OEM personnel ensure that the EOC and those who staff it, are ready and prepared to coordinate disaster response and recovery efforts at any time. EOC operations focus on coordination of action plans, information, and any needed resources through a unity of effort. The EOC also assists elected officials and high-level managers in critical, policy-level decision making. The Mayor has the responsibility and authority through a proclamation of local emergency and certain emergency powers to use all City resources to address conditions of emergency. Pre-EOC operations are managed through the OEM’s Staff Duty Officer (SDO) program which provides a 24/7 point of contact in case of emergency for departments, agencies, Mayor, Department Directors, Council members or other stakeholders. SDOs monitor and assist in dozens of incidents every year.

There are three key groups that provide guidance and direction to the emergency management program: Disaster Management Committee, Strategic Work Group, and Emergency Executive Board. OEM engages in hundreds of interactions with various agencies every year to maintain mutual proficiency in response and recovery; for example partnerships with colleges, universities, schools both public and private, healthcare facilities, the Coast Guard, Army and Navy, Pacific Northwest National Laboratory, businesses, non-profits such as the American Red Cross, and agencies with whom the City has emergency preparedness partnerships such as Airbnb. OEM also works closely with dedicated emergency management staff housed in several departments (Human Services Department, Finance &

Office of Emergency Management

Administrative Services, Department of Transportation, Parks & Recreation Department, Fire Department, Public Utilities, and City Light).

Budget Overview

The 2021 Proposed Budget establishes a budget and staffing for the new Office of Emergency Management's first year of operation. The budget provides the foundation for staff and resources to carry out the office's mission as described above in the department overview. The proposed budget moves 14 full-time positions from the Seattle Police Department to the newly independent OEM: one position will serve as the OEM director, who will develop and manage all functions and responsibilities of the OEM, a deputy director, six coordinators to manage specific lines of work, and one manager to oversee two coordinators and two training specialists. Additionally, the department will have two staff for administrative support to department staff. One position has been added to OEM to assist in administrative and grant management. This transfer brings the department in line with Emergency Management Accreditation Program (EMAP) national best practices. As a standalone department, OEM will have direct access and oversight from the executive.

In addition to staffing, the proposed budget provides OEM with budget to receive internal services from the Seattle Department of Human Resources, Finance and Administrative Services, and the Seattle Information Technology Department. This transfer is not otherwise intended to change the mission and operations of OEM. For the 2022 Proposed Budget, the City Budget Office will work with the new department, SPD and the shared services departments (SDHR, FAS and IT) to ensure that allocated rates are appropriately assigned.

Seattle Fire Department

Harold D Scoggins, Fire Chief

(206) 386-1400

www.seattle.gov/fire

Department Overview

The Seattle Fire Department (SFD) provides fire protection and prevention, technical rescue and emergency medical services for the City of Seattle. It deploys engine companies, ladder companies, aid and medic units and fireboats to mitigate the loss of life and property resulting from fires, medical emergencies and other disasters. SFD maintains 33 fire stations that are strategically located within six battalions to provide optimal response times to emergencies. Each battalion serves specific geographic areas in the city: the downtown/Central Area, north and northeast Seattle, northwest Seattle, south and southeast Seattle and West Seattle.

SFD has a strong record on prevention of fires. Seattle has fewer fires than the national average and of other cities with similar population size. Seattle averages 0.83 fires annually per 1,000 residents, which is lower than the national average of 4.0. Over the past five years, the average number of total structure fires per year in Seattle has been 647. Total fire dollar loss averaged \$22.9 million per year.

SFD provides emergency medical responses, which account for approximately 80% of all fire emergency calls in Seattle. In order to respond to the emergency medical demand, all Seattle firefighters are trained as emergency medical technicians (EMTs) to provide basic emergency medical care, or basic life support. SFD staffs seven medic units each with two firefighter-trained paramedics to provide more advanced medical care or advanced life support. Additionally, the department has five full-time and two peak-time aid units staffed by firefighters to provide basic life support citywide.

In 2016, SFD implemented the Low Acuity Alarm Program to reduce non-emergency calls to the 911 system and to provide improved service and care to individuals with non-emergent needs. In 2019, the program was renamed Mobile Integrated Health to better reflect its work, which now includes the Health One multidisciplinary response team of firefighters and case managers. Health One launched in 2019 to respond to individuals immediately in their moment of need and help them navigate the situation - whether they need medical care, mental health care, shelter, or other social services. Currently, core activities of Mobile Integrated Health are high utilizer intervention (individuals and locations), low acuity data and trend analysis, establishment of referral partnerships and alternate treatment/transportation development.

The department also has marine, hazardous materials, high-angle, tunnel and confined-space rescue teams. In addition, SFD officers and firefighters are members of local and national disaster response teams such as the Federal Emergency Management Agency (FEMA)'s Urban Search and Rescue Task Force and wild land firefighting. SFD's fire prevention efforts include fire code enforcement, building inspections, plan reviews of fire and life safety systems, public education and fire safety programs, regulation of hazardous materials storage and processes and regulation of places of public assembly and public events to ensure life safety.

Seattle Fire Department

Budget Snapshot

Full-Time Equivalents Total*	1,167.05	1,168.55	1,170.35

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

To help the City manage the revenue losses caused by the COVID-19 crisis, the 2021 Proposed Budget includes reductions to SFD in areas that are seeing lower activity due to the public health measures taken to fight the pandemic and the economic recession, such as events staffing and construction inspections and permitting. The Proposed Budget also finds savings by reducing administrative staffing, deferring recruit testing for one year, and temporarily reducing the size of the annual recruit class from 60 to 40.

At the same time, the Proposed Budget increases SFD's Operations budget to maintain the upstaffing response to the West Seattle Bridge closure and to expand the Health One program with a second team. Staffing an additional Medic unit and Ladder truck in West Seattle is needed to maintain life-saving response times while the bridge is closed. The Health One program connects people who do not require emergency intervention or hospitalization, called low-acuity calls, to appropriate services while preserving emergency response capacity for true emergencies. Health One will play an important role in the City's 911 call response program as Seattle reimagines its policing. The existing Health One team, piloted starting in Fall 2019, has been handling low-acuity calls primarily in the Pioneer Square and Downtown core areas. But this service is also needed in other parts of the city, most notably in South Seattle, and during more hours of the day. As the City considers options for how to handle 911 calls that do not require a sworn officer response, Health One will be a key alternative response.

For details on the changes to SFD's budget, see the Incremental Budget Changes section below.

Description of Incremental Budget Changes

Baseline

Revenue Update

Revenues \$(968,114)

This change reflects updates to baseline revenues from the August revenue forecast.

Seattle Fire Department

SFD Baseline Adjustment

Expenditures \$15,275,061

This item makes baseline adjustments for personnel costs, including firefighter pay increases that were negotiated separately from the coalition of unions.

Adjustment for One-Time Budget Changes

Expenditures \$(600,000)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget: \$600,000 for a 9-recruit augmentation to the annual recruit class size.

Baseline Adjustments for Personnel Costs

Expenditures \$3,219,614

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

West Seattle Bridge Closure SFD Resource Additions

Expenditures \$4,199,618

This item adds funding to continue staffing the additional Ladder Truck and Medic Unit that were added in 2020 to provide fire, rescue, and emergency medical services in West Seattle to mitigate the impacts to response times due to the West Seattle Bridge closure.

Expand Health One

Expenditures \$575,000

This item funds an expansion of the Health One program. These funds will support a second team of two firefighters and one case manager to respond to EMS calls that do not require emergency department transportation (low-acuity calls), to divert patients to appropriate destinations. A second team will enable the program to fully cover core operating hours during weekdays when critical partner services are open, and grow geographic coverage beyond Pioneer Square and Downtown to Ballard, the U-District, and South Seattle.

Abrogate Recruitment & Employee Development position

Expenditures \$(171,137)

Position Allocation (1.00)

This item eliminates a vacant 1.0 FTE Strategic Advisor position in the Human Resources Division. This position was added in 2019 to allow for both an embedded recruitment effort and deep understanding of the Department culture in addressing barriers to professional development. The deep budget shortfall and need for savings require reducing this position, but this work will be redistributed and continue to be done by existing staff and the Employee Development Committee. SFD will request this position again when the budget allows it.

Seattle Fire Department

Abrogate Training & Education Coordinator Asst

Expenditures	\$(101,326)
Position Allocation	(1.00)

The item eliminates the administrative position that coordinates SFD's Cardiopulmonary Resuscitation (CPR) and Automated External Defibrillator (AED) classes (the Medic 2 program). This position schedules all community and public and private school CPR/AED classes; recruits instructors and coordinates their training and certification; schedules instructors to teach; prepares all of the required documents for SFD to teach CPR/AED; advertises classes and conducts outreach to Seattle's underserved populations to increase access to CPR training; maintains equipment and orders supplies; tracks program statistics. To sustain the program, the work will be reallocated to several non-represented strategic advisors and one represented (Local 17) administrative staff member. The program will be within the Public Affairs division, where the Medic 2 program is managed, and will not impact delivery of the program.

Defer Entry Level FF Exams

Expenditures	\$(219,492)
--------------	-------------

This item reduces overtime funding associated with administering firefighter written exams. This reduction defers the application period and entry level firefighter written exam by one year. This will result in a one-year deferral of the entry level firefighter oral exam as well.

Fire Prevention Division Administrative Support

Expenditures	\$(142,307)
Position Allocation	(1.20)

This item eliminates two administrative positions (1.5 FTE) and increases a permit technician position's time from 0.5 FTE to 0.8 FTE in the Fire Prevention Division (FPD). FPD will modify its service counter delivery model and rebalance essential administrative duties among its staff. The service counter will be staffed roughly 20 hours a week. Essential duties include federally required reporting and compliance, code complaints, Executive support, and facilities/phone/training coordination. Impact on external customers will be partially mitigated by increasing support offered through email and online services and essential administrative support functions for division will be absorbed by other staff.

Fire Prevention Division Construction Inspection Staffing

Expenditures	\$(135,262)
--------------	-------------

This item eliminates funding for one Firefighter-Prevention Inspector position in the Fire Prevention Division. Due to the reduction in construction-related fee revenue and workload during the pandemic and anticipated economic slowdown, this staffing adjustment is anticipated to align staffing with workload in 2021.

Fire Prevention Division Plan Review Staffing

Expenditures	\$(147,108)
--------------	-------------

This item eliminates funding for one Fire Protection Engineer position in the Fire Prevention Division. Due to the reduction in construction-related fee revenue and workload during the pandemic and anticipated economic slowdown, this staffing adjustment is anticipated to align staffing with workload during 2021.

Fire Prevention Division Special Events Staffing

Expenditures	\$(155,242)
--------------	-------------

Seattle Fire Department

This item eliminates funding for one Fire Lieutenant-Prevention Inspector position in the Fire Prevention Division in recognition that special events have been substantially altered by the pandemic and may not fully recover until such time as a treatment and vaccine are readily available.

Program and Event Services OT Reductions

Expenditures	\$(1,492,745)
--------------	---------------

Special events have been substantially reduced due to the pandemic and may not fully recover until such time as a treatment and vaccine are readily available. This item enacts a one-time 50% reduction in overtime upstaffing costs (\$915,028) for emergency medical, fire guard, and other fire protection services at special events. In addition, this item reduces spending (\$234,025 ongoing) pertaining to facility/fleet maintenance, travel/training and consultant services. Finally, this item reduces \$343,692 (ongoing) in discretionary overtime spending across the organization, including that related to backfilling for firefighters away for travel/training.

Reduce Finance Staffing

Expenditures	\$(149,828)
Position Allocation	(1.50)

This item eliminates 1.0 FTE Accounting Technician II position in the Payroll Unit and 0.50 FTE Accounting Technician II position in the Accounting section. SFD is implementing a new work, schedule, and time-keeping system that will automate payroll processes and therefore reduce the need for a payroll position. This new system will also create the capacity to absorb Fire Prevention citations and billings work that will be re-allocated from the abrogated part-time accounting position.

Reduce Funding For 20 FF Recruits

Expenditures	\$(1,345,825)
--------------	---------------

This item reduces funding for pre-employment testing, recruitment, salaries/benefits, personal protective equipment, and other operating costs associated with 20 firefighter recruits on a one-time basis. This change reduces the annual recruit class size from 60 recruits to 40.

Restructure Training Program

Expenditures	-
Position Allocation	6.50

Due to staffing levels, SFD has historically used budgeted overtime dollars to supplement required training. This item reallocates a percentage of budgeted overtime dollars to add additional employees to SFD's Training Division. A Battalion Chief, four Firefighters, one Administrative Specialist I, and a 0.5 FTE increase to an existing Administrative Specialist III will be added. Staffing regular positions assigned to the Training Division instead of rotating different staff members through with overtime will allow a more efficient and effective model for instruction delivery without increasing SFD's budget.

Seattle Fire Department

Proposed Technical

Citywide Adjustments for Standard Cost Changes

Expenditures	\$4,076,038
--------------	-------------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Firefighter's Pension

Steve Brown, Executive Secretary

(206) 625-4355

<http://www.seattle.gov/firepension/>

Department Overview

The Firefighters' Pension Fund (FPEN) provides pension and medical benefit services to eligible firefighters, active and retired, and their beneficiaries. FPEN is a closed plan that only covers firefighters who were hired before October 1, 1977. Retiree benefits for firefighters hired more recently are primarily covered through a separate state-managed plan.

Management of firefighter benefits funds transitioned in the 1970s from local to state control. Prior to that time, the City paid into FPEN to provide for firefighter retiree benefits. In March 1970, the state created the Law Enforcement Officers and Fire Fighters Retirement System Plan 1 (LEOFF 1). Seattle firefighters hired between March 1970 and October 1977 enrolled in LEOFF 1, but also received additional benefit coverage through FPEN. As a result, this group of firefighters receives retiree benefits primarily from the state's LEOFF 1 plan, but also any earned increment from the City's FPEN that exceeds LEOFF 1 coverage. Both FPEN and LEOFF 1 closed to new enrollees in October 1977. Firefighters hired after that date enroll in the state's LEOFF 2 plan and do not receive benefits from FPEN.

The Seattle Firefighters' Pension Board is a five-member quasi-judicial body chaired by the Mayor or his/her designee, which formulates policy, rules on disability applications, and provides oversight of the Firefighters' Pension Fund. Four staff employees of the board handle all of its operational functions. Staff positions associated with Firefighters' Pension Fund are not reflected in the City's position list.

The projections of annual pension and medical benefits, which comprise about 97% of the total annual FPEN budget, are based on the forecasts of an independent actuary. The Firefighters' Pension Fund has two statutory funding sources:

- The first is a component of the City's property tax levy. These revenues are placed in the City's General Fund, which funds the Fire Pension Fund's annual budget.
- The second is the state fire insurance premium tax.

These statutory funding sources are in addition to other smaller funding sources that support the Firefighters' Pension Fund obligations.

The Firefighters' Pension Fund includes two funds: the Fire Pension Fund, which pays current pension, medical, and death benefits; and the Actuarial Account, which was established by [Ordinance 117216](#) in 1994 to accumulate a balance sufficient to pay all future pension liabilities of the fund by 2028.

Firefighter's Pension

Budget Overview

The Firefighters' Pension Fund (FPEN) receives almost all of its revenue from the City's General Fund. FPEN's expenditures pay the legally-mandated pension and medical benefits, including long-term care, to eligible retired firefighters and qualified beneficiaries. Most of FPEN's retirees are represented by either Local 27 (firefighters' union) or Local 2898 (fire chiefs' union) and their total pension benefits are increased annually with a cost of living adjustment (COLA) equal to the negotiated annual wage increases (AWI) for the active union members at the Seattle Fire Department and then offset by benefits paid by the state's LEOFF 1 pension plan which has its own annual growth rate.

In November 2016, Council passed Ordinance 125190 which requires an actuarially determined level payment amount from the City to the FPEN Fund each year to cover pension benefit costs. Any remaining difference between the payment amount and actual pension benefit costs is transferred to the Actuarial Account for FPEN's future pension obligations. The account is invested in a portfolio managed by the Department of Finance and Administrative Services (FAS). The 2021 Proposed Budget assumes an annual rate of return of 5.5% on the investment portfolio and that the returns are continuously reinvested.

The 2021 Proposed Budget is reflective of expected pension and medical benefit costs as well as costs of administration.

Incremental Budget Changes

Firefighter's Pension

	2020 Proposed Budget	FTE
2020 Adopted Budget	21,236,362	4.00
Adjustment for One-Time Budget Changes	-	-

Total 2021 Proposed Budget	\$21,020,461	4.00

Description of Incremental Budget Changes

Adjustment for One-Time Budget Changes

Revenues \$1,012,064

This item includes budget adjustments for one-time changes in the 2021 Proposed Budget.

Firefighter's Pension

Citywide Adjustments for Standard Cost Changes

Expenditures \$3,064

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$18,397

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

Adjustment for pension benefits

Expenditures \$(237,362)

Revenues \$282,035

This item decreases appropriations for pension payments and medical claims and provides for the use of fund balance to balance resources with appropriations.

FPEN Actuarial Account Reset

Revenues \$(1,510,000)

This item adjusts the transfer revenues into the FPEN Actuarial Fund to the projected 2021 level of \$230,000.

Office of Inspector General for Public Safety

Lisa Judge, Inspector General

(206) 684-3663

<http://www.seattle.gov/oig>

Department Overview

The Office of Inspector General for Public Safety (OIG) was established in 2017 via [Ordinance 125315](#). OIG provides oversight of management, practices, and policies of the Seattle Police Department (SPD) and Office of Police Accountability (OPA), monitoring of ongoing fidelity to organizational reforms implemented pursuant to the goals of the 2012 Federal Consent Decree and Memorandum of Understanding, and auditing and review of criminal justice system policies and practices related to policing and other criminal justice matters.

OIG is empowered to help ensure the fairness and integrity of the delivery of law enforcement services and the investigation of allegations of police misconduct. OIG has been established to make systemic recommendations for lasting reform that are intended to reflect the values of Seattle's diverse communities.

Responsibilities of OIG include:

- performing oversight activities that ensure the ongoing integrity of SPD and OPA processes and operations;
- ensuring SPD is meeting its mission to address crime and improve quality of life through the delivery of constitutional, professional, and effective police services that retain the trust, respect, and support of the community;
- conducting risk management reviews and performance audits;
- reviewing misconduct complaint-handling and investigations by OPA;
- evaluating SPD's response to incidents involving death, serious injury, serious use of force, mass demonstrations, serious property or vehicle damage, or other issues of significant public concern to assess the integrity of the process; and
- making recommendations to policymakers for increasing the effectiveness of SPD and related criminal justice system processes.

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Office of Inspector General for Public Safety

Budget Overview

The 2021 Proposed Budget expands OIG's ability to perform community engagement and to bolster administrative operations of the office. Funding and position authority are proposed for a dedicated community engagement specialist, with a focus on helping OIG fulfill its mission to meaningfully apply a racial equity lens to its work. This includes employing racial equity expertise to guide OIG management in the scoping of work projects, as well as helping OIG effectively interface with community in a manner that sets aside institutional assumptions to ensure legitimate, effective community engagement.

The 2021 Proposed Budget increases the capacity of the investigation and audit units by adding one investigator/audit position. Funding is also added for an operations manager. The OIG received position authority for an Operations Manager in the 2020 Adopted Budget and this funding ensures that the administrative funding for OIG can continue.

In 2021, the City Budget Office will be undertaking a study to examine opportunities for shared coordination of resources across the three police accountability entities, the Community Police Commission, the Office of the Inspector General and the Office of Police Accountability. This study will make recommendations regarding coordination of community engagement, communications, administrative support (e.g. accounting, human resources) or other functions. The recommendations could lead to budget or operational efficiencies but will ensure the independence of each entity.

Office of Inspector General for Public Safety

Incremental Budget Changes

Office of Inspector General for Public Safety

	2021 Budget	FTE
Total 2020 Adopted Budget	2,648,238	13.00
Proposed Operating		
Add 1.0 FTE Community Engagement Position	155,095	1.00
Add 1.0 FTE Auditor/Investigator Position	155,095	1.00
Realignment of OIG Budget to Reflect Operational and Administrative Needs	117,440	-
Reduce OIG Budget by 5% in 2021 and 2022	(131,412)	-
Proposed Technical

Citywide Adjustments for Standard Cost Changes	70,032	-
Baseline Adjustments for Personnel Costs	-	-
Total Incremental Changes	\$266,249	2.00
Total 2021 Proposed Budget	\$2,914,486	15.00

Description of Incremental Budget Changes

Proposed Operating

Add 1.0 FTE Community Engagement Position

Expenditures	\$155,095
Position Allocation	1.00

This change provides position authority and funding for one Strategic Advisor 1, Exempt position to work as a Community Engagement Specialist.

Add 1.0 FTE Auditor/Investigator Position

Expenditures	\$155,095
Position Allocation	1.00

This change provides position authority and funding for one Strategic Advisor 1, Exempt position to work as an Audit/Investigator. OIG requests this position as a hybrid audit and investigation position to provide flexible staffing to support the workload demands of two major areas of work.

Realignment of OIG Budget to Reflect Operational and Administrative Needs

Expenditures	\$117,440
Position Allocation	-

This change request increases the OIG budget in 2021 by \$118,911. This item aligns the office's budget to better

Office of Inspector General for Public Safety

support the ongoing operational and administrative needs. Funding for a Strategic Advisor 2, Exempt (Operations Manager) is added. This pocket was added in the 2020 Adopted Budget but without ongoing funding. The funded Executive Assistant position is changed to an Administrative Specialist 3.

Reduce OIG Budget by 5% in 2021 and 2022

Expenditures	\$(131,412)
--------------	-------------

This change reduces appropriations for the Office of Inspector General by 5% (\$131,412) in 2021 by reducing the consultant budget. This reduction is taken in order to mitigate the negative effects of the COVID-19 pandemic on the City's overall budget.

Proposed Technical

Adjustment for One-Time Budget Changes

Expenditures	\$(100,000)
--------------	-------------

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget:

Citywide Adjustments for Standard Cost Changes

Expenditures	\$70,032
--------------	----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures	-
--------------	---

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Law Department

Peter S. Holmes, City Attorney

Civil Division, (206) 684-8200; Criminal Division, (206) 684-7757

<http://www.seattle.gov/cityattorney>

Department Overview

The department provides legal advice to City officials, represent the City in litigation, and protect the public health, safety, and welfare of the community by prosecuting violations of City criminal and civil ordinances and state law. The four department divisions are described below.

The **Administration Division** provides executive leadership, communications, and operational support for the entire department. It is comprised of the executive leadership team, human resources, finance, media relations, and information technology staff.

The **Civil Division** provides legal counsel and representation to the City's elected and appointed policymakers in litigation at all levels of county, state, federal courts, and administrative agencies. The Civil Division is organized into seven specialized areas of practice: Employment, Environmental Protection, Land Use, Government Affairs, Torts, Regulatory Enforcement & Economic Justice (REEJ), and Contracts & Utilities. Precinct Liaison services are specifically budgeted, but functionally a part of REEJ. These attorneys provide support to the City's police precincts, legal advice to police and other City departments, and address issues of concern to the community.

The **Criminal Division** prosecutes misdemeanor crimes in Seattle Municipal Court, provides legal advice to City clients on criminal justice matters, monitors state criminal justice legislation of interest to the City, and participates in criminal justice reform efforts, policy development and management of the criminal justice system. The Criminal Division is comprised of a Prosecution Support Unit, Case Preparation Unit, Domestic Violence Unit (prosecutors and victim advocates), Appeals, Review and Filing Unit, Specialty Courts Unit (Infractions, Mental Health, Veterans' Court, LEAD, and Pre-filing Diversion), and Trial Team Unit.

Law Department

Budget Overview

The Law Department provided reductions for 2021 in response to reduced Citywide revenue availability due to COVID-19 and strives to continue to meet the litigation and prosecutorial demands of the city.

The Law Department made difficult decisions on reductions for 2021:

- In the 2020 Adopted Budget two Civil Division attorneys were added to reduce the use of outside counsel through the Judgment and Claims Fund. While the funding is eliminated, the positions remain to allow flexibility in hiring to address emergency legal needs if funding is available in 2021.
- Precinct Liaison attorneys are imbedded at each of the five precincts. With only four funded positions in the Law Department, the Seattle Police Department (SPD) previously funded the fifth attorney through a memorandum of agreement (MOA) with SPD. The proposed budget eliminates the fifth position and funding in SPD. One of the four Precinct Liaisons will cover both the South and Southwest precincts.
- In the 2020 Adopted Budget, Council added a position and funding for a threat assessment specialist paralegal in the Criminal Division. Given the revenue challenges of 2020, the Law Department held this position vacant to meet immediate budget reduction needs. Appropriation for the position is reduced, but the FTE will remain to allow flexibility if funding is available in 2021.
- A vacant administrative position in the Criminal Division case preparation unit is eliminated to provide further savings to the General Fund.
- A part-time Paralegal position was added in 2019 to support the growing number of forfeiture cases with funding supported by revenue from SPD. This position and funding are eliminated to meet reduction targets. Forfeiture work will be absorbed by existing staff. To realize the savings for this position, an equivalent cut is made to SPD.

There are a few additions to the Law Department budget in 2021:

- In the 2020 Adopted Budget, Council added one-time funding to the operating budget of the Community Police Commission (CPC) for the retention of outside legal services to receive legal advice and representation in policing-related matters, particularly with relation to *United States v. City of Seattle*, before the U.S. District Court of Western Washington
- The 2017 Adopted Budget created the Pre-Filing Diversion Program led by the Law Department with assistance from the Seattle Municipal Court. The 2017 Racial Equity Toolkit (RET) determined additional services, including pre- and post-workshop support and swift connection to resources, were required to meet racial equity needs of participants. The budget includes inflation to continue funding for 12 workshops per year.

The current Criminal Division case management application, DAMION, was implemented in 1998 to track all aspects of prosecution including police reports, charging decisions, victims, witnesses, defendants, court dates and disposition. The application also relies upon significant data exchanges with the Seattle Police Department (SPD) and the Seattle Municipal Court (SMC). This desktop system is at the end of its lifecycle and the vendor is no longer fully supporting the application for updates and maintenance. In addition, use of the system limits the department's ability to implement a paperless process and reduce redundancies. The Seattle Information Technology Department (ITD) has \$325,000 in the Criminal Justice Information System Replacement Project to upgrade the existing system. An additional unspent \$650,000 was carried over to provide further funding for this project. Remaining funding needs will be addressed in the Criminal Justice Information System Replacement Project. A request for proposals (RFP) was issued in 2020 to identify a replacement solution. Implementation is expected to take place in 2021, with a 'go live' date in the fourth quarter of 2021.

The 2021 budget also includes revenue-backed appropriation for the MOAs the Law Department has negotiated with other city departments and outside agencies for specific services. While these have historically been off budget, appropriation of these items follows the financial policies required by PeopleSoft 9.2.

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$265,746

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the

Law Department

department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Adjustment for One-Time Budget Changes

Expenditures \$(2,000)

This item includes budget adjustments for a one-time change in the 2020 Adopted Budget which allocated \$2,000 for equipment and office setup for a Council added position.

Baseline Adjustments for Personnel Costs

Expenditures \$742,075

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022.

Council MOA Adjustment and Position Reclassification

Expenditures \$52,822

In 2019, Legislative Department entered into an agreement to create a Code Reviser position partially funded by both agencies. It was assumed this position would be reclassified to a Strategic Advisor and supplementary funding from Council of \$25,000 was added to the Law Department 2020 Adopted Budget. Based on the job duties, the position was classified as an Assistant City Attorney (ACA). Council agreed to increase Memorandum of Agreement (MOA) funding in 2020 an additional \$15,000. However additional funding is needed in 2021 due to the reclassification. This item adds the full appropriation from Paralegal to ACA with \$15,000 from the Legislative Department in addition to \$37,822 to fully fund the position.

Inflation for the Pre-file Diversion Service Contract

Expenditures \$7,500

This change request provides inflation of the Pre-file Diversion service contract with Choose 180 in 2021. This contract which has been in place since early 2018 has had no inflation for cost or service changes.

Align to 2020 Central Costs and Move Council Added Health Care

Expenditures \$26,281

This item aligns the 2021 Baseline to the Adopted Central Cost Manual. It also moved Healthcare from two positions added by City Council during the 2020 Adopted Budget process from the operating programs to the Leadership and Administration Pooled Costs project.

Annual Rent Inflation

Expenditures \$73,832

This item increases budget appropriation for the base rent associated with the initial 2015 space lease at Columbia Tower that includes a \$1 per square foot increase per year of the lease.

Increase to Base Rent Budget for 2020 Expansion

Expenditures \$370,605

Law Department

In 2020, the City signed an amendment to the Columbia Center lease to increase the square footage of the City Attorney space. This funding is to support rent payments associated with this new space in 2021.

IT Professional Market Adjustment

Expenditures	\$39,877
--------------	----------

In late 2019, the City entered into a Memorandum of Agreement (MOA) with Local 77 related to market adjustments for IT Professionals across the City. In Law, the IT Professional wages were adjusted in line with this MOA. The position vacant at the time of the adjustment will need to be hired at the same general level. This item adds authority for these wage increases on an ongoing basis as they were not included in the 2020 budget.

Proposed Operating

Remove Funding for Civil Division Attorneys

Expenditures	\$(331,165)
--------------	-------------

This item removes funding added in the 2020 Adopted Budget for 2.0 FTE City Attorney, Asst positions. The funding amount equals 1.75 FTE due to a Council reduction during the final stages of budget. The position authority is preserved to allow flexibility in hiring and address emergency legal needs as required. These positions were added to reduce reliance on the Judgment and Claims Fund for outside counsel related to capacity issues, however filling the positions was put on hold in 2020 due to COVID-19 and pending department reductions.

Decrease in Precinct Liaison Positions

Expenditures	\$(183,966)
Revenues	\$(166,586)
Position Allocation	(1.00)

The Law Department (LAW) provides a fifth Precinct Liaison Attorney to the Seattle Police Department (SPD) under a MOA since 2017, which is set to expire at the end of 2020. This position is funded by SPD. This Liaison Attorney provides in-person legal guidance to police officers and works with the precinct on community safety, nuisance, and regulatory issues, like the work performed by the other four Liaison Attorneys funded by LAW. The proposed budget eliminates this position and funding in SPD. One of the four remaining Precinct Liaisons will cover both the South and Southwest precincts.

Remove Funding for Firearms Surrender Threat Assessment Position

Expenditures	\$(117,381)
--------------	-------------

This action reduces funding associated with a position added in the 2020 Adopted Budget for the Firearms Surrender Program to conduct threat assessment work historically shared by members of the team. The Law Department is recommending this position be held vacant to meet immediate budget reduction needs.

Eliminate Vacant Position in Case Preparation Unit

Expenditures	\$(86,289)
Position Allocation	(1.00)

This item reduces funding and eliminates an Admin Spec I FTE in the Criminal Division who provides case preparation support. Work associated with this position will be spread across existing employees, however, extended vacancies in this section may cause an increase of case backlogs for the Division.

Eliminate Vacant Forfeiture Case Support - MOA

Law Department

Expenditures	\$(65,996)
Revenues	\$(60,455)
Position Allocation	(0.50)

This item eliminates a part-time Paralegal position added to support the growing number of forfeiture cases in recent years. Funding for this position is supported by revenue from SPD. While workload continues, the department has been unsuccessful in maintaining a permanent half-time paralegal and is reliant on internal Out-of-Class appointments to complete this work. This has left critical vacancies which cannot be backfilled elsewhere in the department. Work related to this position will be absorbed as possible by existing staff. To realize the savings for this position, an equivalent cut is made to SPD.

Funding for Legal Fees

Expenditures	\$80,000
--------------	----------

In the 2020 Adopted Budget, Council added one-time funding to the operating budget of the Community Police Commission (CPC) for the retention of outside legal services to receive legal advice and representation in policing-related matters, particularly with relation to *United States v. City of Seattle*, before the U.S. District Court of Western Washington. Per SMC 3.29.480B, private legal representation for police oversight entities shall be selected and retained by the City Attorney's Office, in consultation with the oversight entity. The funding for the legal services shall be separate from the oversight entity's operational budget. The CPC has identified a likely need for \$80,000 for legal services in 2021.

Proposed Technical

2020 Third Quarter Supplemental Ordinance Appropriation and Revenue

Expenditures	\$346,792
Revenues	\$401,125

This change request aligns with requests in the 2020 3rd Quarter Supplemental Ordinance to appropriate funding for the East Waterway Memorandum of Agreements (MOA) in 2021. Appropriating funding for this new 2020 MOA and recording revenue follows CFPM guidelines.

Remove Unfunded Expired MOA Positions

Position Allocation	(2.00)
---------------------	--------

This change request removes two position authorities from the Civil Division that performed legal work related to the Alaskan Way Viaduct and Seawall project. The MOA that supported these positions expired and the positions were held vacant due to lack of funding. Should another MOA need arise, LAW will request position authority associated with that funding.

Seattle Emergency Communications Center

Director to be appointed

Department Overview

The Seattle Emergency Communications Center (SECC) is the primary Public Safety Answering Point (PSAP) for the receipt, triage, and dispatch of public safety services within the City of Seattle.

SECC divides operations into two functions, call taking and dispatching. Call Takers receive requests from the community, alarm monitoring companies, and other public safety organizations via 911, the non-emergency telephone line, and the Seattle Police Department (SPD) administrative dispatch line. Call Takers triage each call determining the nature of the emergency and the resources necessary to respond to the emergency. Calls that are related to fire or medical are transferred to the Seattle Fire Department Dispatch center for response. If criminal or other types, call takers enter details of the incident into the Computer Aided Dispatch (CAD) system which relays the information to a Dispatcher. The Dispatcher notifies public safety service responders of the incident details and remains in contact with responders via radio systems to ensure responder and community safety. The Dispatcher coordinates responses for multiple incidents at a time often involving responses from multiple city departments and external agencies.

The mission of SECC is to quickly and professionally answer all requests for public safety services for the City of Seattle; to provide professional dispatch, notification, and communication services; and to facilitate reporting of minor incidents via telephone and online systems.

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Budget Overview

The 2021 Proposed Budget establishes a budget and staffing for the first year of operation of a new, independent, and civilian-managed Seattle Emergency Communications Center (SECC). The budget provides the foundation for staff and resources to carry out the office's mission. This Emergency Communication Center is the first step towards unifying emergency response across the City and fulfilling the community goals of reducing dispatches for service of

Seattle Emergency Communications Center

SPD and substituting alternate responses from other City departments or community-based organizations.

The proposed budget provides funding to support 142 full-time positions in the newly created Emergency Communications Center: there will be one SECC director who will develop and manage all functions and responsibilities of the SECC as well as guide the consolidation and integration of all Seattle emergency response; three management positions including an Administrative Manager, a Training Q/A Manager, and an Operations Manager; 138 civilian personnel assigned to 911 Call Taking, Dispatching, Supervision, and Administrative Support Functions such as Quality Assurance, Data Collection and Analysis, Scheduling, and 911 Programs Administration. In addition to staffing, the proposed budget provides SECC with budget to receive internal services from the Seattle Department of Human Resources, Finance and Administrative Services, and the Seattle Information Technology Department. Support such as health care charges for departmental staff are also provided. For the 2022 Proposed Budget, the City Budget Office will work with the new department, SPD and the shared services departments (SDHR, FAS and IT) to ensure that allocated rates are appropriately assigned.

Seattle Municipal Court

The Honorable Willie Gregory, Presiding Judge
(206) 684-5600

<http://www.seattle.gov/courts/>

Judicial Overview

The Seattle Municipal Court adjudicates misdemeanors, gross misdemeanors, infractions (e.g., traffic and parking tickets, traffic camera violations, and other violations), and civil violations related to building and zoning offenses. The Judicial Branch of Seattle government has seven elected judges and six appointed magistrates. There are more cases processed here than any other municipal court in the State of Washington; in 2019, 9,569 criminal cases were filed and 56,836 criminal hearings were held at Seattle Municipal Court.

The Seattle Municipal Court (SMC or Court) is in a transformational time for how criminal justice is delivered in Seattle and across America. SMC judges are working towards immediate and profound change to address institutionalized racism embedded in the fabric of the criminal justice system, implementing policies to promote racial equity and committing to authentic community engagement focused on community-based alternatives to transform work moving forward.

This commitment is reflected in the proposed 2021 budget through restructuring of the Programs and Services department, which includes Probation Services. In 2019, the Court commissioned the Vera Institute of Justice (Vera), a leading criminal justice reform organization, to evaluate Probation Services. In the 2020 report, Vera recommended significantly reducing the number of people on probation and thinking differently about supervision in Seattle. To achieve this, the Court plans to:

- Transform our pretrial justice by reducing in-person Day Reporting and moving to a collaborative Community Court model that significantly reduces incarceration and connects people to social services through the Community Resource Center.
- Reduce traditional post-sentence supervision to focus on higher risk charges including Driving Under the Influence (DUI), Domestic Violence (DV), and Mental Health Court (MHC) clients.

By restructuring Programs and Services and engaging in community dialogue around the future of post-adjudication monitoring, the Court aims to equitably serve probation clients and support them as they transition out of the criminal legal system. The Court is committed to excellence in providing fair, accessible, and timely resolution of alleged violations of the Seattle Municipal Code in an atmosphere of respect for all. The Court strives to take a holistic approach to address the root causes of criminal behavior and ensure ongoing public safety. Whether individuals come to the Court to resolve a ticket or appear at a criminal hearing, SMC seeks to meet people where they are and remove barriers to success, with the goal of reducing racial disparities and recidivism.

Throughout the COVID-19 pandemic, the Court's emergency response has coordinated with municipal legal system stakeholders including the Seattle City Attorney's Office and the King County Department of Public Defense to protect the health and safety of all court participants. Early in the pandemic, SMC worked collaboratively with stakeholders to reduce the jail population as much as possible. While the courthouse was closed to the public, the in-custody arraignment calendar continued to ensure individuals had an opportunity for release as soon as feasible. Prosecutors attended these hearings telephonically and measures were implemented in the courtroom to ensure social distancing. The Court suspended the default penalty and collections programs for infractions, as well as the online and telephone payment convenience fees. As the courthouse has reopened and resumed limited in-person operations, calendars have been modified to minimize building occupancy, plexiglass barriers installed at service counters and courtrooms, and other measures taken to preserve health and safety for all participants.

Seattle Municipal Court

Court Programs and Services

In August 2020, the Court launched a revitalized **Seattle Community Court (SCC)** in collaboration with the Seattle City Attorney's Office and King County Department of Public Defense. Structured as a pretrial release program, SCC is founded on a release-first principle where individuals choosing to participate are immediately released from jail so they can begin setting goals and connecting to community services. SCC is a pathway for people to have their low-level misdemeanor charges dismissed while providing valuable service to local communities. SCC connects participants with social services such as employment assistance, housing assistance, and DSHS food, cash and medical benefits. Unlike national community court models, SCC participants do not give up their constitutional right to trial to participate, and program eligibility is not affected by previous criminal history.

In pretrial proceedings, judges prioritize the least restrictive option for release while protecting community safety. The Court's Pretrial Services division works to support individuals participating in a variety of alternatives to detention such as Electronic Home Monitoring (EHM) and Secure Remote Alcohol Monitoring (SCRAM), with options for subsidized or reduced costs for low income and homeless individuals.

In 2020, Presiding Judge Gregory issued an order that **current and future warrants** on almost all non-domestic violence, non-DUI cases be eligible for personal recognizance release. This means that people will not sit in jail for low-level misdemeanor warrants while waiting for a hearing.

The Court partners with community organizations to provide a wide variety of services at the **Community Resource Center (CRC)**, a social service hub located in the courthouse. The CRC closed in March 2020 due to the COVID-19 pandemic; however, in-person services have resumed in a limited capacity to support Community Court participants, and an online resource list helps the public access services remotely. The CRC is woven into all the Court's strategies for supporting individuals. Services offered include:

- food and clothing
- housing through Coordinated Entry for All
- health and hygiene
- grocery cards and food stamps
- substance use disorder assessment and treatment
- employment and job readiness

Specialty Courts

In addition to three general trial courts, the jail arraignment calendar, the master jury trial calendar and Community Court, the Court serves individuals and the community through several specialty court calendars.

Mental Health Court is a specialized court where the judge, defense, prosecution, probation counselors, and a mental health clinician work as a team to improve outcomes for the participant. Individuals are referred to this voluntary program by judges, defense attorneys, prosecutors, jail staff, or others. Mental Health Court has saved jail days, hospital bed days, and in jail costs to the City of Seattle.

Seattle Veterans Treatment Court is a voluntary, court-monitored treatment program that addresses the mental health and/or substance use issues of veteran defendants. This program is a collaboration between the Court, prosecution, defense, the King County Department of Community and Human Services, the Washington State Department of Veterans Affairs, and the U.S. Department of Veterans Affairs.

Domestic Violence Courts were established in 2004 and are staffed by designated judges and specialized probation counselors. A dedicated domestic violence court allows judges to ensure follow-through, aid domestic violence survivors, and hold individuals accountable, with the assistance of justice partners and social service agencies. The Court has been integral in piloting a collaborative treatment modality known as the **Domestic Violence Intervention Project (DVIP)**. This pilot project is aimed at improving safety for survivors via individualized batterer intervention and is a multi-agency/system collaboration and response.

Seattle Municipal Court

Seattle Youth Traffic Court, established in 2012, provides eligible teen drivers charged with a traffic violation the opportunity to maintain a clean driving record. Youth appear before a court of their peers who act as judges, jurors, defense attorneys and prosecutors. The peer jury determines an appropriate sanction based on the nature of the violation and impact on the community. This program is a collaboration between the Court, Seattle University School of Law, Garfield High School, and the Seattle Police Department. The Court is also examining the potential benefit of adopting a DUI specialty court, in collaboration with the Washington Traffic Safety Commission.

Community Outreach

The Court recognizes undoing institutional racism within the legal system requires meaningful engagement with the community to identify solutions. SMC judges are committed to a community engagement process to listen to the community and to quickly act upon input. The Court is launching an engagement process in 2020 centered in healing circles, with a restorative approach to engagement. The Court also conducted multiple independently-led virtual focus groups with court users focused on accessibility, inclusion, and racial equity over the summer and will publish a report of the findings in fall 2020. The Court is open to opportunities for future engagement with the City Council's criminal legal system realignment work, the Seattle Office of Civil Rights, Seattle City Attorney, King County Department of Public Defense, and community-based providers such as Law Enforcement Assisted Diversion (LEAD).

In previous community-led conversations, such as the City's Reentry workgroup, SMC heard the need for restorative, community-based alternatives to the criminal legal system. The Court participates in the City Attorney's Office/Choose 180 Pre-filing Diversion Program and works with the City Attorney's Office and LEAD on a Consolidated Calendar where LEAD clients have a coordinated and problem-solving approach to resolving outstanding SMC cases.

While the COVID-19 pandemic has paused the program, the Court typically holds quarterly community outreach events that bring court services and resources to Seattle neighborhoods. These SMC *In The Community* events are an opportunity for community members to receive assistance with resolving Seattle Municipal Court warrants, learn about options for addressing Seattle and King County tickets by setting up a payment plan or community service plan, get help with reinstating their driver's license, and access supportive services through the Community Resource Center.

The most recent event at Rainier Community Center in October 2019 included 19 service providers and 30 court staff and volunteers. Over 400 community members received a variety of services at the event including resolving warrants and unpaid tickets, relicensing, accessing health care and employment resources, and more. The Court is evaluating options to continue this outreach work during the COVID-19 pandemic while effectively reaching clients who may not have digital access to attend a virtual event.

The Court is also exploring options for holding magistrate hearings in neighborhoods across Seattle to provide community members more accessible locations to resolve outstanding tickets, at no additional cost to the City. This is currently on hold due to the COVID-19 pandemic and will be revisited once it is safe to do so.

Infractions

The Court processes hundreds of thousands of traffic, parking, and traffic camera tickets every year. In 2019, the Court processed 27,959 traffic infraction tickets, 93,134 traffic camera tickets, and 451,854 parking tickets. Individuals may schedule hearings with one of the Court's magistrates to contest or mitigate their tickets; magistrates held 70,907 infraction hearings in 2019.

The Court works with individuals who are unable to pay their tickets through payment plans or by converting the amount owed into community service hours. Through the King County-City of Seattle PolicyLink Fine/Fee grant, the Court is routinely engaging with King County and community partners on how to reform local legal financial obligation practices. The Court is also implementing a relicensing calendar and broadening its hardship policies, and will engage community groups (i.e. LELO) in these efforts.

Seattle Municipal Court

Municipal Court Information System Replacement

The Court is replacing its legacy municipal court information system, MCIS, with a modern and adaptable case management solution. The new system will streamline court processes, improve the accessibility of court services to the public, and make it easier for partners at the Seattle Police Department, King County, and others to work collaboratively with the Court.

Language Access and Accessibility

The Court has provided **Interpreter Services** in 148 languages since 2005. A Court priority is ensuring access to justice for Limited English Proficiency (LEP) and deaf, hard-of-hearing, or deaf-blind (D/HH/DV) individuals. Free of charge interpreter services are provided for criminal and civil matters, including court hearings, trials, attorney-client interviews, probation appointments, prosecution witnesses, mental health evaluations, customer service, and translation of court forms and letters. In 2019, over 6,300 interpreted events were conducted with the help of 183 freelance interpreters in 71 languages, including American Sign Language. Approximately 40% of the requests are for Spanish language interpreters. Other frequent requests for interpretation include the Vietnamese, Somali, Amharic, Tigrinya, Cantonese, Mandarin, Russian, Punjabi, and Arabic languages.

To improve skills for non-credentialed and registered interpreters, the Court Interpreter Services team designed and implemented a state-wide mentoring program. Dozens of interpreters successfully graduated from the program and now work in courts across Washington. In 2019, Interpreter Services provided video remote interpreting for some infraction mitigation hearings. The Court's Interpreter Services also developed a Bench Card on Courtroom Interpreting for Spoken Languages, which has been approved by the Supreme Court Interpreter Commission to be used by judges statewide. Interpreter Services provided two presentations for King County Public Defense attorneys on best practices of working with court interpreters in 2020. In 2019, Interpreter Services also assisted in translating much of the court's website into Spanish.

SMC **Probation Services** is the rehabilitative alternative to jail for clients not eligible for diversion programs. In 2019, the Court independently sought an evaluation from the Vera Institute of Justice, a leading national nonprofit committed to criminal justice reform. The Court commits to the following changes:

- Eliminate Day Reporting, a program that disproportionately impacts people of color and places unnecessary burdens on individuals coming to our court.
- Focus the smaller and restructured probation program on important statutory mandates to monitor domestic violence (DV) and driving under the influence (DUI) cases, which are most appropriate for the case management services that probation offers clients.
- Address other cases through Seattle Community Court – a new collaborative approach to pretrial justice reform using harm-reduction.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Seattle Municipal Court

Budget Overview

In 2019, the Seattle Municipal Court (SMC) sought an [evaluation](#) of Probation Services by the Vera Institute of Justice, “aiming to identify ways to most effectively serve our clients and improve our program.” Vera conducted interviews with judges, the City Attorney’s Office, and probation staff; ran three focus groups with those currently or formerly on probation; reviewed Probation’s protocols and procedures; and analyzed administrative data for the more than 9,000 cases that were open at any time during the two-year period from July 2017 through June 2019.

The Court is committed to implementing the evaluation’s recommendations. Although not inclusive of all actions, below are significant Programs and Services changes:

- Limit crimes receiving probation to (1) DUI, (2) DV, (3) Mental Health Court and (4) person-based assault cases.
- Make probation shorter, goals-based, with fewer requirements, and with fewer individuals monitored solely on criminal records. Using incentives to encourage success.
- Judicial adoption of new sentencing practices to reduce caseloads, such as not referring first-time DUI offenses to probation unless the individual has a substance use disorder.
- After a ten-month review of assessment tools from around the country, SMC has not been able to find an assessment tool that addresses the issue of racial disproportionality. Judges are working to find a solution that will equitably serve clients based on their needs and strengths, while also satisfying the ARLJ mandate to use a classification system.
- Collect data on race, ethnicity and gender to understand why racial disparities and gender disparities exist and explore gender-responsive programming.
- Track and analyze key performance measures, develop new policies and procedures, and provide in-depth training for staff.
- Engage with providers and community organizations to inform policies and practices.

A strong compliment to implementing the Vera Report recommendations is the newly launched Seattle Community Court (SCC). This pretrial release program will reduce incarceration, and rapidly resolve low-level, non-violent cases by connecting participants to community resources. The Community Resource Center at the Court will connect people charged with certain low-level offenses to support services including chemical dependency treatment, mental healthcare and housing assistance. The Court implemented SCC within current budget appropriation and close collaboration with stakeholders including the City Attorney’s Office and the King County Department of Public Defense. The City is supporting this effort by adding \$100,000 for the Court to contract with a non-profit for a case manager equipped to make culturally appropriate referrals to community-based agencies which will support clients in services with the goal of long-term self-sufficiency outside the court system.

To assist the City in addressing the financial crisis, the Court is reducing technology staffing and the purchase of computers and equipment totaling \$400,000.

- Eliminate an Information Technology Professional-B position and funding in the Court Technology division. The court has absorbed this work with existing staff and will review technology staffing after MCIS go-live in July of 2022.
- Reduce expenditures on computer and equipment purchases and temporarily relying on Trial Court Improvement Account funding (TCIA) for replacement of desktops and IT equipment.

A priority for the Court is to continue preparing for the replacement of the Municipal Court Information System (MCIS). MCIS is over 28 years old and was developed internally using the legacy IBM Informix platform to capture key court case events and meet the reporting requirements of the state's Administrative Office of the Courts (AOC). Over time, the Court has enhanced this system to provide important case management information, increased application functionality and improved data exchanges and public access. The Court and the City are highly

Seattle Municipal Court

dependent on MCIS to provide a continuing, permanent record of court case events, dates, hearings and outcomes. MCIS also tracks defendant compliance with court ordered sanctions and tracks all related fines and fees. Data related to the collection of \$47 million in fines and fees from the Seattle Police Department's parking and traffic ticket devices are highly dependent on MCIS. Daily data exchanges with the City of Seattle departments, King County and the State of Washington agencies rely on MCIS fully functioning with modern technology capabilities.

This project, began in 2016, is included in the Seattle Information Technology Department (Seattle IT) Capital Improvement Program, as part of the Criminal Justice Information System Replacement Project, with an estimated total cost of \$41 million over six years.

Schedule and Milestones:

1. 2017: \$2.5 million was appropriated to Seattle IT to conduct an options analysis comparing available options, vendor demonstrations, and conduct research for information on technology capabilities, while concurrently documenting MCIS current business practices and requirements.
2. 2018: \$5 million was appropriated to develop an RFP, data preparation, business process engagement and organizational change management.
3. 2019: \$3 million was appropriated to finalize an RFP, evaluate proposals, specific vendor demonstrations and interviews fit gap analysis and contract negotiations.
4. 2020: \$8.3 million appropriated with the vendor on board.
5. 2021: \$8.5 million appropriated for project team and vendor implementation.
6. Implementation began in late 2019, continues through 2020, 2021 and first half of 2022, with a go-live date in July 2022.

Seattle Municipal Court

Incremental Budget Changes

Computers and Equipment Reduction	(260,000)	-
Proposed Technical		
2020 Third Quarter Supplemental Staffing for MCIS	-	4.00
Total Incremental Changes	\$2,070,600	(9.25)
Total 2021 Proposed Budget	\$38,377,201	205.85

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$3,144,974

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$653,588

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022.

Seattle Municipal Court

Adjustment to 2020 Central Costs

Expenditures	\$(27,962)
--------------	------------

This action will true up the baseline to the 2020 Central Cost Manual.

Proposed Operating

Programs & Services (Probation) Redesign

Expenditures	\$(1,400,000)
Position Allocation	(12.25)

SMC will reorganize probation services to transform pretrial justice by reducing in-person day reporting and moving to a collaborative Community Court model; and reduce traditional post-sentence supervision to focus on higher risk charges. The redesign reduces the SMC budget by \$1.4 million and cuts probation staff by 13 positions (25% staffing reduction).

Community Court Support

Expenditures	\$100,000
--------------	-----------

Seattle Community Court (SCC) is a pretrial release program that will reduce incarceration, and rapidly resolve low-level, non-violent cases by connecting participants to community resources. The Court will contract with a non-profit to provide a case manager equipped to make culturally appropriate referrals to community-based agencies which will support clients in services with the goal of long-term self-sufficiency outside the court system.

Court Technology Staffing

Expenditures	\$(140,000)
Position Allocation	(1.00)

To assist the City in addressing the financial crisis, the Court will eliminate an Information Technology Professional-B position and funding in the Court Technology division. The recruitment efforts on this position have been difficult due to the required knowledge of Informix language that runs the legacy Municipal Court Information System (MCIS). The Court has absorbed this work with existing staff and will review technology staffing after MCIS go-live in July of 2022.

Computers and Equipment Reduction

Expenditures	\$(260,000)
--------------	-------------

To assist the City in addressing the financial crisis, the Court will reduce expenditures on computer and equipment purchases totaling \$260,000, temporarily relying on Trial Court Improvement Account funding (TCIA) for replacement of desktops and IT equipment. The TCIA funds, that come from the state, are restricted funds meant for court improvement projects, including technology. Funds will be transferred from the TCIA fund through the supplemental appropriation in 2021.

Proposed Technical

2020 Third Quarter Supplemental Staffing for MCIS

Expenditures	-
Position Allocation	4.00

Seattle Municipal Court

This item is a technical add of temporary positions transferred from the Seattle Information Technology Department to SMC for the MCIS IT project. The employees will continue to work on the MCIS 2.0 replacement project, which is scheduled to come on-line in 2022. The positions will be paid for by the MCIS/technology bond fund. These positions will sunset at the end of the project.

Seattle Police Department

Adrian Diaz, Interim Chief of Police

(206) 684-5577

<http://www.seattle.gov/police/>

Department Overview

The Seattle Police Department (SPD) addresses crime, enforces laws, and enhances public safety by delivering respectful, professional, and dependable police services. SPD divides operations into five precincts. These precincts define east, west, north, south, and southwest patrol areas, with a police station in each area. The department's organizational model places neighborhood-based emergency response services at its core, allowing SPD the greatest flexibility in managing public safety. Under this model, neighborhood-based personnel in each precinct assume responsibility for public safety management, primary crime prevention and law enforcement. Precinct-based detectives investigate property crimes and crimes involving juveniles, whereas detectives in centralized units located at SPD headquarters downtown and elsewhere conduct follow-up investigations into other types of crimes. Other parts of the department function to train, equip, and provide policy guidance, human resources, communications, and technology support to those delivering direct services to the public.

Interim Police Chief Adrian Diaz has committed the department to five focus areas to anchor itself throughout the on-going work around the future of community safety:

- **Re-envisioning Policing** - Engage openly in a community-led process of designing the role the department should play in community safety
- **Humanization** - Prioritize the sanctity of human life in every situation and affirm each individual's worth.
- **Reinventing Community Engagement** - Establish true and lasting relationships through respectful interactions in every situation
- **Fiscal Stewardship** - Examine critically every dollar spent to ensure it meaningfully contributes to community safety
- **Employee Wellness and Morale** - Support exceptional police services by ensuring the department retains the best employees.

In 2018, SPD was found to be in "full and effective compliance" with court-ordered reforms set forth in the 2012 U.S. Department of Justice ("DOJ") Settlement Agreement ("Consent Decree"). In May 2020, the City and SPD asked the court to terminate the sustainment period, stating SPD had fully demonstrated a culture of continuous improvement and innovation by meeting all of the court's requirements. Following the murders of George Floyd and Breonna Taylor by police officers, and the ensuing civil rights reckoning demanding a new model of community safety, the City and SPD asked to withdraw the termination order and committed to a community-led process of re-envisioning public safety.

Seattle Police Department

Budget Overview

Throughout the summer of 2020, Seattle residents have taken to the streets to protest the unjust murders of Black Americans George Floyd and Breonna Taylor and the shooting of Jacob Blake; all of these individuals experienced violent and lethal force at the hands of the police. For years, Seattle has been making progress to expand alternatives to arrest and incarceration and has gradually begun to increase community-based programs that address the root causes of crime and violence. Important reforms under the federal consent decree have been made in SPD, including a substantial decrease in use of force involving people in crisis and the implementation and advancement of community outreach programs. Communities are not only protesting race-based disparities in the SPD but the systemic racism built into government.

In an effort to right these historical wrongs, the City will endeavor to increase transparency and accountability into the SPD and its budget, functions, and the policymaking process. To begin this work, the City will conduct a thorough analysis of all 911 calls and all functions of the Seattle Police Department to ensure the department can continue to swiftly respond to Priority One and Two calls while transitioning calls that result from homelessness, behavioral health issues, or substance use problems to organizations outside of law enforcement. Throughout this effort, the City's north star will be creating a system that does not disproportionately criminalize Black people and other communities of color and does not criminalize people for experiencing the effects of institutional failures. Righting the wrongs of American history will not happen overnight, but the City will endeavor every day to embrace this seminal moment in history to create true and lasting change.

The 2021 Proposed Budget for the Seattle Police Department outlines a solid first step in reinventing policing and reimagining community safety. The budget reduces the size of SPD's sworn force, transfers functions from SPD that are better performed in a more civilianized practice and makes short-term reductions to SPD's budget in response to the COVID-19 pandemic. As community-led alternative responses are developed, the size of the force and appropriate response will be continually examined.

Right-sizing the sworn force

The Seattle Police Department was budgeted for 1,422 sworn officers in the 2020 Adopted budget. Because of the logistical and budget pressures created by the COVID-19 pandemic and demonstration expenses, a temporary hiring freeze has been put in place. Some of these pressures will continue into 2021 such that SPD will only be able to fill 1,400 sworn officer FTEs. Furthermore, the 2019 and 2020 Adopted Budgets expanded the force size, and this budget rolls back that expansion as we focus on ensuring that police officers are focused in work that requires a sworn officer. An interdepartmental team (IDT) will study SPD's functions, staffing levels, overtime needs and alternatives to police response that enhance community safety. The IDT will submit findings that will recommend staffing levels.

Functions that are not required to be in SPD

An early analysis of the functions in SPD that do not require police oversight determined that three units could be transferred from the department:

- **Parking Enforcement Unit.** This unit of 120 civilian employees enforces parking ordinances and provides traffic management for events such as sporting events, fun runs and film shoots. The Seattle Department of Transportation (SDOT) manages the right-of-way, determines parking zones and creates a traffic management plan for events that are enforced by this unit. Transfer of the unit to SDOT aligns these functions.
- **Office of Emergency Management.** This civilian unit coordinates the City's efforts to prepare for, respond to, and recover from disasters and emergencies. The unit staffs the City's Emergency Operations Center when a major event occurs, maintains communications and technology infrastructures for emergency response, and engages in fbr and technical assistance to communities, businesses and public sector

Seattle Police Department

agencies concerning disaster readiness and response. Creating an independent office for this unit allows for a higher level of significance for the department.

- **911 Communications Center.** This almost entirely civilian unit staffs the 911 communications center on a 24/7 basis. Call takers and dispatchers are responsible for receiving incoming communications, triaging calls and dispatching sworn and civilian officers, such as parking enforcement officers, as needed. All Fire calls are received by the 911 Communications Center, and then transferred to Seattle Fire Department for review/action. As non-sworn, community-based alternative responses to calls are developed, the 911 Communications Center, now called the Seattle Emergency Communications Center, will be crucial in dispatching those responses.

Continuing Investments in Police Reform and Accountability

The 2021 Proposed Budget expands activities pertaining to sustainment of the federal consent decree, reinforcing implemented reforms and investing in accountability structures within the department. This budget adds capacity to the Office of Police Accountability (OPA) by adding a civilian investigator supervisor to the office who will oversee sworn and civilian investigators who investigate constituent complaints about policing and will work to decrease the backlog of investigations. This adds a second supervisor to the team of nine sworn and two civilian investigative staff.

In 2021, the City Budget Office will be undertaking a study to examine opportunities for shared coordination of resources across the three police accountability entities, the Community Police Commission, the Office of the Inspector General and the Office of Police Accountability. This study will make recommendations regarding coordination of community engagement, communications, administrative support (e.g. accounting, human resources) or other functions. The recommendations could lead to budget or operational efficiencies but will ensure the independence of each entity.

Description of Incremental Budget Changes

Proposed Operating

Reduction to sworn officers counts and salaries; reduction to overtime and savings from a civilian hiring freeze.

Expenditures \$(22,402,317)

Position Allocation (47.00)

As a first step in reinventing policing and reimagining community safety, a reduction of \$22.4 million is proposed and includes the following cuts:

- Position Abrogation: Abrogate 47 sworn officer positions to decrease the force size from 1,497 positions to 1,450 sworn officer positions.

Seattle Police Department

- Sworn Vacancy Savings: Reduce funding in SPD budget from funding for 1,497 positions to funding for 1,400 positions (50 unfunded) for savings of \$15.7M.
- Civilian Vacancy Savings: Reduce funding in SPD budget from funding for 550 civilian positions to funding for 510 positions (40 unfunded) for savings of \$4.1M. This savings includes a vacancy assumption for positions that are in the Parking Enforcement Unit (10 FTE) and 911 Communications Center (11 FTE) which are proposed to be transferred from the department.
- Overtime Reduction: Reduce overtime for events and emphasis patrols by \$2.7M in 2021.

Transfer Parking Enforcement to Seattle Department of Transportation

Expenditures	\$(14,105,132)
Position Allocation	(120.00)

This item transfers the Parking Enforcement unit from the Seattle Police Department to the Seattle Department of Transportation (SDOT). As SDOT already manages the right-of-way and street parking, transferring the parking enforcement unit will allow for the functions to be unified in one department. The transfer includes all budget, personnel costs and staff associated with the unit, including support staff, overhead costs, and overtime funding.

Parking Enforcement Special Events Overtime

Expenditures	\$(803,000)
--------------	-------------

This item transfers overtime funding from SPD to Seattle Department of Transportation (SDOT) for special events staffed by Parking Enforcement Officers. SPD, SDOT and the Special Events Office will work together to develop a Memo of Understanding (MOU) on special events policy.

Transfer Office of Emergency Management out of Seattle Police Department

Expenditures	\$(2,463,466)
Position Allocation	(14.00)

This item transfers the Office of Emergency Management (OEM) from SPD to a new, independent department. The transfer includes all budget, personnel costs and staff associated with the unit, including support staff, overhead costs and overtime funding. The City Budget Office will work with the OEM, SPD and the shared services departments (SDHR, FAS and IT) to ensure that allocated rates are appropriately assigned in 2022.

Transfer 911 Call Center out of Seattle Police Department and create Seattle Emergency Communications Center

Expenditures	\$(18,215,697)
Position Allocation	(140.00)

This item transfers the 911 Call Center from SPD to a new, independent department, the SECC. The transfer includes all budget, personnel costs and staff associated with the unit, including support staff, overhead costs and overtime funding. The City Budget Office will work with the SECC, SPD and the shared services departments (SDHR, FAS and IT) to ensure that allocated rates are appropriately assigned in 2022.

Back Office Support for Parking Enforcement, Emergency Management and Emergency Communications Center

Expenditures	\$(1,418,000)
Position Allocation	(3.50)

This item transfers funding totaling \$1.4 million out of SPD to cover back office support for Parking Enforcement, the Office of Emergency Management (OEM) and the Seattle Emergency Communications Center (SECC). Parking Enforcement will be transferred to SDOT and OEM and SECC will be transferred into new, independent departments. This item also reduces 3.5 civilian vacant FTE from SPD to cover the funding necessary for the back office support.

Seattle Police Department

OPA Investigations Supervisor

Expenditures	\$167,493
Position Allocation	1.00

This change adds a second full-time civilian investigation supervisor to the Office of Police Accountability (OPA), an independent office whose budget resides within the SPD budget. OPA is currently budgeted for nine sworn investigators and two civilian investigators, with only one supervisor, which presents significant workload and span of control challenges. This is the particularly the case given the exponentially increased volume of complaints received by OPA starting in 2020. This position will ensure compliance with mandated deadlines for review, investigation, classification and distribution of case files with the appropriate support and supervision levels.

Automated Enforcement

Expenditures	\$750,000
--------------	-----------

This item adds overtime resources to SPD to support additional uses for automated traffic safety cameras in SDOT. This program is a pilot program through 2023 to permit enforcement of the following traffic violations: stopping at intersection or crosswalk, stopping when traffic obstructed, public transportation-only lane violations, and stopping or traveling in restricted lanes (including Lower West Seattle Bridge during restricted hours).

Proposed Technical

Budget Realignment Adjustments

Expenditures	-
Position Allocation	-

This technical change adjusts the department's organizational structure to allow for improved budget tracking and expenditure monitoring. SPD requested several organizational changes during last year's budget process, and additional items have been identified since those changes were implemented. This request is cost neutral and simply reallocates budget and position authority.

Adjustment for One-Time Budget Changes

Expenditures	\$986,380
Revenues	-

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget such as one-time additions for Community Service Officer vehicles and setup costs, the recruitment and retention initiative, recruitment incentives and reductions for salary savings.

2020 2nd Quarter Supplemental Ongoing Items

Expenditures	\$1,006,032
--------------	-------------

This item provides ongoing funding for Seattle Parking Enforcement Officer Guild (SPEOG) wage increases which is transferred to Seattle Department of Transportation.

Transfer Victim Advocates to the Human Services Department

Expenditures	\$(1,280,124)
Position Allocation	(11.00)

This item transfers ongoing salary and benefits for 9 Victim Advocates, a Manager 1 CL&PS and a Volunteer

Seattle Police Department

Programs Coordinator from SPD to the Human Services Department (HSD). The transfer of 11 FTE to HSD was approved in the 2020 2nd Quarter Supplemental Budget Ordinance. The City Budget Office will work with the HSD, SPD and the shared services departments (SDHR, FAS and IT) to ensure that allocated rates are appropriately assigned in 2022.

Adjust Administrative Staff Assistant from 0.8 to 1.0 FTE

Position Allocation	0.20
---------------------	------

This item adjusts the FTE amount to match the funding for this position.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$7,105,860
--------------	-------------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Civilian Personnel Costs

Expenditures	\$1,311,259
--------------	-------------

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Police Relief and Pension

Dan Oliver, Executive Secretary

(206) 386-1286

<http://www.seattle.gov/policepension/>

Department Overview

The Police Relief and Pension Fund (PPEN) provides pension and medical benefit services to eligible active and retired police officers and their beneficiaries. PPEN is a closed plan which only covers police officers who were hired before October 1, 1977. Retiree benefits for police officers hired more recently are primarily covered through a separate state-managed plan.

The management of police benefits funds transitioned in the 1970s from local to state control. Prior to that time, the City paid into PPEN to provide for police officer retiree benefits. In March 1970, the State of Washington took over the provision of certain police pensions through Revised Code of Washington (RCW) Section 41.26, the Law Enforcement Officers and Fire Fighters (LEOFF) Plan 1. Seattle police officers hired between March 1970 and October 1977 enrolled in LEOFF 1, but also received additional benefit coverage through PPEN. As a result, this group of police officers receives retiree benefits primarily from the state's LEOFF 1 plan, but also any earned increment from the City's PPEN that exceeds LEOFF 1 coverage. Both PPEN and LEOFF 1 closed to new enrollees in October 1977. Police officers hired after that date enroll in the state's LEOFF 2 plan and do not receive benefits from PPEN.

The Seattle Police Pension Board is a seven-member quasi-judicial body chaired by the Mayor or the Mayor's designee, which formulates policy, rules on disability applications, and provides oversight of the Police Pension Fund. Three staff employees of the board handle all of its operational functions. Staff positions associated with Police Relief and Pension are reflected in the City's position list.

The projections of annual pension and medical benefits, which comprise about 97% of the total annual PPEN budget, are based on the forecasts of an independent actuary. The City's General Fund provides funding for nearly all of PPEN's annual budget that supports the Police Relief and Pension Fund obligations. The Police Pension Fund also has a statutory funding source from police auction proceeds, which contribute a small amount towards the annual budget.

Police Relief and Pension

Budget Overview

The Police Relief and Pension Fund (PPEN) pays legally mandated pension and medical benefits, including long-term care, to eligible retired police officers and qualified beneficiaries. The total pension benefits for PPEN members are increased annually through locally negotiated cost of living adjustments (COLA) and local inflation. These increases are then offset by the benefits paid by the state's LEOFF 1 pension plan which has its own annual growth rate.

Most of PPEN's retirees are represented by either the Seattle Police Management Association (SPMA) or the Seattle Police Officer's Guild (SPOG).

The 2021 Proposed Budget's retiree medical and long-term care costs are \$15.38 million, unchanged from the 2020 Adopted Budget. The actuarial report anticipates medical and long-term care costs will increase over the next 15 to 20 years due to PPEN's aging membership and annual trend rates for medical and long-term care costs.

The 2021 Proposed Budget includes appropriation increases of \$18,257 for centrally adjusted administrative and labor costs and uses \$275,545 of existing fund balance to provide resources against expected expenditures.

Description of Incremental Budget Changes

Adjustment for One-Time Budget Changes

Revenues \$(257,288)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget:

Citywide Adjustments for Standard Cost Changes

Police Relief and Pension

Expenditures \$(488)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$18,745

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Technical

PPEN-Balancing

Revenues \$275,545

This is a technical item to balance revenues and expenditures for the Funds managed by this department

Seattle City Light

Debra Smith, General Manager & CEO

(206) 684-3500

<http://www.seattle.gov/light/>

Department Overview

Seattle City Light was created by the residents of Seattle in 1902 to provide affordable, reliable, and environmentally sound electric power to the City of Seattle and neighboring suburbs. Owned by the community it serves, City Light is a nationally recognized leader in energy efficiency, renewable resource development, and environmental stewardship.

City Light provides electric power to approximately 464,000 residential, business, and industrial customers within a 131-square-mile service area. City Light provides power to the City of Seattle and surrounding jurisdictions, including parts of Shoreline, Burien, Tukwila, SeaTac, Lake Forest Park, Renton, Normandy Park, and areas of unincorporated King County.

City Light owns about 2,000 megawatts of very low-cost, environmentally-responsible, hydroelectric generation capacity. In an average year, City Light meets about 50% of its load with hydroelectric facilities that it owns directly and obtains the remainder primarily through the Bonneville Power Administration (BPA). City Light is the nation's ninth largest publicly-owned electric utility in terms of customers served.

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

Seattle City Light's 2021 Proposed Budget is significantly impacted by the COVID-19 pandemic. Since the onset of the pandemic, electricity use has declined approximately 5%. Based on current projections, the proposed budget assumes this 5% reduction will continue in 2021. Additionally, the 2021-2026 Strategic Plan was placed on hold until further notice. A new two-year rate ordinance typically accompanies the strategic plan, however due to the

Seattle City Light

economic hardships brought on by the pandemic, there will be no rate increase, and 2021 rates will be held at 2020 levels (the previous Strategic Plan originally called for a rate increase of 3.6% in 2021).

The decline in electricity use negatively impacts department revenues, and City Light projects a \$55 million revenue shortfall in 2021. In response, the utility will implement reductions of approximately 10% to the controllable operating budget. These reductions include limiting hiring to essential personnel and increasing the vacancy rate from 6% to 12%. Non-labor budgets will also be reduced throughout the department in areas like consulting services, training and travel, supplies and performance pay. City Light prioritized maintaining essential services and customer-driven work, consequently, these reductions will not impact critical utility functions.

Capital program spending is also reduced in 2021 as numerous ongoing project budgets are temporarily decreased. Spending is restored in future years and several new projects are added, leading to a six-year capital budget increase of 3.5%, for a total of \$2.29 billion. The most significant project increase is for the Pole Replacement project. This additional funding will accelerate the replacement of City Light's wooden poles that have reached the end of their serviceable life and will help ensure the safety and reliability of the electrical system. The capital budget also funds the Transportation Electrification plan that expands electric vehicle programming and helps build infrastructure for light, medium and heavy-duty vehicles including ferries, buses and semi-trucks. For more detailed information on the capital program, please see the 2021-2026 Proposed Capital Improvement Program.

To support the capital program and other eligible City Light costs, the 2021 Proposed Budget anticipates a 2021 bond issue of approximately \$200 million.

City Light currently has a 3% surcharge in place (surcharges are automatically triggered as part of the Rate Stabilization Account to ensure that there are adequate reserves to protect against wholesale revenue fluctuations). Wholesale revenue forecasts as of September 2020 indicate that 1.5% of this surcharge will be lifted in early 2021 and that the final 1.5% will be lifted later in the spring. Actual surcharge action will depend on market prices, winter snowpack and runoff conditions.

Description of Incremental Budget Changes

Baseline

Net-Zero Transfers to Align with Central Cost Manual

Expenditures -

This net-zero adjustment aligns the base budget central rate accounts with the Central Cost Manual.

Citywide Adjustments for Standard Cost Changes

Seattle City Light

Expenditures \$(1,066,555)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Reset Fund Balance Annual Adjustment

Revenues \$(319,073,740)

Each year, department revenues include an adjustment for either the use of, or the contribution to their fund balance. This baseline budget adjustment zeroes out the 2020 Adopted Budget fund balance adjustment to prepare for the 2021 adjustment.

Proposed Operating

O&M Labor Reductions

Expenditures \$(12,000,000)

This one-time adjustment captures savings in labor costs as the department limits hiring to essential positions only and increases its vacancy rate from 6% to 12%. The restricted hiring will be managed to limit impacts to essential services and customer-driven work.

O&M Controllable Non-Labor Reductions

Expenditures \$(17,534,810)

This one-time adjustment carries forward the non-labor reductions identified in 2020. The cuts reduce \$9.5 million (or 34%) of the consulting budget; \$3.1 million (100%) of the incentive pay budget; \$2.7 million (9%) of the conservation incentives budget; \$1.2 million (5%) of the services budget; and \$1.9 million (12%) of the materials and supply budget. The conservation incentives reduction brings that budget in line with previous actual spending; the department will still meet their conservation targets established under I-937. Over the past three years, energy savings have averaged 132% of the target.

Deferred O&M transferred to Transportation Electrification

Expenditures \$(3,980,000)

Approximately half of the funding in the six-year capital program for the Transportation Electrification project comes from the deferred O&M account in City Light's operating budget (this resource can be amortized but is only for non-tangible assets). This adjustment reduces the budget in the deferred O&M account; the project increase occurs in separate capital budget request.

Proposed Capital

Accelerated Pole Replacement Program

Expenditures \$7,200,000

This change request adds \$7.2 million in 2021 (a total of \$106.4 million from 2021-2026) to fund the Accelerated Pole Replacement Program. After 26 poles came down on East Marginal Way in April 2019, an investigation noted that the classifications used for determining when poles need replaced was overly broad which limited City Light's ability to effectively prioritize replacements. Pole evaluation categories have been updated and expanded, and more poles than originally anticipated are now scheduled for replacement based on an analysis of pole strength. This

Seattle City Light

funding provides for the replacement of approximately 1,000 poles in 2021, and 1,500 from 2022 through 2026 (City Light owns about 91,000 wooden poles).

Transportation Electrification

Expenditures \$3,980,000

This item adds \$3.9 million in funding in 2021 for transportation electrification projects (total funding from 2021-2026 is \$55.8 million). This project funds the capital engineering support, equipment, installation services, and/or construction services to deliver new transportation electrification pilots, projects and scalable programs. These investments in City Light's service territory will be targeted toward: electrification infrastructure for light, medium, and heavy-duty electric vehicles (including transit, commercial, government and non-profit fleets, delivery vehicles, personal vehicles and freight vehicles); electrification infrastructure for ferry and port systems; and additional infrastructure supporting the development, coordination, or integration of these systems.

Transmission Tower Refurbishment

Expenditures \$3,177,000

This adjustment adds \$3,177,000 to begin work on the steel transmission towers identified for corrosion treatment as part of the mandatory work performed under the FERC Skagit Project Relicensing agreement. The scope of work includes performing the necessary engineering design for the structural repairs on towers that have severe corrosion, and for performing the field repair work and/or corrosion control coating applications on towers that were identified from previous engineering inspections.

Annual Capital Spending Adjustments

Expenditures \$(84,204,293)

This annual adjustment reprioritizes funding in the capital program and aligns budgets with the most up-to-date information on planned project spending. For more details on the capital program please see the 2021-2026 Proposed CIP book.

Proposed Technical

SCL-Revenue 2021-2022

Revenues \$(20,717,526)

This annual adjustment aligns City Light revenue accounts with the financial forecast used for the 2021 Proposed Budget.

Leadership and Administration BSL Consolidation

Expenditures -

To better align with the BSL and project structure across the City, City Light is consolidating their Leadership and Administration BSLs into one. Previously, City Light had separate Leadership and Administration BSLs for Human Resources, the General Manager, Finance, and Facilities related expenses. As part of this consolidation, the General Manager portion of the Customer Service BSL, as well as all of the Financial Services and Facilities & Oversight BSLs, will be consolidated into one Leadership & Administration BSL.

Technical Adjustments

Expenditures \$(24,179,598)

Seattle City Light

This annual technical change aligns various operating accounts with the projected spending. The most significant changes this year are the reduction in long-term purchased power costs due to the anticipated decline in load, and lower-than-anticipated debt-service payments due to favorable interest rates.

Base Budget Adjustments for Personnel Costs

Expenditures \$(238,748)

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

DEPT-Balancing

Revenues \$264,561,128

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Seattle Public Utilities

Mami Hara, General Manager & CEO

(206) 684-3000

<http://www.seattle.gov/util/>

Department Overview

Seattle Public Utilities (SPU) provides reliable, efficient and environmentally conscious utility services to enhance the quality of life and livability in all communities SPU serves. SPU operates three distinct utilities: Drainage and Wastewater, Solid Waste and Water. The three utilities each have unique revenue sources and capital improvement projects but share many operations and administration activities within SPU and the City.

Drainage and Wastewater: The Drainage and Wastewater Utility collects and disposes or discharges storm runoff and wastewater from residences, businesses, institutions and public properties within the City. In addition to handling sewage and storm water runoff, Drainage and Wastewater works with other government agencies and private parties to address Federal EPA-mandated sediment cleanup projects where contamination is linked to storm water or sewage, such as Gas Works Park and the Lower Duwamish Waterway. The drainage and wastewater systems include approximately 448 miles of separated sanitary sewers, 968 miles of combined sewers, 481 miles of storm drains, 68 pump stations, 85 permitted combined sewer overflow outfalls, 290 storm drain outfalls, 578 water quality structures, 295 drainage flow control facilities, and 38 combined sewer overflow control detention tanks and pipes.

Solid Waste: The Solid Waste Utility collects and processes recycling, compostables, and residential and commercial garbage to promote public health and safety, quality of life, and environmental stewardship. The City owns and operates two transfer stations, two household hazardous waste facilities, a fleet of trucks and heavy equipment, and several closed landfills. The Solid Waste Capital Improvement Plan (CIP) supports the transfer stations, heavy equipment, and post-closure projects on landfills previously used by the City. In addition, SPU contracts with private companies who collect household refuse, compostable material, and recyclables. The companies deliver the material to recycling and composting facilities and to transfer stations for its ultimate processing or disposal. In concert with its waste handling and disposal activities, Solid Waste engages its customers in environmental sustainability programs that promote recycling, composting and reducing waste generation. Solid Waste also works to keep Seattle clean, by targeting illegal dumping, automobile abandonment, graffiti removal and providing public litter cans and recycling bins across Seattle.

Water: The Water Utility provides reliable, clean, and safe water to more than 1.5 million customers in and around Seattle for consumption and other uses. The water delivery system extends from Edmonds to Des Moines and from Puget Sound to Lake Joy near Duvall. SPU delivers water directly to its customers in Seattle and adjacent areas and provides wholesale water to 21 suburban water utilities and two interlocal associations for distribution to their customers. The Water Utility includes 1,800 miles of pipeline, 31 pump stations, 15 treated water reservoirs, three wells and 104,000 acres in two watersheds. The Utility builds, operates and maintains the City's water infrastructure to ensure system reliability, conserve and enhance the region's environmental resources and protect public health and safety. SPU engages the community in conservation efforts to reduce water consumption.

SPU monitors its funds using financial targets and employs these metrics to communicate about the financial health of its utilities with the Mayor and City Council, Seattle residents and businesses, and the bond rating agencies. Financial performance metrics include net income; year-end cash balance; the amount of cash versus debt dedicated to the CIP; debt service coverage, which is the amount of cash available to pay annual debt service after day-to-day system expenses are paid; and, for the Drainage and Wastewater Fund, the debt to asset ratio. Due to strong financial management and a commitment on the part of elected officials to establishing prudent rates, SPU has some of the strongest bond ratings of any utility in the country. SPU's Water and Drainage and Wastewater bonds are rated one notch below the highest rating by both S&P (AA+) and Moody's (Aa1), while Solid Waste bonds, which traditionally are viewed as riskier by ratings agencies, are just slightly lower and still categorized as High-Grade High Quality bonds (AA and Aa3 from the two agencies, respectively). These high ratings help SPU sell revenue bonds to

Seattle Public Utilities

fund infrastructure investments at the lowest costs possible. These lowered costs benefit the utilities and the rate payers they serve.

Budget Snapshot

Budget Overview

The 2021 Proposed Budget for Seattle Public Utilities (SPU) maintains SPU's role of providing essential services to Seattle residents and businesses during this period of economic and public health challenges. As a result of the COVID-19 pandemic, SPU has worked to support customers in need of financial assistance and has provided crucial public hygiene services for the unsheltered population. Due to the pandemic, SPU has delayed until 2021 the adoption of the 2021-2026 Strategic Business Plan as well as a scheduled water rate ordinance and will keep 2021 water rates at their 2020 levels. SPU continues to support key initiatives and service levels identified in the 2018-2023 Strategic Business Plan. The 2021 Proposed Budget includes adjustments based on updated financial planning as well as changes reflected in capital planning. The net impact of these changes increases SPU's Proposed Budget by \$47 million.

Strategic Business Plan Overview

In 2017, the City adopted the 2018-2023 SPU Strategic Business Plan that guides the department's operations and investments for the six-year period from 2018-2023. A nine-member customer panel oversaw the development of the plan. The plan sets a transparent and integrated direction for all SPU utilities and contains projected six-year rate paths for water, drainage, wastewater, and solid waste lines of business. The adopted rate of growth across all lines of business, taking into account revised Solid Waste rates, is 5.0% annually.

In 2021, SPU anticipates submitting for adoption an updated 2021-2026 Strategic Business Plan. SPU will continue with programmatic reprioritization, efficiency improvements, and refinement of the CIP and operating budgets outlined here and in 2018-2023 plan to streamline utility services and deliver on regulatory requirements.

Drainage and Wastewater Highlights

The City adopted Drainage and Wastewater Rates in 2018 that reflected decreased expenditures in the Strategic

Seattle Public Utilities

Business Plan. Drainage rates will grow by 7.3% in 2021, while Wastewater rates will grow by 7.4%. New Drainage and Wastewater rates are slated for adoption in 2021. SPU wastewater rates include King County treatment rates that are passed through to customers. King County treatment rates are slated to increase by 4.5% in 2021 and 2022, 10.25% in 2023, and 0% in 2024.

Efficiencies, Reductions, and Deferrals:

The 2021 Proposed Budget increases the Drainage and Wastewater Operations and Maintenance (O&M) budget by \$28.8 million relative to the 2020 Adopted. This reflects various technical changes related to taxes and fees, debt service, major service contracts, central costs, labor-related changes, and other miscellaneous changes.

The 2021-2026 Proposed CIP reduces the Drainage and Wastewater Fund budget by an overall \$27.3 million in 2021. This reflects updated project timelines and scope shifts as well as the strategic priorities of Seattle Public Utilities. Updates include:

- deferring \$29.9 million in costs associated with construction of Natural Drainage System projects and the Taylor Creek Restoration Project by shifting construction from 2021 to 2022;
- increasing by \$7.9 million funding for rehabilitation of sewer pipes, Combined Sewer Overflow (CSO) outfalls, sewer pump stations, and drainage infrastructure;
- increasing by \$3.7 million funding for the Ship Canal Water Quality Project due to an updated construction schedule.
- decreasing Shared Cost Projects by an overall \$9.2 million in 2021, with changes primarily coming from an increased \$5.4 million in Waterfront CSO project costs due to shifts from 2020 to 2021, and a \$13 million decrease from South Operations Center costs shifting from 2021 to 2022.

None of the efficiencies, reductions, or deferrals are expected to adversely affect services provided to customers or significantly change long-term goals of capital projects.

For more information on SPU's capital projects, please see the accompanying 2021-2026 Proposed CIP.

Water Utility Highlights

The Water Utility delivers potable water directly to retail customers both inside the City and in adjacent areas. In 2019, retail customers provided about 74% of the Water Fund's operating revenues, with roughly equal revenues coming from residential and commercial users. SPU also delivers water to districts and agencies who then deliver water to their direct customers. This wholesaling of water represented about 20% of Water's operating revenues in 2019. The remaining revenue was generated by non-rate fees and other sources.

As a result of the COVID-19 pandemic, stay-at-home orders, and social distancing guidelines, consumption and revenue patterns have shifted dramatically during 2020. Since April, billed residential consumption and revenue have exceeded forecast by a considerable amount. Conversely, billed consumption and revenue for General Service (commercial and multifamily residential) have been well below forecast. The Water Line of Business has moved away from a period of intensive capital investment in new projects and is transitioning into maintenance and improvements of the existing transmission and distribution system. SPU will continue its efforts to complete reservoir retrofits and covering, water supply and asset preservation projects as detailed in the 2020-2025 Adopted CIP.

The City Council adopted Water Rates for retail customers in 2017 for the 2018, 2019 and 2020 rate period. Due to COVID-19, no water rate increase is planned for 2021. New water rates for 2022-2023 will be transmitted to Council for adoption in 2021 alongside the 2021-2026 Strategic Business Plan.

Changes to the Water Fund: The 2021 Proposed Budget decreases the Water O&M budget by \$504,322 compared to the 2020 Adopted Budget. This reflects various technical changes to taxes and fees, debt service, central costs, labor-related changes, and miscellaneous reductions.

The 2021 Proposed Budget and 2021-2026 Proposed CIP also reduce by \$3.3 million the Water Fund CORE and

Seattle Public Utilities

Shared CIP budgets. These changes reflect:

- increasing funding for capital projects driven by demand (e.g. water tap installations that follow permit requests for new construction; and
- changes in funding for capital projects that have been shifted forward into 2021 or deferred to outyears. For more information on these changes, please see the accompanying 2021-2026 Proposed CIP.

For more information on these changes, please see the accompanying 2021-2026 Adopted CIP.

Solid Waste Highlights

The Solid Waste Utility provides collection services to residents and businesses within Seattle. Financial support of this service is primarily generated through charges based on the amount of garbage collected from residential and commercial waste collection contracts. Solid Waste will pursue opportunities for efficiencies in service delivery as it continues to experience decreased demand for services as a result of its conservation efforts to reduce solid waste and increase recycling activity.

Solid Waste Utility Rates for the 2020, 2021, and 2022 period were legislated in 2019. Rates submitted for 2020-2022 were informed by the 2018-2023 Strategic Business Plan. The approved rates included increases of 3.0% in 2020, 2.9% in 2021, and 2.9% in 2022, for an average annual increase of 3.0% over the three-year period. This is below the average Solid Waste Rate path assumed in the 2018-2023 Strategic Business plan that assumed average annual increases of 3.4% over the same three-year period.

As a result of the COVID-19 pandemic and stay-at-home policies, solid waste tonnage and revenue in the residential sector has climbed, while tonnage and revenue in the commercial sector has fallen.

Changes to the Solid Waste Fund: The 2021 Proposed Budget increases the Solid Waste O&M budget by \$6.6 million compared to the 2020 Adopted Budget. These changes represent updated projections for taxes, debt service, major service contract payments, and labor and inflation-related increases. The 2021-2026 Proposed CIP includes a \$5.1 million reduction due to revised capital project spending plans. For more information on these changes, please see the accompanying 2021-2026 Proposed CIP.

