP includes future projects for which a specific funding source has yet to be specified. These projects will not go forward unless and until funding is secured.

2020-2025 CIP Highlights

Seattle IT's 2020-2025 Proposed CIP Budget includes the following additions and modifications to CIP programs:

- Human Resources Information System (HRIS) Replacement Project (\$175,000) provides funding to upgrade HRIS, which supports the City's Payroll Processing, Human Resources, and Benefits Administration and Retirement Payroll. The proposed budget funds a scoping study for the project that includes an organizational assessment, current state and requirements documentation, a procurement strategy, and RFP development.
- Seattle Police Department (SPD) Applications Development (\$3,225,000) provides funds to support projects on behalf of SPD. The 2020-2025 Proposed CIP includes funding for the replacement of the existing SPD computer-aided dispatch system and mobile application used by 911 and by officers in the field.
- Data & Telephone Infrastructure (-\$500,000) funds maintenance, replacement, and upgrades of software and major hardware for the City's data and telephone systems. The 2020-2025 Proposed CIP transfers funds from the CIP to Seattle IT's operating budget to reflect an ongoing need for data network equipment replacements that are no longer appropriate for capitalization.
- The IT Security CIP (-\$919,800) was created to fund major upgrades and product implementations to enhance the security of the City of Seattle's networks and systems. With the shift in the technology environment to service-based (e.g. in the cloud versus hardware that is on premise), the enhancements and upgrades planned by Seattle IT to improve security no longer qualify as capital purchases and therefore should no longer be included in the CIP program. This budget change transfers the expenditure authority from the CIP to the Security operating budget to align with the nature of the spending.
- Seattle Channel Maintenance & Upgrade (-\$75,000) project funds equipment and equipment maintenance services for the Seattle Channel. The 2020-2025 Proposed CIP decreases the annual funding for this project to help mitigate decreasing revenues from the Cable Television Franchise Fund.
- Technology Management Tools (-\$2,977,000) project funds systems to support IT service and asset management. As part of Seattle IT's Technology Management Tools update and replacement program, a placeholder request for potential bond funding for a tools refresh was included in the 2020 Endorsed Budget. However, with the recent launch of its new Service HUB system and the increasing switch to cloud-based applications and toolsets, Seattle IT does not anticipate a need for capital funds for Technology Management Tools in 2020.

Thematic Priorities

Seattle IT's priorities are:

Priority 1: Connective and Collaborative

Enable collaboration by providing tools and information anytime, anywhere, from any device.

Priority 2: Efficient and Flexible

Provide business process and operations efficiencies that enable rapid response and technology changes while upholding fiscal responsibility.

Priority 3: Talent and Capabilities

Continuous investment in an inclusive and supportive workforce that keeps pace with a dynamic technology and business landscape.

Priority 4: Modern and Innovative

Further City priorities, including social justice and equity goals, through the acquisition and implementation of leading edge technology solutions and practices.

Priority 5: Reliable and Sustainable

Provide clients with ongoing practical, security and modern infrastructure, platforms and tools to support their business needs.

Priority 6: Privacy and Transparency

Respect privacy guidelines that apply to every part of the IT workplan as well as provide a clear picture of IT resources to stakeholders.

Project Selection Criteria

STEP 1: Identification of Technology Needs and Opportunities

In this step, needs and opportunities for technology investments are identified. This happens on a rolling basis throughout the year, as well as during the budget planning process. Input comes from multiple places, including:

- customer department requests and requirements (including technology plan alignment to department strategic plans);
- Seattle IT Strategic Agenda;
- technology roadmaps (updated annually);
- asset replacement schedules; and
- coordination with partners (regional efforts, vendor partners, etc.).

This step includes development of initial cost estimates and other resource requirements, potential timing, and dependencies. At the completion of this step, potential projects are added to the Citywide IT Project Portfolio for tracking and consideration through Seattle IT's Project Gate Review process.

STEP 2: Identification of CIP and Non-Discretionary Projects

As part of the Gate Review process, items identified in Step 1 are filtered to determine if they are (1) CIP-appropriate or not and (2) discretionary or not. Criteria for determining if they are CIP appropriate or not include:

- overall dollar value;
- timeframe of implementation (e.g., multi-year project);
- lifespan of investment;
- investment in/preservation of long-term infrastructure; and
- the nature of the acquisition (e.g., goods, services, etc.).

Criteria for determining if they are non-discretionary include:

- legally mandated (e.g., debt service, federal or state law/regulation changes, court orders, etc.);
- urgent security or risk mitigation needs (e.g., major system failure, major security breach); and
- reimbursable services to others (e.g., Seattle IT manages a regional fiber consortium where the partners contract with/through us to get work done).

Projects which are determined to be non-discretionary are automatically moved forward for inclusion in our initial CIP and budget proposal. Discretionary projects proceed to Step 3. Regardless of discretionary status, project requests complete the Gate Review process to validate projects are established with the appropriate governance, value proposition and risk mitigation planning.

STEP 3: Prioritization of CIP-Appropriate Discretionary Projects

In this step, proposed investments are screened to determine if they are a match for Seattle IT's normal maintenance/upgrade/replacement programs within the CIP. Investments such as these tend to be smaller in scale (less than \$250,000), "like for like" replacements (e.g., old equipment replaced by new equipment with little to no functionality change), etc. These projects are rated by program managers based on criteria tailored to each program and implemented as annual funding allows.

Larger capital investments which are best implemented on a stand-alone basis due to the size and complexity of the project are evaluated and ranked separately based on the following criteria:

- asset preservation/replacement/maintenance;
- product lifecycles;
- legal requirements/mandates;
- security/risk mitigation;
- reimbursable from other sources (other depts. or outside entities, grants, reserves);
- dependencies (on other products, equipment, etc.; also, on staff/resource availability/long-term supportability);

- internal customer demands (including capacity) – including Mayoral/Council/Mayor’s IT Subcabinet priority;
- external customer demands – public, businesses, etc.;
- external drivers (vendor changes, regional commitments, etc.);
- efficiency/effectiveness improvements/resource savings and return on investment; and
- key future trend/forward-looking/pro-active.

Summary of Upcoming Budget Issues and Challenges

- **Rapid and Major Changes in Technology.** The continued rapid rate of change in technology presents a major challenge for the City. User demands (both internal staff and constituents) around technology continue to grow as available functionality expands exponentially. New technologies provide new solutions and new opportunities, but at the same time they can initially disrupt productivity, require upfront costs, and impact security, privacy, and the governance landscape. Vendors regularly “de-certify” and stop supporting products the City relies upon, leaving the choice of spending significant amounts of money to upgrade to supported products or risk running important/critical City functions on unsupported platforms. At the same time, the method by which vendors deliver technology solutions is rapidly changing. Many vendors have moved or are moving away from delivering a software product to the City for installations on City servers; instead, they are offering cloud-based and hosted solutions that the City can access on a subscription basis. While offering many benefits, this changing delivery approach requires increased City investments in identity management, data integration, and contract management.
- **An Under-Investment in It Over Many Years, Duplication, and Limited Lifecycle Management.** Departments want to move fast to leverage new technologies before we have developed the platforms, teams, or culture to make this happen. Seattle IT must balance the competing objectives of doing things right and doing them right now.
- **Rationalization.** The City had a 15-year history of making technology decisions in the context of individual departments without referencing or considering efficiency or the costs to the City government as a whole. With the creation of the Seattle Information Technology Department, the City can now more clearly identify the duplication created from the historical approach to IT. Many systems in the City perform the same or similar functions, which results not only in higher upfront costs but duplicative, more expensive ongoing maintenance and operations. Planned and future investments are made in the context of application rationalization, seeking current and future initiatives which will allow the reduction of duplicative services and help reduce application spending.
- **Security and Privacy.** The security risks associated with technology continue to grow - the variety of threats from mobile devices, social media, compromised web sites, and other sources continues to multiply. Cloud services like Office 365 and the increased use of mobile devices offer a new set of security-related challenges. At the same time, the City collects and uses a vast and expanding amount of data on a regular basis. Some of this data contains personally identifiable information or may otherwise pose a privacy concern if exposed or if used in a manner inconsistent with public expectations. Emphasis is shifting away from end-point security to risk management of critical assets and assurance of identity. Preventive controls are no longer reliable, requiring a greater emphasis on the ability to locate and quickly remediate compromised technology.

- **Public Expectation.** The public has high expectations for how government performs, including how technology is used to deliver efficient and accessible government services. Some Seattle residents are tech savvy while others still lack internet access. Generational differences also create different expectations regarding services. Investments in new technology-enabled government services must balance the needs of many audiences.

Future Projects/What Is on the Horizon

Seattle IT has identified several initiatives and issues which will need to be addressed at some point in the future.

- **Software Systems Which Require Replacement/Upgrades.** Prior to IT consolidation, the Department of Information Technology CIP did not include funds to cover replacement of large applications owned and operated by individual departments. Since consolidation, Seattle IT has “inherited” responsibility for many such systems, most of which did not come with any long-term replacement funding. Replacement and upgrades for systems owned and operating by Seattle Public Utilities and Seattle City Light are generally being funded out of their own CIP with Seattle IT acting as the service provider. However, funds for large applications and systems needing replacement are not comprehensively programmed into our CIP. Instead, Seattle IT will continue to address these needs on a case by case basis as the need arise.
- **Long-Term Major Upgrades to the Regional Radio System.** The City is part of a regional public safety radio system. The current technology platform is approaching phased obsolescence and needs to be replaced or upgraded in the next few years. The four co-owners of the existing system, including the City of Seattle and King County, are working together to implement a replacement radio system. A levy to fund this important initiative was passed in spring 2015, and a formal governance structure for the effort was adopted via an Inter-Local Agreement signed by the 12 participating jurisdictions. Work on tower siting, design and construction as well as system design is currently underway and will continue into 2020. Deployment of radios to end users is currently anticipated for 2021. The current CIP does not reflect the results of any potential changes related to the new system, as discussions regarding the long-term governance and operational support are still ongoing.
- **Infrastructure Systems Which Require Replacement/Upgrades.** Seattle IT’s CIP contains sufficient funding to cover routine replacement of lesser value items, especially those which occur every year (e.g., switches, mid-range servers, etc.). However, larger value, intermittent replacements are more difficult to fund within existing budget. These needs will continue to be addressed on a case by case basis as the need arises.

800 MHz Radio Network Program

Project No:	MC-IT-C3550	BSL Code:	BC-IT-C0700
Project Type:	Ongoing	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th Ave / Various
Current Project Stage:	N/A	Council District:	Council District 3
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project funds the upgrades and replacement of software and hardware for the City of Seattle’s portion of the King County Regional 800 MHz radio system. The 800 MHz radio system provides the communication infrastructure required for public safety operations such as 911, Medic One, Fire and Police.

O&M Impacts: This CIP project represents ongoing capital purchases to support our operating shared services projects. Ongoing impacts are built into Seattle IT’s budget.

Applications Development - Public Safety

Project No:	MC-IT-C6307	BSL Code:	BC-IT-C0700
Project Type:	Ongoing	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	N/A	Council District:	Council District 3
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project provides funds to develop and implement software applications used by the Seattle Police Department (SPD). The applications will improve personnel oversight and deployment, in addition to enhancing the accessibility and quality of SPD data. These applications will support ongoing efforts to achieve improved transparency and compliance. In the 2018 budget process, Council adopted a proviso on SPD's Record Management System (RMS) project which is described in the Department Overview section.

This project provides funds to develop, implement, and enhance software applications used by the Department of Parks and Recreation (DPR). Identified projects will improve business processes for budgeting, contracting, regulatory compliance, and data management. Additionally, this effort seeks to replace or refresh current systems while consolidating duplicative systems.

Data Analytics Platform - Seattle Police Department

Project No:	MC-IT-C9502	BSL Code:	BC-IT-C0700
Project Type:	Discrete	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Council District 3
Start/End Date:	2016 - 2018	Neighborhood District:	Downtown
Total Project Cost:	\$13,128	Urban Village:	Downtown

This project provides funding for a Data Analytics Platform (DAP) in the Seattle Police Department to consolidate and manage data provided by a variety of systems related to police calls and incidents, citizen interactions, administrative processes, training and workforce management. This project will satisfy the requirements of the Settlement Agreement with the Department of Justice.

SPD Body Worn Video

Project No:	MC-IT-C9300	BSL Code:	BC-IT-C0700
Project Type:	Discrete	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 3
Start/End Date:	2016 - 2018	Neighborhood District:	Downtown
Total Project Cost:	\$4,060	Urban Village:	Downtown

The project includes the procurement and implementation of the Seattle Police Department's body-worn camera program. The project includes funding for equipment, operating and maintenance costs, and personnel costs for 2017 and 2018. Additional staff resources will be identified once a system is selected through the RFP process. SPD plans to issue the first cameras to patrol officers in early 2017. SPD developed a proposed approach for implementation, largely informed by the pilot program conducted in 2015.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Advanced Metering Infrastructure	MC-CL-ZS8426	<p>Rationale: City Light is at a point where replacement is unavoidable and needed in the short term due to the age and condition of its meters, meter reading equipment, and software. Approximately 50% of 350,000 residential meters in the field are at least 30 years old, which is outside the estimated lifespan for electro-mechanical meters. As of February 2009, residential electro-mechanical meters are no longer being manufactured. The software and handheld devices currently used by City Light meter readers to manually capture and record reads will no longer be supported after 2012. In addition, City Light currently employs 57 FTEs in Customer Billing and 44 FTE Meter Readers, of which 43%, or 25 FTE and 19 FTE respectively, are eligible to retire by 2014. This presents an opportunity for SCL to make operational changes that move the utility from a manual to an automated system at a time when it is needed. Alternative(s): Option 1 - Recommended solution: Full AMI implementation as entered. This option's up front capital costs result in significant net savings due primarily to reduced labor costs and increased revenue. In addition, it establishes the infrastructure, technology, and capabilities for improved customer service and support for future plans and operations. Option 2 - Status quo: Continue current meter replacement cycle using current commercially available digital meters without communication capabilities. At the current expenditure rate, between 5,000 and 7,000 meters are installed annually (replacement of failed meters, new meter growth, service changes, etc.). This option minimizes current annual capital costs, but does not provide for timely replacement of all electro-mechanical meters. In the event of accelerated failure rates from the aging meter population, capital costs would escalate. Other options previously screened out: A. Replace failed electro-mechanical meters with working electro-mechanical meters. The cost of purchasing electro-mechanical meters is currently lower than digital units but they are no longer being manufactured. SCL would have to acquire used or refurbished replacement meters from other utilities or companies, with the risk that availability will be reduced over time. B. Replace current electro-mechanical meters on an accelerated schedule using commercially available digital meters without communication capabilities. This option carries significant capital costs for meters, although it does not require the communications and IT infrastructure. It provides limited benefits, primarily through increased meter accuracy, but provides severely limited benefits compared to AMI deployment. C. Deploy AMI on a limited basis to Commercial and Industrial customers, plus a limited number of small services with access problems. Partial implementation would require reduced capital costs but substantially the same investment.</p>	Citywide	\$ -

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Alaskan Way Viaduct and Seawall Replacement - Utility Relocs	MC-CL-ZT8307	<p>Rationale: The Alaskan Way Viaduct replacement includes a complex transmission and network/non-network relocation, design and construction, and is on a fast track. This work is integrated and required by the broader transportation project. The externally generated project and schedule includes significant electrical relocation work in the near term that will extend for over a decade. The utility is required to relocate for transportation relocated projects. The City's overall plan for the Alaskan Way Viaduct project includes utility funded relocations for the viaduct replacement and for rebuilding the Seawall. The series of subprojects that make up the Alaskan Way Viaduct replacement have opportunities for system improvements that will also be funded under this program. For most of the subprojects in the Alaskan Way Viaduct project, utility relocations will lead the construction. Therefore any delay in accomplishing SCL work will result in delays along the overall projects critical path. While the designs & construction schedules for the various subprojects in the Alaskan Way Viaduct program are being sequenced and detail design is underway for the immediate projects, the central waterfront elements of the overall project are beyond this budget cycle and are still in the preliminary design phases. Alternative(s): The Alaskan Way Viaduct program provides the utility with a combination of obligations and opportunities for system improvements over the next 6 years. The Alaskan Way Viaduct program will likely be the City's primary construction focus as its various projects impact traffic and roadway construction, seawall stabilization, and urban design on the waterfront. Seattle City Light facility relocations will be a part of each of these projects. The global nature of the Viaduct Program also provides the opportunity to make system improvements that will provide for increased reliability and capacity for our customers. For example, work in the south end will include system improvements that will increase feeder capacity and reliability for Port customers. Undergrounding of transmission lines near Broad Sub are being done as part of an overall SDOT street improvement with costs shared based on a negotiated MOA with SDOT. The return of Aurora, north of Harrison Street to a city street, and the decommissioning of the Battery Street Tunnel provides an opportunity to extend ducts and vault across Aurora to help provide system capability to the NODO area.</p>	SR 99 / Battery St	\$ 21,959