Shared Across All Enterprise Funds

SPU corporate functions including leadership and administration, project delivery, and customer service are shared across all three enterprise funds and allocated proportionally. These functions are included individually by fund and each line of business collects enough rate revenues to pay for these costs. Across all three Enterprise Funds, SPU will on net reduce Shared CIP by \$16.5 million in 2021, representing shifting construction timelines, equipment purchases, and facility construction projects.

General Fund

In addition to the three utility enterprise funds, SPU receives General Fund monies to support activities that go beyond direct utility service provision and support general government services. The General Fund portion of the SPU budget provides resources for:

- public hygiene services for the unsheltered, which includes shower trailers, portable toilets, and handwashing stations, first deployed in response to the COVID-19 pandemic and continuing in 2021;
- the Clean City Program, which addresses public blight issues in Seattle including public litter, illegal dumping, graffiti on public property, and litter issues related to unsanctioned homeless encampments;
- the Trees for Seattle Program (previously called ReLeaf), which works to maintain and increase the urban tree canopy in Seattle; and
- general government functions like maintaining survey markers throughout Seattle, standardizing construction specifications and planning documents, and maintaining engineering records for the city.

Programmatic increases: The 2021 Adopted Budget adds approximately \$6.4 million to the SPU General Fund

Seattle Public Utilities

budget. Most of this represents the Public Hygiene Program, which was expedited and augmented to respond to the COVID-19 pandemic. \$57,000 represents funding for the Recreational Vehicle Remediation Pilot Program.

Existing Homelessness Programs: The 2021 Proposed Budget includes funding for SPU to continue three programs related to homelessness issues in Seattle. These programs included the Encampment Bag Program, the Litter Abatement Program, and the Needle Program. Under these programs, SPU provides trash removal from encampments, removes litter from the public right-of-way in neighborhoods affected by unsanctioned homeless encampments, removes used needles from the public right-of-way, and installs and services public needle disposal boxes throughout Seattle. Since first implementing the programs as pilots in 2017, service levels have expanded. The 2021 Proposed Budget maintains these expanded service levels. The budget also continues the ongoing pilot program to reduce trash and litter from illegally parked recreational vehicles (RVs) in the public right-of-way or on Seattle Parks and Recreation property.

General Fund reductions: Per guidance to City departments to reduce General Fund budgets in response to severe forecasted revenue shortfalls, the 2021 Proposed Budget includes \$206,805 in reductions to Clean City, primarily for staffing costs.

Incremental Budget Changes

Description of Incremental Budget Changes

Baseline

Adjustments to Align Central Costs

Expenditures -

This item shifts administrative and overhead costs across accounts to align costs with City of Seattle's Central Cost Manual.

AWI Adjustments

Expenditures \$(757,441)

Adjustment for no Annual Wage Increase (AWI) citywide for non-represented APEX/SAM (executive, strategic advisor, and manager) positions in 2021.

Adjustment for One-Time Budget Changes

Revenues \$(306,143,408)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget:

Revenues

Revenues \$345,146,741

Proposed Operating

General Fund - Public Hygiene Program

Expenditures \$6,300,460

This item increases General Fund (GF) appropriation by \$6,300,460 in 2021 in the Utility Services and Operations BSL to pay for the ongoing costs related to the City's comprehensive Public Hygiene Program, which was augmented to respond to the COVID-19 pandemic. The program consists of portable toilets, handwashing stations, and mobile shower trailers situated throughout Seattle, and includes a funding for Hygiene Services for the unsheltered originally budgeted in the Human Services Department.

General Fund - Reductions

Expenditures \$(206,805)

This item decreases the General Fund (GF) appropriation by \$206,805 in 2021 in the Utility Services and Operations BSL. Reductions are to temporary staff support and overtime associated with the Clean City body of work. These cuts represent roughly 2 percent of the Clean City budget and are not expected to have significant impacts.

General Fund - RV Remediation

Expenditures \$57,000

Seattle Public Utilities

This item increases the General Fund (GF) appropriation by \$57,000 in 2021 in the Utility Services and Operations BSL to pay for increased RV remediation costs associated with reductions in the Seattle Department of Transportation (SDOT) 2021 proposed budget.

Transfer of Encampment Cleanup Contract to Seattle Public Utilities

Expenditures \$1,313,229

This item transfers the funding used to support encampment trash and biowaste clean up from Finance and Administrative Services (FAS) to Seattle Public Utilities (SPU). Moving this contract consolidates encampment cleanup programming and oversight for the City of Seattle in SPU. There are no service level impacts, and no overall change to City costs.

Proposed Capital

Drainage and Wastewater Capital Changes

Expenditures \$(27,324,063)

This item decreases the Drainage and Wastewater Fund (DWF) by \$27.3 million in 2021 and increases by \$3.3 million in 2022 across all BCLs. These changes reflect updated project timelines and scope shifts and reflects the strategic priorities of Seattle Public Utilities.

Solid Waste Capital Changes

Expenditures \$(3,892,603)

This item decreases the Solid Waste Fund by \$3.9 million in 2021 and increases by \$17.3 million in 2022 across all Capital Budget Control Levels (BCLs). This shifts various project costs between years for a total addition of \$19.7 million over the six-year CIP from 2021-2026.

Technology Capital Changes

Expenditures \$900,999

This item increases the Technology Capital Improvement Program (CIP) by \$901,000 in 2021. This increase will impact the Water, Drainage and Wastewater, and Solid Waste funds. The total increase for the 6-year period is \$10,951,000.

Water Capital Changes

Expenditures \$(3,293,869)

This item decreases the Water Fund Core and Shared CIP by \$3,293,653 in 2021. There will be a continued focus is on asset management for distribution and transmission pipes, water system impacts associated with the various Seattle and regional transportation projects, and upgrades to water system facilities such as operation buildings.

Proposed Technical

Shared - Technical Adjustment

Expenditures \$35,371,831

This item adjusts various O&M BSLs in the Water Fund (WF), Drainage and Wastewater Fund (DWF), Solid Waste Fund (SWF) and General Fund (GF) for a net increase of approximately \$35.4 million in 2021. The main drivers of change are updated projections for taxes, debt service, major service contract payments, and labor and inflation-related increases.

Seattle Public Utilities

The adjustments included in this request and the overall SPU budget are consistent with the draft 2021-2026 Strategic Business Plan that will be submitted for approval in 2021.

Technical Adjustments Related to 2020Q3 IT Staff Transfer

Expenditures	\$823,494
Position Allocation	7.00

This item increases various BSLs in the Water Fund (WF), Drainage and Wastewater Fund (DWF), and Solid Waste Fund (SWF) to reflect ongoing costs related to the transfer of seven positions from the Seattle Information Technology Department (ITD) to SPU in the 2020 3rd Quarter Supplemental Budget. Five of the positions will support the Utility's SCADA program, and two of the positions will support the Utility's Financial Management Systems group that maintains SPU's side systems. SPU and ITD have entered into MOAs that govern the management of these positions in 2020.

SPU and ITD agreed to transfer the SCADA positions prior to ITD completing its budget and associated internal rate allocations for 2021 and 2022. However, SPU and ITD agreed to transfer the Financial Management Systems positions after ITD finalized its rate allocations. SPU will pay the ITD allocations in full in 2021. At the end of 2021, the Departments will meet to true up costs and will reconcile the difference at that time. The SPU 2022 Proposed Budget will include the costs for these positions in full.

Appropriations by Budget Summary Level and Program

SPU - BC-SU-C110B - Distribution

The purpose of the Distribution Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade the City's water lines, pump stations, and other facilities.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Distribution	28,969,564	34,136,663	31,095,001
Total	28,969,564	34,136,663	31,095,001
Full-time Equivalents Total*	79.00	79.00	79.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C120B - Transmission

The purpose of the Transmission Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade the City's large transmission pipelines that bring untreated water to the treatment facilities, and convey water from the treatment facilities to Seattle and its suburban wholesale customers' distribution systems.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Transmission	2,127,355	15,612,322	20,129,412
Total	2,127,355	15,612,322	20,129,412
Full-time Equivalents Total*	5.00	5.00	5.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C130B - Watershed Stewardship

The purpose of the Watershed Stewardship Budget Summary Level, a Capital Improvement Program funded by water revenues, is to implement projects associated with the natural land, forestry, and fishery resources within the Tolt, Cedar, and Lake Youngs watersheds.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Watershed Stewardship	516,171	1,289,569	298,356
Total	516,171	1,289,569	298,356
Full-time Equivalents Total*	8.00	8.00	8.00

Seattle Public Utilities

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C140B - Water Quality & Treatment

The purpose of the Water Quality & Treatment Budget Summary Level, a Capital Improvement Program funded by water revenues, is to design, construct, and repair water treatment facilities and remaining open-water reservoirs.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Water Quality & Treatment	438,639	9,525,000	13,214,127
Total	438,639	9,525,000	13,214,127
Full-time Equivalents Total*	14.00	14.00	14.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C150B - Water Resources

The purpose of the Water Resources Budget Summary Level, a Capital Improvement Program funded by water revenues, is to repair and upgrade water transmission pipelines and promote residential and commercial water conservation.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Water Resources	3,169,058	8,464,008	12,031,263
Total	3,169,058	8,464,008	12,031,263
Full-time Equivalents Total*	12.00	12.00	12.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C160B - Habitat Conservation Program

The purpose of the Habitat Conservation Budget Summary Level, a Capital Improvement Program funded by water revenues, is to manage projects directly related to the Cedar River Watershed Habitat Conservation Plan.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Habitat Conservation Program	645,615	3,488,143	1,474,395
Total	645,615	3,488,143	1,474,395
Full-time Equivalents Total*	15.00	15.00	15.00

Seattle Public Utilities

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C230B - New Facilities

The purpose of the New Facilities Budget Summary Level, a Capital Improvement Program funded by solid waste revenues, is to design and construct new facilities to enhance solid waste operations.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
New Facilities	4,774,627	18,442,478	19,250,000
Total	4,774,627	18,442,478	19,250,000
Full-time Equivalents Total*	9.00	9.00	9.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C240B - Rehabilitation & Heavy Equipment

The purpose of the Rehabilitation and Heavy Equipment Budget Summary Level, a Capital Improvement Program funded by solid waste revenues, is to implement projects to repair and rehabilitate the City's solid waste transfer stations and improve management of the City's closed landfills and household hazardous waste sites.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Rehabilitation & Heavy Eqpt	622,676	8,390,000	1,220,000
Total	622,676	8,390,000	1,220,000

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C333B - Protection of Beneficial Uses

The purpose of the Protection of Beneficial Uses Budget Summary Level, a Capital Improvement Program funded by drainage revenues, is to make improvements to the City's drainage system to reduce the harmful effects of storm water runoff on creeks and receiving waters by improving water quality and protecting or enhancing habitat.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Protection of Beneficial Uses	5,708,258	22,273,994	21,139,104

Seattle Public Utilities

Total	5,708,258	22,273,994	21,139,104
Full-time Equivalents Total*	14.00	14.00	14.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C350B - Sediments

The purpose of the Sediments Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to restore and rehabilitate natural resources in or along Seattle's waterways.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Sediments	3,252,025	3,481,934	3,867,219
Total	3,252,025	3,481,934	3,867,219
Full-time Equivalents Total*	7.00	7.00	7.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C360B - Combined Sewer Overflows

The purpose of the Combined Sewer Overflow (CSO) Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to plan and construct large infrastructure systems, smaller retrofits, and green infrastructure for CSO Summary.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Combined Sewer Overflows	30,181,842	121,148,094	134,109,402
Total	30,181,842	121,148,094	134,109,402
Full-time Equivalents Total*	30.00	30.00	30.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C370B - Rehabilitation

The purpose of the Rehabilitation Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to rehabilitate or replace existing drainage and wastewater assets in kind, to maintain the current functionality of the system.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
-----------------------------	-------------------------	-------------------------	--------------------------

Seattle Public Utilities

Rehabilitation	35,643,529	40,043,724	38,267,638
Total	35,643,529	40,043,724	38,267,638
Full-time Equivalents Total*	30.00	30.00	30.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C380B - Flooding, Sewer Backup & Landslide

The purpose of the Flooding, Sewer Back-up, and Landslides Budget Summary Level, a Capital Improvement Program funded by drainage and wastewater revenues, is to plan, design and construct systems aimed at preventing or alleviating flooding and sewer backups in the City of Seattle, protecting public health, safety, and property. This program also protects SPU drainage and wastewater infrastructure from landslides, and makes drainage improvements where surface water generated from City rights-of-way contributes to landslides.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Flooding, Sewer Backup & Lndsl	11,087,863	37,252,229	42,898,658
Total	11,087,863	37,252,229	42,898,658
Full-time Equivalents Total*	25.00	25.00	25.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C410B - Shared Cost Projects

The purpose of the Shared Cost Projects Budget Summary Level, which is a Capital Improvement Program, is to implement the Water, Drainage and Wastewater, and Solid Waste Utility's share of capital improvement projects that receive funding from multiple SPU funds.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Shared Cost Projects	24,070,205	81,663,847	69,272,585
Total	24,070,205	81,663,847	69,272,585
Full-time Equivalents Total*	95.00	95.00	95.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BC-SU-C510B - Technology

The purpose of the Technology Budget Summary Level, a Capital Improvement Program, is to make use of technology to increase the Water, Drainage and Wastewater, and Solid Waste Utility's

Seattle Public Utilities

efficiency and productivity.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Technology	8,890,410	11,199,999	12,200,099
Total	8,890,410	11,199,999	12,200,099
Full-time Equivalents Total*	41.00	41.00	41.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SPU - BO-SU-N000B - General Expense

The purpose of the General Expense Budget Summary Level is to provide for the Utility's general expenses such as debt service, taxes and major contracts.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Budget Reserves	489,644	7,909,526	8,914,284
Capital Purchases	56,917	234,175	238,859
Debt Service	165,451,847	179,932,891	170,057,449
Major Contracts	283,732,444	292,235,325	308,299,579
Taxes and Fees	135,811,167	141,778,458	161,090,218
Total	585,542,019	622,090,374	648,600,389

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in General Expense Budget Summary Level:

Budget Reserves

The purpose of the Budget Reserves Program is to appropriate funds to maintain a necessary working reserve for unanticipated expenditures that may develop during the fiscal year. These are important due to the utility need to plan revenue on a six-year horizon.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Budget Reserves	489,644	7,909,526	8,914,284

Capital Purchases

The purpose of the Capital Purchases Program is to provide appropriation for the utility to purchase equipment that cannot purchased using bond proceeds.

Seattle Public Utilities

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Capital Purchases	56,917	234,175	238,859

Debt Service

The purpose of the Debt Service Program is to provide appropriation for new bond issuance costs as well as principal and interest payments on previously issued bonds and loans.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Debt Service	165,451,847	179,932,891	170,057,449

Major Contracts

The purpose of the Major Contracts Program is to provide appropriation for large service contracts that SPU has with solid waste contractors and for water and wastewater treatment costs.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Major Contracts	283,732,444	292,235,325	308,299,579

Taxes and Fees

The purpose of the Taxes Program is to provide appropriation for payment of city and state taxes.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Taxes and Fees	135,811,167	141,778,458	161,090,218

SPU - BO-SU-N100B - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to provide overall management and policy direction for Seattle Public Utilities and to provide core management and administrative services like finance, human resources, and facility management.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
Citywide Indirect Costs	62,833,193	62,292,309	62,592,009
Departmental Indirect Costs	66,173,778	97,268,012	83,286,162
Divisional Indirect Costs	1,155,732	1,492,703	1,253,337
Indirect Cost Recovery Offset	(21,918,671)	(20,878,653)	(20,302,238)
Paid Time Off Indirect Costs	7,904,884	5,656,400	4,443,206
Pooled Benefits Indirect Costs	4,917,172	6,381,850	8,025,203
Total	121,066,089	152,212,621	139,297,679
Full-time Equivalents Total*	108.35	116.60	118.60

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City*

Seattle Public Utilities

Council or Human Resources Director actions outside of the budget process may not be detailed here

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services and Seattle Information Technology Department.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Citywide Indirect Costs	62,833,193	62,292,309	62,592,009

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department. This may include personnel costs related to department leadership and administration or other administrative costs such as external rent and operating supplies or services.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Departmental Indirect Costs	66,173,778	97,268,012	83,286,162
Full Time Equivalents Total	108.35	116.60	118.60

Divisional Indirect Costs

The purpose of the Divisional Indirect Costs program is to fund administrative costs generated by sub-departmental units.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Divisional Indirect Costs	1,155,732	1,492,703	1,253,337

Indirect Cost Recovery Offset

The purpose of the Indirect Cost Recovery Offset program is to reflect the adjustment to the Leadership and Administration BSL occurring as a result of the Utility's general and administrative overhead allocation.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Indirect Cost Recovery Offset	(21,918,671)	(20,878,653)	(20,302,238)

Paid Time Off Indirect Costs

Seattle Public Utilities

The purpose of the Paid Time Off program is to fund salary and benefit costs associated with City-provided leave benefits such as holiday pay, sick time, vacation time, executive leave or other leave benefits, including termination payouts for vacation and sick leave.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Paid Time Off Indirect Costs	7,904,884	5,656,400	4,443,206

Pooled Benefits Indirect Costs

The purpose of the Pooled Benefits program is to fund department costs associated with health and dental insurance, workers compensation, and unemployment insurance contributions.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Pooled Benefits Indirect Costs	4,917,172	6,381,850	8,025,203

SPU - BO-SU-N200B - Utility Service and Operations

The purpose of the Utility Service and Operations Budget Summary Level is to fund the direct delivery of essential Customer Service programs and the operating expenses for Pre-Capital Planning & Development, Project Delivery, Drainage and Wastewater, Solid Waste, Water and General Fund programs.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Customer Service	19,267,612	26,811,448	24,491,609
Drainage System	7,626,695	10,475,721	10,169,240
DWW Facilities & Equip	2,404,638	789,897	1,277,248
DWW System Operations	19,117,238	19,777,319	27,281,525
Emergency Response	1,972,256	2,147,041	2,260,259
Engineering	5,616,386	6,529,147	18,027,091
Pre-Capital Planning	4,261,367	4,191,666	4,392,736
Solid Waste Facilities & Equip	4,187,484	6,020,127	5,983,638
Solid Waste Operations	25,029,858	28,185,069	32,692,626
Wastewater System	10,597,458	13,861,807	12,825,670
Water Distribution System	11,444,810	14,252,581	12,860,675
Water Facilities & Equip	3,294,991	-	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Public Utilities

The following information summarizes the programs in Utility Service and Operations Budget Summary Level:

Customer Service

The purpose of the Customer Service Program is to provide appropriation to manage and provide customer service support for the direct delivery of programs and services.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Customer Service	19,267,612	26,811,448	24,491,609
Full Time Equivalents Total	242.00	249.00	249.00

Drainage System

The purpose of the Drainage System Program is to provide appropriation for maintaining the drainage system, drainage conveyance, stormwater detention and green stormwater infrastructure.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Drainage System	7,626,695	10,475,721	10,169,240

DWW Facilities & Equip

The purpose of the DWW Facilities and Equipment Program is to provide appropriation for drainage and wastewater operating and decant facilities

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
DWW Facilities & Equip	2,404,638	789,897	1,277,248

DWW System Operations

The purpose of the DWW System Operations Program is to provide appropriation for drainage and wastewater overall system planning, system modeling and analysis, source control, compliance and outreach and education.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
DWW System Operations	19,117,238	19,777,319	27,281,525

Emergency Response

The Emergency Response Program provides appropriation to procure necessary equipment and provide maintenance and support services in case of emergencies.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			

Seattle Public Utilities

Emergency Response	1,972,256	2,147,041	2,260,259
--------------------	-----------	-----------	-----------

Engineering

The purpose of the Engineering Program is to provide engineering design and support services, construction inspection, and project management services to capital improvement projects and to the managers of facilities.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Engineering	5,616,386	6,529,147	18,027,091
Full Time Equivalents Total	106.50	107.00	107.00

Pre-Capital Planning

The purpose of the Pre-Capital Planning Program is to support business case development, project plans, and options analysis. This program will capture all costs associated with a project that need to be expensed during its life cycle, including any post-construction monitoring and landscape maintenance.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Pre-Capital Planning	4,261,367	4,191,666	4,392,736

Solid Waste Facilities & Equip

The purpose of the Solid Waste Facilities & Equipment Program provides appropriation to maintain and support the solid waste facilities and landfills.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Solid Waste Facilities & Equip	4,187,484	6,020,127	5,983,638

Solid Waste Operations

The purpose of the Solid Waste Operations Program provides appropriation for overall solid waste system planning, operations of the transfer stations, solid waste outreach and management of the Local Hazardous Waste Mitigation Program (LHWMP).

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Solid Waste Operations	25,029,858	28,185,069	32,692,626
Full Time Equivalents Total	88.56	91.56	91.56

Wastewater System

The Wastewater System Program provides appropriation to maintain wastewater conveyance, pump stations and storage.

	2019	2020	2021
Expenditures/FTE			

Seattle Public Utilities

	Actuals	Adopted	Proposed
Wastewater System	10,597,458	13,861,807	12,825,670
Full Time Equivalents Total	233.05	233.05	233.05

Water Distribution System

The Water Distribution System Program provides appropriation to maintain water distribution conveyance, pump stations and reservoirs.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Water Distribution System	11,444,810	14,252,581	12,860,675
Full Time Equivalents Total	120.09	120.09	120.09

Water Facilities & Equip

The Water Distribution System Program provides appropriation to maintain water distribution conveyance, pump stations and reservoirs.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Water Facilities & Equip	3,294,991	-	-

Water Facilities & Equipment

The Water Facilities & Equipment Program provides appropriation to maintain water storage facilities.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Water Facilities & Equipment	-	3,392,850	2,961,111

Water Supply & Transmssn Systm

The Water Supply and Transmission System Program provides appropriation to operate and maintain the water pipelines, reservoirs and water sheds.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Water Supply & Transmssn Systm	6,016,740	5,991,810	5,285,926

Water System Operations

The Water System Operations Program provides appropriation to plan and monitor the overall water system and water quality lab, and includes the work for the Cedar River Habitat conservation.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			

Seattle Public Utilities

Water System Operations	19,588,753	18,366,588	29,590,414

Seattle Department of Transportation

Sam Zimbabwe, Director

(206) 684-5000

<http://www.seattle.gov/transportation>

Department Overview

The Seattle Department of Transportation (SDOT) develops, maintains, and operates a transportation system that promotes the safe and efficient mobility of people and goods, and enhances the quality of life, environment, and economy of Seattle and the surrounding region. The City's transportation infrastructure is estimated to be worth approximately \$28 billion, including these major system assets:

- 1,548 lane-miles of arterial streets;
- 2,396 lane-miles of non-arterial streets;
- 2,293 miles of sidewalks;
- 124 bridges;
- 499 stairways;
- 581 retaining walls;
- 22 miles of seawalls;
- 1,118 signalized intersections;
- 47 miles of multi-purpose trails;
- 2,293 miles of improved sidewalks and median pathways;
- 142 miles of on-street bicycle facilities;
- 38,000 street trees;
- 1,512 pay stations;
- 31,823 curb ramps;
- more than 194,000 signs

The SDOT budget covers three major lines of business:

The **Transportation Capital Improvement Program** includes the major maintenance and replacement of SDOT's capital assets; the program also develops and constructs additions to the City's transportation infrastructure. The program includes the Major Maintenance/Replacement, Major Projects, and Mobility-Capital Budget Summary Levels (BSLs).

Operations and Maintenance covers day-to-day operations and routine maintenance that keep people and goods moving throughout the city, which includes operating the city's movable bridges and traffic signals, cleaning streets, repairing potholes, issuing permits, maintaining trees, and transportation planning and engineering. The four BSLs in this area are: Bridges and Structures; Maintenance Operations; Mobility-Operations; and Right-of-Way Management.

Business Management and Support provides overall policy direction and business support for SDOT and includes the Leadership and Administration and General Expense BSLs.

Seattle Department of Transportation

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support			
General Fund Support	43,818,562	46,652,133	57,387,782
Other Funding - Operating	235,987,454	275,531,322	201,492,035
Total Operations	279,806,017	322,183,455	258,879,817
Capital Support			
General Fund Support	106	3,060,000	1,260,728
Other Funding - Capital	245,178,580	413,685,733	347,726,697
Total Capital	245,178,686	416,745,733	348,987,424
Total Appropriations	524,984,703	738,929,188	607,867,241
Full-Time Equivalents Total*	931.50	958.00	1,079.00

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Budget Overview

The City of Seattle, like the rest of the country, is recovering from the impacts of the COVID-19 pandemic. In addition to adverse public health impacts, the pandemic has had a devastating impact on national, state, and local economies resulting in significant declines in revenues and increases in emergency spending. It is within this context of uncertainty and economic instability that the City took action to rebalance the 2020 Seattle Department of Transportation (SDOT) budget through a series of reductions and pauses on operating and capital spending and that the 2021 Proposed Budget was developed.

Significant revenue shortfalls (citywide and transportation specific) due to the economic downturn coupled with uncertainties regarding the outcome on I-976 and STBD renewal and possible reduction of grant and partnership funding create a high-risk environment for SDOT revenues. In addition, cost pressures from the West Seattle Bridge closure and resulting traffic mitigation, protest response, and COVID-19 impacts are further increasing the funding gap. Winter weather response and past fund balance issues exacerbate an already volatile financial condition.

The 2021 funding gap is anticipated to be \$85.1 million with revenue and funding declines comprising \$53 million or 66% of the gap, with timing and fund balance issues making up \$24.8 million and the remaining \$2.3 million resulting from a shortfall in reimbursable revenue. Because there are no local tools to make up for all the revenue losses nor does this budget reflect significant financial assistance from our federal or state partners, the proposed budget includes direct program and project reductions of \$60 million in 2021 and \$25 million in borrowing through an interfund loan intended to minimize the extent of cuts needed in 2021 and 2022. Repayment of this interfund loan in 2022-2024 will be facilitated by reduced spending in those years.

General principles underlying our approach to the proposed budget are:

- Maintaining essential services (as defined in the Continuity of Operations Plan), safety requirements and basic maintenance and restoration of transportation infrastructure (including the West Seattle High Bridge)

Seattle Department of Transportation

- Minimizing direct impacts to underserved communities and engaging in an equity-centered recovery process - reexamine our work and how we engage communities in accomplishing our work
- Preserving City personnel to maintain ability to respond to COVID-19 recovery, return-to-work ramp up activities, West Seattle Bridge support/mitigation, and other emerging issues
- Maintaining funding and flexibility within larger transportation and mobility focused programs and opt instead to postpone discrete capital projects and remain responsive to Federal and State funding opportunities

The proposed budget continues support for investments that enhance safe environments for walking, biking, riding transit, driving, and moving freight based on geographic equity and community need. All budget investments are intended to further integrate SDOT's master plans and continue to implement a comprehensive Move Seattle strategy that maintains and expands the City's transportation infrastructure. All investments are prioritized based on safety, need, regulatory requirements and policies established by the City.

Although the financial challenges and uncertainty made decisions difficult, the actions we have taken in 2020 and propose to take in 2021 will prevent making deeper cuts in the future.

Some highlights of the 2021 Proposed Budget are:

1. **Move Seattle Levy:** Move Seattle Levy: The 2021 Proposed Budget continues to support the Move Seattle Levy plan by including capital project staffing support, sidewalk and ADA improvements, bridge rehabilitation, and school zone safety enhancements. Construction funding for significant capital projects include Madison BRT, continuing Northgate Bridge, AAC 15th Ave NE and Vision Zero 12th Ave S are notable. Despite project and program pauses and reductions in the 2020 budget rebalance, cash flow needs require short-term borrowing to meet spending plans. A placeholder for \$50 million in borrowing that was assumed in the 2020 adopted budget has been reduced to \$20 million in 2021. In addition, due to the COVID-19 emergency and ensuing General Fund shortfall, the Move Seattle General Fund floor cannot be met in 2021.

The table below summarizes the Move Seattle Levy capital and operations investments, by category, in the proposed budget.

Move Seattle Category	2021 All Funds	2022 All Funds	2023 All Funds	2024 All Funds
Safe Routes	\$52,949,618	\$44,059,378	\$46,284,318	\$36,507,734
Maintenance and Repair	\$48,212,862	\$37,104,529	\$43,534,714	\$58,016,134
Congestion Relief	\$153,887,082	\$92,577,635	\$73,410,870	\$38,634,758
Total	\$255,049,562	\$173,741,542	\$163,229,902	\$133,158,626

The Mayor is committed to receiving public input on the difficult budget choices in transportation programs and projects, including pauses and reductions. While the timing of rebalancing 2020 and incorporating public input in developing the 2021 budgets does not align with the 2021 proposed budget submission schedule, the Mayor is seeking this input through the Move Seattle Levy assessment process. This assessment process is happening concurrent with budget review this fall, with plans to present a draft assessment in December to the Move Seattle Levy Oversight Committee. Note that public input may alter the list of projects proposed as paused in the Mayor's proposed budget, however the size of the revenue reductions will make it difficult to provide alternatives to some of the project pause proposals.

Seattle Department of Transportation

2. **STBD:** In November 2014, voters approved Seattle Transportation Benefit District (STBD) Proposition 1 which provides a \$60 vehicle license fee and 0.1% sales tax in support of enhanced transit service in Seattle purchased from King County Metro, along with ORCA Opportunity and low income transit access programs, transit capital investments and low income VLF rebates. This measure expires on December 31, 2020. The proposed budget invests remaining STBD funds on reduced Metro transit service and removes the associated budget from SDOT's baseline operating budget.
3. **West Seattle Bridge:** The proposed budget includes debt service for \$100 million in bond funding of activities including bridge monitoring and testing, emergency stabilization repairs, planning and design costs for repair or replacements, Low Bridge monitoring and maintenance, and traffic and travel mitigation projects including Reconnect West Seattle projects.
4. **Transfer Parking Enforcement** from the Seattle Police Department to SDOT, totaling \$15,013,173 and 123.00 FTE. The unit is being transferred because its core functions - the management of street parking and the right-of-way, and the enforcement thereof - is more appropriately situated in SDOT.
5. **Sound Transit 3 (ST3)** Investments in ST3 continue to be a priority for the City, and the proposed budget includes reimbursable funding of SDOT's work on behalf of Sound Transit. The work includes planning, designing, and constructing capital improvements to RapidRide C and D Lines.

Transportation Revenues

The 2021 Proposed Budget relies on several funding sources to support transportation needs—sources include: federal, state and local grants; bonds; Move Seattle property tax levy; commercial parking tax; vehicle license fees; fees for service; Real Estate Excise Taxes; street vacation fees; gas tax; multimodal funds; property sale proceeds; school zone camera fines; sales tax; and an annual allocation from the City's General Fund.

In 2020 transportation-specific revenues are expected to decline by about \$33.5M or 5.2%. This is in addition to the \$13.3 million loss of General Fund support, so the total revenue reduction is about 7% of all department revenues. In 2021 expected transportation specific revenue loss over 2020 Adopted projections is \$70.6M and loss in all sources of revenue is \$85.7M.

For 2021, projected commercial parking tax revenue has been adjusted downward to reflect actual and forecasted declines in this revenue stream. These revenues are leveraged to back bond financing of both seawall and waterfront projects and general transportation needs. Investments of Real Estate Excise Tax (REET) supporting SDOT's Capital Improvement Program (CIP) will be focused on funding the West Seattle Bridge through debt service payments, which will limit future investment in other city projects long-term.

Additionally, for 2021, any revenue collected from the new taxes on Transportation Network Companies (TNCs) established in 2020 that would have been split between housing and transportation purposes will instead be dedicated to support transportation projects, after implementation costs and the Dispute Resolution Center has been fully funded.

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$5,267,111

This technical change adds budget to support central city costs including increases to healthcare, retirement, information technology, fleet and central finance costs.

Central Cost Manual Account Reconciliation

Expenditures \$457,002

This baseline item makes several technical adjustments to bring the 2021 baseline in line with the Central Cost Manual. The fund source for the appropriation increase is the Transportation Fund.

Baseline Adjustments for Personnel Costs

Expenditures \$(1,110,201)

This item reflects the removal of a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Seattle Department of Transportation

Adjustment for One-Time Budget Changes

Expenditures	\$(11,978,577)
Revenues	\$(58,474,891)

This baseline change modifies SDOT's budget to remove one-time budget changes included in the 2020 Adopted Budget.

Baseline Revenue

Revenues	\$(107,890,192)
----------	-----------------

This baseline change adjusts revenue projections, makes technical adjustments, and sets SDOT's baseline revenue assumptions that align SDOT Revenues with August forecast amounts provided by the City Budget Office and SDOT's Finance & Administration Division.

Baseline Transfer

Expenditures	-
--------------	---

This baseline change completes several net-zero budget transfers. The transfers include: 1) completing a budget transfer that splits Capital Projects and Roadway Structures into two divisions, moving overhead costs to the correct budget; 2) transferring budget for a 2020 change wherein the Strategy and Performance group was moved to the Asset and Performance Management group, and; 3) moving ongoing budget for the Roadway Structures Engineering team to the correct location.

Debt Service Adjustment

Expenditures	\$1,843,421
--------------	-------------

This technical change updates the expected costs associated with debt service from past bond issuances to support project work. This also includes a transfer of debt service support from State Gas Tax revenues to Seattle Commercial Parking Tax revenues.

STBD Proposition 1

Expenditures	\$(66,851,338)
--------------	----------------

In November 2014, voters approved Seattle Transportation Benefit District (STBD) Proposition 1 which provides a \$60 vehicle license fee (VLF) and 0.1% sales tax to purchase enhanced transit service from King County Metro, support low income transit access programs, and provide low income VLF rebates. Following Council passage of material change legislation in 2018, STBD also funds the ORCA Opportunity program and limited transit capital investments. This measure expires on December 31, 2020. This change removes the associated budget from SDOT's baseline operating budget. This reduction is from the STBD Fund.

Proposed Operating

Move Seattle Levy Debt Service

Expenditures	\$170,000
--------------	-----------

This item adds budget to support debt issuance costs associated with the 2021 bond issuance to support Move Seattle Levy spending in 2021.

Seattle Department of Transportation

Program Reductions

Expenditures	\$(1,483,754)
Position Allocation	(1.00)

This change reflects programmatic reductions across numerous SDOT operational budgets. Changes include: 1) Street Use reductions for direct purchases, equipment and supplies, training and travel, and contracted services commensurate with revenue reductions; 2) non-labor reductions in Street Vacation, Waterways, and Vending Enforcement programs commensurate with revenue reductions; 3) reductions to staffing in landscape cleaning services and street cleaning, and; 4) reductions to staffing in regional and state planning activities serving SDOT's capital project portfolio. These reductions may result in reduced service in these programs and projects. The change also reduces 1.0 FTE Office Aide in Operations Support.

Add Transportation Network Tax Funds to Transportation Equity

Expenditures	\$63,022
--------------	----------

This item will support the continued work of the Transportation Equity program using Transportation Network Company Tax (TNC). Note that these funds cannot be spent until the City has collected enough revenue to: 1) fund fixed costs for TNC tax implementation and administration in Finance and Administrative Services and Office of Labor Standards; 2) pay back interfund loans for 2020 expenditures, and; 3) fund the Dispute Resolution Center (DRC).

Seattle Wayfinding Maps

Expenditures	\$50,000
--------------	----------

This change increases budget for expansion of pedestrian wayfinding maps and kiosks, supported in part by partnerships with developers and other large projects that impact right-of-way. Historically, this program was only funded by partnerships with developers. This expansion will also help SDOT better serve race and social justice goals by allowing SDOT to initiate projects in areas of Seattle that have historically not seen significant investment by developers (i.e. South Seattle).

Transfer Parking Enforcement from the Seattle Police Department

Expenditures	\$15,013,173
Position Allocation	123.00

This item transfers the Parking Enforcement Office from the Seattle Police Department (SPD) to SDOT. The transfer includes all budget and personnel costs associated with the unit, including enforcement FTEs, support staff and overhead costs. The unit is being transferred because its core functions - the management of street parking and the right-of-way, and the enforcement thereof - is more appropriately situated in SDOT.

Parking Enforcement Special Event Overtime

Expenditures	\$803,000
--------------	-----------

This item transfers overtime funding from the Seattle Police Department (SPD) to SDOT for special events staffed by Parking Enforcement Officers. SPD, SDOT and the Special Events Office will work together to develop a Memo of Understanding (MOU) on special events policy and appropriate funding levels that is consistent with the Executive Order on Community Safety.

Leadership and Administration Reductions

Seattle Department of Transportation

Expenditures	\$(5,214,893)
Position Allocation	(2.00)

This item includes funding-only reductions for 25 FTEs and 4.5 FTE temporary positions across numerous functions in 2021, and includes direct project reductions to travel, training and supply budgets. This reduction is necessary to address revenue shortfalls and other financial challenges facing SDOT in 2021. The change also includes 2.0 FTE Management System Analyst Assistant reductions to position authority.

Transportation Operations Reductions

Expenditures	\$(2,032,221)
--------------	---------------

This item reduces expenditures across multiple programs in the Transportation Operations Division. Reductions include: 1) fewer transportation studies and dedicated coordination on Special Events planning; 2) less supplementary traffic control plan contractor reviews; 3) less staff support for traffic data and records; 4) less commercial vehicle enforcement labor support; 5) less collision report evaluation, which will be absorbed as part of existing division work; 6) less staff support for the Your Voice, Your Choice neighborhood capital program, and; 7) less planning and support for small scale "spot" capital improvements.

Transit and Mobility Reductions

Expenditures	\$(3,569,633)
--------------	---------------

This item reduces program budget in the Transit and Mobility Division. Reductions include: 1) public education programming for the Pay-by-Phone program for parking fees; 2) Bike Share, Carshare, and Carpool program support in line with reduced revenue collection in these programs; 3) reducing the number of parking pay stations from 1,500 to 1,000 citywide; 4) labor support for Corridor Project Development program; 5) labor support for Transit Service and Strategy Development program, and; 6) credit card processing fee budgets for parking paid by credit card transactions, in line with reduced parking usage.

Streetcar Operations Reduction

Expenditures	\$(700,000)
--------------	-------------

This change reduces streetcar service by 10% compared to January 2020 service levels. This reduction reduces the frequency of service on both the South Lake Union and First Hill streetcars, reduces the number of train cars, and changes the hours of streetcar operations. This is a reduction to the Seattle Streetcar Operations Fund.

Seattle Transportation Benefit District O&M Appropriation adjustment

Expenditures	\$7,343,447
Position Allocation	-

This item appropriates anticipated fund balance from the November 2014 STBD Proposition One ballot measure to pay for ramp-down of transit service and other associated costs. This item also extends the sunset date for one Strategic Advisor 2 position from December 31, 2020 to December 31, 2021. This item does not include any appropriations related to the November 2020 ballot measure.

Proposed Capital

Marion Street Bridge WSDOT Construction

Expenditures	\$500,000
--------------	-----------

Seattle Department of Transportation

This change increases the funding of the Alaskan Way Main Corridor project and reflects higher construction costs for the Marion Street Pedestrian Bridge replacement over Alaskan Way. The City and State are in the process of negotiating the final Task Order to fund this construction and it is expected to be executed prior to the end of 2020. Funds for this scope of work will be provided to the City by the state Department of Transportation.

Waterfront Funding Plan Adjustments

Expenditures	\$(82,649,000)
--------------	----------------

This item amends the funding plan for the Central Waterfront CIP projects; MC-TR-C072 (Alaskan Way Main Corridor) and MC-TR-C073 (Overlook Walk and East-West Connections). Due to COVID-19, resolution of appeals as part of the Waterfront LID process has been delayed, and other sources of revenue have also seen changes. Despite these changes, the Waterfront program is expected to continue toward make progress to completion in 2024.

Waterfront Transportation Infrastructure Maintenance

Expenditures	\$100,000
--------------	-----------

This item creates the Waterfront Transportation Infrastructure Maintenance program in SDOT's CIP. This program will maintain and keep in a state of good repair new, improved and reconstructed transportation infrastructure being built as part of the Waterfront Seattle program. This infrastructure includes transportation assets such as pavement, sidewalks, ADA ramps, signs, signals, markings and landscapes that will need on-going maintenance to remain safe and in a state of good repair. New or rehabilitated transportation facilities covered will include the new Alaskan Way/Elliott Way, Pine Street Connector, several pedestrian bridges, east-west streets and the Overlook Walk. The funding source is Commercial Parking Tax.

Add Transportation Network Tax Funds to Capital Projects

Expenditures	\$1,200,000
--------------	-------------

This item restores partial funding to projects originally proposed for reduction using Transportation Network Company Tax (TNC) funds for the following capital projects: 1) West Marginal Way improvements associated with the West Seattle Bridge Immediate Response CIP project; 2) Freight Spot Improvement Program, 3) Bike Master Plan Protected Bike Lanes projects, and; 4) Vision Zero pedestrian improvement projects. Note that these funds will not be spent until the City has collected enough revenue to: 1) fund fixed costs for TNC tax implementation and administration in Finance and Administrative Services and Office of Labor Standards; 2) pay back interfund loans for 2020 expenditures, and; 3) fund the Dispute Resolution Center (DRC).

C/D Line Transit Improvements

Expenditures	\$6,000,000
Revenues	\$6,000,000

This change supports SDOT's work on behalf of Sound Transit, with all expenses to be reimbursed by Sound Transit. Improvements are funded by Sound Transit as part of the 2016 ST3 initiative, which included commitments for transit investments to West Seattle and Ballard in advance of Link light rail expansion. This project will deliver additional transit spot improvements aimed at improving travel time and reliability along RapidRide C&D lines, in preparation for Light Rail extensions into the West Seattle and Ballard neighborhoods. These projects make changes to SDOT-owned infrastructure, including streets and signals, and will result in adjustments to signal and street operations.

Rt 48 Re-Appropriation

Seattle Department of Transportation

Expenditures	\$300,000
Revenues	-

This change budgets unused funds remaining from a previous project (Route 48 Electrification, to be completed by King County Metro) to continue progress on the last of the seven Transit-Plus Multimodal Corridor (TPMC) projects. This funding will support future federal grant requirements for this project.

Capital Project Reductions and Reallocations

Expenditures	\$(2,635,528)
--------------	---------------

This change reduces a selection of Capital Projects: 1) The 23rd Avenue Corridor Phase 3 Vision Zero project will be removed from the 2021-2022 capital improvement program and deferred until at least 2023, with impacts to the 2021; 2) reduces activities on the WSDOT/SDOT joint State Route 520 project, including reductions to the City-requested design changes, construction coordination, and localized traffic impact improvements in 2022; 3) reduces 2022 funding for the Center City Connector (C3) project consistent with 2020 budget rebalancing, pausing the project until new revenues can be identified; 4) reduces expected spending on the Graham Street Station project in 2024, pushing planning budgets to future years in line with Sound Transit planning horizons for this project, and; 5) reallocates remaining budget from the Fauntleroy SW Boulevard project that was reduced in 2020 to support continued investments in Arterial Asphalt and Concrete and Protected Bike Lane projects. Please see the 2021-2026 Proposed CIP for all changes beyond 2021.

Delayed Capital Projects

Expenditures	\$(26,761,002)
--------------	----------------

This item reflects delays to projects that held unsecured funding originally expected to be identified as part of the 2021-2022 Proposed Budget: 1) Delay funding on the Northlake Retaining Wall project to 2022; 3) delay funding on Pedestrian Master Plan Crossing Improvement projects to 2022; 4) delay funding (including unidentified grants) on the Georgetown to South Park Trail project to 2023; 5) delay funding (including unidentified grants) on the Heavy Haul Network project work until 2024, and; 6) delay crossing improvements on West Marginal Way to 2023 (partially restored with TNC tax).

Select Move Seattle Program Reductions

Expenditures	\$(7,058,091)
--------------	---------------

This change reflects reductions across many Move Seattle Levy-funded projects, primarily resulting from loss of non-levy resources in SDOT including: Safe Routes To School projects, Pedestrian Master Plan Crossing Improvements, Bicycle Master Plan protected bike lanes, neighborhood greenway projects, neighborhood large projects, neighborhood traffic control projects, and components of the Burke-Gilman Trail project. Please see individual project pages in the 2021-2026 Proposed CIP for funding detail for these projects and programs. Some of these programs have been funded through other funding sources (like Transportation Network Tax) in other changes in this budget.

Transit Capital Reductions

Expenditures	\$(2,749,112)
--------------	---------------

This change reduces the capital appropriation for several Transit Capital projects as follows: 1) Transit Spot Improvement Program: Reductions will delay improvements planned for Lake City Way @ NE 125th Street and Gilman Avenue in 2021 and reduce further investments for spot improvements in 2022; 2) Route 7 Transit-Plus Multimodal Corridor (TPMC) project: Levy reductions in 2022 will reduce the amount of elements in scope of work

Seattle Department of Transportation

for Route 7 improvements; 3) Route 40 TPMC: Levy reductions will result in a re-scoping of project elements at 30% design milestone; 4) Bus Rapid Transit Concept Design: Levy reductions will result in less planning and support efforts toward the TPMC program; 5) Sound Transit 3: This action reduces funding for technical support and EIS review for the Sound Transit 3 West Seattle Ballard Link Extension (WSBLE).

Maintenance and Operations Reductions CIP

Expenditures \$(37,826,917)

This change reflects reductions/delays to maintenance and operations activities in SDOT's Capital Improvement Program. The change includes: 1) reducing Arterial Asphalt and Concrete improvement projects associated with the Route 44 Rapid Ride project and various Ballard pavement projects on Leary Way NW, 15th Ave NW, Ballard Bridge, and non-arterial street resurfacing/restoration projects; 2) postponing project development for various Bike Master Plan, Vision Zero, Safe Routes to School, Neighborhood Traffic Control, Broadview, and Greenway Program projects with a one-time reduction in 2021 until future funding can be secured; 3) reducing budget in the Roadway Structures division that will delay seismic retrofit planning on non-critical bridges, and; 4) reducing various capital Transportation Operations activities including reducing funding for dynamic message signs, adaptive signal control, signal maintenance and new signal installations, and small improvement "spot" improvements for freight in 2021.

Street Use and REET II Capital Reductions

Expenditures \$(778,895)

This item reduces funding for the Accela permitting system development by \$800,000 in 2021; the funding source is Street Use fees. This item also reduces funding for the Hazard Mitigation Landslide Program by \$1 million; the funding source is REET II. This reduction will affect SDOT's ability to respond to small landslides and make minor repairs. Finally, this change reduces spending in the Shoreline Street Ends CIP by \$300,000 in 2021. This reduction will come from non-labor savings and delay of Shoreline Street End improvement projects. The funding source is permit fees in the Transportation Fund.

Additional Real Estate Excise Tax (REET) Reductions

Expenditures \$(1,000,000)

This item reduces the department's allocation of Real Estate Excise Tax, decreasing overall planned maintenance support for transportation infrastructure like sidewalks in 2024 and 2025, and reducing support for the Your Voice, Your Choice program in 2021.

Grant and Revenue Identification Changes

Expenditures \$6,871,409

This item trues up grant funding by removing unsecured funding amounts and allocating budget to projects where revenues have been identified to support continuation of that project work.

Proposed Technical

Leadership and Administration Indirect Cost Alignment

Expenditures \$602,268

This technical adjustment aligns SDOT's indirect cost allocation with anticipated expenditure and recovery projections.

Seattle Department of Transportation

Funding Source Transfers

Expenditures -

This technical change reallocates budget in projects impacted by the COVID19 emergency, economic conditions, and revenue shortfalls, to allow reprogramming of resources to maintain core service levels in operating and capital projects in 2021.

Debt Service Adjustments

Expenditures \$1,977,522

This technical change updates the expected costs associated with debt service from past bond issuances to support project work and establishes debt service costs for bonds issued for the West Seattle Bridge Immediate Response capital project. This also includes a transfer of debt service support from State Gasoline Tax revenues to Seattle Commercial Parking Tax revenues.

Streetcar Adjustments

Expenditures \$612,128

Revenues \$(3,671,492)

This action makes a technical adjustment to SDOT's 2021-2022 Baseline Budget for the projected operating expenses of the South Lake Union and First Hill streetcars. The adjustment is based on current cost and operating revenue assumptions.

SDOT CIP Adjustment

Expenditures \$(8,350,037)

This technical change transfers budgets within capital projects to align budget accounts with expected spending.

SDOT "Out Year" Base CIP Adjustment

Expenditures \$26,000,000

This technical change aligns budget changes made during the 2020 fiscal year to correctly reflect them as part of the 2021-2026 Proposed Capital Improvement Program.

Q2 2020 Ongoing Item Reconciliation

Position Allocation 1.00

This item implements the following change in the 2021 Proposed Budget that was approved as part of the Second Quarter 2020 Supplemental Budget Ordinance: This change moves 1.0 FTE from the Office of Intergovernmental Relations (OIR) to the Seattle Department of Transportation. This position is an ongoing permanent position and will be funded primarily through multiple capital projects.

SDOT O&M Adjustment

Expenditures \$4,701,236

This technical change adjusts operating budgets for various cost changes and budget transfers related to contract inflation, workgroup reorganizations, adjusted wage increases, and central cost adjustments.

Seattle Department of Transportation

SDOT Reimbursable Adjustment

Expenditures	\$(2,412,244)
Revenues	\$(2,412,244)

This technical change identifies revenues and budget changes associated with work that is fully reimbursed by grants, partnerships, and other city departments.

SDOT Street Use Adjustment

Expenditures	\$5,523,971
--------------	-------------

This technical adjustment aligns the budget with anticipated expenditures in SDOT's Street Use program, which is funded by permit issuance, hourly service fees, use, occupancy and modification fees. Since the 2020 Street Use Technical Adjustment was a one-time change, this technical adjustment is based on the 2019 appropriation plus two years of inflation. The fund source is street use fees within SDOT's Transportation Fund.

Programming REET II and Move Seattle Levy

Expenditures	\$2,500,000
--------------	-------------

This item reconciles SDOT's citywide Real Estate Excise Tax and Move Seattle Levy project allocations against departmental and citywide targets.

SDOT Revenue Balancing Entry

Revenues	\$(4,555,829)
----------	---------------

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Seattle Department of Transportation

Appropriations by Budget Summary Level and Program

SDOT - BC-TR-16000 - Central Waterfront

The purpose of the Central Waterfront Budget Summary Level is to design, manage, and construct improvements to the transportation infrastructure and public spaces along the Central Waterfront.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Central Waterfront	-	139,628,075	68,650,059
Total	-	139,628,075	68,650,059

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BC-TR-19001 - Major Maintenance/Replacement

The purpose of the Major Maintenance/Replacement Budget Summary Level is to provide maintenance and replacement of roads, trails, bike paths, bridges and structures.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Bridges & Structures	23,022,477	38,795,436	47,059,735
Landslide Mitigation	369,671	475,349	282,212
Roads	52,127,067	61,154,175	27,026,344
Sidewalk Maintenance	6,194,151	3,807,479	3,063,723
Signs, Signals and Markings	1,482,013	1,657,420	1,435,737
Trails and Bike Paths	1,620,914	1,236,594	1,067,125
Urban Forestry	309,342	-	-
Urban Forestry	-	-	8,937
Urban Forestry	-	8,936	-
Total	85,125,636	107,135,389	79,943,813
Full-time Equivalents Total*	98.25	98.25	98.25

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Major Maintenance/Replacement Budget Summary Level:

Bridges & Structures

Seattle Department of Transportation

The purpose of Bridges and Structures Program is to provide for safe and efficient use of the city's bridges and structures to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Bridges & Structures	23,022,477	38,795,436	47,059,735
Full Time Equivalents Total	13.75	13.75	13.75

Landslide Mitigation

The purpose of the Landslide Mitigation Program is to proactively identify and address potential areas of landslide concerns that affect the right-of-way.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Landslide Mitigation	369,671	475,349	282,212
Full Time Equivalents Total	2.00	2.00	2.00

Roads

The purpose of the Roads program is to provide for the safe and efficient use of the city's roadways to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Roads	52,127,067	61,154,175	27,026,344
Full Time Equivalents Total	47.00	47.00	47.00

Sidewalk Maintenance

The purpose of Sidewalk Maintenance Program is to maintain and provide for safe and efficient use of the city's sidewalks to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Sidewalk Maintenance	6,194,151	3,807,479	3,063,723
Full Time Equivalents Total	6.00	6.00	6.00

Signs, Signals and Markings

The purpose of Signs, Signals and Markings Program is to design, plan and maintain the city's signs, signals, and street, sidewalk markings

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed

Seattle Department of Transportation

Signs, Signals and Markings	1,482,013	1,657,420	1,435,737
-----------------------------	-----------	-----------	-----------

Trails and Bike Paths

The purpose of Trails and Bike Paths Program is to maintain and provide for safe and efficient use of the city's trails and bike paths to all residents of Seattle and adjacent regions to ensure movement of people, goods and services throughout the city.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Trails and Bike Paths	1,620,914	1,236,594	1,067,125
Full Time Equivalents Total	27.75	27.75	27.75

Urban Forestry

The purpose of the Landscape & Tree Maintenance Program is to provide planning, design, construction and construction inspection services for landscape elements of transportation capital projects, as well as guidance to developers on the preservation of city street trees and landscaped sites during construction.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Urban Forestry	309,342	8,936	8,937
Full Time Equivalents Total	1.75	1.75	1.75

SDOT - BC-TR-19002 - Major Projects

The purpose of the Major Projects Budget Summary Level is to design, manage and construct improvements to the transportation infrastructure for the benefit of the traveling public including freight, transit, other public agencies, pedestrians, bicyclists and motorists.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Alaskan Way Viaduct	27,598,464	-	-
First Hill Streetcar	6,339	-	-
Mercer Corridor	386	-	-
Mercer West	304,967	-	-
SR-520	1,113,690	109,328	805,931
Total	29,023,846	109,328	805,931
Full-time Equivalents Total*	24.50	24.50	24.50

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Major Projects Budget Summary Level:

Seattle Department of Transportation

Alaskan Way Viaduct

The purpose of the Alaskan Way Viaduct and Seawall Replacement Program is to fund the City's involvement in the replacement of the seismically-vulnerable viaduct and seawall. The Alaskan Way Viaduct is part of State Route 99, which carries one-quarter of the north-south traffic through downtown Seattle and is a major truck route serving the city's industrial areas

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Alaskan Way Viaduct	27,598,464	-	-
Full Time Equivalents Total	23.00	23.00	23.00

First Hill Streetcar

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
First Hill Streetcar	6,339	-	-

Mercer Corridor

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Mercer Corridor	386	-	-

Mercer West

The purpose of the Mercer West Program is to use existing street capacity along the west portion of Mercer Street more efficiently and enhance all modes of travel, including pedestrian mobility, and provide an east/west connection between I-5, State Route 99, and Elliott Ave W.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Mercer West	304,967	-	-

SR-520

The purpose of the SR-520 Program is to provide policy, planning and technical analysis support and to act as the City's representative in a multi-agency group working on the replacement of the State Route 520 bridge.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
SR-520	1,113,690	109,328	805,931
Full Time Equivalents Total	1.50	1.50	1.50

Seattle Department of Transportation

SDOT - BC-TR-19003 - Mobility-Capital

The purpose of the Mobility-Capital Budget Summary Level is to help maximize the movement of traffic throughout the city by enhancing all modes of transportation including corridor and intersection improvements, transit and HOV improvements, and sidewalk and pedestrian facilities.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Corridor & Intersection Imprv	25,994,501	40,668,696	32,986,274
Freight Mobility	30,406,559	38,752,769	18,110,133
Intelligent Transp System	4,257,520	3,259,933	7,515,393
Neighborhood Enhancements	7,191,672	9,415,342	7,991,922
New Trails and Bike Paths	19,881,820	32,994,949	10,647,527
Sidewalks & Ped Facilities	28,346,746	36,641,122	31,175,687
Transit & HOV	14,548,277	48,824,755	86,152,354
Total	130,627,095	210,557,566	194,579,289
Full-time Equivalents Total*	134.50	138.50	138.50

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Mobility-Capital Budget Summary Level:

Corridor & Intersection Imprv

The purpose of the Corridor & Intersection Improvements Program is to analyze and make improvements to corridors and intersections to move traffic more efficiently. Examples of projects include signal timing, left turn signals and street improvements.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Corridor & Intersection Imprv	25,994,501	40,668,696	32,986,274
Full Time Equivalents Total	37.50	38.50	38.50

Freight Mobility

The purpose of the Freight Mobility Program is to help move freight throughout the city in a safe and efficient manner.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Freight Mobility	30,406,559	38,752,769	18,110,133
Full Time Equivalents Total	4.50	4.50	4.50

Seattle Department of Transportation

Intelligent Transp System

The purpose of the Intelligent Transportation System (ITS) Program is to fund projects identified in the City's ITS Strategic Plan and ITS Master Plan. Examples of projects include implementation of transit signal priority strategies; installation of closed-circuit television (CCTV) cameras to monitor traffic in key corridors; and development of parking guidance, traveler information and real-time traffic control systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Intelligent Transp System	4,257,520	3,259,933	7,515,393
Full Time Equivalents Total	9.25	9.25	9.25

Neighborhood Enhancements

The purpose of the Neighborhood Enhancements Program is to plan and forecast the needs of specific neighborhoods including neighborhood and corridor planning, development of the coordinated transportation plans, traffic control spot improvements and travel forecasting. The program also constructs minor improvements in neighborhoods based on these assessments.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Neighborhood Enhancements	7,191,672	9,415,342	7,991,922
Full Time Equivalents Total	19.75	19.75	19.75

New Trails and Bike Paths

The purpose of the New Trails and Bike Paths Program is to construct new trails and bike paths that connect with existing facilities to let users transverse the city on a dedicated network of trails and paths.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
New Trails and Bike Paths	19,881,820	32,994,949	10,647,527
Full Time Equivalents Total	-	1.00	1.00

Sidewalks & Ped Facilities

The purpose of the Sidewalks & Pedestrian Facilities Program is to install new facilities that help pedestrians move safely along the city's sidewalks by installing or replacing sidewalks, modifying existing sidewalks for elderly and handicapped accessibility, and increasing pedestrian lighting.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Sidewalks & Ped Facilities	28,346,746	36,641,122	31,175,687
Full Time Equivalents Total	50.50	52.50	52.50

Transit & HOV

Seattle Department of Transportation

The purpose of the Transit & HOV Program is to move more people in less time throughout the city.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Transit & HOV	14,548,277	48,824,755	86,152,354
Full Time Equivalents Total	13.00	13.00	13.00

SDOT - BO-TR-12001 - South Lake Union Streetcar Operations

The purpose of the South Lake Union Streetcar Operations Budget Summary Level is to operate and maintain the South Lake Union Seattle Streetcar.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
S Lake Union Streetcar Ops	5,022,377	4,356,843	4,224,358
Total	5,022,377	4,356,843	4,224,358

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BO-TR-12002 - First Hill Streetcar Operations

The purpose of the First Hill Streetcar Operations Budget Summary Level is to operate and maintain the First Hill Seattle Streetcar.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
First Hill Streetcar Ops	13,147,245	9,420,748	9,466,145
Total	13,147,245	9,420,748	9,466,145

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BO-TR-16000 - Waterfront and Civic Projects

The purpose of the Waterfront and Civic Projects Summary Level is to pay for expenses related to reimbursable design and construction services provided by the Central Waterfront program for other City departments and external partners. Additionally, the BSL provides planning and leadership support for other Civic Projects.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
Waterfront and Civic Projects	-	(1)	30,612,193

Seattle Department of Transportation

Total	-	(1)	30,612,193
--------------	---	-----	------------

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

SDOT - BO-TR-17001 - Bridges & Structures

The purpose of the Bridges and Structures Budget Summary Level is to maintain the City's bridges and structures which helps provide for the safe and efficient movement of people, goods, and services throughout the City. Additionally, the BSL provides general construction management, engineering support for street vacations, scoping of neighborhood projects, and other transportation activities requiring engineering oversight.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Bridge Operations	3,757,936	3,902,269	3,923,867
Engineering & Ops Support	15,513,240	2,285,329	1,589,400
Structures Engineering	1,090,555	1,008,015	1,356,154
Structures Maintenance	6,110,525	7,743,404	7,515,991
Total	26,472,255	14,939,017	14,385,412
Full-time Equivalents Total*	56.00	57.00	57.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Bridges & Structures Budget Summary Level:

Bridge Operations

The purpose of Bridge Operations is to ensure the safe and efficient operations and preventive maintenance for over 180 bridges throughout the city.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Bridge Operations	3,757,936	3,902,269	3,923,867
Full Time Equivalents Total	17.50	17.50	17.50

Engineering & Ops Support

The purpose of the Engineering Ops & Support program is to provide engineering support services to other SDOT projects, perform engineering related to bridges and structures, and manage stormwater pollution control.

Expenditures/FTE	2019	2020	2021
-------------------------	-------------	-------------	-------------

Seattle Department of Transportation

	Actuals	Adopted	Proposed
Engineering & Ops Support	15,513,240	2,285,329	1,589,400
Full Time Equivalents Total	3.00	3.00	3.00

Structures Engineering

The purpose of the Structures Engineering Program is to provide engineering services on all the bridges and structures within the city to ensure the safety of transportation users as they use or move in proximity to these transportation facilities.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Structures Engineering	1,090,555	1,008,015	1,356,154
Full Time Equivalents Total	3.50	3.50	3.50

Structures Maintenance

The purpose of the Structures Maintenance Program is to provide for the maintenance of the city's bridges, roadside structures and stairways.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Structures Maintenance	6,110,525	7,743,404	7,515,991
Full Time Equivalents Total	32.00	33.00	33.00

SDOT - BO-TR-17003 - Mobility Operations

The purpose of the Mobility-Operations Budget Summary Level is to promote the safe and efficient operation of all transportation modes in the city. This includes managing the parking, pedestrian, and bicycle infrastructure; implementing neighborhood plans; encouraging alternative modes of transportation; and maintaining and improving signals and the non-electrical transportation management infrastructure.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Commuter Mobility	27,614,996	17,875,325	13,763,142
Neighborhoods	1,233,488	1,153,967	1,041,261
Parking & Curbspace	12,685,712	14,767,719	12,900,993
Signs & Markings	3,663,121	4,191,653	4,232,251
Traffic Signals	10,066,842	9,487,442	9,889,766
Transit Operations	59,166,887	66,851,338	-
Transit Operations	-	-	7,343,447
Urban Planning	3,655,894	3,393,950	2,879,501
Total	118,086,939	117,721,394	52,050,361
Full-time Equivalents Total*	134.75	141.75	141.75

Seattle Department of Transportation

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Mobility Operations Budget Summary Level:

Commuter Mobility

The purpose of the Commuter Mobility Program is to provide a variety of services, including enforcement of City commercial vehicle limits, transit coordination, and planning, to increase mobility and transportation options to the residents of Seattle.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Commuter Mobility	27,614,996	17,875,325	13,763,142
Full Time Equivalents Total	44.25	51.25	51.25

Neighborhoods

The purpose of the Neighborhoods Program is to plan and forecast the needs of specific neighborhoods including neighborhood and corridor planning, development of the coordinated transportation plans, traffic control spot improvements and travel forecasting. The program also constructs minor improvements in neighborhoods based on these assessments.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Neighborhoods	1,233,488	1,153,967	1,041,261
Full Time Equivalents Total	2.50	2.50	2.50

Parking & Curbpace

The purpose of Parking and Curb Ramp Program is to manage the City's parking resources, maintain and operate pay stations and parking meters for on-street parking, manage curbspace, develop and manage the City's carpool program and Residential Parking Zones.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Parking & Curbpace	12,685,712	14,767,719	12,900,993
Full Time Equivalents Total	31.00	31.00	31.00

Signs & Markings

The purpose of the Signs & Markings Program is to design, fabricate and install signage, as well as provide pavement, curb and crosswalk markings to facilitate the safe movement of vehicles, pedestrians and bicyclists throughout the city.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			

Seattle Department of Transportation

Signs & Markings	3,663,121	4,191,653	4,232,251
Full Time Equivalents Total	19.50	19.50	19.50

Traffic Signals

The purpose of the Traffic Signals Program is to operate the Traffic Management Center that monitors traffic movement within the city and to maintain and improve signals and other electrical transportation management infrastructure.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Traffic Signals	10,066,842	9,487,442	9,889,766
Full Time Equivalents Total	24.25	24.25	24.25

Transit Operations

The Purpose of the Transit Operations Program is to purchase Metro Transit service hours on routes with at least 65% of the stops within the city of Seattle and to support regional transit service in conjunction with other cities, transit agencies, and transportation benefit districts who contribute to the cost of providing regional transit service. The program also funds ORCA Opportunity which provides youth ORCA cards for Seattle Public Schools Students, Seattle Promise scholarship students or similar programs. The program also funds and administers a \$20 low-income VLF rebate to qualified individuals and supports access to transit service for low-income riders. The Transit Operations program revenues support the implementation of City-wide improvements to maximize transit operations.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Transit Operations	59,166,887	66,851,338	7,343,447
Full Time Equivalents Total	2.75	2.75	2.75

Urban Planning

The Urban Planning Program is comprised of Adaptive Streets, Citywide & Community Planning, GIS, Urban Design, and the Center City Mobility Plan.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Urban Planning	3,655,894	3,393,950	2,879,501
Full Time Equivalents Total	10.50	10.50	10.50

SDOT - BO-TR-17004 - ROW Management

The purpose of the (Right-of-Way) ROW Management Budget Summary Level is to review projects throughout the city for code compliance for uses of the right-of-way and to provide plan review, utility permit and street use permit issuance, and utility inspection and mapping services.

Program Expenditures	2019	2020	2021
-----------------------------	-------------	-------------	-------------

Seattle Department of Transportation

	Actuals	Adopted	Proposed
St Use Permit & Enforcement	31,749,391	40,114,478	42,995,188
Total	31,749,391	40,114,478	42,995,188
Full-time Equivalents Total*	134.25	139.25	139.25
*FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here			

SDOT - BO-TR-17005 - Maintenance Operations

The purpose of the Maintenance Operations Budget Summary Level is to maintain the City's roadways and sidewalks; maintain, protect and expand the City's urban landscape in the street right-of-way through the maintenance and planting of new trees and landscaping to enhance the environment and aesthetics of the city; and manage and administer street parking rules and regulations in the right-of-way.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Emergency Response	11,697,155	4,840,587	4,704,695
Operations Support	5,566,452	4,956,495	19,934,832
Pavement Management/Repair	15,330,146	14,732,700	15,064,086
Street Cleaning	7,428,828	7,878,769	7,889,820
Tree & Landscape Maintenance	6,236,258	6,313,717	6,367,138
Total	46,258,840	38,722,268	53,960,571
Full-time Equivalents Total*	144.00	144.50	265.50
*FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here			

The following information summarizes the programs in Maintenance Operations Budget Summary Level:

Emergency Response

The purpose of the Emergency Response Program is to respond to safety and mobility issues such as pavement collapses, severe weather, landslides and other emergencies to make the right-of-way safe for moving people and goods. This program proactively addresses landslide hazards to keep the right-of-way open and safe.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Emergency Response	11,697,155	4,840,587	4,704,695
Full Time Equivalents Total	19.00	19.00	19.00

Seattle Department of Transportation

Operations Support

The purpose of the Operations Support Program is to provide essential operating support services necessary for the daily operation of SDOT's equipment and field workers dispatched from three field locations in support of street maintenance activities. These functions include warehousing, bulk material supply and management, tool cleaning and repair, equipment maintenance and repair, project accounting and technical support, and crew supervision.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Operations Support	5,566,452	4,956,495	19,934,832
Full Time Equivalents Total	22.50	22.50	143.50

Pavement Management/Repair

The purpose of the Pavement Management and Repair Program is to assess the condition of asphalt and concrete pavements and establish citywide paving priorities for annual resurfacing, preservation and maintenance of all streets and adjacent areas such as sidewalks and road shoulders by making spot repairs and conducting annual major maintenance paving and rehabilitation.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Pavement Management/Repair	15,330,146	14,732,700	15,064,086
Full Time Equivalents Total	57.25	57.25	57.25

Street Cleaning

The purpose of the Street Cleaning Program is to keep Seattle's streets, improved alleys, stairways and pathways clean, safe and environmentally friendly by conducting sweeping, hand-cleaning, flushing and mowing on a regular schedule.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Street Cleaning	7,428,828	7,878,769	7,889,820
Full Time Equivalents Total	22.50	22.50	22.50

Tree & Landscape Maintenance

The purpose of the Landscape & Tree Maintenance Program is to provide planning, design, construction and construction inspection services for landscape elements of transportation capital projects, as well as guidance to developers on the preservation of city street trees and landscaped sites during construction.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Tree & Landscape Maintenance	6,236,258	6,313,717	6,367,138

Seattle Department of Transportation

Full Time Equivalents Total 22.75 23.25 23.25

SDOT - BO-TR-18001 - Leadership and Administration

The purpose of the Leadership & Administration Budget Summary Level is to provide executive, community, financial, human resource, technology and business support to the Seattle Department of Transportation.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Citywide Indirect Costs	41,665,546	39,733,357	44,965,979
Departmental Indirect Costs	16,632,028	18,968,116	-
Departmental Indirect Costs	-	-	17,400,399
Divisional Indirect Costs	13,421,046	12,147,358	11,743,120
Indirect Cost Recovery Offset	(73,429,383)	(69,265,285)	(73,357,349)
Pooled Benefits and PTO	4,017,609	-	155,892
Total	2,306,846	1,583,546	908,041
Full-time Equivalents Total*	205.25	214.25	214.25

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The Purpose of Citywide Indirect Cost Program is to allocate the City's general service costs to SDOT in a way that benefits the delivery of transportation services to the public.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Citywide Indirect Costs	41,665,546	39,733,357	44,965,979

Departmental Indirect Costs

tbd

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Departmental Indirect Costs	16,632,028	18,968,116	17,400,399
Full Time Equivalents Total	112.00	120.00	120.00

Divisional Indirect Costs

Seattle Department of Transportation

The purpose of the Divisional Indirect Costs Program is to provide division leadership and unique transportation technical expertise to accomplish the division's goals and objectives in support of the department's mission.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Divisional Indirect Costs	13,421,046	12,147,358	11,743,120
Full Time Equivalents Total	93.25	94.25	94.25

Indirect Cost Recovery Offset

Indirect Cost Recovery Offset Program includes Department Management Indirect cost recovery and General Expense Indirect Cost Recovery. This program equitably recovers and allocates departmental and general expense indirect cost from all transportation activities and capital projects to fund departmental management and support services essential for delivery of transportation service to the public.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Indirect Cost Recovery Offset	(73,429,383)	(69,265,285)	(73,357,349)

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Pooled Benefits and PTO	4,017,609	-	155,892

SDOT - BO-TR-18002 - General Expense

The purpose of the General Expense Budget Summary Level is to pay for general business expenses necessary to the overall delivery of transportation services, such as Judgment and Claims contributions and debt service payments.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
Citywide Initiatives	12,430	14,150,000	5,296,014
Debt Service	34,159,607	37,900,450	41,890,893
Judgment & Claims	2,590,087	2,590,087	8,098,973
Total	36,762,124	54,640,537	55,285,880

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in General Expense Budget Summary Level:

Seattle Department of Transportation

Citywide Initiatives

The purpose of the Citywide Initiatives program is to support citywide or multi-departmental system or process improvement initiatives.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Citywide Initiatives	12,430	14,150,000	5,296,014

Debt Service

The purpose of Debt Service Program is to meet principal repayment and interest obligations on debt proceeds that are appropriated in SDOT's Budget

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Debt Service	34,159,607	37,900,450	41,890,893

Judgment & Claims

The purpose of the Judgement & Claims Program is to represent SDOT's annual contribution to the City's centralized self-insurance pool from which court judgements and claims against the city are paid.

	2019 Actuals	2020 Adopted	2021 Proposed
Expenditures/FTE			
Judgment & Claims	2,590,087	2,590,087	8,098,973

Central Waterfront Improvement Program

Marshall Foster, Director

206-684-8413

<http://www.seattle.gov/office-of-the-waterfront-and-civic-projects>

Central Waterfront Improvement Program

The Office of the Waterfront and Civic Projects is responsible for coordinating the City's waterfront improvement efforts, including project management, design, construction, and financial management. Organizationally, it is a unit of the Seattle Department of Transportation (SDOT), although its director reports directly to the Mayor. The Office of the Waterfront and Civic Projects is charged with administering the overall program and ensuring that it is managed efficiently and delivers on the Concept Design and Framework Plan for the Central Waterfront as adopted by the City in Resolution 31399.

The projects that make up the Central Waterfront program are included in SDOT's budget and in the budgets of two other City departments. Although there are multiple funding sources and multiple projects within the waterfront improvement program, the program itself includes all the projects listed below.

Seattle Department of Transportation

- Alaskan Way Main Corridor project (MC-TR-C072)
- Overlook Walk and East/West Connections (MC-TR-C073)

Department of Parks and Recreation

- Parks Central Waterfront Piers Rehabilitation (MC-PR-21007)
- Aquarium Expansion (MC-PR-21006)

Department of Finance and Administrative Services

- Pike Place Market PC-1 North Waterfront Entrance project (complete)
- Local Improvement District Administration

In addition, there are funds budgeted in CIP projects for Seattle Public Utilities (SPU) and Seattle City Light (SCL) for utility relocations related to the Central Waterfront program. The Office of the Waterfront and Civic Projects is leading design and construction activities for these relocations, which in SDOT's budget are combined in a reimbursable project (MO-TR-R043). The Office of Arts and Culture also has funding from the Waterfront program's 1% for Arts contribution.

The Central Waterfront Improvement Fund is a single fund from which multiple departments draw funding resources. The fund tracks the interfund loan and philanthropic funds as well as other revenues. The fund supports certain costs associated with the design and construction of the waterfront improvement program and related costs for City administration, including the Office of the Waterfront and Civic Projects. Appropriations made from the Central Waterfront Improvement Fund are for these purposes.

In 2019, City Council created the Waterfront LID Fund to pay expenses related to the Waterfront Local Improvement District (#6751). Multiple departments will draw on the resource in this fund, which will be supported by an Interfund Loan (repaid by LID Bonds and LID assessments) until the LID bonds are sold in 2021 or 2022.

Office of Sustainability and Environment

Jessica Finn Coven, Director

(206) 684-9261

www.seattle.gov/environment

Department Overview

The Office of Sustainability & Environment (OSE) develops and implements citywide environmental policies and programs that propel Seattle toward a sustainable, equitable, and carbon neutral future. OSE collaborates with a wide range of stakeholders to develop innovative solutions that foster equity, shared prosperity, vibrant communities, and a healthy environment. OSE develops policies and promotes green initiatives through four functional areas:

Citywide Coordination: Coordinates interdepartmental work on priority programs, policies, and outreach to advance the City's goals for a healthy, equitable, and sustainable environment. OSE's coordination work includes a focus on food systems, urban forestry, energy efficiency in City buildings, equity and environment, and environmental performance measurement. OSE is also responsible for administrative coordination of three prominent Boards and Commissions: the Urban Forestry Commission, the Sweetened Beverage Tax Community Advisory Board, and the Environmental Justice Committee.

Innovation & Research: Conducts research and develops the City's next generation of environmental and sustainability policies and programs. OSE's innovation and research includes environmental equity, building energy, food policy, and transportation electrification, including implementing the Equity and Environment Agenda, Building Energy Benchmarking & Tune-Up programs, the Fresh Bucks food access program, and the Drive Clean Seattle initiative.

Climate Change Action Planning, Implementation and Measurement: Coordinates implementation of the Seattle Climate Action Plan to reduce Seattle's greenhouse gas emissions, including goal assessment, action planning, community outreach, and performance measurement. Centers racial equity and climate justice in climate planning and implementation.

Food Justice: Provides direct benefits that increase residents' purchasing power to afford healthy food through Fresh Bucks and Emergency Grocery Vouchers. Centers our residents experiencing food insecurity in our work to grow the local food economy, connecting local farmers, neighborhood grocers, and Seattle residents in need of food assistance.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Office of Sustainability and Environment

Budget Overview

The 2021 Proposed Budget for the Office of Sustainability & Environment (OSE) represents a shift in focus from the 2020 Adopted, in order to meet immediate challenges posed by the COVID-19 pandemic. Due to the ensuing downturn and sharply reduced revenue forecasts for 2021, the proposed budget includes \$482,500 in General Fund reductions to OSE. These savings result from holding positions vacant, reducing administration and overhead, and reducing – though not eliminating – program budgets for Drive Clean Seattle and commercial building Energy Benchmarking and Tune-Ups. The proposed budget continues to fund OSE’s Sweetened Beverage Tax programming at full amounts and continues emergency food access support.

Ongoing initiative support: Major ongoing initiatives include:

- Fresh Bucks
- Equity and Environment Initiative
- Duwamish Valley Program
- Climate Action Initiatives
- Drive Clean Seattle
- Building Energy Efficiency
- Food Policy and Programs

Please see previous years’ budgets for a description of these initiatives. As a result of COVID-19, the Proposed maintains and adjusts the following programs:

Emergency Grocery Vouchers: In March of 2020, in response to the COVID-19 pandemic, OSE launched a program of Emergency Grocery Vouchers, providing families in need up to \$400 per month in the form of vouchers redeemable at Safeway supermarkets. An initial \$5 million appropriation was made using Sweetened Beverage Tax funding. Another \$9.5 million was later appropriated from Seattle’s Federal Coronavirus Relief Fund award, along with \$2 million in private philanthropic donations to the program. The proposed budget includes an additional \$3.4 million to support the continuation of Emergency Grocery Vouchers through the end of March of 2021, consistent with proposed legislation that also adds an additional \$5.6 million in 2020.

Oil Heat Conversion Expansion and Tax: As a result of the COVID-19 pandemic, implementation of the City’s new tax on residential heating oil has been delayed one year to September of 2021. The tax is intended to reduce carbon emissions and will fund programming to help homeowners convert from oil heat to electric heat pumps. (The City estimates that about 18,000 homes rely on oil heating within the city limits.) OSE will partner with Seattle City Light and the Seattle Office of Housing to fully fund conversions for qualified, low-income residents, as well as provide partial incentives to other customers. This program will also support a training program for businesses that may be impacted by the tax.

Municipal Energy Efficiency Project: OSE will continue to coordinate and provide technical assistance for the Municipal Energy Efficiency Project (MEEP), a capital project spanning multiple departments that makes energy efficiency improvements to City-owned facilities. In 2021, this programming will be supported by \$2.5 million in Real Estate Excise Tax (REET) revenues. This budget sits in the relevant departments’ capital budgets. For more detail about this project, please see the Municipal Energy Efficiency Project located in the Department of Finance and Administrative Services’ 2021-2026 Capital Improvement Program.

Description of Incremental Budget Changes

Baseline

Revenue Update

Revenues \$(450,000)

This change reflects updates to baseline revenues from the August revenue forecast.

Citywide Adjustments for Standard Cost Changes

Expenditures \$132,348

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Office of Sustainability and Environment

Baseline Adjustments for Personnel Costs

Expenditures \$37,884

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Align Medical Costs

Expenditures -

Technical adjustment to align OSE's costs associated with regular medical benefits with amounts in the Central Cost Manual.

Adjustment for One-Time Budget Changes

Expenditures \$(929,000)

This item adjusts the baseline to remove one-time adds in the 2020 Adopted Budget. These include one-time Sweetened Beverage Tax (SBT) funded adds for Fresh Bucks, water bottle filling stations in schools, funding for the SBT Community Advisory Board, and consultant support for an SBT programming evaluation and a scratch-cooking assessment. This adjustment also removes from the baseline one-time, Council-added, partial support for RVC's Green Pathways Fellowship. RVC intends to continue the Fellowship program and is currently pursuing external funding.

Maintain Fresh Bucks Program Manager

Position Allocation -

The Fresh Bucks program continues to be a priority program for the City of Seattle. This item removes an existing sunset date on the Fresh Bucks Program Manager Strategic Advisor 1, Gen Gov. position.

Baseline Add for Benchmarking Database and Data Visualization Maintenance

Expenditures \$10,000

This proposal adds \$10,000 to the baseline budget for the benchmarking & tune-ups program to perform needed annual maintenance for the database and visualization platform.

Proposed Operating

Joint COVID-19 Relief Plan

Expenditures \$3,400,000

As part of the 2020 budget, the Mayor and City Council have invested \$233 million in COVID-19 relief programs. To further address community needs, an additional \$45 million will be invested from the City reserves and other funding sources, with approximately half appropriated in 2020 and the remainder in 2021. The investments will be distributed according to a spending plan, which includes assistance to small business, childcare, individuals experiencing homelessness or at risk of losing their home, people experiencing food insecurity, and immigrants and refugees.

This item adds \$3.4 million in one-time reserves in 2021 to OSE provide Emergency Grocery Vouchers to eligible households through the first quarter of 2021. These vouchers, up to \$400 per month, were first issued in April 2020.

Office of Sustainability and Environment

Vouchers can be spent at Safeway supermarkets and will ultimately serve nearly 14,000 households. Eligible households are enrolled from existing city lists or by community-based organizations. Over the course of 2020, \$5 million in Sweetened Beverage Tax funds, \$9.5 million from Federal CARES Act awards, and \$5.5 million from the City's Emergency and Rainy Day Funds have supported this program. An additional \$2 million has been provided from corporate donations.

Transfer Funds to HSD for Fresh Bucks Good Food Bag

Expenditures \$(55,000)

This item transfers \$55,000 in Sweetened Beverage Tax fund appropriation from the OSE BSL (BO-SE-X1000) to HSD for the Fresh Bucks Good Food Bag Program. See HSD for the corresponding transfer. This transfer replaces the current practice of an annual memorandum of agreement with OSE reimbursing HSD for this work.

Delay Hiring Green New Deal Advisor Position

Expenditures \$(132,000)

Per Council's Green New Deal ordinance, a Green New Deal Advisor position was added to OSE in the 2020 Adopted Budget to help coordinate work associated with the Green New Deal Oversight Board and an interdepartmental team (IDT) to implement climate actions. Hiring for this position was put on hold due to the COVID-19 crisis. This item extends the delay until 2022, providing savings of \$132,000 in 2021.

Delay Hiring Climate Position

Expenditures \$(140,000)

This item reduces the budget to reflect a delay in hiring one of OSE's climate positions until 2022. This position is intended to eventually support OSE's work on building policy, including Performance Standards, Sustainable Buildings Policy, and indoor air quality. The position will also support policy development for clean energy jobs.

Benchmarking & Tune-Ups Enforcement Pause and Technical Assistance Reduction

Expenditures \$(150,000)

This item reduces for one year the Building Energy Benchmarking and Tune-Up budgets by \$150,000. The reduces OSE's in-house capacity to provide technical assistance for commercial building Tune-Ups. It will also lead to a reduction in trainings and pause publication of case studies and promotional articles. This reduction will also lead to a one-year a pause in enforcement of both Energy Benchmarking and Tune-Ups regulations for large commercial and multifamily buildings.

Funding will continue for OSE to continue providing technical assistance through a professional services contract, which will allow Tune-Up submissions to continue at a reduced level. With a pause on enforcement, existing staff will be redeployed in 2021 to take on administration of all help desk inquiries.

Reduce Drive Clean Seattle Program

Expenditures \$(25,000)

This item makes a \$25,000 one-time reduction to the Drive Clean Seattle budget. This will decrease the program budget by half and will reduce funding for community engagement and professional services.

Reduce Discretionary Staff Travel and Training Budget

Expenditures \$(15,000)

Office of Sustainability and Environment

This item reduces for one year OSE's discretionary budget for professional development training and travel. Support for professional development will continue at a reduced level within program budgets.

Reduce Communications Budget

Expenditures \$(10,500)

This item would reduce the budget for communications by \$10,500. This reduces resources for translation services. OSE will continue to provide translation services with existing program budgets and with internal staff.

Community Programming Reduction

Expenditures \$(10,000)

This item pauses funding used to sponsor annual events of community partners as well as funding for OSE's annual Earth Day event.

Office of the City Auditor

David G. Jones, City Auditor

(206) 233-3801

<http://www.seattle.gov/audit/>

Department Overview

The Office of City Auditor was established by City Charter and serves as Seattle's independent performance audit function. The City Auditor is appointed by the City Council to a four-year term of office.

The Office of City Auditor seeks to promote honest, efficient management and full accountability throughout City government. It serves the public interest by providing the City Council, the Mayor and City employees with accurate information, unbiased analyses and objective recommendations on how best to use public resources.

The Office of City Auditor conducts audits of City departments, programs, grantees and contracts, as well as some non-audit projects. Most of the office's work is performed in response to specific concerns or requests from City Councilmembers, but the City Auditor also independently initiates work to fulfill the office's mission. If resources are available, the City Auditor responds to requests from the Mayor, City departments and the public.

Through its work, the Office of City Auditor answers the following types of questions:

- Are City of Seattle programs being carried out in compliance with applicable laws and regulations, and is accurate information furnished to the City Council and Mayor on these programs?
- Do opportunities exist to eliminate inefficient use of public funds and waste?
- Are programs achieving desired results?
- Are there better ways to achieve program objectives at lower costs?
- Are there ways to improve the quality of service without increasing costs?
- What emerging or key issues should the City Council and Mayor consider?

Office of the City Auditor

Budget Overview

The 2021 Proposed Budget includes technical adjustments to bring the department's budget into alignment with an Annual Wage Increase and changes to internal service costs. In addition, the proposed budget reduces the Auditor's total budget by 5% in response to declining General Fund revenues due to COVID-19.

Incremental Budget Changes

Office of the City Auditor

	Dollars	FTE
2020 Adopted Budget	2,579,778	10.00
Baseline		
Citywide Adjustments for Standard Cost Changes	(3,990)	-
Baseline Adjustments for Personnel Costs	48,413	-
Proposed Operating		
5% General Fund Reduction	(103,989)	-
Total Incremental Changes	\$(59,566)	-
Total 2021 Proposed Budget	\$2,520,212	10.00

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$(3,990)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$48,413

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022.

Proposed Operating

5% General Fund Reduction

Expenditures \$(103,989)

Office of the City Auditor

The 2021 Proposed Budget reduces the Auditor's Budget by 5% in response to declining General Fund revenue due to COVID-19.

City Budget Office

Ben Noble, Director

(206) 615-1962

<http://www.seattle.gov/budgetoffice/>

Department Overview

The City Budget Office (CBO) is responsible for developing and monitoring the City's annual budget, carrying out budget-related functions, overseeing fiscal policy and financial planning activities, policy analysis, and preparing legislation for City Council review. CBO provides strategic analysis relating to the use of revenues, debt, long-term issues, and special events. The office also provides technical assistance, training, and support to City departments in performing financial functions. The Innovation and Performance team is also in CBO, supporting and advancing initiatives by using data and design to solve problems.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support			
General Fund Support	7,203,501	7,283,554	7,145,311
Total Operations	7,203,501	7,283,554	7,145,311
Total Appropriations	7,203,501	7,283,554	7,145,311

Civil Service Commissions

Andrea Scheele, Executive Director

(206) 233-7118

<http://www.seattle.gov/civil-service-commission>
<http://www.seattle.gov/public-safety-civil-service-commission>

Department Overview

The **Civil Service Commissions** is the administrative entity serving both the Civil Service Commission and the Public Safety Civil Service Commission. The Commissions are quasi-judicial bodies charged with providing fair and impartial hearings on disciplinary actions and other employment related issues. Each commission is governed by a separate three-member board, with one member appointed by the Mayor, one appointed by the City Council, and one elected by, and representing, the employees. The term of each commissioner is three years.

The **Civil Service Commission (CSC)** provides fair and impartial hearings of alleged violations of the City's personnel rules. Employees may file appeals with the CSC regarding all final disciplinary actions and alleged violations of the Personnel Ordinance, as well as related rules and policies. The CSC may issue orders to remedy violations and may also make recommendations to the Mayor and the City Council regarding the administration of the personnel system.

In addition, the CSC investigates allegations of political patronage to ensure the City's hiring practices are established and carried out in accordance with the merit principles set forth in the City Charter. The CSC conducts public hearings on personnel related issues and may propose changes to personnel rules, policies, and laws to the Mayor and the City Council.

The purpose of the **Public Safety Civil Service Commission (PSCSC)** is to implement, administer, and direct a civil service system for sworn personnel of the Seattle Police Department and uniformed personnel of the Seattle Fire Department. The PSCSC provides sworn police and uniformed fire employees with a quasi-judicial process for hearings on appeals concerning disciplinary actions, examination and testing, and other related issues.

Citywide Adjustments for Standard Cost Changes	15,383	-
Baseline Adjustments for Personnel Costs	4,614	-
Total Incremental Changes	\$(3,366)	-
Total 2021 Proposed Budget	\$522,731	2.00

Description of Incremental Budget Changes

Proposed Operating

Reduction to Correct Commissioner Tax and Retirement Contributions

Expenditures \$(23,363)

The Civil Service Commissions are reducing appropriations in tax and retirement accounts that were inaccurately budgeted for Commissioner stipends. This results in a \$23,363 reduction for 2021 that is on-going.

Proposed Technical

Revenue Update

Revenues \$(10,000)

This change reflects updates to baseline revenues from the August revenue forecast.

Civil Service Commissions

Citywide Adjustments for Standard Cost Changes

Expenditures \$15,383

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$4,614

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Office of the Employee Ombud

Amarah Khan, Director

(206) 256-5982

Department Overview

In 2018, the Mayor issued [Executive Order](#) 2018-04 creating the Office of the Employee Ombud (OEO) following the recommendations issued by the Anti-Harassment Inter-departmental Team (AH IDT) on improving the City's workplace culture. The mission of the OEO is to support City employees in all branches of City government in answering their concerns regarding workplace conduct that may be considered inappropriate; may constitute harassment, discrimination, or retaliation; and/or is in conflict with the City's Personnel Rules, Citywide workplace expectations, and other City policies. OEO is the primary conflict management resource for the City.

The OEO provides assistance to City employees through a variety of means, including conflict management and resolution; clarifying the City's processes and systems for reporting and investigations; facilitating discussions to break down miscommunication; providing the contact for represented employees' unions; and understanding what remedies are available through State or Federal agencies. The OEO also supports employees with referrals to the City's contracted Employees Assistance Program (EAP) for appropriate emotional assistance.

In addition to individual employee services, the OEO engages with policy improvements that support the City's continuous effort to provide every City employee a safe and respectful workplace where they can do their best work in serving the residents of Seattle. OEO, as part of its systemic change mission, offers trainings and capacity building to city departments so that practices and behaviors that cause conflict among us can be addressed in a proactive manner. Beginning in 2020, the OEO submits an annual report to the Mayor's Office and City Council that addresses issues extending beyond the experiences of individual employees. The report includes recommendations to clarify the City's Personnel Rules, complaint and investigations systems and trainings, and shared information on patterns of inappropriate workplace conduct at the City.

Office of the Employee Ombud

Budget Overview

The City is projecting significant revenue losses due to COVID-19 and the resulting public health crisis. As a result, the budget includes reductions for most departments across the City. The 2021 Proposed Budget reduces staffing capacity for the Office of the Employee Ombud (OEO) data management. OEO is a small department with limited flexibility in its budget, and the department identified a reduction opportunity with a vacancy. The details of the changes to OEO's budget are included in the Incremental Budget Changes section below.

The 2021 Proposed Budget also provides OEO with technical adjustments in the baseline budget, reflecting adjustments for one-time budget changes in 2020 and changes to internal services costs.

Adjustment for One-Time Budget Changes

Expenditures \$(364,750)

In 2020, the Office of the Employee Ombud moved from a temporary office location in City Hall to a more permanent location in Columbia Tower. This item removes the one-time costs associated with that move from the baseline in 2021.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(54,281)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle

Office of the Employee Ombud

Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures -

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

MSA Pocket Reduction

Expenditures \$(126,342)
Position Allocation (1.00)

This item abrogates 1.0 FTE Management Systems Analyst (MSA) vacant pocket and decreases appropriation authority by \$126,342. OEO will continue to perform the MSA function by dividing the job requirements among existing staff. OEO will also collaborate with an MSA in the Seattle Department of Human Resources' Human Resources Investigation Unit (HRIU) on various aspects of data management and reporting.

Employees' Retirement System

Jeff Davis, Executive Director

(206) 386-1293

<http://www.seattle.gov/retirement/>

Department Overview

The Seattle City Employees' Retirement System has two major functions: administration of retirement benefits and management of the assets of the Retirement Fund. Employee and employer contributions, as well as investment earnings, provide funding for the system. Approximately 9,400 active employee members, 2,800 terminated employee members and 7,000 retired employee members participate in the plan.

The provisions of the plan are set forth in [Chapter 4.36](#) of the Seattle Municipal Code. The plan is a "defined benefit plan" which means an employee's salary, years of service, and age at the time of retirement are used to determine the amount of retirement benefits. At retirement, members are given a choice of several payment options to collect their retirement benefit. The Retirement System is led by a seven-member Board of Administration and an Executive Director appointed by the Board.

Please note that the appropriations detailed in the following tables reflect only the costs to administer the system and do not reflect payment of retiree benefits.

Budget Overview

The Seattle City Employees' Retirement System (SCERS) relies on the long-term health of its assets to sustain its long-term financial obligations to SCERS members. The long-term health of SCERS is measured by the annual January 1 funding status, a percentage that represents the value of the asset portfolio over the reserves needed to pay retirement benefits to employees.

As of January 1, 2020, SCERS net assets are valued at \$3.04 billion with a 68.9% funded status. This is an increase from 68.2% in 2019, but still higher than the low of 62% in 2010. SCERS funding status has generally increased steadily since 2010 due to changes SCERS has made to positively impact the funding status over the long-term. A 2019 decrease was due to adopted changes in assumptions related to long-term investment returns and lower than expected investment returns in 2018.

Employees' Retirement System

Annual Contributions: The plan's actuaries determine an "annual required contribution" (ARC) into SCERS so its assets grow in tandem with pension costs, which rise as new employees join SCERS, wages increase, and retirees live longer. In response to the drop in the value of its invested assets and its funded status coming out of the 2008-09 recession, SCERS and the City enhanced the plan in 2013 by revising its ARC calculation so SCERS will be fully funded after a fixed 30-year period beginning January 1, 2013 and ending January 1, 2043. In addition to the employee and employer annual required contributions, the City pays an additional fluctuating amount to achieve the fully funded status by 2043. These amounts are reflected in departmental budgets throughout the 2021 Proposed Budget.

Investment Return Assumption: In January 2014, SCERS decreased its long-term investment return assumption from 7.75% to 7.50% in anticipation of slower asset growth over the next 30 years. Effective January 2020, SCERS decreased this assumption further to 7.25%. This assumption raises the ARC so the plan relies more on employee and employer contributions that are based on salaries, which are less volatile than the investment returns affected by portfolio experience and the economy.

Asset Smoothing: SCERS implemented an asset smoothing policy in 2011 to protect the funded status from volatile year-to-year swings by recognizing annual investment return gains and losses evenly over five years. This policy results in gradual changes in the ARC so the City's contribution is more stable.

Pension Plan for New Employees Hired On or After January 1, 2017: The City began evaluating plan changes in 2012 to reduce the cost of the plan for employees and the City, thereby enhancing SCERS' fiscal stability over the long run, while still maintaining an adequate retirement benefit for employees. In 2016, the City and labor unions agreed, and Council approved, a new defined benefit plan (SCERS II) for new employees hired on or after January 1, 2017. SCERS II has a similar structure to the existing plan (SCERS I).

Under SCERS II, there is an estimated 3.8% combined savings for annual employer and employee contributions. Members of the new plan will contribute 7% of their salary toward their retirement benefit, compared to 10.03% under SCERS I. Given the lower contributions into the plan, the new SCERS II plan will provide a retirement benefit lower than the SCERS I plan, but consistent with the design of the current SCERS I plan. The SCERS II benefit will still provide City retirees with an adequate retirement income when combined with Social Security.

The 2021 Proposed Budget includes total appropriation decreases of \$12,354,433. This total, however, includes \$483,169 in appropriation increases for operations, staffing and citywide cost adjustments, but also the removal from the budget of \$12,837,602 for investment management fees. On June 11, 2020 the SCERS Board of Administration reviewed and approved the change to make the Investment Management Fees non-appropriated beginning with the 2021 budget and going forward. This treatment will be the same as for the pension payments to member retirees, which are also non-appropriated. Investment management fees will continue to be reported to the Board, recorded in the City's financial system and detailed in the annual audited financial statements that are posted publicly on SCERS's website (see p32 of 2019 Annual Financials). The financial statements are reviewed and accepted annually by the SCERS Board, which is chaired by the Council Finance Committee Chair.

Description of Incremental Budget Changes

Baseline

Baseline Adjustments for Personnel Costs

Expenditures \$54,926

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

Investment Management Fee Adjustment

Expenditures \$(12,837,602)

On June 11, 2020, the SCERS Board of Administration reviewed and approved the change to make the Investment Management Fees non-appropriated in the 2021-2022 budget cycle and going forward.

Operations Expense Adjustment

Expenditures \$680,628

Position Allocation 1.00

On June 11, 2020, the SCERS Board of Administration approved a change to increase the allocation of operating costs to better align with existing needs and commitments.

Staffing Adjustments

Expenditures \$339,886

Position Allocation 4.00

On June 11, 2020 the SCERS Board of Administration reviewed and approved the conversion of 4 TLT positions to FTE (1 Accountant, 2 Assistant Retirement Specialists, 1 Systems Analyst). During 2018 and 2019, rather than immediately add FTE, SCERS used temporary staff (TLTs) to address changing workload needs resulting from a new pension administration system. SCERS has determined these 4 positions were essential to ongoing workload needs versus the temporary influx of work during the system transition. Total positions at SCERS remains constant at 30

Employees' Retirement System

from 2020 to 2021.

Additionally, as part of the 2019 budget process the SCERS Board of Administration approved the reclassification of 4 existing positions (3 Retirement Specialists to Senior Personnel Specialist and 1 Retirement Specialist to Strategic Advisor) which are included in the budget legislation in 2021.

Proposed Technical

Balancing Adjustment

Revenues \$(12,354,433)

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Citywide Adjustments for Standard Cost Changes

Expenditures \$(592,271)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Ethics and Elections Commission

Wayne Barnett, Executive Director

(206) 684-8500

<http://www.seattle.gov/ethics/>

Department Overview

The Seattle Ethics and Elections Commission (SEEC) helps foster public confidence in the integrity of Seattle city government by providing education, training, and enforcement of the City's Ethics Code, Whistleblower Code, and lobbying regulations. It also promotes informed elections through education, training, and enforcement of the City's Elections Code and Election Pamphlet Code. With the passage of [Initiative 122](#) in November 2015, the Commission now administers and funds the Democracy Voucher Program.

The Commission's work on behalf of the City of Seattle centers around five main lines of business:

Ethics Code: The Commission conducts ethics training for all City of Seattle employees upon request and through the City's New Employee and New Supervisor Orientation programs. It also provides ethics training information for City employees via the City's intranet site. The Commission issues advisory opinions regarding interpretations of the Code of Ethics and also investigates and rules upon alleged violations of the Code. More than thirty years of formal advisory opinions, organized and searchable by topic, are available on the Commission's website.

Whistleblower Code: The Commission helps to protect an employee's right to report improper governmental action and to be free from retaliation as a result of such reporting. The Commission either investigates allegations of improper governmental actions itself or refers allegations to the appropriate agency.

Elections Code and Election Pamphlets Code: The Commission fulfills the public's mandate of full campaign disclosure by:

- training organizations required to report campaign contributions and expenditures in proper reporting procedures;
- auditing campaign reports;
- working with organizations to correct errors; and
- making all campaign finance information available to the public.

Since 1993, the Commission has made summary reports of campaign financing information available to the public, and since 1995, the Commission has published campaign financing information on its website. The Commission also produces voters' pamphlets for City elections and ballot measures. It makes these pamphlets available in several languages and produces a video voters' guide with King County.

Lobbying Regulations: The Commission is charged with administering the City's lobbying regulations. The Commission collects and posts information so that residents know who is lobbying and how much they are being paid to lobby. The Commission also enforces compliance with the lobbying regulations.

Democracy Voucher Program: The Commission administers the Democracy Voucher Program which was approved with the passage of I-122 in November 2015. The primary goal of the program is to provide \$100 in vouchers to eligible Seattle residents so that they can contribute to candidates for City office who qualify to participate in the program.

Description of Incremental Budget Changes

Baseline

Ethics and Elections Net-Zero Account Alignment

Expenditures -

This net-zero adjustment aligns the budget with actual spending for the Ethics and Elections Commission's central rate accounts.

Citywide Adjustments for Standard Cost Changes

Expenditures \$31,123

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$9,151

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline

Ethics and Elections Commission

budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

Democracy Voucher Increase for the 2021 Election Cycle

Expenditures	\$7,666,006
--------------	-------------

This bi-annual increase funds the Democracy Voucher Program for the 2021 election cycle. It provides the funding needed for voucher payments of up to \$6.8 million, voucher printing and mailing costs, and temporary staffing increases for voucher processing and outreach work. In 2021, the Mayor, City Council positions #8 and #9 (citywide) and the City Attorney will be on the ballot. This is one-time funding for 2021 only.

10% General Fund Target Reduction

Expenditures	\$(75,436)
--------------	------------

This item reduces a significant portion of the average annual underspend in the Ethics and Elections Commission General Fund budget. There were no changes to staffing levels and this reduction will not impact department operations.

Proposed Technical

DEPT-Balancing

Revenues	\$7,675,538
----------	-------------

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Department of Finance and Administrative Services

Calvin W. Goings, Director

(206) 386-0041

<http://www.seattle.gov/fas>

Department Overview

The Department of Finance and Administrative Services (FAS) is often the public's first interaction with the City of Seattle, operating as a customer-focused front door that assists with everything from starting a business or paying utilities, to reporting a pothole, requesting public information or even adopting a new pet. The department's 600-plus employees span across 16 divisions and work behind-the-scenes providing critical functions, like processing payments to 13,000 City employees, managing 120 City facilities -including police and fire stations- and directly providing \$270 million in City services annually.

Broadly, FAS' work can be split into four categories.

Customer Services

FAS oversees the City's Customer Service Bureau, the Downtown Customer Service Center and the six customer service centers located throughout the city. Over the phone, online and in person, customers can get information, request services, pay bills, resolve problems and voice opinions. FAS supports the City's compliance with the Washington State Public Records Act by providing Citywide coordination and guidance on public disclosure and by helping customers clarify requests so they receive the information they are seeking from FAS or from other departments. These functions support transparency in City work. In addition, FAS oversees the City's efforts to comply with Title II of the Americans with Disabilities Act. Finally, through the Seattle Animal Shelter, FAS advocates for animal welfare, reunites lost animals with their owners and finds suitable owners to adopt homeless animals.

Regulatory Services

FAS ensures that all businesses operating in Seattle are properly licensed and pay the required business and occupation taxes. FAS issues regulatory licenses for certain business types - including taxis, transportation network companies and for-hire vehicles, adult entertainment venues, door-to-door salespeople, short-term rentals, recreational marijuana establishments and trade shows - and enforces requirements related to those licenses. FAS also monitors certain types of businesses to increase consumer safety and ensure proper charges for services. This includes setting rate caps for tows on private property, as well as ensuring that consumers are not overcharged due to an inaccurate device, such as a gas pump or a supermarket scanner or scale. As the central coordinator for City contracting, FAS establishes policies and procedures to ensure fair competition for City-funded construction projects and oversees programs to ensure everyone in the community has equal access to jobs and opportunities involving those projects. As part of these efforts, FAS administers the City's Priority Hire program to increase employment within the construction trades among women, people of color and those living in economically distressed ZIP codes. FAS also enforces animal-related ordinances, including the investigation of animal cruelty, neglect and abuse.

Financial Services

FAS also prioritizes sustained fiscal health for the City in balance with the goals set forth by the Mayor and the City Council. The department accomplishes this by providing Citywide financial direction and cohesive policies to City departments. In addition, FAS manages the City's bond issuance and internal loan programs, administers City-levied taxes, oversees the City's retirement boards, invests City funds and issues reports on City financial activity. FAS ensures that City revenues are collected, and that vendors and City employees are paid properly in a timely manner. As a partner with the City's Law Department, FAS administers the payment of claims and judgments for damages against the City. The department also oversees City financial systems and partners with the Seattle Department of

Department of Finance and Administrative Services

Human Resources to oversee the City's human resources system City Finance also provides financial oversight of the Central Waterfront Improvement Fund, which includes administering the Waterfront Local Improvement District.

Operational Services

FAS designs, builds and maintains most City-owned buildings, including Seattle City Hall, the Seattle Municipal Tower, the Justice Center, the Joint Training Facility, 33 neighborhood fire stations and five police stations. When departments need to acquire property or when the City no longer has a purpose for a property, FAS is responsible for managing the acquisition or disposition of the property. FAS also maintains the City's vehicle fleet, which includes police patrol cars, fire engines and heavy equipment. FAS also negotiates purchasing contracts on behalf of all City departments and establishes purchasing guidelines for departments.

FAS's budget is split into the following sixteen divisions:

Public Facing Divisions

- **Consumer Protection** regulates 21 specific business types including short-term rentals, adult entertainment, marijuana businesses, taxis, - for-hire or TNC vehicles and others to protect consumers.
- **Customer Service** leads the City's 311 phone service and serves constituents through its Customer Service Bureau and eight customer service centers. The division also manages Americans with Disabilities Act Title II compliance and the state's Public Records Act.
- **License and Tax Administration** manages the City business licensing process and collects more than \$500 million in annual fees and taxes from 100,000 commercial enterprises doing business in the City.
- **Purchasing and Contracting** manages bids, public works and contracting needs. The division also supports the City's race and social justice initiative by expanding contracting equity for women- and minority-owned businesses and supporting labor equity on City construction projects.
- **Seattle Animal Shelter** promotes safety and animal welfare by enforcing animal laws, operating sheltering and adoption programs, managing a spay and neuter clinic and providing care and services for over 5,000 animals annually.
- **Treasury Services** receives, processes, reconciles and distributes the City's funds. Treasury also collects debts and monitors cash flow to ensure City operations, like utilities and payroll, are funded. They are the legal stewards of the City's cash assets.

Internal Facing Divisions

- **Accounting and Budget Services** provides everything from budget oversight to financial planning for FAS, other small departments and City executive offices to create transparent, understandable financial reports.
- **Business Systems** manages Citywide business processes and software to support financial activities across the organization, as well as across multiple jurisdictions in Western Washington
- **Capital Development** plans, designs and builds City structures, facilities and work spaces in a manner that is fiscally responsible, environmentally sustainable and responsibly compliant with equal access for all.
- **Citywide Accounting and Payroll** prepares the City's Comprehensive Annual Financial Report and other reports required by the State and Federal government to facilitate transparency in the City's 420,000-plus annual transactions. The division also implements standard accounting practices and manages all payroll.
- **Facility Operations** manages and maintains more than 120 public structures, including offices, parking garages, maintenance shops and police and fire stations.
- **Fleet Management** leads the procurement, maintenance and fueling for the City's 4,000-plus fleet, providing safe, cost-effective including supporting public safety vehicles and environmentally sustainable transportation for City employees.
- **Human Resources** partners with FAS' diverse group of divisions to support recruitment, hiring, compensation and classification, and performance management in a way that is equitable and fosters a respectful, collaborative and safe work environment.
- **Logistics and Emergency Management** leads emergency planning/procurement, security services, access management, janitorial services, warehouse operations and mail distribution for the City.

Department of Finance and Administrative Services

- **Real Estate Services** manages a Mayoral directive for innovative and efficient citywide real estate portfolio development. The team acquires, disposes of and leases real property for public purposes. The team also collaborates with City departments on real estate transactions.
- **Risk Management** reviews City contracts to specify appropriate insurance levels, advises City departments on how to reduce or avoid loss, adjusts claims for damages filed and administers all City insurance policies and the City's self-insurance program.

Internal service operations in FAS are primarily supported through charges to City departments and, in some cases such as when the City leases space, by private businesses or individuals. FAS also collects certain fees specifically to pay for its services, such as the Seattle Animal Shelter Spay and Neuter Clinic, pet licensing, the Weights and Measures program and for-hire driver licenses. The General Fund supports certain FAS services, including administration of the City's taxes and business licensing services.

Organizational Structure

In addition to the central FAS services mentioned above there are several budgetary units across the City for which FAS is not directly responsible for staffing or service provision but are housed within the FAS organizational structure. For these areas FAS works with the City Budget Office to facilitate resource requests and financial plans when required. Those units are:

- **Judgment and Claims**, which provides for the payment of legal claims and suits brought against the City government.
- **Jail Services**, which provides for the booking, housing, transporting and guarding of City inmates who are adults charged with or convicted of misdemeanor crimes alleged to have been committed within city limits.
- **Indigent Defense Services**, which secures legal defense services, as required by state law, for indigent people facing criminal charges in Seattle Municipal Court.
- **Transit Benefits**, which pays for the transit benefits offered to City employees.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support			
General Fund Support	48,512,842	52,833,682	54,396,056
Other Funding - Operating	321,469,869	261,626,541	266,990,139
Total Operations	369,982,710	314,460,223	321,386,194

* FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here

Department of Finance and Administrative Services

Budget Overview

As an internal services department, the Department of Finance and Administration (FAS) supports all City departments through its fleets, facilities, customer service, finance, contracting and purchasing functions. FAS bills many of its functions to other City departments through central rates and allocations. FAS also performs general government functions, like business licensing and tax collection, consumer protection, parking meter collections, and operation of the Seattle Animal Shelter, which are funded directly in the General Fund.

The 2021 Proposed Budget includes a range of operating decreases and reprioritizations to reflect the pivot towards COVID-19 response and reopening in 2021 and the constrained revenue environment the City faces in 2021 and beyond. While most budget decisions impacting the department have been reductions there are some targeted increases including funding for FAS to implement the recently passed payroll tax, as well as capital investments in essential services such as a new Fire Station 31, replacement of the dock at the existing Fire Station 5, and expanded support for wheelchair accessible taxis. In addition to these key investments FAS is also working with Seattle IT and Seattle Department of Human Resources on the implementation of a Human Capital Management system to ensure the effectiveness of the City's payroll, human resources and timekeeping capabilities.

There are also technical changes in the 2021 Proposed Budget that increase appropriations in FAS, including the transfer of back office support for the City's accounting and financial system from Seattle IT, and the increase in debt service payments for capital investments.

Responding to COVID-19

Throughout 2020 FAS has been at the center of the City's response to the COVID-19 crisis. Establishing a central warehouse for city supplies, developing safety protocols for reopening, and working with the Seattle Fire Department (SFD) to find locations and set-up the four mass testing sites around the City are among the ongoing efforts of the department. These activities will continue in 2021 and as services at City buildings resume FAS will lead the effort to ensure they are safe and accessible to all. The majority of these expenses have been managed within the department's existing budget, or will be reimbursed by external revenues that will be reimbursed by separate legislation, and so the 2021 Proposed Budget does not contain large additional adds in this area.

However, the impact of the crisis on all City revenues is significant and this widespread reduction in revenues necessitates cuts from all City departments. Therefore, the 2021 Proposed Budget contains FAS reductions that are both directly and indirectly related to the COVID crisis. These reductions include the abrogation or defunding of positions in the Seattle Animal Shelter, Parking Meter Collection and City Finance. In addition, this budget reduces consultant and maintenance contracts in Fleet, City Finance and City Contracting. These reductions will impact ongoing maintenance and office support for these functions, however, they protect those services most directly related to working on the COVID-19 response and enable the department to continue its coordinating role in the effort to continue city operations.

Supporting Effective First Response

FAS is responsible for all of the City's public safety facilities, including maintenance on existing facilities and the design and construction of any new facilities. Previous budgets have provided funding for improvements to the Seattle Police Department (SPD) North Precinct and the SFD Joint Training Facility and work on these projects is ongoing. The 2021 Proposed Budget provides funding for the replacement of the dock at Fire Station 5 in downtown Seattle, ensuring that SFD will continue to have a main hub for water response on the Puget Sound.

In 2020, a new project was added to the Capital Improvement Plan (CIP) to construct a new Fire Station 31 in the Northgate neighborhood of Seattle. The project is currently in pre-design and will replace the smaller current site for Station 31, which has been in use for over 40 years. In addition to the major legislative action taken in 2020 to create the new project, the 2021 Proposed Budget adds resources for a temporary site for firefighters to work from during

Department of Finance and Administrative Services

the construction of the new facility and a technical change to recognize the debt service payments. This temporary facility will be operational in 2021.

Maintaining Critical Infrastructure

Investing in ongoing maintenance of City facilities is essential to ensure a smooth and safe working environment for employees and visitors. The 2020 Adopted Budget funded initial design work for the rehabilitation and replacement of the Seattle Municipal Tower (SMT) elevators. This design work will reach the 30% milestone in Q4 of 2020 and, in line with the City's policy for major capital projects, the 2021 Proposed budget provides funding for final design and construction work.

In addition to the capital improvements, the 2021 budget also provides operating funding for two maintenance related positions within the City's downtown facilities. The first is an elevator technician to improve response times to elevator issues and reduce the amount of time the elevators are out of service. The second is a janitorial position to help maintain City Hall and SMT and to support the running of the shelter facilities in City Hall. This combined capital and operating investment will enable City facilities to continue safely and effectively serve employees and the public.

Managing the City's Core Financial Operations

Citywide financial, accounting, payroll and treasury services are provided by FAS's Finance Business Unit. In recent years, the multiple software programs relied upon by all City of Seattle employees became outdated and, in some cases, have stopped being supported. The replacement of the City's previous financial system with the PeopleSoft 9.2 platform has benefited the City's audited and public-facing financial reports, as well as improving the consistency and accuracy of internal reporting for departments. To continue achieving efficiencies with the operation of this system, Seattle IT is transferring their support division to FAS. This follows best practice guidelines for one center of support for this platform.

The 2021 Proposed Budget also includes significant additions to FAS to fund a new Human Capital Management (HCM) system. This project is critical for citywide human resources, timekeeping and payroll, for which the current system will no longer be supported after 2023. The 2020 funding for the start of this project resides in both FAS and Seattle Information Technology Department (ITD). To begin the strategic planning for implementing a new system the 2021 budget includes positions in both FAS and Seattle Department of Human Resources (SDHR) and funding for a consultant contract in ITD.

Delivering a progressive taxation system

The 2020 Adopted Budget launched the City's Fare Share program with a tax on Transportation Network Companies (TNC), to support critical transportation and housing projects. As the citywide tax administrator, FAS is responsible for collecting this tax. Due to the COVID-19 crisis, implementation of this tax has been significantly delayed and positions that were planned for this work were not added. The 2021 Proposed Budget adds these positions to FAS.

Along with the new TNC tax the City has also begun the process of establishing a payroll tax on companies with high employee salaries. Establishing a new tax requires investment in technology and infrastructure, as well as resources for the essential work of rule making and policy development. This budget provides funding for FAS to begin the rulemaking and implementation of this proposal.

Expanding Use of Wheelchair Accessible Taxis

The City levies a \$0.10 surcharge on TNC, taxicab and for-hire vehicle rides to offset the higher operational costs for owners and operators of wheelchair accessible taxis (WATs), helping to ensure the economic sustainability of these services. Owners and operators of WATs may apply for reimbursement from the Wheelchair Accessible Services (WAS) Fund for eligible expenses, including vehicle costs associated with purchasing and retrofitting an accessible vehicle, extra fuel and maintenance costs and time involved in providing wheelchair accessible trips.

Department of Finance and Administrative Services

The 2021 Proposed Budget provides appropriation from the WAS Fund to support the development of a centralized dispatch system. Additionally, this proposal converts a temporary position that has been supporting this program into a permanent position

Reducing Parking Meter Coin Collection

FAS is responsible for the collection of coins from parking meters across the City. In recent years the number and usage of these meters has fallen significantly. Given this reduced usage, which has been exacerbated by the COVID-19 crisis, the need for coin collection has been reduced. The 2021 Proposed Budget eliminates some staffing and operational costs for coin collection, although there is still some resources allocated to the program. The program is not being eliminated to ensure that residents who are unbanked or underbanked are able to access these meters.

Redesigning the City's Jail Contract

Seattle and King County have experienced profound changes in 2020. The COVID-19 pandemic, the murder of George Floyd, and the call for decriminalization are resulting in demands for criminal justice reform in arrests, prosecution, sentencing and incarceration. These issues provided a catalyst to move Seattle and King County to review the current jail contract and how the jail population is managed. The City and County are working to complete an agreement that would redirect a share of the resources now spent on jail operations toward community-based supports to reduce the use of jail. This path forward offers more effective health and housing supports to the same communities where effects of the criminal legal system disproportionately fall. The County and the City will work collaboratively with representatives from affected communities to allocate these resources. As part of this agreement, a process will be established for ongoing monitoring of jail operations with the aim of providing appropriate services and care for those who are incarcerated.

Description of Incremental Budget Changes

Baseline

Adjustment for One-Time Budget Changes

Expenditures	\$(5,766,000)
Revenues	\$(10,067,686)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget:

Proposed Operating

Reduce Seattle Animal Shelter Support

Expenditures	\$(342,377)
Position Allocation	(2.00)

This item decreases funding for the Seattle Animal Shelter Level to meet budget reductions due to economic challenges. This includes the abrogation of two positions, a 1.0 FTE Animal Control Officer II and 1.0 FTE Admin Specialist III which will create challenges in animal control enforcement functions, proactive pet license sale initiatives and goals, limiting capacity to improve programs (i.e. coordination of vital volunteer and foster care services), and decreasing amount of communications (social media, website) and community outreach. However, Animal Shelter core functions are maintained.

Customer Service Center Reductions

Expenditures	\$(236,755)
--------------	-------------

Department of Finance and Administrative Services

This proposal will decrease the FAS customer service function by \$236,755 in 2021 by reducing Customer Service Center (CSC) hours of operation. Some brick-and-mortar Customer Service Centers (CSCs) will eliminate hours of service, depending on location. The Mobile Customer Service Center (Mobile) will be taken out of service and the staff redeployed to the CSCs.

Reduce Support in City Finance

Expenditures	\$(787,992)
Position Allocation	(6.00)

This action will decrease various Budget Control Levels by \$787,992 in 2021 by abrogating six positions in the Department of Finance and Administrative Services (FAS) in the areas that support Treasury Services, License and Tax Administration and Business Systems to meet budget reductions due to economic challenges. The removal of these positions will reduce capacity and extend response times on PeopleSoft 9.2 requests, treasury functions and tax outreach, while still maintaining core operations .

General Operating Reductions Across FAS Divisions

Expenditures	\$(1,699,750)
Position Allocation	(2.00)

This action will decrease appropriation in several administrative business units in FAS by a total of \$1,699,750. This change includes the removal of six positions, including two abrogations, and \$60,000 in non-labor contracts administered by FAS. The areas impacted include financial support for small departments and executive offices, regulatory inspectors for Consumer Protection, internal FAS Human Resources, citywide purchasing and contracting and the priority hire program.

Reduce Downtown Core Property Management

Expenditures	\$(243,000)
--------------	-------------

This item will decrease downtown core facilities property management functions provided by FAS by \$243,000. This reduction will specifically impact property management and periodic maintenance at Seattle City Hall, Seattle Municipal Tower (SMT) and Seattle Justice Center (SJC). Impacted areas will include landscaping and green roof maintenance, as well as periodic projects such as HVAC and elevator repairs.

Reduce spending on periodic building maintenance projects for buildings outside the downtown core

Expenditures	\$(300,000)
--------------	-------------

This action will decrease appropriation by \$300,000 for periodic building maintenance projects in City facilities outside the downtown core, including fire stations, police precincts, Charles St. shops, Seattle Animal Shelter, and a number of other facilities and properties. Periodic projects are used to keep the facilities operational. Last year, FAS replaced or repaired over 20 HVAC units in several SPD and SFD facilities. This included projects to repair water and sewer lines, replace bad flooring, replace and upgrade fire alarm panels, upgrade outdated system software and provide asphalt repair. This reduction is equivalent to 30% of the overall budget in this area.

Eliminate SeaPark Garage Maintenance Shop

Expenditures	\$(83,000)
--------------	------------

This item closes the downtown SeaPark garage maintenance shop managed by FAS and saves \$83,000 in 2021. These shop functions will relocate to the Charles Street Shop which is located in the just south of the downtown core buildings.

Department of Finance and Administrative Services

Reduction in Parking Meter Collections

Expenditures	\$(223,539)
Position Allocation	(2.00)

Due to a decrease in the use of coins at parking meters, this item decreases appropriation for 2.0 FTE Parking Meter Collectors and associated operating costs. FAS will work with the Seattle Department of Transportation in 2021 on a proposal to potentially reduce the use of coins in parking meters with minimal impact to the unbanked and underbanked populations.

Human Capital Management Project Staffing Resources and Funding for Debt Service

Expenditures	\$198,238
Position Allocation	1.00

This item increases the FAS budget by \$198,238 to provide staffing support as well as debt service obligations for a multi-department technology project. The project replaces the aging Human Resource Information System (HRIS) with a new Human Capital Management (HCM) system, which includes the citywide payroll and benefit system. The timing of this project is critical for the citywide HR, Timekeeping and Payroll system, which will no longer be supported after 2023. The debt service obligation is to cover the funding for HCM capital project listed in the proposed capital item Human Capital Management System. Debt service payments are will be made using revenue recognized from proposed technical changes Interdepartmental Revenue to Support the Human Capital Management (HCM) Project.

Expanded Use of the Wheelchair Accessible Services Fund

Expenditures	\$1,140,000
Position Allocation	1.00

This action increases the FAS budget for the City's Wheelchair Accessible Services (WAS) Fund by \$1,140,000. Fund revenues are from a surcharge paid on each transportation network company (TNC), taxicab and for-hire vehicle trip originating within the Seattle city limits. Current appropriation authority for WAS spending is not sufficient to meet anticipated expenditures and revenues. The request also includes converting a temporary position into permanent funding and position authority.

Add Support to Implement the Payroll Tax

Expenditures	\$3,302,751
Position Allocation	8.00

This proposal adds funding needed to implement the Seattle Payroll Tax as passed in Ordinance 126108 in 2020. This request adds \$3.3 million in 2021 and eight FTEs in the Revenue Administration program in order to support the development and implementation of this tax. This item would fund one-time system implementations costs, and ongoing system and staffing resources, in areas such as rule making, tax collection and administration.

Position adds for TNC tax administration support

Expenditures	\$256,179
Position Allocation	2.00

In 2019 the Mayor's Fare Share proposal was passed, which funded critical transportation and housing projects in Seattle through a \$0.57 tax to Transportation Network Company (TNC) rides. As the City's tax administrator FAS was given resources to implement this tax, however, due to declining TNC rides in 2020 these positions were temporarily unfunded. This proposal adds back the 1.0 Tax Auditor, Sr. and 1.0 Treasury Cashier, Sr. to support the TNC tax ahead of continued implementation in 2021.

Department of Finance and Administrative Services

Transfer PeopleSoft Budget from ITD to FAS

Expenditures	\$7,528,305
Position Allocation	9.00

This item increases the FAS budget by \$7,528,305 and adds 9.0 FTE by transferring the Peoplesoft 9.2 team and associated budget from Seattle Information Technology Department (ITD) to FAS Business Systems division. In November 2019, ITD and FAS agreed to transfer the PeopleSoft Citywide Financial Enterprise System position support and service management to FAS Business Systems division. In this agreement, an MOU was developed and implemented in 2020 between the two departments, ITD and FAS, consolidating the management of PeopleSoft 9.2 and making the transition permanent in this budget. This function supports the financial system reimplementation and includes the increased contract maintenance of the system and continues the temporary employee support. This is a net neutral add of the City's budget as there is a corresponding reduction in the ITD budget combined with a reorganization within FAS that brings all PeopleSoft 9.2 functions into the same budget program.

Accounting and Administrative Services for the Office of Emergency Management

Expenditures	\$85,000
Revenues	\$85,000

This item increases the FAS budget to provide financial services to the newly created Office of Emergency Management Department (OEM). FAS will provides financial support to OEM, similar to the services FAS provides to the City's other small departments and executive offices.

Maintain Affordable Housing Site (UW laundry)

Expenditures	\$250,000
--------------	-----------

This action will increase appropriation authority by \$250,000 in operations and maintenance for the Office of Housing's (OH) Rainer site (formerly the Mount Baker UW Laundry site). FAS will be responsible for the security and maintenance of this facility prior to its redevelopment and this funding will ensure the site is maintained in a stable safe condition.

Increase Elevator Maintenance Support

Expenditures	\$250,000
--------------	-----------

This item will increase appropriation authority by \$250,000 to ensure critical elevator maintenance in City facilities. An addition of a dedicated technician to support the downtown core buildings will allow for onsite technical services during building operation hours, reduce response time for elevator entrapments, provide for additional service hours and enhance maintenance schedules.

Increase Janitor Services for Downtown Core

Expenditures	\$200,703
Position Allocation	1.00

This item will increase appropriation and add 1.0 FTE janitor to provide additional City Hall janitorial services to support the homeless shelter. There is an increased workload due to the shelter and current staffing levels cannot maintain the required cleaning in the downtown core buildings without additional staffing.

Real Estate Services Division Support

Expenditures	\$404,500
--------------	-----------

Department of Finance and Administrative Services

Position Allocation

2.00

This action increases appropriation and adds 2.0 FTE Strategic Advisers in the Real Estate Services Division to provide expertise and bandwidth to create centralized decision-making and execution of real estate transactional work for citywide efforts.

Increased Purchasing Contract Rebate

Revenues

\$100,000

This action increases one-time revenues by \$100,000 in Purchasing and Contracting for rebates from contracts with rebate requirements. FAS Purchasing and Contracting will monitor the contract rebate program in 2021 and will re-evaluate expected revenue if needed in the next budget cycle.

Increase appropriation in Judgment and Claims

Expenditures

\$4,350,000

Revenues

\$4,350,000

Starting in 2016, the Judgment and Claim Fund (JCF) expenditures have been showing a higher trend in the settlements and judgments in tort cases and an increase in the use of outside counsel. This trend continues through 2020 and is expected to remain high through 2021. In 2018, Resolution 31847 revised the JCF policies and increased the budget appropriation based on actuarial reports. The goal is to increase the confidence level each year to achieve 90% by 2023. For the 2021 budget the confidence level moves to 70% with a \$4.35 million increase. This approach is expected to work long-term once the short-term higher trend levels out.

Waterfront Redevelopment LID Administration Resources

Expenditures

\$(88,573)

This action reduces budget appropriation for administrative expenses associated with the implementation of the Central Waterfront Local Improvement District (LID). The 2021 LID Administration budget is funded by the Central Waterfront Interfund loan approved by Ordinance 125991 in November 2019. The Waterfront Interfund loan is anticipated to be repaid by future LID bonds issuances.

Supporting Pike Place Market Project Needs

Expenditures

\$6,000,000

The City is appropriating \$6 million in Limited Term General Obligation (LTGO) bond proceeds to Pike Place Market Preservation and Development Authority (PPMPDA) to ensure that the Market's facilities remain in good working condition during the financial downturn caused by the COVID pandemic, allowing PPMPDA to continue to provide opportunities for market farmers and small businesses while also providing residential opportunities for low-income people. The \$6 million in bond proceeds is a loan to the PPMPDA with bond proceeds to be used by PPMPDA to fund capital projects including repairs to roofing, floors, windows, plumbing, and elevators. Funds will not be dispersed to PPMPDA until the bonds are issued and the City and PPMPDA sign a lending agreement.

Proposed Capital

Fire Station 5 Dock Replacement and Utility Work

Expenditures

\$720,000

This item adds \$720,000 in 2021 to the Fire Station five project to fund the first stage of the replacement of the dock, and additional utility work inside the station. The 2021-2026 CIP also adds funding to 2022 to complete this work. In 2018 an engineering team discovered that the integrity of the concrete floating dock had deteriorated to

Department of Finance and Administrative Services

the point where the dock urgently needs to be replaced. Temporary repairs were performed to enable the Fire Station 5 crews to return and operate on this dock for a limited period to enable time for funding, design and construction to occur. This project was the highest priority for FAS in the 2021-2026 Capital Improvement Program funding was reallocated from ADA improvements and Asset Preservation work to fund this project.

Reduction to the FAS ADA Improvement Project

Expenditures \$(1,250,000)

This proposal reduces the ADA improvements project in FAS by \$1.25 million in 2021 in response to reduced REET revenue in 2021 and 2022. The reductions limit FAS' ability to remove remaining public-facing barriers and slows positive momentum in improving accessibility to City services mainly in Schedule 2 facilities. These facilities include police stations, fire stations and neighborhood service centers. Funding of \$1 million remains in this project in 2021 to allow some work to continue.

Reduction to Asset Preservation Projects

Expenditures \$(955,000)

This item reduces funding for 2021 in the Asset Preservation program. The Proposed 2021-2026 CIP has additional reductions in 2022. These reductions will defer most new major maintenance work in the City's downtown core properties, Seattle Municipal Tower (SMT), City Hall and the Justice Center, to at least 2023. This funding reduction enables FAS to focus funding on the highest priority Fire Station 5 projects.

Human Capital Management System

Expenditures \$7,500,000

This action adds a new capital technology project to the Department of Finance and Administrative (FAS) to plan for the replacement of the aging Human Resource Information System (HRIS) with a new Human Capital Management (HCM) system. The total project is estimated to be \$61 million funded with Limited Term General Obligation (LTGO) bonds and is included in the proposed 2021-2026 CIP. Staffing and other operating costs for this effort are in the companion operating change Human Capital Management Project Staffing Resources.

Seattle Municipal Tower Elevator Rehab

Expenditures -

This item confirms and funds the 2021 funding that was identified as "To Be Determined" in the 2020-2025 Adopted CIP. This project will fund the design and phased construction for the modernization of the elevators in the Seattle Municipal Tower (SMT). The SMT is approximately 30 years old, is 62 stories tall and contains approximately 840,000 square feet. The Tower's vertical transport system consists of 32 elevators and four escalators. Similar to much of the infrastructure and building systems in the aging SMT, portions of this transport system are reaching the end of their useful life expectancy based on historical industry standards and detailed evaluations by elevator specialists. Full details for years beyond 2021 are in the 2021-2026 Proposed CIP.

Fire Station 31 Temporary Station

Expenditures \$1,300,000

This item supports facility planning and development, including design, permitting and construction of an interim Fire Station 31 on a leased property. This completes funding added as part of the 2020 Adopted Budget. Lease payments for the interim site are also included at \$200,000 per year in the Proposed 2021-2026 CIP.

FAS Budget System Replacement

Department of Finance and Administrative Services

Expenditures	\$500,000
Revenues	\$500,000

This item adds \$500,000 to the FAS Budget System Replacement CIP project in 2020, funded with an interfund transfer from Seattle IT. This project will replace the Department of Finance and Administrative Services (FAS)' current outdated budget system with a system that meets FAS budget needs and ensures that budget and rates development is on time, accurate and compatible with other City software systems such as PeopleSoft 9.2.

Reduction to Municipal Energy Efficiency Program (MEEP)

Expenditures	\$(2,000,000)
--------------	---------------

This item reduces appropriation by \$2 million in 2021 to the Municipal Energy Efficiency Program (MEEP). This program is managed by the Office of Sustainability and the Environment (OSE) but housed administratively in the FAS capital program. This reduction is in response to reduced REET revenue in 2021 and because efforts to improve energy efficiency in City Buildings is increasingly funded within individual departmental projects.

Proposed Technical

Fire Station 31 Debt Service Payments

Expenditures	\$326,854
--------------	-----------

This item adds debt service payments for the new Fire Station 31 project, which is funded through LTGO bond issuances the first of which took place in 2020. The 2021-2026 Proposed CIP contains a series of bond issuance's between now and 2025. Planning for multiple bonds allows for adjustments in timing or scope if the project costs change.

Transfer of Encampment Cleanup Contract to SPU

Expenditures	\$(1,313,229)
Revenues	\$(1,313,229)

This item transfers the funding used to support encampment clean up from FAS to Seattle Public Utilities. There are no service level impacts, and no overall change to City costs.

Technical Adjustments

Expenditures	\$(8,607,214)
Revenues	\$13,100,250
Position Allocation	1.00

This action reflects baseline and technical adjustments to several divisions. These increases include baseline updates, technical adjustments, and changes to inflation compared to the 2020 Adopted Budget.

Interdepartmental revenue to support the Human Capital Management (HCM) Project

Revenues	\$3,038,000
----------	-------------

This item recognizes revenue from Seattle IT (ITD) and Seattle Department of Human Resources (SDHR) to support the Human Capital Management (HCM) project. This project is a multi year project between SDHR and IT to overhaul the City's comprehensive human resources infrastructure. The project will be financed with LTGO bond proceeds, and this revenue will be used to support debt service payments from 2021 to 2023. This transfer contains a \$2.3 million transfer from ITD and a \$738,000 transfer from SDHR.

Department of Finance and Administrative Services

DON/BLM Lease Addition

Expenditures	\$360,000
Revenues	\$360,000

This item continues funding for space lease that was appropriated in the 2020 3rd quarter supplemental for space leased by the Department of Neighborhoods (DON) for use by Seattle King County Black Lives Matter in coordination with the City of Seattle and Seattle King County Public Health. The space is leased for the following phased purposes. 1) Direct services 2) Service coordination location 3) Potential night shelter/day resource and hygiene center.

2021 Revenues Update

Revenues	\$(5,230,309)
----------	---------------

This technical adjustment updates revenues charged to other departments for FAS services to 2021 amounts.

FAS "Out Year" Base CIP Adjustment

Expenditures	\$3,200,000
--------------	-------------

This technical CIP adjustment applies Council changes made during 2020 to the "out years" (2021-2025) of the CIP projects. This change reestablishes the budget from which the 2021-2026 Proposed CIP incremental changes are applied.

Transit Benefit Fund Adjustment

Expenditures	\$(2,117,000)
Revenues	\$(2,117,000)

This change reduces appropriations and revenues from 2021 baseline by \$2,117,000 in the Transit Benefit Fund (63000) to pay for employee transit benefits according to expected costs in 2021. This reduction is due to expected continuing reduced employee transit ridership into 2021 in response to COVID-19.

Cost of Issuance and Debt Service BCL Adjustments

Expenditures	\$3,908,724
--------------	-------------

This item adjusts the General Bond Interest Redemption Fund (BIRF) to reflect the actual debt service payments out of the BIRF for 2021. These changes are primarily driven by the Build America Bonds tax credit. This change request also trues up the cost of issuance out of the 2021 bond funds (Tax Exempt and Taxable) to reflect the updated issuance amounts. Refer to the individual department budget pages for more information on projects using debt financing.

FAS Fund Balancing Entries

Revenues	\$(7,602,688)
----------	---------------

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

FAS - BO-FA-WATERFRNT - Central Waterfront Improvement Program Financial Support

The purpose of the Central Waterfront Improvement Program Financial Support Budget Summary Level is to provide resources to the City Finance Division for the development of funding mechanisms for the Central Waterfront Improvement Program. This BSL is funded by the Central Waterfront Improvement Fund (Fund 35900).

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Central Waterfront Improvement	-	3,435,569	1,250,000
Prog-Central Waterfront Improv	1,547,298	-	-
Total	1,547,298	3,435,569	1,250,000
Full-time Equivalents Total*	3.00	3.00	3.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Central Waterfront Improvement Program Financial Support Budget Summary Level:

Central Waterfront Improvement

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Central Waterfront Improvement	-	3,435,569	1,250,000

Finance General

Ben Noble, Director

(206) 615-1962

<http://www.seattle.gov/financedepartment/>

Department Overview

Finance General is controlled by the City Budget Office and provides a mechanism for allocating General Fund and other central resources to reserve and bond redemption funds, City departments, and certain programs where the City Council, Mayor, or City Budget Office need additional oversight.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support			
General Fund Support	207,806,840	256,309,722	294,903,485
Other Funding - Operating	10,465,768	11,929,493	86,044,809
Total Operations	218,272,608	268,239,215	380,948,294
Total Appropriations	218,272,608	268,239,215	380,948,294

Budget Overview

Finance General serves as a central repository for ongoing City costs; including General Fund contributions to the operations of City departments, debt service payments made from centrally-managed Funds and contributions to outside organizations. It also provides a mechanism to hold appropriations temporarily until the City determines the appropriate managing department; to act as a contingency reserve to respond to unpredictable situations; and, to cover costs that vary with economic conditions.

In the 2021 Proposed Budget, Finance General is the mechanism to transfer General Fund resources to the below departments:

- Office of Arts and Culture;
- Seattle Public Library;
- Office of Labor Standards;
- Police Pension;
- Fire Pension;
- Finance and Administrative Services;
- Information Technology;

Finance General

Description of Incremental Budget Changes

Baseline

Adjustment for One-Time Budget Changes

Expenditures	\$(40,325,850)
Revenues	\$(28,642,267)

In Finance General, this adjustment reverses many one-time transfers and reserves which were established in the 2020 Adopted Budget by both the Mayor and the City Council. These are technical items which were never intended to carry into the 2021 Budget.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$(10,902,359)
--------------	----------------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process. In addition, Finance General includes changes to the Judgement and Claims rates. The 2021 Budget returns Finance General Judgement and Claims payments to 2019 levels due to reallocation of costs to departments, resulting in a large decrease for Finance General.

Proposed Operating

Equitable Communities Initiative

Expenditures	\$100,000,000
--------------	---------------

This funding is reserved for recommendations by a Community driven process, organized by a community task force planned to begin in the fall of 2020. The task force will focus on up-stream investments for Black, Indigenous, and people of color (BIPOC) communities to address disparities and make meaningful changes that can be measured by community progress. The task force will be comprised of BIPOC community leaders who will engage with community, with support from city departments.

The policy and investment recommendations will focus on:

- Building opportunity and an inclusive economy
- Community wealth building and preserving cultural spaces
- Climate justice and Green New Deal
- Community wellness and safety
- Other areas the task force and community determine should be prioritized

The task force will have broad latitude in setting the timetable, process and agenda for their work. However, it is contemplated that by December 2020 they will identify initial areas where community thinks investments should be prioritized. The task force, centered on community input, will also determine the research, data and technical advice they need in each of those areas to create desired outcomes in each area in the years to come.

The task force will not be making funding recommendations to specific organizations. The task force, based on technical support, legal requirements and desired outcomes may consider a range of funding mechanisms and programmatic structures, including participatory budgeting, grants, RFPs, and loans.

These funds are anticipated to be an ongoing, annual investment.

As decisions about allocations are reached, appropriations will be assigned as required by city law and procedures.

Finance General

Joint COVID-19 Relief Plan

Expenditures \$5,000,000

As part of the 2020 budget, the Mayor and City Council have invested \$233 million in COVID-19 relief programs. To further address community needs, an additional \$45 million will be invested from the City reserves and other funding sources, with approximately half appropriated in 2020 and the remainder in 2021. The investments will be distributed according to a spending plan, which includes assistance to small business, childcare, individuals experiencing homelessness or at risk of losing their home, people experiencing food insecurity, and immigrants and refugees.

In Finance General, \$5 million is included for 2021 to provide funding for testing costs incurred by various City departments in 2021, including facilities costs, staff time and supplies. Appropriations will be transferred from Finance General to departments once costs are incurred.

Insurance Premium Increase

Expenditures \$2,900,000

The item increases the appropriation for insurance premium payments made out of Finance General on behalf of the entire City. With this increment, the total 2021 Proposed Budget for insurance is \$9.8 million. This change is the result of significant increases in renewal of both property and liability insurance in 2020. In both cases a combination of external market factors and the City's recent claims history led to the increase.

Teleworking Stipend Reserve

Expenditures \$570,000

This item creates a reserve for a teleworking stipend which is being distributed to City of Seattle employees. This stipend is to ensure that the City is in compliance with the Wage Theft Ordinance. Funds will be distributed by departments to employees throughout the year and this reserve will be allocated to departments as reimbursement once final amounts are known.

Reduce High Barrier Reserve

Expenditures \$(362,500)

This change reduces the high barrier workgroup reserve. The 2020 Adopted Budget included \$762,500 in ongoing funding for operations of the West Wing facility at the King County Jail, rapid reentry and case conferencing pilots. The West Wing facility is not expected to begin operations until mid-2021, and funding for operations is not needed until that time. The reentry and case conferencing pilots were not initiated given the dynamic and evolving issues around criminal justice.

Proposed Technical

Revenue Update

Revenues \$126,082,919

This change reflects updates to baseline revenues from the August revenue forecast. Finance General includes revenue updates for the major General Fund sources (including the new payroll tax), the Short-Term Rental Tax Fund, the Sweetened Beverage Tax Fund, the Real Estate Excise Tax (REET) I and II Funds, the Emergency Fund and Revenue Stabilization Fund, Bond Funds, and the Cumulative Reserve Subfund-Unrestricted.

Finance General

Update Reserves for Recurring Expenses

Expenditures \$(8,806,738)

This item makes changes for updated cost projections and includes non-programmatic changes that represent the latest cost estimates for recurring expenses paid by the Finance General department. Included in this adjustment are projected payment increases for utility services funded by the General Fund (street lights and fire flow), transit pass subsidies for employees, General Fund disability claim reserves, and changes to several other small recurring payments. The large decrease in budget is due to removal of the Transportation Network Company reserve from Finance General to other departments.

Temporary Hiatus of Reserve Transfer

Expenditures \$(4,929,960)

Revenues \$(4,929,960)

This eliminates the budget for the transfer of General Fund resources to the Emergency Fund (10102) and the Revenue Stabilization Fund (00166). Due to the pandemic and recession, the 2021 budget includes the use of the Emergency Fund and the Revenue Stabilization Fund to supplement the General Fund. When the budget calls for a use of the Revenue Stabilization Fund, SMC 5.80.020 requires that the annual contribution to the Revenue Stabilization Fund be suspended. Emergency Fund contributions are governed by internal City Policy, which was recently amended to state "In the event that a severe or long-lasting event . . . leads to deep or multiple years of spending from the fund, the City shall make contributions to satisfy the target balance as soon as is practically possible."

Provide General Fund Support to Department Programs

Expenditures \$(4,756,309)

This item provides the resources needed to support department operations which receive General Fund through operating transfers, including Seattle IT, Finance and Administrative Services, the Office of Labor Standards, the Seattle Public Library, Police Relief and Pension, Firefighters' Pension, and the Office of Arts and Culture. The amount is a reflection of the General Fund savings from budget reductions taken by these departments.

Remove Seattle Storm Relocation Reserve

Expenditures \$(2,600,000)

This item removes the reserve for the Seattle Storm relocation from Finance General in 2021. The reserve is not needed beyond 2020 because the lease agreement signed by the Seattle Arena Company (ArenaCo) and the City of Seattle stipulates that responsibility for providing a venue for the Storm will have passed from the City to ArenaCo in 2021.

Reduce General Fund Support to FAS for Encampment Clean-Up

Expenditures \$(1,313,229)

In the 2021 Proposed Budget, the encampment clean-up function is transferred from the Department of Finance and Administrative Services (FAS) to Seattle Public Utilities. General Fund resources to support the program were provided to the FAS Fund via a transfer from Finance General. Because Seattle Public Utilities has the General Fund budget directly in the department, this transfer is no longer needed.

Finance General

Reduce General Fund Support to IT Department

Expenditures \$(750,000)

This one-time item removes \$750,000 of General Fund support in 2021 for the Digital Equity program in the Seattle Information Technology Department as it can now again be supported by Cable Franchise Fees in 2021. In 2020, due to anticipated declines in Cable Television Fund revenues, the General Fund replaced Cable Television Fund revenues. For 2021, however, Cable Television Fund revenues have been determined to be sufficient to cover this appropriation.

Increase Transfer to FAS for OEM Accounting and Administrative Support

Expenditures \$85,000

This item increases the General Fund transfer from Finance General to the Department of Finance and Administrative Services (FAS) to provide back office support for the new Office of Emergency Management and Seattle Emergency Communications Center. This is a technical change to appropriate General Fund resources for the transfer.

Adjust Debt Service Payments

Expenditures \$1,151,024

This adjusts Finance General debt service payments to reflect projected obligations for actual debt issuances. Included are debt service payments for Finance General from the General Fund, Real Estate Excise Tax (REET) I and REET II Funds, Short-Term Rental Tax Fund and the Cumulative Reserve Fund - Unrestricted.

Transfer REET II to Low Income Housing Fund

Expenditures \$5,000,000

The 2020 Adopted Budget directed the Office of Housing to commit \$25 million to Multifamily capital projects which would be reimbursed by Real Estate Excise Tax (REET) II revenues in the amount of \$5 million annually from 2021 through 2025. This item adds \$5 million of appropriations out of the REET II fund for the transfer to the Office of Housing.

Transfer Emergency Funds into General Fund for Joint COVID-19 Relief Plan

Expenditures \$20,750,000

Revenues \$20,750,000

As part of the 2020 budget, the Mayor and City Council have invested \$233 million in COVID-19 relief programs. To further address community needs, an additional \$45 million will be invested from the City reserves and other funding sources, with approximately half appropriated in 2020 and the remainder in 2021. The investments will be distributed according to a spending plan, which includes assistance to small business, childcare, individuals experiencing homelessness or at risk of losing their home, people experiencing food insecurity, and immigrants and refugees.

This appropriation allows for the transfer of Emergency Fund reserves into the General Fund to support departmental COVID-19 Relief efforts in 2021.

Fund Balancing Entry

Revenues \$(15,886,614)

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Finance General

Transfer Revenue Stabilization and Emergency Funds into General Fund

Expenditures	\$52,000,000
Revenues	\$52,000,000

This item increases appropriations out of the Emergency Fund (10102) and the Revenue Stabilization Fund (00166) and increases revenue to the General Fund to provide sufficient resources to fully balance the 2021 Proposed Budget.

Finance General

Appropriations by Budget Summary Level and Program

FG - BO-FG-2QA00 - Appropriation to Special Funds

The purpose of the Appropriation to Special Funds Budget Summary Level is to appropriate General Fund and other centrally managed resources, several of which are based upon the performance of certain City revenues, to bond redemption or special purpose funds. These appropriations are implemented as operating transfers to the funds or accounts they support.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Appropriation to Special Funds	180,211,171	183,761,018	235,787,335
Total	180,211,171	183,761,018	235,787,335

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

FG - BO-FG-2QD00 - General Purpose

The purpose of the General Purpose Budget Summary Level is to provide appropriation authority to those programs for which there is no single appropriate managing department, or for which there is Council and/or Mayor desire for additional budget oversight.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed

Seattle Department of Human Resources

Bobby Humes, Director

(206) 684-7999

<http://www.seattle.gov/personnel/>

Department Overview

The Seattle Department of Human Resources (SDHR) is responsible for centrally setting the strategic direction for human resources services: identifying, hiring, and retaining the City's dynamic, diverse workforce as well as developing and administering a compensation and benefits program to create a quality employee experience. SDHR also provides core human resources (HR) support services to all City employees. SDHR operations:

- create greater HR accountability and collaboration citywide so that consistent, cost-effective services are provided to all employees;
- provide full-service HR to 18 supported departments;
- manage the evolving HR alignment strategic plan;
- ensure a culture of respect and dignity for all employees;
- develop consistent policies, improved services, and programs that enhance the workforce;
- develop proactive workforce equity through our Workforce Equity Strategic Action Plan; and
- provide executive recruitment and succession planning services.

SDHR establishes Citywide personnel rules; offers strategic consultative assistance to departments, policymakers and employees; and ensures department staff and managers receive information and resources required to meet business needs and legal requirements such as leave administration.

The **Director's Office** establishes Citywide personnel rules; offers strategic consultative assistance to departments, policymakers and employees; provides internal fiscal management and budget development; and spearheads Citywide programs and efforts such as the Human Resources Strategic Plan and the Workforce Equity Initiative.

Citywide Shared Administrative Services administers Citywide quality and cost-effective employee benefits, including health care and workers' compensation; provides Citywide safety, classification/compensation and Workforce Analytics & Reporting services; manages the City's voluntary deferred compensation plan; and handles absence management.

Citywide Workforce Equity leads the Workforce Equity Strategic Plan and proactively addresses policies, processes and practices that advance the City's ability to maintain consistent and equitable treatment of employees Citywide. Partners include the Office for Civil Rights and the community to end racial disparities and create fair and equitable City career pathways.

Citywide Labor Relations develops and implements labor relations strategies in collaboration with labor management teams across the City, develops training in coordination with HR systems administration and operations while bargaining the impacts of management strategy and philosophy with labor partners.

Citywide Service Delivery and Talent Acquisition provides human resources support to executive offices; strategic alignment with department HR leaders and staff; and talent engagement, selection and staffing accountability for equitable outcomes.

Citywide HR Planning and Innovation is the strategy by which the Citywide HR workplan is developed by the multi-departmental Human Resources Leadership Team (HRLT) and focuses on projects intended to improve HR practices, standardize HR processes, implement Citywide HR programs, and update policies to meet workforce and business needs.

Seattle Department of Human Resources

Citywide Human Resources Investigations Unit responds to and thoroughly investigates employee allegations of harassment, discrimination, retaliation and harassment-related misconduct in a manner which reflects an acknowledgement of the historical limitations of the employment law.

Personnel Compensation Trust Funds

The Seattle Department of Human Resources (SDHR) administers five Personnel Compensation Trust Funds related to employee benefits. These funds are managed through Citywide contractual obligations on behalf of employees and City departments. The administering department collects funds from other City departments, which are then paid out to various insurance companies, service providers, and individuals.

Health Care Fund: contains the revenues and expenses related to the City's medical, dental and vision insurance programs; Flexible Spending Account program; Employee Assistance Program; COBRA continuation coverage; and other healthcare related items. The City is self-insured for both the Aetna and Kaiser medical plans, the vision plan, and one dental plan and carries insurance for the remaining dental plan.

Fire Fighters Health Care Fund: was created to track fire fighter employee contributions previously held within the larger Health Care Fund. Fire fighter premium collections are distributed directly to the trust that provides fire fighters' healthcare.

Industrial Insurance Fund: captures the revenues and expenditures associated with the City's Workers' Compensation and Safety programs. Since 1972, the City of Seattle has been a self-insured employer as authorized under state law. The Industrial Insurance Fund receives payments from City departments to pay for these costs and related administrative expenses. Overall costs include fees levied by the Washington State Department of Labor and Industries, reinsurance premiums, and administrative costs to manage the program.

Unemployment Insurance Fund: contains the revenues and expenditures associated with the City's unemployment benefit and administration costs. The City is a self-insured employer with respect to unemployment insurance.

Group Term Life Insurance Fund: contains the revenues and expenses related to the City's group term life insurance, long-term disability insurance, and accidental death and dismemberment insurance plans.

Budget Snapshot

Seattle Department of Human Resources

Budget Overview

The Seattle Department of Human Resources (SDHR) strives for a consistent, equitable employee experience at the City so that employees can do their best work. SDHR supports employee resources such as benefits and professional development, and department services such as employee relations and job classifications. SDHR provides full human resources (HR) services to most small and medium-sized departments. The City's larger departments employ their own HR staff. This structure has created the potential for varying levels of HR services and employee experiences across the City. The 2020 Adopted Budget highlighted the work of SDHR to continue to align the City's HR practices, creating strategic changes in workplace culture that would lead to the deepest impacts on workforce equity.

However, the City is projecting significant revenue losses due to COVID-19 and the resulting public health crisis. As a result, the budget includes reductions for most departments across the City. The 2021 Proposed Budget reduces SDHR's appropriation by 3.0 FTE over several programs, including:

Realignment of Resources to Match Changed Business Processes

In light of anticipated budget reductions, SDHR prioritized identifying efficiencies within and among its divisions to realign resources with newly changed businesses processes and workload. Changes in this category include systems improvements for both the Compensation and Classification Unit and Financial Services Unit and reducing duplication of Alternative Dispute Resolution services with the Office of the Employee Ombud, resulting in FTE changes.

Reduction in Coordination of Select Citywide Services

To minimize negative impact on core HR Services, SDHR is maintaining existing resources for such services and will instead end coordination or postpone implementation of various non-core Citywide services. Changes in this category include postponing the consolidation of Citywide leave administration; shifting City Service Award program coordination to departments; eliminating an unfunded vacant position to recognize the transition to a One HR strategy that will align City HR practices; and reducing the program operating budget for the City Leadership Academy, effectively ending the program.

Workforce Equity

To ensure the City's ability to maintain consistent and equitable treatment of all City employees, the 2021 Proposed Budget adds two half-time positions to the SDHR Workforce Equity unit to manage language premium policy development and implementation and Equal Employment Opportunity compliance.

Department Reorganization

The City plans to transfer and reimagine certain Seattle Police Department (SPD) functions within the department and to existing or newly created City departments. Although the number of City employees is not planned to increase, SDHR will have additional responsibility to directly support transferred employees in certain areas, and the 2021 Proposed Budget resources to support this work.

Several additional baseline and operational adjustments are included in the adopted budget, which:

- reduce appropriation for the department's non-labor operating budget, including subscriptions, consultant services, and operating supplies in several functional areas, primarily labor relations, service delivery, training, and talent acquisition;
- redistribute the 2020 lump-sum annual wage increase;
- adjust appropriation for changes to central costs including internal services, health care, retirement and workers' compensation charges; and
- adjust appropriation for 2020 one-time changes, including costs for a new system to streamline Occupational Safety and Health Administration (OSHA) reporting and term-limited temporary (TLT) costs.

Finally, the 2021 Proposed Budget includes net-zero technical adjustments for simplification and alignment of SDHR's budget. These adjustments include moving the software license fees budget into a newly created account, adding project detail to CBO and City Council change transactions, and the redistribution of the indirect

Seattle Department of Human Resources

project budget to improve SDHR's complex cost recovery.

Personnel Compensation Trust Funds

The following provides a summary of each of the five individual funds that comprise the Personnel Compensation Trust Funds and are administered by SDHR.

Health Care Fund: Total City health care costs including medical, dental and vision care are expected to increase to \$275.6 million in 2021. Growth in 2021 is expected to be somewhat muted relative to previous years at 4.5%, due to suppressed utilization in response to COVID-19.

The 2021 Proposed Budget assumes an estimate of 11,744 regular and 330 benefits-eligible temporary employees enrolled in healthcare.

Fire Fighters Health Care Fund: Firefighter payments remain level at \$2.0 million in the 2021 Proposed Budget.

Industrial Insurance Fund: The 2021 Proposed Budget assumes an increase in total expenditures of \$411,091 principally due to upward trends in medical and time-loss claims (5%), as well as costs associated with masks and other personal protective equipment (PPE) in the workplace.

Unemployment Insurance Fund: The 2021 Proposed Budget for unemployment assumes an increase from the 2020 Adopted Budget of \$2.6 million in expenses to a total of \$4.7 million. This increase is due to the continuing likelihood of diminished revenues and in anticipation of an increased number of claims into 2021.

Group Term Life Fund: Total costs in the fund are expected to remain at 2020 levels of approximately \$6.6 million in 2021. The City underwent a bid process with carriers in 2019 and 2020, which led to some reductions in rates for these employee insurance plans. The reductions mainly affect the premium costs of employees, as they pay the majority of the total cost. The reduction does, however, allow the City to keep its expected costs unchanged in 2021.

Incremental Budget Changes

Seattle Department of Human Resources

Description of Incremental Budget Changes

Baseline

Adjustment for One-Time Budget Changes

Expenditures	\$(2,191,006)
Revenues	\$(1,750,715)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget. Expenditure reductions include costs for a new system to streamline Occupational Safety and Health Administration (OSHA) reporting and term end of temporary positions costs. The revenue reduction reflects use of fund balance to cover higher-than-anticipated Citywide health care expenditures.

Citywide Adjustments for Standard Cost Changes

Expenditures	\$(791,228)
--------------	-------------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the

Seattle Department of Human Resources

department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures	\$189,881
--------------	-----------

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

Realignment of Compensation and Classification Unit Resources

Expenditures	\$(68,993)
Position Allocation	(0.50)

SDHR's Compensation and Classification Unit is in the process of replacing its high-touch, labor-intensive tracking system, as well as improving other internal processes. The resulting process efficiencies will reduce the current workload. This item reduces appropriation authority by \$68,993 to the HR Services BSL and has the following two actions: 1) reclassification of 1.0 FTE Personnel Analyst, Asst to 1.0 FTE Admin Spec II, and 2) reduction of the 1.0 FTE Admin Spec II to 0.5 FTE Admin Spec II. These changes align resources with changed business processes and workload and have minimal negative impacts to services to City departments.

Reorganization of Finance and Accounting Services Unit

Expenditures	\$(148,883)
Position Allocation	(1.00)

A new workers' compensation system came online in 2020, streamlining and automating several processes previously handled by the Seattle Department of Human Resources' internal Finance Services Unit. This item reduces appropriation authority by \$148,883 to the Leadership and Administration BSL and realigns accounting and finance resources to match changed business processes and workload. Specifically, this item 1) abrogates 1.0 FTE Senior Accountant in the Finance Services Unit and 2) reclassifies 1.0 FTE Manager 2 to 1.0 FTE Principal Accountant.

Reduction of Alternative Dispute Resolution Duplicative Function

Expenditures	\$(149,413)
Position Allocation	(1.00)

The recently created Office of the Employee Ombud (OEO) incorporates alternative dispute resolution (ADR) into its services to City employees. Specifically, OEO provides opportunities for City employees to receive coaching, mediation, or other conflict resolution assistance through its team of three ombuds and support staff. This item abrogates 1.0 FTE Strategic Advisor I in the Alternative Dispute Resolution unit in the Seattle Department of Human Resources, and reduces appropriation authority by \$132,487 to the HR Services BSL and by \$16,926 to the Leadership and Administration BSL to prevent duplication of services with OEO without adverse impact on City employees accessing such services.

Elimination of Citywide Leave Manager Position

Expenditures	\$(149,413)
--------------	-------------

Seattle Department of Human Resources

Position Allocation (1.00)

SDHR had begun work on strategies related to a centralized Citywide leave program due to inconsistencies in leave administration across City departments. A position was newly created in 2020, and the new body of work would have directed centralized leave program strategies. However, the pocket created to manage this program remains vacant. This item abrogates 1.0 FTE Manager 1, Exempt vacant pocket in the Seattle Department of Human Resources, and decreases appropriation authority by \$149,413 to the Leadership and Administration BSL. Moving forward, efforts will be made to standardize leave practices across the City.

Elimination of Continuous Service Award Program Coordination

Expenditures \$(100,163)

Position Allocation (1.00)

SDHR is authorized to establish and administer a City Service Award program for recognition of employees' completion of continuous years of service to the City; funding for these awards is included in each department's budget. SDHR currently provides this non-core service as an efficiency for departments. This item ends SDHR coordination by abrogating 1.0 FTE Personnel Analyst, and decreasing appropriation authority by \$83,237 to the HR Services BSL and by \$16,926 to the Leadership and Administration BSL. Departments will be asked to incorporate the continuous service awards into their internally managed employee recognition programs.

Abrogation of Unfunded Vacant Exec2 Pocket

Expenditures -

Position Allocation (1.00)

SDHR strives for a consistent, equitable employee experience at the City of Seattle. Towards this goal, SDHR developed the 2016 HR Consolidation Strategic Plan to move all HR positions under a single City HR department, which would have more than doubled the number of HR staff in the reorganized department. An unfunded Executive 2 pocket was added in the 2017 quarterly supplemental process to manage the consolidation. SDHR is now moving forward with a One HR strategy that will align City HR practices, but will not consolidate all HR personnel. This item abrogates the vacant, unfunded Executive 2 position.

Elimination of City Leadership Academy Program Budget

Expenditures \$(92,250)

Revenues \$(100,000)

In 2020, SDHR requested 1.0 FTE Program Coordinator position to manage, administer, and coordinate the City Leadership Academy program. The proposal was funded in the Mayor's Proposed budget, but Council eliminated the position for ongoing savings in the balancing package. SDHR does not have capacity to staff the program and cannot use the fee-supported program operating budget for another purpose, so the 2021 Proposed Budget removes this appropriation. Specifically, this item reduces appropriation authority by \$92,250 to the HR Services BSL and eliminates the non-labor operating budget for the City Leadership Academy program.

Reduction of Non-labor Operating Budget

Expenditures \$(265,206)

This item is a one-time reduction in appropriation authority of \$265,206 to the Leadership and Administration BSL, and reduces appropriation for subscriptions, consultant services, and operating supplies in several functional areas, primarily labor relations, service delivery, training, and talent acquisition.

Addition of Language Premium Pay Position (StratAdvsr1, Exempt)

Seattle Department of Human Resources

Expenditures	\$85,413
Position Allocation	0.50

The Collective Bargaining Agreements (CBA) between the City of Seattle and City employee unions included provision that effective December 25, 2019, Employees assigned to perform bilingual, interpretive and/or translation services for the City shall receive a \$200.00 per month premium pay. The City shall ensure employees providing language access services are independently evaluated and approved. The City may review the assignment annually and may terminate the assignment at any time. This item creates 0.5 FTE Strategic Advisor I pocket in the Workforce Equity division. This position will be responsible for guiding Citywide language premium policy development and implementation, including establishing and administering a centralized program to ensure transparent, consistent, and equitable application of language premium pay for employees assigned to perform bilingual, interpretive and/or translation services.

Addition of Equal Employment Opportunity Coordinator (StratAdvsr1,Exempt) and Software

Expenditures	\$115,413
Position Allocation	0.50

This item creates 0.5 FTE Strategic Advisor I pocket in the Workforce Equity division in the Seattle Department of Human Resources for Equal Employment Opportunity (EEO)/Affirmative Action Program work. This position will manage and ensure EEO compliance across all City departments, including reviewing and analyzing data to ensure communities of color are not disproportionately or adversely impacted by city employment, services, and programs. This increased appropriation also includes funding for the software required to meet mandated EEO requirements to retain eligibility for federal funding. A related 0.5 FTE pocket is proposed for the Office for Civil Rights, which will be responsible for coordinating and ensuring compliance with Title VI requirements across all City departments.

Addition of Service Delivery and Benefits Staff for Departmental Reorganization

Expenditures	\$227,326
Position Allocation	1.50

The City plans to transfer and reimagine certain Seattle Police Department (SPD) functions within the department and to existing or newly created City departments. Although the number of City employees is not planned to increase, SDHR will have additional responsibility to directly support transferred employees in certain areas. This items adds a 0.5 FTE Personnel Analyst to handle direct benefits assistance and 1.0 FTE StratAdvsr1,Exempt HR Business Partner to provide direct-facing HR support to employees.

Unemployment Insurance Adjustment

Expenditures	\$2,605,984
Revenues	\$2,605,984

This item increases appropriations \$2,605,984 in the Industrial Insurance fund to meet the expected increase in costs of unemployment insurance claims filings in 2021.

Health Care Fund Adjustment

Expenditures	\$11,919,926
Revenues	\$13,726,423

This item increases revenues and expenditures from 2021 baseline in the Health Care Fund (10112) to pay for employee medical, dental and vision claims costs, EAP services, and related administrative costs.

Proposed Technical

Seattle Department of Human Resources

Adjustment for One-time TLT Mid-2021 Sunset

Expenditures \$(68,301)

This item adjusts the 2021 labor budget for a term-limited temporary (TLT) position ending June 30, 2021. The 2019 Q2 supplemental added funding for 1.0 FTE Strategic Advisor 1 TLT beginning June 2019 and ending June 2021. A 2020 change added the full-year funding in 2020 to regular labor accounts instead of temporary labor. The 2021 labor budget is reduced to half-year, and the remaining six months' budget is transferred from regular labor accounts to temporary labor.

Updates to Department Vacancy Assumption

Expenditures \$(62,971)

This item updates the SDHR budget to reflect a 1% vacancy rate after budget changes and realignment since the 2018 Adopted budget.

Personnel Compensation Trust Funds Balancing Adjustments

Expenditures \$17,598

Revenues \$133,261

This is a technical item to balance revenues and expenditures for the Personnel Compensation Trust Funds managed by this department.

2021 Industrial Insurance Expenditure Adjustment

Expenditures \$411,091

This item increases expected expenditures for the Industrial Insurance (Workers Compensation) Fund due principally to upward trends in medical and time-loss claims (5%), as well as costs associated with masks and other personal protective equipment (PPE) in the workplace.

Redistribution of AWI Retro Lump-Sum

Expenditures \$554,000

This item redistributes the lump-sum \$554,000 for retroactive 2019 Annual Wage Increase, added to the 2020 budget by CBO in a project placeholder account. This amount is the baseline AWI adjustment. SDHR created the transactions at the project level – needed for accurate Central Cost Manual calculations – in lieu of the usual program-level CBO central adjustments. The transactions adjust 2020 labor to match the actual labor expenditures expected for each project, based on historical labor hour data.

Budget Authority for Fund Balance Transfer

Expenditures \$738,000

This item adds budget authority in the amount of \$738,000 to the Leadership & Administration BSL. This amount will be transferred to the Department for Finance & Administrative Services (FAS) for the Human Capital Management (HCM)/HRIS replacement project.

Intradepartmental Indirect Cost Balancing

Expenditures -

This item balances the intradepartmental indirect cost distribution from Citywide, department, and division indirect projects to the SDHR direct projects, per the City's standard complex indirect cost model for internal services

Seattle Department of Human Resources

departments.

Budget-Neutral Account Budget Alignment

Expenditures -

This item realigns budget in three areas: move medical benefits generated by Questica to the Pooled Benefits project where they are normally budgeted; move unused Director's Office budget into accounts that have no budget but ongoing expenditures, including shredding and other services; and move the software license fees budget in the Training Management and Talent Acquisition software purchases account into the newly created account 546070 Fees-Software License Renewal. These budget-neutral changes are needed to improve SDHR's ability to characterize, develop and monitor its budget.

Addition of Project Detail to CBO and Council Change Transactions

Expenditures -

The central budget system, Questica, allows changes at the program and account level. SDHR's budget system rolls up from the project/account level. Several changes by CBO and Council staff were entered at the program level for 2020, and any correction requires backing out the original line and re-entering it with the additional detail.

Reversal of Incorrect Autogenerated Transaction

Expenditures -

SDHR transferred \$404,000 budget for a planned information technology project to the program ITD would charge for the work. This net-zero budget alignment was marked one-time and was inadvertently automatically reversed in the budget system, throwing the budget out of balance. This item restores the original transaction.

Indirect Cost Balancing

Expenditures -

This item creates budget-neutral alignment transactions that balance intradepartmental indirect cost expenditure and cost recovery.

SDHR Allocation Revenue Updates

Revenues \$(1,002,233)

These items adjust the SDHR Allocation [HRAlloc] revenue to match the May 2021-2022 CCM estimates and separately call out an estimated reimbursement revenue from the City's Deferred Compensation administrator (currently Nationwide).

Appropriations by Budget Summary Level and Program

SDHR - BO-HR-GTL - GTL/LTD/AD&D Insurance Service

The purpose of the Group Term Life Budget Summary Level is to provide appropriation authority for the City's group term life insurance, long-term disability insurance, and accidental death and dismemberment insurance.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
GTL/LTD/AD&D Insurance	6,466,162	6,645,783	6,663,381
Total	6,466,162	6,645,783	6,663,381

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.*

SDHR - BO-HR-HEALTH - Health Care Services

The purpose of the Health Care Budget Summary Level is to provide for the City's medical, dental, and vision insurance programs; the Flexible Spending Account; the Employee Assistance Program; and COBRA continuation coverage costs.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Health Care Services	243,204,812	265,694,580	277,670,290
Total	243,204,812	265,694,580	277,670,290

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.*

SDHR - BO-HR-INDINS - Industrial Insurance Services

The purpose of the Industrial Insurance Budget Summary Level is to provide for medical, wage replacement, pension, and disability claims related to occupational injuries and illnesses, occupational medical monitoring, workplace safety programs, and related expenses.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Industrial Insurance Services	21,154,126	23,579,900	23,940,991
Total	21,154,126	23,579,900	23,940,991

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.*

Seattle Department of Human Resources

SDHR - BO-HR-N5000 - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to establish Citywide personnel rules and policies; provide consultative assistance to employees, departments, and policymakers; and lead Citywide programs and initiatives with the underlying objective of workforce equity. This Budget Summary Level also provides services that support City and SDHR department management, including financial and accounting services.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Citywide Indirect Costs	2,732,040	3,729,098	2,794,864
Departmental Indirect Costs	2,871,267	3,038,220	4,006,738

Seattle Information Technology Department

Saad Bashir, Chief Technology Officer

(206) 386-0026

<http://www.seattle.gov/seattleIT>

Department Overview

The Seattle Information Technology Department (Seattle IT) provides strategic direction for and management of the City's information technology resources. These include telecommunications, data, and supporting physical infrastructure; applications and application infrastructure; computer engineering and operations; data centers, servers, storage, and backup equipment; desktop, mobile, and printing devices; cloud services; digital engagement services; and the services to provide, maintain, and support the above for the City.

With a full view of the City's IT needs, Seattle IT looks for opportunities to consolidate multi-department IT requests into one Citywide project, identifies similar programs that can share a common platform, and considers where a department may already have a solution that another department could utilize.

Seattle IT is organized into 12 divisions: Frontline Digital Services; Digital Workplace; Business Applications; Platform Applications; Client Solutions; Executive Advisor; Service Modernization; Chief Privacy Officer; Digital Security & Risk; Technology Infrastructure; Chief of Staff; and Finance.

The **Frontline Digital Services** Division is accountable for day to day client support and services, including device and customer support, web support, and IT service management.

The **Digital Workplace** Division provides modern tools and technologies for the City. The division endeavors to find all the processes the City is using and improve them with digital tools.

The **Business Applications** Division provides development and support for applications that are specific to departments' business needs, including finance and human resources, public safety and dispatch, and utility systems.

The **Platform Applications** Division manages enterprise-wide software solutions including GIS, CRM, and Permitting. The division's support ranges from ongoing software maintenance to enhancements and special projects.

The **Client Solutions** Division strategically leads departments through technology service delivery. The division is a part of the Seattle IT Leadership Team and plays a vital role in service delivery to its business customers.

The **Executive Advisor** Division oversees several business-critical areas including the City's cable television franchises, providing affordable high-speed internet access to residents, businesses, and institutions. The division maintains regular information exchanges with government stakeholders and oversees the department's digital equity program.

The **Service Modernization** Division addresses new functionality and plans a modern approach to Best-in-Class digital service.

The **Chief Privacy Officer** Division provides structure and guidance essential for City departments to fully incorporate appropriate privacy practices into daily operations, and to build public trust and confidence in how we collect and manage the public's personal information.

The **Digital Security & Risk** Division balances safeguarding the City's assets, infrastructure, and the information entrusted to the City with the City's commitment to openness, transparency, equity, and innovation.

The **Technology Infrastructure** Division manages the back-end infrastructure of the organization.

Seattle Information Technology Department

The **Chief of Staff** Division provides the services that enable the successful operation of the department including corporate performance management, human resources, communications, and administrative services.

The **Finance** Division provides budget, accounting, contracting and purchasing services to the department.

As an internal service department, Seattle IT provides services to other City departments that in turn pay Seattle IT for the services they purchase. As such, Seattle IT receives revenue from most of the major fund sources within the City, including the General Fund, Seattle City Light, Seattle Public Utilities, Seattle Department of Transportation, Seattle Department of Construction and Inspections and the Retirement Fund. Seattle IT also receives funds from the City's Cable Television Fund, grants and other government agencies external to the City (e.g., Seattle Public Schools, the Port of Seattle) that buy Seattle IT services for special projects.

Cable Fund Overview

Beginning in 1996, the City of Seattle entered into cable franchise agreements that included a franchise fee as compensation for cable television providers locating in the public right-of-way. The City has approved franchises with CenturyLink, Comcast and Wave Division I.

The Cable Television Franchise Fund (created by Ordinance 118196) revenues come from the franchise fee collected from the agreements. Related expenditures are budgeted in Seattle IT and charged to the Cable Television Franchise Fund. Resolution 30379 establishes usage policies for the fund. The fund pays for the following services:

- administration of the Cable Customer Bill of Rights as well as the public, education, and government access costs the City is obligated to fund under the terms of its cable franchise agreements;
- support of the Seattle Channel, including both operations and capital equipment;
- programs and projects promoting technology literacy and access, including related research, analysis, and evaluation; and
- use of innovative and interactive technology, including television and online content, to provide ways for residents to access City services.

Seattle Information Technology Department

Budget Overview

Budget Efficiencies

The City is projecting significant revenue losses due to COVID-19 and the resulting public health crisis. As a result, the 2021 Proposed Budget includes reductions for most departments across the City, including Seattle IT. Seattle IT reviewed its budget to find reductions that would reduce client rates and maintain delivery of core services. The 2021 Proposed Budget includes:

- increasing the assumed employee vacancy rate for Seattle IT from 4% to 6%;
- plans to abrogate positions that are vacated due to retirement;
- changes to the client engagement model and print and batch processing services; and
- savings on consulting services and system maintenance.

Position Transfers

The 2021 Proposed Budget includes transfers of positions from Seattle IT to the Seattle Department of Construction and Inspections, Seattle Public Utilities and Finance and Administrative Services for work that was deemed to be operational technology best suited in the departments outside Seattle IT. Further details on these transfers are in the Incremental Budget Changes section.

Seattle IT Initiatives,

The 2021 Proposed Budget includes funding for Seattle IT to continue to provide core IT services, enhance its cyber security posture and implement new projects on behalf of the City. Two key changes to improve the delivery of IT services include additional staffing to increase capacity for Seattle IT's Security team and additional budget for cyber security insurance.

Cable Television Franchise Fund Budget Efficiencies

The Cable Television Franchise Fund receives revenues from cable television provider franchise fees. The 2021 Proposed Budget continues previous uses of the Cable Fund for programs such as the Seattle Channel, the Cable Customer Bill of Rights, initiatives that promote technology literacy and access, and technology that provides ways for residents to access City services.

Cable franchise fee revenues declined significantly from 2018 to 2019 and continued to decline in 2020. Seattle residents increasingly discontinue their cable television service in favor of internet-based streaming video services that are not subject to the City's regulatory structure. The 2021 Proposed Budget reflects reductions implemented in mid-2020 including ending contracted services for Public Access Television and the RecTech program at Seattle Parks and Recreation community centers. Seattle IT is closely monitoring quarterly franchise payments to determine if future reductions will be necessary.

Department Initiatives

Seattle IT's budget includes funding for two department-specific IT Initiatives projects: Seattle City Light IT Initiatives and Seattle Public Utilities IT Initiatives. These project funds are appropriated in both Seattle IT and in department budgets. These projects are shown in the Seattle IT budget book pages; however, the detail for these projects are included in the budget book sections for the individual departments. Please see the individual departments' budget book sections for more details.

Total Incremental Changes	\$(12,717,826)	(29.00)
----------------------------------	-----------------------	----------------

Total 2021 Proposed Budget	\$276,432,940	672.10
-----------------------------------	----------------------	---------------

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures	\$969,897
--------------	-----------

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Information Technology Department, Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Counts Change

Expenditures	\$1,131,509
Revenues	\$1,131,509

This baseline change updates the counts used in Seattle IT's various cost recovery methodologies to better reflect

Seattle Information Technology Department

current IT usage across the City. Note that the changes in dollars shown above represent the impact the counts change has on IT's share of these services and the change in revenue to recover its cost. The count changes are not changing the total cost of providing these services.

Adjustment for One-Time Budget Changes

Expenditures	\$(17,625,616)
Revenues	\$(17,625,616)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget. These include removing the budget for rebating the 2018 true-up as well as project funding for various department initiatives. The department initiatives include Seattle Department of Transportation Street Use project and Hansen Archiving project; Seattle Department of Construction and Inspections laptop purchases; Finance and Administrative Services Animal Shelter's Pet Point, CPIMS and risk management software; Seattle Department of Human Resources Customer Service project and CARATS replacement; and Department of Education and Early Learning Child Information and Provider System enhancements.

Realign Post-Rate Revenue Changes

Expenditures	\$7,328
Revenues	\$7,326

This baseline change updates budget and revenues to reflect changes made to Seattle IT's budget after customer rates were locked during the 2020 budgeting process.