Boundary Powerhouse Generator Step-up Transformer Replacement	MC-CL-XB6493	Rationale: Design to begin in 2010. Closeout in 2017. First transormer delivered in 2012. Alternative(s): An alternative approach would be to repair or replace units as they fail from deferred maintenance. This approach would eventually result in a significant loss of revenue and/or fines from a regulatory agency. Accepting the risk of failure would not be in the best interest of the utility. Having a spare unit onsite would prevent such failures.	10382 Boundary Rd, Metaline, WA 99153	\$ 7,635

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Broad Street Substation - Network	MC-CL-YN8203	Rationale: Customer demand for higher loads continues. Capacity of the cables serving two sub-networks is near overload, requiring immediate attention to avoid cable failure and customer outages. In the next five years, customers are projected to exceed the capacity of cables in another five network subareas. This capital project addresses the means to serve customer demand for higher capacity. Reliability measures identified in the Network Strategic System Plan are incorporated into this capacity driven work. Without this critical project it is very likely that there will be insufficient reliable electrical capacity in the very near future to hook up new customers and to serve present customers such as the Westin building. hernanju (7/29/21010): The project goal increases capacity of present Broad Street Substation network feeder cables to their ultimate service build-out limit (an overall increase of just under 100 MVA) as determined by Broad Street Substation's transformer capacity. This project constructs ten vaults and ten blocks of duct banks, re-conductors and relocates three primary feeders per year, upgrades/optimizes network transformers as needed, reduces secondary bus ties (reduce the size of the secondary grid resulting in greater reliability), and performs ancillary work. Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the customer reliability of the network systems from its present level, subjecting it to infrequent but lengthier outages. 2. Reduce customer demand for more loads with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders incrementally, as little as possible and as close to near-term load requirements as possible. 4. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 5. Add measures that improve system reliability to mitigate the severity of any network event. 6. Add measures that improve customer reliability by preventing the chain of events leading to major customer impacts.	319 6th AVE N	\$ 4,472

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Denny Substation - Network	MC-CL-YN8404	Rationale: This project is a result of a four years of advocacy by customers to make sure that the electrical distribution system has sufficient capacity to meet the projected loads in the rapidly growing area of North Downtown, and that the system has the reliability and voltage stability to support the research activities of the emerging biotech industry there. The principal stakeholders are the Fred Hutchinson Cancer Research Center, the UW School of Medicine, the Seattle Biomedical Research Institute, Rosetta Inpharmatics, ZymoGenetics, Children's Hospital and Medical Center, and the startups at the Accelerator Project. This five to seven year infrastructure project is specifically tailored and designed to the core needs of this business sector in the North Downtown area. The research activities and the laboratory equipment are so sensitive to system reliability and voltage stability that this area requires an extraordinary level of service from the utility. The motto is "World class research requires world class facilities.". The utility through this project is a partner in that effort. Because existing City Light substations cannot accommodate the new network feeders, this project requires the construction of a new North Downtown substation in a three to five year period, proposed as project 7757, North Downtown Substation Development. This network project cannot exist without the new substation. Alternative(s): 1. Enhance the service using non-network feeders from other substations. 2. Have individual customers invest in private reliability improvements. 3. Install network system in core service area, including the biotech industries. 4. Install network system throughout North Downtown area. Option 1 is not feasible because the availability of feeders from adjacent substations is limited and in question over time. Option 2 has been tried recently, but did not meet the reliability needs of this set of customers. Option 3 is the recommended option, as it is effective in meeting the need and cost effective. Option 4 includes all customers in the area, which is not necessary and expensive.	Valley Street	\$ 11,262

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Distribution Area Communications Networks	MC-CL-YD9307	<p>Rationale: The communication systems now employed are in need increased capacity, better security, faster speeds, and increased reliability to meet new regulatory requirements. This will meet our ever increasing data and voice communication needs and take us twenty years or more into the future. Maintenant costs are lower because increased redundancy and reliability as well as better system alarms and the capability to remotely troubleshoot and reprogram the system. Traffic on the network is easily rerouted until major failures can be repaired. The new requirements of security, relaying, Automated Meter Reading, Automated Distribution and other automated systems will be easier to implement at lower cost once this project is completed. The system is easily upgraded to increase capacity or take advantage of new technology as it becomes available.</p> <p>Alternative(s): Option 1 Proceed as proposed. Install/complete fiber optic rings. Option 2 Do nothing. Have an inadequate communications network, with a high expense O&M component.</p>	Citywide	\$ 3,565

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Distribution Management System	MC-CL-YD9966	Rationale: City Light currently uses manual processes to accomplish this work, but without the same outcome. Manual processes require reviewing maps to determine system configuration and options. They also do not provide accurate estimates of customers impacted by planned outages, and require additional labor to perform planning. DMS would be installed when it is determined that City Light has enough substation automation, communication infrastructure, Advanced Metering Infrastructure (AMI), and Supervisory Control and Data Acquisition (SCADA) field switching equipment in place to benefit from its use. The labor saving benefit will be achieved by maximizing the utilization of the substation and SCADA field switching equipment linked to the DMS. Customers will receive more accurate information regarding planned outages, and in some cases, reduce the area needed for the outage because of the ability to create switching scenarios during the planning process. Alternative(s): The only alternative direction would be to delay installation of DMS or choose not to install.	Citywide	\$ (0)

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Equipment Fleet Replacement	MC-CL-XF9101	<p>Rationale: As mobile equipment ages, it reaches a point where it becomes more economical to replace the equipment than to continue to repair it. In the past, the mobile equipment fleet coordinator used a twenty year replacement plan to maintain City Light's vehicle pool. Due to replacement deferrals starting in the mid 90's and the budget cuts which began in 2000, that replacement plan by necessity was revised. We are now faced with replacing fleet on an as needed basis. That priority is to replace the most often used, specialized, or critical equipment to the Utility, or the most costly to maintain and least reliable vehicles first. To get back to an established plan will require seven plus years of enhanced financing. A seven year recovery plan requires \$10 million annually. That plan has been underfunded for 15 years. The planned annual purchases, per the twenty year plan for the heavy fleet equates to approximately \$8 million per year. That \$10 million replaces the equipment that normally needs to be replaced every year and addresses some of the equipment that has been deferred. The proposed \$10 million will not fully cover inflation and the increasing cost of materials as many purchases now have a steel surcharge added. There are also added emissions requirements for the coming years starting in 2007. This will require about \$10,000 per diesel engine along with design changes to accommodate space for higher heat and larger exhaust pipes. The Memorandum of Understanding between the Fleet Management Department (FMD) and Seattle City Light (SCL) regarding financing and management of the City Light Fleet states on June 22, 1998, the City Council adopted Resolution 29771. In that resolution is reference to Timely Replacement of Vehicles. The recommendation is to replace vehicles in a timely manner, when fully depreciated.</p> <p>Alternative(s): The recommended alternative is to address the backlog of City Light vehicles, heavy and light fleet, on a plan spread over 7 or more years (a \$30 million backlog currently on a \$130 million fleet) A second plan would be to not purchase fleet vehicles. This option would result in paying both higher maintenance costs for worn out vehicles and higher rental costs both for specialized vehicles and daily use vehicles currently at \$2 million annually. It also has safety ramifications when considering malfunctions and inopportune breakdowns. A third plan would be to continue to not address the back log but replace on an as needed basis. This plan requires more rental costs and time loss due to equipment down time. It also does not address the need to be more fuel efficient and environmentally friendly. This plan to replace only as needed would be less reliable for tracking or budgeting. Address the back log through a sevenh year or longer plan.</p>	System wide	\$ 7,182

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Interbay Substation - Development	MC-CL-YS7756	<p>Rationale: The Broad Street Substation is reaching its capacity to serve the network and the growing South Lake Union neighborhood. The limiting factor is an inability to construct additional underground feeders to carry electrical current in to the area. The existing 26 kV distribution system and substations are becoming overloaded and a new 26-kV substation will feed the areas load growth. The 115 kV ring bus work at Broad Street and Canal Substations will provide the connections to the transmission system. The new substations will provide 10 to 15 new 26 kV getaways, adding to the distribution network and providing a new path for power to the area. Because City Light already owns property for a station in Interbay, it is the nearest opportunity we have to add capacity in the western part of the service area that will off-load demand from the Broad Street Substation for the South Lake Union district. Developers who are interested in projects in the SLU district want to know that City Light will be able to serve their needs reliably. Alternative(s): 1. Not build the new substation. 2. Option one build: Contract out the design and construction 3. Option two build: Have City Light design and integrate the facility into the distribution system, and construct the facility. It requires at least 36 months to site, contract for design, construct, and energize a distribution substation. There are several alternatives such as installing distributed generation facilities to meet load growth. City Light has considered constructing additional transmission corridors from the University Substation and/or Canal Substation. Both alternatives require crossing a body of water, which are expensive options even if environmental challenges do not delay or halt progress. Given the recognized growth in South Lake Union, City Light selected the most cost effective and achievable option - constructing a station at Interbay to serve the growing load in that part of the service territory.</p>	17th Ave West	\$ 29

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Massachusetts Street Substation - Networks	MC-CL-YN8202	Rationale: The rationale for this project is to increase the capacity and reliability of present Massachusetts Street Substation network feeder cables to their ultimate service build out limit (an overall increase of 69 MVA), as determined by Massachusetts Street Substation's transformer capacity, with allowance for feeder imbalances, feeder diversity and diversity among sub-networks. The Alaska Way Viaduct project will require the relocation of all 13kV distribution feeders that are suspended from the viaduct. These include feeders serving Pioneer Square and the downtown core. Additional duct banks and electrical vaults must be built throughout the Pioneer Square area to accommodate the feeder relocations. Doing the engineering for this relocation during 2007 will ensure that timely civil construction can be done in order to avoid many conflicts with other utilities and mitigate some of the traffic impacts that will occur during the Viaduct and Seawall construction. Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the customer reliability of the network systems from its present level, subjecting it to infrequent but lengthier outages. 2. Reduce customer demand for more load with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 4. Add measures that improve system reliability to mitigate the severity of any network event. 5. Add measures that improve customer reliability by preventing the chain of events leading to major customer impacts.	1555 Utah Ave S	\$ 3,420

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Meter Additions	MC-CL-ZS8054	<p>Rationale: Background: Of the 400,000 meters in City Light's metering system, approximately 80,000 are older than 30 years. City Light's Rates Unit estimates that replacing the meters would result in an increase in revenues of more than \$450,000 annually. City Light has a fiduciary responsibility to continually update the metering system. Due to continuous budget constraints, both in labor and material, targets of 10,000 obsolete meter exchanges were reduced in 2000, 2006 and 2008 to our current level of 5300, thus the backlog of older meters continues to increase. Methodology: New Service Installations: Over the past 9 years, new or upgraded services have averaged 5,500 a year. Material budgeting was based on a 2006 to 2008 average and current labor figures. These project funds support the demands of new construction and upgraded services. Obsolete Meter Exchange: The life cycle of a meter is 30 years based on the electro-mechanical meter. However, current and future electronic technology may reduce this life-span up to 50%. Older meters slow with age, resulting in a loss of revenue to the Department. Obsolete meters can account for up to 3 percent loss in department revenue. The Technical Metering Unit expects to exchange 10,000 obsolete meters annually starting in 2013 through 2016. Alternative(s): 1. Continue to replace obsolete meters at current level of 5,300 annually. City Light could not accurately bill for electrical consumption. Incur loss of City Light revenue due to slow meters. Results in increasing backlog of meters over 30 years old. Increased future utility costs due to replacing obsolete meters at an accelerated pace with higher labor and material costs. 2. Continue to replace obsolete meters at higher level of 10,000 annually. Increase number of customers who receive accurate and timely bills. Reduce loss of utility revenues due to slow meters. Avoid higher cost of meter replacement when meters fail.</p>	System wide	\$ 3,700

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Neighborhood Voluntary Undergrounding Program	MC-CL-ZO8383	Rationale: Many residential customers have a strong interest in converting overhead power lines to underground lines. Legislation limits City Light from subsidizing this activity from the general rate base. Since the City enacted Council Ordinance 112738 in 1986, customers wishing to convert an existing service from an overhead to an underground connection have utilized the utility's Voluntary Underground Program (VUP). It requires that the customers pay all costs associated with any residential undergrounding. This is still currently a part of the Seattle Municipal Code (SMC) in Section 21.49.110.T. The Seattle City Light VUP coordinator works with any customer or customer group expressing an interest in undergrounding to form a VUP project. The purpose of the Voluntary Underground Program (VUP) is to satisfy residential customers who are interested in converting their overhead distribution system to an underground system. This project allocates customer support, design, and construction services so that the customers feel well treated whether or not they ultimately decide to go ahead with the conversion. Alternative(s): No Alternatives Provided.	System wide	\$ 15

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Network Hazeltine Upgrade	MC-CL-YN8129	<p>Rationale: Using the Network Hazeltine system provides reliable power by remotely monitoring the electrical vaults and electrical equipment within the entire downtown service area. The Power Dispatchers constantly monitor the real time status of the network using the Hazeltine system. This program costs \$304K per year and avoids problems that can easily exceed twice that amount for Seattle City Light and its customers. The utility's cost for one such problem can range from \$200K up to as much as \$3M. Aggregated customer costs can range from \$100K up to \$5M. The benefit cost ratio for any one problem can range from 0.99 $(\\$200k + \\$100k) / \\$304k$ to be as high as 26.3 $(\\$3M + \\$5M) / \\$304k$. We usually avoid 4 to 5 smaller problems each year and a larger problem, with combined costs of \$1.53M, every 5 years. The yearly benefit cost is then $[4 * 0.99 + 1.53M / (304k * 5)] = 5.0$. Alternative(s): 1. Do nothing. Do not change existing Hazeltine system. Hazeltine has changed the production of their transmitters, forcing utilities to pay a premium for the transformers that is a fraction of the cost of upgrading to their Next Generation equipment. 2. Upgrade to Hazeltine's Next Generation system, changing station receivers and transmitters on each transformer. Total cost is about \$2.2 million. 3. Develop SCL proprietary network EMS system, capable of monitoring plus a new function of control of NP's, BTS's, and primary switches if they are added. Total cost ranges from \$7 million to \$17 million, depending on communications option selected. This excludes developmental costs. 4. Buy any upgrades from vendors only. Wait for Hazeltine or other vendors, to develop network EMS systems with the desired control and monitoring features. No products or competitors to Hazeltine are available at this time for cost estimates. 5. Add sensors to existing or future Hazeltine system to enhance the monitoring of the network environment. This would enable system operators to detect and respond to abnormal field condition and thereby improve customer reliability. 6. Continue existing program of upgrading the sensors to match the current SCL standard. In 2007 and 2008, review the Hazeltine program and determine if more significant upgrades are feasible. Presently, this is the recommended action and funding level for 2007 and 2008. The 2009 and beyond dollars are expected expenditures for the significant Hazeltine upgrades, if approved.</p>	System wide	\$ 766