Inflation

Expenditures	\$4,903,957
Revenues	\$4,903,957

This baseline change adjusts inflation factors as prescribed by the City Budget Office for the budget. It includes an add for 2021 coalition and non-represented annual wage increases.

Adjust IT Professional Wage Budget to Align with Wage Study Results

Expenditures	\$(1,154,143)
Revenues	\$(1,154,143)

This baseline change aligns the salary and benefits budget for Information Technology Professional staff with results of the ITP Wage Study that concluded in 2019. While individual salaries of staff increased, the total amount was less than what had been reserved in the budget.

Annual Maintenance Contract Realignment

Expenditures	\$(642,966)
Revenues	\$(642,966)

This baseline change realigns Seattle IT's funding for annual software maintenance contracts with the projected IT service needs for the 2021 budget. The reduction in total budget is the result of Seattle IT's portion of the cost of software maintenance changing and does not reflect a change in the need for total funding in this area. Seattle IT is a client of itself and collects revenues to cover its expenditures.

Seattle Information Technology Department

Central Cost Manual Baseline Adjustments

Expenditures	-
Revenues	-

This item makes a net zero technical adjustment to bring Seattle IT's baseline budget into alignment with the City's 2020 Adopted Central Cost Manual for certain centralized costs.

Ongoing Costs from 2020 Projects

Expenditures	\$1,683,211
Revenues	\$1,683,211

This baseline change adds budget for the ongoing costs for projects approved in the 2020 Adopted Budget for the Seattle Police Department Computer Aided Dispatch Replacement, Finance and Administrative Services FleetAnywhere, and Seattle Department of Human Resources Compensation Assignment Reporting and Tracking System.

Depreciation, Principal, Interest Realignment

Expenditures	\$(1,091,350)
Revenues	\$(1,091,350)

This baseline change adjusts the amount and distribution of Seattle IT's depreciation, principal and interest budget based on the debt service schedule and planned spending in the 2021 CIP. Major changes include the end of debt service on previous issuances for IT Service Management Tool project and Next Generation Data Center and the proposed issuance of bonds in 2021. The 2021 new bonds being issued fund both Computing Services Architecture and Data and Telephone Infrastructure.

Labor Realignment

Expenditures	\$(181,807)
Revenues	\$(181,807)

This baseline change realigns Seattle IT's existing FTEs with the area of IT service that their corresponding body of work is in the budget. The decrease in total budget is the result of changes to Seattle IT's cost of Seattle IT services and does not reflect a change in the number or cost of IT staff.

Baseline Technical Adjustments & Budget Clean Up

Expenditures	\$(291,771)
Revenues	\$(30,194,683)

This baseline change reflects a variety of technical changes to Seattle IT's 2021 budget. Major changes include removing unfunded appropriation where it is no longer needed and consolidating operating divisions' supply budget to an existing project in Leadership and Administration to allow for more efficient purchasing. This item also removes \$30.2 million of one-time funding from the 2020 Adopted Budget.

Seattle Information Technology Department

Proposed Operating

PeopleSoft Financial System Transfer

Expenditures	\$(4,146,029)
Revenues	\$(4,146,029)
Position Allocation	(9.00)

This item transfers positions working on PeopleSoft 9.2 and their corresponding budget authority to Finance and Administrative Services. This change includes the nine staff as well as ongoing support and maintenance budget for the project.

Transfer SDCI Accela Resource from Seattle IT to SDCI

Expenditures	\$(188,311)
Position Allocation	(1.00)

This action transfers ongoing budget and position authority for 1.0 FTE Information Technology Professional-A from Seattle Information Technology (Seattle IT) to the Seattle Department of Construction and Inspections (SDCI). This position has evolved to focus on the SDCI business side of Accela, rather than the IT side of Accela, and has a critical and in-depth knowledge of both sides. The position has been on loan to SDCI from Seattle IT since early 2018.

True Up Telecom Direct Bill Budget

Expenditures	\$1,187,179
Revenues	\$1,187,179

Over the past three years, the Telecom Direct Bill project has consistently exceeded its annual expenditure budget which resulted in Seattle IT requesting supplemental budget items to make sure it does not exceed its legal appropriation. The Telecom Direct Bill project includes the monthly charge to departments for wireless costs for cellphones. Occasionally, the project includes one-time charges for changes to the locations of the City's landlines. This item adjusts the baseline budget for the Telecom Direct Bill project to better align with the average amount of actual expenses incurred over the past two years.

Critical Security Needs

Expenditures	\$2,599,748
Revenues	\$2,599,748
Position Allocation	6.00

This item adds funding for three cybersecurity tools and platforms, along with the necessary staffing to maintain and strengthen the security posture of the City. They are:

- a security platform to prevent machine compromise and identify and respond to cyber-attacks
- a tool that automates the evaluation of City department security postures
- a security-segmentation technology that prevents the spread of breaches inside data center environments such as ransomware attacks

Seattle IT works under the principle of zero compromise on maintaining a secure cyber posture for the City of Seattle. Cyber-attacks targeting state and local municipalities are on the rise. As local governments adopt new technologies, cybersecurity has become urgent and necessary for the City to carry out its basic services and operations.

Seattle Information Technology Department

Cyber Security Liability Insurance

Expenditures	\$600,000
Revenues	\$600,000

This item adds funding for an annual cybersecurity insurance policy.

Cable: Eliminate Funding for Public Access Television Contract

Expenditures	\$(292,000)
Revenues	\$(292,000)

The City ended the contract for Public Access Television mid-year 2020 due to decreases in cable fund revenues and the need for cost reductions. This change eliminates \$292,000 in annual, ongoing funding for a Public Access Television Channel Manager program as operated under contract to Seattle Community College District VI, providing service as Seattle Community Media (SCM).

Cable: Eliminate Funding for RecTech

Expenditures	\$(180,000)
Revenues	\$(180,000)

The City ended the contract for RecTech programming at five Seattle Parks and Recreation community centers mid-year 2020 due to decreases in cable fund revenues and the need for cost reductions. This change eliminates \$180,000 in annual funding for the RecTech program as operated by the Associated Recreation Council on behalf of Seattle Parks and Recreation.

Increase Vacancy Rate by 2%

Expenditures	\$(2,296,363)
Revenues	\$(2,296,363)

This item increases the department's employee vacancy rate assumption in the budget from 4% to 6%. By adjusting the vacancy rate assumption, the reduction better aligns the 2021 budget with the expected vacancy rate.

New Client Engagement Model

Expenditures	\$(2,647,929)
Revenues	\$(2,647,929)
Position Allocation	(14.00)

Seattle IT's current business engagement follows a typical account management model, with a single point of contact for departments. In the era of resource constraints, Seattle IT will shift to a less intensive resource approach. The role of the Client Service Director will be eliminated, with IT managers and division directors owning the client relationships specific to their services. A smaller pool of client services advisors will remain to assist in triaging non-standard support requests. Seattle IT will direct customer requests to self-serve options when available.

Reduce Revenue Collection for Mobiles & Portables Radio Reserve

Expenditures	-
Revenues	\$(219,214)

This item reduces the revenue collection by Seattle IT for public safety mobile and portable devices. This revenue contributes to a reserve that funds the periodic replacement of radio equipment used by the Seattle Police Department and the Seattle Fire Department. Seattle IT anticipates the current reserve will be sufficient to cover the

Seattle Information Technology Department

cost of replacements and will not need to collect further revenues in the short term.

Retirement Driven Attrition

Expenditures	\$(6,629,000)
Revenues	\$(6,629,000)

This change reflects a reduction in budget to reflect an assumption that existing staff will retire or leave the organization in 2020 and 2021 and will not be replaced. Seattle IT will eliminate positions associated with this reduction in the 2022 budget.

Consulting and Annual Maintenance Efficiencies

Expenditures	\$(1,002,625)
Revenues	\$(1,002,625)

This item reduces Seattle IT's budget for consulting services by \$300,000 and annual maintenance costs by \$700,000 on an ongoing basis. Seattle IT found annual maintenance costs efficiencies by combing through maintenance contracts and records to determine which contracts are either no longer needed or could be reduced.

Eliminate Print and Batch Processing Services

Expenditures	\$(391,936)
Revenues	\$(391,936)
Position Allocation	(3.00)

Seattle IT will eliminate the Print Services and Batch Processing services from its core services and the three positions that work on this body of work will be eliminated. The demand for these services has decreased.

Emergency Medical Dispatch Maintenance Costs

Expenditures	\$180,000
Revenues	\$180,000

This item provides funding for the annual maintenance costs for the Seattle Fire Department's Emergency Medical Dispatch (EMD) program. The EMD is used daily by Fire Alarm Center dispatchers to quickly determine the nature of a 911 emergency to assist with the assignment of appropriate resources and level of response.

Finance and Administrative Services Budget System Replacement

Expenditures	\$500,000
--------------	-----------

This item adds expenditure authority to Seattle IT to transfer \$500,000 from Seattle IT's fund balance to Finance and Administrative Services (FAS) to replace its current budget system and ensure FAS budget and rate development is on time, accurate and compliant with PeopleSoft 9.2.

Seattle Public Utilities CIP Technical Adjustment

Expenditures	\$1,000,000
Revenues	\$1,000,000

This item increases appropriation authority in the Applications BSL budget to align with the anticipated Seattle Public Utilities' CIP budget for technology projects in 2021.

Seattle Information Technology Department

Seattle City Light CIP Technical Adjustment

Expenditures	\$13,206,882
Revenues	\$13,206,882

This item increases appropriation authority in the Applications BSL budget to align with the anticipated Seattle City Light's CIP budget for technology projects in 2021.

Proposed Capital

Eliminate Telephones Hardware CIP

Expenditures	\$(237,341)
--------------	-------------

This item eliminates the legacy "Telephone Hardware" project. This CIP project has been the source of legacy telephone system hardware replacement budget. The legacy system is being replaced with the Unified Communication system, and the "Telecom Redesign" CIP project budget will support the ongoing needs of Unified Communications.

Technical Adjustments to IT CIP

Expenditures	\$(1,700,000)
Revenues	\$(1,700,000)

This proposal includes three changes to Seattle IT's capital program. The first transfers \$1,700,000 in Human Capital Management (HCM) Scoping Study funding from Seattle IT to FAS. The second changes the way that Seattle IT projects revenues for annual fiber network maintenance work so that City departments can better plan for billable costs. The third realigns the funding adopted in the Next Generation Data Center capital project to where spending is planned in Seattle IT's CIP budget.

Proposed Technical

Balancing Technical Item

Revenues	\$4,027,679
----------	-------------

This is a technical item to balance revenues and expenditures for the Funds managed by this department.

Cable Fund Technical Adjustment

Expenditures	\$(172,210)
Revenues	\$(172,210)

This item adjusts the Cable Television Franchise Fee Fund (10101) budget to reflect changes in the use of Franchise Fee revenue. This change reflects budget changes as well as changes in methodologies that impact Cable-funded projects and shared services.

Adjust Capital Projects CIP revenues

Expenditures	-
Revenues	\$36,005,880

This technical item adds projected rate and bond revenue for the 2021 Proposed CIP Budget.

Seattle Information Technology Department

Adjust Capital Projects Operating Changes

Expenditures	\$(2,098)
Revenues	\$(309,898)

This technical item adjusts Seattle IT's budget to reflect incremental changes to the revenue collected for CIP projects. The expenditure change corrects an issue with operating lines that were added to the CIP in the 2020 budget.

Changes to Seattle IT's Allocated Funding Methodologies

Expenditures	\$16,312
Revenues	\$16,312

This technical change represents the impact some methodology changes have on IT's share of these services and the change in cost used to recover that. The methodology changes are not changing the total cost of providing these services.

Citywide Adjustments Central Cost Manual-Questica Balancing

Expenditures	\$(37,674)
--------------	------------

This item shifts the Citywide Central Cost Manual adjustments completed centrally to better align with where the related expenses are assigned in Seattle IT's budget and corrects the total to align with the amounts in the Central Cost Manual.

IT Count Clean Up

Expenditures	\$4,650
Revenues	\$4,650

This technical change represents adjustments made to Seattle IT's counts after the baseline count update occurred. The change in expenditures represent the impact the count changes have on IT's share of these services and the additional revenue needed to recover that. The count changes are not changing the total cost of providing these services.

IT Structure Clean Up

Expenditures	-
Revenues	\$(4,907)

This is a technical change in Seattle IT's budget that does not affect customers. It represents the consolidation of portions of Seattle IT's budget into two budget programs.

All the Business Advancement Team (BAT) projects are consolidated into the existing BAT-Client Solutions project. This change streamlines the process for staff and makes coding more transparent for management.

Most projects in the Leadership and Administration BSL are consolidated into a new budget program called Departmental Indirect Costs. City Wide Accounting requested Seattle IT update its administrative structure to be like other City departments.

Operating Impacts of Telephone Hardware CIP Elimination

Expenditures	-
Revenues	\$(237,341)

Seattle Information Technology Department

This change reflects the impact of eliminating telephone hardware CIP on operating revenues.

Updated Inflation Factors

Expenditures	\$(1,691,240)
Revenues	\$(1,691,240)

This change updates inflation with the revised inflation factors provided by CBO for the 2021 fiscal year.

Additional Inflation Changes

Expenditures	\$723,173
--------------	-----------

This change updates Seattle IT's personnel budget with the final, revised inflation factors provided by the City Budget Office for this budget cycle. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Operating Technical Adjustments

Expenditures	\$(200,459)
Revenues	\$263,547

This item represents two technical adjustments for Seattle IT. The first realigns the debt service amongst various operating projects because of the CIP realignment. The second represents the impacts of other 2021 Proposed Budget items on Seattle IT's indirect cost model.

SPU Department Position Transfers

Expenditures	\$(928,803)
Revenues	\$(928,802)
Position Allocation	(7.00)

This technical change reflects the transfer of seven Information Technology Professional positions to Seattle Public Utilities (SPU) in the 2020 3rd Quarter Supplemental Budget Ordinance. These positions perform work now deemed operational to SPU.

Position Realignment

Position Allocation	(1.00)
---------------------	--------

This item includes two Seattle IT position realignments that have no funding impacts. The first is for a net decrease of 2.0 FTE to align Seattle IT's budgeted FTE count with the Human Resources Information System (HRIS). The second adds position authority for 1.0 regular FTE and combines two existing 0.5 FTE positions into a single position to support the City's Privacy and eDiscovery programs. The two positions will support the City with Surveillance Ordinance compliance.

Finance and Administrative Services Funding Transfer for Human Capital Management Project

Expenditures	\$2,300,000
--------------	-------------

This item adds the legal budget necessary to transfer \$2.3 million in IT Fund Balance to Finance and Administrative Services to support the citywide Human Capital Management (HCM) project.

Seattle Information Technology Department

Seattle Information Technology Department

Appropriations by Budget Summary Level and Program

ITD - BC-IT-C0700 - Capital Improvement Projects

The Capital Improvement Projects Budget Summary Level provides support for citywide or department-specific IT projects and initiatives within Seattle IT's Capital Improvement Program (CIP).

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Application Services CIP	-	13,453,310	11,679,600
Citywide IT Initiatives CIP	-	79,280	-
Communications CIP	-	8,843,131	12,875,262
Customer Support Services CIP	-	1	-
Enterprise Compute Services CIP	-	2,092,069	7,484,983
Fiber Enterprise Initiatives CIP	-	4,244,846	4,356,485
Programmatic Initiatives CIP	-	2,300,000	-
Radio Communications CIP	-	686,981	705,049

Security CIP	-	-	-
Total	-	32,027,746	37,438,137

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Capital Improvement Projects Budget Summary Level:

Application Services CIP

This budget program contains Capital Improvement Program (CIP) funding associated with developing, implementing and enhancing various software applications used by City departments.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Application Services CIP	-	13,453,310	11,679,600

Citywide IT Initiatives CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with a portfolio of capital IT initiatives. Projects in this program may support multiple departments.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Citywide IT Initiatives CIP	-	79,280	-

Seattle Information Technology Department

Communications CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with ongoing design, acquisition, replacement and upgrading of software, infrastructure and major hardware for the City's data, communications and telephonic systems which may include switches, and or connectivity infrastructure.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Communications CIP	-	8,843,131	12,875,262

Customer Support Services CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the acquisition, replacement, and upgrading of software and hardware in the computing and customer support environments.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Customer Support Services CIP	-	1	-

Enterprise Compute Services CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement, and upgrading of server and storage systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Enterprise Compute Services CIP	-	2,092,069	7,484,983

Fiber Enterprise Initiatives CIP

This budget program (formerly Technology Engineering & Project Management CIP) contains the Capital Improvement Program (CIP) funding associated with major maintenance and installation of a high-speed fiber-optic communication network for the City and its external fiber partners.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Fiber Enterprise Initiatives CIP	-	4,244,846	4,356,485

Programmatic Initiatives CIP

This budget program contains the Capital Improvement Program (CIP) funding for one-time Seattle IT Programmatic Initiatives including the acquisition and development of a new data center, the remodeling of Seattle IT space in the Seattle Municipal Tower, and the acquisition of new technology management tools.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Programmatic Initiatives CIP	-	2,300,000	-

Seattle Information Technology Department

Radio Communications CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of software and hardware for the City of Seattle's portion of the King County Regional 800 MHz radio system.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Radio Communications CIP	-	686,981	705,049

Seattle Channel CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of the cablecasting and production systems for the Seattle Channel.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Seattle Channel CIP	-	328,130	336,759

Security CIP

This budget program contains the Capital Improvement Program (CIP) funding associated with the ongoing acquisition, replacement and upgrading of software and hardware for the City's IT security systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Security CIP	-	-	-

Seattle Information Technology Department

ITD - BC-IT-C7000 - Capital Improvement Projects

The Capital Improvement Projects Budget Summary Level provides support for citywide or department-specific IT projects and initiatives within Seattle IT's Capital Improvement Program (CIP).

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Application Services CIP	14,123,948	-	-
Citywide IT Initiatives CIP	115,070	-	-
Customer Support Services CIP	458,329	-	-
Enterprise Compute Svcs CIP	3,530,553	-	-

ITD - BO-IT-C1000 - Cable Television Franchise Fund

The purpose of the Cable Fee Support to Information Technology Fund Budget Control Level is to authorize the transfer of resources from the Cable Television Franchise Fund to the Seattle Information Technology Department's Information Technology Fund. These resources are used by the department for a variety of programs consistent with Resolution 30379.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Cable Franchise for Info Tech	9,517,368	-	-
Cable Franchise for Library	642,000	-	-
Total	10,159,368	-	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Cable Television Franchise Fund Budget Summary Level:

Cable Franchise for Info Tech

The purpose of the Cable Fee Support to Information Technology Fund Budget Control Level is to

Seattle Information Technology Department

authorize the transfer of resources from the Cable Television Franchise Fund to the Seattle Information Technology Department's Information Technology Fund. These resources are used by the department for a variety of programs consistent with Resolution 30379.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Cable Franchise for Info Tech	9,517,368	-	-

Cable Franchise for Library

The purpose of the Cable Fee Support to Library Fund Budget Control Level is to authorize the transfer of resources from the Cable Television Franchise Fund to the Seattle Public Library's Operating Fund. The Library uses these resources to pay for and maintain computers available to the public.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Cable Franchise for Library	642,000	-	-

ITD - BO-IT-D0100 - Leadership and Administration

The Leadership and Administration Budget Summary Level provides executive, community, financial, human resource, and business support to Seattle IT.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Chief of Staff	-	12,800,867	-
Chief Privacy Office	-	647,286	-
Citywide Indirect Costs	-	14,125,862	6,850,652
CTO / Executive Team	-	3,761,220	-
Departmental Indirect Costs	-	-	18,306,629
Executive Advisor	-	1,763,268	-
Pooled Benefits and PTO	-	(180,120)	(28,468)
Total	-	32,918,383	25,128,813
Full-time Equivalents Total*	-	84.00	82.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Chief of Staff

This budget program contains the funding associated with the leadership and accountability of core administrative support to ITD's divisions. These efforts include the oversight of ITD's talent, workforce planning and training, communications, finance, corporate performance, and organizational change management.

Seattle Information Technology Department

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Chief of Staff	-	12,800,867	-
Full Time Equivalents Total	-	60.00	-

Chief Privacy Office

This budget program provides oversight and guidance required for City Departments to incorporate appropriate privacy and surveillance ordinance compliance practices into City operations with the objective of building public trust and confidence in how we collect and manage the public's personal information.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Chief Privacy Office	-	647,286	-
Full Time Equivalents Total	-	2.00	-

Citywide Indirect Costs

This budget program contains the funding associated with the various overhead costs charged to Seattle IT, including budget and expenses that have been allocated from other City departments.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Citywide Indirect Costs	-	14,125,862	6,850,652

CTO / Executive Team

This budget program contains the funding associated with the Chief Technology Officer (CTO) and the Seattle IT Executive Team. The CTO sets technology standards and strategies to ensure the City's technology investments are used efficiently and effectively.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
CTO / Executive Team	-	3,761,220	-
Full Time Equivalents Total	-	13.00	-

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department including executive, financial, communications, human resources, business support, and strategic planning and analysis services. It also includes the costs for the City's Privacy and Surveillance program.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Departmental Indirect Costs	-	-	18,306,629
Full Time Equivalents Total	-	-	82.00

Seattle Information Technology Department

Executive Advisor

This budget program contains funding for key administrative support functions including process improvement, governance, interdepartmental service delivery, support for ITD's Racial Social Justice Initiative and community focused technology strategies.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Executive Advisor	-	1,763,268	-
Full Time Equivalents Total	-	9.00	-

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs for Seattle IT staff.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Pooled Benefits and PTO	-	(180,120)	(28,468)

ITD - BO-IT-D0200 - Cable Franchise

The purpose of the Cable Fee Support to Information Technology Fund Budget Control Level is to authorize the transfer of resources from the Cable Television Franchise Fund to the Seattle Information Technology Department's Information Technology Fund. These resources are used by the department for a variety of programs consistent with Resolution 30379.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed

Total	-	7,343,268	7,171,058

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Information Technology Department

ITD - BO-IT-D0300 - Technology Infrastructure

The Technology Infrastructure Budget Summary Level develops, maintains, and manages core IT services including communications and data networks, data center and cloud computing infrastructure, and database systems.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Business Advancement Team	-	200,958	-
Communications Infrastructure	-	9,191,555	7,620,877
Database Systems	-	2,016,207	2,488,442
Enterprise Services	-	2,661,847	2,786,474
Infrastructure Tools	-	3,631,904	4,112,705
Network Operations	-	7,971,567	7,295,173
Radio Management	-	2,511,996	2,565,811
Systems Engineering	-	5,955,058	3,215,297
Telephone Engineering	-	5,492,778	6,095,207
Windows Systems	-	8,993,659	7,872,163
Total	-	48,627,531	44,052,149
Full-time Equivalents Total*	-	106.10	111.25

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Technology Infrastructure Budget Summary Level:

Business Advancement Team

This budget program contains funding to support project planning and delivery support for ITD operating projects. This program includes business analysts and project managers.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Business Advancement Team	-	200,958	-
Full Time Equivalents Total	-	1.10	-

Communications Infrastructure

This budget program contains funding to provide data center services as well as costs for major moves, additions, or changes to communication network infrastructure.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Communications Infrastructure	-	9,191,555	7,620,877
Full Time Equivalents Total	-	4.80	2.00

Seattle Information Technology Department

Database Systems

This budget program contains funding associated with maintenance and direct labor costs for database administrators and data architecture. This includes installing and upgrading database structures, controlling and monitoring access to databases, and backing up and restoring databases.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Database Systems	-	2,016,207	2,488,442
Full Time Equivalents Total	-	12.00	11.75

Enterprise Services

This budget program contains the funding associated with Seattle IT's messaging support and identity management services.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Enterprise Services	-	2,661,847	2,786,474
Full Time Equivalents Total	-	8.00	11.00

Infrastructure Tools

This budget program contains funding for major system controls, switches and components to support the technology infrastructure system operations.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Infrastructure Tools	-	3,631,904	4,112,705
Full Time Equivalents Total	-	5.00	11.20

Network Operations

This budget program contains funding for the design, operations, and maintenance of the City's fiber optic, wireless, and data networks, including City's internet access.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Network Operations	-	7,971,567	7,295,173
Full Time Equivalents Total	-	17.20	17.80

Radio Management

This budget program contains funding for maintenance of the City's emergency radio and dispatch systems including radios, pagers, and radio towers, base stations microwave and the fiber network for all the City's radio operations. The program also provides radio programming, installation and maintenance to City Departments and external partners.

Seattle Information Technology Department

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Radio Management	-	2,511,996	2,565,811
Full Time Equivalents Total	-	10.00	11.00

Systems Engineering

This budget program contains funding associated with core computing services Seattle IT provides its customers, including the backup, recovery, and storage of customer data.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Systems Engineering	-	5,955,058	3,215,297
Full Time Equivalents Total	-	12.00	5.00

Telephone Engineering

This budget program contains funding for the design, maintenance and operations of the City's consolidated telephone systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Telephone Engineering	-	5,492,778	6,095,207
Full Time Equivalents Total	-	14.00	14.10

Windows Systems

This budget program contains funding associated with the centralized hosting, management and support of Windows applications.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Windows Systems	-	8,993,659	7,872,163
Full Time Equivalents Total	-	22.00	27.40

Seattle Information Technology Department

ITD - BO-IT-D0400 - Frontline Services and Workplace

The Frontline Services and Workplace Budget Summary Level develops, maintains, and manages all client support services, including incident resolution, end-user equipment and software deployment, device maintenance, operating system configuration and management, digital tools that enable everyday work, public-facing communications software development, and support. This Budget Summary Level also includes the Seattle Channel as the public-facing entity of the department and the Broadband and Community Technology programs.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Community Technology and Broadband	-	1,856,004	1,264,200
Digital Workplace	-	11,901,778	12,340,264
Frontline Digital Services	-	29,178,874	27,091,542
Total	-	42,936,657	40,696,005
Full-time Equivalents Total*	-	186.76	168.26

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Frontline Services and Workplace Budget Summary Level:

Community Technology and Broadband

This budget program contains the funding associated with the Community Technology Services team and the Technology Matching Fund. The Technology Matching Fund provides grants to community-based organizations for projects centered on improving digital equity.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Community Technology and Broadband	-	1,856,004	1,264,200
Full Time Equivalents Total	-	5.50	5.50

Digital Workplace

This budget program contains funding to enable digital tools and capabilities for the City's workforce including SharePoint, Office 365 Collaboration, Windows Enterprise, Process Automation, eDiscovery, and Mobility.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Digital Workplace	-	11,901,778	12,340,264
Full Time Equivalents Total	-	42.04	27.54

Frontline Digital Services

This budget program contains funding to develop, maintain, and manage client support services,

Seattle Information Technology Department

including incident resolution, end-user equipment and software deployment, device maintenance, operating system configuration and management, digital tools that enable everyday work, and public-facing communications software development and support. Major services include Seattle Channel, Solutions Desk, Desktop Support, IT Asset Management, Computer Lifecycle and IT Service Management.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Frontline Digital Services	-	29,178,874	27,091,542
Full Time Equivalents Total	-	139.22	135.22

ITD - BO-IT-D0500 - Digital Security & Risk

The Digital Security and Risk Budget Summary Level provides security and risk mitigation services for the City's computing environments, and develops, applies, and monitors compliance with technology policies and procedures. This Budget Summary Level also includes the department's Emergency Management team.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
Digital Security & Risk	-	5,299,398	8,448,605
Total	-	5,299,398	8,448,605
Full-time Equivalents Total*	-	15.00	19.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D0600 - Applications

The Applications Services Budget Summary Level designs, develops, and supports application solutions for both individual business and enterprise platform needs. In addition, it advances several IT functions, practices, and services such as vendor management, enterprise architecture, automation, quality assurance and analytics.

Program Expenditures	2019	2020	2021
	Actuals	Adopted	Proposed
Business Applications	-	28,262,642	23,302,474
Department Initiatives	-	49,098,474	55,887,219
Platform Applications	-	18,129,322	17,662,168
Service Modernization	-	11,388,399	11,568,526
Total	-	106,878,836	108,420,387
Full-time Equivalents Total*	-	279.18	274.53

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Seattle Information Technology Department

The following information summarizes the programs in Applications Budget Summary Level:

Business Applications

This budget program contains funding to design, develop, support application solutions that are focused towards individual business needs, in accordance with Citywide architecture and governance. Major business applications include Financial, HRIS, Police & Fire, Customer Care Billing (Utility), and Work Order Asset Management Systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Business Applications	-	28,262,642	23,302,474
Full Time Equivalents Total	-	71.67	63.89

Department Initiatives

This budget program contains funding to citywide or department-specific IT projects and initiatives that are outside the scope of Seattle ITD's Capital Improvement Program (CIP).

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Department Initiatives	-	49,098,474	55,887,219
Full Time Equivalents Total	-	48.97	84.39

Platform Applications

This budget program contains funding to design, develop, and support solutions for enterprise platform applications and middleware in accordance with Citywide architecture and governance. Major platform applications include GIS & CADD, Permitting, and Customer Relationship Management systems.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Platform Applications	-	18,129,322	17,662,168
Full Time Equivalents Total	-	99.54	79.70

Service Modernization

This budget program contains funding to mature and advance essential IT functions, practices and services including vendor management, enterprise architecture, quality assurance, and business intelligence and analytics.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Service Modernization	-	11,388,399	11,568,526
Full Time Equivalents Total	-	59.00	46.55

Seattle Information Technology Department

ITD - BO-IT-D0800 - Client Solutions

The Client Solutions Budget Summary Level provides account management and support for Seattle IT customers, which includes services that build and mature relationships, support and facilitate strategic planning, guide technology learning and decisions through customer innovation labs, establish standards for Project Management and Business Analysis services for all IT projects, facilitate IT project intake analysis, and support consistent communication and customer service practices across all customer-facing divisions.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Client Solutions	-	5,771,525	5,077,785
Total	-	5,771,525	5,077,785
Full-time Equivalents Total*	-	30.06	17.06

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

ITD - BO-IT-D1000 - Leadership and Administration

The Leadership and Administration Budget Summary Level provides executive management, strategic planning, governance, finance, budget, accounting, human resources, performance management, administrative, contracting, and project oversight services.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Business Office	8,890,016	-	-
Citywide Indirect Costs	25,856,464	-	-
CTO / Executive Team	3,954,537	-	-
Indirect Cost Recovery Offset	(4,433,751)	-	-
Pooled Benefits and PTO	709,312	-	-
Strategy & Planning	1,824,825	-	-
Total	36,801,403	-	-
Full-time Equivalents Total*	70.50	-	-

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Business Office

This budget program contains the funding associated with the core finance and administrative functions of Seattle IT, including human resources, accounting, budget, finance, communications, performance management, contracting and purchasing services in support of Seattle IT.

Seattle Information Technology Department

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Business Office	8,890,016	-	-
Full Time Equivalents Total	41.50	-	-

Citywide Indirect Costs

This budget program contains the funding associated with the various overhead costs charged to Seattle IT, including budget and expenses that have been allocated from other City departments.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Citywide Indirect Costs	25,856,464	-	-

CTO / Executive Team

This budget program contains the funding associated with the Chief Technology Officer (CTO) and the Seattle IT Executive Team. The CTO sets technology standards and strategies to ensure the City's technology investments are used efficiently and effectively.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
CTO / Executive Team	3,954,537	-	-
Full Time Equivalents Total	18.00	-	-

Indirect Cost Recovery Offset

This budget program is used for the indirect cost recovery of Citywide and Departmental indirect costs incurred by Seattle IT.

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Indirect Cost Recovery Offset	(4,433,751)	-	-

Pooled Benefits and PTO

This budget program contains the funding associated with employee leave, time off, and benefit-related costs for Workers' Compensation, healthcare and other centrally distributed benefit costs.

Office of Intergovernmental Relations

Lily Wilson-Codega, Director

(206) 684-0213

<http://www.seattle.gov/oir>

Department Overview

The Office of Intergovernmental Relations (OIR) provides advice and information to, and on behalf of, City elected officials, City departments, and external partners. The primary goal of these efforts is to ensure the City's interests are advanced with regional, state, federal, tribal, and international entities to enable the City to better serve the Seattle community.

OIR is also responsible for engaging with other jurisdictions and governmental entities to collaborate and advocate for outcomes that are in the interest of the City and region. OIR implements and manages lobbying contracts and ensures the City's lobbying resources align with the City's strategic advocacy priorities.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed

Full-Time Equivalents Total*	10.00	10.00	9.00

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here.*

Budget Overview

The City is projecting significant revenue losses due to COVID-19 and the resulting public health crisis. As a result, the budget includes reductions for most departments across the City. The 2021 Proposed Budget reduces the OIR budget by about \$180,000, a 6% cut. This includes partially reducing the dues paid to the Association of Washington Cities, partially reducing the state lobbyist contract budget, and fully reducing funding for travel and conferences. The details of the changes to OIR's budget are included in the Incremental Budget Changes section below.

The 2021 Proposed Budget also provides for technical adjustments in the baseline budget, reflecting changes to internal services costs and agreements with the Coalition of Unions.

Office of Intergovernmental Relations

Incremental Budget Changes

Office of Intergovernmental Relations

	2021 Budget	FTE
Total 2020 Adopted Budget	2,990,574	10.00
Baseline		
Citywide Adjustments for Standard Cost Changes	2,121	-
Baseline Adjustments for Personnel Costs	3,747	-
Proposed Operating		
Association of Washington Cities Membership Reduction	(57,500)	-
State Lobbying Contract Reduction	(118,000)	-
Travel and Conference Reduction	(10,000)	-
Proposed Technical		
Q2 2020 Ongoing Item Reconciliation	-	(1.00)
Total Incremental Changes	\$(179,632)	(1.00)
Total 2021 Proposed Budget	\$2,810,942	9.00

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$2,121

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$3,747

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Office of Intergovernmental Relations

Proposed Operating

Association of Washington Cities Membership Reduction

Expenditures \$(57,500)

This item is a one-time reduction in appropriation authority of \$57,500 for a 50% reduction of 2021 Membership Dues to the Association of Washington Cities (AWC). A 50% reduction in the City's budget for dues to the AWC will reduce the advocacy, information, and coordination services and support AWC provides.

State Lobbying Contract Reduction

Expenditures \$(118,000)

This item is a one-time reduction in appropriation authority of \$118,000 for the reduction of state lobbying contracts. This includes reductions to three state lobbying contracts achieved through cost sharing, as well as adjustments to amounts paid to state lobbying contracts.

Travel and Conference Reduction

Expenditures \$(10,000)

This item is a one-time reduction in appropriation authority of \$10,000 to reduce the 2021 travel and conference budget. This reduction will limit the department's ability to travel with and staff the mayor at the US Conference of Mayors (USCM) events.

Proposed Technical

Q2 2020 Ongoing Item Reconciliation

Position Allocation (1.00)

This item reconciles a 2020 Q2 Supplemental change that reduces 1.0 FTE in the Office of Intergovernmental Relations to facilitate the transfer of the position to the Seattle Department of Transportation (SDOT). This position is an ongoing permanent position and will be funded primarily through multiple capital projects.

Legislative Department

M. Lorena González, Council President

(206) 684-8888 TTY: (206) 233-0025

<http://www.seattle.gov/council/>

Department Overview

The Legislative Department is comprised of the Seattle City Council, as well as two primary divisions: Central Staff and the Office of the City Clerk. Each division supports various aspects of the Council and works with members of the public and City departments to facilitate and develop effective and responsive public policy. The Council and Legislative Department are part of the legislative branch of government, which also includes the Office of City Auditor, the Office of Hearing Examiner, and the Office of Inspector General for Public Safety.

The Council is composed of two at-large and seven district-elected seats for a total of nine, nonpartisan, elected Councilmembers. In November 2019, seven district Councilmembers were elected to a four-year term beginning in 2020. Two at-large Councilmembers are elected to align with the election for a four-year term with the Mayor and City Attorney election in 2021. This approach staggers the district and at-large elections two years apart.

The City Council establishes city laws; creates, evaluates and approves policies, legislation, and regulations; approves the City's annual operating and capital improvement budgets; and provides oversight to the City's executive departments. Each Councilmember has a staff of legislative assistants who assist in this work.

Central Staff provides policy and budget analysis for Councilmembers and their staffs, as well as consultant contract services for the Legislative Department. The Office of the City Clerk advances principles of open government and inclusive access through effective facilitation of the legislative process and transparent, accountable stewardship of public information and the official record, including City Council proceedings and legislation. The City Clerk serves as ex-officio elections administrator and filing officer. The office manages the City's Boards and Commissions Registry Program; coordinates public records disclosure requests; and provides information technology, administrative and operational support to the Legislative Department.

Communications and Human Resources/Finance teams are also a part of the Legislative Department. Communications staff assist Councilmembers and the Council as a whole in communicating values, goals and issues to the public by providing marketing and public relations services, including website and social media management, strategic media relations and public affairs work. Human Resources/Finance staff provide employee relations, talent acquisition, employee development, performance management, benefits administration services, finance, budget, accounting, and payroll for the Legislative Department and Office of City Auditor.

Budget Snapshot

Legislative Department

Budget Overview

The 2021 Proposed Budget includes technical adjustments to bring the department's baseline budget into alignment with an Annual Wage Increase, internal service cost changes, and the removal of one-time items added in prior year budgets. In addition, the proposed budget reduces the total budget for the Legislative Department by 5% in response to declining General Fund revenues due to COVID-19.

Incremental Budget Changes

Legislative Department

	Dollars	FTE
2020 Adopted Budget	17,818,425	100.50
Adjustment for One-Time Budget Changes	(300,712)	-
Citywide Adjustments for Standard Cost Changes	1,013,939	-

Proposed Operating		
5% General Fund Reduction	(879,921)	-
Total Incremental Changes	\$213,359	-
Total 2021 Proposed Budget	\$18,031,784	100.50

Description of Incremental Budget Changes

Adjustment for One-Time Budget Changes

Expenditures \$(300,712)

This item includes budget adjustments for one-time changes in the 2020 Adopted Budget:

- (\$120,000) for an analysis of the Law Enforcement Assisted Diversion (LEAD) Program added in 2020 Council Budget Action LEG-7-A-1;
- (\$100,000) to study creation of an Infant/Parent Room added in 2020 Council Budget Action LEG-5-A-1;
- (\$40,712) to remove funding added by Council in the 2019-2020 Adopted Budget for criminal legal system planning; and
- (\$40,000) to align with a Memorandum of Agreement with the Law Department for a Code Reviser

Citywide Adjustments for Standard Cost Changes

Expenditures \$1,013,939

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the

Legislative Department

department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$380,053

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022.

Proposed Operating

5% General Fund Reduction

Expenditures \$(879,921)

This item reduces the Legislative Department's budget by 5% to help mitigate losses in the General Fund due to the COVID-19 pandemic.

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Legislative Department Budget Summary Level:

Central Staff

The purpose of the Central Staff Program is to provide high-quality, objective research and analysis to the Council and its individual members on a variety of policy and budget issues, as well as consultant contract services for the Legislative department.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Central Staff	3,373,709	3,995,483	3,560,685
Full Time Equivalents Total	19.00	19.00	19.00

City Clerk

The purpose of the City Clerk Program is to support and facilitate the City's legislative process in compliance with the Open Public Meetings Act; manage the City's Records Management Program and ensure public access to the City's records; preserve the City's official and historical records in compliance with the Public Records Acts; manage the City's Boards and Commissions Registry; serve as the City's ex officio elections officer; and provide information technology, administrative and operational support to the Legislative Department.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
City Clerk	3,703,148	3,924,261	3,821,245
Full Time Equivalents Total	27.50	27.50	27.50

Legislative Department

City Council

The purpose of the City Council Program is to set policy; review, consider and determine legislative action; approve the City's budget; and provide oversight of City departments. The goal of the City Council is to be transparent, effective and accountable, as well as to promote diversity and health of all neighborhoods. This program consists of the nine Councilmembers, their Legislative Assistants and the Communications staff.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
City Council	5,770,245	6,121,142	5,953,620
Full Time Equivalents Total	49.00	49.00	49.00

LEG - BO-LG-G2000 - Leadership and Administration

The purpose of the Leadership and Administration Budget Summary Level is to provide executive, community, financial, human resource, technology and business support to the department.

Program Expenditures	2019 Actuals	2020 Adopted	2021 Proposed
Citywide Indirect Costs	2,735,431	2,513,454	2,897,642
Departmental Indirect Costs	1,052,243	1,264,085	1,798,592
Total	3,787,675	3,777,539	4,696,234
Full-time Equivalents Total*	5.00	5.00	5.00

**FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

The following information summarizes the programs in Leadership and Administration Budget Summary Level:

Citywide Indirect Costs

The purpose of the Citywide Indirect Costs program is to fund internal services costs originating from outside of the department such as allocated costs from the Department of Finance and Administrative Services and Seattle Information Technology Department.

Expenditures/FTE	2019 Actuals	2020 Adopted	2021 Proposed
Citywide Indirect Costs	2,735,431	2,513,454	2,897,642

Departmental Indirect Costs

The purpose of the Departmental Indirect Costs program is to fund costs associated with management of the department. This may include personnel costs related to department leadership and administration or other administrative costs such as external rent and operating supplies or services.

Legislative Department

	2019	2020	2021
Expenditures/FTE	Actuals	Adopted	Proposed
Departmental Indirect Costs	1,052,243	1,264,085	1,798,592
Full Time Equivalents Total	5.00	5.00	5.00

Office of the Mayor

Jenny A. Durkan, Mayor

(206) 684-4000

<http://www.seattle.gov/mayor/>

Department Overview

The Office of the Mayor works to provide leadership to the residents, employees, and regional neighbors of the City of Seattle and to create an environment that encourages ideas, civic discourse, and inclusion for the City's entire diverse population.

In the municipality of Seattle, the Mayor governs the Executive Branch as its chief executive officer. The many legal roles and responsibilities of the Mayor, and those working directly for the Mayor, are prescribed in the City Charter, state statutes and municipal ordinances. Elections for this nonpartisan office are held every four years.

Budget Snapshot

	2019 Actuals	2020 Adopted	2021 Proposed
Department Support			
General Fund Support	6,898,240	7,706,715	7,440,359
Total Operations	6,898,240	7,706,715	7,440,359
Total Appropriations	6,898,240	7,706,715	7,440,359

Full-Time Equivalents Total*	37.50	39.50	39.50
------------------------------	-------	-------	-------

** FTE totals are provided for informational purposes only. Changes in FTEs resulting from City Council or Human Resources Director actions outside of the budget process may not be detailed here*

Budget Overview

The 2021 Proposed Budget decreases the Office of the Mayor's budget by \$266,356. The office's personnel budget is reduced by \$244,500, and revenue is gained by the Mayor donating her salary to the City. The rest of the change is related to Citywide changes and personnel costs.

Incremental Budget Changes

Office of the Mayor

	2021 Budget	FTE
Total 2020 Adopted Budget	7,706,715	39.50
Baseline		
Citywide Adjustments for Standard Cost Changes	(76,307)	-

Office of the Mayor

Baseline Adjustments for Personnel Costs	52,484	-
Proposed Operating		
5% Reduction in General Fund reliance in the Mayor's Office budget	(242,533)	-
Total Incremental Changes	\$(266,356)	-
Total 2021 Proposed Budget	\$7,440,359	39.50

Description of Incremental Budget Changes

Baseline

Citywide Adjustments for Standard Cost Changes

Expenditures \$(76,307)

Citywide technical adjustments made in the baseline phase reflect changes to internal services costs, including rates from the Department of Finance & Administrative Services, Seattle Information Technology Department, Seattle Department of Human Resources, and for healthcare, retirement and industrial insurance charges for the department. These adjustments reflect initial assumptions about these costs and inflators early in the budget process.

Baseline Adjustments for Personnel Costs

Expenditures \$52,484

This centrally administered change adjusts appropriations to reflect an annual wage increase, as outlined in the agreements between the City and the Coalition of Unions, for personnel costs included in this department's baseline budget. This includes increases to salary, FICA, Medicare, family medical leave, retirement, overtime and temporary labor. There is no increase assumed from 2021 to 2022. This does not include a 2021 salary increase for non-represented Executives, Managers and Strategic Advisors.

Proposed Operating

5% Reduction in General Fund reliance in the Mayor's Office budget

Expenditures \$(242,533)

Revenues \$142,803

In response to adverse economic impacts from the COVID-19 pandemic, the City requested departments to reduce their reliance on General Fund resources in order to preserve critical public funding. The Mayor's Office met the 5% reduction target with the Mayor donating back her salary to the City, and reducing the office's personnel budget by \$242,500.

Office of the Mayor

⁽¹⁾ "Revenues from Current Year legislated ordinances" and "2020 Supplemental Changes" include the following Council Bills: 119820 "CBO 2019 Carryforward", 119859 "OSE Heating Oil Tax Amendment", 119757 "CBO Small Business Supplemental", 119760 "CBO Small Business Supplemental 2", 119764 "CBO Food Voucher Supplemental", 119783 "CBO Emergency Supplemental No. 1", 119816 "CBO 2020 Commerce Grant", 119818 "CBO Q2 Supplemental", and 119824 "CBO 2020 Federal CRF Funds". CB 119825 (Ord 126148) is not included due to the timing of the 9/22/2020 veto override, which occurred after the finalization of the 2021 Proposed Budget. Additionally, "2020 Supplemental Changes" includes assumptions about future legislation, including the 3rd and 4th Quarter supplementals, Joint COVID Relief, and 2020 Balancing actions planned in lieu of CB 119825.

⁽²⁾ 2019 Actual and 2020 Adopted expenditures have been recast to reflect a realignment of department groupings as displayed in the 2021 Proposed budget book. For departments that receive General Fund (GF) transfers from Finance General (FG), the GF amount is shown in the department receiving the transfer instead of FG. These departments include: the Office of Labor Standards, Firefighters' Pension, Police Pension, Seattle Public Library and Finance & Administrative Services.

⁽³⁾ 2023 and 2024 expenditures reflect 2.3% and 2.0% inflation of labor costs, respectively. Expenditures relevant only to 2021 or 2022 are removed.

⁽⁴⁾ Emergency and Revenue Stabilization Fund contributions would normally roll up under "Administration" but are called out separately for visibility.

¹In 2018-2019, the Sweetened Beverage Tax was deposited in the General Fund and recorded as a Funding Source. City departments hold expenditure authority in the General Fund through 2019. In 2020, per Ordinance 125886, all SBT revenues and appropriations have moved to a new Sweetened Beverage Tax Fund.

²2022-2024 expenditure projections are net one-time 2021 expenditures and assume across-the-board 2% growth. Direct benefit investments and grant funds are not automatically adjusted for inflation.

³The Sweetened Beverage Tax ordinance calls for "up to" \$1.5 million to be set aside for worker retraining by 2022. An allocation for this amount is shown as a planning reserve starting in 2022.

⁴Reserve targets may exceed projected fund balance due to underspend assumptions.

Assumptions:

¹Revenue projections reflect a continuing decline in Franchise Fee and associated PEG revenues and assumes CenturyLink franchise fee or PEG revenues end after 2020.

²Revenues came from Comcast grants for the Digital Equity Initiative in FY 2016-2019. 2019 includes \$40,000 for one-time fees for CenturyLink "Center closure fee" related to closing CenturyLink's Seattle Service Center. 2019 is the final year for all of these funds.

³This represents the transfer from ITD Fund 50410. The refunds from FY 2018 and 2019 are the final numbers. The refund shown for FY 2020 is preliminary, based on planned underspending.

⁴The Cable Fund borrowed \$600,000 from Fund 50410 effective at year-end 2019 and another \$700,000 at the beginning of 2020. The interfund loan funds are not true revenue.

⁵Repayment of the loan from Fund 50410 is planned for year-end 2020.

Footnotes

(1) 2020 Revised Department Contributions are reduced \$3.5 million to reflect the intention of the Mayor to use City controlled Health Care Fund claims reserve balance to meet these required contributions.

(2) Healthcare claims costs increase at a significantly greater rate than most other costs in our economy. We have assumed 6.5% annual growth for this financial plan in 2023 and 2024. Departmental contributions are assumed to grow at the same rate.

(3) 2020 Revised Healthcare Claims assume an estimated \$12 million decrease. Due to COVID-19 employees are deferring or otherwise not pursuing various procedures or care.

Footnotes for 2021 Proposed Budget

The 2021 Proposed Budget transfers \$6,420,480 of Park Fund revenues and expenditures into a technical COVID-19 Planning Program; this results in an artificial inflation of SPR's total revenues and expenditures in this financial plan. This technical transfer has been called out in a separate row, allowing the source of funds and BSLs to correctly reflect anticipated revenue losses due to the COVID-19 pandemic and corresponding reductions/underspend in 2021.

The 2021 Proposed Budget renames the Cost Center M&R BSL to Park and Facilities Maintenance, eliminates the Park & Open Space BSL, and moves the Seattle Conservation Corps BSL into Departmentwide Programs.

¹SPR received \$2,040,000 GF backed by the Coronavirus Relief Fund (CRF) to help fund increased expenses associated with the Social Distance Ambassador program; these funds will offset Park Fund expenditures. This excess appropriation will lapse at year-end.

The outyears of the financial plan do not make any assumptions regarding increases to SPR's fees and charges. Once the City emerges from the Covid-19 pandemic, SPR will assess its fees & charges to consider inflationary and/or other changes.

Footnotes:

¹ In 2019, KeyArena Fund (11420) was merged into Seattle Center Fund (11410). The 2019 beginning fund balance reflects the two funds' combined balance.

² Seattle Center took a conservative approach to outyear expense projections (2.5% instead of 2%) to ensure that repaying the interfund loan would be possible.

Notes:

Expenditures for OPCD and HSD are aligned with Ordinance 125872, which does not adjust for inflation.

Expenditures for debt service are aligned with current debt service payment schedule.

EDI expenditures were supported by an additional \$1.9 million of General Fund in 2020 and an additional \$3.14 million of General Fund in 2021.

Footnotes:

1 There is uncertainty regarding the impact COVID-19 may have on delinquency rates for property tax payments, or that the deadlines for first or second half property tax payments may be extended beyond their traditional collection windows, thereby impacting Library revenue recognition.

Footnotes for the 2021 Proposed Budget

Negative fund balance reflects a cash advance within the Park District to pay back a 2015 Interfund Loan against the Park and Recreation Fund and to fund the development of Smith Cove Park in 2018. Please see the Park District Spending Plan for details on these loans and timing of fund replenishment. Also note that the 2021 Proposed Budget includes a one-time pause on this annual repayment to cover increased costs in 2021 due to inflationary increases; this is to minimize impact on property tax increases.

The first cycle of the Park District ended in 2020 (2015-2020). Due to the COVID-19 pandemic, development of the next cycle (2021-2026) was delayed by one year. 2021 property taxes will be held to 2020 collection levels plus inflation. SPR will begin development of the next cycle of the Park District Financial Plan in 2021 for 2022-2027. Numbers for the 2022-2024 outyears are for illustrative purposes only.

Footnotes for 2021 Proposed Budget

¹In the 2020 Adopted Budget, the City Council transferred ongoing King County Levy funding from the Fix it First BSL in SPR's capital budget to provide additional shower services at community centers (\$244,000) and to replace General Fund that had previously supported the Recreation Facilities Program (\$500,000). SPR proposes replenishing funding to the CIP beginning in 2022 should the King County Levy provide additional funding (as forecasted).

Notes:

¹ 2019 beginning fund balance is the cash balance on January 1, 2019.

² 2019 actual revenues do not include fair market value (non-cash) or RSA surcharge revenues and will differ from total revenues in Peoplesoft.

³ 2020 legislated encumbrances and carryforwards are spread throughout various expenditure categories.

⁴ Out year assumptions represent forecasted cash flows in the utility's Financial Planning Model that is used to evaluate City Light rate impacts, potential bond offerings, and the overall financial performance of the utility.

Footnotes for CBO Only - Provide notes to explain changes

¹ SPU will not show revised amounts due to changes not being legislated before submittal.

² SPU would prefer not to show capital carryforwards currently captured in PeopleSoft. Capital budgeting is annual, most carryforward is abandoned. Due to process delays this year, abandonments will not happen before 4Q.

³ SPU will capture AWI carryforwards and operating reductions as legislated in the financial plans included with the Adopted Budget Book.

Footnotes for the 2019-2020 Proposed Budget Book - These notes will be printed in the 6-year Financial Plans in the 2019-2020 Proposed Budget

¹ "Source of Funds Total" includes transfer from the Construction Fund. Revenue Total in Proposed Budget pages includes construction fund transfers within the "Use of Fund Balance" account.

² Technical adjustments reflect largely non-budgetary adjustments to capture timing differences between when revenues are anticipated and when they are received. This line can also reflect non-cash basis adjustments like donated capital assets.

Footnotes for CBO Only - Provide notes to explain changes

1 SPU will not show revised amounts due to changes not being legislated before submittal.

2 SPU would prefer not to show capital carryforwards currently captured in PeopleSoft. Capital budgeting is annual, most carryforward is abandoned. Due to process delays this year, abandonments will not happen before 4Q.

3 SPU will capture AWI carryforwards and operating reductions as legislated in the financial plans included with the Adopted Budget Book.

Footnotes for the 2019-2020 Proposed Budget Book - These notes will be printed in the 6-year Financial Plans in the 2019-2020 Proposed Budget

¹ Source of Funds Total: Figure shown here includes Transfers From Construction Fund, reimbursements from King County, WIFIA, and Public Works Transfer Fund. Revenue total in Proposed Budget section captures all these reimbursements and transfers under "Use of Fund Balance."

² Technical adjustments reflect largely non-budgetary adjustments to capture timing differences between when revenues are anticipated and when they are received. This line can also reflect non-cash basis adjustments like donated capital assets.

Assumptions:

¹ Rates Allocated: Revenue collected from customers through allocations (i.e., ITD bills customers based on budget).

² Rates Direct Billed: Revenue collected from customers through direct billing (i.e., ITD bills customers based on actual expenses).

³ Rates Direct Billed (2019 CIP Carryforward Items): Unspent CIP budget, carried forward from FY 2019 to FY 2020, that will be direct billed to customers (i.e., ITD bills customers based on actual expenses).

⁴ Rates Direct Billed (2019 Operating Carryforward Items): Unspent operating budget, carried forward from FY 2019 to FY 2020, that will be direct billed to customers (i.e., ITD bills customers based on actual expenses).

⁵ Billable Project Revenues: Double budget appropriation for IT Project Management resources that are not assigned to specific Projects.

⁶ Bond Proceeds: Revenue received from City of Seattle General Obligation (GO) bond issuances.

⁷ ITD's Cost of Technology Consumption: ITD's consumption of ITD projects and services. Represents intra-fund (50410) revenue.

⁸ Non-City Agency Revenues: Revenue collected from Agencies outside of the City of Seattle (e.g., King County).

⁹ Interest Earnings: Revenue from the interest earned on ITD's cash balance. Interest calculation: 10-year average interest rate (1.3%) times the average of beginning and

¹⁰ Revenue True-Up for 2019: Underspending in FY 2019 allocated projects that will be transferred to the major funds in FY 2020.

¹¹ Q3 Supplemental includes CIP Abandonment.

¹² Q4 Supplemental includes one-time ITD projects.

¹³ Continuing Appropriation and Encumbrances: Includes the allocated revenues collected in FY 2019 for CIP (excluding PC-IT-C7050 'Radio Communications CIP'), Encumbrances, and Special Carryforward budgets.

¹⁴ Computer Replacement (Law Department): This reserve consists of the rates ITD collects from the Law Department each year for PC replacements. Unlike other Departments, the Law Department replaces all PCs once every five years, versus a portion each year.

¹⁵ Reserves for One-Time Projects include (\$7,100,000) for various one-time ITD projects and (\$2,800,000) to transfer funding for Human Capital Management and Budget System projects for Finance and Administrative Services (FAS).

¹⁶ Transfer of SDCI Accela Resource: anticipated revenue rebate for the transfer of an SDCI Accela resource from ITD to SDCI without associated revenues, as submitted in Change Request, 2021-22 ITD-130 Transfer SDCI Accela Resource.

¹⁷ Expenditures in the out years are reflecting the real debt service schedule in the out years instead of inflating 2%.

Cost Allocation Tables:

These tables provide information about how the City allocates internal service costs (i.e. overhead provided by City agencies to other City agencies) to customer agencies.

Cost Allocation

Central Service Departments and Commissions - 2020 Cost Allocation Factors

Central Service Department	Cost Allocation Factor
City Auditor	Audit hours spent on direct department projects averaged over prior two-year period.
City Budget Office	Percent of FTE time spent on cost allocation departments/funds.
Civil Service Commission	Five-year average number of cases by department.
Office of Civil Rights	Enforcement: 3-year average number of cases filed by department. RSJI: Percent of Department Trainings Policy: 100% General Fund
Office of Employee Ombud	Budgeted FTE by department.
Office of Intergovernmental Relations	Staff time and assignments by department.
Office of Sustainability and Environment	Management assessment of FTE time on work programs.
Department of Finance and Administrative Services	Various factors and allocations. See Appendix B(1) for details on services, rates, and methodologies.
Seattle Information Technology	Various factors and allocations. See Appendix B(2) for details on services, rates, and methodologies.
Law Department	Two-year average of civil attorney and paralegal service hours by department (excludes hours that are covered by direct billing via MOAs), including proportionate amount of overhead.
Legislative Department	City Clerk's Office based on number of Legislative items; Central Staff and Legislative Assistants on assignments; City Council 100% General Fund or by MOA* and City Clerk based on workload.
Seattle Department of Human Resources	Various factors and allocations. See Appendix B(3) for details on services, factors, and methodologies.
State Examiner (State Auditor)	75% by PeopleSoft data points; 25% by budgeted FTEs.
Emergency Management	Actual expenditure dollar spread.

1.66	Office of Housing	16400 - Low Income Housing Fund	Low Income Home Energy Assistance Program 2020-2021 (10/1/2020-9/30/2021)	Department of Commerce grant provides funding for program administration and delivery of weatherization services to provide cost-effective energy efficiency, and health and safety benefits to eligible low-income households in both single and multi-family dwelling units in the City of Seattle.	650,000

Item	Department	Fund	Grant/Service Contract Title	Description	2021 Budget
1.67	Office of Housing	16400 - Low Income Housing Fund	MatchMaker 2019-2021 Grant (7/1/2019-6/30/2021)	Department of Commerce grant provides funding to improve the energy efficiency and health & safety of dwellings owned or occupied by eligible low-income persons/participants in both single and multi-family buildings in the city of Seattle. Grant also provides funds for administration and delivery of weatherization services, repair services, and to perform Plus Health activities.	650,000
1.68	Office of Housing	16600 - Office of Housing Fund	MatchMaker 2019-2021 Grant (7/1/2019-6/30/2021)	Department of Commerce grant provides funding to improve the energy efficiency and health & safety of dwellings owned or occupied by eligible low-income persons/participants in both single and multi-family buildings in the city of Seattle. Grant also provides funds for administration and delivery of weatherization services, repair services, and to perform Plus Health activities.	152,566
1.69	Office of Housing	16400 - Low Income Housing Fund	Seattle City Light 2021 Funding (1/1/2021-12/31/2021)	Funding for program administration and delivery of weatherization and repair services to improve energy efficiency, and provide health and safety benefits for Eligible Low-Income Persons/Participants in areas served by Seattle City Light in both single and multi-family buildings.	1,707,000
1.70	Office of Housing	16600 - Office of Housing Fund	Seattle City Light 2021 Funding (1/1/2021-12/31/2021)	Funding for program administration and delivery of weatherization and repair services to improve energy efficiency, and provide health and safety benefits for Eligible Low-Income Persons/Participants in areas served by Seattle City Light in both single and multi-family buildings.	565,546
1.71	Office of Immigrant and Refugee Affairs	00100 - General Fund	Community Development Block Grant	HUD grant that funds local community development activities with the stated goal of providing affordable housing, anti-poverty programs, and infrastructure development.	650,200
1.72	Office of Planning and Community Development	00100 - General Fund	Community Development Block Grant	HUD grant that funds local community development activities with the stated goal of providing affordable housing, anti-poverty programs, and infrastructure development.	430,000
1.73	Seattle Department of Transportation	13000 - Transportation Fund	Delridge to Burien RapidRide Line 2017-2021	RMG funding to help construct a new RapidRide route serving the Delridge Way corridor in Seattle and Burien. Project components include real-time information signs, bus benches, shelters, trash facilities, pedestrian-scale lighting, and off-board fare payment.	2,899,658

Item	Department	Fund	Grant/Service Contract Title	Description	2021 Budget
1.74	Seattle Department of Transportation	13000 - Transportation Fund	Fairview Avenue E 2017-2021	TIB funding to support replacing the existing Fairview Bridges with a single new bridge which includes wider travel lanes, pedestrian walkway, a protected two-way bicycle lane and improved lighting, landscaping and signage.	469,952
1.75	Seattle Department of Transportation	13000 - Transportation Fund	South Lander Street Grade Separation Project 2017-2021	FMSIB funding to support construction of the S Lander St Grade Separation, which will cross over BNSF mainline tracks between 1st Ave S and 4th Ave S.	351,918
1.76	Seattle Department of Transportation	13000 - Transportation Fund	South Lander Grade Separation and Railroad Safety Project 2017-2021	FRA funding to support construction of the S Lander St Grade Separation, which will cross over BNSF mainline tracks between 1st Ave S and 4th Ave S.	4,595,498
1.77	Seattle Department of Transportation	13000 - Transportation Fund	S Lander Street, 1st Ave S to 4th Ave S 2017-2021	TIB funding to support construction of the S Lander St Grade Separation, which will cross over BNSF mainline tracks between 1st Ave S and 4th Ave S.	64,514
1.78	Seattle Department of Transportation	13000 - Transportation Fund	Standardized Pedestrian Wayfinding System 2017-2021	Transit Coordination state funding to provide planning funding to create the foundation for a standardized pedestrian wayfinding system.	543,500
1.79	Seattle Department of Transportation	13000 - Transportation Fund	Making the Business Case for Smart, Shared and Sustainable Mobility Services 2019-2021	DOE federal funding to support targeted outreach and marketing in order to promote electric transportation to shared mobility services.	155,626
1.80	Seattle Department of Transportation	13000 - Transportation Fund	NE 117th St Intersection Redesign and Sidewalk 2020-2021	SRTS federal funding to construct intersection improvements including a traffic signal, pedestrian countdown, audible pedestrian signal, signal backplates, curb ramps, median island, and protected bicycle crossing.	199,924
1.81	Seattle Parks and Recreation	10200 - Park And Recreation Fund	Community Development Block Grant	HUD grant that funds local community development activities with the stated goal of providing affordable housing, anti-poverty programs, and infrastructure development.	808,000

Glossary

Appropriation: A legal authorization granted by the City Council, the City's legislative authority, to make expenditures and incur obligations for specific purposes.

Biennial Budget: A budget covering a two-year period. Under state law, a biennium begins with an odd-numbered year.

Budget - Adopted and Proposed: The Mayor submits to the City Council a recommended expenditure and revenue level for all City operations for the coming fiscal year as the Proposed Budget. When the City Council agrees upon the revenue and expenditure levels, the Proposed Budget becomes the Adopted Budget, funds are appropriated, and legal expenditure limits are established.

Budget - Endorsed: The City of Seattle implements biennial budgeting through the sequential adoption of two one-year budgets. When adopting the budget for the first year of the biennium, the Council endorses a budget for the second year. The Endorsed Budget is the basis for a Proposed Budget for the second year of the biennium, and is reviewed and adopted in the fall of the first year of the biennium.

Budget Control Level: The level at which expenditures are controlled to meet State and City budget law provisions.

Capital Improvement Program (CIP): Annual appropriations from specific funding sources are shown in the City's budget for certain capital purposes such as street improvements, building construction, and some kinds of facility maintenance. These appropriations are supported by a six-year allocation plan detailing all projects, fund sources, and expenditure amounts, including many multi-year projects that require funding beyond the one-year period of the annual budget. The allocation plan covers a six-year period and is produced as a separate document from the budget document.

Chart of Accounts: A list of expenditure, revenue, and other accounts describing and categorizing financial transactions.

Community Development Block Grant (CDBG): A U.S. Department of Housing and Urban Development (HUD) annual grant to Seattle and other local governments to support economic development projects, human services, low-income housing, and services in low-income neighborhoods.

Comprehensive Annual Financial Report of the City (CAFR): The City's annual financial statement prepared by the Department of Finance & Administration.

Cost Allocation: Distribution of costs based on some proxy for costs incurred or benefits received.

Cumulative Reserve Subfund (CRS): A significant source of ongoing local funding to support capital projects in general government departments. The CRS consists of two accounts: the Capital Projects Account and the Revenue Stabilization Account. The Capital Projects Account has six subaccounts: REET I, REET II, Unrestricted, South Lake Union Property Proceeds, Asset Preservation Subaccount - Fleets and Facilities, and the Street Vacation Subaccount. The Real Estate Excise Tax (REET) is levied on all sales of real estate, with the first .25% of the locally imposed tax going to REET I and the second .25% to REET II. State law specifies how each REET can be spent.

Debt Service: Annual principal and interest payments the City owes on money it has borrowed.

Errata: Adjustments, corrections, and new information sent by departments through the City Budget Office to the City Council during the Council's budget review as an adjunct to the Mayor's Proposed Budget. The purpose is to adjust the Proposed Budget to reflect information not available upon submittal and to correct inadvertent errors.

Glossary

Full-Time Equivalent (FTE): A term expressing the amount of time for which a position has been budgeted in relation to the amount of time a regular, full-time employee normally works in a year. Most full-time employees (1.00 FTE) are paid for 2,088 hours in a year (or 2,096 in a leap year). A position budgeted to work half-time for a full year, or full-time for only six months, is 0.50 FTE.

Fund: An accounting entity with a set of self-balancing revenue and expenditure accounts used to record the financial affairs of a governmental organization.

Fund Balance: The difference between the assets and liabilities of a particular fund. This incorporates the accumulated difference between the revenues and expenditures each year.

General Fund: A central fund into which most of the City's general tax revenues and discretionary resources are pooled, and which is allocated to support many of the operations of City government. Beginning with the 1997 Adopted Budget, the General Fund was restructured to encompass a number of subfunds, including the General Fund Subfund (comparable to the "General Fund" in prior years) and other subfunds designated for a variety of specific purposes. These subfunds are listed and explained in more detail in department chapters, as well as in the Funds, Subfunds, and Other section of the budget document.

Grant-Funded Position: A position funded 50% or more by a categorical grant to carry out a specific project or goal. Seattle Municipal Code 4.04.030 specifies that "categorical grant" does not include Community Development Block Grant funds, nor any funds provided under a statutory entitlement or distribution on the basis of a fixed formula including, but not limited to, relative population.

Neighborhood Matching Subfund (NMF): A fund supporting partnerships between the City and neighborhood groups to produce neighborhood-initiated planning, organizing, and improvement projects. The City provides a cash match to the community's contribution of volunteer labor, materials, professional services, or cash. The NMF is administered by the Department of Neighborhoods.

Operating Budget: That portion of a budget dealing with recurring expenditures such as salaries, electric bills, postage, printing, paper supplies, and gasoline.

Position/Pocket Number: A term referring to the title and unique position identification number assigned to each position authorized by the City Council through the budget or other ordinances. Positions may have a common title name, but each position has its own unique identification number assigned by the Records Information Management Unit of the Seattle Department of Human Resources at the time position authority is approved by the City Council. Only one person at a time can fill a regularly budgeted position. An exception is in the case of job-sharing, where two people work part-time in one full-time position.

Program: A group of services within a department, aligned by common purpose.

Reclassification Request: A request to change the job title or classification for an existing position. Reclassifications are subject to review and approval by the Classification/Compensation Unit of the Seattle Department of Human Resources and are implemented upon the signature of the Director of Human Resources, as long as position authority has been established by ordinance.

Reorganization: Reorganization refers to changes in the budget and reporting structure within departments.

SUMMIT: The City's central accounting system managed by the Department of Finance & Administration.

Sunsetting Position: A position funded for only a specified length of time by the budget or enabling ordinance.

TES (Temporary Employment Service): A program managed by the Seattle Department of Human Resources. TES places temporary workers in departments for purposes of filling unanticipated, short-term staffing needs, such as vacation coverage, positions vacant until a regularly-appointed hire is made, and special projects.

Type of Position: There are two types of budgeted positions. They are identified by one of the following characters: **F** for Full-Time or **P** for Part-Time.

Glossary

- **Regular Full-Time** is defined as a position budgeted for 2,088 compensated hours per year, 40 hours per week, 80 hours per pay period, and is also known as one full-time equivalent (FTE).
- **Regular Part-Time** is defined as a position designated as part time, and requiring an average of 20 hours or more, but less than 40 hours of work per week during the year. This equates to an FTE value of at least 0.50 and no more than 0.99.

Reader's Guide to the 2021-2026 Proposed Capital Improvement Program

The City of Seattle's 2021-2026 Proposed Capital Improvement Program (CIP) includes an introduction, departmental sections, appendix, an index, and a glossary. The introduction provides information on the CIP, allocations, funding sources for capital projects, significant initiatives, support for neighborhoods and neighborhood plan projects, and policies guiding the City's capital investments.

Departmental sections comprise most of the CIP document and contain detailed information on each of the capital projects. The following departments have sections in this book: Seattle Parks and Recreation, Seattle Center, Seattle Public Library, Seattle Department of Transportation, Seattle City Light, Seattle Public Utilities (divided into four sections: Drainage and Wastewater, Solid Waste, Technology Projects, and Water), Seattle Information Technology, and Finance and Administrative Services. Appendix A lists new or expanded capital facilities as required by the Growth Management Act. Appendix B lists all projects that will exceed \$5 million with their 2020 appropriation as required by Resolution 31203. Appendix C is a REET II funding report as required by RCW 82.46.035.

Reading CIP Project Pages

CIP project pages, located in the departmental sections of the CIP, provide the most detailed information about a project. The project pages contain the following information:

Project Type: Projects will have one of three project types: Discrete, Ongoing, or Debt Service. Discrete projects are those with a distinct start and end date and build an individual asset. Ongoing CIP projects are departmental CIP programs that build or maintain a group of similar assets. Debt Service projects show the dedicated funding stream to pay the debt service for a project or group of projects.

Project No.: Unique number identifying a project in the City's automated financial management system.

Start/End Date: Estimated Start and End year of a discrete project. Projects without a determined start or end date may show as "TBD" or "On Hold." Projects categorized as "Ongoing" in the Project Type field are programmatic and continue year after year, therefore they do not display a Start/End Date.

BCL (Budget Control Level)/Program Code, BCL/Program Name: A grouping of similar projects into department-specific programs. Also reflects the level at which expenditures are controlled to meet state budget law provisions.

Current Project Stage: The current stage of a discrete CIP project during budget planning (August of the budget development year).

Stage 1—Pre-project Development: All master planning, asset planning, and needs identification. Rough order of magnitude cost estimate¹ for CIP budget established at the end of Stage 1.

¹ The City's budget ordinance requires that a project be assigned a CIP ID number before spending may occur on a project. As a result, Stage 1 project cost estimates/budgets are "Rough Order of Magnitude" estimates based on previously constructed projects or high-level cost estimates which use generic assumptions. Departments refine cost estimates at the end of Stage 2.

Stage 2—Initiation, Project Definition & Planning: Define project and create Project Management Plan (or pre-design package) which sets the project baseline (scope, schedule and budget) from which a department measures variance.

Stage 3—Design: 30%-100% design work.

Stage 4—Procurement/Bid: Advertisement, bid review, bid award, and Notice to Proceed.

Stage 5—Construction: All construction activities. (Note: The term *Execution* is used for Seattle Information Technology).

Stage 6—Closeout: Final project closeout items, includes financial closeout.

Project Category: Projects are identified as New Facilities, Improvements to Existing Facilities, or Rehabilitation or Restoration of Existing Facilities. Technology projects, or those that do not fit into the categories above, are identified as New Investments.

Location: Street address, intersection, or general location of a project. If a project has multiple location entries, only one project location entry is included in the CIP.

Neighborhood District: The City is divided into 13 neighborhood districts. This field indicates in which (if any) neighborhood district(s), a project is located. Some projects are located in more than one neighborhood district or outside the city and are noted as such.

Council District: The City is divided into seven Council districts. This field indicates in which (if any) council district(s), a project is located. Some projects are located in more than one council district or outside the city and are noted as such.

Total Project Cost: The expected total project cost estimate of a Discrete project. The Total Project Cost includes any “out year” spending (spending outside the current six-year CIP).

Urban Village: This field indicates whether a project is located in an Urban Village, a designated geographic area expected to accommodate future population and job growth, as defined by the Comprehensive Plan’s growth management strategy.

Project Description: Information about the purpose, scope, and history of the project.

Resources: The Resources are sources of money supporting a particular project such as grants, private donations, debt, Real Estate Excise Taxes, etc. The Resources Table lists the project’s revenue sources, life-to-date (LTD) expenditures through the prior year; the current year revised budget (including Adopted Budget, carry-forward balances, abandonments, and supplemental appropriations); adopted appropriations; and estimated appropriation requests for the remaining five years of the CIP period.

Fund Appropriations/Allocations: This table lists the appropriating funds which are those funds through which the department has legal appropriation authority by year. Note that this level of detail on the project pages is for information only. The City appropriates funds at the Budget Control Level.

Unsecured Funding: The “Unsecured Funding” table shows the portion of the project cost that does not have committed funding from both internal and external sources. The “Unsecured Funding Strategy” discusses the department’s plan to secure funding for that portion of the project.

O&M Costs (Savings): Description of estimated increases or decreases in operations and maintenance costs as a result of a capital project. “NA” denotes that operations and maintenance costs are not calculated.

Capital Improvement Program

Overview

Capital Improvement Program Purpose

The Capital Improvement Program (CIP) is a six-year financial planning tool that identifies future capital investments and potential strategies for funding those investments. The CIP also satisfies various requirements of cities planning under Washington State's Growth Management Act.

Introduction

The City of Seattle owns and operates a variety of physical assets, ranging from community parks, roadways, bridges, office buildings, libraries, open space, fire stations, maintenance yards, facilities at Seattle Center, and more. The City must properly maintain these assets in order to ensure they are safe, lasting, and provide a welcoming and usable space to serve their intended purposes. The City's utility infrastructure is also included in the CIP, including electric, solid waste, water and wastewater utility assets. The City's capital infrastructure supports City operations, direct public services and programs, and in some cases, provides direct public benefits themselves.

Every year during the annual budget process, the City adopts a six-year CIP, which outlines anticipated investments over that timeframe. The 2021-2026 Proposed CIP totals \$6.9 billion over six years, with approximately \$1.3 billion of that amount designated for the 2021 budget year.

The 2021-2026 Proposed CIP document reflects all legislative and administrative CIP adjustments made during 2020, through the Q3 Supplemental budget.

Capital Planning Policies

The City has historically based capital planning efforts on a set of criteria that help set priorities among potential capital programs. [Resolution 31203](#), adopted in June 2010, set out the following policies to guide the City's capital spending:

- preserve and maintain existing capital assets;
- support the goals of the City's plans;
- support economic development;
- consider external funding possibilities;
- consider revenue-generating possibilities;
- seek regional funding for regional projects;
- pursue cost-saving commitments; and,
- pursue conservation and sustainability investments.

Additional specific considerations include:

- compliance with regulatory requirements;
- coordination between departments and with other jurisdictions; and
- public safety and health.

Capital Improvement Program Funding

Like all large municipalities, Seattle relies on a variety of sources to pay for capital projects. These include locally generated revenues (taxes, fees, voter-approved levies, and user fees), intergovernmental revenues (including state and federal grants), private funding (franchise utilities, philanthropy) and debt issuance. These traditional sources continue to provide the majority of funding for capital facility investments. The City's level of capital investment is based on the mix and amount of financial resources available to the City.

Debt Financing

The City uses multiple forms of debt to finance large capital projects such as Limited Tax General Obligation Bonds (LTGO) also known as councilmanic bonds, Unlimited Tax General Obligation Bonds (UTGO) or voter-approved bonds, and revenue bonds. Unlike pay-as-you-go sources of funding, the issuance of debt requires revenues in future years to repay the principal and interest expenses. Councilmanic debt is a common financing tool used by the City, but those obligations must be repaid from the same set of limited resources including Real Estate Excise Tax (REET), commercial parking tax (CPT) and General Fund revenues. See the "City Bond Issuance and Debt Service" in the Introduction section of the 2020 Adopted Budget for more information on debt financing.

In 2021, the City will issue approximately \$206 million in LTGO bonds to fund significant IT, Transportation, and Waterfront related projects. The 2021 LTGO bond issuance includes \$100 million to finance a substantial portion of the West Seattle Bridge repair work. The West Seattle Bridge bond debt service will be paid for with Real Estate Excise Tax.

Public Utility Funding

Both Seattle City Light and Seattle Public Utilities fund utility projects with revenues from utility rates. Each utility has adopted financial policies that determine what share of their capital investments are funded through cash, and what share from debt. These policies are designed to balance the portion of current investments that are paid by today's ratepayers, versus future ratepayers who will also benefit from long-term capital investments.

Real Estate Excise Tax (REET)

Funding of the City's general government capital program is highly dependent on revenue from Real Estate Excise Tax, which is an excise tax imposed on the sale of real property. REET is a relatively volatile revenue source that tracks closely to local economic activity.

Along with most of the City's economically driven revenue, the COVID-19 pandemic has significantly reduced the REET forecast over the next three to four years. The 2021-2026 Proposed CIP contains considerable reductions to REET funded CIP projects across departments. Adding to the already strained REET budget is the need to debt finance a substantial portion of the West Seattle Bridge Immediate Repair CIP project with REET as the source of funds for debt service. The scale of this project is significant and given that the bridge's failure was not anticipated, the project's cost had been included in previous long-range planning.

Historically the City has maintained a \$10 million REET reserve for precisely these types of economic situations and will use up to \$4 million of the reserve to fund core capital work across the REET eligible departments. The City will continue to maintain a \$6 million REET reserve to buffer against an even

worsening economic downturn through the remainder of the COVID-19 crisis, which currently shows no near-term signs of abating.

The Mayor's 2021 Proposed Budget maintains the commitment made in the 2020 budget to use \$25 million of the City's REET revenue for capital investments in new affordable housing. While additional funding for affordable housing is clearly a priority for the City, ongoing investments in our existing facilities is necessary to support the provision of other City services and to avoid costly projects that result from neglect and deferred maintenance.

Seattle's Recent History – Major Voter-Approved Levies and Capital Projects

In addition to reliance upon general tax sources, Seattle undertook several major capital projects during the last two decades using voter-approved funds and councilmanic debt. Voter-approved capital projects include improvements to Seattle Center and construction of new or expanded community centers and parks, new or remodeled downtown and branch libraries, new or remodeled fire facilities, parks improvements, transportation infrastructure improvements and replacement of the Elliott Bay Seawall. The following is a list recent levies that are still actively funding projects:

- *The Move Seattle Transportation Levy:* The Move Seattle Levy, a nine-year \$930 million levy was approved by voters in 2015. The proposed budget appropriates \$110 million in 2021. Levy proceeds will be used to support safe routes, congestion relief, and maintenance and repairs of the City's bridges and arterial roadways. A major financing strategy in the Move Seattle Levy is the dependence on partnerships—leveraging external resources such as state and federal grants to accomplish transportation projects such as the S. Lander Street Grade Separation project.
- *Seattle Park District:* The passage of the Park District is the culmination of the Parks Legacy Plan project, led by the Parks Legacy Plan Citizens' Advisory Committee. The goal of the Park District is to provide long term, stable funding to support recreation programming, parks projects and the critical needs for investment in major and ongoing maintenance. In 2016, the Parks District began collecting property tax revenue, accumulating the first year of full funding for Park District projects. The Park District will provide over \$15 million in 2021 for major maintenance and capital projects.
- *The 2019 Library Levy:* A seven-year, \$219 million levy to support, maintain and improve core Library services. Included as part of the levy were resources for the preservation and maintenance of library facilities. The City Librarian and the Library Board of Trustees prepare annual progress reports that show how levy proceeds have been used each year. The levy provides an average of \$3.1 million annually for major maintenance and asset preservation projects; including maintenance necessary for building components such as roofs, floors, finishes, HVAC and mechanical systems. The levy also includes funding for earthquake retrofits at three Carnegie branches.
- *The 2008 Parks and Green Spaces Levy:* A six-year, \$146 million levy to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas. This levy expired at the end of 2014, but a new source of voter-approved revenue—the Seattle Park District—is now providing on-going funding to help address major maintenance needs, as well as park development, at the Department of Parks and Recreation (Parks). As of the beginning of 2020 the 2008 Parks and Green Spaces Levy

Fund carried a balance of \$14 million. Parks will continue to spend down existing budget authority on project identified in the Levy throughout the biennium.

Funding Dynamics for Significant Future Capital Projects

Given general resource funding challenges, the City will continue to rely on mix of general government resources and voter-approved funding packages to complete major capital projects and to secure needed funding for basic asset preservation. The City has identified several major priority areas for which significant capital investments will be needed. The following sections describe these priority areas at a high level.

Public Safety Facilities

Planning for the future of Seattle's public safety facilities is critical to maintaining the high level of service expected of Seattle Fire Department (SFD) and Seattle Police Department (SPD). Both departments have a number of large capital facility needs, such as a new Fire Station Headquarters and neighborhood precinct projects that will accommodate anticipated police staffing growth. This CIP provides funding for a new Fire Station 31 in North Seattle, as well as the replacement of the existing dock at Fire Station 5 on the downtown waterfront. In addition, renovation and major maintenance work is ongoing at the SPD North Precinct and the SFD Joint Training Facility

Transportation

The City's existing transportation network faces an extensive backlog of major maintenance. Current funding is insufficient to maintain the City's road, bridges, signs, etc. In addition, through a series of long-term planning efforts the City has completed "Master Plans" that identify large potential investments in a transit network, bicycle facilities, freight projects and pedestrian-oriented infrastructure. The \$930 million Move Seattle Levy will address critical transportation programs such as safe routes, relief of congested roadways and maintenance and repair programs.

Waterfront

The City has developed a comprehensive plan for the improvement of Seattle's central waterfront. The removal of the Alaskan Way Viaduct provides an opportunity to reconnect the City to the waterfront and develop new open space to support the growth and economic development of central Seattle. There are five main capital projects encompassed in the Waterfront program for a total of \$726 million (not including utility costs).

Projects

The largest project—the Alaskan Way Main Corridor project—will construct a new surface street and an adjoining pedestrian promenade, providing access to the waterfront from Pioneer Square to Belltown. The Overlook Walk and East-West Connections project constructs the Overlook Walk, a new accessible connection between the Pike Place Market and the waterfront, and improvements to east-west streets connecting the waterfront and the rest of downtown Seattle. The program also includes projects to reconstruct parks located on piers along the waterfront (Waterfront Park and Pier 62/63 Park), expand the Seattle Aquarium and expand the Pike Place Market.

Funding

The 2021-2026 Proposed CIP identifies a mix of resources to fund these projects and other elements of the overall Waterfront redevelopment. In addition to general government resources in the form of REET, commercial parking tax, and general fund-supported debt, the funding plan calls for significant

contributions from a Local Improvement District (LID), philanthropy, and WSDOT. The LID provides that property owners who benefit from the project pay a share of its cost. LID formation was approved in 2019 and will provide \$160 million of funding for the waterfront improvements.

COVID-19 Impacts

The 2021-2026 Proposed CIP continues to advance the major design and construction elements of the Waterfront program. The projects contained in the Waterfront Program were identified as priority projects for the City during the budget process and remain fully funded through the sources identified above.

Protecting and Creating Opportunities for Workers

The City considers not only what capital projects to fund, but also how to deliver them and achieve broader goals for fairness, equity and opportunity in the community. The Department of Finance and Administrative Services (FAS) leads several policy initiatives to ensure social responsibility and equity in the spending of City capital dollars.

Fair and equitable treatment of workers: FAS monitors and enforces fair and equitable treatment of workers in City construction contracts. In 2013, FAS increased its monitoring and enforcement of wage and labor conditions on City-contracted construction projects, including Office of Housing-financed projects. Funding was provided in 2019 to allow FAS to continue this program, including compliance monitoring for wage and labor violations for relevant projects. It also includes funding to support the Acceptable Worksite program, which trains, teaches and enforce anti-harassment and anti-bullying interventions on City-funded construction projects.

Reduce barriers to construction jobs: The City's own spending on major capital investments can help drive employment within the local economy. Construction jobs and related positions offer living-wage jobs that can support individuals and families. The City's Priority Hire program provides training and opportunities for City residents to work on City-funded capital projects. For major capital projects, City contractors are bound by the City's Community Workforce Agreement, which is intended to increase employment for women, people of color and those living in economically distressed areas of the City through establishment of aspirational and mandatory labor hours for the respective groups. In 2017, the Priority Hire program was expanded to include application on public-private partnership projects with significant City investment such as the Climate Pledge Arena project and the Ocean Pavilion project.

Women and Minority Owned Business (WMBE): The City continues to successfully address contracting equity for minority- and women- owned businesses. In 2011, FAS implemented a Citywide requirement on all public work bids and contracts above \$300,000 called the "Public Works WMBE Inclusion Plan" that continues to effectively encourage and enforce commitments by contractors to use WMBE firms. In 2014, FAS launched prompt pay initiatives which our WMBE firms report as very significant and meaningful for their business cash flow. The 2021 Proposed Budget maintains funding added in the 2019 Adopted Budget for FAS to procure technical assistance services for firms interested in doing business with the City, emphasizing assistance to WMBE firms. The objective is to provide WMBE firms with business and technical guidance that helps them compete more successfully for public projects, including better equipping them to participate on Priority Hire projects.

2021-2026 Proposed Capital Improvement Program Summary

The 2021-2026 Proposed CIP totals \$6.9 billion for six years and includes approximately 530 projects¹. Approximately \$4.5 billion of the six-year total, or 65%, are utility projects managed by Seattle City Light (SCL) and Seattle Public Utilities (SPU), and mostly funded by utility rates. The Seattle Department of Transportation's CIP totals \$1.6 billion (24%) over the six-year period, while the remaining departments (Parks and Recreation, Finance and Administrative Services, Seattle Center, Seattle Public Library, and Seattle Information Technology Department) account for approximately \$786 million, or 11%, of the six-year CIP.

2021-2026 Proposed CIP by Department (000s)

Department	2020 Adopted	2021 Proposed	2022-2026 Estimate	2021-2026 Total
Finance and Admin Services	33,629	38,198	200,933	239,132
Information Technology	32,028	37,438	56,785	94,223
Parks and Recreation	86,714	52,970	301,722	354,692
Seattle Center	11,790	7,381	41,409	48,790
Seattle Public Library	4,768	9,237	40,110	49,347
Seattle Dept of Transportation	415,746	348,987	1,286,051	1,635,038
Subtotal	584,675	494,212	1,927,009	2,421,222
City-owned Utilities				
Seattle City Light	351,394	361,815	1,960,352	2,322,168
SPU - Drainage & Wastewater	229,472	278,390	1,055,888	1,334,278
SPU - Solid Waste	6,432	25,299	59,875	85,175
SPU - Water	111,452	116,378	608,095	724,473
SPU- Technology*	12,873			
Subtotal	711,623	781,882	3,684,211	4,466,093
City Total	1,296,298	1,276,095	5,611,220	6,887,315

Note: 2020 Adopted totals are based on the 2020-2025 Adopted CIP. Not all funds above are appropriated; see the 2021 Adopted Budget for a list of capital appropriations by department.

*SPU – Technology projects are now included in 2021-2026 Proposed totals for three SPU funds.

¹ The project total includes all projects with a CIP Project Page in the 2021-2026 Proposed CIP.