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Pole Attachments	MC-CL-YR8452	<p>Rationale: City Light is legally and contractually obligated to make space available on its facilities to government and private entities for communication and other purposes. Customers wishing to utilize space on City Light facilities are required to pay in advance for any necessary work required to provide the necessary space and minimum clearances to the electrical equipment. This ensures that the attachments meet all applicable federal, state and local safety codes. Customers are not allowed to make any attachments until all make ready work, including tree trimming, has been completed and the system made safe for the communication worker. Speed to market in the communications industry is critical for them to maintain their competitive advantage. Customers pay in advance for City Light crews to complete this work on overtime, without interrupting the normal assignments of the crews. All construction charges are deposited into the Light Fund. New wireless facilities and pole attachments generate an additional \$100,000 in rental revenue annually. Currently \$3.3 million in annual rental revenue is being generated and will continue to increase as construction and make ready work is completed. All rental revenue is deposited into the Light Fund. The communications industry and associated technology are growing at an astounding rate. City Light has experienced a 375 percent increase in pole attachment applications since 2007. All trends indicate that this growth will increase by an average of 24 percent annually. This does not take into account major initiatives such as fiber to the home, Advanced Metering Infrastructure (AMI), or vast expansion of existing networks and Distributed Antenna Systems (DAS). Completing the construction for make ready work and wireless facilities will enable City Light to fulfill its legal and contractual obligations to our customers. Customers will be provided a small measure of rate relief through increased revenue streams from these additi</p> <p>Alternative(s): It is possible that some or all of this construction work could be outsourced to electrical utility construction companies. This alternative presents obstacles like logistics, compatible parts, quality control, and required electrical reviewers. These challenges negate any cost savings and sometimes take longer to construct.</p>	System wide	\$ 16,614

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Power Production - Network Controls	MC-CL-XP6385	<p>Rationale: A 2003 Report from Westin Engineering identified limits to our automation, remote control and supervisory control capabilities at Skagit. Among other things, the report found that there are protocol issues within and between the facilities and between the facilities and the System Control Center. Improvements are necessary before supervisory control, such as remote start stop and remote loading can be achieved. The consequence of not coordinating all the individual controls and monitoring projects is that we will not resolve our protocol issues, and that we will continue to limit our ability to remotely control and operate the plants. This leads to reduced efficiencies and higher production costs. Project Weighted Rating-26.8, Primary Rationale-Reliability Alternative(s): Do nothing. This is not advisable as it can lead to higher maintenance costs and to unscheduled outages due to unforeseen catastrophic bearing failures. Do partial replacements. This has been the approach. However, there are incompatible pieces that cannot be replaced or replicated as some components are no longer in production. This results in greater potential of system failures due to outdated electronic components being run past their life or not updatable.</p>	500 Newhalem Creek Rd, Marblemount, WA 98267	\$ (0)

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Security Improvements	MC-CL-YD9202	Rationale: If Seattle City Light's Security Improvements Program is underfunded, its critical facilities face increased risk to sabotage, vandalism, theft, and terrorism that can result in the loss of valuable infrastructure for generation and distribution of power, as well as noncompliance with North American Reliability Council (NERC) 1200 Standards, adopted May 2, 2006, to improve security at critical facilities that house command and control systems. Curtailment of Seattle City Light's electric operations would impact reliability of the power system in the Pacific Northwest, create lost revenues, and jeopardize public safety and emergency response due to loss of lifeline services such as medical services, water and wastewater systems, communications, law enforcement, banking, transportation system, etc. Alternative(s): Option 1, Status Quo: No centralized security system. Operate local security systems in place and use local law enforcement and private security companies to address security on a limited basis. Use private security services and/or request additional assistance from local law enforcement during times when the Federal government has raised the alert level for the nation or region, or for a situation that has occurred requiring additional security services. Option 2, Centralized Security System: Seattle City Light installs security enhancements to delay, detect, and respond to security intrusions at its critical facilities that are connected to a central security monitoring center that will be staffed by trained security guards on a 24/7 basis to monitor and respond to security incidents. Department wide response procedures will be established and coordination with local law enforcement will be established for responding to security incidents.	System wide	\$ 2,616

Sound Transit - City Light System Upgrades	MC-CL-ZT8475	Rationale: Pursuant to its role as a utility in the State of Washington, City Light must supply Sound Transit with electric power. The system capacity work to be done under this project needs to be coordinated with City Light's other capacity planning work, so a comprehensive project will provide a better tool to manage work than would several piece-meal projects focussed on separate distribution feeder upgrades. As of the 1st quarter of 2016, some system planning work is being done on the separate Sound Transit Link projects. These separate but related efforts will probably be brought into this new project. Alternative(s): No Alternatives Provided.	City Wide	\$ 25

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Sound Transit Light Rail East Link - City Light	MC-CL-ZT8450	Rationale: Sound Transit is in the preliminary stages of planning a light rail line running from Seattle's International District Station to the Bellevue Redmond area. As of 2Q2010, final decisions on the alignment to be chosen have not been made by Sound Transit and SCL has not begun engineering. Per Sound Transit's official communications, the current plan states that Sound Transit's board will select the final alignment for East LINK in 2011 after the EIS is completed. As of 2Q2010, SCL has pointed out that the main area of potential concern with its facilities is the possible crossing under SCL's eastside transmission lines in SE Bellevue, depending on the location chosen for the East LINK alignment there. Until a final alignment is chosen, SCL anticipates that we will be acting in an advisory role. So far, discussions regarding the Seattle section of the East LINK alignment have proposed locating a station somewhere in the vicinity of the 23rd Ave E & Rainier Avenue S neighborhood. Also, current plans are that the line would not be underground between the International District Station and the I-90 Bridge, although all plans are subject to change ahead of the board's vote next year. Sound Transit estimates construction could then start in late 2013 or early 2014 SCL will develop engineering estimates and a complete budget, working with Sound Transit's project team, as more details of the project move forward. Depending on the final alignment, SCL will revise our FY2011 budget as needed to fit Sound Transit's time lines. As Sound Transit readies for the board's vote on the alignment, we will work with Sound Transit on an MOA regarding SCL cost reimbursement. It is anticipated that the project will be 100% reimbursable to SCL in keeping with past work with Sound Transit. Alternative(s): SCL must, if possible, facilitate the construction of this customer's project.	I-90	\$ -

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Substation Capacity Additions	MC-CL-YS7751	Rationale: We plan to design the feeder get-aways to carry power from substations as needed. Alternative(s): The alternatives to making capacity additions to existing substations are: 1. Accepting limitations on service to customers. 2. Successfully promoting voluntary power demand reductions. 3. Meeting capacity demand increases by new substations and transmission lines.	System wide	\$ 2,456

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Substation Comprehensive Improvements	MC-CL-XF9161	Rationale: 1. Reduce the risk to communications equipment and power network controls in order to sustain City Light's historically high system reliability. 2. Reduce workplace complaints among substation staff so that City Light maintains its harmonious relationship with electrical workers. Alternative(s): 1. Fund Program 9161. 2. Eliminate Program 9161 and make limited scope improvements in reaction to critical situations. 3. Eliminate Program 9161 and fund substation improvements out of other programs. 4. Make no improvements and finance increasing risk through insurance. 5. Eliminate Program 9161 and complete substation improvements as an O&M expense.	System wide	\$ 236

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Substations Demand Driven Improvements	MC-CL-YS7755	Rationale: Requests from other agencies typically occur without enough notice to be included in the biennial budgeting process. The Power Stations Division budgets a nominal sum for each year to cover requests and to request spending authority. Alternative(s): The alternative to implementing regional demands is failing to meet City commitments to regional agreements.	System wide	\$ 5
Underground Customer Driven Capacity Additions	MC-CL-YR8360	Rationale: This project adds capacity to the distribution system to accommodate increased load from new services. Alternative(s): The do nothing alternative leaves the existing system in place. New loads added to the system will adversely impact system reliability and voltage stability. It may be necessary, if the load increase is significant, to deny new service connections if the feeder capacity is inadequate.	System wide	\$ 5,293