2021 Proposed by Department - \$1,276 Million

The table below identifies funding sources for the 2021-2026 Proposed CIP by Revenue Source Group

2021-2026 Proposed CIP Revenues (000s)

Revenue Source Group	2020 Adopted	2021 Proposed	2022-2026 Estimated	2021-2026 Total
Other City Funds	69,510	41,600	229,782	271,382
Bond Financed	50,357	122,393	302,845	425,238
Real Estate Excise Tax	91,315	57,161	345,251	402,412
Voter-approved Funds (Seattle and King Co.)	159,067	112,815	376,360	489,175
Private Funding	18,170	12,814	92,010	104,824
King County Funding	53,106	50,833	74,418	125,250
State Funding	105,803	52,939	43,037	95,976
Federal Funds	57,134	56,305	102,002	158,307
Utility Funding	761,700	751,830	3,669,973	4,421,802
Other Local Government	12,975	17,405	19,498	36,903
To Be Determined		-	356,044	356,044
Grand Total	1,379,136	1,276,095	5,611,220	6,887,315

2021 Proposed CIP by Revenue Source - \$1,276 million

Asset Preservation

A 2002 Asset Preservation Study found that, despite achieving targets recommended by the 1994 Citizens' Capital Investment Committee, the City still lagged behind industry-recommended levels of investment in asset preservation. The four general government departments involved in the study (Finance and Administrative Services, Library, Parks and Recreation, and Seattle Center) are responsible for approximately 6.9 million square feet of building space, 2.6 million square feet of parking space, and 240 million square feet of grounds (primarily green space) and work yards. These assets have a replacement value of approximately \$5 billion. Assuming an annual asset preservation funding target of 1.0% of the replacement value for buildings and 0.5% of the replacement value for other assets, the City should be investing about \$58 million per year in asset preservation. These percentage targets are consistent with those used by other jurisdictions that were polled as part of this study's review of best practices.

For 2021, the City will spend a total of \$29 million from the two Real Estate Excise Tax Funds and an additional \$51 million from various other resources on asset preservation for general government infrastructure in parks, libraries, civic buildings, and on the Seattle Center campus. The Department of Transportation will spend an additional \$11 million of REET resources and \$47 million of other transportation resources on infrastructure asset preservation during the 2020 budget period.

Neighborhood Projects

As the City adapts to the impacts of unprecedented growth, and plans for yet further development, a focus on the livability of neighborhoods is essential. The 2021-2026 Proposed CIP reflects this focus, and as highlighted below, supports neighborhood-scale capital investments in several different ways.

Neighborhood Matching Fund

The 2021 Proposed Budget maintains funding to Neighborhood Matching Fund (NMF) grant programs. A number of CIP projects, particularly in the Department of Parks and Recreation, include funding from NMF.

The City created the NMF in 1988 to provide funding to Seattle neighborhood groups and organizations for a broad array of neighborhood-initiated improvement, organizing, or planning projects. Many of these projects also support citywide initiatives such as Race and Social Justice, Youth Violence Prevention, Environment and Sustainability, and Neighborhood Planning. Awards range from a few thousand dollars (Small Sparks projects are up to \$5,000, and the Community Partnership Fund projects range from \$5,001 to \$25,000), and NMF funds can cover all phases of a capital project except property acquisition. The NMF program requires a 1:2 match for capital projects, which means all awards leverage other private and public contributions. Matches consist of volunteer labor, donated materials, professional services, or money. The Department of Neighborhoods administers the granting process.

Art and Design Funding for City Capital Projects - 1% for Art Program The [1% for Art program](#), established by Seattle Municipal Code Chapter 20.32, requires the City deposit 1% of eligible CIP project budgets in the Municipal Arts Fund for the commission, purchase, and installation of artworks throughout Seattle. The Office of Arts and Culture (ARTS) manages the 1% for Art program and the Municipal Arts Fund.

Municipal Art Fund revenues from the 1% for Art program can fluctuate significantly from year-to-year depending on changes in City capital investments. In 2021, the Municipal Art Fund is estimated to receive approximately \$3.2 million from capital departments for the 1% for Art program, as described below. Actual 2021 receipts may vary because of project timing, prior year credits, actual CIP expenditures, and City Council changes to the proposed CIP.

1% for Art Revenues (Estimated)	2021 Proposed
City Light	\$431,000
Seattle Public Utilities	\$1,297,000
Seattle Center	\$10,000
Parks & Recreation	\$122,000
Transportation	\$1,309,000
Total	\$3,169,000

Design Commission

Established in 1968, the [Seattle Design Commission](#) advises the Mayor, the City Council and appropriate City departments on design and environmental aspects of the City's CIP. Commission members are appointed by the Mayor for a renewable two-year term. Membership is comprised of two licensed architects, one professional fine artist, one appointee from the Get Engaged program, one lay member, and at least one and no more than two from each of the following categories, for a maximum total of five: professional urban planner, professional environmental or urban designer, landscape architect, and licensed professional engineer. The Design Commission is fully funded with funds from the Cumulative Reserve Fund.

Projects eligible for review include any on-or above-grade structure, including buildings and additions to buildings, bridges, park developments, street furniture, and all similar installations. The Commission reviews below-grade structures such as tunnels, arcades and underground passageways that are regularly visible to the public. Projects reviewed by the Commission must be financed in-whole or in-part with City funds, be on land belonging to the City, or be subject to approval by the City. Commission involvement in capital improvement projects begins as early in the planning process as possible, starting with participation in the consultant selection process and continuing through the many stages of project development. This includes project reviews at the scope briefing or pre-design stage, conceptual design, schematic design, design development, and sometimes construction documents stages.

Background of Capital Improvement Program Policy Drivers

As described above, City investments in capital projects are guided by a set of key policies reflecting the City's values and priorities. These policies shape how the City takes care of buildings and infrastructure, invests in capital projects in areas that have accepted growth as envisioned in the City's Comprehensive Plan, preserves the City's historic buildings, supports sustainable building practices, and ensures that all members of the community have access to the economic opportunities capital projects create. The following section details some of these key policies.

Sustainable Building Policy

In February 2000, the City Council adopted a Sustainable Building Policy for the City of Seattle ([Resolution 30121](#)) which articulated the City's commitment to environmental, economic and social stewardship and set the expectation that new municipal facilities meet established green building standards. Specifically, it called for all new construction and major remodel projects over 5,000 square feet to achieve a LEED Silver rating. When adopted, this policy was the first of its kind in the nation and represented a groundbreaking approach to demonstrating City leadership and transforming the marketplace.

Since 2000, the green building community has experienced exceptional growth in expertise and capacity. Recognizing this change, in 2011 the City passed an updated Sustainable Building Policy ([Resolution 31326](#)). The update represents a comprehensive approach that reflects advances in the green building industry, aligns the policy with the City's increased attention to climate change, addresses a greater range of project types, and ensures that Seattle continues to provide leadership that advances sustainable development in both the public and private sectors. The updated policies include the following requirements.

- For new construction, additions and major renovation projects 5,000 square feet or greater
 - The minimum required green building rating is LEED Gold.
 - There are minimum requirements for energy and water efficiency, construction waste reductions, and bicycle amenities.
- For tenant improvement projects 5,000 square feet or greater, where the scope includes mechanical, electrical, and plumbing:
 - The minimum required green building rating is LEED Gold.
 - There are minimum requirements for water efficiency and construction waste reductions.
- Completion of a Capital Green checklist is required for projects smaller than 5,000 square feet or those otherwise not eligible for a LEED rating.

- City departments are encouraged to test new approaches and standards, such as the Living Building Challenge and the Sustainable Sites Initiative.
- Annual reporting of performance under the policy is required by March 31st of each year.

Additionally, the resolution directs City departments to evaluate and improve existing standards and processes that relate to tenant improvements, leasing, and site management.

City of Seattle Comprehensive Plan

The Comprehensive Plan is a 20-year vision and roadmap for Seattle's future. The plan guides City decisions on where to focus development for new jobs and households, how to improve our transportation system, and where to make capital investments such as utilities, sidewalks, and libraries. The Plan is the framework for most of Seattle's big-picture decisions on how to grow. The latest update of the City's Comprehensive Plan "[Seattle 2035](#)" was passed by the City in October 2016. The City will begin an update to its Comprehensive Plan in 2021.

The Comprehensive Plan helped inform the development of the 2021-2026 Proposed CIP as departments have taken special note of capital projects in neighborhoods targeted for substantial growth in the future or that have received substantial growth in the last few years. This effort is intended to make sure areas receiving growth have the appropriate physical infrastructure to accommodate such growth, while balancing the major maintenance of existing facilities, such as power distribution systems, pipes, community centers, swimming pools, libraries, and streets that are located throughout the City, not just in targeted growth areas.

Federal and State Regulatory Requirements

The City's utilities have several facility projects in their Capital Improvement Programs to meet federal and state regulatory requirements. The City of Seattle must abide by the City's two National Pollutant Discharge Elimination System (NPDES) permits, one for storm water and one for combined sewer system. The City is required, for example, to invest hundreds of millions of dollars in the combined sewer/storm water system over the next several years to control the number of combined sewer overflows (CSOs) into receiving bodies of water, including Lake Washington and Puget Sound. City Council recently approved a CSO Consent Decree with the Environmental Protection Agency (EPA) and the Department of Ecology (DOE). This Consent Decree outlines how the City will become compliant with EPA and DOE regulatory requirements regarding sewage releases from the city conveyance system.

City Light operates its hydroelectric dams and powerhouses under licenses from the Federal Energy Regulatory Commission. Licenses include Settlement Agreements that require City Light to perform mitigation and public benefit activities. City Light is currently completing Skagit Mitigation; is well under way with Boundary Relicensing; and began Skagit Relicensing in 2019.

City Light also complies with a wide range of permitting requirements and environmental regulations. Examples include the mitigation of soil contamination at former substations, and ongoing environmental mitigation in the Endangered Species Act project. Street-use permits and regulations are a major part of City Light projects that expand and repair the electric distribution system.

Endangered Species Compliance

The Cedar River Watershed Habitat Conservation Plan (HCP) is a 50-year, ecosystem-based plan that was prepared to address the declining populations of salmon, steelhead and other species of fish and wildlife

in the Cedar River basin. The HCP was prepared under the Endangered Species Act and is designed both to provide certainty for the City of Seattle's drinking water supply and to protect and restore habitats of 83 species of fish and wildlife that may be affected by the City of Seattle's water supply and hydroelectric operations on the Cedar River. Seattle Public Utilities is continuing to implement its commitments under the HCP, which include downstream habitat protection and restoration, upland forest restoration, logging road decommissioning, and ongoing monitoring. City Light is also acquiring salmon habitat in the Green/Duwamish, Skagit, and Snohomish watersheds.

Americans with Disabilities Act

The United States Department of Justice (DOJ) conducted an audit of select City of Seattle facilities, practices and procedures, in order to assess City compliance with the Americans with Disabilities Act (ADA), and reported its findings to the City. While the City is largely in compliance, there are some elements within facilities that the DOJ has requested that the City update or alter to improve accessibility for individuals with disabilities. The City is working on an update to its ADA Transition Plan that will guide the development of a long-term strategy that manages the City's most critical public-facing ADA deficiencies first and maximizes accessibility to the greatest extent possible.

A project manager in FAS coordinates and oversee implementation of ADA improvements in certain City facilities, determines and reports compliance to DOJ, and reviews and modifies as needed the facilities design and construction process with regard to the ADA. The City is in the process of moving towards a new approach to ADA improvements in which these improvements are included in ongoing maintenance and other remodeling work.

In order to provide additional proactive monitoring of compliance with ADA standards for new capital projects, the City has added staffing dedicated to monitoring ADA compliance of new projects. All capital departments have a specific ADA coordinator and large departments such as Department of Parks and Recreation, SDOT, FAS have dedicated ADA staffing.

Historic Preservation

Seattle's commitment to historic preservation began with citizen efforts in the 1960s to block the demolition of two of Seattle's oldest neighborhoods—Pike Place Market and Pioneer Square. Both neighborhoods were threatened with proposals that would have irreversibly changed the character of the districts. The Pike Place Market was faced with an Urban Renewal Plan that would have demolished it, while Pioneer Square was threatened with a major roadway project. In 1970, the City Council created the Pioneer Square Preservation District, Seattle's first historic district. Then, in 1971, voters approved an initiative to create the Pike Place Market Historical District. In 1973, the City Council adopted a Landmarks Preservation Ordinance to safeguard properties of historic and architectural significance throughout the City, and more than 450 buildings, sites, and objects have now been designated as City landmarks.

The City of Seattle currently owns or maintains many of those landmarks, including libraries, park buildings, and fire stations. In 2001, the City began a comprehensive effort to survey and inventory both City-owned properties and privately-owned properties throughout the City. To date, the Department of Neighborhoods has completed surveys and inventories in 20 of the City's neighborhoods including Ballard, Belltown, Cascade, Central, Columbia City, Denny Triangle, Downtown, Fremont, Georgetown, Mount Baker, North Beacon Hill, North Rainier, Pike-Pine, Pioneer Square, Queen Anne, South Lake Union, South Park, South Seattle, University, Wallingford, Waterfront, as well as The University of Washington, city-owned properties, pre-1906 residential buildings, and neighborhood commercial

buildings throughout the City. The results of those efforts are available in a searchable database on the [Department of Neighborhoods](#) website. However, due to reductions in funding this work is no longer on-going.

Parks and Recreation

Overview

Seattle Parks and Recreation (SPR) manages a 6,414-acre park system of over 485 parks and extensive natural areas. SPR provides athletic fields, tennis courts, play areas, specialty gardens, and more than 25 miles of boulevards and 120 miles of trails. The system comprises about 12% of the city's land area. SPR also manages many facilities, including 26 community centers, eight indoor swimming pools, two outdoor (summer) swimming pools, four environmental education centers, two small craft centers, four golf courses, an outdoor stadium, and much more.

Seattle's parks and recreation system provides numerous benefits to the people of Seattle—healthy people, a healthy environment, and strong communities. These benefits are grounded in SPR's values of access, opportunity, sustainability and equity and underlie the outcomes SPR aims to achieve. For Seattle to remain a vibrant city that is attractive to residents, visitors and businesses, it needs to maintain a great park system with healthy open spaces and meaningful recreational opportunities—which is why preserving the legacy of Seattle's parks and recreation system is so vital.

Thematic Priorities

SPR's Capital Improvement Program (CIP) is focused on promoting healthy people, a healthy environment, and strong communities by preserving, enhancing, and expanding the physical assets where all of the people of Seattle can play, learn, contemplate, and build community. As described in the Project Selection Criteria section, SPR uses an Asset Management Plan which measures each potential capital project by criteria including safety, asset preservation, race and social justice, legal obligation, and improvements in efficiency to set priorities for capital projects. Each of these criteria is a direct reflection of SPR's core values of access, opportunity, sustainability, and equity.

Aligning Capital Investments with Growth and/or Community Planning

Seattle's Comprehensive Plan, "Seattle 2035," is a 20-year vision and roadmap for Seattle's future that guides City decisions on where to build new jobs and housing, how to improve the transportation system and where to make capital investments such as utilities, sidewalks, parks and open space and libraries. The Comprehensive Plan is the framework for most of Seattle's big-picture decisions on how to grow while preserving and improving our neighborhoods.

A Parks and Open Space element is also included in Seattle's Comprehensive plan. SPR has also updated its 2017 Parks and Open Space Plan to be consistent with Seattle 2035. In addition to the City-wide Comprehensive Plan, there are myriad other plans for specific programs and amenities in the City that affect parks. SPR participates in shaping those plans to help continue developing an integrated open space and recreation system in Seattle.

Seattle's Climate Action Plan provides a framework for meeting Seattle's climate protection goals, including the overarching goal of becoming carbon neutral by 2050. SPR's role involves maximizing the benefits of the bicycle and pedestrian master plans, meeting building energy plan goals, such as LEED compliance, and working towards urban forest restoration goals, such as those outlined in the Green Seattle Partnership.

SPR is committed to developing and managing an environmentally sustainable park system. This means using energy and utilities with conservation in mind in all facilities, effectively managing the use of water for irrigation and other purposes, creating efficiently-maintained landscapes, and operating clean and safe park facilities.

These principles have led SPR to undertake energy conservation improvements to various facilities, make investments that preserve the integrity of facilities, make improvements that ensure public safety in the parks, and address various code deficiencies.

2021-2026 Proposed Capital Improvement Program

Project Selection Criteria

SPR uses an Asset Management Plan (AMP) to identify and rank necessary major maintenance projects.

The AMP is a set of projects to address facility needs. SPR identifies projects through ongoing condition assessments, consultant studies, work order analyses (to identify key problem areas), and intradepartmental information sharing of facility maintenance issues and needs. Every two years, SPR reviews and updates the AMP. While SPR's planning staff prepares and coordinates the AMP planning process and document development, the process involves a collaborative approach throughout the department to develop project scopes and budget estimates.

Typically, department staff score and rank all of the projects included in the asset management plan using the following six criteria:

Code Requirements: The project brings a facility or element up to federal, state, and Seattle code requirements (such as ADA, water quality, or fire suppression) or meets other legal requirements.

Life Safety: The project will eliminate a condition that poses an imminent threat of injury. Examples of safety hazards are lack of seismic elements, failing piling, outdated play equipment, emergency management elements, or a documented environmental health hazard.

Facility Integrity: The project will help keep the facility operational and extend its life cycle by repairing, replacing, and renovating systems and elements of the facility, including building envelope (roof, walls, windows), electrical, plumbing, storm and sewer line replacement, and synthetic turf replacement.

Improve Operating Efficiency: The project will result in reduction of operating and maintenance costs including energy and water savings.

Equity: The project will preserve or enhance an asset which serves low income and racially diverse communities.

Other: Projects that have a unique element (e.g. leverage other funds) and/or are known needs that do not fit the other priorities.

2021-2026 CIP Highlights

SPR's 2021-2026 CIP budget is \$53 million in 2021 and reflects a wide range of discrete projects and ongoing programs with a mix of funding sources.

The 2021 Proposed CIP made significant reductions to SPR's 6-year plan due to the COVID-19 pandemic as described below.

2021: Key Changes by Fund

- **Seattle Park District:** \$11 million of Park District capital funds will be used in 2021 to offset losses in Parks' operating fund and the General Fund; this will result in capital project delays and an ongoing reduction to Parks' budget for major maintenance and acquisitions. However, it will allow SPR to avoid severe operational cuts.

- **Real Estate Excise Tax (REET):** Due to losses in this fund, SPR's REET funding will be reduced by 46.5% in 2021, amounting to \$19.3 million. REET funds will also be cut in the out years for a total reduction of \$50.9 million across the 6-year CIP.

2021: Key Changes by Project

- **Major Maintenance Backlog Projects: -\$4.4M Park District, -\$1M REET;** Represents a 27% cut to SPR's budget for major maintenance that persists into out years if funding is not replenished through the next Park District spending plan or with other funding. If funding is not reinstated when revenues begin to recover, this reduction will make it difficult for SPR to address the City's backlog of major maintenance needs.
- **Athletic Field Conversions: -\$6M REET;** Delays project schedule for playfield conversion projects which are a lower priority than field replacements and other asset preservation projects. This change impacts Magnuson Park Athletic Field 12 (delayed to 2028) and West Magnolia Playfield South (delayed to 2030).
- **Major Project Challenge Fund: -\$1.8M Park District;** The Major Project Challenge Fund (MPCF) was funded in the first cycle of the Park District. By the end of 2020, all feasibility studies funded by the MPCF are anticipated to be complete. SPR had already begun exploring possible alternatives to the MPCF model to be considered in the next cycle of the Park District; the 2021-2026 CIP redirects this funding to offset General Fund expenses.
- **Acquisitions: -\$1.5M Park District;** Reduces SPR's acquisition budget by 60% to approximately \$1M/year and shifts focus on greenbelts/natural areas where Conservation Futures Tax funds can be leveraged.
- **Community Center Rehabilitation and Development: -\$1.2M REET;** Reduces funding in 2021 by 31% for improvements at SPR's community centers and eliminates REET funding in the out years of SPR's CIP if not replenished in a future Park District cycle or with other funding. Leaves approximately \$260,000/year of Park District funding in the out years.
- **Comfort Station Renovations: -\$660,000 REET;** Eliminates REET funding in this project from the CIP. SPR proposes to use King County Parks Levy resources if available in the out years to help restore some of this funding.
- **Play Area Renovations: -\$425,000 REET;** Reduces REET funding in this project for three years. Maintains a combination of REET and King County Levy funding.
- **Gas Works Park – Remediation Project: -\$570,000 REET;** Reduces \$570,000 of REET funding to the Gas Works Park - Remediation Project (MC-PR-31007) in 2021 and adjusts future year appropriation amounts to align with revised spending estimates from Puget Sound Energy (PSE).
- **ADA Compliance: -\$500,000 REET;** Represents a 25% cut in 2021 and 2022. By 2024 SPR's annual budget returns to its full allocation of \$2M/year.
- **Green Seattle Partnership (GSP): -\$500,000 REET;** Reduces funding for GSP's restoration efforts to \$1.2M/year through 2023. SPR is also holding 2 vacancies on the operating side of its budget to achieve one-time savings. This will result in delay of SPR's 2025 restoration goal of 2500 acres as described further in the response to the Statement of Legislative Intent transmitted to Council with the 2021 Proposed Budget.
- **Other Ongoing Programs: -\$2.7M REET;**
 - Funding Eliminated: Boiler and Mechanical System Replacement, Ballfield Lighting Replacement, Roof & Building Envelope, Play Area Safety, Electrical System Replacement, Environmental Remediation, Sport Court Restoration, Ballfields – Minor Capital Improvements

- 1-3 year budget reductions: Irrigation Replacement and Outdoor Infrastructure, Pavement Restoration, Utility Conservation, ADA, Urban Forestry (GSP), Neighborhood Response, Landscape Restoration, Trails Renovation, Athletic Field Replacements

SPR's CIP reflects an effort to preserve discrete projects in BIPOC communities and to prioritize services and projects in underserved neighborhoods. Taking these maintenance cuts allows other capital projects to move forward such as the community center stabilization projects at locations in South Seattle; land banked site development at Little Saigon, North Rainier and South Park; and ballfield lighting replacement at Ballard and Bitterlake, to name a few. It also helps the department avoid making operational cuts that would significantly affect service to the public.

Following adoption of the 2021 budget, SPR will update its asset preservation plan and identify if there are opportunities to reinstate some funding to these projects and programs; this could include funding from the next 6-year cycle of the Park District spending plan (2022-2027).

2021: Other Changes

The 2021-2026 Proposed Capital Improvement Program includes other technical and/or budget neutral adjustments including:

- Shifts \$1.2M of ongoing debt service payments for the Rainier Beach Community Center from the General Fund to the Real Estate Excise Tax I (REET I) fund.
- Debt finances the Aquarium Expansion project, which was previously cash financed with REET, to relieve strain on that fund. LTGO Bonds will be issued over the next 2-3 years.
- Amends the funding plan for the Parks Central Waterfront Piers Rehabilitation Project by shifting the timing of funding from the LID-Central Waterfront Fund and the Central Waterfront Improvement Fund (budget neutral within the 6-year CIP) and implements a net-zero funding swap in 2021 to replace Park District funds with a combination of REET and Beach Maintenance Trust Fund.
- Allocates Conservation Future Tax resources from King County to the Park Land Acquisition Project.
- Adjusts funding projections for the Saving Our Forests Master project and the Lake City Community Center Improvements project in 2021 to align with the Park District Financial plan. These technical changes also adjust out year funding through 2026 to align with out year allocations.
- Renames the Queen Anne Renovation Project to West Queen Anne Playfield Conversion to avoid confusion with the replacement of synthetic turf at the Queen Anne Bowl.

CIP Revenue Sources

Funds for the development of the system and for ongoing asset management come from a variety of sources. The two largest funding sources for Park's capital work are typically the Park District and REET. The majority of the remaining funding comes from Community Development Block Grants, the Central Waterfront Improvement Fund, King County, and General Fund to pay debt service. Other funding includes the 2008 Parks and Green Spaces Levy, the Cumulative Reserve Subfund, and other special fund sources, grants, and private donations.

Seattle Park District

In August 2014, the voters of Seattle passed a ballot measure creating the Seattle Park District (a metropolitan park district). The Park District is a taxing authority and provides an ongoing revenue source to fund increased parks and recreation services and capital projects. The Park District has the same boundaries as the City of Seattle. The City Council members, acting *ex officio* and independently, comprise the governing board (the District Board). The first cycle of the Park District spanned from 2015-2020. Planning for the 2021-2026 cycle was delayed by one year due to the COVID-19 pandemic. In 2021, the Park District will maintain its 2020 funding level but with a greater proportion of the budget going towards SPR's operating costs; this will help mitigate losses in the General Fund and Park Fund and preserve core operating services. Capital projects that have been delayed or deferred due to this change will be reevaluated for future funding as part of the next 6-year Park District planning process set to begin in 2021 for the 2022-2027 cycle.

Real Estate Excise Taxes (REET)

REET funding is used for asset preservation purposes. In addition to the key investments highlighted above, REET is used to address various ongoing capital programs, such as boiler replacement, electrical system upgrades, small irrigation upgrades, trail maintenance, athletic field and ballfield turf maintenance and improvements, small roofing replacement, paving restoration, landscape and forest restoration, and others. It also funds replacement of aging field lighting systems and certain aquarium infrastructure projects. Due to significant revenue losses in the REET fund resulting from the COVID-19 pandemic, SPR's REET allocation was reduced across their 2021-2026 Proposed CIP. Funding may be reinstated in future years when revenues recover, or as part of the next 6-year planning process for the Park District.

2008 Parks and Green Spaces Levy

The 2008 Parks and Green Spaces Levy was a six-year \$145.5 million levy intended to acquire, develop, or restore, existing or new, parks, recreation facilities, cultural facilities, green spaces, playfields, trails, community gardens, and shoreline areas. The levy package, largely modeled after the successful 2000 Pro Parks Levy, provided for acquisition of new parks and green space and for development and improvement of various parks throughout the city. This included renovation of 23 play areas, park development atop lidded reservoirs, renovation of several existing parks and cultural facilities, and an environmental category to provide funding for the Green Seattle Partnership, community gardens, trails, and improved shoreline access at street ends. An Opportunity Fund Category funded other community-identified projects. This levy ended in 2014 but continues to collect revenues on delinquent property taxes. The capital budget does not include any new appropriations of levy funds, but SPR will continue to spend down existing appropriations.

Summary of Upcoming Budget Issues and Challenges

Waterfront

In 2018, SPR learned that Pier 63 had deteriorated to a point where significant reconstruction will be required sooner than originally anticipated. The original plan for Piers 62/63 was to rebuild Pier 62 (the southerly pier) and add a floating boat dock while retaining the existing Pier 63 and deferring the reconstruction until sometime in the future. Construction on Pier 62 is underway. Public access to Pier 63 will be permanently prohibited once

Pier 62 is re-opened to the public. There is currently no funding for work on Pier 63. SPR will continue to monitor this issue in partnership with Office of the Waterfront and Civic Projects.

Pier 58, currently known as Waterfront Park, will be rebuilt and redesigned to create a public park and improve access, safety and flexibility to the pier. In September of 2020, emergency removal of the pier was needed due to continued deterioration of the structure. The removal is expected to be complete by early 2021 to allow for the redesign to begin. The 2021 Proposed Budget includes Park District funding to support this work.

Gas Works Park

Additional in-water remediation work at Gas Works Park is still being planned with the project costs split between SPR and SPU. While this issue does not impact the 2021 budget, this is a future liability which Parks will continue to monitor.

ADA Barrier Removal Schedule

The mandate from FAS on a required Citywide ADA Barrier Removal Schedule (BRS) coupled with SPR's ongoing ADA work far exceeds the historic annual funding. To address the conceptual level planning estimates required to meet the BRS, SPR would need \$3.8 million annually over the next 20 years; this only addresses the BRS issues, not the total ADA needs across the entire parks and recreation system. SPR currently has \$1.5 million in REET for ADA projects in 2021. A longer-term solution will be considered as part of the next Park District cycle.

Park District

Restoring the REET and Park District cuts across SPR's CIP will place a significant burden on the next cycle of the Park District, which already has a number of commitments against it such as the Green Lake Community Center and the new Mercer Community Center tenant improvements. Reinstating General Fund and/or REET in future years will help offset some of these impacts on the Park District. The Seattle Park District 6-year planning cycle was put on hold for one-year due to the COVID-19 pandemic, with funding maintained at 2020 levels in the 2021 Proposed Budget. Planning for the next cycle (2022-2027) is set to begin in 2021.

Activating and Connecting to Greenways

Project No:	MC-PR-21004	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops safe, inviting connections between parks and greenways which are residential streets that are dedicated connectors for pedestrians, cyclists, and other non-motorized travel, as identified in the Bicycle and Pedestrian Master Plan documents. Typical improvements include crosswalks, benches, greenway park entrance improvements, non-motorized paths and loops within parks, and related work. Parks will work with the Seattle Department of Transportation (SDOT) to activate and enhance connection points between parks. This project improves safety and access to and from the parks, encourages partnerships with neighborhood and community groups, business, and other stakeholders. This project is part of the Metropolitan Parks District measure put before voters in 2014.

This project provides for ADA improvements at a number of parks facilities. Work will be focused on selected community centers (e.g., Bitter Lake, Delridge, Garfield, Jefferson, Meadowbrook, Miller and others) and will consist of adjustments to signage, door closures, restroom fixtures, and other features. Signage will be added where needed as well. Similar work will be undertaken at Discovery Park Environmental Learning Center and other facilities to the degree that funding allows.

Aquarium - Pier 59 Piling Replacement and Aquarium Redevelopment Debt Service

Project No:	MC-PR-31002	BSL Code:	BC-PR-30000
Project Type:	Debt Service	BSL Name:	Debt and Special Funding
Project Category:	Rehabilitation or Restoration	Location:	1483 Alaskan Wy
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	2005 - 2025	Neighborhood District:	Downtown
Total Project Cost:	\$37,154	Urban Village:	Downtown

This project supports debt service payments on 20-year Limited Tax General Obligation (LTGO) bonds that were issued in 2005 to pay for the replacement of the entire pier piling system of Pier 59, interior infrastructure improvements, and development of portions of the Aquarium by the Seattle Aquarium Society. The pier and Aquarium work was part of an overall plan to repair and redevelop the Aquarium and the Central Waterfront area, and to construct a new Aquarium entrance, exhibits, and visitor services on a portion of the pier. This work enhanced and extended the useful life of Pier 59 and the Aquarium.

Total Project Cost:	\$34,290	Urban Village:	Downtown

The Seattle Aquarium is owned by Seattle Parks and Recreation and operated by the non-profit Seattle Aquarium Society (SEAS). SEAS is planning a major expansion to the Aquarium's existing footprint to add new programming and visitor capacity. This project will provide a new Ocean Pavilion that will integrate with improvements made by The Office of the Waterfront along the Central Waterfront. SEAS also intends to make improvements to piers 59 and 60 to improve exhibit space and operations efficiency. Design and construction of the project is led by SEAS and coordinated with City investments by the Parks Department and Office of the Waterfront. This project is part of the overall waterfront improvement program and appropriates City matching funds for SEAS' project. Funding depicted in the table below represents committed funding for design. The City has committed to provide up to \$34 million to SEAS for design and construction. (Interfund Loan repaid with REET and shown as double budgeted in appropriation table.)

Aquarium Major Maintenance

Project No:	MC-PR-41004	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	1483 Alaskan WAY
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This ongoing project provides funds for major maintenance at the Aquarium and other related items. Typical projects include seawater pump replacement, tank repairs, energy efficient systems upgrades, exterior decking repairs, Americans with Disabilities (ADA) access improvements, roofing and seismic upgrades, and related work. The facility was constructed in 1980, and a partial addition was installed on Pier 59 portion of the building in 2006. Due to the harsh saltwater environment, Aquarium facilities have a shorter lifespan than similar facilities not located over saltwater. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, and improve the overall Aquarium experience for the public. This project is part of the Seattle Park District measure put before voters in 2014.

This project provides funding to conduct core testing of wood light poles at various ballfields, replace deteriorated wooden poles with metal poles, install new electrical systems, and perform other related work. The new lighting systems will reduce light spillover and energy efficient. This is a long-term program to replace all deteriorated wood light poles over the next several years at a total estimated cost of \$6 million. Future funding for this program depends on available resources.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides for periodic beach renourishment and related work at selected sites throughout the City. Work includes, but is not limited to, laying sand and gravel to replenish beaches that have eroded in recent years and to improve substrate for juvenile salmon habitat. This project supports the Restore Our Waters Strategy to improve Seattle's aquatic environments.

Boat Moorage Restoration

Project No:	MC-PR-41021	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	201 Lakeside AVE
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Central
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project renovates City-owned boat moorages throughout the park system. Work includes, but is not limited to, repairs to the piles, caps, stringers, decking, and breakwater structures. These repairs extend the useful life boat moorages, many of which generate revenues to the Department each year.

Bobby Morris Playfield Turf Replacement-2008 Levy

Project No:	MC-PR-16014	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Rehabilitation or Restoration	Location:	1635 11th AVE
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 3
Start/End Date:	2014 - 2021	Neighborhood District:	East District
Total Project Cost:	\$1,069	Urban Village:	Capitol Hill

This project, funded with 2008 Parks Levy funds redirected from the Seattle Asian Art Museum renovation project , replaces the synthetic turf field surfacing which was installed in 2005, and performs related work. The surfacing material is near the end of its lifecycle. This improvement allows the continued use and scheduling of the playfield for soccer, baseball, and other activities.

Boiler and Mechanical System Replacement Program

Project No:	MC-PR-41007	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces boilers, mechanical systems, and any related work necessary in facilities throughout the Parks system. Costs for certain boiler and mechanical systems replacements may be eligible for reimbursement from Seattle City Light or Puget Sound Energy. This project extends the useful life of the boilers and assures that Department facilities are not closed due to boiler and mechanical systems failure.

Comfort Station Renovations

Project No:	MC-PR-41036	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project renovates selected comfort stations for improved ADA access, ventilation and finishes (walls and floors), and security. The renovations also may include reconfigured stalls, new toilets, urinals, and sinks, ADA accessories, paint and finishes, and related work, depending on the needs of a particular site. In some cases, a comfort station may be replaced with a prefabricated unit. More park users will have access to these facilities, and the improvements will make them more inviting and comfortable.

Community Center Rehabilitation & Development

Project No:	MC-PR-41002	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for improvements at 26 community centers, the oldest of which is 103 years old. Typical improvements include renovation, upgrades, or replacement of major building systems, roof and building envelopes, seismic upgrades, painting, energy efficient lighting and other environmentally sustainable building components, Americans with Disabilities (ADA) access improvements, and related work. In some instances, facilities will be replaced or remodeled to improve programming space. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, improve the overall community center experience for the public, and meet today's and future recreation needs. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Develop 14 New Parks at Land-Banked Sites

Project No:	MC-PR-21003	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops 14 new parks on land-banked sites that were acquired under prior levies. Depending on the size, location, and type of park, new elements could include trees and landscaping, paths, plazas, a play area, site furniture, lighting, and related improvements. Each newly developed park will improve the neighborhood and contribute to improved health for park users, and will have environmental benefits. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Gas Works Park - Remediation

Project No:	MC-PR-31007	BSL Code:	BC-PR-30000
Project Type:	Ongoing	BSL Name:	Debt and Special Funding
Project Category:	Rehabilitation or Restoration	Location:	2101 N Northlake Wy
Current Project Stage:	N/A	Council District:	Council District 4
Start/End Date:	N/A	Neighborhood District:	Lake Union
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides ongoing monitoring efforts to ensure the measures constructed for remediation of soils at Gas Works Park were effective. Monitoring activities include maintenance and operation of the air sparging, SVE systems, soil cap, and other institutional controls; groundwater testing; quarterly reports; and other related work. The project also provides for ongoing monitoring for as long as 20 years from installation, effectively until 2021. All measures of the Compliance Monitoring Project must be executed in accordance with the Consent Decree established in 1998, requiring the Seattle Department of Parks and Recreation, Puget Sound Energy, and the Department of Ecology to implement a Cleanup Action Plan.

Green Lake CC - Evans Pool Roof Replacement & Solar Hot Water

Project No:	MC-PR-41034	BSL Code:	BC-PR-40000
Project Type:	Discrete	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	7201 E Green Lake Dr N
Current Project Stage:	Stage 3 - Design	Council District:	Council District 6
Start/End Date:	2013 - 2021	Neighborhood District:	Northwest
Total Project Cost:	\$1,672	Urban Village:	Green Lake

This project demolishes the existing 15,130 square foot Evans Pool roof and the 13,625 Community Center roof and replaces them with a rubberized membrane roofing/EPDM system and solar panels to supplement the pool hot water system, seismic improvements, and related work. The flat roof section of the roof will accommodate a 1,000,000 Btu/day system and will help to reduce pool heating costs.

Start/End Date:	2019 - 2024	Neighborhood District:	Northwest
Total Project Cost:	\$1,000	Urban Village:	Green Lake

This project will achieve planning and schematic design for replacement of the current Green Lake Community Center and Evans Pool. Work will entail public outreach and engagement, feasibility analysis of alternatives, and development of a preferred schematic design and cost estimating. Funding for construction of this project will be considered in the next cycle of the Seattle Park District spending plan which has been delayed by one year and will now be developed for 2022-2027.

Green Space Acquisitions- 2008 Parks Levy

Project No:	MC-PR-12001	BSL Code:	BC-PR-10000
Project Type:	Ongoing	BSL Name:	2008 Parks Levy
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for acquisition of properties to fill gaps in existing public ownership and preserve continuity in existing public ownership. The project scope targets acquisitions in the following designated green spaces: Arroyos Natural Area, East Duwamish Greenbelt, Northeast Queen Anne Greenbelt, Ravenna Woods, Thornton Creek Watershed, and West Duwamish Greenbelt. These acquisitions will enhance livability and increase opportunities for the public to enjoy nature. They also implement the Parks Strategic Action Plan by encouraging long-term stewardship of natural resources. Levy funds are expected to be supplemented by grants and funds from other sources for these acquisitions. This project is part of the 2008 Parks Levy.

Improve Dog Off-Leash Areas

Project No:	MC-PR-51002	BSL Code:	BC-PR-50000
Project Type:	Ongoing	BSL Name:	Maintaining Parks and Facilities
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project improves the City's 14 existing off-leash areas, most of which have aging infrastructure. In 1996, seven sites were selected as pilot off-leash areas. In 1997, four of them (Blue Dog Pond, Genesee, Golden Gardens, and Westcrest were selected as the first permanent sites. By 2011, there were a total of 11 off-leash areas, and three more have been added since then (Magnolia Manor, Kinnear, and Denny). Typical projects will improve Americans with Disabilities (ADA) access, address drainage and erosion issues, update aging infrastructure, and related work. This project is part of the Seattle Park District measure put before voters in 2014.

This ongoing project funds engineering and other studies of the Department's park irrigation and outdoor infrastructure systems (e.g., water mains, irrigation and drainage lines, sanitary and storm sewers, electrical utilities, roads, paths, trails, retaining walls, bridges, saltwater piers, and related infrastructure); associated cost estimating; related staff and consultant support for developing and prioritizing projects within the Department's Asset Management Plan; and implements replacement projects at various sites. Specific projects are determined by the study and operational considerations. This project provides conservation benefits by reducing water loss due to leaking systems, allocating water flow more efficiently through improved technology, and implementing other related work. It also extends the useful life of the infrastructure.

Start/End Date:	2018 - 2024	Neighborhood District:	North
Total Project Cost:	\$16,500	Urban Village:	Lake City

This project will replace the current Lake City Community Center with a new facility and perform other related work. The new Lake City Community Center will be more accessible for all users, more inviting and comfortable, and include improved recreation spaces. The project will begin with a feasibility study that will identify the probable costs associated with a variety of options such as underground parking, gym size, possible childcare rooms and facilities, and number of floors and other recreation spaces. Funding for construction of this project will be considered in the next cycle of the Seattle Park District spending plan which has been delayed by one year and will now be developed for 2022-2027.

Magnuson Park Building #406 Roof Replacement-2008 Levy

Project No:	MC-PR-16012	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Rehabilitation or Restoration	Location:	7400 Sand Point WAY NE
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 4
Start/End Date:	2014 - 2021	Neighborhood District:	Northeast
Total Project Cost:	\$2,152	Urban Village:	Not in an Urban Village

This project, funded with 2008 Parks Levy funds redirected from the Seattle Asian Art Museum renovation project, replaces the Built Up Roofing (BUR) system with a rubberized/EPDM roofing system with 20KW photovoltaic panels, and performs other related work. The system will supply power into the electrical system for the building, which will reduce the amount of utility power used. At certain times, the system may produce more power than is being used by the building, resulting in a credit for power used. This project eliminates a leaky roof and will make the facility more energy efficient.

Major Maintenance Backlog and Asset Management

Project No:	MC-PR-41001	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for major maintenance projects for assets in all of the city parks and recreation facilities, including athletic fields, play areas, swimming pools, trails, buildings, accessibility elements, outdoor infrastructure, and related work. This project also funds a new integrated asset management and work order system to better track and forecast long-term asset and maintenance needs. The project also increases Parks' ability to remove property encroachments. Typical major maintenance improvements may include, but are not limited to renovating buildings, Americans with Disabilities (ADA) access improvements, replacing play area structures, forest, landscape, trail maintenance and improvements, swimming pool repairs, athletic field refurbishment, and installation of energy efficient lighting, and related major maintenance work. These projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, reclaim Parks property, and improve the overall park experience for the public. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding to leverage community-generated funding for renovation or development of large projects of Parks' facilities where other City funding is unavailable, often times due to the magnitude of the project. These projects will require matching funds, so the leveraging will stretch the City's funding, and more great community-generated projects can be accomplished. The community will benefit from new and/or improved facilities that can better accommodate current and projected park and recreation needs and demands. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Total Project Cost:	\$1,700	Urban Village:	Not in an Urban Village

This project provides for development of Marra-Desimone Park, which includes the Marra Farm, Seattle's largest site for urban gardening. It implements elements of the "Long-Range Development Plan for Marra-Desimone Park" (2008), and may include enhancement of the existing farm area, development of community and recreation space on the eastern side of the park, paths, and gateway features. This project is part of the 2008 Parks Levy.

Municipal Energy Efficiency Program - Parks

Project No:	MC-PR-41030	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide Multiple Locations
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for investment in more energy efficient building systems and other facility efficiency improvements. By making these investments the City expects future savings in utility and labor costs, and significant progress toward carbon neutrality. This program is intended to fund facility retrofit projects identified by energy audits conducted in 2010 (funded by the City's Energy Efficiency and Conservation Block Grant) and similar projects identified by the department. Depending on project demand and available funding, additional resources may be added in the future.

Project Category:	New Facility	Location:	Multiple Locations
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides for acquisition of property to create new urban parklands in Seattle's most densely-developed neighborhoods as identified in Seattle Parks and Recreation's 2006 Gap Analysis. New park land acquisition enhances livability and increases opportunities for the public to enjoy the outdoors. The acquisitions also implement the Parks Strategic Action Plan. Levy funds are expected to be supplemented by grants and funds from other sources and are not expected to be sufficient to complete acquisitions in all the targeted areas. This project is part of the 2008 Parks Levy.

This ongoing program provides funding for small projects identified by citizens, neighborhood groups, or other community organizations. Projects address requests which are typically under \$50,000, and may be used for major maintenance activities performed in conjunction with development-oriented Neighborhood Matching Fund (NMF) projects. This program enables the Department to respond quickly to community requests for repairs in neighborhood parks.

Northwest Native Canoe Center Development

Project No:	MC-PR-15010	BSL Code:	BC-PR-10000
Project Type:	Discrete	BSL Name:	2008 Parks Levy
Project Category:	Improved Facility	Location:	860 Terry AVE N
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 3
Start/End Date:	2014 - 2022	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$750	Urban Village:	South Lake Union

This project, part of the 2008 Parks Levy Opportunity Fund, develops a carving shed which includes a living roof, and installs a carved "Welcome" figure on the beach. The project provides insight into distinctive varieties of Native American culture in a location at Lake Union where Native carvers are safe, and the public is welcome. This is the first phase of a two building development.

Start/End Date:	2014 - 2021	Neighborhood District:	Southeast
Total Project Cost:	\$639	Urban Village:	Not in an Urban Village

This project, part of the 2008 Parks Levy Opportunity Fund, renovates the play area and basketball courts, installs benches and games tables, prepares P-Patches, and adds rain gardens and bio-swales to address drainage. This project also includes way-finding markers embedded in the walking paths. Renovations improve safety in the park and help the park function better as a neighborhood and community gathering spot.

Park Land Acquisition and Leverage Fund

Project No:	MC-PR-21001	BSL Code:	BC-PR-20000
Project Type:	Ongoing	BSL Name:	Building For The Future
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funds for land acquisition, leveraging capital projects, pre-acquisition activities (including planning, title searches, appraisals, negotiations, and community involvement), associated with acquisitions of specified real property, and related work. The project also serves as a match to leverage other funding sources such as King County Conservation Futures. The City is growing and there is a need to add parkland to meet park and open space goals and improve the quality of life for Seattle residents. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Parks Central Waterfront Piers Rehabilitation

Project No:	MC-PR-21007	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Rehabilitation or Restoration	Location:	Alaskan Way
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 7
Start/End Date:	2016 - 2024	Neighborhood District:	Downtown
Total Project Cost:	\$100,217	Urban Village:	Downtown

The Waterfront Park and Pier 62/63 are public park facilities that provide public access to Elliott Bay and host a range of public events, markets and performances. Both piers need a full seismic upgrade to meet current life safety codes, and Waterfront Park needs significant access improvements. Waterfront Park is envisioned as a flexible public recreation and open space. Pier 62/63 is anticipated to be more heavily programmed, with a flexible activity rink, events, and performances. The Department of Parks and Recreation (DPR) owns the piers, but the Office of the Waterfront will lead the rehabilitation. The Pier 62/63 Phase 1 Rebuild was substantially complete in July 2020. This project is part of the overall Central Waterfront program. (Interfund Loan will be repaid with Local Improvement District Bonds.)

Start/End Date:	1999 - 2022	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$9,770	Urban Village:	Not in an Urban Village

This project funds debt service payments on 20-year bonds issued in 2002 to pay for the acquisition of the Westbridge Building, a facility that replaced the Department's primary maintenance facility at Roy Street. The replacement of the Roy Street facility assures a safe and efficient location for the Department's professional trades and a portion of the maintenance crews and management staff.

This ongoing program provides minor capital improvements to low-income area parks throughout the City. Conservation Corps Program staff perform this work, providing training opportunities for low-income, homeless, and other at-risk community members. Program elements include provision of ADA improvements to parks and park restrooms, accessible drinking fountain installation, basketball court construction, bench and picnic table installation, tree purchase and planting, and other small-scale capital projects. Funding is also targeted to projects that can be integrated with other community-identified amenities.

This ongoing project funds various project activities, including, but not limited to, seal-coats to new pavement to extend its lifespan, pavement patching, sub-grade repairs, overlays to small areas, and repairs associated with pavement failures (e.g., heaving, sinking, cracking, and root invasion). Improvements reduce damage to asphalt, lengthen pavement lifespan, and reduce safety hazards such as uneven pavement.

Play Area Safety Program

Project No:	MC-PR-41018	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program renovates play areas, makes ADA improvements, installs safety upgrades, and performs other related work. The program focuses on addressing safety issues at two to four play areas per year. Primarily, the program is focused on installing proper safety surfacing at children's play areas throughout the parks system. Future funding for this program depends on specific projects and available resources, including grants. This program extends the useful life and improves the safety of the play areas.

Rejuvenate Our P-Patches

Project No:	MC-PR-51001	BSL Code:	BC-PR-50000
Project Type:	Ongoing	BSL Name:	Maintaining Parks and Facilities
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project revitalizes the City's 82 P-Patch Community Gardens. Typical projects will improve the paths, improve the planting beds and common areas, improve Americans with Disabilities (ADA) access, update aging infrastructure, and related work. The first P-Patch was constructed in 1973, and more have been added in the past 40 years. The individual projects will address safety and code requirements, extend the life of the asset, improve accessibility, and contribute to better air quality. This project is part of the Metropolitan Parks District measure put before voters in 2014.

This ongoing project funds architectural, engineering and other studies of the Department's buildings (roofs, structure and other related infrastructure); associated cost estimating; related staff and consultant support for developing and prioritizing projects within the Department's Asset Management Plan; and implements the replacement or renovation of buildings and roofs throughout the park system, including those at comfort stations, picnic shelters, community centers, and small roof sections of larger buildings. This project extends the useful life of the buildings and roofs; assures that the facilities are protected against damage from roof and wall leaks; and assures that general building issues are addressed in the Asset Management Plan.

Saving our City Forests

Project No:	MC-PR-41003	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project restores and maintains Seattle's 2,500 acres of urban forests. Seattle's trees are aging and inundated with invasive plants, including English ivy, Himalayan blackberry, Scot's broom, and knotweed. This project expands Parks' capacity to restore forest land, and to provide the ongoing monitoring and maintenance work necessary to keep restored areas from being overrun by invasive plants. A healthy urban forest contributes significantly to the health of the environment by cleaning air and water, filtering and retaining storm water, and providing a respite from the built environment. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Smith Cove Park Development

Project No:	MC-PR-21005	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	W Galer ST
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2015 - 2023	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$4,166	Urban Village:	Not in an Urban Village

This project, funded by the MPD, develops the 4.9 acre waterfront portion of Smith Cove Park located just west of Pier 91 on Elliott Bay. The park will be developed following a planning and design process for the site. These amenities may include paths, landscaping, waterfront access points, a play area, and related improvements. Some improvements will also be made to the existing part of Smith Cove Park (west of this site), currently used for sports such as soccer. The improved park will provide waterfront access and ADA accessibility, provide enhanced opportunities for active recreation, increase environmental-sensitivity, and make the park inviting and usable for more people.

South Park Campus Improvements

Project No:	MC-PR-21013	BSL Code:	BC-PR-20000
Project Type:	Discrete	BSL Name:	Building For The Future
Project Category:	Improved Facility	Location:	8319 8th AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2019 - 2023	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$1,800	Urban Village:	South Park

This project will implement the South Park Site Plan approved by Seattle Parks and Recreation in March 2018, by renovating and relocating numerous park elements. The site plan calls for the existing play area and wading pool to be demolished and replaced with a new play area and spray park in new locations within the site. The existing grass playfield will be renovated and upgraded with synthetic turf and lighting. The project may also include the replacement of the existing sport courts, installation of a loop trail and planted buffer, new fencing and related work. Partial funding for this project is anticipated from various public and private sources in the forms of grants and donations. Once the project is completed, these improvements will increase safety and site capacity, support more active uses and types of healthy outdoor play, and provide opportunities for programming throughout the year. The total estimated cost for this project is \$9.8 million. This project will be funded by public and private sources. With the addition of the Real Estate Excise Tax (REET) funding in 2019, the project is expected to be fully funded.

Sport Court Restoration Program

Project No:	MC-PR-41019	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project renovates sport courts including tennis, basketball, and pickleball courts throughout the City. The program focuses on crack repair, color coating, providing new posts, standards, and nets, and completing less expensive repairs. Between one and three courts are renovated each year that are selected based on user complaints and staff evaluation of conditions.

Trails Renovation Program

Project No:	MC-PR-41026	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project implements a comprehensive trail renovation strategy. Funding addresses trail failures throughout the park system to correct safety problems, prevent further erosion and deterioration, and perform other related work. The project leverages community support by providing technical assistance, training, and materials to district staff and volunteers who are engaged in other trail-related projects.

Urban Forestry - Forest Restoration Program

Project No:	MC-PR-41022	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program develops forest and vegetation management plans, implements restoration projects at sites throughout the City's park system, removes hazardous trees, and performs other related work. Restoration projects, with much of the work being performed by citizen volunteers, may include removal of invasive plants, such as English ivy and Himalayan blackberry, followed by replanting with native plants. Future funding for this program depends on available resources. This project enhances Seattle's urban forest and supports the Green Seattle Partnership to increase overall City tree canopy and the Restore Our Waters Strategy to improve Seattle's aquatic environments.

This ongoing project is a collaborative effort between the City of Seattle and Forterra to restore 2,500 acres of forested park lands in Seattle by 2025. Restoration for each acre occurs over a three-year period and includes clearing invasive plants, replanting the area with native plants, caring for the plants through establishment, and other related work. This project supports the Green Seattle initiative.

This ongoing project implements energy conservation projects in collaboration with Seattle City Light, Seattle Public Utilities, and Puget Sound Energy. Projects may include lighting, heating, and water use renovations at various facilities throughout the Parks system. These projects result in energy savings and better air and water quality, and support the Climate Protection Initiative by reducing greenhouse gas emissions. The cost of these projects is expected to be recovered within approximately five years through reduced utility costs and rebates from the three utilities. Rebates and other additional resources will be pursued to fund future conservation projects.

Victor Steinbrueck Parking Envelope

Project No:	MC-PR-41044	BSL Code:	BC-PR-40000
Project Type:	Discrete	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	2001 Western Ave
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2017 - 2024	Neighborhood District:	Downtown
Total Project Cost:	\$5,000	Urban Village:	Downtown

This project will replace the existing membrane between the westerly portion of Victor Steinbrueck Park and the Unico parking garage below, and other related items. The membrane is a waterproofing layer that keeps stormwater and irrigation that falls on the park from entering the garage below and damaging the concrete structure. The membrane was installed in 1981 when the park was originally constructed on top of the parking garage. These membranes typically last no more than 30 years; the existing membrane has failed and no longer prevents water from entering the garage below. The membrane replacement requires the removal and subsequent replacement of all the park improvements above and the installation of a new drainage system. The new membrane will provide a waterproofed foundation for the associated park renovation project.

Zoo Major Maintenance

Project No:	MC-PR-41005	BSL Code:	BC-PR-40000
Project Type:	Ongoing	BSL Name:	Fix It First
Project Category:	Rehabilitation or Restoration	Location:	601 N 59TH ST
Current Project Stage:	N/A	Council District:	Council District 6
Start/End Date:	N/A	Neighborhood District:	Northwest
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project preserves the Zoo facilities to enable it to operate efficiently, and to offer a world-class experience to the patrons. Typical projects include exhibit renovation or replacement, water, electrical, irrigation, and sewer systems replacement, energy efficient improvements, pavement and grounds restoration, Americans with Disabilities (ADA) access improvements, and related work. The oldest buildings at the Zoo were constructed in the 1930s and others have been built in subsequent decades. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, and improve the overall Zoo experience for the public. This project is part of the Metropolitan Parks District measure put before voters in 2014.

Seattle Center

Overview

Seattle Center's ("Center") Capital Improvement Plan (CIP) is at the heart of the Center's purpose "to create exceptional events, experiences and environments that delight and inspire the human spirit to build stronger communities." The Center's CIP repairs, renews, and redevelops the facilities and grounds of Seattle Center to provide a safe and welcoming place for millions of annual visitors.

Seattle Center is a 74-acre campus in the middle of the City. It is the largest visitor destination in Washington state, attracting an estimated 12 million visits each year to attend arts, sporting, educational, and cultural events and festivals, and to enjoy the grounds and open spaces. There are 24 buildings and three parking garages on the campus. Seattle Center is also a major urban park with lawns, gardens, fountains, a children's play area, and a variety of plazas and open spaces. The Seattle Center Monorail runs between the Seattle Center campus and downtown Seattle. The City owns the Monorail, which is operated by Seattle Monorail Services on behalf of the City. The Space Needle, the Pacific Science Center, the Museum of Pop Culture, the Chihuly Garden and Glass Exhibition, and Seattle Public Schools' Memorial Stadium and an adjacent parking lot are also part of the campus but are privately owned and operated.

The origins of a civic campus at Seattle Center go back to the 1920s, with Mayor Bertha Landes presiding over the groundbreaking for the Civic Auditorium, Civic Ice Arena, and Civic Field. In the 1930s the Washington State Armory was built. Memorial Stadium was constructed in the 1940s. In the late 1950s and early 1960s the site for the 1962 Seattle World's Fair was created, expanding the size of the campus to roughly what we know today. One result of this long history as a civic gathering place is aging infrastructure. Some facilities have been significantly renovated (e.g., Civic Auditorium into the Opera House for the World's Fair, and into McCaw Hall in 2003, the Civic Ice Arena/Mercer Arena site into the new Seattle Opera at the Center facility in 2018, and the Arena in 2020-21), while others remain in need of major renovation and redevelopment (e.g., Memorial Stadium).

In 2008, following a two-year community process, the City Council adopted the Seattle Center Century 21 Master Plan. The Master Plan provides a roadmap for the redevelopment of Seattle Center around a set of design and planning principles including increased open space; sustainable design and operations; opening the edges of the campus to the surrounding community; enlivening the campus throughout the day; being pedestrian friendly and accessible to all; and continuing to provide a diversity of programming and attractions for all parts of our community. The master plan is expected to be supported, as Seattle Center redevelopment has in the past, by a mix of public and private funding.

In 2015, Seattle Center began a multi-year facility condition assessment (FCA) program to identify current and future capital investment needs. Seattle Center's Proposed 2021-2026 CIP is in part driven by the FCA program, with funds allocated for renovation of campus infrastructure, including roofs, elevators, sewer lines, parking structures, and the International Fountain.

In 2019, the City entered into an agreement with private partner Seattle Arena Company (ArenaCo) to lease and redevelop the historic KeyArena and several supporting structures to create a world-class arena for professional sports and entertainment. The new Climate Pledge Arena will be completed in fall 2021 and will transform the largest single facility on campus, flanked by public plazas with new artwork, signage, lighting, and landscaping on all sides. Seattle Center has answered this remarkable private investment by committing to upgrades to several of its most prominent public attractions, including the International Fountain, the Armory, and the landmarked north courtyards.

During typical times, Seattle Center staff plan and implement capital projects to minimize the impact on events that occur throughout the year, including four major festivals between May and September. In 2020 and beyond, to adapt to the funding constraints imposed rapidly in response to the COVID-19 crisis, Seattle Center has prioritized the projects that are matters of safety and security; those which are already underway; those that are in the service of partnerships; and those that simply cannot be postponed. Other CIP work has been deferred and/or phased to accommodate the Citywide funding reductions.

Thematic Priorities

Seattle Center's Proposed 2021-2026 CIP focuses on four primary themes:

- renovating basic infrastructure;
- preparing for the Climate Pledge Arena opening in the fall of 2021;
- preserving and revitalizing heavily used visitor amenities; and
- managing the impacts of COVID-19 on Seattle Center CIP priorities.

Renovating Basic Infrastructure

Asset preservation investments in campus facilities are at the core of Seattle Center's CIP. The Proposed 2021-2026 CIP prioritizes needs identified in the latest phase of facility condition assessments including:

- Addressing the ADA Barrier Removal Schedule in a variety of locations across the campus, including replacement of the Armory atrium elevator;
- Replacing roofs for the Seattle Children's Theatre Phases 1 and 2, and the International Fountain Pavilion;
- Campus HVAC control system upgrades;
- Mercer Garage deferred major maintenance; and
- Phased renovation of the International Fountain.

Preparing for Climate Pledge Arena opening in 2021

In 2019, construction began on the new, privately funded Climate Pledge Arena. Seattle Center's Proposed CIP includes several Arena-related elements:

Mercer Garage – The City's lease agreement with ArenaCo for a new, privately-funded Arena to replace KeyArena commits the City to operation of the Mercer Garage until 2035. Seattle Center's CIP prioritizes improvements to the Mercer Garage including deferred major maintenance repairs and installation of a new Parking Access and Revenue Control system in both the Mercer and 5th Avenue North garages, in conjunction with ArenaCo installing a compatible system in the First Avenue North garage, in time for the Arena opening in the fall of 2021.

Skatepark Relocation – Seattle Center's CIP includes funding to replace the former Seattle Center skatepark facility, which was located within the footprint of the new Arena. The replacement skatepark facility is scheduled to open in the spring of 2021. ArenaCo provided partial funding for skatepark relocation.

Northwest Courtyard – The public open space north of the new Arena will be heavily impacted by Arena construction. The City is renovating the DuPen Fountain and is working in conjunction with ArenaCo on a renovation plan for the upper Northwest Courtyard area so the quality of the public open space at the

north end of the Arena matches that at the west, south, and east. Seattle Center's Proposed CIP includes funding for Northwest Courtyard renovation. Additional funding will come from ArenaCo.

Monorail Station Improvements – In 2018, Seattle Center, in conjunction with Seattle Monorail Services (SMS) and VIA Architecture, completed a feasibility study for improvements at both Monorail stations that would increase the capacity of the Monorail system to move passengers before and after large events at Seattle Center and to improve the passenger experience. The Monorail Transit Asset Management Plan and Capital and Major Maintenance Program Plan, a 5-year capital plan for the Monorail system, includes \$1.2 million for station improvements. Additionally, under the terms of the recently updated and approved Monorail concession agreement, SMS will invest \$6.6 million of private capital into improvements at the privately owned Westlake Center station.

Smart Campus Infrastructure Planning Efforts – Seattle Center faces great pressure to upgrade its aging infrastructure for technology, event power, and sustainability. These pressures converge with a desire to improve the pedestrian environment to accommodate more visitors from neighboring urban growth centers and a busier Arena, and to lean into outdoor gatherings as a long-term strategy for post-pandemic reopening. There is an opportunity for a comprehensive "Smart Campus" infrastructure package, that may include these improvements in concert with the planned conversion of the central utility plant to electricity by 2024. In 2021, Seattle Center will continue preliminary planning and engineering efforts to identify the desired scope and phasing. The 2021-2026 CIP includes funding for a minimum first phase of improvements.

Preserving Visitor Amenities

To complement the construction of a new, world-class arena, Seattle Center's Proposed CIP prioritizes investments in highly visible and heavily used free public facilities to continue to delight and inspire the millions of annual visitors when they return to the campus. These include:

International Fountain – Voted a few years ago as the top public fountain in the country, the International Fountain is the centerpiece of the Seattle Center campus and a very popular free attraction for the public. Seattle Center's CIP includes funding for phased renovation of International Fountain systems over multiple years. Seattle Center will repair and upgrade the fountain's jet system.

DuPen Fountain – A short walk from the International Fountain is the DuPen Fountain, a favorite attraction on the Seattle Center campus since the 1962 World's Fair, featuring the artwork of Everett DuPen. While the adjacent Arena is under construction, Seattle Center will carry out a full renovation of the DuPen Fountain to achieve a modernized, flexible design that strengthens both the family-friendliness and the contemplative aspects of the fountain in line with public feedback. The new feature is scheduled to open by summer 2022.

Aligning Capital Investments with Growth and/or Community Planning

The Seattle Center campus is located within the Uptown Urban Center. In 2015-16 Seattle Center participated with the Office of Planning and Community Development (OPCD) and the Uptown community on the development of the Uptown Urban Design Framework (UDF). The design principles of the Seattle Center Century 21 Master Plan are incorporated into the UDF. After completion of the UDF, Seattle Center partnered with OPCD and the Uptown community on the Seattle Center and Uptown Strategic Parking Study and the Uptown Rezone Environmental Impact Statement (EIS) process. Capital projects which invest in the facilities and grounds of the 74-acre Seattle Center campus support the growth of the Uptown Urban Center as well the South Lake Union and Belltown neighborhoods. Capital

projects starting or underway in 2021 which support growth in the neighborhoods surrounding Seattle Center include:

- Skatepark Relocation
- Northwest Courtyard Public Open Space Improvements
- Monorail Station Improvements
- Artists at Play Children's Play Area Refurbishment
- International Fountain Improvements
- Memorial Stadium Planning/Seattle Center Century 21 Master Plan Update

Project Selection Criteria

For each budget cycle, a broad cross-section of Seattle Center staff members engage in the process of identifying the highest priority asset preservation and improvement needs on the campus. This includes staff members who maintain facilities, rent facilities to clients, provide technical support for events, manage parking and public assembly facilities, and manage capital projects. Projects are prioritized around a set of criteria, including public and staff safety, regulatory requirements, failing building systems, asset preservation, master plan implementation, reducing operating costs and/or increasing revenue potential, leveraging non-City funds, and race and social justice. Center's Campus & Armory Operating Board and the McCaw Hall Operating Board have played a central role in identifying and prioritizing capital needs in the facilities they oversee. The Seattle Center Executive Team takes all of this information and prioritizes projects across the entire Seattle Center campus within funding targets provided. Seattle Center's program of facility condition assessments, utilizing a number of specialty consultants, is a key source of information for identifying current and future capital needs at Seattle Center to inform capital investment priorities.

2021-2026 Proposed CIP Highlights

The Center's CIP prioritizes funding to address needs identified in the latest phase of facility condition assessments, including roofs, parking structures and the International Fountain. The CIP also includes funding for asset preservation investments in McCaw Hall and the Monorail, guided by the McCaw Hall Capital Renewal/Major Maintenance Plan and the Seattle Center Monorail Transit Asset Management (TAM) Plan and Capital and Major Maintenance Program (CMMP) Plan. Asset preservation investments in 2021 include:

Armory – An ongoing program of renovation of the Seattle Center Armory continues in 2021 focused on an exterior renovation of this 1939 building. In addition, for the costs of Armory food court renovations completed in 2012, Seattle Center will pay its final debt service payment of \$383,000 in 2021.

General Site Improvements – In 2021, REET I funding is allocated for phased renovation of the International Fountain and for campus security and technology infrastructure improvements.

McCaw Hall – Annual REET I allocations for McCaw Hall asset preservation are matched 100 percent by the resident tenants of McCaw Hall, the Seattle Opera and Pacific Northwest Ballet, to carry out the McCaw Hall Capital Renewal/Major Maintenance Plan, under the direction of the McCaw Hall Operating Board. Due to the financial impacts of the COVID-19 crisis, the Center and McCaw Hall Operating Board have elected to forgo annual contributions into the reserve fund in 2020 and 2021.

Monorail Renovation – Federal Transit Administration grant funds and local matching funds are allocated to continue implementation of the Seattle Center Monorail Transit Asset Management Plan and Capital and Major Maintenance Program Plan for renovation of the Monorail trains, guideways and stations.

Open Space Restoration and Repair – Renovation of public open spaces in 2021 will include renovation work in the public open space north of the Climate Pledge Arena, in conjunction with ArenaCo.

Parking Repairs and Improvements – The City’s Lease with ArenaCo for the Climate Pledge Arena commits to operation of the Mercer Garage until 2035. Seattle Center’s CIP prioritizes the Mercer Garage in 2021, including deferred major maintenance repairs and installation of a new Parking Access and Revenue Control (PARC) system in both the Mercer and 5th Avenue North garages in conjunction with ArenaCo installing a compatible system in the First Avenue North garage, in time for the Arena opening in the fall of 2021.

Roof Replacements – Seattle Center recently commenced replacement of the Cornish Playhouse roof, which is the highest priority identified in a facility condition assessment of campus roofs. Phases 1 and 2 of roof replacements Seattle Children’s Theatre buildings will be completed in 2021 and 2022. A temporary repair to the International Fountain Pavilion roof in 2020 will stabilize it until replacement in 2024.

Utility Infrastructure – Renovation of campus utility infrastructure in 2021 includes upgrades to the campus Energy Management and Control System, HVAC efficiency improvements, and upgrades to campus power and connectivity infrastructure.

CIP Revenue Sources

Seattle Center’s Proposed 2021-2026 CIP is funded from a combination of revenue sources including Real Estate Excise Tax (REET, the primary funding source for 2021-2026), federal grants, and private funds. Over the years other key funding sources for Seattle Center included voter-approved property tax levies, Washington State and King County funds, and proceeds from property sales, in addition to private funds. Following the adoption of the 1990 Seattle Center Master Plan, two voter-approved levies raised \$62 million for implementing the master plan. This amount in turn leveraged \$500 million in non-City funds, including \$440 million from private sources. The Seattle Center campus is currently experiencing another wave of private investment, including KEXP, the Opera at the Center, Space Needle renovation, and the Climate Pledge Arena.

Summary of Upcoming Budget Issues and Challenges

The biggest challenges facing Seattle Center’s CIP are aging infrastructure and funding constraints. Seattle Center buildings date from the 1930s and some underground sewer lines within the campus are over 100 years old. While some facilities have been significantly renovated, others remain in need of major renovation. Seattle Center is carrying out a program of facility condition assessments to identify current and future needs for capital renovation and replacement. The 2021-2026 Proposed CIP addresses priority needs identified in these condition assessments. Significant additional funding will need to be identified to address future needed asset preservation investments in Seattle Center facilities.

REET is the primary funding source for Seattle Center’s CIP. Real estate markets run in cycles, as Seattle Center experienced from 2009-2012, when annual REET revenue allocated to Seattle Center dropped below \$500,000 in three of the four years. The projected economic downturn resulting from the current crisis has thrown this important resource for Seattle Center’s capital work into jeopardy. In the past,

Seattle Center has augmented REET funding with proceeds from property sales, voter-approved levies, and private funding. The availability of these other funding sources is uncertain going forward.

In 2008, following a two-year community process, the City Council adopted the Seattle Center Century 21 Master Plan. The Master Plan provides a roadmap for the redevelopment of Seattle Center around a set of design and planning principles. Implementation of the plan is expected to be supported by a mix of public and private funding. A challenge in the coming years is how to fund the remaining vision of the Master Plan as well as maintain existing capital assets.

Future Projects/What is on the Horizon

The recent announcement of the Climate Pledge Arena name and philosophy has brought fresh energy to Seattle Center's commitment to environmental sustainability on its campus. Seattle Center's most fundamentally sustainable premises is its successful stewardship of historic urban fabric; however, the age of the campus also poses challenges. Seattle Center has infrastructure dating to the 1930s. The 2021-26 CIP addresses some of the highest priorities identified in Seattle Center's initial facility condition assessment, including the Cornish roof replacement, Mercer Garage seismic upgrades, renovation of selected elevators and sewer lines, and renovation of the International Fountain. Seattle Center will need to address other major maintenance needs on the campus – including a comprehensive upgrade and replacement of pedestrian lighting fixtures and the conversion of the Central Utility Plant to electric power – in future CIPs.

Seattle Center skilled trades staff are based in a leased facility located just off the campus. Following a significant rent increase in 2019, Seattle Center decided to phase its staff out of this space within five years as the cost has become unjustifiable in the long term. The department is now looking to relocate its skilled trades staff within the Seattle Center campus, perhaps as part of development of the Memorial Stadium site.

A light rail station will be located on or adjacent to the Seattle Center campus as part of Sound Transit 3 (ST3). Seattle Center is participating in Sound Transit's efforts to identify a preferred site for the Seattle Center station and is providing suggestions regarding where station ingress and egress could potentially occur on the Seattle Center campus. Seattle Center is collaborating with the Uptown community and our resident organizations in providing feedback to Sound Transit.

Until early March 2020, the potential renovation of Memorial Stadium and update of the Seattle Center Master Plan were prominent topics, riding momentum following the November 2017 Public Process Partnership Agreement with Seattle Public Schools (SPS). Creating new public open space in the center of the Seattle Center campus is at the heart of the Seattle Center Century 21 Master Plan, and is one of the City's priorities for a future City-SPS redevelopment partnership; however, the COVID-19 crisis has temporarily slowed the discussion between Seattle Center, SPS, and philanthropy. The Seattle Center Advisory Commission and Seattle Center Foundation continue to advocate strongly for an update to the Seattle Center Century 21 Master Plan to address new circumstances and challenges and encompass the numerous transformational changes poised to occur on and around the campus. Seattle Center hopes to return focus to these issues in future CIPs.

ADA Improvements

Project No:	MC-SC-S9302	BSL Code:	BC-SC-S03P01

Municipal Energy Efficiency Program

Project No:	MC-SC-S1003	BSL Code:	BC-SC-S03P01
Project Type:	Ongoing	BSL Name:	Building and Campus Improvements
Project Category:	Rehabilitation or Restoration	Location:	Seattle Center Campus
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	N/A	Urban Village:	Uptown

This project provides for energy saving facility retrofit projects at Seattle Center. This project results in more energy efficient building systems, reductions in utility use and cost, and other facility efficiency improvements.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Open Space Restoration and Repair

Project No:	MC-SC-S9704	BSL Code:	BC-SC-S03P01
Project Type:	Ongoing	BSL Name:	Building and Campus Improvements
Project Category:	Rehabilitation or Restoration	Location:	Seattle Center Campus
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	N/A	Urban Village:	Uptown

This ongoing project provides for the renovation, repair and the planning for the future renovation of open spaces, green spaces, hard surfaces, and fountains throughout the 74-acre Seattle Center campus. Typical improvements may include, but are not limited to, International Fountain mechanical and hard surface renovation, pedestrian and landscape improvements, hard surface repairs in heavily-trafficked areas, lighting upgrades, and tree replacement.

Seattle Public Library

Overview

The Seattle Public Library's facilities include 26 branch libraries and the Central Library, as well as leased storage and shops space. In 2008, the Library completed the final building projects of an extensive, system-wide capital program known as "Libraries for All" (LFA). The LFA program increased the amount of physical space by 80% to a total of over 600,000 square feet, greatly increasing the demands on the Library's major maintenance program.

The subsequent 2012 Library Levy provided an essential seven-year funding stream to maintain the five new and 22 updated libraries that had been renovated, expanded or replaced during LFA. The 2012 levy concluded at the end of 2019, and with passage of the 2019 Library Levy, the Library has embarked on a new seven-year asset preservation program which includes seismic retrofits at three century-old Carnegie-era branches.

Library buildings can be divided into four major categories:

1. There are ten buildings designated as historic landmarks, including seven Carnegie-era libraries (built in the early 1900s) and three modern buildings.
2. Eleven branch libraries are either LFA new construction (eight buildings) or non-landmarked buildings developed between the 1950s and the 1970s (three buildings).
3. Five small library branches are essentially storefronts, four of which are part of larger buildings.
4. The Central Library is a 12-story 363,000 square foot building that serves as headquarters and hub of the library system. It houses the materials distribution system, Library administration, a 375-seat auditorium and public meeting rooms, large public areas for reading and access to 330 public computers, a data center housing system-wide servers, and the Central Library collection of books and materials.

The Library Major Maintenance program provides ongoing funding for work that preserves or improves building integrity, efficiency and functionality.

Thematic Priorities

The Library's Capital Improvement Program (CIP) projects generally fall into one or more categories: asset preservation, operational efficiency, environmental stability, public service improvements, and safety and security.

Asset Preservation

The overriding priority of the Library's capital program is to extend the useful life of its buildings. As the Library's buildings have all surpassed the ten-year mark since the conclusion of the final Libraries for All bond projects, the buildings require attention to flooring, casework, finishes and restroom fixtures. Major repairs and replacement to roofs, building envelopes, HVAC and other critical building systems, doors, windows, flooring and casework are also examples of asset preservation items funded through the Library's CIP budget. The 2019 Levy also included additional funding for three Carnegie-era branch seismic retrofits.

2021-2026 Proposed Capital Improvement Program

Nearly all of the Library's non-IT \$6.8 million proposed 2021 Levy CIP budget can be predominantly classified as asset preservation work, though the largest projects will also provide some combination of enhanced safety, improved access and environmental sustainability. Roughly \$5 million is budgeted for the Green Lake branch seismic retrofit project as promised in the 2019 voter-approved levy; additional planning/design costs may be incurred for either or both of the University and Columbia branch seismic projects as well. The balance of Levy CIP funding will pay for necessary improvements at the Library's newly-acquired maintenance shop and storage site; roof repairs/replacement at the Columbia branch (if the repairs cannot be deferred until the seismic retrofit project scheduled for 2025), resealing of parking lots at multiple branches across the system, reconfiguration of the ADA parking space at the Montlake branch for code compliance, and any additional urgent ADA accessibility issues system wide.

Some multi-year branch initiatives were deferred due to the COVID-19 pandemic and will likely carry into 2021. The major projects include exterior work/access improvements at the Douglass-Truth branch, and roof repairs at Queen Anne and Lake City branches.

The iconic Central Library often requires a significant portion of CIP funds, usually distributed over multi-year projects. Historically, larger, complex and challenging projects have been planned and staged sequentially to minimize the impact on Library services to patrons. The scheduled 2021 projects at the Central Library, include planning and design for Level 3 Lighting Improvements and Level 4 Computer Lab upgrades.

While these projects are essential for preserving the Library's physical assets, many of them also contribute to the Library system's other essential themes: operational efficiency, environmental sustainability, and improved service to the public.

Library Operational Efficiency; Environmental Sustainability; Safety and Security of Public/Staff

The Library delivers direct services to Seattle residents, who expect highly functional and welcoming library buildings. Major maintenance work carried out under these priorities supports:

- upgrades to help the Library reduce operating costs while minimizing impact to the public;
- renovations to enhance the environmental sustainability of Library buildings; and
- repairs and improvements that augment the safety of library facilities (immediate safety concerns and building integrity are highest priority).

It should also be noted that major Levy-funded IT projects, which can be categorized under operational efficiency and service to the public, have been moved to the Library's CIP. The 2021 budget includes \$2 million for beginning the replacement of SPL's Integrated Library System for processing and tracking books and materials.

Public Service Improvements

There are no projects solely dedicated to public service improvements scheduled for 2021. Public service improvements were considered possibly concurrent with the three projects to improve seismic stability (Green Lake, University and Columbia branches) scheduled over the life of the seven-year levy (though construction at the Green Lake branch is unlikely to begin until 2022). However, as outlined below in the "CIP Revenue Sources" section, funding reductions associated with the COVID-19 pandemic

2021-2026 Proposed Capital Improvement Program

have added uncertainty into the Library's plans to include public service improvements to its three seismic retrofit projects.

Project Selection Criteria

In selecting major maintenance work to accomplish each year, the Library evaluates the preservation of building integrity, impact on safety to the public and staff, importance of the work to core library building functions, operational efficiency gains (both economic and environmental), and opportunities to improve or preserve service to the public.

The Library conducts condition assessments and updates information based on inspection by the capital program manager and facilities maintenance staff. The Library obtains professional evaluations of roofs, mechanical, HVAC and lighting systems to flag deficiencies and identify areas where the capital program may be able to reduce operating costs. Library public services managers develop proposals to change the functional use of library space. These proposals are evaluated for feasibility, cost and urgency, and capital program staff works with Library services managers to scope alternatives. Public input also plays a role in project planning. The Library senior management team has ultimate responsibility for authorizing and prioritizing functional building modifications.

Many library facilities are open seven days per week during normal operations, which requires careful planning and staging of projects to keep libraries open as much as possible while capital improvement work is underway. Flexibility is critical to respond to building issues as they emerge.

CIP Highlights

The Library's 2021-2026 CIP provides a base level of support for asset management during the period when all buildings have surpassed the ten-year mark from their LFA construction or renovation. The 2019 Library Levy provides a total of \$8.8 million (including Seismic/URM and IT Capital allocations) in 2021. The Library will receive \$400,000 in base Real Estate Excise Tax (REET) funding, which is budgeted for the Green Lake seismic project.

As mentioned above, the major effort for the Library's CIP in 2021 will be the continued planning and design for the Green Lake branch seismic retrofit. The ultimate aim of this project is to complete seismic and ADA upgrades; if supplementary funding is secured, the scope could be expanded to include air-conditioning, electrification (to eliminate reliance on fossil fuels), additional ADA access improvements, and a reconfigured elevator. Toward that end, the Library and the Office of Sustainability and Environment have applied for a Washington State Department of Commerce grant for the Green Lake branch project.

The Library's other major project for 2021 is continuing Phase 1 work at the maintenance and operations center at 5516 4th Ave S. The scope includes plumbing upgrades, accessibility modifications for existing restrooms, lighting control upgrades, and potential structural improvements for future HVAC and photovoltaic requirements (in line with transition from fossil fuels).

CIP Revenue Sources

Historically, Real Estate Excise Tax (REET) was the primary source of funding for the Library's CIP, with an additional smaller allocation from the General Fund. In 2012, the Library worked with the Mayor and City Council to develop a Library levy proposal that voters approved in August of that year. One of the core areas the levy funds is major maintenance. Upon passage of the 2012 Library Levy, the City shifted most major maintenance funding from REET/General Fund to the levy, which provided a significant increase in major maintenance funding for major maintenance projects. The 2019 Library Levy continues support to preserve the Library's capital assets including significant investments in seismic upgrades for three branches.

Levy funding is insufficient to fully cover costs associated with patron and programmatically-driven renovation projects, significant building infrastructure renovations and adjustments, or replacement of major building systems at the Central Library and larger branches. Since passage of the 2012 Library Levy, REET revenue has continued to provide additional funding for targeted efforts, such as the Library's Reimagining Spaces initiative (which sought to enhance Library physical spaces to better address changing patron and community needs) or large-scale major maintenance requirements not anticipated during the planning of the levy.

REET revenue plays a vital role in supporting projects that are beyond the scope of the Library's levy-funded major maintenance program. For example, while the levy remains the primary funding source for the seismic retrofit projects at Green Lake, Columbia and University branches, additional funding is necessary to pursue building upgrades that would be considerably less expensive if performed concurrent with the seismic work. Contingent upon funding, those upgrades could include the addition of air-conditioning (so branches could be used as summer cooling centers); elevator additions/improvements to increase access for patrons with mobility challenges; mechanical system modernization and electrification for increased energy efficiency and reduced reliance on fossil fuels; and other interior enhancements. While REET funding alone would not fund elevator upgrades and other ADA accessibility improvements, it is considered part of the funding picture that would allow upgrades to Green Lake, Columbia and University branches beyond the base seismic retrofits.

Summary of Upcoming Budget Issues and Challenges

COVID-19 Pandemic

One challenge that was not foreseen at the beginning of 2020 is the adversity posed by the COVID-19 pandemic. While the pandemic has hit Library operations hardest, Library capital projects have felt the impact as contractors and vendors have experienced staff shortages due to illness or layoffs, and social distancing and other efforts to reduce viral transmission have slowed the progress of many projects at various stages (planning, design and construction). Funding reductions have also prompted reexamination of project scope in some of the larger Library projects. As the impact of the pandemic

persists, continued adaptation of library spaces to maintain the safety of both public and staff may be needed.

The following issues and challenges will need to be addressed in the coming months and years:

Aging Buildings and Infrastructure

Library buildings are among the most intensively-used City facilities in Seattle. The Central Library hosts over 1.2 million visitors annually, with library branches serving over 3.6 million visitors. The Library's historic landmark buildings have unique features such as brick facades, slate roofs and other details. When undertaking maintenance and repair work, it is important to use designs and materials consistent with their landmark status – all factors that increase major maintenance costs. The Central Library poses a different set of challenges; a building of its size, complexity and intensity of use requires significant annual major maintenance to preserve core functionality and continually improve building efficiency. All of these factors were considered in establishing the major maintenance component of the Library's ongoing major maintenance program.

Seismic Preparedness

A 2016 survey conducted by the Seattle Department of Construction and Inspection identified seven unreinforced masonry (URM) facilities in the Library's property portfolio requiring seismic retrofit to reduce the risk of injury and loss of life during an earthquake. The survey classified buildings into three categories of vulnerability (critical, high, and medium) with regard to life safety impacts. Three of the seven Library facilities - Green Lake, University and Columbia branches - fell within the high-vulnerability category (with the remainder in the medium-vulnerability category) and the Library Board of Trustees identified those branches as a critical issue to be addressed. The 2019 Library Levy funded seismic retrofits for those three Carnegie-era branches for the period between 2020 and 2026.

As the URM projects will necessitate closure of the branches for a year or more, other needed building improvements will also be scheduled concurrently. Contingent upon available funding, work may entail roof and envelope restoration; elevator and mechanical system upgrades; interior renovation (including electrical, carpeting, furniture and finishes); and efforts to ensure ADA compliance and equitable access.

Adjusting to a Changing Climate

The Library is also adapting to a changing climate. Several branches – including most of the landmarked branches – are not air-conditioned, and rising summer temperatures can lead to closures which impact patrons and Library operations. The Library is exploring logistics and funding options to add air conditioning to high-use branches that currently lack air-conditioning.

Future Projects / What is on the Horizon

Maintenance and Operations Center

For several years, the Library sought a permanent location for its off-site maintenance shop, storage and Library delivery vehicle parking. In October 2019, the Library acquired a building and parking lot at 5516 4th Ave S, which will replace its current leased maintenance shop and storage space at 6345 6th Ave S (the lease expires at the end of March 2021). Work is necessary at the purchased site to upgrade the electrical service for increased HVAC power requirements, along with future conversion from fossil fuels and potential electric vehicle charging. The space also requires a structural upgrade, new fire alarm and

sprinkler systems, workshop ventilation improvements, and ADA accessibility upgrades. Contingent upon available funding, the Library will attempt to maximize the amount of improvements it can accomplish before occupation, as the work will be less expensive and less intrusive if done before the building is occupied on a full-time basis.

ADA Improvements - Library

Project No:	MC-PL-B3012	BSL Code:	BC-PL-B3000
Project Type:	Ongoing	BSL Name:	Capital Improvements
Project Category:	Improved Facility	Location:	Various Locations
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project represents ADA improvements for The Seattle Public Library, and includes work on accessible paths and adjustments to casework, restroom fixtures, and railings.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Central Library Infrastructure Improvements

Project No:	MC-PL-B3013	BSL Code:	BC-PL-B3000
Project Type:	Ongoing	BSL Name:	Capital Improvements
Project Category:	Improved Facility	Location:	Central Library 1000 4th Ave
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides for improved infrastructure at the 363,000 square foot Central Library. Central requires substantial infrastructure work to achieve operational efficiency and set the stage for its eventual programmatic re-imagining. Changes to Central also require additional lead time for planning and design, due both to its unique physical configuration/infrastructure and iconic architectural status. Typical improvements may include, but are not limited to, structural and mechanical repairs or improvements, safety and security upgrades, lighting and signage enhancements, and wall and floor surface repairs.

Library Major Maintenance

Project No:	MC-PL-B3011	BSL Code:	BC-PL-B3000
Project Type:	Ongoing	BSL Name:	Capital Improvements
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides for major maintenance to Library facilities, which include the 363,000 square foot Central Library and 26 branch libraries as well as storage/shops facilities. Typical improvements may include, but are not limited to, structural and mechanical repairs or improvements, safety and security upgrades, lighting and signage improvements, wall and floor surface repairs, landscape and exterior hard surface repairs, and projects that enhance service delivery or facilitate operational cost-savings at our libraries. This project preserves building integrity and improves functionality, and provides responsible management of the Library's building assets to ensure their long-term operational use. The project was created in 2009 in connection with midyear budget reductions to facilitate efficient asset management.

Seattle Department of Transportation

Overview

The Seattle Department of Transportation (SDOT) is responsible for building and maintaining a safe, reliable, efficient and socially equitable transportation network. In addition, SDOT maintains and improves critical transportation infrastructure of regional, statewide, and national significance in cooperation with external partners. Achieving transportation excellence helps support businesses, improves access to services and opportunity, enhances quality of life, and builds a more sustainable community. This is accomplished by:

- preserving existing transportation infrastructure and using it to its fullest capabilities;
- moving people and goods efficiently and safely, using technology wherever possible to overcome transportation challenges;
- making transit, bicycling, and walking convenient and attractive and reducing reliance on the automobile;
- shaping future transportation improvements that reflect Seattle's role and connections to the region;
- incorporating environmental excellence and climate protection into every decision, project, and program;
- promoting the livability of our neighborhoods and communities;
- guiding investments that contribute to the economic vitality of neighborhood businesses and industries in Seattle and the surrounding region; and
- managing resources wisely with performance measures.

The replacement value of the City's transportation infrastructure is estimated to be approximately \$28 billion. Major system assets include:

- 1,548 lane-miles of arterial streets;
- 2,396 lane-miles of non-arterial streets;
- 2,293 miles of sidewalks;
- 124 bridges;
- 499 stairways;
- 581 retaining walls;
- 22 miles of seawalls;
- 1,118 signalized intersections;
- 47 miles of multi-purpose trails;
- 2,293 miles of improved sidewalks and median pathways;
- 142 miles of on-street bicycle facilities;
- 38,000 street trees;
- 1,512 pay stations;
- 31,823 curb ramps, and;
- more than 194,000 signs.

The 2021 Proposed Budget and the 2021-2026 Proposed Capital Improvement Program (CIP) emphasize transportation safety, efficient mobility of goods, and mobility for people of all ages and abilities. It is worth noting that Seattle is experiencing significant population growth and increasing density; to address these changes, the proposed CIP includes investments to move people and goods efficiently.

2021-2026 Proposed Capital Improvement Program

SDOT is working hard to develop facilities to move people and freight. Transit projects are on the forefront with numerous projects to support transit services including a new pedestrian bridge to facilitate non-motorized travel to the new Northgate Light Rail Station, a multimodal corridor along Roosevelt Way to improve connections with new stations, and the new Madison Street Bus Rapid Transit line. Planning will continue on a new Sound Transit Light Rail alignment between West Seattle, Downtown, the Seattle Center, Interbay, and Ballard. Freight movement will improve with the new South Lander Street Grade Separation, a rebuilt Alaskan Way, and continued spot improvements. Additional investments on the City's bridges includes repairing or replacing the West Seattle Bridge, replacing the Fairview Avenue Bridge and studying improvements needed for 13 additional bridges. SDOT continues to invest in pedestrian and bicycle infrastructure to increase safety for both pedestrians, riders and motorists, through new protected bike lanes, new sidewalks, and improved street crossings.

In November 2018, SDOT published the Move Seattle Levy Workplan, which documented deliverable commitments, delivery plans, schedule assumptions, risk considerations, and spending plans for all 30 Levy subprograms. The 2021-2026 Proposed CIP incorporates these Workplan strategies, and applies updated schedule, risk, and spending assumptions for new developments that have occurred since November 2018. A table summarizing the Move Seattle Levy investments (both operating and capital) is in the Seattle Department of Transportation section of the 2021 Proposed Budget. In early 2021, the Mayor will seek additional input on reductions to Move Seattle Levy investments proposed as part of this budget. That assessment process will include presentations to the Move Seattle Levy Oversight Committee, with opportunity for public input.

The 2021 Proposed Budget and the 2020-2026 Proposed CIP outline investments in critical transportation infrastructure needs and include planned spending of more than \$1.5 billion during the six-year planning period. Key work includes street paving and resurfacing; building new sidewalks and curb ramps; school safety improvements; implementation of the Bike, Pedestrian, and Transit Master Plans; investments to facilitate freight mobility; traffic cameras and signals; bridge projects such as bridge replacement, maintenance, and seismic retrofitting; and support for the Seawall and Waterfront Program. For details, please see the associated explanations below.

Street Paving and Resurfacing: The proposed CIP includes funding for the following projects:

- \$6.7 million in 2021 for Arterial Major Maintenance;
- \$11.2 million in 2021 for Arterial Asphalt & Concrete Program Phase II, and;
- \$1.6 million in 2021 for Non-Arterial Street Resurfacing and Restoration.

In 2021, the Arterial Asphalt & Concrete Program Phase II (AAC) does not have any projects scheduled to start construction. The AAC program will continue construction on the following streets: 15th Ave NE, 15th Ave S, Delridge Way SW (RapidRide H Line) and Green Lake/Wallingford area (Green Lake Loop, N/NE 50th St, N/NE 40th St, N/NE 80th St, and Stone Way).

In addition to major contract paving, SDOT crews are planning to undertake 4 to 6 lane-miles of paving on Arterial Major Maintenance (AMM) and another 2 to 3 lane-miles on Non-Arterial Street Resurfacing and Restoration (NASRR).

Pedestrian Master Plan Investments: The 2021-2026 Proposed CIP includes five projects that are solely dedicated to advancing the recommendations of the Pedestrian Master Plan.

2021-2026 Proposed Capital Improvement Program

Seattle Department of Transportation

- The Pedestrian Master Plan—Crossing Improvements project funds pedestrian crossing improvements, primarily focused on crossings near transit stops and on walking routes to school. The proposed CIP includes \$5.2 million for this project in 2021.
- The Pedestrian Master Plan—New Sidewalks project includes \$4.6 million in 2021 to design and construct new sidewalks. Of the total, partial funding is provided by ticket revenue generated from fixed automated cameras located near school zones. These funds will be used to construct sidewalks within Seattle Public Schools walk zones. The remaining funding focuses on connections to frequent transit stops.
- The Pedestrian Master Plan—School Safety project emphasizes pedestrian improvements in school zones and is partially funded by the School Safety Traffic and Pedestrian Improvement Fund (SSTPIF). This fund was created for school safety infrastructure improvements, school zone camera installation and operation, school zone warning beacon maintenance, school safety program administration, and bicycle and pedestrian safety education. These capital improvements may include school zone signing, crosswalk maintenance, curb bulb and curb ramp replacement and maintenance, sidewalk maintenance, and changes to traffic circulation around schools.
- The Pedestrian Master Plan—Stairway Rehabilitation program totals \$1.5 million from various local funding sources. The program rebuilds and/or rehabilitates stairways to the latest standards, adding proper width, step height, grip rail, landings, and other features required by the Americans with Disabilities Act.
- The SDOT ADA Program includes \$7.7 million of local funding to deliver ADA compliant curb ramps and accessible pedestrian signals. This funding will support the City in meeting the annual ADA curb ramp requirement of 1,250 ramps per year. Of the 2021 funding, \$5.7 million is eligible for use anywhere in Seattle. The remaining \$2.0 million is funded by ticket revenue generated from fixed automated cameras located near school zones. These funds will support the installation of curb ramps near Seattle Public Schools.

The table below shows a summary of the Pedestrian Master Plan investments:

Pedestrian Master Plan Projects	2021
PMP - Crossing Improvements	\$5,238,394
PMP - New Sidewalk Program	\$4,685,827
PMP - School Safety	\$4,535,961
PMP - Stairways	\$1,462,250
SDOT ADA Program	\$7,731,720
Total	\$23,654,152

Bicycle Master Plan Investments: The Bicycle Master Plan includes three projects specifically focused on advancing the Bike Master Plan recommendations, with investments of \$ 11.5 million in 2021. These projects support the Bicycle Master Plan goals of safety, connectivity, ridership, equity, and livability. Typical project types include neighborhood greenways, protected bicycle lanes, other types of bicycle lanes, trail improvements, and bicycle parking, as well as spot improvements and programs that promote safety and encourage riding. In 2018, the Bike Master Plan Implementation program was split

2021-2026 Proposed Capital Improvement Program

Seattle Department of Transportation

into three programs for clarity: Bike Master Plan–Greenways, Bike Master Plan–Protected Bike Lanes and Bike Master Plan–Urban Trails & Bikeways.

The table below shows a summary of the Bicycle Master Plan investments:

Bike Master Plan Projects	2021
Bike Master Plan - Greenways	\$ 5,147,005
Bike Master Plan - Protected Bike Lanes	\$ 5,250,898
Bike Master Plan - Urban Trails & Bikeways	\$ 1,067,125
Total	\$ 11,465,028

In addition to the projects solely dedicated to delivering the Pedestrian and Bicycle Master Plans, there are many SDOT capital projects that indirectly contribute improvements that advance the plans. The table below shows projects that support both the Bike and Pedestrian Master Plans; note that dollars shown are for the entire capital project.

Projects that Support the Bike & Pedestrian Master Plan	2021
Burke-Gilman Trail Ext	\$ 249,624
Delridge Multimodal Improvements	\$ 15,695,955
Heavy Haul Network Program	\$ 5,170,889
Highland Park Roundabout	\$ 1,499,999
Madison Street BRT	\$ 51,350,497
Market / 45th Multimodal Corridor	\$ 534,674
NE 43rd Street Improvements	\$ 2,305,596
Neighborhood Large Projects	\$ 4,956,602
North of Downtown Mobility Act	\$ 1,260,481
Northgate Bridge and 1st Ave MUP	\$ 17,821,598
NPSF - Your Voice, Your Choice	\$ 1,386,152
Rainier/Jackson Multimodal Corridor	\$ 2,088,234
Roosevelt Multimodal Corridor	\$ 15,035,869
Route 40 Northgate to Downtown	\$ 832,819
Sidewalk Safety Repair	\$ 3,063,723
South Lander Grade Separation	\$ 9,964,945
SPU Drainage Partnership - Broadview	\$ 5,215,939
Transit Corridor Improvements	\$ 1,927,814

2021-2026 Proposed Capital Improvement Program

Seattle Department of Transportation

Vision Zero	\$ 2,28,738
Total	\$ 142,590,148

Transit Projects:

The 2021 Proposed CIP contains seven Transit-Plus Multimodal Corridor projects committed to as part of the Move Seattle Levy program. These projects include redesigning major streets with more frequent and reliable buses; and upgrading paving, signals, and other improvements to improve connectivity and safety for all travelers, whether walking, biking, driving, or taking transit.

The Transit-Plus Multimodal Corridor projects include (in order of scheduled delivery): Delridge Way SW – RapidRide H Line, Madison BRT – RapidRide G Line, Route 7 Transit-Plus Multimodal Corridor (Rainier), Route 44 Transit-Plus Multimodal Corridor (Market/45th), RapidRide Roosevelt, and Route 40 Transit-Plus Multimodal Corridor (Fremont/Northgate). These projects rely on a variety of Levy, Local, and Leverage funding, including a still-to-be secured FTA Small Starts grants for the Madison and Roosevelt projects. The seventh project, Route 48 Transit-Plus Multimodal Corridor, is being added in the 2021 proposed budget. In addition to the large capital Transit-Plus Multimodal Corridor projects, the CIP contains budget for transit spot improvements throughout Seattle. These spot improvements focus on operational efficiencies (which help reduce travel time and therefore operational costs), safety, and access enhancements (which improve the rider experience while ensuring safe conditions for riders of all abilities). Investments include installing queue jumps, bus-only lanes, in-lane stops/bus bulbs, and bus stop access amenities.

The table below shows a summary of transit related investments:

Transit Projects	2021
3rd Avenue Corridor Improvements	\$1,400,000
Delridge Multimodal Improvements	\$15,695,955
Lynnwood Link Extension	\$34,230
Madison Street BRT	\$51,350,497
Market / 45th Multimodal Corridor	\$534,674
North of Downtown Mobility Act	\$1,260,481
Northgate Bridge and 1st Ave MUP	\$17,821,598
Rainier/Jackson Multimodal Corridor	\$2,088,234
Rapid Ride C & D Line Improvements	\$6,000,000
Route 40 Northgate to Downtown	\$832,819
Route 48 Transit-Plus Multimodal Corridor	\$300,000
Sound Transit 3 (ST3)	\$1,600,636
STBD Capital Projects	\$2,036
Total	\$ 98,921,960

2021-2026 Proposed Capital Improvement Program

Seattle Department of Transportation

Streetcar Projects: In 2018, having reached 30% design, the Center City Connector project was put on hold while an independent review and engineering analysis was performed. The project was subsequently restarted in January of 2019 with the understanding that additional scope elements to accommodate a larger and heavier vehicle specification would be needed. In August 2019, Seattle City Council approved a \$9 million appropriation in order to advance those additional scope elements to 30% design and establish a new baseline scope, schedule and cost for the entirety of the project. The \$9 million in funding is supported by an interfund loan that will be repaid from the expected 2020 sale of the 800/816 Mercer (Megablock) property. In July 2020 the project was put on hold as part of the Citywide effort to respond to financial shortfalls resulting from COVID-19.

Freight Projects: The most significant freight investment in the proposed CIP is the South Lander Street Grade Separation Project, which is now substantially complete. The \$96 million project will enhance mobility and safety by building a new grade-separated crossing over the Burlington Northern/Santa Fe railroad tracks in SODO. The project is supported by federal and state grants, local funds including Move Seattle Levy and utility funding, as well as partnerships with BNSF and the Port of Seattle.

The Heavy Haul Network Program—East Marginal Way project is currently segmented into at least two phases to maximize grant utilization and deliver safety improvements as quickly as possible. The first phase will create separation between freight and bicycle traffic and make signal improvements aimed at increasing safety for both modes. 100% design for Phase 2 and the Central Segment are occurring concurrently with design of Phase 1 due to a \$4 million Federal Highways Administration grant. Phase 2 reconstructs the North Segment of the roadway to Heavy Haul pavement standards in order to support freight traffic, while the future Central Segment makes a non-motorized connection south to South Alaska. The project is not fully funded and SDOT continues to pursue funding options, including federal grants, contributions from the Port of Seattle, and potential reallocation of project savings from completed Move Seattle Levy projects. Scope adjustments are also under consideration.

The 2021-2026 Proposed CIP also includes \$6.7 million of Move Seattle Levy funds (over the 9-year life of the Levy) for the Freight Spot Improvements project. This project provides smaller-scale vital freight spot improvements such as pavement repairs in industrial areas, turning radius adjustments, and other signage and operational improvements to facilitate movement of freight throughout the city. Funding allocation varies year to year based on planned projects.

The table below shows a summary of the Freight Master Plan investments, including all funds supporting these projects:

Freight Master Plan Projects	2021
Freight Spot Impr Pgm	\$2,974,299
Heavy Haul Network Program	\$5,170,889
South Lander Grade Separation	\$9,964,945
Total	\$18,110,133

Bridge & Structures Projects:

The City owns 124 bridges and maintaining all of them in appropriate condition is a major challenge. The 2021-2026 Proposed CIP includes Move Seattle Levy funding to construct the replacement of the

2021-2026 Proposed Capital Improvement Program

Fairview Avenue N Bridge, which is the last vehicular timber bridge on an arterial in Seattle. The funding is leveraging state and federal grants. It also funds the planning and design of the next phase of the bridge rehabilitation program. The program completed the permanent removal of the Post Alley Bridge and the reconstruction of Post Alley in 2018 and is studying improvements needed for 13 other bridges, which also includes the Ballard, Magnolia, and Thornton Creek bridges. There is also funding set aside for the improvement of pedestrian and bicycle safety on or near City-owned bridges. The Move Seattle Levy also provides funding for the next phase in the Bridge Seismic program. Sixteen bridges are being evaluated as part of this current bridge seismic retrofit program; these bridges are located throughout the city. The Proposed CIP also includes an average of \$1.8 million annually for the Bridge Painting program, which is a critical asset preservation project for the City's 20 structural steel bridges.

Another investment in the 2021-2026 Proposed CIP relates to bridge load rating standards, which were revised by the Federal Highway Administration in November 2013. The revised standards require SDOT to re-evaluate the load ratings for 69 bridges by 2022 at a cost of \$25,000 to \$175,000 per bridge. The proposed CIP includes \$815,000 of funding in 2020 to continue addressing this mandate. SDOT will also be addressing additional load rating requirements specific to Emergency Vehicles, which were mandated in November 2016 by the Federal Highway Administration. The funding impact to address Emergency Vehicles as part of the currently mandated list of bridges as well as all of the City's remaining bridge assets is still being assessed.

Lastly, the Proposed CIP provides funding to continue construction on the Northgate Bridge and Multi-Use Path and reach physical completion of the South Lander Grade Separation. The Northgate Bridge project is a cornerstone of the Move Seattle Levy, representing nearly 3% of the original 9-year levy portfolio, and SDOT is deeply committed to building the project.

In addition to bridges, SDOT also maintains more than 600 retaining walls throughout Seattle. The 2021-2026 Proposed CIP includes \$2 million of street vacations funding to reach 100% design on a new Northlake Retaining Wall. This critical structure is a 452-foot-long lake front timber structure that was constructed in 1951 and is located along the north shoreline of Lake Union adjacent to North Northlake Way. The wall currently shows signs of advanced deterioration, overstress, and some sections of structural failure. The current calculated capacity/demand ratio is 0.1 where 1.0 represents stability. This presents a significant risk to public safety given the right-of-way supported by the wall, the private structures directly offshore and adjacent to the wall, and the close proximity (immediately adjacent and up to 50 feet onshore) of overhead power lines and subsurface gas, sewer, drainage, and water utility infrastructure. This project is part of a pilot project where funding will be appropriated by stage, with a milestone-based review from City Council.

Seattle Waterfront Capital Projects: The four major capital projects in the SDOT budget related to the downtown waterfront are the Alaskan Way Viaduct Replacement Project; the Elliott Bay Seawall Project; the Alaskan Way Main Corridor; and the Overlook Walk and East-West Connections Project. Additionally, separate capital projects exist within the Department of Parks and Recreation (Waterfront Pier projects, Aquarium Expansion).

The Alaskan Way Viaduct Replacement Project includes SDOT's costs related to design review, permitting issuance and administration, and construction support and acceptance. This WSDOT-led program includes the SR-99 Bored Tunnel, projects to reconnect the street grid at the north and south tunnel portals, the Battery Street Tunnel Decommissioning, and the Viaduct Demolition.

2021-2026 Proposed Capital Improvement Program

The Elliott Bay Seawall Project replaces the current seawall from Washington to Virginia streets (also known as the Central Seawall). It also strengthened the pier support for Fire Station 5, which is currently attached to the existing seawall. The project was completed in 2017.

The Alaskan Way Main Corridor and the Overlook Walk and East-West Connection projects are led by the Office of the Waterfront and Civic Projects. The Alaskan Way Main Corridor project includes the design and construction of the Alaskan Way/Elliott Way surface street, the adjoining pedestrian promenade along the waterfront and several east-west connections that are primarily funded by WSDOT. The Overlook Walk and East-West Connections projects include the Overlook Walk that provides pedestrian connections between the waterfront and the Aquarium and Pike Place Market. The project also focuses on the east/west streets that connect the downtown to the waterfront area.

The City began construction of the Alaskan Way Main Corridor project during the summer of 2019 and substantial completion is anticipated to occur in late 2023. Construction of the Overlook Walk and East-West Connection projects are anticipated to begin in 2020 and 2021.

CIP Revenue Sources

Multiple funding sources support the Transportation CIP, including:

- Move Seattle Levy;
- Gas Tax;
- Multimodal funds;
- Real Estate Excise Tax;
- Commercial Parking Tax;
- Vehicle License Fees;
- Long-term financing (general obligation bonds);
- Public Works Trust Fund Loans;
- Street vacation revenues;
- School Safety and Pedestrian funds;
- Street use fees;
- Property sale proceeds;
- Federal and state grants; and
- Funds from various funding partners, such as Sound Transit, the Port of Seattle and the Washington State Department of Transportation.

In 2021 the SDOT proposed CIP budget is \$344 million from the following sources:

Local Revenues

Local funding sources for the Transportation CIP include Move Seattle Levy proceeds, Gas Tax, Multimodal funds, Cumulative Reserve Real Estate Excise Tax (REET) I & II, Commercial Parking Tax, and School Safety Traffic and Pedestrian Improvement funds. These revenues are for programs that improve or maintain the City's transportation system or to provide local matching funds to SDOT's funding partners on large capital projects.

Emerging Needs: Funding Reallocations

As part of the annual budget development process, SDOT evaluates updated project costs, leverage opportunities, and new mandates against available resources. The 2021-2026 Proposed CIP takes advantage of several opportunities to adapt resources to emerging needs, many of which are discussed throughout this document. For reference, the table below summarizes material funding reallocations within the 6-year planning period. Reallocations do not impact scope or delivery timeframe for donating projects.

Reallocating From	Funding Source	Reallocating to	Purpose of Reallocation	Amount
Bridge Rehab and Replacement	Move Seattle Levy	Northgate Bridge and MUP	Resolve funding gap	\$7.5 million
South Lander Grade Separation	Move Seattle Levy	Northgate Bridge and MUP		\$4.1 million
South Lander Grade Separation	Move Seattle Levy	SDOT ADA Program	Fund additional ramps to meet Consent Decree	\$5.2 million
South Lander Grade Separation	Bonds	Northlake Retaining Wall	Fund design of critical infrastructure project.	\$2 million

2021-2026 Proposed Capital Improvement Program

Seattle Department of Transportation

South Lander Grade Separation	Move Seattle Levy	Heavy Haul (East Marginal Way, Phase I)	Fully fund Phase I through construction, as well as design of Phase II	\$903,000
23rd Ave Corridor (Phase II)	Move Seattle Levy	Heavy Haul (East Marginal Way, Phase I)		\$600,000
Next Gen ITS Improvements	Move Seattle Levy	Ctr Cty Gateway & S Michigan St ITS	Provide grant match (sister projects)	\$2.7 million

Thematic Priorities

SDOT's vision for Seattle is a thriving, equitable community powered by dependable transportation. The organization's mission is to deliver a transportation system that provides safe and affordable access to places and opportunities. To accomplish this, SDOT prioritizes services and capital projects based on the core principles in the City's 10-Year Strategic Vision for Transportation - Move Seattle. The goal of the strategic vision is to organize actions around SDOT's core values:

1. **Equity** – We believe transportation must meet the needs of communities of color and those of all incomes, abilities, and ages. Our goal is to partner with our communities to build a racially equitable and socially just transportation system.
2. **Safety** – We believe everyone should be able to move safely throughout the City. Our goal is to create safe transportation environments and eliminate serious and fatal crashes in Seattle.
3. **Mobility** – We believe transportation choices are critical to access opportunity. Our goal is to build, operate, and maintain an accessible transportation system that reliably connects people, places, and goods.
4. **Sustainability** – We believe environmental health should be improved for future generations through sustainable transportation. Our goal is to address the climate crisis through a sustainable, resilient transportation system.
5. **Livability** – We believe transportation is essential to support daily life. Our goal is to manage our streets and sidewalks to enrich public life and improve community health.
6. **Excellence** – We believe in exceeding the expectations of the communities we serve. Our goal is to build an SDOT team committed to excellence and equipped with skills to meet the challenges of today and tomorrow.

Transportation projects are initiated through a number of methods including planning processes (modal, subarea, neighborhood planning), preservation, operations and safety needs assessment, regulatory requirements, elected official direction and, in some instances, from neighborhood input such as the Neighborhood Street Fund (Your Voice, Your Choice) program.

Stakeholders have significant input in development of all SDOT plans through public involvement processes. Seattle's Pedestrian, Bicycle, Transit and Freight Advisory Boards also consulted regularly to provide input on project/program needs. Since 2016, the Move Seattle Levy Oversight Committee has reviewed SDOT's program and project priorities and financial plans, and made recommendations to the Department, the Mayor, and City Council on the allocation of resources. Representatives from SDOT regularly meet with the Oversight Committee, who review to provide updates and solicit input on the allocation of resources. Prior to 2016, the Bridging the Gap Oversight Committee performed the same advisory function.

2021-2026 Proposed Capital Improvement Program

Many factors can affect SDOT's project and funding decisions, including regulatory requirements, state and federal law (such as the Americans with Disabilities Act), and construction seasons. Opportunities to leverage the City's limited funding with grants or coordinating projects with other agencies can also affect SDOT's decisions.

In every case, SDOT strives to implement the City's policy goals laid out in Seattle's Comprehensive Plan and individual policy initiatives such as Complete Streets, the Race and Social Justice Initiative, and the Environmental Management Initiative. SDOT's Transportation Strategic Plan, modal plans and subarea plans provide an overall framework for implementing these goals.

23rd Avenue Corridor Improvements

Project No:	MC-TR-C037	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	23rd AVE S/E John ST/Rainier AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2013 - 2022	Neighborhood District:	Central
Total Project Cost:	\$58,096	Urban Village:	23rd & Union-Jackson

This multi-phase project will reconstruct sidewalks, enhance the pedestrian environment, reconstruct pavement, upgrade signalized intersections, upgrade controller cabinets to meet transit signal priority (TSP) needs, and accommodate Intelligent Transportation Systems (ITS) upgrades. Activities include the following: install ITS to provide travel time information; install fiber communication as needed along the corridor to relay information back to the Traffic Management Center; and install poles for support of future trolley wires in two gap segments of the trolley network. The project will also include design and construction of a 3-lane cross section (with 4 lanes at isolated intersections) between John Street and Rainier Ave South, as well as a greenway facility on a parallel street to facilitate north-south bicycle travel. The project includes a Vision Zero element to construct new traffic signals; parking modifications; new curb ramps; traffic calming; speed reduction; pedestrian safety; and transit stop improvements. Phases I and II are substantially complete. The final Vision Zero phase is on hold and design is complete.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

35th Avenue SW Paving

Project No:	MC-TR-C099	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	35th Ave. SW from SW Morgan St to SW Roxbury
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 1
Start/End Date:	2023 - 2025	Neighborhood District:	Delridge
Total Project Cost:	\$35,000	Urban Village:	West Seattle Junction

This project will resurface and reconstruct 35th Ave. SW from SW Morgan St. to SW Roxbury St.

Unsecured Funding:	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total
To Be Determined	-	-	-	-	35,000	-	-	-	35,000
Total:	-	-	-	-	35,000	-	-	-	35,000

Unsecured Funding Strategy: Funding for this project was not included as part of the Levy to Move Seattle paving commitments; the project is also not likely to rank highly for grant funding. Funding for this project may depend upon identification of new/incremental revenue sources.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by bringing assets to a new or like new condition.

3rd Avenue Corridor Improvements

Project No:	MC-TR-C034	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	3rd AVE
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project makes multimodal improvements for the Third Avenue transit corridor in downtown Seattle, specifically focused on bus stop, streetscape, and transit streetpriority improvements, e.g. installation of Third Avenue and Denny Way transit only signal, on Third Avenue between S. Jackson Street and Denny Way.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Accela Permitting System

Project No:	MC-TR-C001	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project will migrate SDOT permitting operations from the Hansen 7 system to the new Citywide Accela permitting platform. The vision for Accela is to create a fully integrated permitting system that provides an online, all in one place experience for Seattle customers and staff. Once the initial migration is complete, this project will provide ongoing funding for routine system improvements as well as periodic major upgrades needed to stay current with changing technology.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total
Street Vacations - SVF	-	-	400	-	-	-	-	-	400
User Fees	11,019	11,458	-	-	1,000	1,000	1,000	-	25,477
Total:	11,019	11,458	400	-	1,000	1,000	1,000	-	25,877
Fund Appropriations / Allocations¹	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total
Transportation Fund	11,019	11,458	400	-	1,000	1,000	1,000	-	25,877
Total:	11,019	11,458	400	-	1,000	1,000	1,000	-	25,877

O&M Impacts: Maintenance for the permitting system is paid for via a central cost allocation from Seattle IT and then recovered against SDOT projects through overhead allocations. The \$1M annual budget after 2021 represents a sinking fund for eventual system replacement.

Accessible Mt. Baker Implementation

Project No:	MC-TR-C002	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 3
Start/End Date:	2017 - 2023	Neighborhood District:	East District
Total Project Cost:	\$2,900	Urban Village:	Madison-Miller

The project will transform the Mt. Baker station area into a safer and comfortable place for people to walk, bike, and make transit connections; and for the Mt. Baker Town Center to take root and flourish. In addition to prioritizing walking and biking, the project will maintain transit and freight reliability and create more predictable conditions for people driving.

Alaskan Way Main Corridor

Project No:	MC-TR-C072	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$379,183	Urban Village:	Multiple

This project designs and constructs the rebuilt Alaskan Way/Elliott Way surface streets and the adjoining pedestrian promenade along the Seattle waterfront following the demolition of the Alaskan Way Viaduct. The State of Washington has built a deep bore tunnel to replace the Alaskan Way Viaduct (Viaduct) and has relocated State Route (SR) 99 into the tunnel. The City of Seattle is responsible for the Alaskan Way/Elliott Way surface street and the promenade. The project also includes replacement of and improvements to four key connections impacted by the Viaduct removal, namely Seneca Street, Columbia Street, and the Marion Street and Lenora pedestrian bridges. This project is part of the overall waterfront improvement program. Construction of these improvements began in 2019.

This project includes funding from the Waterfront Local Improvement District (LID #7651) formed by City Council via Ordinance 125760 in January 2019. (Interfund Loan will be repaid by Local Improvement District Bonds (\$4.7 million), LTGO Bonds (\$4.2 million), REET (\$0.29 million), Street Vacations (\$0.41 million), Private Funding/Donations (\$0.9 million) and Private Utilities (\$1.1 million).

O&M Impacts: This project replaces aging infrastructure along the Central Waterfront providing an O&M benefit. It also builds new infrastructure for several City departments. The maintenance of the new public open space and pedestrian promenade will be funded primarily with Metropolitan Park District funds set-aside for this purpose. Transportation infrastructure capital elements are planned to be maintained through the proposed Waterfront Transportation Infrastructure Maintenance project, MC-TR-109.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Alaskan Way Viaduct Replacement

Project No:	MC-TR-C066	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	ALASKAN WY VI SB
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2001 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$99,864	Urban Village:	Multiple

This project funds the City's involvement in the replacement of the Alaskan Way Viaduct with the bored tunnel hybrid alternative. Replacement of this structure will enhance overall safety, as this structure is seismically vulnerable. In prior years, this project included design of the Central Seawall and Waterfront Improvements. For transparency purposes, the Seawall and Waterfront work was reflected in three new capital projects, Elliott Bay Seawall Project (MC-TR-C014), Alaskan Way Main Corridor Program (MC-TR-C066), and the Overlook Walk and East-West Connections Program (MC-TR-C073).

Arterial Asphalt & Concrete Program Phase II

Project No:	MC-TR-C033	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

The Arterial Asphalt and Concrete Program maintains Seattle's 1,581 lane miles of arterial streets through resurfacing and reconstruction projects. The Department uses a pavement management system to track the condition of arterial street pavement, to develop maintenance needs and establish priorities, and to select the streets to be rehabilitated each year. This project improves the quality and condition of the City's arterials.

Arterial Major Maintenance

Project No:	MC-TR-C071	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project repairs and/or replaces deteriorated pavement on arterial streets. Arterial Major Maintenance paving work typically spans one to three city blocks. It allows the City to respond quickly and cost effectively to pavement issues that are too large to be addressed with a pothole repair but too small to be efficiently contracted. Project prioritization is based on pavement condition; cost; transit, bicycle, pedestrian and freight use; traffic volume; coordination opportunities; complaints and claims; and geographic balance across the city. The work extends the service life of existing pavement structures.

Unsecured Funding Strategy: This program is evaluated annually for continuation of REET funding, based on fund availability. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: This is a capital maintenance project that reduces the need for O&M by improving asset condition.

Ballard to Downtown High Capacity Transit and Ship Canal Crossing Project

Project No:	MC-TR-C080	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Downtown Ballard
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2013 - 2017	Neighborhood District:	Multiple
Total Project Cost:	\$800	Urban Village:	Multiple

This project will develop recommendations for implementation of high capacity transit alternatives between Ballard and Downtown Seattle. The project will build on the Ballard-Fremont-South Lake Union-Downtown corridor identified in the Transit Master Plan. The work will be done in conjunction with Sound Transit. The project will also develop conceptual designs and cost estimates for a new ship canal crossing for transit, pedestrians, and bicycles.

Bike Master Plan - Greenways

Project No:	MC-TR-C063	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program creates routes on residential streets that are optimized for safer and more comfortable walking and biking for people of all ages and abilities. Typical improvements include curb ramps, speed humps, crosswalks, median islands, shared lane markings, stop signs, traffic signals, pavement and sidewalk repair, and wayfinding signs. The goals of the program are to design streets with lower vehicle speeds and volumes; to increase the number of people walking and biking on residential streets; and to improve walking and biking access to schools, trails, parks, transit and neighborhood businesses.

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program implements the Seattle Bicycle Master Plan. Typical improvements may include installing protected bike lanes, bike lanes and sharrows, bicycle route signing, completing key links in the urban trails network, adding bicycle/pedestrian signals to complete the network, and reconstructing key sections of the trails. The goals of the program are to increase bicycle safety and access while reducing bicycle crashes. This program includes funding for street improvement and trail construction and is consistent with the focus in the City's Transportation Strategic Plan (TSP) on encouraging walking and biking. The Accelerated Move Seattle Levy - Lid Lift Revenues represent spending that is in excess of available levy funds; consequently, Move Seattle appropriations are reduced in future years so that the total Move Seattle funding and expenditures are balanced over the nine years of the levy. LTD actuals may include the BMP spot improvements, Urban Trails, and Neighborhood Greenways, which were previously combined with this project's budget.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Bridge Load Rating

Project No:	MC-TR-C006	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This program rates bridges for safe load-carry capacity as part of a federally mandated program. The work on this project, performed by both City staff and consultants, ensures public safety. Due to new load rating standards issued by the FHA on November 13, 2013 for Specialized Hauling Vehicles (SHV), additional funding was added to the program as part of the 2015-2020 Proposed CIP. The requested funding needed to meet these new standards was provided in 2019; however, shortly after signing the FAST ACT in 2015, FHWA submitted a 2016 memo that required bridge load ratings to consider Emergency Vehicles if they are at least one road-mile access to and from the National Network of highways. The program is currently assessing whether additional funding beyond 2021 will be needed to meet this mandate.

This ongoing asset preservation program provides for the periodic painting of the City's steel structures that are maintained by the Roadway Structures Division. The painting cycle is initially determined by applying Federal Highway Administration standards for coating life and is supplemented by annual physical inspections to assess the rate of deterioration.

Bridge Rehabilitation and Replacement Phase II

Project No:	MC-TR-C039	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This asset preservation program funds major bridge rehabilitation or bridge replacement. The current program, funded by the Levy to Move Seattle, is focused on planning studies. The objective of these bridge planning studies is to identify if the bridge should be rehabilitated or replaced and provided planning level costs to allow for the City and the Program Owner to develop a funding plan for the future rehabilitation or replacement of these bridges.

Bridge Seismic - Phase III

Project No:	MC-TR-C008	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

The program prioritizes and implements seismic retrofits to bridges based seismic vulnerability. Concept level analysis and evaluation is performed to develop a retrofit strategy and cost estimate. As funding allows, retrofit design and construction phases are implemented. If full funding is not available, seismic retrofits are scaled to the appropriate funding level that would still provide improvements in the seismic resiliency to the bridge structure. As part of the evaluation process a cost-benefit assessment is made to determine if replacing the structure is a more appropriate course of action then seismically retrofitting the structure. 16 bridges are part of the current phase of the program which is funded by the Levy to Move Seattle.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

O&M Impacts: Not applicable - does not create new assets.

BRT Concepts Design

Project No:	MC-TR-C010	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2016 - 2021	Neighborhood District:	Multiple
Total Project Cost:	\$2,091	Urban Village:	Multiple

This project will advance the concept designs for Seattle's RapidRide and Transit-Plus Multimodal Corridor Expansion program. In order to deliver the corridor improvements, this work includes assessment and development of corridor design, detailed line and network ridership forecasting, capital cost estimates, traffic and environmental analysis, modal integration, and funding plans.

Burke Gilman Trail Improvements - UW Campus

Project No:	MC-TR-C086	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 4
Start/End Date:	2017 - 2019	Neighborhood District:	Northeast
Total Project Cost:	\$750	Urban Village:	University District

The project will implement spot improvements to the Burke-Gilman Trail north of the campus including pavement repair and crossing upgrades. If needed, a portion of the funding will be available to help the University complete design of the second phase of upgrades to the campus portion of the trail.

Burke-Gilman Trail Extension

Project No:	MC-TR-C044	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 6
Start/End Date:	1995 - 2022	Neighborhood District:	Ballard
Total Project Cost:	\$37,172	Urban Village:	Ballard

This project extends the Burke-Gilman Trail from its current terminus at Eighth Avenue NW to Golden Gardens Park. The segment from Eighth Avenue NW to 11th Avenue NW was constructed in 2001. The Ballard Locks to NW 60th Street segment was constructed in 2005. The NW 60th Street to Golden Gardens segment was constructed in 2008. The "Missing Link" segment from 11th Avenue NW to the Ballard Locks was planned for construction in 2011 and 2012 but has been delayed due to ongoing litigation. Project completion is anticipated in 2024.

Center City Gateway and South Michigan Street Intelligent Transportation Systems (ITS)

Project No:	MC-TR-C012	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	S Spokane ST/Western Ave/E Marginal Way/Stewart
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2015 - 2022	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$15,210	Urban Village:	Not in an Urban Village

The project will install traffic cameras, upgraded signals, vehicle detection devices and fiber communication in the Center City Gateway ITS and South Michigan Street ITS projects. The project will also construct an ITS corridor along Denny Way between Western Ave and Stewart including traffic signal modifications and closed-circuit television cameras, a dynamic message sign and ADA compliant ramps. A robust and reliable Intelligent Transportation System ensures that all modes of transportation can move through the City in a safe and sustainable manner.

Center City Streetcar Connector

Project No:	MC-TR-C040	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2012 - 2026	Neighborhood District:	Multiple
Total Project Cost:	\$237,369	Urban Village:	Multiple

The Center City Connector is a 1.27-mile segment of the Seattle Streetcar that will link the South Lake Union and First Hill Streetcar lines, creating a system that will connect over a dozen Seattle neighborhoods in Seattle's Center City. The project includes procurement of up to ten additional streetcars and design and construction of track and guideway; station shelters and platforms; overhead contact system; traction power substation; storage facility expansion; roadway and drainage; ADA curb ramps; curb space management; and urban streetscape.

An interfund loan of \$9,000,000 was passed in August 2019, allowing the project to progress to 30% design. In June 2020, the project was paused as part of the Citywide effort to mitigate revenue losses due to Covid-19

The project was put on indefinite pause in July 2020 in response to Citywide budget shortfalls caused by Covid-19

Unsecured Funding Strategy: SDOT will continue to work with the Mayor's office and City Council to determine the future of the project.

O&M Impacts: The Center City Connector would combine the two existing lines into a single Streetcar network. SDOT is currently working in collaboration with King County Metro on an operation plan for a single line. We expect to have an estimate of annual operating costs when the Center City Connector project reaches 30% design.

This project improves pavement conditions, enhances safety, and improves traffic operation for all modes. The project will add transit lanes and improve transit speed and reliability. It includes protected bike lanes, sidewalk improvements, and amenities for walkers and transit riders along the corridor. It will streamline traffic operations and improve Multimodal connections between transit, freight, pedestrians and general-purpose vehicles.

Elliott Bay Seawall Project

Project No:	MC-TR-C014	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	Rehabilitation or Restoration	Location:	Alaskan WAY
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2013 - 2017	Neighborhood District:	Downtown
Total Project Cost:	\$369,408	Urban Village:	Multiple

This project, created in 2013, is a critical public safety project to replace the existing seawall from S. Washington Street to Virginia Street with a structure that meets current safety and design standards. The project will also improve the nearshore ecosystem of Elliott Bay and provide opportunities for recreation and shoreline access. Costs incurred prior to 2013 are included in the Alaskan Way Viaduct Replacement project (MC-TR-C066).

Fauntleroy Way SW Boulevard

Project No:	MC-TR-C046	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Fauntleroy WAY SW/35th AVE SW/SW Alaska ST
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2012 - 2022	Neighborhood District:	Southwest
Total Project Cost:	\$3,009	Urban Village:	West Seattle Junction

This project transforms Fauntleroy Way SW into a boulevard. The project elements include: a planted median, signature lighting fixtures, a protected bicycle facility, a pedestrian zone with sidewalks and planting areas including street trees, pedestrian lighting, potential stormwater infrastructure and art, as well as safety improvements for crossing movements for all modes. These safety improvements include bicycle and pedestrian crossings, signals, reconfigured intersections and bulbs, and pavement improvements. This project is on-hold pending Sound Transit decision on the West Seattle Extension alignment and does not have an expected Completion Date as a result.

First Hill Streetcar

Project No:	MC-TR-C075	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	Various
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2009 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$140,701	Urban Village:	Multiple

This project constructs a modern, low-floor streetcar system connecting First Hill employment centers to the regional Link light rail system, including but not limited to the International District/Chinatown Station and the Capitol Hill Station (at Broadway and John Street). The system will provide reliable, frequent service with headways of approximately 10 minutes during peak periods.

Freight Spot Improvement Program

Project No:	MC-TR-C047	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project includes small scale mobility improvements to the City's street system to improve connections between port facilities, railroad intermodal yards, industrial businesses, the regional highway system, and the first and last miles in the supply chain. Project types include turning radius adjustments, channelization changes, left-turn improvements, and signage to direct freight to destinations and alert drivers to steep grades or sharp turns.

Graham Street Station

Project No:	MC-TR-C082	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	MLK between Graham and Morgan
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 2
Start/End Date:	2016 - 2024	Neighborhood District:	Southeast
Total Project Cost:	\$10,000	Urban Village:	Columbia City

This project funds the City's portion of an infill light rail station on the Sound Transit Central Link line near Martin Luther King Jr. Way South at South Graham Street, between the existing Columbia City and Othello Stations. The station would be in the northern portion of the MLK at Holly St Residential Urban Village. Funding from the Move Seattle Levy package is used to leverage a future partnership with Sound Transit.

O&M Impacts: This project provides SDOT support to Sound Transit, who will own the light rail asset. SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Hazard Mitigation Program - Areaways

Project No:	MC-TR-C035	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Pioneer Square

This ongoing asset preservation program funds ongoing inspection and repair/reconstruction of areaways to reduce risks to City facilities and the general public. Areaways are usable space, generally in the street right-of-way, constructed under sidewalks between the building foundation and street wall. Typical improvements may include, but are not limited to, repairs to the existing areaway and/or filling the areaway in order to eliminate the asset. Currently the program is conducting a comprehensive evaluation of areaways, specifically within the Pioneer Square District, where load restrictions are currently put in place along the curb lane in order to manage the public risk associated with collapse of the areaway retaining walls.

Hazard Mitigation Program - Landslide Mitigation Projects

Project No:	MC-TR-C015	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project enables SDOT to address and repair landslide concerns that affect the right-of-way. The Landslide Mitigation Program provides SDOT with staff and resources to identify and prioritize landslide concerns, to undertake reconnaissance engineering and geotechnical studies of problem areas, and to make repairs at the highest priority locations, usually where landslide concerns have caused the roadway to be partially or completely closed.

Heavy Haul Network Program - East Marginal Way

Project No:	MC-TR-C090	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	E Marginal WAY
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2016 - 2027	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$60,237	Urban Village:	Not in an Urban Village

This program supports freight mobility by funding roadway improvements on the Heavy Haul Network (Ordinance 124890) to meet the needs of freight transported on our streets between Port facilities, rail yards, and industrial businesses. The initial project under this Program is the E Marginal Way Corridor Improvement project, which will be a multi-phase project. Phase I constructs a separated bicycle/pedestrian facility between S Atlantic St and Spokane St. Phase II includes roadway reconstruction, signal and ITS enhancements and safety measures to reduce conflicts between freight and non-motorized users. The Port of Seattle, through Memorandum of Understanding, is to provide partnership funding.

Note: The project title changed from "Heavy Haul Network Program" to "Heavy Haul Network Program - East Marginal Way"

Highland Park Intersection Improvements

Project No:	MC-TR-C100	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Highland Park Way SW and SW Holden ST
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2019 - 2022	Neighborhood District:	Southwest
Total Project Cost:	\$4,100	Urban Village:	Not in an Urban Village

This project would mitigate collision and congestion issues at the intersection of Highland Park Way SW and SW Holden St. There are currently two alternatives being considered for this work. One alternative would be installing a new traffic signals, sidewalks, curb ramps and marked crosswalks. SDOT estimates the cost of this alternative at \$3M. The other alternative would install a roundabout at this intersection. After advancing design of the roundabout, we now know that significant grading is needed to accommodate the roundabout and avoid new safety issues. This has pushed the cost estimate to \$7.3M. The name of this project has been changed from Highland Park Roundabout to Highland Park Intersection Improvements. The name change occurred as part of the second quarter 2019 Supplemental Amendment-Attachment A.

King Street Station Tenant Improvements

Project No:	MC-TR-C049	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	301 S Jackson ST
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 2
Start/End Date:	2016 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$5,478	Urban Village:	Pioneer Square

This project will make tenant improvements to King Street Station to make uninhabited spaces ready for occupation. Tenant improvements will include installation of HVAC and electrical connections, bathrooms, office space, finishes, and restoration of historic areas. The tenant improvements will incorporate features consistent with the City's Sustainable Building Policy and the full restoration and rehabilitation of the building, which was completed by SDOT in 2013.

Lynnwood Link Extension

Project No:	MC-TR-C089	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Northgate
Current Project Stage:	N/A	Council District:	Council District 5
Start/End Date:	N/A	Neighborhood District:	Northeast
Total Project Cost:	N/A	Urban Village:	Northgate

This project provides design review, permitting, and construction support services for the Sound Transit Lynnwood Link Extension project. It builds four new light rail stations and will extend the connection from Northgate to Lynnwood.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Transportation Fund	169	226	34	70	70	65	-	-	634
Total:	169	226	34	70	70	65	-	-	634

O&M Impacts: This project provides SDOT support to Sound Transit, who will own the light rail asset. SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Madison BRT - RapidRide G Line

Project No:	MC-TR-C051	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Madison ST/Alaskan Way/Martin Luther King Junior W
Current Project Stage:	Stage 3 - Design	Council District:	Council District 3
Start/End Date:	2013 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$134,724	Urban Village:	Multiple

This project will include concept design and environmental review of high-capacity transit and multimodal improvements in the Madison corridor between Alaskan Way and Martin Luther King Jr. Way, connecting the Central Area with the First Hill, Downtown, and Waterfront neighborhoods. The project is identified as a priority in the Transit Master Plan. The purpose is to improve transit capacity, travel time, reliability, connectivity, comfort, visibility, and legibility in the Madison corridor.

Note: The project title is changing from "Madison Street Bus Rapid Transit" to "Madison BRT - RapidRide G Line"

Magnolia Bridge Replacement Project

Project No:	MC-TR-C083	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	15th Ave NW and Magnolia Way W.
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:		Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$10,030	Urban Village:	Ballard-Interbay Northend

The environmental analysis for replacing this bridge evaluated several possible alternatives including rehabilitation of the existing structure. In 2007, an environmental assessment was published and described the preferred alternative, a new bridge south of and adjacent to the existing bridge. The Type, Size, and Location (TS&L) Report was completed in 2007, selecting a concrete box girder supported on flared columns as the appropriate structure type for this new bridge. The Levy to Move Seattle provided limited funds to conduct a plan study that would evaluate a more cost effective alternative than a "1-to-1" replacement. Even with the reduced cost for pursuing an alternative option than a full replacement, total project cost and a funding strategy to move the project forward is unclear. The project is currently on hold.

Mercer Corridor Project West Phase

Project No:	MC-TR-C017	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	New Facility	Location:	Mercer ST/Elliott AVE W/Dexter AVE N
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 7
Start/End Date:	2010 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$88,610	Urban Village:	Multiple

This project converts Mercer Street to a two-way street between Dexter Ave and Elliott Ave West. The Mercer underpass at Aurora Ave will be widened to allow for six travel lanes and a bicycle/pedestrian shared use path between Dexter Ave and 5th Ave North. Roy Street, between Fifth Ave N and Queen Anne Ave, will also be converted to a two-way street with on-road bicycle lanes.

NE 43rd Street Improvements

Project No:	MC-TR-C074	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	NE 43rd ST
Current Project Stage:	Stage 4 - Procurement/Bid	Council District:	Council District 4
Start/End Date:	2017 - 2020	Neighborhood District:	Northeast
Total Project Cost:	\$5,084	Urban Village:	University District

This project will implement streetscape and pedestrian improvements on NE 43rd Street between Brooklyn Ave NE and 15th Ave NE to improve access to the Link Light Rail station, which is scheduled to open in 2021. The project will transform the operation of NE 43rd St between Brooklyn Ave NE and University Way NE to one-way westbound transit-only travel and between University Way NE and 15th Ave NE to one-way westbound, all vehicle travel. The roadway will be optimized for pedestrians with a curb-less roadway section, widened sidewalks, pedestrian illumination, bio retention, and rain gardens. A protected bike lane will be provided for eastbound bike traffic and westbound bicycle traffic will share the travel lane with westbound traffic. The project is scheduled to begin construction in the summer of 2020.

Neighborhood Parks Street Fund - Your Voice, Your Choice

Project No:	MC-TR-C022	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program identifies projects estimated less than \$100,000 that are prioritized through participatory budgeting in each of the 7 council districts. Typical improvements may include, but are not limited to, sidewalk construction, repairs and replacement, installation of curb bulbs or other traffic calming devices, and improvements to crosswalks. The program enhances the safety, quality, and condition of the pedestrian and neighborhood environments. This project was formerly known as "NPSF Neighborhood Parks Street Fund" and "NSF/CRS Neighborhood Program."

Neighborhood Traffic Control Program

Project No:	MC-TR-C019	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program installs traffic calming devices on non-arterials citywide, including traffic circles, speed humps, and street narrowing. This program also supports the pilot Home Zones program, which creates neighborhood-wide traffic calming plans.

Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project installs new traffic signals or significant capital improvements to existing signals to improve traffic flow, reduce the frequency and severity of traffic collisions, and support pedestrian, bicycle or transit activity. Location choices are based upon pedestrian, bicycle, and vehicle volumes; school, senior citizen, and handicapped accessible crossing requirements; transit speed and reliability; and collisions frequency criteria.

Non-Arterial Street Resurfacing and Restoration

Project No:	MC-TR-C041	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project repairs and/or replaces deteriorated asphalt pavement and/or concrete panels on non-arterial streets. Project locations are chosen annually based upon the degree of deterioration as confirmed by Department staff field observations, citizen service requests, claims, and potential City liability. High priority is given to non-arterial streets used by transit, in areas with heavy pedestrian and bicycle traffic, and which serve business and industry.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Northlake Retaining Wall

Project No:	MC-TR-C102	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Northlake Way @ Stone Way
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 4
Start/End Date:	2019 - 2023	Neighborhood District:	Not in a Neighborhood District
Total Project Cost Range:	27,500 - 35,000	Urban Village:	Fremont

This project will repair the Northlake Retaining Wall, which is a 452-foot-long lake front timber structure that was constructed in 1951 and is located at the north end of Lake Union adjacent to North Northlake Avenue. The wall currently shows signs of advanced deterioration, overstress, and some sections of structural failure. The current calculated capacity/demand ratio is 0.1 where 1.0 represents stability. This presents a significant risk to public safety given the right-of-way supported by the wall, the private structures directly outshore and adjacent to the wall, and the close proximity (immediately adjacent and up to 50 feet inshore) of overhead power lines and subsurface gas, sewer, drainage, and water utility infrastructure.

Total:	-	-	-	23,000	500	-	-	-	23,500

Financial Planning Strategy: The estimated cost to reach the 100% design level is \$4,000,000, \$2,000,000 of which will be funded by LTGO bonds. The remaining \$2,000,000 needed to reach 100% of design will be funded with Street Vacations proceeds.

At 30% design, SDOT will reevaluate the total project cost and the financial planning strategy for the remaining costs of the project, which will include local funding, debt financing, and grant funding.

O&M Impacts: There will be ongoing operations and maintenance (O&M) costs for SDOT to maintain the retaining wall after full replacement. The estimate is \$50,000/year over the 75-year design life of the structure which includes labor (maintenance, engineering, and inspection) and non-labor (materials). This would be added to the Bridge/Structures Maintenance O&M budget. An O&M BIP will be submitted along with subsequent BIPs for the final design phases in the future.

Project Category:	New Investment	Location:	Multiple
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Downtown
Total Project Cost:	\$184,339	Urban Village:	Downtown

Removing the Alaskan Way Viaduct provides the opportunity for the City to improve key connections between the downtown core and the waterfront. The specific east/west streets targeted for improving connections include: Bell Street, King Street, Main Street, Pike Street, Pine Street, Railroad Way, Union Street, Washington Street, and Yesler Way. In addition to these east/west street connections, the waterfront improvement program also includes Overlook Walk, which will provide a pedestrian oriented connection between the waterfront, the Aquarium and Pike Place Market with ADA access, views, and public open spaces. This project is part of the overall waterfront improvement program. Expenditures to the Local Improvement District Bonds revenue source that occur prior to 2019 represent anticipated future bond sales. This project includes funding from the Waterfront Local Improvement District (LID #7651) formed by City Council via Ordinance 125760 in January 2019. (Interfund Loan shown through 2020 will be repaid by Local Improvement District Bonds. The Interfund Loan – CWIF shown in 2023 will be repaid with philanthropic funds in 2024 and 2025.)

O&M Impacts: This project includes a mix of upgrading existing streets and building new infrastructure. O&M for new public open spaces, such as the Overlook Walk will be funded by the Metropolitan Park District. Transportation infrastructure capital elements are planned to be maintained through the proposed Waterfront Transportation Infrastructure Maintenance project, MC-TR-109.

Pay Stations

Project No:	MC-TR-C024	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Investment	Location:	Various
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2004 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$30,550	Urban Village:	Multiple

This project funds the installation of parking pay stations to manage on-street parking and improve access for visitors and customers in commercial and retail areas. From 2015 through 2019, SDOT replaced its aging pay stations through a new vendor with a combination of brand-new pay stations and retrofit pay stations (keeping the older stainless-steel housing where possible but installing new technology and software.) SDOT has adopted an "Asset Lite" strategy, replacing 15%-20% fewer pay stations, while keeping at least one pay station on every block. Through the end of 2019, SDOT installed 1,030 new pay stations and 580 retrofit pay stations. The project includes the transition from pay and display payment to pay-by-plate payment, which was accomplished at the end of 2019. As other neighborhood parking plans are completed through SDOT's Community Access and Parking Program, and paid parking is otherwise expanded to new areas, supplemental budget may be requested for this project to purchase and install parking pay stations in these new areas.

Pedestrian Master Plan - Crossing Improvements

Project No:	MC-TR-C061	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program implements the Pedestrian Master Plan. Typical improvements may include the installation of new marked crosswalks, curb bulbs, pedestrian signals, curb ramps, and pedestrian lighting. The goals of the program are to reduce the number and severity of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease.

Unsecured Funding Strategy: SDOT will evaluate deliverables, prioritize and scale projects to the extent feasible, and continue to pursue grant and partnership opportunities to resolve potential funding deficits. Funding for this program beyond 2024 is dependent upon a future voter approved levy.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Pedestrian Master Plan - New Sidewalks

Project No:	MC-TR-C058	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project enhances the pedestrian environment in Seattle's neighborhoods by dedicating funding to construct new sidewalks. The New Sidewalk Program draws funding from the School Safety Traffic and Pedestrian Improvement (SSTPI) Fund to improve sidewalks and the pedestrian environment near schools. Additional funding is drawn from other sources to pay for new sidewalk construction near frequent transit routes.

Pedestrian Master Plan - School Safety

Project No:	MC-TR-C059	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project improves pedestrian and bicycle safety around schools. The work typically includes school zone signing and 20mph flashing beacons; new crosswalks; curb bulbs; crossing beacons and pedestrian signals; new sidewalks and maintenance; traffic calming; changes to traffic circulation around schools; installation of school zone cameras; and school walking route maps. The base level of transportation funding provides improvements at approximately three to four schools per year. The project also funds safe biking and walking education and traffic safety outreach campaigns. Operation of school zone cameras is directly funded from the Seattle Police Department budget.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

RapidRide Roosevelt

Project No:	MC-TR-C013	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2013 - 2024	Neighborhood District:	Multiple
Total Project Cost:	\$103,458	Urban Village:	Multiple

This project will provide a high-quality service connecting Downtown Seattle with the neighborhoods of South Lake Union, Eastlake, University District, and Roosevelt. This project also includes protected bike lanes, streetscape improvements and intersection improvements including ADA-compliant curb ramps to provide connections to upgraded RapidRide stations.

Retaining Wall Repair and Restoration

Project No:	MC-TR-C032	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing asset preservation program provides funding for City crews to repair or reconstruct retaining walls owned and maintained by SDOT. The repairs/reconstruction are crucial to preserving the adjoining sidewalks and roadways within the public right-of-way. The repair and/or replacement of more expensive retaining walls, such as the seawall, within the program is currently underfunded.

Route 48 South Electrification

Project No:	MC-TR-C081	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	New Investment	Location:	Various
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2018 - 2019	Neighborhood District:	Multiple
Total Project Cost:	\$42	Urban Village:	Multiple

This project will begin design of transit-related elements from Rainier Avenue South to NE 50th Street. The project includes two elements: 1) electrification of two gaps in the electric trolley network in order to convert King County Metro's Route 48 South to electric trolley bus operation and 2) transit operational, facility and access improvements along the two segments of Route 48 South. Elements could include bus stop improvements, thicker pavement at bus stops, upgrades to passenger amenities, and access improvements for pedestrians and cyclists connecting to bus stops.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

Seawall Maintenance

Project No:	MC-TR-C098	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Alaskan WAY
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Multiple

This project will provide critical ongoing structural maintenance of the Elliott Bay Seawall, which is nearing completion. Replacement of existing assets, such as the Seawall, generally require minor maintenance, especially in the early years after the project is complete. However, the Seawall project is an exception as the asset has new features to maintain and the City, as part of its permit obligations, has committed to monitoring the performance of the habitat features over the next ten years and taking adaptive measures if performance goals are not met.

This project will maintain and improve Seattle’s designated shoreline street ends. There are currently 142 shoreline street ends throughout Seattle. Shoreline street ends are community assets, which provide the opportunity for residents and visitors to experience and enjoy Seattle’s shorelines. This project improves public access, protects unique views, and enhances habitat to create long-lasting assets.

Sidewalk Safety Repair

Project No:	MC-TR-C025	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project rehabilitates sidewalks damaged by street trees or where there are serious safety concerns as evidenced by claims, service requests, and potential City liability. The project includes opportunities for public/private partnerships with citizens, property owners, and businesses. Asset management principles are used to guide repair needs and establish priorities for maintaining the sidewalk (or walkway), curbs, curb ramps, and in some cases, a filler strip between the sidewalk and curb.

Signal Major Maintenance

Project No:	MC-TR-C026	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project addresses major work related to the basic infrastructure at traffic signals such as poles, span wires, mast arms, wiring, equipment interconnectivity, video equipment and cabinets to improve and upgrade the traffic signal system. The project also is used for replacement of signal cabinets. The expected life of a signal is 30 years; currently there are more than 1,100 signals within the City.

Sound Transit - East Link

Project No:	MC-TR-C004	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides design review, permitting, and construction support services for the Sound Transit East Link Extension project. It will provide a connection from the Eastside to downtown Seattle, Sea-Tac Airport and the University of Washington. Ten stations will serve Seattle, Mercer Island, Bellevue, Bel-Red and Overlake in Redmond.

SPU Drainage Partnership - Broadview Pedestrian Improvements

Project No:	MC-TR-C036	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	Stage 3 - Design	Council District:	Council District 5
Start/End Date:	2016 - 2021	Neighborhood District:	Northwest
Total Project Cost:	\$7,160	Urban Village:	Bitter Lake Village

This project funding will be used to install pedestrian improvements as part of SPU's larger Broadview Sewer and Drainage Improvement project. The Broadview sewer system was built in the 1950's and cannot handle the combination of additional flow from the homes and business that have developed since then and the additional storm water that is entering the system from downspouts directly connected to the sewer system as well as additional storm water entering through deteriorated pipes. This area is also lacking conventional sidewalks and would benefit from pedestrian improvements. The overall project goal is to reduce the potential for sewer backups and surface flooding for the Broadview neighborhood while improving the pedestrian environments.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

SPU Drainage Partnership - South Park

Project No:	MC-TR-C054	BSL Code:	BC-TR-19001
Project Type:	Discrete	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	TBD
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2016 - 2022	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$9,999	Urban Village:	South Park

This funding will be used to partner with SPU's South Park Drainage Improvement projects. SPU is planning to install a pump station to control flooding in the South Park area. However, that alone will not control flooding. Many streets in the area are in poor condition and don't have a street drainage collection system. This funding will allow SPU and SDOT to partner to install the needed collection systems and repair the deteriorated roads.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges. For SDOT, the annual O&M cost to support new City-owned and maintained infrastructure built by the next major phase of the SR-520 program is estimated at \$56,000. The SR-520 program will also replace existing City infrastructure, such as new street and sidewalk pavement, which will reduce SDOT annual O&M costs in the near term.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Street Lighting Program

Project No:	MC-TR-C076	BSL Code:	BC-TR-19001
Project Type:	Ongoing	BSL Name:	Major Maintenance/Replacement
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides funding for the right of way (ROW) lighting components of transportation projects, where the cost of those components will ultimately be borne by the City's General Subfund. The project enables the Seattle Department of Transportation, the Department of Finance, and Seattle City Light to plan for these costs. Funding is provided from the Light Fund, which recovers these costs through streetlight rates charged by Seattle City Light to the City's General Subfund. SDOT develops project specific estimates of the cost of lighting components in the year prior to construction. No projects are budgeted for 2019 and 2020. For 2021 through 2025, the funds displayed below have not yet been allocated to specific projects but will be allocated once detailed project cost estimates are developed.

O&M Impacts: Not applicable - does not create new assets.

Thomas Street Redesigned

Project No:	MC-TR-C105	BSL Code:	BC-TR-19003
Project Type:	Discrete	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Thomas St. from 5th Ave N to Dexter Ave N
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2020 - 2022	Neighborhood District:	
Total Project Cost:	\$3,073	Urban Village:	Uptown

The project makes improvements to Thomas St from 5th Ave N to Dexter Ave N, including, but not limited to: (1) a half block closure of 5th Ave N and Thomas St to create a public plaza adjacent to the Seattle Center skate park, (2) a 36' wide pedestrian and bicycle promenade from 5th Ave N to Dexter Ave N, and (3) a protected intersection at Dexter Ave N and Thomas St.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical life cycle and average maintenance cost ranges.

Transit Corridor Improvements

Project No:	MC-TR-C029	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This program implements multimodal projects which improve transit speed, reliability, access, safety, and convenience. The program focuses on corridors and projects identified in the Transit Master Plan. Funding from Move Seattle Levy and other local funding sources are used to leverage partnership opportunities.

Vision Zero

Project No:	MC-TR-C064	BSL Code:	BC-TR-19003
Project Type:	Ongoing	BSL Name:	Mobility-Capital
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

Vision Zero is an approach to traffic safety, with the goal of ending traffic deaths and serious injuries. At the core of Vision Zero is the belief that death and injury on city streets is preventable. Collisions are often the result of poor behaviors and unforgiving roadway designs. This project approaches the problem from the angle of creating street designs that emphasize safety, predictability, and the potential for human error, and will complete 12-15 corridor safety projects over 9 years to improve safety for all travelers on our highest-crash streets. Corridors identified as part of the Move Seattle Levy include: 65th St., Rainier Ave S, 35th Ave SW, SW Roxbury St, Greenwood/Phinney, 1st Ave/1st Ave S, 12th Ave/12th Ave E, Aurora Ave N, Lake City Way, Sand Point Way, E Marginal Way, Airport Way, 35th Ave NE, 15th Ave NE, MLK Jr. Way S, and 5th Ave NE.

Waterfront Transportation Infrastructure Maintenance

Project No:	MC-TR-C109	BSL Code:	BC-TR-16000
Project Type:	Ongoing	BSL Name:	Central Waterfront
Project Category:	Rehabilitation or Restoration	Location:	Central Waterfront
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

The Waterfront Seattle program is reconstructing existing transportation infrastructure, Alaskan Way and Elliott Way as well as other streets and bridges. It is also building new transportation infrastructure, the Union Street Pedestrian Bridge, Overlook Walk and Pine Street connector. Each of these program elements includes transportation assets such as; pavement, sidewalks, ADA ramps, signs, signals, markings and landscapes that will need on-going maintenance to remain safe and in a state of good repair.

This program is a capital infrastructure maintenance program to keep the new or rebuilt assets in a state of good repair, consistent with the long-term maintenance commitments made by the City in the Protest Waiver Agreement for the Waterfront LID, approved by City Council in January 2019. In the long-term it is also intended that this program set aside funds for future asset replacement or rehabilitation as necessary.

O&M Impacts: SDOT has individual project budgets for the maintenance of painted markings, signage, signals, bridges and roadway structures, urban forestry, and sidewalks and pavement; these budgets are constrained by the availability of transportation specific and general funds. The SDOT Asset Management website (<https://www.seattle.gov/transportation/about-sdot/asset-management>) provides unconstrained operational cost forecasting by asset type, typical lifecycle and average maintenance cost ranges.

West Seattle Bridge Immediate Response

Project No:	MC-TR-C110	BSL Code:	BC-TR-19002
Project Type:	Discrete	BSL Name:	Major Projects
Project Category:	Rehabilitation or Restoration	Location:	West Seattle Bridge Spanning the Duwamish
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2020 - 2022	Neighborhood District:	Greater Duwamish
Total Project Cost Range:	159,170 - 224,711	Urban Village:	Not in an Urban Village

This CIP funds the first few years of work for the West Seattle Bridge Program, including broad community engagement efforts and early work on the Reconnect West Seattle multimodal strategy. The capital delivery components include emergency repairs and bridge stabilization work that may include shoring and/or controlled removal, bridge replacement options analysis and design, and Spokane Swing (Low) Bridge repairs and enhancements. In parallel, this CIP funds a broad multimodal strategy (Reconnect West Seattle) to accommodate cross-Duwamish travel that formerly used the high-rise bridge in partnership with King County Metro, Sound Transit, WSDOT, Washington State Ferries, BNSF, the Port of Seattle, other state and federal agencies, private mobility providers, large employers, and the general public. In 2020/2021, SDOT will implement improvements developed from this process. The 2020 Appropriations are supported by an Interfund Loan to be repaid by the 2021 LTGO Bond Issuance.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Total:	-	-	-	41,440	-	-	-	-	41,440

Financial Planning Strategy: SDOT and CBO continue to evaluate the funding strategy for the repair and replacement of the West Seattle Bridge. The initial funding will be LTGO bonds, with the debt service paid for by Real Estate Excise Tax. SDOT will work to identify potential partnership funding.

O&M Impacts: O&M Costs are still being evaluated.

¹Funds are appropriated through the Adopted Budget at the Budget Summary Level. All Amounts shown above are in thousands of dollars

Seattle City Light

Overview

Seattle City Light (SCL) is a municipal electric utility, owned by the residents of Seattle and run by the City's elected officials. The utility serves a population of over 906,000 people living in a 131 square-mile area, which includes the City of Seattle and several adjoining jurisdictions. To serve these customers, City Light owns, maintains, and operates a multi-billion-dollar physical plant. The physical plant includes:

- a power generation system consisting of seven hydroelectric plants on the Pend Oreille, Skagit, Cedar, and Tolt rivers with a combined capacity of more than 2,000 megawatts;
- 656 miles of high-voltage transmission lines linking these plants to Seattle;
- a distribution system with 15 major substations and more than 2,500 miles of overhead and underground cable;
- a state-of-the-art System Operations Center coordinating the City's electric system; and
- billing and metering technology tracking approximately 461,000 accounts.

City Light's Capital Improvement Program (CIP) is the vehicle for repairing, upgrading, and expanding this infrastructure. With planned spending of \$2.3 billion over the 2021-2026 timeframe, the CIP funds a variety of safety improvements, mitigation activities, and licensing requirements. Funding for the CIP comes primarily from retail electricity sales, sales of surplus power on the wholesale market, and the sale of revenue bonds.

Thematic Priorities

The foundational goal of SCL's CIP is to support City Light's mission of providing customers with affordable, reliable and environmentally responsible energy services. The CIP also reflects City Light's five organizational values, which were updated in 2020:

1. **Customers First.** We believe customer service is everyone's job. We pledge to be approachable, respectful and responsive in providing products and services that our customers want and need.
2. **Environmental Stewardship.** We care about the environment and we are dedicated to enhancing, protecting and preserving it for future generations.
3. **Equitable Community Connections.** We are proud to be a local, community-owned utility. We are visible and actively involved in the communities we serve. We are rooted in our commitment to racial diversity, social justice and the equitable provision of services to all.
4. **Operational and Financial Excellence.** We strive for excellence, are forward-focused, and seek new and innovative solutions to meet the challenges of today and tomorrow. We prioritize our investments and operating choices to build upon our strong financial foundation and solid, reliable infrastructure.
5. **Safe and Engaged Employees.** We actively practice our commitment to employee and public safety. We treat each other with kindness and respect, are personally accountable, and work effectively in teams.

Our values take shape in our CIP in the following areas:

Preserving Hydroelectric Generation Assets

Preservation of Seattle's legacy hydroelectric generation facilities through prudent and systematic investments and maintenance. Current planned enhancements include a wide range of dam safety investments; an improved outage management system; long-term planning for small legacy

hydroelectric projects such as Cedar Falls; improvements of ancillary systems and facilities including powerhouse systems; plant automation and cyber security investments.

Hydroelectric Project Relicensing

Two City Light hydroelectric projects, Skagit and South Fork Tolt, are nearing the end of their license term with the Federal Energy Regulatory Commission (FERC). License renewal applications for these projects will be filed in 2023 and 2027, respectively. For the Boundary project, various protection, mitigation and enhancement activities will fulfill requirements mandated by its 2014 FERC license and settlement agreement.

Transmission & Distribution Infrastructure

City Light aims to implement industry best practice system improvements through prudent investment and system maintenance. Planned enhancements to improve reliability include incorporating new technologies such as smart grid and advanced grid analytics. This includes implementing metric driven, cost-benefit analysis supported planning for transmission, substation and distribution projects; developing corporate asset data management procedures; and maximizing benefits derived from our asset management capabilities. Major program investments will include upgrades to the downtown network distribution system, replacing failing underground wires and accelerating wood pole replacement across our service territory.

Grid Modernization

Investments to maintain and upgrade the electric grid will improve resiliency, add flexibility, and maintain reliability while hardening our assets to cyber threats, and facilitating our objective of achieving a zero-carbon city. Developing electric vehicle charging infrastructure, distributed generation (solar, wind, etc.), energy storage, demand side management, and other Distributed Energy Resource (DER) technology will enable a transition away from fossil fuels. These also will be enabled by the smart grid assets described above, as well as investments in foundational technology systems that underpin the progress to grid transformation – from upgrading the Geospatial Information System (GIS) to updating the Outage Management System (OMS) and enhancing it with Distribution Management system capability. Protecting our system from cyberthreats also requires advanced developments in Cybersecurity programs, governance, and operations, which City Light is establishing. Other efforts include relocating wires and other facilities underground to accommodate changes along the downtown waterfront; adding capacity for the expanding University of Washington and new Sound Transit light rail; and previously mentioned network improvements to realize systemwide benefits from the new Denny substation.

Race and Social Justice

Recent events have made clear the need for all organizations to examine their role in the structures that uphold systemic racism and City Light is no exception. The utility is actively engaged in the Citywide effort to rebuild Seattle as a city that is racially just, equitable, and inclusive. City Light will work to prioritize positive outcomes for communities of Black, Indigenous, and People of Color in strategic decisions related to innovation and building a utility of the future. City Light historically also has taken its lead from the Citywide Race and Social Justice Initiative (RSJI) to end institutionalized racism in City government. Reaffirmed by Mayor Durkan's [Executive Order 2017-13](#), and in partnership with the community, the Initiative works to change the underlying system that creates race-based disparities in our community and to achieve racial equity in City operations, public engagement and service.

Project Selection Criteria

City Light’s project planning process is designed to ensure project funding best meets customers’ current and future needs. Project ideas to accomplish baseline service delivery come from throughout City Light. Staff members in the operational divisions are responsible for creating official proposals. Members of each of the utility’s organizational lines of business (e.g., power supply, transmission and distribution, fleets & facilities, technology and customer service) prioritize capital spending within their divisions and then submit recommended projects through a centralized capital budgeting system.

Discrete Projects are prioritized using a scoring tool with six criteria: Safety, System Reliability, Improved Level of Service, Environmental Stewardship, Financial Cost-Benefit, and Community Interest. Programs with ongoing funding are prioritized using the criteria of Criticality, Need (Urgency), and Safety. The process gives priority to mandatory requirements and projects currently underway before considering future projects and new initiatives. City Light’s Capital Planning Team and Capital Asset Review and Evaluation Committee (CARE) review the scored and prioritized list of projects to develop City Light’s six-year CIP.

Utility staff develops business cases for projects with a total project cost over \$1 million to document the project expectations and rationale and provide a cost-benefit analysis of alternatives. Availability of funding and labor resources limits the CIP. City Light management seeks to balance the overall needs of the utility within these constraints and may rescope, reschedule, or defer projects in its six-year CIP.

2021-2026 Proposed CIP Highlights

The 2021-2026 Proposed CIP outlines \$2.3 billion in capital spending over six years for power supply, transmission, distribution, external projects, and central utility needs.

A selection of projects from each Program follows.

Central Utility Projects

Projects in this program provide for centralized billing and customer service systems, financial and information technology systems, and vehicle fleets and facilities that are not part of the power generating plant (e.g., equipment shops, service centers, and maintenance yards) and also includes City Light's work on transportation electrification.

For 2021, there is \$22.3 million in funding for 22 Central Utility Projects including \$3,980,000 in new funding for Transportation Electrification MC-CL-XF9239. Highlights (in order of 2021 Proposed Budget funding) include:

- **Equipment Fleet Replacement (MC-CL-XF9101): \$6,121,282**
This ongoing project replaces, updates, and expands City Light's light and heavy-duty mobile equipment fleet. This project also funds the replacement of light-duty vehicles owned by City Light, including those previously leased from the Fleets & Facilities Department and that are now owned by City Light.
- **Transportation Electrification (MC-CL-XF9239): \$3,980,000**
This ongoing project develops electrification infrastructure for light-duty, medium-duty, and heavy-duty electric vehicles (including transit, commercial, government and non-profit fleets, delivery vehicles, personal vehicles and freight vehicles) as well as ferry and port systems. The portfolio of projects will be developed based on a committed customer engagement effort and is expected to include support for electrified public transit, investments in and support for electric vehicle charging

infrastructure, engineering support, installation services and/or construction services and related infrastructure. The project also includes the enabling investments in grid modernization assets including automation and smart grid technology, distributed generation (solar, wind, etc.) and energy storage equipment, and demand side management to better support and align customer energy demands with supply.

- Safety Modifications (MC-CL-XF9006): \$2,216,311
This ongoing project modifies City Light's facilities and provides equipment to correct imminent and critical safety hazards. The project includes physical upgrades and revisions to systems, equipment, properties and facilities, as needed to comply with safety regulations and best practices for a safe, efficient, and secure work environment.
- Building Envelope Upgrades (MC-CL-XF9072): \$1,665,088
This ongoing project updates or replaces information security systems that are at high risk of failure. The project enhances vulnerability and intrusion detection as well as response capabilities and procedures. The project provides (by way of illustration but not limitation) for implementation of systems to replace or upgrade firewalls, routers, switches, operating systems, intrusion detection capabilities, security information, Linux patching procedures, Dynamic Host Configuration Protocol server, Domain Name System server, internal vulnerability scanning, and physical security cameras and networks.
- Seismic Mitigation (MC-CL-XF9134): \$1,363,684
This ongoing project funds structural upgrades to buildings. This project is for miscellaneous, unidentified seismic issues other than the Georgetown Steam Plant, Service Centers and Substations, which are funded through other projects. The project protects City Light's assets, employees, customers, visitors, equipment, and materials.
- Workplace and Process Improvement (MC-CL-XF9159): \$1,050,273
This ongoing project funds alterations that preserve workplace efficiency. The project focuses on adapting exterior workspaces and interior building elements to support business process improvements for work groups. Interior systems improvements include things like flooring replacements, interior remodeling, computer network cabling upgrades, uninterruptible power systems and computer flooring. Exterior system improvements include fencing, security systems, paving and striping, and exterior building components.

Distribution: Projects in this program include improvements to City Light's distribution substations, relays, feeders, network distribution systems, overhead and underground radial distribution systems, service connections, customer meters, and other facilities related to the distribution system.

For 2021, there is \$217.4 million included for 53 projects in Distribution including \$7,200,000 in increased funding for the Accelerated Pole Replacement Program under MC-CL-YR8351. Highlights (in order of 2021 Proposed Budget funding) include:

- Overhead Equipment Replacements (MC-CL-YR8351): \$24,895,291
This ongoing project replaces older equipment in City Light's distribution system that is nearing the end of its usable life, is overloaded, or no longer has an available supply of spare parts. These items include, but are not limited to, poles, cross-arms, transformers, and open-wire secondaries.

- Underground Equipment Replacements (MC-CL-YR8353): \$20,665,907
This ongoing project replaces and improves underground electrical system equipment that is failing or approaching the end of its useful life. This project enhances distribution system reliability, avoiding unplanned outages or interruption of service due to equipment failure.
- Medium Overhead and Underground Services (MC-CL-ZS8366): \$16,400,756
This ongoing project provides medium size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of 50 KVA to 2.5 MVA and 26 kV radial services. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely, and cost-effective manner.
- Pole Attachments (MC-CL-YR8452): \$14,717,418
This ongoing project funds utility crews and engineers to prepare City Light poles for the attachment of other communication infrastructure. This work generates additional revenues through pole attachment fees and construction costs, which are fully reimbursable.
- Denny Substation - Network (MC-CL-YN8404): \$10,772,049
This ongoing project provides network system design and construction, engineering design at the substation network interface, and underground conversion of the streetlight, traffic signals, and telecom and fiber optic systems.
- Software Replacement Strategy (MC-CL-YD9969): \$10,222,326
This project funds the upgrade or replacement of components of the Enterprise Solution Portfolio by the preferred vendor, Oracle, or other vendor deemed more appropriate. This funding will keep enterprise level resources up to date and fully functional to maximize benefits to customers.
- Network Additions and Services: Broad Street Substation (MC-CL-ZS8363): \$9,978,981
This ongoing project provides electrical service connections and related improvements in response to customer service requests within the Broad Street network areas. The project performs capacity additions work associated with service connections to customers including condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. The project also replaces or installs network transformers, network protectors and specialty transformers, and performs short duration system improvement work identified during operations, including retrofitting in-building vaults.
- Network Additions and Services - Denny (MC-CL-ZS8405): \$9,929,254
This ongoing project provides electrical service connections and related improvements in response to customer service needs within the North Downtown network area. The project provides civil and electrical design assistance to customers to connect existing and proposed buildings to the North Downtown network system. This project also performs capacity addition work associated with service connections, and replaces or installs network transformers, network protectors, and bus tie-switches.
- Substation Breaker Replacements and Reliability Additions (MC-CL-YS7779) \$7,482,063
This ongoing project funds the review of City Light's inventory of approximately 400 transmission and distribution voltage circuit breakers. It determines which have the greatest wear, gas or oil leaks, maintenance cost, and service stress. It replaces those circuit breakers with the priority given to those with the highest risk of failure.

- Broad Street Substation Networks (MC-CL-YN8203): \$6,656,153
This ongoing project funds a programmatic approach for comprehensive management of underground network assets serving customers in the Belltown and Denny Regrade areas. The project enhances network reliability and provides sufficient service capacity for the growing electrical power needs of the Denny Triangle and potentially a portion of the South Lake Union area.
- Substation Equipment Improvements (MC-CL-YS7752): \$6,426,060
This ongoing project adds, replaces and upgrades substation equipment, particularly the substation electrical and control equipment. The project maintains or improves system reliability, permits compliance with high voltage and environmental regulations, and ensures safe work sites. The project allows remote control and monitoring of substation equipment from the System Control Center, which facilitates faster response time to correct system instability or outages.
- Small Overhead and Underground Services (MC-CL-ZS8367): \$5,718,976
This ongoing project provides small size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of less than 50 KVA and 26 kV radial services. Most of this related work is billable to the customer. The program allows Seattle City Light to provide service to new customers in a safe, reliable, timely, and cost-effective manner.
- Substation Transformer Replacement (MC-CL-YS7776): \$5,046,939
This project funds the review of power transformers at substations and evaluates dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault interrupting history. The project replaces transformers prioritized by those with the highest risk of failure, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

External Projects: Projects in this program respond to requests from local jurisdictions to: relocate distribution services from overhead to underground systems per the terms of franchise agreements; maintain and upgrade the streetlight system; relocate utility infrastructure in response to major transportation projects; and provide capital improvements in response to other customer-requested service needs. Allocation changes reflect revised scope and schedule projections provided by the project managers.

For 2021, the CIP includes \$33.1 million in funding for 10 External Projects. Highlights (in order of 2021 Proposed Budget funding) include:

- Alaskan Way Viaduct and Seawall Replacement - Utility Relocations (MC-CL-ZT8307): \$11,229,160
This project allows the City to comply with its requirements to relocate Seattle City Light's infrastructure associated with the replacement of the Alaskan Way Viaduct and improvements to the Seawall and Central waterfront.
- Transportation Streetlights (MC-CL-ZL8377): \$6,207,108
This ongoing project relocates Seattle City Light owned streetlights as required by City of Seattle transportation projects.
- Overhead and Underground Relocations (MC-CL-ZT8369): \$5,283,214
This ongoing project moves electrical lines to accommodate or take advantage of transportation-related projects, street vacations, or other projects being constructed by non-City Light agencies. This project addresses modifications to the distribution system, including replacement or modifications of old-line segments, poles, and underground facilities, as necessary. Some project

costs are paid by City Light and some are paid by the requesting agencies, depending on the circumstances.

- Waterfront Seattle Streetlights (MC-CL-ZL8481): \$3,927,134
This project funds the street lighting associated with the bored tunnel hybrid plan for the Alaskan Way Viaduct replacement which is a project that will result in the City rebuilding Alaskan Way, led by the Office of the Waterfront.
- Sound Transit Lynnwood Link (MC-CL-ZT8471): \$2,817,702
This project supports construction of Sound Transit's Lynnwood Link project, which will extend the light rail line from the Northgate Transit Center at 5th Ave NE & NE 100th Street in Seattle to the SCL service area boundary at NE 205th Street, near the I-5 Right of Way in the City of Shoreline. The project will include 100 blocks of distribution relocations.

Power Supply: Projects in this program include improvements to City Light's dams, generators, powerhouses, and other related projects. In addition, the program contains projects designed to help City Light comply with federal licensing and environmental mitigation requirements at the utility's dams. City Light sequences work on major power production equipment (i.e., generator rebuilds, transformer replacements, plant system replacements and turbine replacements) to reduce the impact to power generation and to minimize fluctuations in the annual amount of capital spending.

For 2021, the CIP includes \$72.6 million in funding for 39 projects in Power Supply. Highlights (in order of 2021 Proposed Budget funding) include:

- Boundary - Licensing Mitigation (MC-CL-XB6987): \$25,386,125
This ongoing project implements Protection, Mitigation and Enhancement measures (PMEs) required by the terms and conditions of the license issued by FERC in 2013. The license allows for the continued operation of the Boundary Hydroelectric Project, Seattle City Light's largest generating station producing approximately 25% to 40% of the City's power supply.
- Skagit - Relicensing (MC-CL-XS6986): \$13,857,919
This ongoing project provides support of the relicensing activities for the Skagit River Hydroelectric Project including support of staff, environmental studies, documentation, and consultation. Relicensing work began in 2019. The current FERC license for the Skagit Project expires in 2025, and the license application is due for submission to FERC in May 2023.
- Boundary Powerhouse - Unit 54 Generator Rebuild (MC-CL-XB6353): \$4,652,351
This project provides rewinding and refurbishing of the Boundary Powerhouse Unit 54 generator, which is part of a programmatic series of projects to maintain and extend the useful life of aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, rotor poles, etc. Mechanical upgrades such as seal rings and wicket gates may also be installed. This project also provides replacement of the carbon dioxide fire-suppression system with a water sprinkler system to improve worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.
- Cedar Falls Bank 6 Replacement (MC-CL-XC6573): \$4,279,845
This project replaces the 60-year-old Bank 6 power step-up transformer at Cedar Falls. Bank 6 provides the connection between Cedar Falls Generating Units 5 and 6 and the transmission system.

The transformer is approaching the end of its useful life and the goal of this project is to replace it during a planned outage before it fails.

- Boundary Powerhouse Generator Step-up Transformer Replacement (MC-CL-XB6493): \$3,803,792
This project replaces six existing step-up transformers at Boundary Dam, which are 50 years old and have exceeded their reliable service life. This project also purchases a spare transformer because normal delivery time for transformers from order to on-site is 18 to 24 months. This project enhances long-term reliability and allows for City Light to avoid a prolonged loss of generation.
- Boundary Powerhouse – Unit 52 Generator Rebuild (MC-CL-XB6535): \$3,103,668
This project provides rewinding and refurbishing of the Boundary Powerhouse Unit 52 generator, which is part of a programmatic series of projects to maintain and extend the useful life of the utility's aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, and rotor poles. Mechanical upgrades such as seal rings and wicket gates may also be installed. This project also provides replacement of the carbon dioxide fire-suppression system with a water sprinkler system to improve worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.
- Skagit Facility - Minor Improvements Program (MC-CL-XS6405): \$2,175,788
This ongoing project provides financial coverage for emergent capital projects related to all Skagit Facilities. In addition, this project funds scheduled, small capital projects that have cost estimates less than \$25,000.

Transmission: Projects in this program include transmission capacity and reliability projects to deliver power from City Light's dams to its distribution system and the regional power grid. City Light owns and maintains 656 miles of transmission capacity that connect the Skagit facilities to Seattle. City Light also leases additional transmission capacity to connect to the Boundary, Cedar Falls, and Tolt hydroelectric projects.

For 2021, the CIP budget of \$16.4 million for five projects includes new funding of \$3,177,000 for the Transmission Tower Refurbishment project MC-CL-YT7130. Highlights (in order of 2021 Proposed Budget funding) include:

- Denny Substation Transmission Lines (MC-CL-YT7125): \$6,771,676
This project designs and constructs transmission lines to support the new Denny Substation. These transmission lines are created by dividing the existing Pine to Broad Street transmission line into two transmission lines.
- Transmission Line Inductor Installation (MC-CL-YT8461): \$3,994,914
This project addresses the issue of increased electric transmission congestion load growth in the Puget Sound Area. The project funds the installation of inductors or phase shifting transformers which curtail the flow of power through the Seattle area, while improving customer and asset strengths and maintaining reliability.
- Transmission Tower Refurbishment (MC-CL-YT7130): \$3,177,000
This new project funds the costs to refurbish and to extend the life of over 1,700 of steel transmission tower structures. This funding establishes and implements a new, ongoing, systematic approach to repair and refurbish these critical assets for as long as we can before needing to perform a tower replacement project which would cost more than \$2.0 million per tower.

CIP Revenue Sources

Approximately 60% of the CIP is funded through the sale of revenue bonds, based on financial policies set forth in [Resolution 31187](#). Revenues from retail electricity sales and wholesale surplus energy sales also fund a large part of City Light's CIP. Other funding comes from direct customer billing (including service connections and other customer requested work) and assorted fees.

Summary of Upcoming Budget Issues and Challenges

Budget Issues

Due to the COVID-19 pandemic and the associated economic slowdown, there is a loss of demand for electricity from both commercial and industrial customers. This loss in sales volume coupled with plans to not increase retail rates in 2021 will reduce revenues available to fund capital work.

Challenges

There are several challenges that will transform our business over the next decade:

- *New technologies are transforming how people use electricity.* Commercialization of energy technologies poses a potential risk to City Light. New options and products for controlling consumption, generating, and storing electricity will impact how customers interact with their local utility. Utilities must continue to evolve and to develop their products and services to best serve shifting customer needs and expectations.
- *Declining Retail Energy Consumption and Electrification.* Advances in energy efficiency have reduced consumer energy demand. Due in part to energy efficient building codes and new technologies, today's multifamily units consume approximately half as much energy as older single-family homes. At the same time, electrification of buildings and transportation promises to increase demand for electricity and for the grid investments that will be required to serve this new demand effectively. This changing landscape calls for managing impacts to rates while also understanding and compensating for inequities in access to green, cost-saving technologies.
- *Impact of retirements and legacy practices.* As more employees become eligible for retirement and workflows are not documented or digitized, City Light risks the loss of institutional memory, costly service interruptions and a potential impact to service delivery.
- *Climate change continues, and clean energy is more valuable than ever.* Weather pattern changes affect reservoir levels and seasonal energy consumption, leading to increasing volatility of energy supply and demand.

Future Projects/What is on the Horizon

- New projects for Transmission Tower Refurbishment and Tolt Relicensing.
- Expanded transportation electrification programs that support the Mayor's Drive Clean Seattle and City Council Green New Deal priorities.
- Grid Modernization Roadmap to develop and implement a strategy to modernize and optimize City Light's grid including both near-term and long-term actions, such as transmission and distribution automation, distributed energy resource development and integration, grid edge and behind-the-meter technology, and other utility technology projects. These efforts are needed to prepare the grid for increased electrification but also to position the utility for emerging business and

operational realities and reshape the grid's architecture to meet our customer-owners' energy needs and choices today and in the future.