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
Union Street Substation Networks	MC-CL-YN8201	<p>Rationale: The Union Street Substation Networks project provides sufficient and reliable electrical capacity for the growing power needs of our customers. It is a programmatic approach for comprehensive management of underground network assets (electrical and in some cases civil) serving customers in the area bounded by Yesler Street, Alaska Way, Pike Street, 6th Avenue, Union Street, the Freeway, University Street, 3rd Avenue and the Waterfront area from Denny to Yesler. The project goal is to increase the capacity of present Union Street Substation network feeder cables to their ultimate service build out limit (an overall increase of 128 MVA) as determined by Union Substations transformer capacity, with allowances for feeder imbalances, feeder diversity and diversity among sub-networks. We will re-conductor and re-route four targeted service feeders by the end of 2008 and perform associated work such as feeder balancing. This includes the work in support of finishing the main stem build out and to address capacity issues in the branch portion of the feeder service cables as needed in response to specific service requests, as well as analyses of branch cable congested areas. Work in 2007 and 2008 as well as successive years is necessary to be able to pick up loads that will likely be transferred from Broad Street sub-networks in 5 years. To meet the projected new loads on the Waterfront and at specific downtown core sites we need to complete re-conductoring and re-routing of four targeted service feeders by the end of 2008 and perform associated work such as feeder balancing that will be transferred from Broad Street, and may be transferred from Massachusetts Street; build and energize a new network substation at least six years before all Downtown network capacity is used so that service cutovers can be done with minimal impact to our customers. This work is essential to meet near term load requirements of the SAM/WaMu and Four Seasons projects. This critical project Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the reliability of the network system from its present level, subjecting it to more lengthy outages. 2. Reduce customer demand for more load with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders incrementally, as little as possible and as close to near-term load requirements as possible. This is no longer feasible as the next increment of feeder capacity additions reach their final capacity targets. 4. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 5. Add measures that improve system</p>	1312 Western AV	\$ 2,605

DEPARTMENT OF PARKS AND RECREATION

Project ID: MC-PR-21011
Project Title: Freeway Park Improvements
Location: 1227 9th AVE
2020 Proposed Budget: \$8,050,000
Description: This project will make major improvements to Freeway Park, including renovation and upgrades to its electrical and lighting systems, utilities, and storm-water infrastructure. Related work may also include enhancements to entries, renovation of the comfort station, site furnishings, wayfinding, programming and activation. This project is part of the Building for the Future Budget Summary Level, and using mitigation funds allocated from the convention center expansion public benefits package.

Project ID: MC-PR-31005
Project Title: Golf - Capital Improvements
Location: Multiple
2020 Proposed Budget: \$1,536,000
Description: This project is an ongoing program designed to improve the four City-owned golf courses (Interbay, Jackson, Jefferson, and West Seattle). Funding for these improvements is provided by green fees, golf cart rentals, ball purchases, and other golf revenues.

Project ID: MC-PR-41039
Project Title: Play Area Renovations
Location: Multiple
2020 Proposed Budget: \$2,500,000
Description: This project renovates a number of play areas in the park system. Improvements may include equipment replacement, ADA access, surfacing and containment renovation, and related elements. The sites will be determined each year using the Play Area Inventory and Assessment report.

SEATTLE CITY LIGHT

Project ID: MC-CL-XB6535
Project Title: Boundary Powerhouse - Unit 52 Generator Rebuild
Location: Boundary Rd, Metaline, WA 99153
2020 Proposed Budget: \$11,437,504
Description: This project provides rewinding and refurbishing of the Boundary Powerhouse Unit 52 generator, which is part of a programmatic series of projects to maintain and extend the useful life of the Utility's aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, rotor poles, etc. Mechanical upgrades such as seal rings and wicket gates may also be installed. This project also

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

provides replacement of the carbon dioxide fire-suppression system with a water sprinkler system to improve worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.

Project ID: MC-CL-XC6573
Project Title: Cedar Falls - Bank 6 Replacement
Location: Cedar Falls
2020 Proposed Budget: \$2,154,484
Description: This project builds a new substation at Cedar Falls and replaces the 60 yr old Bank 6 power step up transformer at Cedar Falls. Bank 6 provides the connection between our Cedar Falls Generating Units 5 and 6 and the transmission system. The aging transformer is water cooled posing an environmental hazard to the cities drinking water supply and the switchyard does not meet electrical clearance safety standards. The transformer and switchyard are approaching the end of their useful lives and the goal of this project is to replace them to resolve reliability, environmental and safety issues.

Project ID: MC-CL-XF9238
Project Title: Solar Microgrid for Resilience
Location: TBD
2020 Proposed Budget: \$261,584
Description: This project provides construction of an islandable microgrid located at a City of Seattle designated emergency shelter such as a community center, where a solar photovoltaic (PV) system coupled with an appropriately-sized battery energy storage system will be installed. The project provides backup power to support critical emergency facilities and services during extended power outages when electricity distribution facilities are down due to a catastrophic event, such as an earthquake, severe windstorm (or associated flooding), fire or landslide. Smart microgrids improve resiliency and reliability, minimize carbon footprints, and reduce costs. This project positions City Light as one of the utilities in the forefront of an innovative application of microgrids and serve as a testbed for testing and operating not just the microgrid, but the solar and battery energy storage system equipment as well. The Washington State Dept. of Commerce will grant the utility approximately half of the funding to cover the costs for this project.

Project ID: MC-CL-XS6515
Project Title: Skagit Facility Conservation
Location: Newhalem Creek Rd, Marblemount, WA 98267
2020 Proposed Budget: \$3,234,148
Description: This project provides funding for structural improvements to existing facilities at Skagit, both residential and commercial. It replaces lights, windows, and HVAC systems, insulates buildings, and performs related work. The project dramatically reduces the amount of energy expended to keep structures warm or cool depending upon the season.

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

Project ID: MC-CL-XS6520
Project Title: Skagit Facilities Plan
Location: Newhalem Creek Rd, Marblemount, WA 98267
2020 Proposed Budget: \$2,804,818
Description: This project implements a comprehensive facility plan to optimize buildings and structures at two Skagit town sites. The project preserves essential facilities that support SCL's power production needs, and retains important civic, cultural, and historic features in keeping with the historic preservation requirements of the Skagit FERC Licensing agreement. The project will reduce operational costs by dismantling and removing surplus facilities that require significant on-going maintenance.

Project ID: MC-CL-XS6540
Project Title: Skagit - Boat Facility Improvements
Location: Newhalem Creek Rd, Marblemount, WA 98267
2020 Proposed Budget: \$1,251,646
Description: This project provides design and construction of several new structures to support industrial and recreational boat operations on our Skagit reservoirs. Structures include a new tour dock, new dry dock, additions to the existing boat houses and a new barge landing in Diablo. The project provides improved visitor access for the Skagit Boat Tour, safer boat fueling facilities, reduced impact of snowfall on boats, consolidated barge landings, and improved dry docks.

Project ID: MC-CL-YD9967
Project Title: Outage Management System Phase II Implementation
Location: Citywide
2020 Proposed Budget: \$3,000,000
Description: This project funds City Light's Outage Management System (OMS) upgraded in order to maintain its availability as it be available 100% of the time. However, its application, operating system, and database have aged to the point where OMS' availability is at risk. It was fielded in 2011 and has not been significantly modified since. The upgrade of OMS will bring it to a currently supported product version (application, OS, database, physical infrastructure, etc.). The scope of this project is to cover as much as possible of the as-is system, with an additional change to integrate with the ongoing deployment of the Advanced Metering Infrastructure (AMI) initiative.

Project ID: MC-CL-ZL8481
Project Title: Seattle Waterfront Streetlight Installation
Location: 1312 Western AVE
2020 Proposed Budget: \$4,738,093

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

Description: This project funds the street lighting associated with the bored tunnel hybrid plan for the Alaskan Way Viaduct replacement which is a project that will result in the City rebuilding Alaskan Way, led by the Office of the Waterfront.

Project ID: MC-CL-ZS8350

Project Title: Overhead Outage Replacements

Location: System wide

2020 Proposed

Budget: \$1,181,279

Description: This ongoing project supports the capitalized portion of work resulting from unplanned, non-emergency, overhead outages. These outages result from events, such as storms, accidents, and equipment failures. The project funds permanent storm repairs and construction of new infrastructure to bypass failing equipment. The project ensures that customers' electric power is restored as quickly as possible.

SEATTLE DEPARTMENT OF TRANSPORTATION

Project ID: MC-TR-C031

Project Title: Pedestrian Master Plan - Stairway Rehabilitation

Location: Various

2020 Proposed

Budget: \$1,449,810

Description: This ongoing program implements the Pedestrian Master Plan. The goals of the program are to reduce the number and severity of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease. The projects rebuild and/or rehabilitate stairways to the latest standards, adding proper width, step height, grip rail, landings, and other features required by the Americans with Disabilities Act. The historical LTD amount for the Stairway Rehabilitation is in project TC367150.

Project ID: MC-TR-C042

Project Title: Delridge Way SW - RapidRide H Line

Location: Delridge AVE

2020 Proposed

Budget: \$15,226,743

Description: This project improves pavement conditions, enhances safety, and improves traffic operation for all modes. The project will add transit lanes and improve transit speed and reliability. It includes protected bike lanes, sidewalk improvements, and amenities for walkers and transit riders along the corridor. It will streamline traffic operations and improve multimodal connections between transit, freight, pedestrians, and general-purpose vehicles.

Note: The project title is changing from "Delridge Multimodal Corridor" to "Delridge Way SW - RapidRide H Line."

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

Project ID: MC-TR-C054
Project Title: SPU Drainage Partnership - South Park
Location: TBD
2020 Proposed Budget: \$7,300,000
Description: This funding will be used to partner with SPU's South Park Drainage Improvement projects. SPU is planning to install a pump station to control flooding in the South Park area. However, that alone will not control flooding. Many streets in the area are in poor condition and don't have a street drainage collection system. This funding will allow SPU and SDOT to partner to install the needed collection systems and repair the deteriorated roads.

Project ID: MC-TR-C078
Project Title: Route 44 Transit-Plus Multimodal Corridor
Location: TBD
2020 Proposed Budget: \$4,721,199
Description: This project will implement speed and reliability improvements along the Route 44 corridor. This project seeks to improve and make reliable the connection between the University of Washington, Wallingford, and Ballard. The project may add bus lanes, pedestrian improvements, channelization changes, signal modifications, transit signal priority, and new adaptive signals.
Note: The project title is changing from "Market / 45th Multimodal Corridor" to "Route 44 Transit-Plus Multimodal Corridor."

Project ID: MC-TR-C088
Project Title: Sound Transit 3
Location: Various
2020 Proposed Budget: \$1,802,326
Description: The City of Seattle is committed to actively collaborating with Sound Transit early in the environmental assessment and design phases of ST3 projects to refine and provide certainty around project scope and cost estimates, and to streamline and expedite the permitting processes.

Project ID: MC-TR-C097
Project Title: Seattle Transportation Benefit District - Capital Improvements
Location: TBD
2020 Proposed Budget: \$7,514,462
Description: This program funds projects improving transit speed, reliability, safety, and passenger amenities which occur along transit routes or at stops that serve the Urban Centers and Villages across the Seattle. The program will provide transit speed and reliability improvements allowing the people of Seattle to move more quickly,

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

effectively and travel via transit to, through, and between Urban Centers and Villages.

Project ID: MC-TR-C101
Project Title: North of Downtown Mobility Act
Location: TBD
2020 Proposed Budget: \$4,837,232
Description: This project will construct transportation related improvements in the North Downtown area in support of the Seattle Center Arena Redevelopment project. The City is also partnering with the Port of Seattle to improve movement of cargo and other modes on city streets, including 15th Ave W/Elliott Ave W/Mercer St corridor areas around Seattle Center.

SEATTLE PUBLIC UTILITIES

Project ID: MC-SU-C1128
Project Title: Distribution System Improvements
Location: Citywide
2020 Proposed Budget: \$2,000,000
Description: This ongoing project improves service reliability, pressure, capacity, and fire flow in the City's water distribution system. Typical improvements may include, but are not limited to, booster pump station installation, creation of new service zones, and tank elevation or replacement, as well as additional water main pipelines and pressure reducing valves. These improvements to service levels meet Washington Department of Health (DOH) regulations and SPU's Distribution System Pressure Policy to provide greater than 20 psi service pressure. These improvements provide higher flow of water for fire protection which improves public safety and results in smaller and shorter fires.

Project ID: MC-SU-C1134
Project Title: Tank Improvements
Location: Citywide
2020 Proposed Budget: \$5,566,665
Description: This ongoing project implements water quality, seismic, and other improvements to steel water tanks in Seattle. Functional water tanks are essential to public health protection as they assure that the distribution system is under pressure at all times, even when pump stations or control valves malfunction. Depressurization of the water system may result in siphoning back contaminants from faulty private systems and from the ground into the water pipes.

Project ID: MC-SU-C1418
Project Title: Reservoir Covering-Lake Forest
Location: Lake Forest Park

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

2020 Proposed

Budget: \$8,695,000

Description: This project addresses the need for a new cover on Lake Forest Park Reservoir once it has reached the end of its useful life. The project will evaluate options for a new cover, including replacing the existing floating Hypolan cover with a similar design. A new cover will be designed and constructed to maintain and improve the water quality protection and security enhancement functions of the existing cover.

Project ID: MC-SU-C1506

Project Title: Dam Safety

Location: Various

2020 Proposed

Budget: \$4,751,000

Description: This ongoing project maintains the safety of SPU's water supply dams in the Cedar River and South Fork Tolt River Municipal Watersheds and the in-town reservoir dams. Typical improvements may include, but are not limited to, upgrades to the dams' failure warning systems, spillways, outlet works, piping, and other civil, mechanical, and structural systems. This project ensures the continuing safe functioning, operation and monitoring of SPU's water supply dams and associated facilities per Federal Energy Regulatory Commission (FERC), state and local regulations, and SPU requirements to prevent loss of life and/or property damage and loss of SPU's ability to deliver reliable drinking water supply to its customers.

Project ID: MC-SU-C2403

Project Title: Midway Landfill

Location: Kent

2020 Proposed

Budget: \$8,240,000

Description: This program funds compliance activities related to the Midway landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Midway landfill closure project. The studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The flare improvements are also a regulatory requirement. To ensure that SPU maintains regulatory compliance, a smaller flare or new technology will be required. The current telemetry used to monitor the environmental control systems at the Kent Highlands Landfill and the Midway Landfill, both Superfund sites, are nearly obsolete and the equipment is no longer supported. In addition, the current system only transmits alarm conditions and does not have any data acquisition functionality. This program funds a replacement system that will allow remote data acquisition as well as alarm functionality.

Project ID: MC-SU-C3314

Project Title: Creek Culvert Replacement Program

Location: Various

2020 Proposed

Budget: \$2,883,883

Appendix B: Capital Projects passing the \$5 million threshold with the 2020 Proposed allocation.

Description:	This ongoing project provides for the repair and replacement of stream culverts that are part of SPU's critical drainage infrastructure. Culverts are prioritized for repair or replacement based on structural condition. Projects are then sequenced based on prioritization and other factors such as readiness to proceed, ability to address other drainage needs (e.g., flooding, maintenance), potential partnerships, synergies with other projects and availability of funding.
Project ID:	MC-SU-C3612
Project Title:	Future CSO Projects
Location:	TBD
2020 Proposed Budget:	\$3,406,442
Description:	This project is for future combined sewer overflow (CSO) reduction projects that will be identified through the CSO Long-Term Control Plan (LTCP) Update. Future projects are most likely to include underground storage projects, wastewater lift station improvements, and/or wastewater conveyance system improvements. Planning for the projects began in 2018, and the projects should complete their construction by 2030.
Project ID:	MC-SU-C5406
Project Title:	Science & System Performance
Location:	TBD
2020 Proposed Budget:	\$1,450,000
Description:	This ongoing project will provide new and improved technology applications and accompanying data management tools to support the gathering, monitoring, tracking and analysis of science and engineering information. Several planned projects include replacement of obsolete regulatory compliance tracking applications, upgrades to field monitoring equipment, and the integration of SCADA data with other data systems. This project enhances SPU's ability to control water quality and comply with environmental and health regulations.
Project ID:	MC-SU-C5407
Project Title:	Asset Information Management
Location:	Various
2020 Proposed Budget:	\$2,447,404
Description:	This ongoing project provides applications, upgrades and data management tools in support of SPU's work and asset management projects. Several new and updated technology solutions designed to enhance the efficiency and effectiveness of drinking water, sewer, drainage, and solid waste operations are planned. Activities within this project aim to further enhance safety and improve responsiveness of SPU's utility operations.

Appendix C: REET II Funding Report

Section 3(a) - Project pages as shown in the 2020-2025 Proposed Capital Improvement Program (CIP), which represents the City's Capital Facilities Plan, demonstrate that adequate funding from all sources of public funding exists to pay for all capital projects for the succeeding two-year period.