- The transition to the new 5G networks will increase requests to attach to City Light poles. The impact of the required fiber optic deployments to support 5G will touch nearly every pole in City Light's distribution system.

Advanced Metering Infrastructure

Project No:	MC-CL-ZS8426	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2015 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$100,374	Urban Village:	Not in an Urban Village

This project replaces approximately 400,000 existing meters with Smart Meters allowing two-way communication between Seattle City Light and its customers, residential or commercial. Smart Meters continuously record and transmit consumption data to the utility. They also automate meter reading, increase customer service, heighten billing capacity, reduce energy consumption, improve outage restoration efficiency, and support rate structure flexibility. Implementation of the project positions the utility to comply with North American Electric Reliability Corporation (NERC) and Federal Energy Regulatory Commission (FERC) programs and requirements.

Battery Storage Pilot

Project No:	MC-CL-YR8484	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds the installation of a grid-connected utility-scale battery. City Light will either work independently or with a partner to develop and demonstrate this new technology. This project gives City Light an opportunity to explore the storage technology and its impact on our local grid.

BO Lead and Asbestos

Project No:	MC-CL-XF9231	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Bothell Receiving Substation
Current Project Stage:	Stage 6 - Closeout	Council District:	Citywide
Start/End Date:	2013 - 2020	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$954	Urban Village:	Outside City of Seattle

This project provides funding for the removal of contaminants, sewer remediation, and decommissioning of the water tower at the Bothell Substation. Removal of lead and asbestos in the Craneway Area is necessary in order to make the area space useable. The existing septic system does not meet code and needs to be removed or abandoned in place. The sanitary system then needs to be connected with services out to the street. The water tower needs to be deconstructed and removed as it is no longer used or needed and represents a risk to the substation if it deteriorates to the point of collapsing.

Boundary - Access Road Stability Improvements

Project No:	MC-CL-XB6615	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2026	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$7,657	Urban Village:	Outside City of Seattle

This project constructs a substantial slope stabilization in the area of the West Access Road cut to limit maintenance inputs, ensure continued access to the powerhouse, and improve safety (present debris flows occasionally contain larger sized rocks). The relocated portions of the West Access Road's slopes have continued to ravel since relocation occurred in the early 00's There is a risk that the slope could fail in a more conclusive fashion and block access to the powerhouse. Additionally, the upslope interceptor ditch (a concrete channel) suffered undermining erosion causing the concrete to subside and not perform well at channelizing and conveying sheet flow away from the slope face.

Boundary - Entrance Improvements

Project No:	MC-CL-XB6601	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$3,282	Urban Village:	Outside City of Seattle

This project provides safety for employees at the security entrance to the Boundary Hydro Project, those working at the site, the security guard, and visitors. This project provides realignment of the access road to the security gate so the guard station is accessed between lanes of incoming and outgoing traffic instead of from the road shoulder. This increases the guardsâ€™ view of approaching traffic and allows traffic more time to slow down when approaching the guard station. This project also provides a permanent building with water service, a restroom, and an electrical room as well as new signage.

Boundary - Level 6 Deck Stabilization

Project No:	MC-CL-XB6604	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$3,221	Urban Village:	Not in an Urban Village

This project installs a new system of rock bolts and other forms of rock anchors to improve the structural stability of the Level 6 Deck on Boundary Dam. This portion of the dam is attached to and supported by the adjacent rock. A recent inspection revealed a weakness in the current attachments and use of the deck by heavy equipment is restricted until these improvements are made. This project also includes stabilization of rock blocks in the powerhouse machine hall.

Boundary - Licensing Mitigation

Project No:	MC-CL-XB6987	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	New Investment	Location:	10382 Boundary Rd, Metaline, WA 99153
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project implements Protection, Mitigation and Enhancement measures (PME) required by the terms and conditions of a settlement agreement and new license to be issued by the Federal Energy Regulatory Commission (FERC). The license allows for the continued operation of the Boundary Hydroelectric Project, Seattle City Light's largest generating station producing approximately 25 to 40% of the City's power supply.

Start/End Date:	2017 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$2,235	Urban Village:	Outside City of Seattle

This project provides installation of a new electrical exciter on the Boundary Powerhouse Unit 56 Generator. The unit's schedule for a rewind started in 2014, increasing the capacity of the unit. The project also provides an upgraded exciter needed to reliably realize the additional capacity over the new life of the unit.

Boundary Control Room Alarm System Replacement

Project No:	MC-CL-XB6637	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,263	Urban Village:	Not in an Urban Village

This project replaces the system of alarms and annunciator panels in the Boundary Control room with a modern system that integrates with the current automation system. The current system of alarms and annunciator panels is not functioning properly, and is outdated. Alarms will be routed to PH Operator terminals where information will be displayed as to the nature of the alarm. Due to the large number of circuits that will need to be replaced, it is assumed that this project will be implemented in phases over four years, starting in 2018.

Boundary Crane Improvements

Project No:	MC-CL-XB6620	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2020	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$8,005	Urban Village:	Not in an Urban Village

This project rehabilitates and modernizes control systems and other components on two bridge cranes at the Boundary Powerhouse. The controls have exceeded their useful life and other systems, such as fall protection, are not up to current safety codes. A comprehensive crane assessment may identify additional systems requiring replacement, rehabilitation, or repair. These cranes are critical to the operation and maintenance of the six hydroelectric generators at Boundary and are directly linked to generator availability. This work supports upcoming rewind projects on Boundary Units 51, 52 and 54.

Boundary DC Panel Upgrade

Project No:	MC-CL-XB6628	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2017 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,098	Urban Village:	Not in an Urban Village

This project replaces and upgrades DC panels at Boundary. The panel capacity has been maxed out from the addition of many control circuits over the past several years, resulting in multiple circuits being connected to the same breaker. The work will include a load study, design of new main and sub panels, and construction. These panels provide back-up service to critical equipment via batteries in the event of a power failure in the powerhouse.

This ongoing project provides financial coverage for emergent capital projects, specifically related to Boundary Facilities. These projects are, by definition, unforeseeable, unscheduled, unpredictable, and occur on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2017. This increase reflects anticipated baseline CIP spending levels for the Boundary Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects.

Boundary Powerhouse - Transformer Bank Rockfall Mitigation

Project No:	MC-CL-XB6485	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	10382 Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2008 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$502	Urban Village:	Not in an Urban Village

This project constructs an intermediate switchyard at Boundary, installs new cables routed through tunnels to the surface from the Boundary Dam transformers to the switchyard, and constructs a transmission line from the switchyard to the BPA Switching Station. This project mitigates the likelihood of rock fall damage to a transformer, the bonnet over the transformer, transformer equipment, conductors, or outriggers. It reduces the likelihood of damage from such an incident which could be catastrophic and result in extended outages, personal injury, and death.

Start/End Date:	2017 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$33,462	Urban Village:	Not in an Urban Village

This project provides the rewinding and refurbishing of the Unit 51 generator to extend its useful life, which is part of a programmatic series of projects to maintain the Utility's aging generators. The rewind and rehabilitation of the generator includes the stator core, stator bars, rotor poles, etc. Mechanical upgrades such as seal rings and wicket gates may also be installed. It also replaces the carbon dioxide fire-suppression system with a water sprinkler system to enhance worker safety. If technology is sufficiently advanced, it may also include a rotor-mounted scanner or other diagnostic equipment.

Boundary Powerhouse Exhaust system

Project No:	MC-CL-XB6634	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2026 - 2026	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$348	Urban Village:	Not in an Urban Village

This project replaces and improves the existing Boundary powerhouse exhaust system. Boundary powerhouse is located in a rocky cavern and relies on a mechanical exhaust system to maintain air quality in the various levels of the powerhouse.

Boundary Powerhouse Generator Step-up Transformer Replacement

Project No:	MC-CL-XB6493	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	New Facility	Location:	10382 Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2010 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$46,755	Urban Village:	Not in an Urban Village

This project replaces six existing step-up transformers at Boundary Dam, which are 50 years old and have exceeded their reliable service life. This project also includes a spare transformer as normal delivery time for transformers from order to on-site is 18 to 24 months. This project enhances long term reliability and allows for City Light to avoid a prolonged loss of generation capacity.

Boundary Station Service Transformer Replacement

Project No:	MC-CL-XB6627	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$8,656	Urban Village:	Not in an Urban Village

This project replaces two aging station service transformers at Boundary. It is assumed that they will be specified and procured together but installed in two sequential years. Station service transformers provide power to the powerhouse, dam and service area. It is likely that the rating of the transformers will need to be increased to accommodate load increases associated with the addition of new circuits in the powerhouse for automation, controls and machine monitoring.

Boundary Sump Pump Drive Replacement

Project No:	MC-CL-XB6633	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Outside City of Seattle
Start/End Date:	2019 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,093	Urban Village:	Not in an Urban Village

This project replaces and modernizes drive systems for sump pump at Boundary powerhouse. Portions of Boundary powerhouse are below the level of the tailrace and we rely on a series of sump pumps to keep the powerhouse dry. We have recently completed a project to replace the sump pumps, but now need to replace and modernize the drive systems for each pump. One drive system will be replaced per year, starting in 2020, and the final one will be in service in 2024.

Boundary U55/56 Fire Suppression

Project No:	MC-CL-XB6636	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Boundary Rd, Metaline, WA 99153
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2021 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,547	Urban Village:	Not in an Urban Village

This project installs hybrid fire suppression system in Boundary units 53, 55, and 56. City Light Generation has recently determined that we will install hybrid-type fire suppression systems on our hydro generators. The system has been installed at Diablo powerhouse and is planned under separate projects for Boundary Units 51,52, and 54 when they undergo rewinds. Boundary Units 53,55 and 56 have already been rewound, but did not have fire suppression installed. The timing of the installations is assumed to be one unit per year beginning in 2023.

Project Category:	Rehabilitation or Restoration	Location:	500 Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces or restores exterior moisture and thermal barrier components of buildings such as roofing and insulation systems, exterior siding and cladding systems, windows and exterior doors. This project allows for the proactive replacement of building exteriors in order to avert costly structural damage and prevent the growth of toxic mold inside wall cavities and ceiling spaces that can easily render a building uninhabitable. The project also enhances operational efficiency by mitigating emergency repairs which disrupt utility operations.

Cedar Falls Powerhouse - Penstock Stabilization

Project No:	MC-CL-XC6358	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2007 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$3,943	Urban Village:	Not in an Urban Village

This project installs a seismic upgrade of penstock bridges, repairs sagging or broken penstock support saddles, and refurbishes the exterior surfaces to extend the life of two 78-inch diameter steel penstocks. It also reduces risks of damage from earthquakes and restores the exterior coating on the pipes in the areas where the penstocks are buried. Any penstock failure will likely damage the environment and Seattle's water supply, and could jeopardize the City's ability to fulfill its obligation to regulate fish flows in the Cedar River.

Cedar Falls Powerhouse - Unit 5/6 Generator Protective Relay

Project No:	MC-CL-XC6450	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	19901 Cedar Falls Rd SE, North Bend, WA 98045
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2007 - 2022	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,525	Urban Village:	Not in an Urban Village

This project upgrades the present generator protection for Units 5 and 6, which lacks some basic protection elements to protect it from abnormal frequency and voltages. Upgrading and reconfiguring the protective relays is critical to preparing the new Cedar Falls substation for operation. This project replaces existing protective relays, upgrades the generator protection packages, and replaces the electrical and mechanical lockout relays. The project permits City Light to comply with the North American Electric Reliability Council (NERC) and the Western Electricity Coordinating Council (WECC) regional requirements for maintaining the generator in-service during system disturbances.

This ongoing project provides financial coverage for emergent capital projects related to the Cedar Falls and South Fork Tolt Facilities. In addition, it funds scheduled, small capital projects that have cost estimates less than \$25,000. These projects are, by definition, unforeseeable, unscheduled, unpredictable, and occur on a first-come, first serve basis. This project shows increased project allocations in years 2015 to 2018. This increase reflects anticipated baseline CIP spending levels for the Cedar Falls and South Fork Tolt Facility that are in line with Strategic Plan assumptions. These future year allocations will be broken out into specific CIP projects for the next year's CIP.

Center City Connector Streetcar City Light

Project No:	MC-CL-ZT8470	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	City Wide
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2015 - 2026	Neighborhood District:	Multiple
Total Project Cost:	\$18,211	Urban Village:	Multiple

This project provides power relocations & service for the proposed SDOT Center City Connector Streetcar project. City Light has buried primary distribution power cables, some of which are encased in old clay tile ducts, which do not meet current standards, and are unlikely to be able to withstand the forces generated by the streetcar's operation. Any streetcar alignment to be built across such old facilities would likely need a reinforced roadbed for SCL facilities to withstand the additional weight.

Dallas Ave. 26 kV Crossing

Project No:	MC-CL-YR8322	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Dallas Ave S
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 2
Start/End Date:	2005 - 2026	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$5,969	Urban Village:	South Park

This project reinstalls two 26kV feeders across the Duwamish River. This crossing backs up the Cambridge Corridor Crossing, providing redundant power supply to the area along East Marginal Way South. The area has many large industrial accounts, including Jorgenson Steel, Kenworth Trucking, and a number of Boeing plants.

Start/End Date:	2017 - 2023	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,238	Urban Village:	Not in an Urban Village

This project funds the development of data marts to be added to a Data Warehouse. The data marts include a new data mart for City Light for the PeopleSoft Reimplementation, Automated Metering Infrastructure, Mobile Workforce Management, Customer Energy Solutions, and upgrades to systems such as City Light's Work and Asset Management System and the Outage Management System to be implemented during this timeframe and which do not yet have existing data marts. The data marts enable City Light to build reports from any front end business intelligence tool such as Cognos, Oracle OBIEE and OUA, Tableau, or Power BI. This project continues the work started under MC-CL-WF9975.

Total Project Cost:	\$231,297	Urban Village:	Not in an Urban Village

This project designs and builds a 200 MVA substation on Denny Ave. The project funds site acquisition, environmental management and remediation of land, design of the substation, and construction of the substation. It provides capacity to meet load growth, provides the operational flexibility to operate the electrical system to serve new development and existing load, and supports development of an underground network.

This project designs and constructs transmission lines to support the new Denny Substation. These transmission lines are created by dividing the existing Pine to Broad Street transmission line into two transmission lines. The remaining new lines will come from the Canal and Massachusetts substations. This project also provides for undergrounding the transmission lines.

Distribution Automation

Project No:	MC-CL-YR8425	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project automates radial distribution feeders, which includes installation of equipment to provide remote control of operations of switches on power lines and gather real time data on conditions in distribution power lines. The installation of strategically placed switches provides the ability to automatically perform outage restoration, shift blocks of load to maximize efficiencies of feeders, and reconfigure the feeder grid. Typical operation involves remotely detecting that a feeder fault has occurred, locating the damaged portion of the feeder between two remote controlled line switches, isolating the damaged portion of the feeder by opening appropriate remote controlled line switches, and re-energizing undamaged portions of the feeder via the primary feeder source and one or more backup sources using automatically controlled tie switches.

Document Management System

Project No:	MC-CL-ZF9962	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project plans, builds, deploys, and provides ongoing management of an enterprise document management system that effectively and efficiently captures, secures, shares, and distributes digital and paper based documents and reports. The project streamlines collaboration, automates routine tasks, and lowers costs related to creation, management, and storage of business documents. The project provides the governance and audit capabilities needed to minimize the risks and costs associated with regulatory and legal compliance.

Electric Vehicle Infrastructure

Project No:	MC-CL-XF9237	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	New Investment	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds the implementation of two charging infrastructure pilot programs in 2017: one focuses on public DC fast chargers and one focuses on residential charging. This project rolls out 10 to 20 public DC fast charging stations for Electric Vehicles within its service territory, at either City-owned property or private sites. City Light owns and installs the public charging infrastructure. Through the residential pilot, City Light installs 200-300 stations in customers' homes that create a service that lowers the initial cost and uncertainty of installing at-home charging. This program model offers customers a manageable monthly cost, while allowing the utility to better understand load management options like demand response. These programs allow customers access to carbon-neutral electricity that customers are demanding, better utilize current utility assets and contribute to the aggressive goals of the Drive Clean Seattle Initiative.

Endangered Species Act Mitigation

Project No:	MC-CL-XP6990	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Outside City of Seattle
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project protects and restores fisheries habitat in the Skagit and Tolt river basins. It implements the Endangered Species Act (ESA) Program for recovery of listed fish species that are potentially affected by City Light projects. The project includes land purchase, restoration, assessment, and management. The project reduces the likelihood of third party lawsuits under ESA and the reopening of claims by Federal agencies, e.g. the U.S. Fish and Wildlife Service, seeking additional measures to protect and restore the listed species.

Energy Management System Upgrade

Project No:	MC-CL-YD9979	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Citywide
Start/End Date:	2020 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$1,650	Urban Village:	Not in an Urban Village

This funds the upgrade to maintain the SCL vendor supported Energy Management System (EMS) for Supervisory Control and Data Acquisition (SCADA) for power system operation that is current with industry technology, cyber security and regulatory compliant for highly available and reliable system operation. The EMS Replacement Project was deployed in 2016 with a planned investment objective to maintain current vendor support with software and hardware. In 2020 the EMS software and hardware will be over 5 years old. To maintain optimum support, it is recommended that software upgrades occur every 2-3 years and hardware upgrades every 5 years.

Gorge Crane Rehabilitation

Project No:	MC-CL-XS6639	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 121 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2021 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$5,110	Urban Village:	Not in an Urban Village

This project refurbishes or replaces mechanical and electrical systems for the Gorge powerhouse cranes and will provide safety upgrades to comply with current code. The Gorge powerhouse crane has never undergone a major refurbishment. The three Gorge generating units are planned for overhauls within the next ten years, and will require a reliable crane. The crane control system is being modernized to allow for better control and accuracy.

Gorge U21-24 overhauls

Project No:	MC-CL-XS6640	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 121 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2023 - 2027	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$42,227	Urban Village:	Not in an Urban Village

This project overhauls Gorge units 21 - 24. The final scope of work will be determined during project chartering, but is expected to include replacing the stator winding, stator core, and excitation system. Refurbishment is expected for rotor components and other mechanical components. Planning is currently forecast to start in 2022 which would mean construction on the first unit would likely begin in 2025.

Hydro Project Spill Containment

Project No:	MC-CL-XP6530	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Outside City of Seattle
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Outside City of Seattle
Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This ongoing project will implement upgrades to generating plants that will either prevent oil spills through process improvements and equipment replacement, or provide additional containment capacity for accidental spills. These upgrades will include replacing oil filled transformers with dry-type transformers, building larger containment basins around oil filled equipment, reconfiguring powerhouse sumps, installing oil/water separators, and replacing greased valve bushings with greaseless bushings.

Interbay Substation - Development

Project No:	MC-CL-YS7756	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	17th Ave West
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	2019 - 2026	Neighborhood District:	Magnolia/Queen Anne
Total Project Cost:	\$1,794	Urban Village:	Ballard-Interbay Northend

This project plans, designs, and constructs a 26 kV substation in the Interbay area. This project installs 2-100 MVA transformers into a facility large enough to accommodate a third transformer at the site if required in the future. The project adds to the distribution network and provides a new path for power to the area. It provides assurance to the developers who are interested in projects in the SLU district that City Light will be able to serve their needs reliably.

This ongoing project funds replacement and improvement of the Utility's information technology infrastructure. This infrastructure provides applications, data storage, and print services to the utility, and supports activities and applications including Microsoft Outlook, remote connectivity, electronic communications and recording of power marketing transactions (E-tagging), the City InWeb and network, common and City Light applications, UNIX services, and infrastructure change management. Components purchased by this project include servers, network and communications equipment, disk storage, and application and operating system software. Infrastructure is upgraded or replaced based upon a combination of factors, such as maintenance schedules, equipment warranties, availability of vendor support, Gartner recommendations, application growth, and security demands.

The ongoing project updates or replaces information security systems that are at high risk of failure. The project enhances vulnerability and intrusion detection as well as response capabilities and procedures. The project provides (by way of illustration but not limitation) for implementation of systems to replace or upgrade firewalls, routers, switches, operating systems, intrusion detection capabilities, security information and event management, Linux patching procedures, Dynamic Host Configuration Protocol server, Domain Name System server, internal vulnerability scanning, and physical security cameras and networks for SCL locations.

Massachusetts Street Substation - Networks

Project No:	MC-CL-YN8202	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	1555 Utah Ave S
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Greater Duwamish
Total Project Cost:	N/A	Urban Village:	Greater Duwamish

The ongoing project increases Massachusetts Street Substation network capacity. It funds a programmatic approach for comprehensive management of underground network assets serving customers in Pioneer Square and the area bounded by University Street, Third Avenue, Terrace Street, and the Freeway. The project funds completion of engineering design and analysis work required before construction of any civil facilities into which feeders can be relocated from the Alaskan Way Viaduct. This project defers the need date for a new network substation until no further capacity is available from Union Street and the other network substations. It provides sufficient and reliable electrical capacity for the growing power needs of City Light customers.

Network Additions and Services: Broad Street Substation

Project No:	MC-CL-ZS8363	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	319 6th AV N
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides electrical service connections and related improvements in response to customer service requests within the Broad Street network areas. The project performs capacity additions work associated with service connections to customers including condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. The project also replaces or installs network transformers, network protectors and specialty transformers, and performs short duration system improvement work identified during operations, including retrofitting in-building vaults.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project upgrades City Light's remote vault monitoring capability for the Hazeltine system. The project provides remote monitoring of network transformers, protectors, vaults, and supports daily utility operations. The project enhances the network monitoring capability by allowing an alarm to be sent to the System Control Center within 30 seconds of an abnormal electrical component or environmental condition occurrence.

New Customer Information System

Project No:	MC-CL-ZC9937	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	700 5th Avenue
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 3
Start/End Date:	2015 - 2021	Neighborhood District:	Downtown
Total Project Cost:	\$63,741	Urban Village:	Downtown

This project replaces the existing Consolidated Customer Service System (CCSS) application with a more current and viable technology solution. The CCSS provides Customer Information System (CIS) processing and support for Seattle City Light, Seattle Public Utilities, the City's Utility Call Center, and other customer service staff. The existing system does not support the current business model and direction of the City of Seattle's utilities, and is no longer supported by the vendor. The project preserves and enhances the City's ability to continue to deliver this critical function into the future.

NSC Expansion

Project No:	MC-CL-XF9220	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Multiple
Current Project Stage:	Stage 6 - Closeout	Council District:	
Start/End Date:	2013 - 2020	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$692	Urban Village:	Wallingford

This project creates a master plan for the development of City Light's North Service Center (NSC) properties, buildings and workspaces. The plan includes acquiring property, abutting the Service Center that is being offered for sale by the University of Washington and will provide improvements to make this property usable for City Light operations. Additional properties will be acquired, if available, between Stone Way and Aurora Ave to allow further development of the NSC, to the west. The plan also looks at potential vacation of streets and alleys to combine the space into a campus setting that can be better secured for SCL security and safety purposes. The plan could also include the addition of parking, warehouse space, engineering and shop space, a customer service center, and improved access and egress for the NSC.

Outage Management System Phase II Implementation

Project No:	MC-CL-YD9967	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Multiple
Start/End Date:	2017 - 2021	Neighborhood District:	Multiple
Total Project Cost:	\$6,195	Urban Village:	Multiple

This project funds City Light's Outage Management System (OMS) upgraded in order to maintain its availability as it be available 100% of the time. However, its application, operating system, and database have aged to the point where OMS' availability is at risk. It was fielded in 2011 and has not been significantly modified since. The upgrade of OMS will bring it to a currently supported product version (application, OS, database, physical infrastructure, etc.). The scope of this project is to cover as much as possible of the as-is system, with an additional change to integrate with the ongoing deployment of the Advanced Metering Infrastructure (AMI) initiative.

This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old line segments, relocates lines for construction clearances and replaces rotten and damaged poles in the distribution system. This work is driven by specific customer projects, for their direct benefit, to identify and upgrade feeders that are affected before the new load from those projects comes online. City Light is reimbursed by the customers for this work.

This ongoing project supports the capitalized portion of work resulting from unplanned, non-emergency, overhead outages. These outages result from events, such as storms, accidents, and equipment failures. The project funds permanent storm repairs and construction of new infrastructure to bypass failing equipment. The project ensures that customers' electric power is restored as quickly as possible.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the purchase and implementation of a system capable of storing and analyzing complex asset condition assessment data, including inspection, testing and sampling results. This project will replace the current XFMR transformer system and would also track the environmental impacts of related transformers. This project was formerly known as "Asset Condition Assessment and Test Tracking System."

Ross - 480V AC Station Service Switchgear Replacement

Project No:	MC-CL-XS6580	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Improved Facility	Location:	Ross Powerhouse
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2020 - 2024	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This project funds the mitigation of safety hazards at the Ross switchyard by replacing all 480kV circuit breakers with new breakers that allow for remote operation. Policy changes and regulations related to electrical Arc Flash hazards have highlighted safety issues related to this equipment. This project proposes to upgrade and modernize all of the existing 240V and 480V main breakers for all station service switchgear at three powerhouses (Gorge, Diablo, and Ross) at our Skagit Hydro Project.

Ross Dam - AC/DC Distribution System Upgrade

Project No:	MC-CL-XS6373	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 128 State Highway 20
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2005 - 2026	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$13,336	Urban Village:	Not in an Urban Village

This project upgrades aging AC electrical distribution system at Ross Dam with a new electrical distribution system. It installs conduit, ducting, distribution panels and wire. It improves the 4 kV system, improves lighting, and provides improvements on top of the dam including a center substation room, emergency generator, valve houses, and a 130-volt battery bank. New conduit and conductors improve reliability of spillgate operations and other dam operations requiring electric power. New electrical equipment, new lighting, and the addition of emergency lighting allow staff greater operational flexibility, safety, and efficiency.

Start/End Date:	2008 - 2025	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$2,212	Urban Village:	Not in an Urban Village

This project replaces the five Ross Dam Powerhouse Programmable Logic Controllers (PLC). There is one PLC for each of the four generator units, and a fifth PLC monitoring other critical powerhouse equipment. The project improves City Light's ability to make programming enhancements commensurate with operational and regulatory needs, assures comprehensive and correct documentation, and delivers a 24VDC system that eliminates the need of LOTO (Lock-Out/Tag-Out) safety procedures. It provides redundancy, which yields the ability to perform remote start-stop and other control functions of the generators.

Security Improvements

Project No:	MC-CL-YD9202	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing program plans, designs and implements projects, improving the physical security of City Light critical facilities, in order to mitigate unauthorized access and criminal activities that could cause significant system damage, power outages, and other related disruptions to the electrical system. The project reduces the risk of sabotage, vandalism, theft, and terrorism that can result in the loss of valuable infrastructure for generation and distribution of power. The project also reduces risk of noncompliance with North American Reliability Council (NERC) 1200 Standards, adopted May 2, 2006, to improve security at critical facilities that house command and control systems. It enhances reliability of the power system in the Pacific Northwest, reduces the risk of lost revenues, and reduces the jeopardy to public safety and emergency response due to loss of lifeline services such as medical services, water and wastewater systems, communications, law enforcement, banking, transportation system, etc.

Seismic Mitigation

Project No:	MC-CL-XF9134	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Outside City of Seattle
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project funds structural upgrades to buildings. This project is for miscellaneous, unidentified seismic issues other than the Georgetown Steam Plant, Service Centers and Substations, which are funded through other projects. The project protects City Light's assets, employees, customers, visitors, equipment, and materials.

Skagit - Babcock Creek Crossing

Project No:	MC-CL-XS6514	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2026	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$1,122	Urban Village:	Outside City of Seattle

This project will construct a permanent and more stable crossing across Babcock Creek, near Newhalem. The road to Babcock Creek provides access to a critical communication tower and currently only has a temporary bridge crossing it. The permanent crossing will be either a bridge or vented ford.

Skagit - Boat Facility Improvements

Project No:	MC-CL-XS6540	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This project provides design and construction of several new structures to support industrial and recreational boat operations on our Skagit reservoirs. Structures include a new tour dock, new dry dock, additions to the existing boat houses and a new barge landing in Diablo. The project provides improved visitor access for the Skagit Boat Tour, safer boat fueling facilities, reduced impact of snowfall on boats, consolidated barge landings, and improved dry docks.

This ongoing project provides support of the relicensing activities for the Skagit River Hydroelectric Project including support of staff, environmental studies, documentation, and consultation needed to submit an application to relicense the project. Relicensing work will begin in 2019. The current Federal Energy Regulatory Commission (FERC) license for the Skagit Project expires in 2025, and the license application is due for submission to FERC in May 2023.

Skagit - Sewer System Rehabilitation

Project No:	MC-CL-XS6232	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Milepost 126 State Highway 20
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2026	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$6,139	Urban Village:	Not in an Urban Village

This project replaces or repairs numerous sewer pipe breaks, leaks, and sags in the combined Skagit River sewer/drainage collection system, located at the Diablo Dam site and also provides major renovations to the aging Newhalem wastewater treatment plant. This project eliminates potential overloads in the sewage treatment plant that can cause pollution of the Skagit River and surrounding soil contamination.

Project Category:	Rehabilitation or Restoration	Location:	Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2010 - 2021	Neighborhood District:	Outside City of Seattle
Total Project Cost:	N/A	Urban Village:	Outside City of Seattle

This project implements a comprehensive facility plan to optimize buildings and structures at two Skagit town sites. The project preserves essential facilities that support SCL's power production needs, and retains important civic, cultural, and historic features in keeping with the historic preservation requirements of the Skagit FERC Licensing agreement. The project will reduce operational costs by dismantling and removing surplus facilities that require significant on-going maintenance.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project provides funding for structural improvements to existing facilities at Skagit, both residential and commercial. It replaces lights, windows, and HVAC systems, insulates buildings, and performs related work. The project dramatically reduces the amount of energy expended to keep structures warm or cool depending upon the season.

Skagit Powerhouses - Install Protection Relays

Project No:	MC-CL-XS6415	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	500 Newhalem Creek Rd, Marblemount, WA 98267
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	2005 - 2026	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$10,179	Urban Village:	Not in an Urban Village

This project enhances generating reliability by adding protective relays to generating systems at the Ross, Diablo, and Gorge plants, whose generator protective relays do not meet present IEEE Standards. The project funds the addition of microprocessor relays to the existing system, certain auxiliary protective equipment, and modifies the design of the existing protection system to upgrade functionality. This will limit the potential for damage when surges and faults occur in transmission lines due to lightning strikes, load rejections, and other unexpected events.

This ongoing project provides small size electric power service connections from Seattle City Light's distribution system to the customer's meter for power requirements of less than 50 KVA and 26 kV radial services. Most of this related work is billable to the customer. The project allows Seattle City Light to provide service to new customers in a safe, reliable, timely, and cost effective manner as a means to fulfill its commitment to be a customer and community-focused organization.

Solar Microgrid for Resilience

Project No:	MC-CL-XF9238	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	New Investment	Location:	TBD
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	TBD
Start/End Date:	2016 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$5,148	Urban Village:	Not in an Urban Village

This project provides construction of an islandable microgrid located at a City of Seattle designated emergency shelter such as a community center, where a solar photovoltaic (PV) system coupled with an appropriately-sized battery energy storage system will be installed. The project provides backup power to support critical emergency facilities and services during extended power outages when electricity distribution facilities are down due to a catastrophic event, such as an earthquake, severe windstorm (or associated flooding), fire or landslide. Smart microgrids improve resiliency and reliability, minimize carbon footprints, and reduce costs. This project positions City Light as one of the utilities in the forefront of an innovative application of microgrids and serve as a testbed for testing and operating not just the microgrid, but the solar and battery energy storage system equipment as well. The Washington State Dept. of Commerce will grant the utility approximately half of the funding to cover the costs for this project.

Start/End Date:	2017 - 2021	Neighborhood District:	Multiple
Total Project Cost:	\$1,075	Urban Village:	Multiple

This project increases the capacity of City Light power distribution systems to serve increased power requirements projected for Sound Transit's Link system. Initial upgrades will be in the Capitol Hill Sound Transit Station area. Construction there may be underway in 2017. Other areas projected to need power distribution system upgrades include area between the International District Station and Lake Washington, the University of Washington Station area, areas in the Rainier valley, and some areas along the proposed Lynnwood Link line.

Sound Transit 3 - City Light

Project No:	MC-CL-ZT8467	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the engineering and construction of relocated and/or new Seattle City Light facilities required for two new light rail lines and related transit facilities from downtown Seattle to Ballard and West Seattle, approved in November 2017 as part of the Sound Transit 3 initiative. City Light activities include engineering and construction of electric power feeder relocations and upgrades, power services for the planned light rail lines, and various other tasks. Sound Transit's plans will require City Light work through several future budget cycles.

Sound Transit Light Rail East Link - City Light

Project No:	MC-CL-ZT8450	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Facility	Location:	I-90
Current Project Stage:	Stage 6 - Closeout	Council District:	Outside City of Seattle
Start/End Date:	2011 - 2021	Neighborhood District:	Central
Total Project Cost:	\$2,169	Urban Village:	Not in an Urban Village

This project plans for and relocates City Light's electrical facilities, as required by state law, enabling Sound Transit's construction of the East LINK light rail line from Seattle's International District Station to the Bellevue Redmond area. The department also plans to work with Sound Transit on a memorandum of agreement regarding cost reimbursement for its work, which is expected to be 100% reimbursable in keeping with past work with Sound Transit.

Sound Transit Lynnwood - City Light

Project No:	MC-CL-ZT8471	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	City Wide
Current Project Stage:	Stage 5 - Construction	Council District:	Outside City of Seattle
Start/End Date:	2015 - 2023	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$12,932	Urban Village:	Outside City of Seattle

This project supports Sound Transit's Lynnwood Link, which will extend from the Northgate Transit Center at 5th Ave NE & NE 100th Street to our service area boundary at NE 200th Street, near the I-5 Right of Way. This project will include 100 blocks of relocations, a significant fraction of which will convert lines from overhead to underground. The project will install two feeders for each of the light rail line's traction power stations and upgrade the radial system's capacity where needed to serve the new load. The low and medium power service connections for the line's stations will be handled through the existing service projects, ?business as usual.?

Stormwater Compliance

Project No:	MC-CL-YD9236	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	City Wide
Current Project Stage:	N/A	Council District:	
Start/End Date:	2017 - 2020	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds the installation of lighted canopies and the associated drainage improvements that are necessary to bring City Light into compliance with the current rules and regulations. As a result of a City wide storm water audit and several surprise inspections from the Department of Ecology, it was discovered that there are several areas where measures are needed to bring City Light’s storm water protection program into compliance. Some of our facilities drain directly to Superfund sites and the successful implementation of a compliant storm water system not only reduces our liability in the short term, but it has a direct impact on the amount of funding we may be ordered to provide for the cleanup of current and future Superfund sites. Currently, City Light stores raw materials (gravel, cold mix, backfill material, vegetative matter), salvage material (wire, metal products, electronics, transformers, poles) and warehouse materials (timbers, unfinished metal, galvanized poles) outside, where product can leach into the drainage systems.

Streetlight LED Conversion Program

Project No:	MC-CL-ZL8441	BSL Code:	BC-CL-Z
Project Type:	Ongoing	BSL Name:	Customer Focused - CIP
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project upgrades streetlights with LED fixtures, which will reduce annual energy consumption by 40% (for those lights replaced), provide Greenhouse Gas avoidance of 5,446 metric tons of carbon per year, and reduce maintenance cost of the Utility's streetlight system. With a total system conversion, it is estimated that annual operating costs will be reduced \$3.7 Million per year. The savings in energy and maintenance costs will pay for the initial investment within the life of the new system.

Substation Automation

Project No:	MC-CL-YS8424	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces and upgrades substation automation systems, including Remote Terminal Units (RTU) and annunciators, in each of City Light's fourteen substations, and upgrades equipment at two substations annually. The project reduces the likelihood and length of system outages due to failure as the current equipment is wearing out and cannot be replaced in kind because the equipment is no longer manufactured. The project also enhances energy efficiency, and reduces the probability of fines from appropriate governing bodies if loss of a substation, due to equipment failure, causes instability of the western interconnection grid and/or loss of load.

This ongoing project funds substation improvements identified in City Light's Comprehensive Facilities Plan, seismic fitness reports, and periodic inspections targeting transmission and distribution buildings. The project implements items necessary to support assigned personnel, such as lunchroom and locker room facilities required by the union contracts, as well as structural and mechanical corrections and enhancements at substation facilities.

Substation Equipment Improvements

Project No:	MC-CL-YS7752	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project adds, replaces and upgrades substation equipment, particularly the substation electrical and control equipment. The project maintains or improves system reliability, permits compliance with high voltage and environmental regulations, and ensures safe work sites. The project allows remote control and monitoring of substation equipment from the System Control Center, which facilitates faster response time to correct system instability or outages.

Substation Transformer Replacements

Project No:	MC-CL-YS7776	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	2136 N 163rd St, Shoreline
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the review of power transformers at substations and determines dissolved gas concentration, insulation aging, oil leaks, maintenance cost, service stress, and fault interrupting history. The project replaces transformers prioritized by those with the highest risk of failure, or those presenting substation capacity limits. The project enhances system reliability by replacing aging substation transformers before they fail in service.

Tolt Relicensing

Project No:	MC-CL-XC6985	BSL Code:	BC-CL-X
Project Type:	Ongoing	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	Tolt River Dam
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Outside City of Seattle
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project funds the necessary documentation with the FERC by June 2027 to either acquire a new operating license for the Project or decommission it. South Fork Tolt Hydroelectric Project (the Project) FERC License expires in July 2029. Without a license the Project cannot be legally operated. The FERC relicensing process will require preparing and filing a Notice of Intent (NOI), Preliminary Application Document (PAD), and Preliminary and Final License Applications. The PAD, which is due in 2024, will be a substantial document requiring consultant assistance and additional City Light staff resources. Work will need to begin in 2021 to prepare the PAD and start the relicensing process. The main study phase of relicensing will occur in 2025 and 2026, which will require consultant and agency support for studies, reporting, and preparation of the license application which is due in 2027. If City Light were to decide to cease operating the Project instead of relicensing it, a Decommissioning Application would need to be filed, which requires many of the same elements and funding to complete this work.

Transmission & Generation Radio Systems

Project No:	MC-CL-YD9108	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project builds or replaces communications infrastructure consisting of fiber optic rings, digital microwave, telephone networks, and two-way radio systems. This project provides City Light with command and control capabilities for the operation of the electrical system. This project ensures the safe, reliable, and efficient operation of the system and positions City Light to meet the Federal Energy Regulatory Commission's vital communications systems requirements.

Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops electrification infrastructure for light-duty, medium-duty, and heavy-duty electric vehicles (including transit, commercial, government and non-profit fleets, delivery vehicles, personal vehicles and freight vehicles) as well as ferry and port systems. The portfolio of projects will be developed based on a committed customer engagement effort and is expected to include support for electrified public transit, investments in and support for electric vehicle charging infrastructure, engineering support, installation services and/or construction services and related infrastructure. The project also includes the enabling investments in grid modernization assets including automation and smart grid technology, distributed generation (solar, wind, etc.) and energy storage equipment, and demand side management to better support and align customer energy demands with supply.

Underground 26kV Conversion

Project No:	MC-CL-YR8362	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project replaces the 4 kV electrical equipment remaining in the electrical distribution system with new, efficient and reliable 26 kV distribution equipment. This project increases capacity to deliver power to City Light customers, rebuilds and maintains the backbone of the system, saves energy by reducing transformer and line losses, improves quality and reliability of service to customers, and releases unit substation properties for better neighborhood uses.

Underground Customer Driven Capacity Additions

Project No:	MC-CL-YR8360	BSL Code:	BC-CL-Y
Project Type:	Ongoing	BSL Name:	Transmission and Distribution - CIP
Project Category:	New Facility	Location:	System wide
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides electrical lines from substations to customers' property lines. This project builds new and replaces old underground line segments, and may replace rotten and damaged poles in the distribution system that have underground facilities beneath them. This work is driven by specific customer projects, for their direct benefit, to identify and upgrade feeders that are impacted before the new load from those projects comes online. City Light is reimbursed by the customers for this work.

Utility Program and Customer Tracking System

Project No:	MC-CL-ZF9928	BSL Code:	BC-CL-Z
Project Type:	Discrete	BSL Name:	Customer Focused - CIP
Project Category:	New Investment	Location:	System Wide
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Citywide
Start/End Date:	2019 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$959	Urban Village:	Not in an Urban Village

This project implements a new system for the Customer Energy Solutions (CES) Division that will centrally manage and facilitate its resource acquisition, small-scale renewables, electric transportation, and value-added programs and services. This system will assist managing programs and service offerings in a more efficient manner and to manage customer engagement in a more robust manner. This system will expedite business workflow, application processing, document storage, savings and incentive calculations, customer touchpoint preservation, and reporting. The system is a combination of software modules that is built on top of a Salesforce platform. The system is also being designed to have some integration capability with City Light's Customer Care and Billing system and PeopleSoft 9.2. As such, the tool has potential to be leveraged more widely by the utility and the City as a whole and is being built to be scalable and extensible. This potential will be explored and incorporated into future phases of development to broaden the reach of this system or its components. Implementing this Utility Program and Customer Tracking System was identified as a mission critical strategic priority for CES. This project continues the work started under MC-CL-WF9928.

Vegetation Management Compliance System

Project No:	MC-CL-YD9978	BSL Code:	BC-CL-Y
Project Type:	Discrete	BSL Name:	Transmission and Distribution - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Outside City of Seattle
Start/End Date:	2018 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$850	Urban Village:	Not in an Urban Village

This project provides funding for a Vegetation Management Compliance System for planning, tracking, and necessary documentation required to meet WECC and NERC Vegetation Management compliance requirements. These requirements are a WECC recommendation from the 2017 WECC Audit. Auditors noted that SCL was the only utility of its size to not automate Vegetation Management compliance work.

Western Energy Imbalance Market

Project No:	MC-CL-XP9976	BSL Code:	BC-CL-X
Project Type:	Discrete	BSL Name:	Power Supply - CIP
Project Category:	Rehabilitation or Restoration	Location:	System Wide
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2017 - 2021	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$13,993	Urban Village:	Not in an Urban Village

This project provides funding to allow City Light to participate in the Western energy imbalance market (EIM) run by the California Independent System Operator (CAISO). City Light will need IT systems, an implementation agreement with CAISO, possible additional staff and training to participate in the market. Participation will allow City Light to more efficiently use generation and transmission assets, buy and sell energy in shorter term increments, and use pricing to match loads and resources across more buyers and sellers than existing markets currently permit. By doing this, City Light will more effectively integrate renewable energy across the West due to its flexible hydro capacity. City Light is planning to begin participating in the market in the spring of 2019.

Seattle Public Utilities

Drainage and Wastewater

Overview

Seattle Public Utilities (SPU) maintains the network of sewer and drainage systems throughout the City of Seattle. These systems include approximately:

- 448 miles of sanitary sewers
- 968 miles of combined sewers
- 68 Pump Stations
- 5.5 miles of wastewater force mains
- 84 City-owned and permitted Combined Sewer Overflow points
- 38 Combined Sewer Overflow control detention tanks/pipes
- 481 miles of storm drains / 290 storm drain outfalls
- 33,750 catch basins
- 65 miles of ditches, 128 miles of culverts
- 30 miles of stream channel (49 creeks, 6 of which are salmon bearing)
- 9 acres of green stormwater infrastructure
- 17 detention/treatment ponds
- 295 drainage flow control facilities
- 578 water quality structures

The Drainage and Wastewater (DWF) CIP is the vehicle for rehabilitating, replacing, improving, and expanding this infrastructure, as well as constructing projects that protect, conserve, and enhance our region's environmental resources. Planned spending in the DWF CIP is approximately \$1.33 billion over the next six years, from 2021 to 2026.

Thematic Priorities/Project Selection Criteria

The goal of the DWF CIP is to construct facilities that reduce the frequency of flooding and sewer backups for customers and improve water quality and habitat in the environment by reducing sewage overflows and the impacts of stormwater pollution. Projects in the DWF CIP are guided by various Federal regulations, City policies, long-term plan documents, and the SPU Asset Management Committee (AMC) benefit criteria. Many DWF CIP projects are outlined in the Plan to Protect Seattle's Waterways and Asset Management Plans. In addition to candidate capital projects identified from these planning documents projects are identified from external projects and opportunities, and emergencies or other unexpected events. All potential capital projects are prioritized for consideration into the CIP budget. Priority rankings are based on the following set of criteria:

- **Public Health, Safety & Environment:** The overriding priority for the DWF is maintaining public health and safety. The importance of this project in providing or improving services to customers and decreasing our impact on the environment. Examples of highly ranked projects in this category include the South Park Pump Station, Localized Flood Control program, Sanitary Sewer Overflow Capacity program, South Park Water Quality Facility, and NDS Partnering.
- **Infrastructure Reliability & Risk:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Pipe Rehabilitation and Pump Station improvement programs.
- **Regulatory, Mandates, Legal Agreements:** The City of Seattle/SPU must meet State and Federal regulatory requirements to comply with the Clean Water Act (CWA) and the Consent Decree that was entered in court on July 3, 2013, between the City, the U.S. Environmental Protection

2021-2026 Proposed Capital Improvement Program

SPU – Drainage and Wastewater

Agency (EPA), and the U.S. Department of Justice (DOJ). The two most significant regulatory drivers associated with the CWA are the National Pollutant Discharge Elimination System (NPDES) Waste Discharge Permit (aka NPDES CSO Permit) and the NPDES Phase I Municipal Stormwater Permit (aka NPDES MS4 Permit). This ranking category considers the degree to which the project is driven by Federal, State, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include the Ship Canal Water Quality Project, CSO Retrofits, South Park Water Quality Facility, and NDS Partnering.

- **External Drivers and Opportunities:** SPU’s responsiveness to, or engagement with, the projects of other Departments or Jurisdictions, or opportunities to provide multiple benefits, address service equity, or reduce ratepayer costs through outside funding opportunities. Examples of highly ranked projects in this category include the Move Seattle projects.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each LOB, with reviews by key internal stakeholders. Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects at the margin will be included, excluded or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

To aid SPU in making responsible decisions on behalf of ratepayers prioritized projects must then be justified through a business case process that establishes that a problem or opportunity is timely and important and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental, and social) of life-cycle benefits and costs. The process also recognizes that a project may be a “must do” project (e.g. required by regulations). Business Cases must be approved by the SPU CEO/General Manager and Asset Management Committee.

DWW Priorities that are also Mayor/Council Priorities

Improvements to DWW infrastructure result in safer communities, a healthier environment, and regulatory compliance which are goals inherent within the Mayor’s key values (safe, affordable, vibrant and interconnected City that fosters innovation).

- **Aligning Capital Investments with Community Planning.** SPU has aligned planning for the South Park Water Quality Facility with the Office of Planning and Community Development’s Open Space planning in the S. Park Urban Village area and the Duwamish Valley Action Plan.
- **Aligning Capital Investments with Transportation Department’s modal plan.** SPU has several projects to facilitate citywide interconnectivity efforts.
 - Primary investments are around supporting transportation led projects as part of the Move Seattle Levy, described below within the shared costs projects Budget Control Level (BCL).
 - SPU is also leading a joint SPU/SDOT project in the South Park industrial area providing long desired Drainage Conveyance and Roadway infrastructure.
 - The NDS Program, described below, collaborates with SDOT and has identified numerous joint sidewalk/bioretenction project locations.

2021-2026 Proposed Capital Improvement Plan

SPU – Drainage and Wastewater

- **Expand use of Green Stormwater Infrastructure** has been identified by Mayor and Council as a priority. Projects that will help achieve the Citywide stretch goal to manage 700MG of stormwater annually with GSI by 2025, include the following:
 - The Natural Drainage Systems (NDS) Partnering program will use bioretention to reduce storm water pollution in creeks and to improve neighborhoods. The NDS Partnering Program will build natural drainage systems along approximately 66 blocks (330' block equivalents) in the Longfellow, Thornton, and Pipers Creek watersheds. The first of these projects was 30th Ave NE, with construction led by SDOT, which was completed in 2019.
 - GSI in Urban Villages Program. SPU and Council created the GSI in Urban Villages Program to complement proposed up zones through HALA, as well as the City's overall growth strategy. This new program has flexibility to address a variety of system problems within urban villages and urban centers, including flooding, sewer backups, water quality, and creek protection. The first GSI in Urban Villages project will be the Cloverdale Bioretention project to be constructed in 2021
 - RainWise Program fights water pollution by offering rebates to property owners for controlling stormwater at residences, schools, and businesses. This program was developed by SPU but is now delivered jointly with King County Wastewater Treatment Division. Over 1,500 Seattle residents and businesses have installed voluntary rain gardens or cisterns through this program, managing over 26 million gallons of runoff every year.

CIP Highlights

2021-2026 Proposed Drainage and Wastewater Fund CIP by BCL (In '000s; total may not sum due to rounding)

BCL	2021	2022	2023	2024	2025	2026	Total
Protection of Beneficial Uses	21,139	46,286	42,151	35,025	32,132	29,718	206,451
Sediments	3,867	4,579	4,340	7,287	16,686	13,594	50,353
Combined Sewer Overflows	134,109	102,542	87,578	77,503	28,960	19,529	450,222
Rehabilitation and Heavy Equipment	38,268	43,269	40,810	41,352	41,885	44,775	248,359
Flooding, Sewer, Backups, and Landslides	42,899	19,760	14,004	15,904	35,504	52,640	180,711
Shared Cost Projects	32,957	37,993	31,361	22,165	20,571	24,489	169,537
Technology	5,151	4,299	4,299	4,299	4,299	4,299	26,646
Total	278,390	258,729	224,544	203,535	180,037	189,044	1,332,278

Protection of Beneficial Uses: This program makes improvements to the City's drainage system to reduce the harmful effects of stormwater runoff on creeks and receiving water bodies and preserve the storm water conveyance function of our creeks through stream culvert repair and rehabilitation. The

2021-2026 Proposed Capital Improvement Plan

SPU – Drainage and Wastewater

program includes projects to meet regulatory requirements, primarily NDS Partnering Projects (a key component of Seattle's Plan to Protect Seattle's Waterways) which improves water quality with GSI approaches while partnering with SDOT to provide streetscape enhancements. The program also includes projects that are part of the SPU and Council created GSI in Urban Villages Program. Funding in the DWF CIP is focused on cost effective stormwater and water quality projects such as NDS Partnering, GSI in Urban Villages projects, Capitol Hill Water Quality project, and the Taylor Creek Culvert Replacement project.

Sediments: The City of Seattle is a Potentially Responsible Party (PRP) for cleanup liabilities for contaminated sediments at the Lower Duwamish Waterway Superfund Site, the Harbor Island Superfund Site, and Gas Works Park because of alleged historic contributions from Combined Sewer Overflows (CSO) and storm drain discharges, or other City-owned facilities. The City continues to work with EPA, the Washington State Department of Ecology, King County, and other PRPs on an assessment of contaminants and sources. The Sediments program provides funding for studies and analysis for cleanup of contaminated sediment sites in which the City is a participant, for engineering design and construction of actual cleanup of contaminated sites, and for liability allocation negotiations. The study phase of sediment remediation projects often requires multiple years before specific cleanup actions are defined. Current projections reflect cleanup construction adjacent to Gasworks Park, the Duwamish Waterway Sediment Remediation, and East Waterway Remediation projects beginning in 2024 based on preliminary schedules.

Combined Sewer Overflows: This program consists of projects that are mandated by State and Federal regulations to control combined sewer overflows (CSOs) into the City's receiving waters. During heavy rainfall events, the combination of stormwater (about 90 percent of the volume) and sewage may exceed the capacity of the combined sewer system (CSS) and overflow into our waterways – causing a combined sewer overflow (CSO). CSOs spill a mixture of raw sewage and stormwater into local waterways at 85 outfalls throughout the City. These spills violate water quality standards, create unacceptable risk to public health, contaminate sediment and habitat for endangered species and pollute the Puget Sound.

Annual CSOs have been reduced from 20-30 billion gallons per year by both the City and the County in 1970 to about 1 billion gallons per year, today. The City's overflows account for 100-200 million gallons per year. SPU currently does not meet regulatory mandates that limit CSOs to one untreated overflow per outfall location per year. SPU is required by State and Federal law to achieve control of CSOs by 2030. The LTCP, also called the Plan to Protect Seattle's Waterways, was approved by regulators in May 2015. Ultimately the Consent Decree requires completion of construction of all CSO reduction projects by December 2030. CSOs must be proven to be controlled one year after completion of construction. Continuing investments in CSO control will enable SPU to achieve compliance with the 2030 milestone.

Projects in the CSO Program include large infrastructure projects (e.g. storage structures, pipes, tunnels, wet weather treatment plants, stormwater separation, pump stations, etc.), smaller retrofits, construction of Green Stormwater Infrastructure (GSI) for CSO control, and development and implementation of regulatory required plans such as the Plan to Protect Seattle's Waterways. The largest project in the DWF CIP is the Ship Canal Water Quality Project (SCWQP). The SCWQP consists of a 2.7-mile-long, approximately 18-foot-diameter tunnel that, when completed, will capture and store approximately 75 million gallons of sewage and stormwater flows from Ballard, Fremont, Wallingford and Queen Anne.

2021-2026 Proposed Capital Improvement Plan

SPU – Drainage and Wastewater

Other key efforts in the program include Pump Station 13 Upgrade and Force Main Rehabilitation and Pump Station 22 Retrofit and Force Main Upgrade. Planning work is underway and will continue through the coming years for additional CSO reduction efforts to meet CSO Consent Decree compliance date requirements. SPU currently expects to spend approximately \$450 million over the next six years on CSO reduction projects. The majority of this spending is associated with the SCWQP.

Rehabilitation: This program consists of projects that repair, rehabilitate or replace existing drainage and wastewater assets to maintain or improve the current functionality level of the system. Assets that are addressed include:

- pump station structures, airlift conversions, major mechanical, ventilation and electrical components;
- drainage facilities including water quality structures, flow control structures and large surface water facilities; and
- drainage and wastewater conveyance pipes and structures (catch basins, maintenance holes and sandboxes).

Work within this program is a critical component to achieving SPU's Consent Decree target of four sanitary sewer overflows per 100 miles of sewer pipe annually. Individual projects are defined by the type and method of rehabilitation and/or replacement and include emergency rehabilitation, no-dig pipe lining rehabilitation by crews or contract, full mainline dig pipe replacement by contract, dig point sewer pipe and structure rehabilitation by crews or contract, and pump station repairs or replacement by crew or contractor.

This proposed budget will include a new drainage facility master project to rehabilitate or replace water quality structures, flow control structures and large surface water facilities by crew or contractor.

Flooding, Sewer Back-up, and Landslides: This program is responsible for preventing and alleviating flooding and sewer backups in the City of Seattle, with a primary focus on the protection of public health, safety, and property. The program area is focused on planning, design, and construction of new pipes, ditches, culverts, detention facilities, and GSI that control and/or convey storm runoff to the ultimate discharge locations of creeks, lakes, and the Puget Sound. This program also involves protecting SPU drainage and wastewater infrastructure in landslide prone areas, both from impending small landslides, and providing drainage improvements where surface water generated from the City right-of way is contributing to small landslides. Lastly, this program also includes sewer capacity projects that reduce sewer backups and helps lower the risk of exceeding the Consent Decree target of four sanitary sewer overflows per 100 miles of sewer pipe per year. Major projects in this program include the Pearl Street SSO reduction project, the 12th Avenue drainage project, and the South Park Water Quality and Pump Station project. The South Park Water Quality Facility is a regulatory commitment within the Plan to Protect Seattle's Waterways.

Shared Cost Projects: This program includes individual capital improvement projects which typically benefit multiple Lines of Business (LOB) (e.g. the Water LOB and the Drainage and Wastewater LOB) and whose costs are "shared," or paid for by more than one of SPU's utility funds.

The Proposed Budget for the Shared Cost program includes budgets for a number of interdepartmental projects including the Alaskan Way Viaduct and Seawall Replacement, Move Seattle, Center City Streetcar, and Sound Transit Link Light Rail. This BCL also includes funding for SPU Facility Improvements such as the South Operations Center, the North Operations Center, and a new dewatering facility near

2021-2026 Proposed Capital Improvement Plan

SPU – Drainage and Wastewater

the South Transfer Station. Other programs in this BCL include DWW Heavy Equipment Purchases, 1% for the Arts, and several smaller projects.

Technology: The Technology CIP is managed in six program areas that provide a department-wide view of technology investments to address SPU’s strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing;
- Enterprise Information Management;
- IT Infrastructure;
- Project Delivery & Performance;
- Science & System Performance; and
- Asset Information Management.

Investments in 2021 address several of SPU’s key initiatives, including:

- Financial Management and Internal Controls;
- Operational Excellence and Performance Management;
- An Easy and Engaged Customer Experience;
- Data-driven Decision Support; and
- Project Delivery/Project Controls.

In 2021, SPU will continue focusing its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the new Customer Information System (CIS) already in place, the next major projects for SPU within the Customer Contact and Billing Program include the Utilities Customer Self-Service Portal project, the Customer Contact and Billing Upgrade, CIS Workflow, and the CIS Reporting. Other projects slated would be enhancements to SPU’s Enterprise Project Management System and the Development Systems Integration project, and the Maximo Business Intelligence upgrade along with other projects that have been deferred in previous years.

CIP Revenue Sources

Historically, the DWF CIP has been funded primarily by revenue bonds serviced by ratepayers. However, DWF financial policies adopted in 2003 gradually increase cash contributions from SPU to fund the CIP. By 2007, a 3-year average of 25 percent of total CIP costs were funded by a cash contribution, with the remaining capital needs being debt financed.

SPU’s DWF CIP is funded largely by Drainage and Sewer ratepayers. SPU issues bonds, serviced by ratepayers that cover approximately 75 percent of the CIP, with the remainder funded by cash. DWF rates were approved by the Mayor and City Council in 2018 for the three-year period of 2019-2022.

SPU also actively seeks grants and low-interest loans. Loans like this offer a lower interest rate than what SPU can borrow/issue debt and offset the need to draw down extra dollars from the construction fund. SPU also receives Remedial Action Grants from the Washington State Department of Ecology for up to 50 percent of sediments cleanup project costs.

2021-2026 Proposed Capital Improvement Plan

Summary of Upcoming Budget Issues and Challenges

The biggest challenge for DWF will be continuing to manage priority projects while still complying with regulatory requirements from the EPA, and Washington State Department of Ecology (DOE) - all within the financial limitations of the Fund.

The City negotiated a Consent Decree between the City, the EPA, and the DOJ for compliance with the CWA and State regulations. The Consent Decree was entered in court on July 3, 2013 and includes deadlines for development and implementation of the LTCP and will drive spending in the CSO Reduction Program over the next several years. The Consent Decree also includes requirements to implement a Capacity Management, Operations and Maintenance (CMOM) Program, which drives operations and maintenance spending and CIP spending in the Rehabilitation Program. Additionally, an NPDES permit for stormwater includes requirements to help protect local waterways and the Puget Sound from damaging pollutants and excessive runoff. This increased regulatory emphasis on protecting and improving water quality has resulted in the need for the City to make substantial investments in detention, water quality treatment (e.g., GSI), CSO retrofits, pipe and pump station rehabilitation, and inflow/infiltration reduction.

- Detention: This focuses on storing stormwater and/or sewage during a rainfall event and can be accomplished through detention ponds (for stormwater), GSI (for stormwater) or underground tanks or tunnels (for both wastewater and stormwater). Detention can be added to the drainage system to offset the impacts of larger storms that overwhelm the conveyance capacity of the combined sewer system and can result in backups of sewage, localized flooding and releases of untreated sewage.
- Water Quality Treatment: This focuses on removing pollutants and can be accomplished through GSI or the use of technology such as specialized media filters. GSI is the use of green solutions to help reduce untreated overflows by allowing stormwater to infiltrate slowly into the ground, cutting the volume of stormwater entering the system, and providing water quality treatment through natural processes as the polluted runoff comes in contact with the soil and vegetation. The use of GSI is required as part of development through Seattle's NPDES permit and Stormwater Code.
- CSO Retrofits: This focuses on optimizing the existing collection, pumping and storage systems, using low-cost repairs and modifications to reduce overflows to waterways.
- Pipe and Pump Station Rehabilitation: This consists of repairing, rehabilitating, or replacing existing gravity sewer pipes, wastewater pump stations, and/or force mains that have deficiencies or have reached the end of their useful life.
- Inflow/Infiltration Reduction: This focuses on filling in cracks in sewer lines that allow groundwater to enter the system. It also addresses parts of the system where there are direct stormwater connections to the sanitary sewer system which can/should be directed to a separated stormwater system. By reducing inflow/infiltration, it is possible to reduce the frequency and volume of SSOs and sewer backups.

Other challenges DWF faces in meeting its obligations:

SPU – Drainage and Wastewater

- 1) Addressing public expectations: it is challenging to address public expectations around our basic service level programs, such as flooding and system capacity. The funding for these programs is below the program need, but unable to be increased at this time due to the demand on our budget from our regulatory requirements. The separated drainage and wastewater systems are at capacity during storm events or lacking the fundamental infrastructure at various locations across the City. The impacts can range from very serious (basement sewer back-ups) to nuisance (limited street or yard flooding) issues.
- 2) Construction Costs: due to market conditions and building large infrastructure in dense urban areas costs to construct drainage and wastewater infrastructure have increased significantly putting additional pressure on the portfolio.
- 3) Climate Change: increasing rainfall intensities resulting from climate change are increasing pressure on drainage and wastewater infrastructure leading to increased CSOs and driving the need for larger solutions and additional system improvements.

Future Projects/What is on the Horizon

Over the next 10 years the DWF CIP will be driven largely by regulatory requirements, major transportation projects, and Operations Crew Facilities. Major projects include the completion of the Ship Canal Water Quality Project, sediment remediation, and other projects necessary under the LTCP/Plan to Protect Seattle's Waterways, and localized flooding reduction in Broadview, and flood reduction and water quality improvements in South Park.

SPU is moving forward with a comprehensive planning effort, the Integrated System Plan, to better identify the highest priority locations and potential funding and financing strategies. The Integrated System Plan will be a 50-year plan for managing and improving Seattle's drainage and wastewater systems. Through this planning effort, SPU will identify the partnerships, programs, and projects that will improve the performance and resilience of our drainage and wastewater systems while optimizing social and environmental co-benefits for the City. We are developing our plan through technical analysis, robust community engagement and an integrated approach to planning. By the end of 2022, SPU will have near- and long-term plans for drainage and wastewater programs, partnerships, and infrastructure investments over the next 50 years. This planning is part of building a better Seattle by providing drainage and wastewater services that are affordable, safe, green, and just in a climate uncertain future.

CIP Project Page Readers Note

SPU's 2020 revised budget is sometimes overstated because it includes carryforward appropriations from 2019. SPU will submit CIP carry forward abandonments as part of the Q4 Supplemental budget, which will then be reflected in the 2021-2026 Adopted CIP document.

Creek Culvert Replacement Program

Project No:	MC-SU-C3314	BSL Code:	BC-SU-C333B
Project Type:	Ongoing	BSL Name:	Protection of Beneficial Uses
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides for the repair and replacement of stream culverts that are part of SPU's critical drainage infrastructure. Culverts are prioritized for repair or replacement based on structural condition. Projects are then sequenced based on prioritization and other factors such as readiness to proceed, ability to address other drainage needs (e.g., flooding, maintenance), potential partnerships, synergies with other projects and availability of funding.

GSI for Protection of Beneficial Uses

Project No:	MC-SU-C3316	BSL Code:	BC-SU-C333B
Project Type:	Ongoing	BSL Name:	Protection of Beneficial Uses
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides construction of Green Stormwater Infrastructure (GSI) within the separated stormwater system. Work includes right-of-way retrofits with bioretention and/or biofiltration for water quality treatment and flow control, as well as potential expansion of private property incentives for construction of properly sized and installed rain gardens or cisterns (RainWise program) into creek watersheds. The Natural Drainage Systems Projects within this program will achieve the water quality goals for the NDS Partnering Program identified in Seattle’s Plan to Protect Seattle’s Waterways (the Long Term Control Plan requirement within our Consent Decree) while coordinating with SDOT and community groups to deliver co-benefits such as sidewalks. The program also includes projects that are part of the SPU and Council created GSI in Urban Villages Program which will deliver multi-purpose green infrastructure projects in urban villages and urban centers through community partnerships and development synergies.

Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project develops drainage related projects to improve the water quality, stream function and habitat in the streams and receiving waters of Seattle. Projects include stream and habitat restoration to reduce flooding, culvert repair and replacements to protect public safety, and green stormwater infrastructure projects to address flooding and control and clean runoff to streams.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Sediment Remediation

Project No:	MC-SU-C3503	BSL Code:	BC-SU-C350B
Project Type:	Ongoing	BSL Name:	Sediments
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing program provides for City of Seattle participation in cleanup of contaminated sediment sites at multiple locations across Seattle for which the City's drainage and wastewater utilities may have some liability. Typical phases of such projects include preliminary studies and analyses, preliminary engineering for actual cleanup efforts, and liability allocation negotiations. This program enhances the natural environment of Seattle and addresses both State and Federal regulatory agency requirements.

Long Term Control Plan

Project No:	MC-SU-C3604	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This project supports the ongoing implementation of SPU's Combined Sewer Overflow (CSO) Reduction Long Term Control Plan (LTCP) in accordance with SPU's National Pollutant Discharge Elimination System (NPDES) permit and the Federal CSO Control Policy. On May 1, 2012, the Environmental Protection Agency/Department of Justice issued a draft Consent Decree to the City of Seattle which requires the development and submission of a Long-Term Control Plan for approval by May 30, 2015. It further stipulates that all CSO Control Measures are to be constructed as expeditiously as practicable, and in no event later than December 31, 2030. The Consent Decree also allows the City to propose storm water control project(s) as part of an Integrated Plan, in addition to the CSO Control Measures. The LTCP identified projects and programs to reduce the number and volume of CSOs, meet receiving water quality standards, and protect designated beneficial uses. The LTCP includes flow characterization, monitoring, and hydraulic modeling; development of CSO control alternatives; development of control alternatives that takes into consideration costs and performance; operational plan revisions; public participation; implementation schedule; and post-construction monitoring.

Green Stormwater Infrastructure Program

Project No:	MC-SU-C3610	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides construction of Green Stormwater Infrastructure (GSI) as a component of combined sewer overflow (CSO) reduction within the uncontrolled CSO basins. Work includes roadside bioretention and the RainWise program. RainWise provides financial incentives to private property owners within our uncontrolled CSO basins for construction of properly sized and installed raingardens or cisterns. The program supports the City's current regulatory strategy for compliance with CSO National Pollutant Discharge Elimination System (NPDES) permit.

CSO Facility Retrofit

Project No:	MC-SU-C3611	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project retrofits, upgrades, and modifies existing Combined Sewer Overflows (CSO) reduction facilities in Seattle CSO basins. Retrofit projects cost-effectively optimize and maximize existing system operation to minimize CSOs to the greatest extent possible, reducing long term CSO storage needs. This project assists in achieving State Department of Ecology's requirement of an average of no more than one CSO event per outfall per year.

Future CSO Projects

Project No:	MC-SU-C3612	BSL Code:	BC-SU-C360B
Project Type:	Ongoing	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	N/A
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project is for future combined sewer overflow (CSO) reduction projects that will be identified through the CSO Long-Term Control Plan (LTCP) Update. Future projects are most likely to include underground storage projects, wastewater lift station improvements, and/or wastewater conveyance system improvements. Planning for the projects began in 2018, and the projects should complete their construction by 2030.

Ship Canal Water Quality Project

Project No:	MC-SU-C3614	BSL Code:	BC-SU-C360B
Project Type:	Discrete	BSL Name:	Combined Sewer Overflows
Project Category:	Improved Facility	Location:	West Ship Canal
Current Project Stage:	Stage 5 - Construction	Council District:	Multiple
Start/End Date:	2014 - 2027	Neighborhood District:	Multiple
Total Project Cost:	\$570,000	Urban Village:	Multiple

The City of Seattle (the City) has prepared a comprehensive strategy, called The Plan to Protect Seattle's Waterways (the Plan) to reduce overflows and discharge of pollutants from combined sewers and the storm drain system. The City must control sewer discharges to protect public health, the environment, to comply with the Clean Water Act, the United States District Court Consent Decree, and State regulations. On May 29, 2015, the City submitted the plan to EPA and Ecology for approval. The largest project identified in the Plan is the Ship Canal Water Quality Project. This project is a joint project between SPU and King County to design and construct a storage tunnel to capture Combined Sewer Overflows for 5 SPU outfalls and two King County outfalls. The tunnel will be 2.7 miles long and run from Wallingford to Ballard. The tunnel will be approximately 18 feet in diameter and have a storage volume of about 30 million gallons. The purpose of the project is to bring all seven outfalls into compliance with the State's control standard of one untreated overflow per year per outfall on a 20-year moving average. Note all City/County funding allocations are for informational purposes, only. Actual resource allocations will be determined through ongoing project governance agreements and interagency coordination between the City and King County.

Pump Station & Force Main Improvements

Project No:	MC-SU-C3703	BSL Code:	BC-SU-C370B
Project Type:	Ongoing	BSL Name:	Rehabilitation
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides for improvements and upgrades to the 68 SPU-owned wastewater pump stations and force mains. Typical improvements may include, but are not limited to, replacement of existing pump station assets including pumps, motors, and valves, and installation of new assets such as SCADA systems, generators, and emergency plugs. This project enhances and extends the useful life of the existing pump stations which protects water quality.

Total Project Cost:	N/A	Urban Village:	Multiple

SPU operates and maintains approximately 1,423 miles of wastewater conveyance (combined and separated) pipe. The age of this infrastructure varies; however, significant portions of the system were constructed prior to 1950. This ongoing program repairs, replaces, rehabilitates and renews the conveyance system by SPU crews and various contracting construction projects.

Sanitary Sewer Overflow Capacity

Project No:	MC-SU-C3804	BSL Code:	BC-SU-C380B
Project Type:	Ongoing	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program is designed to improve sanitary sewer service to Seattle customers by addressing current and projected capacity limitations of the wastewater system through capital project improvements. Such improvements may include demand management measures such as infiltration and inflow (I/I) reduction, increased conveyance capacity, and individual customer measures such as installation of backflow preventers or grinder pumps to reduce the risk that customers will experience backups of sewage into their homes and businesses during storm events.

South Park Stormwater Program

Project No:	MC-SU-C3806	BSL Code:	BC-SU-C380B
Project Type:	Discrete	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	698 S Riverside DR
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2006 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$134,876	Urban Village:	Greater Duwamish

This program constructs a pump station (PS), a water quality facility (WQF), and additional drainage conveyance in South Park. The PS will allow the existing storm drain outfall to drain the system when the tide is high and will support future drainage projects. The WQF will treat most stormwater flows from the basin, reducing pollutant loading to the Duwamish. Excessive flows will bypass the WQF and be pumped directly to the river. This program was formerly titled "South Park Pump Station."

Thornton Confluence Improvement

Project No:	MC-SU-C3811	BSL Code:	BC-SU-C380B
Project Type:	Discrete	BSL Name:	Flooding, Sewer Backup & Landslide
Project Category:	Improved Facility	Location:	Thornton Creek
Current Project Stage:	Stage 6 - Closeout	Council District:	Multiple
Start/End Date:	2008 - 2019	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	\$7,907	Urban Village:	Not in an Urban Village

This project provides creek realignment, floodplain excavation, culvert replacement, and riparian plantings at the confluence of the north and south branches of Thornton Creek. SPU has acquired a number of flood prone properties in this area over the last decade. Using these properties, this project increases culvert capacity, floodplain area and flood storage, and provides stream habitat benefits. The project will help alleviate flooding and reduce maintenance at Meadowbrook Pond.

Seattle Public Utilities

Solid Waste

Overview

Seattle Public Utilities (SPU) collects and disposes of solid waste generated within the City of Seattle. To fulfill this responsibility, the City owns and manages the following significant infrastructure:

- Two transfer stations;
- One recycling and re-use facility;
- Two household hazardous waste facilities;
- A fleet of trucks and heavy equipment; and
- Three closed landfills previously used by the City.

The Solid Waste Fund (SWF) Capital Improvement Plan (CIP) is the planning tool for rehabilitating, replacing, improving, and expanding infrastructure, as well as constructing projects that protect, conserve, and enhance our region's environmental resources. Planned spending in the SWF CIP is approximately \$85 million over the next six years, from 2021 through 2026.

Major anticipated projects include:

- Cleanup of the historic South Park Landfill (2022-2024) at the South Park Development Project.
- Minimum operational improvements prior to the full redevelopment of the old South Transfer Station campus.

These projects comprise approximately 62% of the SWF CIP. Other significant projects include the Waste Removal project at the Midway Landfill, replacing two compactors, improvements at the South Transfer Station, and SPU's annual equipment investment.

Thematic Priorities

The SWF places a high priority on managing environmental issues and addressing regulatory requirements related to current and historic solid waste facilities while protecting employees and customer health and safety.

- Managing environmental issues and regulations: SPU is required to improve former landfill sites and act as necessary when conditions change. For example, underground gas levels at these sites are monitored. When increasing gas levels are detected, SPU implements improvements to extract the excess gas or otherwise mitigate the environmental impacts of the gas increase. Landfill projects are also triggered by Washington State Department of Transportation improvements to Interstate-5 that require modification to landfill infrastructure in the right-of-way and support of Sound Transit projects that impact the Midway Landfill. Additionally, the new transfer stations are designed to reduce the environmental impacts of the existing stations on neighboring communities.

Project Selection Criteria

SPU identifies candidate capital projects from several sources – planning (e.g., comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events. Under SPU's Asset Management System, projects must be justified through a business case process that establishes that a problem or opportunity is timely and important and that the proposed solution is

superior to alternatives based on a triple bottom line analysis (economic, environmental, and social) of life-cycle benefits and costs. The process also recognizes that a project may be a “must do” project (e.g. required by regulations).

Prioritization of SPU projects are based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which the project is driven by Federal, State, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the South Park Development project and Kent Highlands and Midway Landfills programs.
- **External Drivers:** SPU’s responsiveness to, or engagement with, the projects of other departments or jurisdictions, and the specific mandates of the City Council and Mayor. An example of a project in this category is the 1% for Arts program.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. An example of a highly ranked project in this category is the operational improvements at the South Transfer Station.
- **Level of Service:** The importance of this project in providing or improving services to customers. An example of a highly ranked project in this category is the replacement of two compactors at the transfer stations.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits that were not otherwise recognized, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, or outside funding.

Every project is rated against each criterion. Criteria are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each LOB, with reviews by key internal stakeholders. The ranking scheme and criteria are the same for all LOBs and are approved by the SPU General Manager/CEO and Asset Management Committee. Project priority rankings are used to clarify and document which projects are most important and why, to help determine which projects at the margin will be included, excluded or deferred from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

CIP Highlights

2021-2026 Proposed Solid Waste Fund CIP by BCL

(In '000s; total may not sum due to rounding)

BCL	2020	2021	2022	2023	2024	2025	Total
New Facilities	19,250	27,700	11,320	1,300	555	14	60,139
Rehabilitation & Heavy Eqpt	1,220	650	700	625	550	150	3,895
Shared Cost Projects	2,842	2,640	1,939	1,606	1,398	1,191	11,616
Technology	1,988	1,508	1,508	1,508	1,508	1,508	9,525
Total	25,299	32,498	15,466	5,039	4,011	2,862	85,175

New Facilities: This program includes the planning, design, and construction of new facilities to enhance solid waste operations. In 2021, SPU will continue to implement its Solid Waste Facilities Master Plan. The key project drivers of the New Facilities budget are the South Park Development (landfill cleanup) and the South Transfer Station operational improvements projects.

Rehabilitation and Heavy Equipment: This program includes design and construction of projects that repair and/or upgrade solid waste facilities other than the transfer stations. The key drivers of this budget level are the Midway project and new funding for the Solid Waste Comprehensive Plan Update as required by the Washington State Department of Ecology.

Shared Cost Projects: This program includes individual capital improvement projects that typically benefit multiple Lines of Business (LOB) (e.g. the Water LOB and the Drainage and Wastewater LOB) and which costs are "shared," or paid for by more than one of SPU's utility funds. Key driver for this budget includes heavy equipment purchases, which reflects the best estimate of the required fleet of trucks and heavy equipment for the transfer stations.

Technology: The Technology CIP is managed in six program areas that provide a department-wide view of technology investments to address SPU's strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing;
- Enterprise Information Management;
- IT Infrastructure;
- Project Delivery & Performance;
- Science & System Performance; and
- Asset Information Management.

Investments in 2021 address several of SPU's key initiatives, including:

- Financial Management and Internal Controls;
- Operational Excellence and Performance Management;
- An Easy and Engaged Customer Experience;
- Data-driven Decision Support; and
- Project Delivery/Project Controls.

2021-2026 Proposed Capital Improvement Program

In 2021, SPU will continue focusing its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the new Customer Information System (CIS) already in place, the next major projects for SPU within the Customer Contact and Billing Program include the Utilities Customer Self-Service Portal project, the Customer Contact and Billing Upgrade, CIS Workflow, and the CIS Reporting. Other projects slated would be enhancements to SPU's Enterprise Project Management System and the Development Systems Integration project, and the Maximo Business Intelligence upgrade along with other projects that have been deferred in previous years.

CIP Revenue Sources

Much of the SWF CIP is funded through bond proceeds and current cash contributions, the mix of which is determined by SWF financial policies, the overall financial health of the SWF, and the best value and equity to ratepayers. SPU issued debt in 2014, 2015, and 2016. SPU is not planning any SWF bond issuances and will use current cash contributions and existing cash on hand to pay for the CIP. Cash contributions to construction and repayment of debt come from rate-based charges to customers whose solid waste services are handled by the City's solid waste infrastructure and programs.

SPU also actively seeks grants, low-interest loans, and other funding sources whenever possible and prudent. The Solid Waste Utility is currently in the middle of a capital-intensive historic landfill remediation process and the South Recycling Center project. These projects are the primary drivers of CIP spending and have required rate increases for financing.

Summary of Upcoming Budget Issues and Challenges

Solid Waste faces logistical and financial issues as it reconstructs its primary facilities and addresses site cleanup efforts.

- Logistics: SWF is focusing on developing the South Recycling Center and must continue to use the site for trailer parking and household hazardous waste collection during construction.
- Financial Challenges: Developing the South Recycling Center along with site remediation efforts puts considerable short-term financial strain on the SWF. While the SWF is funding and building these major projects, it is working to address environmental stewardship by encouraging waste reduction and recycling, which results in declining demand for services.

Future Projects/What is on the Horizon

Once the South Park Landfill cleanup work and South Transfer Station operational improvements are completed, SPU will begin a thorough planning process to guide the future redevelopment of the South Transfer Station campus. The planning will take broader City needs into consideration before selecting a redevelopment scenario. Spending for the future development will be better defined over the next 3-5 years.

CIP Project Page Readers Note

2021-2026 Proposed Capital Improvement Program

SPU's 2020 revised budget is sometimes overstated because it includes carryforward appropriations from 2019. SPU will submit CIP carry forward abandonments as part of the Q4 Supplemental budget, which will then be reflected in the 2021-2026 Adopted CIP document.

South Recycling Center

Project No:	MC-SU-C2302	BSL Code:	BC-SU-C230B
Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	8100 2nd AVE S
Current Project Stage:	Stage 3 - Design	Council District:	Council District 1
Start/End Date:	2006 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$43,202	Urban Village:	Greater Duwamish

This project transforms the existing South Recycling and Disposal Station to a recycling and reuse area. The existing transfer station building and associated facilities will be demolished and replaced with new recycling facilities, a reuse facility, parking and storage area for transfer trailers, and other solid waste facilities.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Miscellaneous Station Improvement

Project No:	MC-SU-C2303	BSL Code:	BC-SU-C230B
Project Type:	Ongoing	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides modifications, upgrades and wear replacement for the two new City Transfer Stations. The new facilities will require periodic capital upgrades and replacement to extend the useful life of these assets. Examples of this work include improvements to the South Transfer Station (STS) wheelwash and floor drain system to meet regulatory requirements and replacement of the wear surface on the STS tipping floor or modifications to optimize the NTS facility.

O&M Impacts: This is an ongoing program and any O&M needed as a result of this program is included in SPU's Operating Budget.

South Park Development

Project No:	MC-SU-C2304	BSL Code:	BC-SU-C230B
Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	8100 2nd Ave S
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 1
Start/End Date:	2007 - 2025	Neighborhood District:	Greater Duwamish
Total Project Cost:	\$22,377	Urban Village:	Greater Duwamish

This project studies, plans, designs and constructs remediation of the historic South Park Landfill site to minimize environmental impacts. SPU owns a portion of the site on which the landfill once operated, and was a historic operator of the landfill at one time. This project will meet the requirements of a Washington Department of Ecology Agreed Order for study of and cleanup planning for the historic South Park Landfill.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

North Transfer Station Rebuild

Project No:	MC-SU-C2306	BSL Code:	BC-SU-C230B
Project Type:	Discrete	BSL Name:	New Facilities
Project Category:	Improved Facility	Location:	N. 34th St.
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 4
Start/End Date:		Neighborhood District:	Lake Union
Total Project Cost:	\$111,015	Urban Village:	Not in an Urban Village

The project constructs a new North Recycling and Disposal Station to replace the existing, aging facility. The new facility will meet customer and employee needs, regulatory requirements, and waste management goals for at least the next 50 years. Safety, operational, and capacity concerns at the existing transfer station necessitate building a new facility. The new facility will benefit the public by providing reliable transfer of solid waste from the City and preventing the accumulation of waste and unsanitary conditions within the City.

Kent Highlands

Project No:	MC-SU-C2402	BSL Code:	BC-SU-C240B
Project Type:	Ongoing	BSL Name:	Rehabilitation & Heavy Equipment
Project Category:	Improved Facility	Location:	Kent Highlands
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program funds compliance activities related to the Kent Highlands landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Kent Highlands landfill closure project, as well as various landfill improvements. The environmental and feasibility studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The landfill improvements include replacement of existing flares, drainage improvements, groundwater protection and water treatment.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total
Solid Waste Rates	632	-	25	25	50	25	50	-	807

Midway Landfill

Project No:	MC-SU-C2403	BSL Code:	BC-SU-C240B
Project Type:	Ongoing	BSL Name:	Rehabilitation & Heavy Equipment
Project Category:	Improved Facility	Location:	Kent
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program funds compliance activities related to the Midway landfill closure project. These activities include environmental and feasibility studies to demonstrate the effectiveness of the Midway landfill closure project. The studies are required under the existing Consent Decree with the State Department of Ecology and validate that current environmental controls are effective and reduce the likelihood of additional capital or O&M expenditures. The flare improvements are also a regulatory requirement. To ensure that SPU maintains regulatory compliance, a smaller flare or new technology will be required. The current telemetry used to monitor the environmental control systems at the Kent Highlands Landfill and the Midway Landfill, both Superfund sites, are nearly obsolete and the equipment is no longer supported. In addition, the current system only transmits alarm conditions and does not have any data acquisition functionality. This program funds a replacement system that will allow remote data acquisition as well as alarm functionality.

Seattle Public Utilities

Water

Overview

SPU delivers an average of approximately 124 million gallons of drinking water per day to 1.5 million people and businesses in Seattle and 18 surrounding cities and water districts, plus the Cascade Water Alliance. The water system infrastructure includes:

- The Cedar and South Fork Tolt supply sources;
- Three groundwater wells;
- Two primary water treatment plants;
- 11 booster chlorination facilities;
- 325 million gallons of treated water storage;
- 31 pump stations;
- 1,823 miles of transmission and distribution system pipelines;
- Almost 200,000 meters and service connections;
- More than 21,000 distribution system valves;
- About 18,000 hydrants;
- Monitoring and control systems; and,
- Various buildings and other related facilities.

In addition to replacing and improving the supply, treatment, transmission and distribution systems, the capital program includes investments in watershed stewardship projects, Cedar River Watershed Habitat Conservation Plan implementation, water conservation programs, vehicles, heavy equipment, and technology.

Planned spending in the Water Capital Improvement Program (CIP) is \$727 million over the next six years. Major projects include:

- Water system improvements associated with transportation projects, including Move Seattle, Center City Streetcar; Madison Street Bus Rapid Transit; East Marginal Way Heavy Haul Corridor; Roosevelt Eastlake Rapid Ride;
- Operational and Regional Facility construction;
- Replacement of the Bitter Lake and Lake Forest Park Reservoirs floating covers
- Addressing a slide area through which the Tolt Pipelines pass, upstream of the Tolt Treatment Plant.

The 2021-2026 Proposed CIP also includes many ongoing programs, such as improving the distribution and transmission system water mains, valves, steel storage tanks, and pump stations; watershed stewardship and conservation projects and programs; and facilities, vehicles, and heavy equipment investments. In addition, it includes initial funding for a water system seismic improvement program stemming from the recent completion of SPU's water system seismic study.

SPU funds Water capital projects through a combination of cash and issuance of bonds. The primary source of cash and debt repayment funds come from sale of water charged to retail and wholesale customers in the region. SPU completed its 2019 Water System Plan, a Washington Department of Health (WDOH) regulatory requirement. The plan was approved by King County and the Washington Department of Health in 2019. The plan includes many elements as well as providing plans for SPU's capital needs for the next 20 years.

2021-2026 Proposed Capital Improvement Program

Thematic Priorities

The overarching goal of the Water CIP is to ensure that the water system is properly maintained, upgraded, and expanded to reliably deliver high-quality, safe drinking water to customers, protect the environment, and comply with regulations. The primary themes driving the CIP in the next six years are asset preservation, health and human safety, environmental sustainability, and race and social justice.

- SPU is committed to making **asset preservation** investments to create or enhance operational efficiency. SPU uses asset management principles to determine the timing of rehabilitation or replacement of its infrastructure. Projects that fall into this category vary, ranging from water main replacement related to transportation projects to rehabilitation of steel storage facilities.
- SPU’s commitment to **health and human safety** is also addressed through SPU’s reservoir covering projects. Consistent with Ordinance 120899 and required by state regulators, SPU has finished replacing its open finished drinking water reservoirs with underground structures that will improve water quality and system security. Additionally, SPU will begin constructing new covers on the Lake Forest Park and Bitter Lake reservoirs to replace the existing floating covers that will have reached the end of their useful life. Finally, as a result of a recently completed seismic study, two reservoirs will remain uncovered – Roosevelt and Volunteer – and are disconnected from the drinking water system, filled with treated water and available for emergency storage needs after major emergencies such as earthquakes.
- SPU is committed to **environmental sustainability**. This can best be seen in SPU’s responsibilities as outlined in the 50-year Habitat Conservation Plan (HCP), an agreement between local, state and federal agencies. The HCP seeks to ensure the long-term ecological integrity of the Cedar River Watershed, which supplies the majority of the City’s drinking water. It simultaneously addresses the needs of protected wildlife species in and along the Cedar River. Investments in the regional conservation and low-income conservation programs also help in management of our natural resources, while helping customers reduce their utility bills.
- SPU is also committed to **race and social justice**. One example of this commitment is the Low Income Water Conservation Program. This ongoing program provides water use efficiency resources to the City’s low-income customers to implement water conservation measures. Typical improvements consist of installing water-efficient fixtures, primarily low water use toilets, but also faucet aerators and common-area efficient clothes washers.

Project Selection Criteria

SPU identifies candidate capital projects from several sources – planning (e.g. comprehensive plans, program plans), external projects and opportunities, and emergencies or other unexpected events. Under SPU’s Asset Management system, projects must be justified through a business case process that establishes that a problem or opportunity is timely and important, and that the proposed solution is superior to alternatives based on a triple bottom line analysis (economic, environmental and social) of life cycle costs and benefits. The process also recognizes that a project may be a “must do” project (e.g. required by regulation).

2021-2026 Proposed Capital Improvement Program

SPU prioritizes its capital projects into three categories – Priorities 1, 2 and 3, with 1 being the most important and critical. Some projects are part of an externally driven project. Typically, SPU lacks control over the timing of externally driven projects.