Section 3(b)/(c) - The following tables identifies how revenues collected under RCW 82.46.035 were programmed during the prior two-year period (2018 and 2019) where the City utilized the temporary provision for spending on housing the homeless, and the current planned spending for the succeeding two-year period (2021 - 2022). Proposed spending for 2020 represents the Mayor's Proposed Budget. Anticipated amounts shown for 2021 and 2022 represents current projections as seen in the Mayor's Proposed 2020-2025 Capital Improvement Program (CIP) and are subject to change based on actual revenues collected and unanticipated asset preservation/major maintenance needs or changes in priorities. Not all anticipated revenues have been programmed in the CIP to allow for addressing emergent needs that have yet to be identified or set aside as a reserve for planned items yet to be programmed.

Amounts are in thousands

Appendix C: REET II Funding Report

Section 3(d) - The table below identifies the amounts and percentage of City resources allocated to Capital Projects.

Revenue Source	2020 Proposed Amount	% 2020
Bond Financed	53,960,141	3.9%
Federal Funds	57,634,223	4.2%
King County Funding	53,849,516	3.9%
Other City Funds	63,202,520	4.6%
Other Local Government	12,974,577	0.9%
Private Funding	17,964,794	1.3%
Real Estate Excise Tax	90,814,804	6.6%
State Funding	96,943,289	7.1%
Utility Funding	761,699,909	55.7%
Voter-approved Funds (Seattle and King Co.)	159,566,848	11.7%
Total	1,368,610,620	100.0%

1% for Art: A program administered by the Office of Arts and Culture (ARTS) that sets aside one percent of eligible City capital improvement project funds for the commission, purchase, and installation of artworks.

2000 Parks Levy (“Neighborhood Parks, Green Spaces, Trails, and Zoo Levy”): A \$198.2 million, eight-year levy lid lift passed by Seattle voters in November 2000. The levy is designed to fund more than 100 park, open space, and recreation projects throughout the city.

2008 Parks Levy (“Parks and Green Spaces Levy”): A \$145.5 million, six-year levy lid lift passed by Seattle voters in November 2008. The levy was designed to fund park and green space acquisition, capital expansion and renovation of parks, and park facilities throughout the city.

Americans with Disabilities Act (ADA): A comprehensive civil rights law for people with disabilities passed by the federal government in 1990.

Allocation: The expenditure amount planned for a project or service that requires additional legislative action, or “appropriation,” before expenditures are authorized.

Appropriation: A legal authorization granted by the City’s legislative authority (the City Council) to make expenditures and incur obligations for specific purposes.

Asset Preservation (also known as Major Maintenance): Capital improvement projects that involve major repairs or rehabilitation of existing City facilities.

Capital Improvement Program (CIP): Annual appropriations from specific funding sources are shown in the City’s budget for certain capital purposes, such as street improvements, building construction, and some types of facility maintenance. The CIP is a six-year allocation plan presented as a document separate from the Budget that details all projects, fund sources, and expenditure amounts including many multi-year projects that require funding beyond the one-year period of the annual Budget.

Capital Projects Funds: Funds with resources set aside to acquire or construct major capital facilities that allow the monitoring of revenues and expenditures of authorized voter approved and Councilmanic bonds and levies.

Capital Projects Passing the \$5 million threshold with the 2020 Adopted allocation (Appendix B): Pursuant to the 1999 settlement agreement in CLEAN, et. al v. City of Seattle, the City has adopted policies regarding public notification when capital projects cross certain spending thresholds. Resolution 31203 updated those policies to require a list of all Capital Projects for which the City has cumulatively spent more than \$5 million with the adoption of the current annual Budget be published as an appendix to the Capital Improvement Program.

Community Development Block Grant (CDBG): An annual grant to Seattle and other local governments from the U.S. Department of Housing and Urban Development to support economic development projects, housing and services in low-income neighborhoods.

Comprehensive Drainage Plan: A Citywide drainage management program for capital improvements and ongoing maintenance. It establishes a monitoring program and identifies measures to control flooding and pollution, such as regulatory controls and public education.

Cumulative Reserve Fund (CRF): A source of ongoing local funding to support capital projects in general government departments. The CRF consists of two accounts: The Capital Projects Account and the Revenue Stabilization Account. The Capital Projects Account has three Funds: REET I Capital Projects Fund, REET II Capital Projects Fund, and the Unrestricted Cumulative Reserve Fund.

Design Build Operate (DBO): A non-conventional approach to implementation of major capital projects, wherein a single vendor is responsible for design, construction, and long-term operation of a facility.

Debt Service: Annual principal and interest payments that local government owes on money that it has borrowed.

Endangered Species Act (ESA): Legislation passed by the federal government in 1973 to conserve the ecosystems upon which endangered species depend upon and to conserve and recover listed species.

Fire Facilities and Emergency Response Levy: A \$167 million, eight-year levy lid lift, approved by voters in November 2003. The Levy includes funds for more than 40 projects to upgrade, renovate, or replace most of the City's fire stations, construct new support facilities for the Fire Department, construct a new Emergency Operations Center and Fire Alarm Center, procure two new fireboats and rehabilitate an existing one.

Fund Balance: The difference between the assets and liabilities of a fund. This incorporates the difference between the revenues and expenditures each year.

General Fund: A central fund into which most of the City's general tax revenues and discretionary resources are pooled and allocated to support many of the operations of City government. General Fund dollars appear in the CIP in two places: the General Fund contribution to the Cumulative Reserve Fund (if any) and appropriations to capital projects from a department's operating budget.

Geographic Information System (GIS): A tool that enables users to analyze and understand the spatial relationships among things that exist and occur in a location. The results of geographic analysis can be communicated with maps and/or reports.

Growth Management Act (GMA): Passed by the state legislature in 1990, the Growth Management Act encourages strategic land use planning and provides protection for environmentally sensitive areas.

Habitat Conservation Plan (HCP): A 50-year commitment by the City and Seattle Public Utilities to protect and restore the Cedar River Watershed.

Leadership in Energy and Environmental Design (LEED): A green building rating system for new and existing commercial, institutional, and multi-family residential buildings that evaluates environmental performance from a "whole building" perspective. There are four rating levels: Bronze, Silver, Gold, and Platinum.

Levy Lid Lift: An increase in regular property taxes for a general or designated purpose—for example, the 2008 Parks Levy.

Levy to Move Seattle: A nine-year, \$930 million-dollar levy passed by voters in November 2015. The levy provides funding to improve safety for all travelers, maintain streets and bridges, and invest in reliable, affordable travel options.

Limited Tax General Obligation (“LTGO” or “Councilmanic”) Bonds: Bonds that are issued by the City Council without voter approval. The debt service on these bonds is typically repaid from existing general government revenues or from revenues generated by the project(s) financed with the bonds.

Major Maintenance: See “Asset Preservation” above.

Municipal Art Plan: A plan prepared by the Office of Arts and Culture that establishes budgets for new 1% for Art program projects and describes the status of existing projects.

Neighborhood Matching Subfund (NMF): A fund administered by the Department of Neighborhoods to provide money to Seattle neighborhood groups and organizations for neighborhood-initiated improvement, organizing, or planning projects. The community’s contribution of volunteer labor, materials, professional services or cash is “matched” by cash from the fund.

Operating Budget: The portion of a budget that deals with recurring expenditures such as salaries, electric bills, postage, printing, paper supplies, and gasoline.

Public Works Trust Fund: A low-interest state revolving loan fund designed to help local governments with the repair, replacement, and rehabilitation of public works infrastructure.

REET I and REET II: The Real Estate Excise Tax (REET) is levied on all sales of real estate with the first 0.25% of the locally imposed tax going to REET I and the second 0.25% for REET II.

Seattle Metropolitan Park District: In August 2014, voters passed a ballot measure creating the Seattle Metropolitan Park District. The goal of the park district is to provide long-term, stable funding to support recreation programming, parks projects and the critical needs for investment in major and ongoing maintenance.

Unlimited Tax General Obligation (“UTGO” or “voted”) Bonds: Bonds issued after receiving approval by 60% of the voters in an election with at least 40% voter turnout. The debt service on these bonds is repaid from additional (“excess”) property tax revenues that voters approve as part of the bond measure.