Priority rankings are based on the following set of criteria:

- **Regulatory Mandates, Legal Agreements:** The degree to which a project is driven by federal, state, and local laws, permit and regulatory requirements, and consent decrees; as well as by legal agreements with public and private parties. Examples of highly ranked projects in this category include the reservoir covering programs and the Habitat Conservation Program.
- **External Drivers:** SPU's responsiveness to, or engagement with, projects of other Departments or Jurisdictions, and the specific mandates of the City Council and Mayor. Examples of highly ranked projects in this category include SR 520 Rest of the West phase and Center City Streetcar.
- **Infrastructure:** How a project addresses infrastructure conditions or vulnerabilities. Examples of highly ranked projects in this category include the Watermain Rehabilitation, Distribution System Improvements and Tank Improvements programs.
- **Level of Service:** The importance of a project in providing or improving services to customers. Examples of highly ranked projects in this category include the Water Infrastructure – New Taps and Service Renewals programs.
- **Other Factors:** Other important factors include high net present value or cost-effectiveness, social or environmental benefits not otherwise captured, a project already in progress or near completion, limited time opportunity, demonstration projects, community visibility, outside funding.

Every project is rated against each criterion. Criteria ratings are then considered in determining an overall project priority ranking, using expert judgment (rather than a formula). Priority rankings for the CIP are determined by the leads for each Line of Business (LOB), with review by key internal stakeholders. The ranking scheme and criteria are the same for all LOBs and are approved by the SPU GM/CEO and Asset Management Committee. Project priority rankings are used to clarify and document which projects are most important (and why), to help determine which projects at the margin will be included or excluded (or deferred) from the CIP, and which projects should receive priority attention if a staff or financial resource constraint should arise.

CIP Spending by Major Category

(In '000s; total may not sum due to rounding)

Water Fund	2021	2022	2023	2024	2025	2026	Total
Distribution	31,095	39,121	40,891	50,752	58,247	61,865	281,973
Transmission	20,129	10,560	8,809	17,325	18,942	14,664	90,430
Watershed Stewardship	298	431	478	1,037	317	529	3,090
Water Quality & Treatment	13,214	5,516	10,375	26,738	6,200	1,100	63,143
Water Resources	12,031	8,405	6,968	3,308	2,722	3,362	36,797
Habitat Conservation Program	1,474	1,214	1,822	1,716	1,150	1,033	8,409
Shared Cost Projects	33,474	35,913	42,776	44,608	32,734	28,199	217,703
Technology	5,062	4,244	4,244	4,244	3,404	4,244	25,439
Grand Total	116,778	105,404	116,363	149,727	123,715	114,996	726,983

Distribution: Projects and programs in this category relate to rehabilitation and improvements to the City's water mains and appurtenances, water storage tanks, pump stations, and other facilities that are part of the system that distributes treated water throughout the City of Seattle and to retail customers outside of the City.

Decreases in the **Distribution BCL** in 2021 and 2022 are primarily due to shifting tank improvements to later years in the 6-year capital plan. It is offset by increased investments in water main extension projects at multiple worksites across the city. In 2022 to 2026, funding increases to rehabilitate and replace water mains, because more of this large asset class is reaching the end of its service life.

Transmission: The purpose of this program category is to rehabilitate and improve the City's large transmission pipelines that bring untreated water to the treatment facilities and convey treated water from the treatment facilities to Seattle and to other local utilities that purchase a portion of SPU's supply for their customers.

Increases in the **Transmission BCL** in 2021 and 2022 are primarily due to delay of two projects caused by coordination with the SR520 improvements by the State, and property rights issues. Increases in 2024-2026 are caused by initiation of the new transmission system seismic improvements program.

Watershed Stewardship: Projects and programs in this category improve protection of our sources of drinking water, provide habitat protection and restoration, sustain the environment, and enhance environmental quality, both locally and regionally. Most of the projects in this program category are located within the Cedar and Tolt River municipal watersheds.

2021-2026 Proposed Capital Improvement Program

- The Cedar River Municipal Watershed is 90,638 acres of land owned by the City of Seattle and provides about 65% of the drinking water used by 1.5 million people in the greater Seattle area supplied by SPU. The City of Seattle is required by law to maintain a clean drinking water supply. To that end, the City restricts public access and management is guided by a Habitat Conservation Plan. The Cedar River Watershed is an unfiltered surface water supply which produces some of the best water in the world.
- The South Fork Tolt River Watershed is the second supply watershed in SPU's freshwater supply system. Located in the foothills of the Cascades in east King County, it first came on-line in 1964, and since 1989 has also supported a small Seattle City Light hydro-electric facility. The Tolt Treatment Facilities, which includes filtration, can provide up to 120 million gallons of drinking water per day.

Decreases in the **Watershed Stewardship BCL** in 2021 and 2022 due largely to slow down in petroleum contamination remediation at the BNSF Railway Switching Yard site in the Cedar River Municipal Watershed. Additional new contamination soil sampling followed by discussion and negotiation with BNFSF in 2021 makes acquisition or remediation expenses unlikely until at least 2022. Increase in 2022 is due to a new project to complete construction of fish passage at road crossings in the Cedar River Watershed. The CRW Fish Passage infrastructure program is required to satisfy State regulatory requirements for fish passage. In addition to providing fish passage, this program will reduce the potential for excessive sedimentation, catastrophic infrastructure (i.e. forest road) failure, and impacts to drinking water quality.

Water Quality and Treatment: The purpose of this program category is to construct, rehabilitate or improve water treatment facilities, and cover the remaining open water reservoirs. State and federal drinking water regulations and public health protection are key drivers of investments in this program category. To comply with regulations, SPU has invested hundreds of millions of dollars in building two new primary treatment facilities and covering two and burying five reservoirs that contain already treated water that is distributed directly to Seattle retail and wholesale customers for drinking purposes.

The shift in the **Water Quality & Treatment BCL** in 2021 and 2022 due to an updated cashflow projection for the Lake Forest Park Reservoir Covering Project and Bitter Lake Reservoir Covering Project. The plan is for another floating cover at Lake Forest Park instead of the aluminum roof previously considered. Construction of the Lake Forest Park Reservoir replacement cover is targeted to begin in 2021. Bitter Lake Reservoir cover replacement is anticipated to start towards the end of 2023.

Water Resources: The purpose of this program category is to manage our water resources to meet anticipated demands and in-stream flow requirements – the amount of water provided to the river to support aquatic habitat, wetlands, riparian vegetation, and water quality – and to promote residential and commercial water conservation. The requirements for in-stream flows are detailed in agreements with state and federal agencies and include provisions for minimum stream flows in the Cedar and South Fork Tolt Rivers. Examples of the types of projects in this category include the Dam Safety Program and Sockeye Broodstock Weir and other improvements associated with the hatchery and fish ladder.

Decreases in the **Water Resources BCL** in 2021 and 2022 are due to decrease in the Broodstock Collection Facility Retrofit being delayed. This decrease in 2021 is offset by increases related to dam safety projects including the Tolt Valve 15 replacement, an upgrade required by the Federal Energy Regulatory

2021-2026 Proposed Capital Improvement Program

Commission (FERC). The increase in 2022 is due to dam safety projects such as the Tolt Early Warning System Upgrade and Tolt Debris Boom, which are both to comply with FERC.

Habitat Conservation Program: This program category includes projects and programs directly related to implementation of the Cedar River Watershed Habitat Conservation Plan. The Habitat Conservation Plan benefits the utility and the ratepayers it serves by providing legal certainty under the Endangered Species Act for the City's continued operations within the Cedar River Watershed, which supplies 65% of the SPU's drinking water. The Habitat Conservation Program requires SPU to invest \$100 million over 50 years, with \$60 million in the first decade, on approximately 30 capital projects and 60 O&M activities in three areas: management of in-stream flows for people and fish, forest and land conservation activities, and mitigation for the blockage of salmon and steelhead fish as they return to the Cedar River to spawn. The Water Fund's CIP projects in this area are grouped into eight categories: road improvements and decommissioning, stream and riparian restoration, upland forest restoration, Landsburg fish passage, Cedar River sockeye hatchery, improvements to the Ballard Locks for fish passage and water conservation, fish habitat protection and restoration in the lower Cedar River below the municipal watershed boundary, and evaluation of Cedar permanent dead storage in Chester Morse Lake.

Decreases in the **Habitat Conservation Program BCL** in 2021 and 2022 are due to the Downstream Fish Habitat program. These funds will be expended on land acquisition and restoration to improve salmon habitat as part of the City's Cedar River Habitat Conservation Program (HCP) commitments. The decrease in 2022 is due to less work plan for watershed road decommissioning and transitioning the fish passage program to the Watershed Stewardship BCL (see notes under C130 – Watershed Stewardship).

Shared Cost Projects: This program includes individual capital improvement projects which typically benefit multiple lines of business (e.g. the water line of business and the drainage and wastewater line of business) and whose costs are "shared," or paid for, by more than one of SPU's utility funds. For the next six years, the Shared Cost program includes funding for several interdepartmental programs and projects including Move Seattle, Alaskan Way Viaduct and Seawall Replacement. Funding is also included for SPU's Heavy Equipment Purchases and several smaller projects.

Decrease in the **Shared Cost Projects BCL** in 2021 and 2022 is primarily due to the East Marginal Way Heavy Haul Corridor and the Center City Streetcar delay to outyears

Technology: The Technology capital portfolio is managed in six program areas, which provide a department-wide view of technology investments to address SPU's strategic, business, and City-wide priorities. These areas are:

- Customer Contact and Billing
- Enterprise Information Management
- IT Infrastructure
- Project Delivery & Performance
- Science & System Performance
- Asset Information Management

Investments in 2021 address several of SPU's key initiatives, including:

- Financial Management and Internal Controls
- Operational Excellence and Performance Management

2021-2026 Proposed Capital Improvement Program

- An Easy and Engaged Customer Experience
- Data-driven Decision Support
- Project Delivery/Project Controls

In 2021, SPU will focus its technology spending on the highest priority business needs. These projects would primarily be within the Customer Contact and Billing Program, Project Delivery and Performance Program, as well as the Asset Information Management Program.

With the New Customer Information System already in place, the next major projects for SPU within the Customer Contact and Billing Program would be the Utilities CSS Portal project as well as other projects such as the CCB & MDM Upgrade, CIS Workflow, and the CIS Reporting. Other projects slated would be enhancements to SPU's Enterprise Project Management System (EPMS), as well as the Development Systems Integration project, as well as Mobile Work Management, along with other projects that have been deferred in previous years

CIP Revenue Sources

SPU's Water CIP is funded largely by Water ratepayers. About 71% of the Water Fund's Operating revenues come from retail ratepayers, split approximately evenly between residential and commercial customers. Another 20% of the Water Fund's overall revenues come from wholesale purveyors who serve surrounding jurisdictions. The remaining 9% consists of non-rate revenue, which include such items as tap fees received. SPU issues bonds, serviced by ratepayers, which in the current period covers 50% of the CIP, with the remainder funded by cash, i.e.: directly by ratepayer revenue.

SPU actively seeks grants, low interest loans, and other funding sources whenever possible. And, as mentioned above, SPU also receives payments from developers that are intended to offset the cost of installing new taps when they connect newly constructed buildings to SPU watermain. These "tap fees" are a volatile revenue source, trending with the construction-related sectors of the economy.

Summary of Upcoming Budget Issues and Challenges

These important issues create financial challenges and opportunities for the Water Fund in the future.

Water Conservation: The City of Seattle, Seattle residents and businesses, and Seattle's wholesale water partners have worked together to reduce water consumption. As a result, consumption has declined since the 1980's and is projected to flatten out. In 2018, consumption was 30% below the peak of 1984, despite serving a larger population. Seattle currently has some of the lowest per capita water consumption in the nation. While this accomplishment helps contribute to a sustainable future for the region, it puts financial pressure on the utility because fixed costs, including the costs of the CIP, need to be distributed across fewer units of water sold. This trend also puts pressure on SPU management and employees to deliver services as efficiently as possible. In the future, it may also influence water rate design.

Transitioning from Major Projects toward Asset Management: The Water Fund is transitioning from a period of building large capital projects, in response to regulatory requirements, to a time of physical infrastructure rehabilitation. Past investments include water treatment facilities for the Tolt and Cedar water supplies, coverings for seven open reservoirs in response to federal/state regulations, construction of a second pipeline for the Tolt system, and investments to meet federal requirements embodied in the Cedar River Watershed Habitat Conservation Plan. These investments helped secure the supply and

2021-2026 Proposed Capital Improvement Program

distribution of high-quality drinking water and provide appropriate stewardship of the watersheds consistent with federal and state requirements.

The City of Seattle is now better positioned than many water utilities in the nation in terms of regulatory compliance. Residents, businesses and rate payers will benefit from these investments for years to come. Although the focus will shift from major projects to physical infrastructure rehabilitation, the utility will be paying debt service over the next several budget cycles on the bonds that were issued for these major projects. Against the backdrop of these trends, the 2021-2026 Water CIP has been developed to:

- Provide for water system modifications associated with various Seattle and regional transportation projects.
- Recognize the need to look harder at the water system's resiliency in a major earthquake event and begin to make strategic investments to reduce risk.
- Preserve the transmission and distribution systems through careful investment in aging infrastructure renewal,
- Provide stewardship of the watersheds, to ensure a reliable source of high-quality drinking water;
- Comply with federal and state regulations governing water quality, system reliability, and habitat protection in the watersheds in which SPU operates; and
- Prioritize projects to deliver on infrastructure and regulatory requirements within the limited resources of the Water Fund.

Future Projects/What is on the Horizon

The Water CIP has completed a multi-decade period of investments in major infrastructure projects. These projects have positioned SPU to meet drinking water quality and environmental regulations. Projects have included the Tolt and Cedar Water Treatment Facilities, Tolt Pipeline 2, Reservoir Covering Program, the Cedar River Watershed HCP, the Chester Morse Lake Pump Plant Project, and a new Water Quality Laboratory. SPU has also made a major reinvestment in the Supervisory Control and Data Acquisition System which is used to monitor and control the regional and retail water system. However, these investments have also led to increasing debt service payments that constrain future budgets.

The 6-year CIP funds the work to replace floating covers at the Lake Forest Park and Bitter Lake reservoirs address the Tolt Pipelines slide area and install a new 48-inch spill valve in the South Fork Tolt Dam. Beyond these projects, emphasis will be on dam safety projects, asset management-based rehabilitation and replacement of distribution system infrastructure (e.g. mains, valves, hydrants, meters), as well as water system infrastructure improvements related to transportation projects, such as the Move Seattle Levy.

Additionally, SPU recognizes the need to look harder at the water system's resiliency in a major earthquake event and begin to make strategic investments to reduce risk. SPU recently completed a seismic analysis that defined recovery time to agreed levels of service and developed a prioritized list of recommended investments to improve resiliency. Those capital and operational and maintenance improvements will be developed over the course of the next several decades, and initial funding to begin implementation of those improvements is included in this capital program.

CIP Project Page Readers Note

2021-2026 Proposed Capital Improvement Program

SPU's 2020 revised budget is sometimes overstated because it includes carryforward appropriations from 2019. SPU will submit CIP carry forward abandonments as part of the Q4 Supplemental budget, which will then be reflected in the 2021-2026 Adopted CIP document.

Water Infrastructure-Service Renewal

Project No:	MC-SU-C1109	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces existing plastic or galvanized water services in the City's water distribution system. Service replacement may occur as a result of leaking, failing, or to reduce damage in case of failure of the water service. This project improves Seattle's water system and extends the life of the system.

Water Infrastructure-Hydrant Replace/Relocate

Project No:	MC-SU-C1110	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Rehabilitation or Restoration	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project renews or replaces existing hydrants in the City's water distribution system. In general, hydrant renewal or replacement may occur as a result of hydrant malfunction, catastrophic failure due to vehicle damage, or to meet SPU criticality criteria such as spacing, location, cost, opportunity projects, or flow and pressure problems. This project improves access to fire hydrants for the Seattle Fire Department (SFD) and helps to reduce the damage as a result of fire by locating fire hydrants in alternate or additional locations.

Water Infrastructure-New Taps

Project No:	MC-SU-C1113	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	New Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project installs new drinking water services throughout the City of Seattle. This project provides new connections to existing water mains with no interruption of service to adjacent existing customers, and the installation of metered water service lines from the new tap to the new customer's property lines. This project meets City responsibility for new service connections in the Seattle Municipal Code (SMC) to provide reliable drinking water supply to customers.

Distribution System Improvements

Project No:	MC-SU-C1128	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project improves service reliability, pressure, capacity, and fire flow in the City's water distribution system. Typical improvements may include, but are not limited to, booster pump station installation, creation of new service zones, and tank elevation or replacement, as well as additional water main pipelines and pressure reducing valves. These improvements to service levels meet Washington Department of Health (DOH) regulations and SPU's Distribution System Pressure Policy to provide greater than 20 psi service pressure. These improvements provide higher flow of water for fire protection which improves public safety and results in smaller and shorter fires.

Resources	LTD Actuals	2020 Revised	2021	2022	2023	2024	2025	2026	Total

Watermain Rehabilitation

Project No:	MC-SU-C1129	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Regional
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces or rehabilitates existing water mains in Seattle. Replacements occur when leaks and breaks become too frequent and the cost of ongoing repairs is no longer cost effective. The benefits of this program can include improved service reliability, fire flow, water quality and lower maintenance costs. These benefits vary depending on the specific water main and site conditions.

Tank Improvements

Project No:	MC-SU-C1134	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project implements water quality, seismic, and other improvements to steel water tanks in Seattle. Functional water tanks are essential to public health protection as they assure that the distribution system is under pressure at all times, even when pump stations or control valves malfunction. Depressurization of the water system may result in siphoning back contaminants from faulty private systems and from the ground into the water pipes.

Distribution System In-Line Gate Valve

Project No:	MC-SU-C1136	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project replaces line valves in the water distribution system throughout the City of Seattle that fail or are obsolete due to age or lack of replacement parts. The replacement of these gate valves extends the useful life of the water main and restores the performance of the water distribution system. This ongoing project also adds valves within the system to enhance system performance, enhance operational control, and reduce the number of customers whose service is interrupted during a water main shut down.

Chamber Upgrades-Distribution

Project No:	MC-SU-C1137	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project improves access to water distribution chambers throughout the water distribution system. The replacement and/or enlargement of the entrance to distribution chambers improves the health and safety of workers who need to access chambers and meets Occupational, Safety, and Health Administration (OSHA) and Washington Safety and Health Administration (WSHA) safety and health requirements.

Distribution Infrastructure

Project No:	MC-SU-C1138	BSL Code:	BC-SU-C110B
Project Type:	Ongoing	BSL Name:	Distribution
Project Category:	Improved Facility	Location:	Citywide
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for modifications and relocations of existing Distribution System assets resulting from third party project impacts to Distribution System infrastructure located in the right-of-way or on public property. The costs are recovered from third parties and primarily other public utilities and agencies through Memorandums of Agreement and standard charges. This project covers all Distribution System modifications and relocations that are funded by third parties excluding Water main Extension project projects. The benefit of this project is accommodation of third party development by relocating or modifying existing Distribution System infrastructure, while retaining a Distribution System that continues to provide cost effective service to the ratepayer.

Reservoir Covering-Lake Forest

Project No:	MC-SU-C1418	BSL Code:	BC-SU-C140B
Project Type:	Discrete	BSL Name:	Water Quality & Treatment
Project Category:	Improved Facility	Location:	Lake Forest Park
Current Project Stage:	Stage 3 - Design	Council District:	Outside City of Seattle
Start/End Date:	2013 - 2022	Neighborhood District:	Outside City of Seattle
Total Project Cost:	\$20,519	Urban Village:	Not in an Urban Village

This project addresses the need for a new cover on Lake Forest Park Reservoir once it has reached the end of its useful life. The project will evaluate options for a new cover, including replacing the existing floating Hypolan cover with a similar design. A new cover will be designed and constructed to maintain and improve the water quality protection and security enhancement functions of the existing cover.

Reservoir Covering-Bitter Lake

Project No:	MC-SU-C1419	BSL Code:	BC-SU-C140B
Project Type:	Discrete	BSL Name:	Water Quality & Treatment
Project Category:	Improved Facility	Location:	N 143rd St and Linden Ave N
Current Project Stage:	Stage 3 - Design	Council District:	Council District 5
Start/End Date:	2013 - 2025	Neighborhood District:	Northwest
Total Project Cost:	\$45,094	Urban Village:	Not in an Urban Village

This project addresses the need for a new cover on Bitter Lake Reservoir once the existing floating cover has reached the end of its useful life. Replacing the existing structure with a new hard covered structure within the same footprint will be one of the options considered. A new cover will be designed and constructed to improve and maintain the water quality protection and security enhancement functions of the existing cover.

Regional Water Conservation

Project No:	MC-SU-C1504	BSL Code:	BC-SU-C150B
Project Type:	Ongoing	BSL Name:	Water Resources
Project Category:	Improved Facility	Location:	Citywide and Regional
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides customer incentives for residential, commercial, institutional, and industrial water efficiency capital improvements. Typical examples include, but are not limited to, water efficient toilets and urinals, clothes washers, landscape irrigation devices, upgrades in industrial process water, and replacing water-cooled equipment with air-cooled versions. The project benefits both existing and future ratepayers. Water conservation provides low-cost options for meeting potential challenges from climate change, managing Seattle's drinking water resources, and customer efficiency and potential cost savings on water bills.

Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides water use efficiency resources to the City's low-income customers to implement water conservation measures authorized by Ordinance 120532, adopted in 2001, and supplements funding provided under SPU's Regional Water Conservation project (C1504). Typical improvements consist of, but are not limited to, installing water-efficient fixtures, such as aerating showerheads and faucets, low water use toilets and efficient clothes washers.

Dam Safety

Project No:	MC-SU-C1506	BSL Code:	BC-SU-C150B
Project Type:	Ongoing	BSL Name:	Water Resources
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project maintains the safety of SPU's water supply dams in the Cedar River and South Fork Tolt River Municipal Watersheds and the in-town reservoir dams. Typical improvements may include, but are not limited to, upgrades to the dams' failure warning systems, spillways, outlet works, piping, and other civil, mechanical, and structural systems. This project ensures the continuing safe functioning, operation and monitoring of SPU's water supply dams and associated facilities per Federal Energy Regulatory Commission (FERC), state and local regulations, and SPU requirements to prevent loss of life and/or property damage and loss of SPU's ability to deliver reliable drinking water supply to its customers.

Watershed Road Improvements/Decommissioning

Project No:	MC-SU-C1601	BSL Code:	BC-SU-C160B
Project Type:	Ongoing	BSL Name:	Habitat Conservation Program
Project Category:	Improved Facility	Location:	Cedar River Watershed
Current Project Stage:	N/A	Council District:	Outside City of Seattle
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project provides forest road improvements and decommissioning in the Cedar River Watershed. The purpose of this project is to reduce the delivery of sediment into the waterways in the watershed to protect both aquatic habitat and water quality. This project is a requirement under the Cedar River Watershed Habitat Conservation Plan (HCP).

Start/End Date:	2000 - 2025	Neighborhood District:	Ballard
Total Project Cost:	\$1,302	Urban Village:	Ballard-Interbay Northend

This project provides improvements at the Ballard Locks to upgrade conditions for salmon. Improvements are focused on conserving the amount of freshwater needed to operate the locks to reduce the demand for freshwater from the Cedar River and increase the availability of freshwater for salmon. This project is a requirement of the Cedar River Habitat Conservation Plan (HCP).

Meter Replacement

Project No:	MC-SU-C4101	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds replacement of existing water meters when they fail or become obsolete. Meters measuring up to two inches are replaced when they stop running. Meters measuring three inches or more are repaired when possible, but are replaced when repair costs exceed replacement costs. Accurate water meters ensure that customers are billed fairly for the water they use. Since water meters also are used to bill customers for their wastewater discharges, 48 percent of the funding is allocated to the Drainage and Wastewater line of business.

This project relocates, replaces, and protects water infrastructure affected by the replacement of the Alaskan Way Viaduct and Seawall. This project encompasses many sub-projects which are collectively known as the Alaskan Way Viaduct and Seawall Replacement project (AWVSR project). The Washington State Department of Transportation (WSDOT) is the lead for the SR-99 replacement, while the City of Seattle is the lead on development of the waterfront public space, implementation of the new surface Alaskan Way, and design and construction of the seawall.

Operations Control Center

Project No:	MC-SU-C4105	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	2700 Airport Way South
Current Project Stage:	N/A	Council District:	Council District 2
Start/End Date:	N/A	Neighborhood District:	Greater Duwamish
Total Project Cost:	N/A	Urban Village:	Greater Duwamish

This ongoing facilities project renovates, rehabilitates, replaces existing buildings, and constructs new facilities at the Operations Control Center located at 2700 Airport Way South to improve the efficiency and effectiveness of the field crews delivering utility services to customers. Typical improvements include, but are not limited to, roof and other exterior replacements, improvements to public spaces, office and crew spaces and lighting, and heating and ventilation systems. These improvements increase the useful life of the facility, preserve the value of the asset, and provide a safe work and public space environment.

Operational Facility - Construction

Project No:	MC-SU-C4106	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing facilities project renovates, rehabilitates, replaces existing buildings, and constructs new facilities at various locations within the city limits to address deficiencies, failures, and functional changes in the SPU Lines of Business. Typical improvements include, but are not limited to, roof replacements, exterior wall or cladding replacements, and improvements to administrative office space, crew and shop space, lighting, heating and ventilation systems, and facilities structures. These improvements increase the useful life of the facilities, preserve the value of the assets, and provide a safe working environment.

This ongoing project provides for electronic and mechanical system upgrades as required at various City facilities. The drinking water Supervisory Control and Data Acquisition (SCADA) system was installed in 2005 throughout King County. System components include, but is not limited to, treatment/flow/pressure sensors, remote control pumps/valves used in the conveyance and quality of drinking water and the delivery of water to fire hydrants, also known as "fire flow".

This ongoing project provides SPU staff with new and replacement heavy equipment that is used throughout Seattle and King County. Typical purchases include backhoes, graders, loaders, dozers, service trucks, and dump trucks. This equipment transports work crews and tools to job sites and supports the safe and efficient replacement, repair, and maintenance of infrastructure that delivers high quality drinking water to 1.5 million customers in King County.

1% for Arts

Project No:	MC-SU-C4118	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	New Investment	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project provides funding for Seattle Public Utilities' 1% for Arts contribution. Eligibility is determined at the individual project level with payment occurring from this project. Funds contributed to the 1% for Arts project allow for the commission, purchase, and installation of art on City-owned properties that is accessible to the public. The Municipal Arts Plan, which is prepared annually, describes the status of ongoing art projects and establishes the scope of work and allocations for new art projects.

Emergency Storms Program

Project No:	MC-SU-C4120	BSL Code:	BC-SU-C410B
Project Type:	Ongoing	BSL Name:	Shared Cost Projects
Project Category:	Improved Facility	Location:	Various
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing project funds water and drainage & wastewater infrastructure capital improvement projects resulting from previous and possible future storm events. Projects within this project are potentially Federal Emergency Management Agency (FEMA) reimbursable and need to be separated for tracking and reimbursement purposes. Typical improvements include but are not limited to repairing and improving roads, bridges, and other stream crossing structures in the City's Municipal Watersheds, as well as replacing damaged equipment, such as pumps and security gates, and stabilizing debris slide areas and stream banks.

This ongoing project provides technology applications and application upgrades in support of improvements to project delivery and performance. Planned projects include continued development of an Enterprise Project Management System, replacement of the Engineering Support Contract Payments system, and SPU's share of costs for the City's central financial system upgrades. Future projects may include development of new Enterprise Resource Planning systems such as HR provisioning and financial reporting. This project will result in an improved ability to plan and deliver projects on schedule and within budget.

This ongoing project will provide new and improved technology applications and accompanying data management tools to support the gathering, monitoring, tracking and analysis of science and engineering information. Several planned projects include replacement of obsolete regulatory compliance tracking applications, upgrades to field monitoring equipment, and the integration of SCADA data with other data systems. This project enhances SPU's ability to control water quality and comply with environmental and health regulations.

Finance and Administrative Services

Section 1 – Overview

The Finance and Administrative Services (FAS) Capital Improvement Program (CIP) is the department's blueprint for planning, replacing, maintaining, remodeling and upgrading FAS-managed facilities and IT infrastructure. These assets are used by City departments, as well as certain nonprofit organizations that serve the public, to deliver critical services to Seattle residents.

FAS' proposed CIP includes appropriations for ongoing capital programs and discrete, one-time capital projects with multiyear durations. Multi-year projects are identified by multiple priorities, including City goals (e.g., greenhouse gas reduction, public safety), code compliance and severity of system deficiencies and importance to tenant department operations. Planned schedules and funding commitments for these types of multi-year projects are typically made every year in conjunction with the annual budget process. The six-year FAS 2021-2026 CIP includes approximately \$119 million in funding for new and existing projects and programs.

Section 2a – Thematic Priorities

FAS is responsible for the operation and maintenance of approximately 3.2 million square feet of building space throughout the city, including municipal courts, police and fire facilities, shops and fleet maintenance facilities, high-rise office space in the civic core, parking garages and some of the City's community-based public service facilities. FAS' capital investments either improve or enhance the operational capacity of these mission-critical facilities and systems. FAS' CIP addresses the following priorities:

- **Asset preservation** – As authorized in Ordinance [121642](#), FAS dedicates annual funding in the CIP to support the replacement of existing building systems, guided by strict policies to ensure those funds are used exclusively to preserve, extend or replace failing and existing components such as roofs, windows, structures, electrical capacity, boilers or other systems at the end of their useful lives.
- **Life and safety issues** – High priority is given to projects intended to ensure continuity of service at facilities that provide emergency or other essential services (e.g., replacing generators near the end of their useful lives at essential facilities, such as police or fire stations). Projects that mitigate potential threats to human life and safety, such as mold and lead abatement and other hazardous conditions in building interiors and structural failures, also receive priority.
- **Federal, state and local requirements** – FAS must consider regulatory requirements in assessing capital needs when replacing existing, failing systems in FAS-managed facilities. One example is the Washington Administrative Code requirement to upgrade fire alarm panels and install fire sprinklers when substantial alterations are made in the course of upgrading or modernizing an existing building. Substantial alterations may also require facility improvements mandated by the Americans with Disabilities Act (ADA), which meet the City's dual goals of compliance with federal requirements and provision of equitable access.
- **Race and Social Justice Initiative (RSJI)** – FAS integrates the City's social equity contracting requirements into all aspects of the execution of CIP projects. Women and minority-owned business (WMBE) vendors, construction contractors and subcontractors may be contracted for design and construction work, furthering the City's goal to promote contracting with WMBE businesses. FAS works within the inclusion plan guidelines published by City Purchasing and Contracting for consultant, contracting and purchasing work. Additionally, Priority Hire, a community workforce agreement (CWA) and apprenticeship rules for construction contracts over \$5 million furthers FAS' compliance with the City's community workforce goals and RSJI targets.

- **Sustainability** – Several City sustainability policies and the Seattle building code guide FAS, as a building owner, to focus on meeting the energy-efficiency requirements of the Seattle Energy Code. Efforts focus on achieving cost-effective measures to reduce energy use and incorporating other sustainability strategies required by regulations. FAS will continue to address new sustainability efforts, such as the “Green Fleet Action Plan” and the “2030 Challenge,” by proposing additional projects to reduce energy use and greenhouse gas emissions.

Section 2b – Aligning Capital Investments with Growth and/or Community Planning

FAS’ 2021-2026 Proposed CIP focuses primarily on preserving existing City assets and infrastructure, and not on implementing modal or master community/area planning efforts. FAS’ commitment to support the operational growth and capacity challenges of our public safety departments is also demonstrated in the CIP investments to build and expand existing public safety facilities. Examples are seen in the replacement of Fire Station 31 and the replacement of the Fire Station 5 dock. The FAS CIP Asset Preservation programs span across city districts to preserve the real property assets on FAS properties within the communities we serve.

Section 3 – Project Selection Criteria

Projects to be considered for inclusion in the FAS CIP fit the priority themes above and adhere to the capital and asset preservation policies adopted in Resolution [31203](#). They typically fall into two categories: projects that improve or enhance operational effectiveness or projects that preserve the City’s capital assets. FAS solicits requests from its tenant departments for facilities-related projects that create or enhance operational effectiveness, vets them for timeliness and appropriateness and evaluates each request on its own merit. FAS also seeks Executive direction regarding projects that increase departments’ operational capacity and other areas of opportunity to consider when planning the City’s CIP priorities.

Asset preservation work is planned on a six-year cycle and evaluated for specific project development and execution. Department staff uses a custom database known as the Unifier Asset Management and Preservation System (Unifier), to maintain building-specific facilities condition indices and known building deficiencies in the more than 100 FAS-managed buildings.

Every year FAS revises the list of facility asset preservation projects that need to be addressed. This list is compiled from annually updated asset management data generated by building condition assessments, energy audits, performance metrics and other capital planning studies. Unifier allows FAS’ various operational work units to collaborate in the scheduling and tracking of preventative maintenance activities. The system organizes tasks such as work-order management, facility maintenance, lease management and maintenance of property information. Elements that extend the useful life of improvements, increase tenant comfort and reduce utility bills are integrated into existing projects where feasible.

Section 4 – 2021-2026 CIP Highlights:

FAS’ 2021-2026 Proposed CIP includes reductions in REET funding to endorsed ongoing programs and funding adjustments over six years, focusing on asset preservation of FAS properties and infrastructure, space consolidations supporting a key mayoral initiative, and improvements to public safety facilities. Below are specific programs and discrete capital projects with funding adjustments:

- **Fire Station 5 Dock Replacement** – FAS’ top priority in the 2021 – 2026 CIP is its Asset Preservation Schedule 2, Fire Station 5 Dock Replacement project. The existing dock is at the end of its useful life. Temporary repairs in 2018 extended existing dock life by 3-5 years, as documented in consultant surveys. The project is being coordinated with its neighboring dock, Washington State Ferries in 2020. Delaying this project poses a 4.5-year delay in the replacement and operational impacts to SFD and therefore would present a public safety risk in the event of a major maintenance situation or failure. The specific impacts include no longer being able to moor and maintain fire boats at the current location, potentially slower response times to marine distress calls, loss of a medical evacuation point for on-water incidents, and costly temporary relocation and operating costs.
- **FAS SMT Tenant Improvement** – This project represents a pilot project looking at the feasibility of a 25% reduction in office space used, by looking at the current FAS usage in SMT. If this project is successful and can be rolled out citywide this would help consolidate approximately 19,000 square feet of outside leases into the SMT. .
- **SMT Elevator Rehab** – This CIP budget cycle proposes bond funding to commence a \$30 million, multi-year design and phased construction project for the modernization of the elevators in the Seattle Municipal Tower (SMT). The SMT is approximately 30 years old, is 62 stories tall, and contains approximately 840,000 square feet. The tower’s vertical transport system consists of 32 elevators and 4 escalators. Similar to much of the infrastructure and building systems in the aging SMT, portions of this transport system are reaching the end of their useful life expectancy based on historical industry standards and detailed evaluations by elevator specialists. Design work for this project was funded as part of the 2020-2025 CIP and at that time a financial planning estimate was included for construction costs. As this project will reach 30% design by the end of 2020 this estimate has now been updated to show more accurate construction costs.
- **Fire Station 31 Replacement** – This project provides funding for the acquisition, design and construction of a new Fire Station 31 to replace the existing facility and the demolition of the existing Fire Station 31. This budget cycle proposes an adjusted spend plan to reflect current conditions but does not change the total project cost.

Section 5 – CIP Revenue Sources

The 2021-2026 Proposed CIP is supported by funding sources including Limited Tax General Obligation (LTGO) bonds, REET I and space rent charges by FAS to City departments. An example of the use of LTGO bond funding is the use of this source toward the proposed SMT Elevator Rehab Project. The related debt service is planned to be funded from the space rents charged by FAS to City departments. Endorsed REET I funds are being reduced during this budget cycle with the remainder focusing on the Asset Preservation Schedule 2, Fire Station 5 Dock Replacement project.

Section 6 – Summary of Upcoming Budget Issues and Challenges

FAS’ most pressing CIP budget issues continue to involve the age and condition of many City-owned buildings and responding to federal, state and local code requirements and City sustainability goals, among other challenges. Below are specific programs and projects related to FAS budget challenges that were further impacted by the requested reductions of endorsed and proposed REET expenditures:

- **Asset preservation** – The FAS Asset Preservation Program, created by Ordinance [121642](#), dedicates funds derived from space rent to replace building systems in 100 City buildings inside and outside of the downtown core. The Asset Preservation (AP) Program has historically been funded at a level of \$4 million annually from space rent charges. This funding level is short of the annual funding level of

\$12 million that FAS' current models suggest to adequately address deficiencies and deferred major maintenance work, estimated at more than \$100 million. Though, REET I funding was increased in 2019, a combination of COVID-19 pandemic impacts and an immediate need at Fire Station 5, have reduced endorsed funding during this budget cycle in AP Schedule I. REET reduction impacts will be absorbed by reprioritization and by deferring the construction start of the City Hall Plaza Restoration project to 2023 or later. Ongoing maintenance issues have revealed chronic waterproofing failures, though deemed to not be detrimental to the building structure. AP Schedule 2 projects including at Charles Street, Airport Way and Haller Lake Maintenance are being deferred.

- **Accessible facilities** – FAS-managed facilities are occupied by City departments providing programs and services to the public. The endorsed funding of the ADA program was reduced across multiple years of the CIP. This reduction delays FAS' ability to remove public-facing barriers and slows positive momentum in improving accessibility to City services mainly in Schedule 2 facilities. These facilities include police stations, fire stations and neighborhood service centers. FAS will have removed approximately 500 of the 4,000 barriers (15%) at the end of 2020, mostly in City Hall, Justice Center, and SMT.
- **Green Fleet Infrastructure** – The full implementation of the Green Fleet Action Plan that sets out to provide electric vehicle charging capacity for the City's fleet, including at designated hubs for larger vehicles, is also being deferred due to REET reductions. Special coordination between CBO and FAS will be required for this program once it recommences since vehicle charging strategies are closely aligned with Fleet Management's vehicle replacement program.
- **Animal Shelter Improvements** – The Seattle Animal Shelter continues to require substantial improvements to its infrastructure and operational shortcomings. Planned improvements being deferred due to the REET reductions include several equipment replacements, space and yard use improvements at these facilities.
- **Other Programs / Projects** – FAS is deferring several projects that require REET funding that were intended to support the carbon neutral and electrification goals, including a solar-ready installation at Fire Station 5, an LED lighting replacement project in City Hall and a decarbonization tool-kit for all FAS properties. FAS is also deferring the commencement of a seismic program that would identify and mitigate structural shortcomings in existing properties to protect people, assets, and assure continuity of operations.

Section 7 – Future Projects/What Is on the Horizon

City facilities must be accessible, reliable, well maintained and responsive to the needs of operating departments to ensure public safety and the delivery of critical services to customers. However, FAS faces a continued challenge in adequately funding asset preservation and major maintenance requirements at the City's aging facilities, including the 30-year old Seattle Municipal Tower, Seattle Fire Department (SFD) Headquarters and FAS' shops and yards.

In 2019, FAS highlighted one such issue related to planning for public safety facilities, especially in the face of population growth and new economic development in Seattle. It remains a challenge to determine the relative priority of asset preservation work on existing public safety facilities (such as at the aging SFD Headquarters facility) compared to possible new real property and public safety facility investments, such as acquiring or developing a South Lake Union fire station. These capital and real property investments will continue to emerge as FAS supports the operational growth and capacity of our public safety facilities.

Finance and Administrative Services

Lastly, there are numerous mayoral initiatives, from decarbonization and sustainability-driven projects, to electrification of vehicles and ongoing support of homeless strategies that will be addressed as funding becomes available.

ADA Improvements - Citywide

Project No:	MC-FA-ADAIMPCTY	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	Multiple City facilities
Current Project Stage:	Stage 3 - Design	Council District:	Multiple

Total Project Cost:	N/A	Urban Village:	Multiple

This project is the FAS American with Disabilities Act (ADA) ongoing program that will address specific ADA improvements and upgrades at various FAS-owned and operated facilities. Past work has included reconfiguration of restrooms, meeting rooms and other spaces, reconfiguration of facility amenities such as drinking fountains and various public access routes to sites, buildings and public spaces. Future funding allows FAS to implement its long-term strategy that resolves the most critical public-facing ADA deficiencies first and maximizes accessibility to the greatest extent possible.

This ongoing program provides for long term preservation and major maintenance to the FAS schedule 1 facilities. Schedule 1 facilities are comprised of existing and future office buildings located in downtown Seattle, including but not limited to City Hall, the Seattle Municipal Tower and the Justice Center. Typical improvements may include, but are not limited to, energy efficiency enhancements through equipment replacement, upgrades/repairs to heating/ventilation/air conditioning systems, upgrades/repairs to electrical systems, upgrades/repairs to fire suppression systems, roof repairs or replacement, and structural assessments and repairs. This work ensures the long-term preservation of the operational use of the facilities.

Asset Preservation - Schedule 2 Facilities

Project No:	MC-FA-APSCH2FAC	BSL Code:	BC-FA-APSCH2FAC
Project Type:	Ongoing	BSL Name:	Asset Preservation - Schedule 2 Facilities
Project Category:	Rehabilitation or Restoration	Location:	Multiple City facilities
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides for long term preservation and major maintenance to the FAS schedule 2 facilities. Schedule 2 facilities are comprised of existing and future structures, shops and yards located throughout Seattle, including but not limited to City vehicle maintenance facilities at Haller Lake and Charles Street, FAS shops located at Airport Way S., fire stations, police precincts including the animal shelter, and other FAS managed facilities used for City Services. Typical improvements may include, but are not limited to, energy efficiency enhancements through equipment replacement, upgrades/repairs to heating/ventilation/air conditioning systems, upgrades/repairs to electrical systems, upgrades/repairs to fire suppression systems, roof repairs or replacement, and structural assessments and repairs. This work ensures the long-term preservation of the operational use of the facilities.

Benaroya Hall Transforming Soundbridge

Project No:	MC-FA-BENSNDBDG	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	1301 3rd Ave.
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 7
Start/End Date:	2017 - 2019	Neighborhood District:	Downtown
Total Project Cost:	\$1,500	Urban Village:	Downtown

This project provides City resources to fund a portion of the Benaroya Hall capital project to transform the Soundbridge learning space into OCTAVE 9. OCTAVE 9 is envisioned as a performance and learning environment that uses the latest audio-visual technology to allow viewers to see performances on-line. Full construction work includes, but is not limited to, demolition, complete construction of the interior finishes, including electrical, cabling, HVAC and renovations of the restrooms.

City Facilities Project Delivery Services

Project No:	MC-FA-CTYPDS	BSL Code:	BC-FA-FASPDS
Project Type:	Ongoing	BSL Name:	FAS Project Delivery Services
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This ongoing program provides pass-through budget authority for FAS to provide design and construction management services, as requested by City departments, at facilities that are neither managed nor leased by FAS. Typical work may include, but is not limited to, the following services: predesign, programming, master planning, conceptual planning, architectural and engineering design and construction administration. FAS proposes to use the second and fourth quarterly supplemental budget process to "right size" the pass-through budget authority for this project. This approach allows FAS to meet the present needs of departments that have funding for their projects and is consistent with year-end accounting and budgetary requirements.

This project provides predesign, design, and construction services for developing or reconfiguring space and other adjacent functions in the Downtown Civic Campus. Work may include, but is not limited to, working with project sponsors to catalog space and equipment needs, energy efficiency improvements, developing planning options, developing project cost estimates, and construction. Work may also include analysis of how vacated space in other facilities might be utilized for other city uses.

Drive Clean Seattle Fleet Electric Vehicle Infrastructure

Project No:	MC-FA-DRVCLNFLT	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	Stage 3 - Design	Council District:	Multiple
Start/End Date:	2016 - 2020	Neighborhood District:	Multiple
Total Project Cost:	\$7,970	Urban Village:	Multiple

This project funds FAS's capital work efforts towards meeting the Drive Clean Seattle (DCS) initiative, a comprehensive transportation electrification strategy to transition Seattle's transportation sector from reliance on fossil fuels to the maximal use of clean, carbon-neutral electricity. Work will include but is not limited to, the design, permitting, and construction of 150 electric vehicle charging stations in the Seattle Municipal Tower to provide capacity for the conversion of City fleet to electric vehicles. Future work may include the installation of charging stations at additional sites.

Electronic Records Management System

Project No:	MC-FA-EMALARCH	BSL Code:	BC-FA-A11T
Project Type:	Discrete	BSL Name:	Information Technology
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Multiple
Start/End Date:	2014 - 2018	Neighborhood District:	Multiple
Total Project Cost:	\$2,786	Urban Village:	Multiple

This project is a multi-year initiative to address a citywide need for an electronic records management system that will manage the retention of electronic records in all formats, provide efficient search and delivery tools for responding to business needs, public records requests and other legal matters, and allow direct online access to records of wide public interest. The project will begin with the replacement of the City's current email archiving system and be followed by additional phases expanding electronic records management capabilities.

Energy Efficiency for Municipal Buildings

Project No:	MC-FA-ENEFFMBLD	BSL Code:	BC-FA-EXTPROJ
Project Type:	Ongoing	BSL Name:	FAS Oversight-External Projects
Project Category:	Improved Facility	Location:	Multiple City facilities
Current Project Stage:	N/A	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project funds energy efficiency work across City facilities, managed by the Office of Sustainability and Environment (OSE), in support the City's goal to achieve a 20% reduction in building energy use by the year 2020. OSE will implement a package of energy efficiency projects, as well as continue a suite of O&M improvements, program management, measurement and tracking, and building assessments. The energy efficiency upgrades are expected to generate utility rebates paid by Seattle City Light and Puget Sound Energy, to be deposited into the General Subfund and shown here as future General Subfund revenue. Work may include but is not limited to, building tune-ups, facility improvements, building energy upgrades, and energy efficiency measures.

This project provides funding for FAS to implement information technology (IT) proposals, to replace existing FAS IT systems that are at the end of their useful lives, accommodate new programmatic and operational needs, and allow the department to function efficiently. FAS coordinates development and implementation of these proposals with the Seattle Information Technology Department. Specific projects include replacing FAS' department-wide budget system, developing a new risk management information system, and assessing and replacing FAS' Capital Projects Information Management System.

Fire Facilities South Lake Union

Project No:	MC-FA-PSFSSLU	BSL Code:	BC-FA-PSFACFIRE
Project Type:	Discrete	BSL Name:	Public Safety Facilities Fire
Project Category:	New Facility	Location:	TBD
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Multiple
Start/End Date:	2017 - 2019	Neighborhood District:	Lake Union
Total Project Cost:	\$300	Urban Village:	Multiple

This project provides for site evaluation and acquisition (and potential future design and construction) for a new Marine Emergency Response facility for a freshwater and land-based fire apparatus in the vicinity of the South Lake Union and Denny Triangle neighborhoods. Due to recent population growth in these neighborhoods, there is an ever-increasing need to site a new facility. Initial funding supports the City's site evaluation work and/or design and pre-planning costs. The total cost of developing the facility has not yet been determined.

Financial Planning Strategy: The estimated cost to reach 100% design, including land acquisition and demolition of the old structure is \$11.3m. Once the project reaches the 30% design milestone it will be baselined and FAS will establish a total project cost. The financial planning estimate above is based on the midpoint of the Total Project Cost range. The expenditures per year are based on typical design, bidding and construction durations of similar projects. The current financial strategy is to finance acquisition, design, and construction with REET backed LTGO bonds.

O&M Impacts: O&M impacts will be evaluated as the project advances through the design process.

Fire Station 31 Temporary Station

Project No:	MC-FA-FS31IMP	BSL Code:	BC-FA-PSFACFIRE
Project Type:	Discrete	BSL Name:	Public Safety Facilities Fire
Project Category:	New Facility	Location:	1319 N Northgate Way
Current Project Stage:	Stage 2 - Initiation, Project Definition, & Planning	Council District:	Council District 5
Start/End Date:	2019 - 2021	Neighborhood District:	Northwest
Total Project Cost:	\$6,450	Urban Village:	Aurora Licton Springs

This project provides resources to provide an interim location for Fire Station 31. The project includes leasing an interim site for the fire station, providing tents and trailers to house the fire fighters and equipment, and identifying a site for a permanent fire station.

Fire Station 32

Project No:	MC-FA-FFERPFS32	BSL Code:	BC-FA-NBHFIRE
Project Type:	Discrete	BSL Name:	Neighborhood Fire Stations
Project Category:	Improved Facility	Location:	3715 SW Alaska St
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 1
Start/End Date:	2010 - 2019	Neighborhood District:	Southwest
Total Project Cost:	\$12,729	Urban Village:	West Seattle Junction

This project, part of the 2003 Fire Facilities and Emergency Response Levy Program, rebuilds Fire Station 32 in a three-story structure at its existing site. It also provides temporary quarters for firefighters while the fire station is under construction. The existing Fire Station 32 is seismically vulnerable and cannot feasibly be renovated to provide the space necessary to support modern firefighting equipment and emergency functions. The project supports firefighters in the provision of high-quality emergency services to the West Seattle community and will protect them in the event of an earthquake.

Fire Station 5

Project No:	MC-FA-FS5	BSL Code:	BC-FA-PSFACFIRE
Project Type:	Discrete	BSL Name:	Public Safety Facilities Fire
Project Category:	Improved Facility	Location:	925 Alaskan Way
Current Project Stage:	Stage 5 - Construction	Council District:	Council District 7
Start/End Date:	2014 - 2023	Neighborhood District:	Downtown
Total Project Cost:	\$12,978	Urban Village:	Downtown

This project, located on the downtown Seattle waterfront, provides a seismic and safety upgrade for Fire Station 5 and makes functional improvements to the facility and building systems. The project renovates the fire station and replaces the existing dock to protect fire fighters in the event of an earthquake and allows them to provide high-quality marine and land-based emergency service. The project was originally timed to coincide with the Seawall replacement project as this facility is physically attached to the Seawall structure, and dock replacement work was timed to align with Washington State Ferries (WSF) projects along the Waterfront.

This ongoing project provides an annual contribution (including increases for inflation) to a capital renewal fund for the Garden of Remembrance, located next to Benaroya Hall, per an agreement with Benaroya Hall Music Center (BHMC), a private, non-profit affiliate of the Seattle Symphony. This project pays for major maintenance and replaces garden installations including, but not limited to, irrigation equipment, landscaping, electrical/lighting fixtures, and mechanical water features. The project is managed by the BHMC and is displayed within FAS' CIP for informational purposes only.

Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This program addresses improvements at the Haller Lake complex. Work includes, but is not limited to, architectural and engineering services associated with predesign, programming, design and construction. This project includes funding to make minor capital improvements. The full extent of improvements needed will require operational modifications as well. There may be further capital work as operational modifications are implemented and other remediation measures are discovered.

Human Capital Management System

Project No:	MC-FA-HCMSYS	BSL Code:	BC-FA-A11T
Project Type:	Discrete	BSL Name:	Information Technology
Project Category:	New Investment	Location:	700 5th Ave
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Council District 7
Start/End Date:	2021 - 2026	Neighborhood District:	
Total Project Cost:	\$60,936	Urban Village:	Downtown

This technology project funds the planning, design and replacement of the aging Human Resource Information System (HRIS), which includes the citywide payroll and benefit system, with a new Human Capital Management (HCM) system. The timing of this project is critical for the citywide HR, timekeeping and payroll system, which will no longer be supported after 2023. The project was approved by the Enterprise Oversight Board (EOB) in February 2020 and will be managed out of the FAS Business Systems division, with funding and partnership from Seattle Department of Human Resources (SDHR) and Seattle IT (ITD)

O&M Impacts: To begin the strategic planning for implementing a new system, both FAS Business Systems and Seattle Department of Human Resources (SDHR) will hire 1.0 FTE and 2.0 FTEs respectively in 2020. Additional funding from ITD will allow for a strategic consulting firm to assist with this body of work and finalize the implementation budget and schedule. Additional staffing and services will be required in 2021 and 2022 for the life of the project.

North Seattle Public Safety Facilities

Project No:	MC-FA-SPSFDEBT	BSL Code:	BC-FA- SPSFDEBT
Project Type:	Ongoing	BSL Name:	Seattle Public Safety Facilities Debt Service
Project Category:	Improved Facility	Location:	Multiple
Current Project Stage:	Stage 1 - Pre-Project Development	Council District:	Multiple
Start/End Date:	N/A	Neighborhood District:	Multiple
Total Project Cost:	N/A	Urban Village:	Multiple

This project provides funding for long term public safety facility needs in North Seattle. These funds are for planning, design, and possible construction of facilities, as well as potential debt service for larger bond funded projects. Due to the current age of both police and fire facilities, along with expected growth in Northgate and other areas in North Seattle, planning for future improvements is critical to maintaining emergency response.

Seattle Municipal Tower Chiller Plant Replacement

Project No:	MC-FA-SMTCHLRPL	BSL Code:	BC-FA-APSCH1FAC
Project Type:	Discrete	BSL Name:	Asset Preservation - Schedule 1 Facilities
Project Category:	Rehabilitation or Restoration	Location:	700 Fifth AVE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2018 - 2020	Neighborhood District:	Downtown
Total Project Cost:	\$18,000	Urban Village:	Downtown

This project replaces the chiller plant in the Seattle Municipal Tower (SMT). The project will require a multi-year execution plan to allow for permitting, design, procurement and construction to occur during the windows of opportunity when cooling is not required. This highly technical, complex construction effort is a once-in-a generation endeavor. With a dwindling supply of spare parts for maintenance and repairs, it is no longer feasible to defer this critical work, and delaying the project would put FAS at risk of not being able to provide essential cooling to City of Seattle offices and other building tenants. Project costs shown here are exclusive of \$1 million expended on preliminary work on this project in 2018. Those funds are included in the Asset Preservation - Schedule 1 Facilities project (MC-FA-APSCH1FAC).

Start/End Date:	2019 - 2022	Neighborhood District:	Downtown
Total Project Cost Range:	28,000 - 32,000	Urban Village:	Downtown

This project will improve the operation, reliability, and system performance of the Seattle Municipal Tower (SMT) elevators. The work will bring the SMT elevators to current building codes and into compliance with Americans with Disabilities Act (ADA) requirements. This project is envisioned to be a multi-year effort that must be phased to minimize impacts on SMT ongoing building operations, and on the approximately 4,000 city staff who work in the building and the public who visit the SMT to access City services.

Financial Planning Strategy: The estimated cost to complete bid documents for this Design-Build contract is \$2,500,000, \$1,500,000 of which is funded with LTGO bonds. The remaining \$1,000,000 was funded with REET 1.

At 30% design FAS will reevaluate the total project cost and the financial planning strategy for the remaining costs of the project, which could include local funding and debt funding.

The current mid-point for the financial planning estimate is \$30,000,000 including the \$2,500,000 currently appropriated for design.

Seattle Municipal Tower Facility Upgrades

Project No:	MC-FA-SMTUPG	BSL Code:	BC-FA-GOVTFAC
Project Type:	Ongoing	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	700 5th Ave.
Current Project Stage:	N/A	Council District:	Council District 7
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This on-going project, located in the Seattle Municipal Tower, provides funds for the planning, design and construction of operational improvements and renovations in the Seattle Municipal Tower. Work may include, but is not limited to, space reconfigurations, reconfiguration of amenities such as drinking fountains and public spaces, and improvements to facility infrastructure such as restrooms and showers.

Seattle Municipal Tower IDF Infrastructure Upgrades

Project No:	MC-FA-SMTIDFINF	BSL Code:	BC-FA-GOVTFAC
Project Type:	Discrete	BSL Name:	General Government Facilities - General
Project Category:	Improved Facility	Location:	700 Fifth AVE
Current Project Stage:	Stage 3 - Design	Council District:	Council District 7
Start/End Date:	2015 - 2020	Neighborhood District:	Downtown
Total Project Cost:	\$2,500	Urban Village:	Downtown

This project provides electrical, cooling, and fire separation upgrades for 15 existing Intermediate Distribution Frame (IDF) rooms in the Seattle Municipal Tower (SMT) that house network, telephone and security systems. The resultant electrical and cooling capacity increases will allow the systems in the room to be upgraded now (in the case of Voice over IP phones) and in the future. In addition to these capacity infrastructure upgrades, fire separations will be established for the rooms. This project will enhance the reliability of the systems housed in the IDF rooms by improving the infrastructure that serves them and protecting the rooms from potential damage caused by events outside of the rooms.

Project Type:	Ongoing	BSL Name:	Publ Safety Facilities Police
Project Category:	New Investment	Location:	Various Police facilities
Current Project Stage:	N/A	Council District:	Citywide
Start/End Date:	N/A	Neighborhood District:	Not in a Neighborhood District
Total Project Cost:	N/A	Urban Village:	Not in an Urban Village

This ongoing project preserves or extends the useful life or operational capacity and provides for improvements to FAS-owned Police facilities including, but not limited to, the East Precinct, the North Precinct, the West Precinct, the Mounted Patrol Facility, the Harbor Patrol Facility, and the K-9 Facility. Typical work may include, but is not limited to, upgrades to heating, ventilation, air conditioning upgrades, equipment replacement, siting, pre-design, test-to-fit analyses, and structural assessments and repairs. These improvements support police service by extending the operational life of old police facilities, complying with regulatory requirements, or addressing capacity problems.

SLIM Replacement

Project No:	MC-FA-SLIMREPL	BSL Code:	BC-FA-A1IT
Project Type:	Discrete	BSL Name:	Information Technology
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 5 - Execution (IT Only)	Council District:	Multiple
Start/End Date:	2015 - 2018	Neighborhood District:	Multiple
Total Project Cost:	\$400	Urban Village:	Multiple

The Seattle License Information System (SLIM) manages the issuance and renewal of business licenses and the collection of revenue from fees and taxes. SLIM is now outdated and can no longer adequately meet the needs of expanding business license, tax collection, and enforcement processes and needs to be upgraded. Recommendations for a SLIM replacement will be considered as the Multi-City Business License and Tax Portal project is implemented.

Start/End Date:	2013 - 2018	Neighborhood District:	Multiple
Total Project Cost:	\$83,433	Urban Village:	Multiple

This Citywide project involves planning and implementing the move of Summit, the City's financial management system, to the most current software release (PeopleSoft Financials 9.2), standardizing financial processes and policies, and implementing additional functionality to enable the City to make more informed financial decisions and meet regulatory obligations. Summit has not been upgraded since 2006 and Oracle discontinued support for the product in 2011. 2018 amounts shown below include program contingency in the event needed during implementation of Phase II of the project. LTGO bonds will be issued according to actual cash flow needs.

Information Technology

Overview

The Seattle Information Technology Department (Seattle IT) aims to be a best-in-class digital service delivery team for City of Seattle departments and the residents we serve. Seattle IT provides powerful technology solutions to the City and public; including, data, telephone, and radio networks; applications and application infrastructure; desktop, mobile and printing devices; cloud services; website and internet connections; television channel; data centers, servers, storage, and backup. Seattle IT also manages designated projects on behalf of the City, other departments, and regional partners.

Seattle IT's Capital Improvement Program (CIP) supports major maintenance, improvements, replacements, and upgrades to the City's existing technology systems, as well as the development and implementation of new projects. Seattle IT's 2021-2026 Proposed CIP budget is \$94.2 million. Details for 2021 are provided in the following table.

CIP Program Name	2021 Proposed	Planned Spending
<i>Discrete Projects</i>		
Criminal Justice Information System Projects	\$10,000,000	Implement case management systems for agencies including Seattle Municipal Court, the Hearing Examiner, and the City Attorney.
HRIS Replacement	\$0	Transfer budget for the Human Resources Information System upgrade to FAS.
<i>Ongoing CIP Programs</i>		
800 MHz Radio Network Program	\$705,000	Maintain radio network infrastructure and public safety radios.
Applications Development-Public Safety	\$1,680,000	Replace existing SPD computer-aided dispatch system and mobile application used by 911 and officers in the field.
Computing Services Architecture	\$7,485,000	Computer equipment related to a new Unified Communication System (to replace the City's current telephone system) as well as routine equipment replacement and upgrades for servers, storage, and facility infrastructure.
Data & Telephone Infrastructure	\$12,875,000	Network equipment related to Unified Communication System, and routine equipment replacement and upgrades.
Fiber-Optic Communication Installation & Maintenance	\$4,356,000	Fiber installation and maintenance.
Seattle Channel Maintenance & Upgrade	\$337,000	Equipment replacement and maintenance.
Next Generation Data Center	\$0	Transfer budget to Computing Services Architecture and Data and Telephone Infrastructure programs to align with actual replacement spending.
Department Total	\$37,438,000	

CIP Revenue Sources

Seattle IT's CIP has been funded through a variety of revenue sources, including:

- **Rates and Allocations:** There are multiple services within the department that are cost-allocated based on a percentage of use for the service provided or billed directly to a department based on the actual cost of time and labor or quantity of materials provided. Seattle IT's budget also includes some projects that are funded using proceeds from general obligation bonds. Rates and allocations provide the funds to repay the debt service on these bonds.
- **State and Federal Grants:** Federal and state grants have been used to finance system replacements and new capabilities. In some cases, Seattle IT has been the direct recipient of the funds; in others, Seattle IT has managed grant-funded projects for customers. The use of grant funding for the Seattle IT CIP has been intermittent.
- **Cable Franchise Fees:** Seattle IT collects Cable Franchise Fee revenues that are set in franchise agreements with the cable providers. Some of this revenue has been used to fund the CIP Program which supports the Seattle Channel. Cable Fees have historically provided less than 1% of Seattle IT's CIP program.
- **Reserves:** In some instances, Seattle IT's rates and allocations include the collection of funds which are accumulated and held in a reserve in Seattle IT's Fund balance. Currently, this is only done for the 800 MHz radio system, although it has been considered for other areas. Expenditures of these reserve funds appear in the Seattle IT CIP program. Historically, there is a low level of spending for ongoing Operations & Maintenance items, with intermittent large expenditures associated with major replacements and upgrades.
- **Private Dollars:** In the past, Seattle IT projects have occasionally included funding from external non-public sources. Such instances are highly intermittent, usually for relatively small dollar value and not projected to continue at any appreciable level.
- **Levy:** In the past, Seattle IT received some CIP funding from a levy for the development, acquisition and installation of the 800 MHz emergency radio communication system. Going forward, the future replacement and upgrade of the county-wide radio system is funded by the Puget Sound Emergency Radio Network levy. Outside of that, no additional levy funding is anticipated.
- **Bonds & Future Bond Proceeds:** Seattle IT utilizes funding from City bond sale proceeds to implement significant capital projects in the CIP. Rates and allocations typically provide the funds to repay the debt service on these bonds.
- **Use of Fund Balance:** Seattle IT may use existing fund balance or planned carryforward to implement some projects in its CIP.
- **To Be Determined:** Occasionally, Seattle IT's CIP includes future projects for which a specific funding source has yet to be specified. These projects will not go forward unless and until funding is secured.

2021-2026 CIP Highlights

Seattle IT's 2021-2026 Proposed CIP Budget includes the following transfers and modifications to CIP programs:

- Human Resources Information System (HRIS) Replacement Project (-\$1,700,000) includes funding for the Human Capital Management (HCM) Scoping Study project, which was created in 2020 to fund consulting services to complete the initial scoping and planning phase of the HCM System project. As further planning and discussions have progressed, it has been determined that FAS will take the lead on the HCM project. The 2021-2026 Proposed CIP transfers funds for HCM from Seattle IT to FAS.
- Data & Telephone Infrastructure (-\$1,206,000) funds maintenance, replacement, and upgrades of software and major hardware for the City's data and telephone systems. The legacy telephone system is being replaced with a comprehensive communication platform under the Unified Communications (UC) project, and ongoing telephone equipment will be purchased via the UC project in future years. The 2021-2026 Proposed CIP decreases funding in the Telephone Hardware project for ongoing lifecycle replacement of communications equipment.
- Next Generation Data Center (-\$14,378,000) project includes bond funded budget to support end of life replacement for the Next Generation Data Center. The 2021-2026 Proposed CIP redistributes that funding to the appropriate Technology Infrastructure CIP projects – Computing Services Architecture and Data & Telephones Infrastructure – based on planned need.

Thematic Priorities

Seattle IT's priorities are:

Priority 1: Connective and Collaborative

Enable collaboration by providing tools and information anytime, anywhere, from any device.

Priority 2: Efficient and Flexible

Provide business process and operations efficiencies that enable rapid response and technology changes while upholding fiscal responsibility.

Priority 3: Talent and Capabilities

Continuous investment in an inclusive and supportive workforce that keeps pace with a dynamic technology and business landscape.

Priority 4: Modern and Innovative

Further City priorities, including social justice and equity goals, through the acquisition and implementation of leading edge technology solutions and practices.

Priority 5: Reliable and Sustainable

Provide clients with ongoing practical, security and modern infrastructure, platforms and tools to support their business needs.

Priority 6: Privacy and Transparency

Respect privacy guidelines that apply to every part of the IT workplan, as well as provide a clear picture of IT resources to stakeholders.

Project Selection Criteria

STEP 1: Identification of Technology Needs and Opportunities

In this step, needs and opportunities for technology investments are identified. This happens on a rolling basis throughout the year, as well as during the budget planning process. Input comes from multiple places, including:

- customer department requests and requirements (including technology plan alignment to department strategic plans)
- Seattle IT Strategic Agenda
- technology roadmaps (updated annually)
- asset replacement schedules
- coordination with partners (regional efforts, vendor partners, etc.)

This step includes development of initial cost estimates and other resource requirements, potential timing, and dependencies. At the completion of this step, potential projects are added to the Citywide IT Project Portfolio for tracking and consideration through Seattle IT's Project Gate Review process.

STEP 2: Identification of CIP and Non-Discretionary Projects

As part of the Gate Review process, items identified in Step 1 are filtered to determine if they are (1) CIP-appropriate or not and (2) discretionary or not. Criteria for determining if they are CIP appropriate or not include:

- overall dollar value
- timeframe of implementation (e.g., multi-year project)
- lifespan of investment
- investment in/preservation of long-term infrastructure
- the nature of the acquisition (e.g., goods, services, etc.)

Criteria for determining if they are non-discretionary include:

- legally mandated (e.g., debt service, federal or state law/regulation changes, court orders, etc.)
- urgent security or risk mitigation needs (e.g., major system failure, major security breach)

- reimbursable services to others (e.g., Seattle IT manages a regional fiber consortium where the partners contract with/through us to get work done).

Projects which are determined to be non-discretionary are automatically moved forward for inclusion in Seattle IT's initial CIP and budget proposal. Discretionary projects proceed to Step 3. Regardless of discretionary status, project requests complete the Gate Review process to validate projects are established with the appropriate governance, value proposition and risk mitigation planning.

STEP 3: Prioritization of CIP-Appropriate Discretionary Projects:

In this step, proposed investments are screened to determine if they are a match for Seattle IT's normal maintenance/upgrade/replacement programs within the CIP. Investments such as these tend to be smaller in scale (less than \$250,000), "like for like" replacements (e.g., old equipment replaced by new equipment with little to no functionality change), etc. These projects are rated by program managers based on criteria tailored to each program and implemented as annual funding allows.

Larger capital investments which are best implemented on a stand-alone basis due to the size and complexity of the project are evaluated and ranked separately based on the following criteria:

- asset preservation/replacement/maintenance
- product lifecycles
- legal requirements/mandates
- security/risk mitigation
- reimbursable from other sources (other depts. or outside entities, grants, reserves)
- dependencies (on other products, equipment, etc.; also on staff/resource availability/long-term supportability)
- internal customer demands (including capacity) – including Mayoral/Council/Mayor's IT Subcabinet priority
- external customer demands – public, businesses, etc.
- external drivers (vendor changes, regional commitments, etc.)
- efficiency/effectiveness improvements/resource savings and return on investment
- key future trend/forward-looking/pro-active

Summary of Upcoming Budget Issues and Challenges

- **Rapid and major changes in technology:** The continued rapid rate of change in technology presents a major challenge for the City. User demands (both internal staff and constituents) around technology continue to grow as available functionality expands exponentially. New technologies provide new solutions and new opportunities, but at the same time they can initially disrupt productivity, require upfront costs, and impact security, privacy, and the governance landscape. Vendors regularly "de-certify" and stop supporting products the City relies upon, leaving the choice of spending significant amounts of money to upgrade to supported products or risk running important/critical City functions on unsupported platforms. At the same time, the method by which vendors deliver technology solutions is rapidly changing. Many vendors have moved or are moving away from delivering a software product to the City for installations on City servers; instead, they are offering cloud-based and hosted solutions that the City can access on a subscription basis. While

offering many benefits, this changing delivery approach requires increased City investments in identity management, data integration, and contract management.

- **Planning for future investments and lifecycle management.** Departments want to move fast to leverage new technologies before Seattle IT has developed the platforms, teams, or culture to make this happen. Seattle IT balances the competing objectives of doing things right and doing them right now.
- **Platform First:** Similar to all large enterprises, where technology has overtaken the organization's operations organically and over a long period of time, the City of Seattle also sits on hundreds of legacy technology solutions. A fragmented technology footprint is a major cyber security concern but in today's challenging economic climate, it is also a financial liability. A key factor in achieving reductions in the City's technology investment is directly dependent on a Platform First approach where 80% of the City's technology business is performed on 20% of technology solutions. Seattle IT continues to promote the platform first approach but will have limited success without a formal City-Wide commitment to address this as an enterprise issue versus a tactical IT problem.
- **Security and Privacy.** The security risks associated with technology continue to grow - the variety of threats from mobile devices, social media, compromised web sites, and other sources continues to multiply. Cloud services like Office 365 and the increased use of mobile devices offer a new set of security-related challenges. At the same time, the City collects and uses a vast and expanding amount of data on a regular basis. Some of this data contains personally identifiable information or may otherwise pose a privacy concern if exposed or if used in a manner inconsistent with public expectations. Emphasis is shifting away from end-point security to risk management of critical assets and assurance of identity. Preventive controls are no longer reliable, requiring a greater emphasis on the ability to locate and quickly remediate compromised technology.
- **Public Expectation.** The public has high expectations for how government performs, including how technology is used to deliver efficient and accessible government services. Some Seattle residents are tech savvy while others still lack internet access. Generational differences also create different expectations regarding services. Investments in new technology-enabled government services must balance many audiences.

Future Projects/What is on the Horizon

Seattle IT has identified several initiatives and issues which will need to be addressed at some point in the future.

- **Software systems which require replacement/upgrades.** Prior to IT consolidation, the Department of Information Technology CIP did not include funds to cover replacement of large applications owned and operated by individual departments. Since consolidation, Seattle IT has "inherited" responsibility for many such systems, most of which did not come with any long-term replacement funding. Replacement and upgrades for systems owned and operating by Seattle Public Utilities and Seattle City Light are generally being funded out of the utilities' CIPs with Seattle IT acting as the service provider. However, funds for other large applications and systems needing replacement are not comprehensively programmed into Seattle IT's CIP. Instead, Seattle

IT will continue to address these needs on a case by case basis as the need arise.

- **Long-term major upgrades to the Regional Radio System.** The City is part of a regional public safety radio system (Puget Sound Emergency Radio Network). The current technology platform is approaching phased obsolescence and needs to be replaced or upgraded in the next few years. The four co-owners of the existing system, including the City of Seattle and King County, are working together to implement a replacement radio system. A levy to fund this important initiative was passed in spring 2015, and a formal governance structure for the effort was adopted via an Inter-Local Agreement signed by the 12 participating jurisdictions. The current CIP does not reflect the results of any potential changes related to the new system, as discussions regarding the long-term governance and operational support are still ongoing.
- **Infrastructure systems which require replacement/upgrades.** Seattle IT's CIP contains sufficient funding to cover routine replacement of lesser value items, especially those which occur every year (e.g., switches, mid-range servers, etc.) However, larger value, intermittent replacements are more difficult to fund within existing budget. These needs will continue to be addressed on a case by case basis as the need arises.

800 MHz Radio Network Program

Project No:	MC-IT-C3550	BSL Code:	BC-IT-C0700
Project Type:	Ongoing	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th Ave / Various
Current Project Stage:	N/A	Council District:	Council District 3
Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project funds the upgrades and replacement of software and hardware for the City of Seattle’s portion of the King County Regional 800 MHz radio system. The 800 MHz radio system provides the communication infrastructure required for public safety operations such as 911, Medic One, Fire and Police.

Start/End Date:	N/A	Neighborhood District:	Downtown
Total Project Cost:	N/A	Urban Village:	Downtown

This project provides funds to develop and implement software applications used by the Seattle Police Department (SPD) and the Seattle Fire Department (SFD). The applications will improve personnel oversight and deployment, in addition to enhancing the accessibility and quality of SPD and SFD data. These applications will support ongoing efforts to achieve improved transparency and compliance.

SPD Body Worn Video

Project No:	MC-IT-C9300	BSL Code:	BC-IT-C0700
Project Type:	Discrete	BSL Name:	Capital Improvement Projects
Project Category:	New Investment	Location:	700 5th AVE
Current Project Stage:	Stage 6 - Closeout	Council District:	Council District 3
Start/End Date:	2016 - 2018	Neighborhood District:	Downtown
Total Project Cost:	\$2,597	Urban Village:	Downtown

The project includes the procurement and implementation of the Seattle Police Department's body-worn camera program. The project includes funding for equipment, operating and maintenance costs, and personnel costs for 2017 and 2018. Additional staff resources will be identified once a system is selected through the RFP process. SPD plans to issue the first cameras to patrol officers in early 2017. SPD developed a proposed approach for implementation, largely informed by the pilot program conducted in 2015.

Appendices

Appendix A: New or Expanded Capital Facilities

Department of Finance and Administrative Services

Project ID	Project Name	Project Capacity	Project Location	2021 Budget*
MC-FA-SFDVENT	Fire Stations Ventilation Upgrades	This BIP is in response to a complaint that was filed to Washington State Labor and Industries. It corrects ventilation deficiencies at 11 facilities to improve safety standards for firefighters, which will bring the facilities into conformance with the Washington Administrative Code.	Multiple	\$180

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

Seattle City Light

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
MC-CL- XB6351	Boundary Powerhouse - Unit 51 Generator Rebuild	Rationale: The Unit 51 generator at Boundary is the original installation and its typical 30-year life expectancy has expired. It has accelerated deterioration of its windings caused by thermocycling (frequent startup and shutdowns of the generator, resulting in more pronounced temperature fluctuations). Failure of a generator can cause lost revenue, which during runoff could be many millions of dollars. Additionally, a failure may cause a fire and set off the fire extinguishing system, which would expose the powerhouse and its personnel to safety risks inherent with fire, smoke, and carbon dioxide (CO2) discharge for fire suppression. A rewind also allows for an updated insulation design that will permit the use of water as a fire protection system, providing an improvement in worker safety. Also, if the technology is advanced sufficiently by the time of the rewind, we may add a rotor mounted scanner or other diagnostic equipment. Alternative(s): Defer work indefinitely.	10382 Boundary Rd, Metaline, WA 99153	\$242
MC-CL- XB6353	Boundary Powerhouse - Unit 54 Generator Rebuild	Rationale: The Unit 54 generator at Boundary is the original installation and its typical 30-year life expectancy has expired. It has accelerated deterioration of its windings caused by thermocycling (frequent startup and shutdowns of the generator, resulting in more pronounced temperature fluctuations). Failure of a generator can cause lost revenue, which during runoff could be many millions of dollars. Additionally, a failure may cause a fire and set off the fire extinguishing system, which would expose the powerhouse and its personnel to safety risks inherent with fire, smoke, and carbon dioxide (CO2) discharge for fire suppression. A rewind also allows for an updated insulation design that will permit the use of water as a fire protection system, providing an improvement in worker safety. Also, if the technology is advanced sufficiently by the time of the rewind, we may add a rotor mounted scanner or other diagnostic equipment. Alternative(s): Defer work indefinitely.	10382 Boundary Rd, Metaline, WA 99153	\$4,652

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

MC-CL- XB6401	Boundary Facility - Minor Improvement s Program	Rationale: Setting up and monitoring separate capital projects entails considerable administrative costs which may unreasonably increase the cost of small projects, even when identified in advance. Covering such projects under the emergent project program allows for accountability and tracking at the subproject level, with minimal overhead costs. A recent example is a FERC requirement for a mobile emergency generator as a redundant source of power to open spill and sluice gates. Project Weighted Rating-40.8, Primary Rationale-Varies Alternative(s): The only alternative for emergent projects is to find some other way to fund emergency needs that arise. Usually, for capital projects, this involves emergency appropriations involving the passage of special City ordinances, among other things. The time required to cut through the red tape of special appropriations could be prohibitively long, given that the needs that arise are either of an emergency nature or cannot be predicted. The only alternative for planned small capital projects is to secure separate budgeting for each one by putting each small project into the same administrative league as multi-million dollar projects.	10382 Boundary Rd, Metaline, WA 99153	\$1,569
MC-CL- XB6493	Boundary Powerhouse Generator Step-up Transformer Replacement	Rationale: Design to begin in 2010. Closeout in 2017. First transformer delivered in 2012. Alternative(s): An alternative approach would be to repair or replace units as they fail from deferred maintenance. This approach would eventually result in a significant loss of revenue and/or fines from a regulatory agency. Accepting the risk of failure would not be in the best interest of the utility. Having a spare unit onsite would prevent such failures.	10382 Boundary Rd, Metaline, WA 99153	\$3,804
MC-CL- XB6535	Boundary Powerhouse - Unit 52 Generator Rebuild	Rationale: This project is part of the Utility's Generator Rebuild Program, a series of projects to maintain and extend the useful life of the Utility's aging generators. The program rebuilds ten generators, accounting for 70 percent of City Light's generating capability. Alternative(s): No Alternatives Provided.	Boundary Rd, Metaline, WA 99153	\$3,104
MC-CL- XB6565	Landis and Gyr RTU Modernizatio n Boundary, Cedar Falls and Skagit	Rationale: Replace failing gear with new. Alternative(s): No Alternatives Provided.	Boundary, Skagit and Cedar Falls power facilities	\$271
MC-CL- XB6566	Boundary - DC Battery System & Charge Modernizatio n	Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.	Boundary Rd, Metaline, WA 99153	\$713

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XB6603	Boundary - Unit 56 Exciter Replacement	Rationale: The existing exciter is not rated for continuous operation at the new increased capacity of Unit 56. Alternative(s): None.	Boundary Rd, Metaline, WA 99153	\$47
MC-CL- XB6987	Boundary - Licensing Mitigation	Rationale: In order to continue to operate the facility, the City must obtain a new FERC license. The decision to apply for a new license has been made and we have embarked on the default FERC licensing process, the Integrated License Process (ILP). While the cost of attaining a new license to operate Boundary Dam is very significant, Boundary provides anywhere from 25% to 40% of SCL's power requirements and produces power at a cost significantly below the market rate. The plant's operations are shaped to deliver power during peak-load hours, an operating regime that allows the City to meet continued service area load growth and provide regional system reliability. For these reasons, the Utility has determined that obtaining a new license is a priority and we are confident that it will continue to be a cost effective source of renewable power for the City. Alternative(s): No Alternatives Provided.	10382 Boundary Rd, Metaline, WA 99153	\$25,386

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XC6358	Cedar Falls Powerhouse - Penstock Stabilization	<p>Rationale: At their upper ends, the two parallel penstocks cross the river on a concrete arch bridge. This bridge was built in 1914 and a 1 inch layer of shot Crete has flaked off the bridge in several locations. A structural analysis of the bridge, performed by Woodward-Clyde Consultants, revealed that the bridge would not stand up to the Maximum Credible Earthquake, which would be approximately 7.5 on the Richter scale. The dam above the bridge is strong enough to withstand that size of an earthquake. Loss of this bridge would shut off water supply to the powerhouse. Penstock 5 goes over another bridge where a steel trestle that also is seismically unfit needs some additional support. High flows in the river during a flood caused erosion under Penstock 6 and subsequently three of the support saddles settled and lost contact with the steel pipe. Through the years other support saddles have also settled or cracked and lost their ability to hold the penstocks. The exterior coating on the pipes needs restoration in the areas where the penstocks are buried. All these problems have the potential to stop power production at Cedar Falls. Just as important, serious damage will most likely occur to the environment and Seattle's water supply if any of the penstock support structures are allowed to fail. A break of one or both of the penstocks will jeopardize the City's ability to fulfill its obligation to regulate fish flows in the Cedar River. For more on this topic, please see the Notes section. Regular inspections have also revealed that the cement mortar lining in the 78 inch diameter pipes is falling off in places, and that hundreds if not thousands of rivets holding the pipes together are corroding. Neither of these two problems threatens the penstocks at this time and we can defer their repair for several more years. Alternative(s): Defer the work indefinitely and risk catastrophic failure that would curtail energy generation for an extended time period. Such a failure would be harmful to fish runs and jeopardize Seattle's water supply.</p>	19901 Cedar Falls Rd SE, North Bend, WA 98045	\$82
------------------	--	---	--	------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XC6406	Cedar Falls/South Fork Tolt - Minor Improvements Program	Rationale: Setting up and monitoring separate capital projects entails considerable administrative costs which may unreasonably increase the cost of small projects, even when identified in advance. Covering such projects under the emergent project program allows for accountability and tracking at the subproject level, with minimal overhead costs. A recent example is the replacement of an Oil-filled Transformer. Project Weighted Rating-40.8, Primary Rationale-Varies Alternative(s): The only alternative for emergent projects is to find some other way to fund emergency needs that arise. Usually, for capital projects, this involves emergency appropriations involving the passage of special City ordinances, among other things. The time required to cut through the red tape of special appropriations could be prohibitively long, given that the needs that arise are either of an emergency nature or cannot be predicted. The only alternative for planned small capital projects is to secure separate budgeting for each one by putting each small project into the same administrative league as multi-million dollar projects.	19901 Cedar Falls Rd SE, North Bend, WA 98045	\$561
MC-CL- XC6450	Cedar Falls Powerhouse - Unit 5/6 Generator Protective Relay	Rationale: The present generator protection is outdated and lacks some basic protection elements to protect it from abnormal frequency and voltages. The existing relay does not meet the North American Electric Reliability Council (NERC) and the Western Electricity Coordinating Council (WECC) regional requirements for maintaining the generator in-service during system disturbances. This deficiency was identified as part of the NERC/WECC compliance program, and has been scheduled for replacement as part of a prioritized program along with other outmoded technology present in SCL's aging infrastructure. Alternative(s): 1. Do the project described. 2. Do Nothing. This is not considered to be a viable approach since the present generator protection scheme does not meet the ANSI/IEEE Standard or the WECC/NERC regional requirements for the protection of generators.	19901 Cedar Falls Rd SE, North Bend, WA 98045	\$1,343
MC-CL- XC6573	Cedar Falls - Bank 6 Replacement	Rationale: This project improves generation reliability by replacing this critical transformer prior to failure. It will also enhance overall operational performance since new transformers are more efficient, have more environmental protections, and require less maintenance. Alternative(s): The only alternative to this project is to run the transformer to failure which would necessitate an emergency project to replace it.	Cedar Falls	\$4,280
MC-CL- XC6625	Cedar Falls Rehabilitation	Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.	Cedar Falls	\$150

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF8389	Special Work Equipment - Shops	<p>Rationale: This project provides new tools and work equipment to replace outdated equipment. The project updates technical systems to current standards, as our current transformer test equipment relies on out dated computer equipment and programming that is no longer supported. Some equipment does not meet latest safety standards. Other equipment is no longer supported by replacement parts or can no longer be repaired to provide accurate cutting, bending, etc. Some equipment needs to be updated to provide for increased production or size of stock material worked. Other equipment needs updated programming to provide for the latest technology advancements. The project ensures the transformers CL purchases and installs are safe and will last up to and beyond the average life span. It also ensures that we receive what we paid for, as specified, and that it will fit our system without problems such as oil leaks, incorrect voltage, and non-functional safety interlocks, etc. Replacing shop special tools and equipment will allow customer service enhancements by providing newer technology for more accurate fabrication of parts and other shop made items, safer tools to use, and newer equipment with more safeguards built in. Alternative(s): The recommended alternative would be to fully fund the special tool requests. This option would allow for the stated goals to be realized. Alternatives to funding special tools budget for shops are to not fund it or to fund at a lower level. Both of these options would slow production and would impact the opportunity to effectively serve the shops customers. It could also impact safety and injury rates where older equipment is less efficient and less ergonomic, requiring more repetitive motion and more labor with less automation.</p>	System wide	\$292
MC-CL- XF9006	Safety Modification s	<p>Rationale: Project 9006 was established to correct imminent and critical safety hazards not covered by divisional budgets. Investments will lower the risk of WA State compliance penalties and possible costs related to employee or customer injuries. Alternative(s): 1. Complete the projects as they emerge within established budget. Proactive response reduces the risk of employee and customer injuries, and related costs, as well as potential non-compliance penalties. 2. Do not fund project. This may leave significant safety problems unresolved, leading to increased compliance penalties. 3. Defer the project. The impact is similar to alternative 2 above, and also results in a continual growth of open and unfunded safety projects.</p>	Citywide	\$2,216

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF9007	Miscellaneous Building Improvements	Rationale: Setting aside contingency funds specifically to deal with unforeseen conditions and opportunities openly recognizes the uncertainties of planning. Individual project budgets are commonly inflated to cover emergencies, however a more prudent and candid means of dealing with unexpected occurrences is to budget specifically for emergent issues and then work to steadily reduce the emergency budget through proactive maintenance and scheduled replacements. Alternative(s): 1. Fund the 9007 program. 2. Don't fund the 9007 program and add a contingency factor to other budgets. 3. Adjust the criteria used to define emergency conditions. 4. Strictly control project objectives from conceptual planning through project implementation.	Citywide	\$534
MC-CL- XF9072	Building Envelope Upgrades	Rationale: Proactively replacing waterproofing elements on building exteriors averts costly structural damage and prevents the growth of toxic mold inside wall cavities and ceiling spaces that can easily render a building uninhabitable. In extreme cases the building has to be completely demolished and rebuilt in order to eradicate mold. Performing emergency repairs during storm season is extremely expensive if it can be done at all. Emergency repairs also disrupt utility operations, typically at the most inopportune time. Alternative(s): 1. Fund program 9072. 2. Don't fund program 9072 and reduce building condition expectations. 3. Bundle a range of building envelope replacements into large ad hoc programs in the future when maintenance costs become prohibitive. 4. Incorporate roofing and weatherizing from a larger, more generalized fund that addresses the needs of all building systems together. 5. Increase the operations and maintenance budget and attempt to extend systems beyond their designed lifetime.	500 Newhalem Creek Rd, Marblemount, WA 98267	\$1,665

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF9101	Equipment Fleet Replacement	<p>Rationale: As mobile equipment ages, it reaches a point where it becomes more economical to replace the equipment than to continue to repair it. In the past, the mobile equipment fleet coordinator used a twenty year replacement plan to maintain City Light's vehicle pool. Due to replacement deferrals starting in the mid 90's and the budget cuts which began in 2000, that replacement plan by necessity was revised. We are now faced with replacing fleet on an as needed basis. That priority is to replace the most often used, specialized, or critical equipment to the Utility, or the most costly to maintain and least reliable vehicles first. To get back to an established plan will require seven plus years of enhanced financing. A seven year recovery plan requires \$10 million annually. That plan has been underfunded for 15 years. The planned annual purchases, per the twenty year plan for the heavy fleet equates to approximately \$8 million per year. That \$10 million replaces the equipment that normally needs to be replaced every year and addresses some of the equipment that has been deferred. The proposed \$10 million will not fully cover inflation and the increasing cost of materials as many purchases now have a steel surcharge added. There are also added emissions requirements for the coming years starting in 2007. This will require about \$10,000 per diesel engine along with design changes to accommodate space for higher heat and larger exhaust pipes. The Memorandum of Understanding between the Fleet Management Department (FMD) and Seattle City Light (SCL) regarding financing and management of the City Light Fleet states on June 22, 1998, the City Council adopted Resolution 29771. In that resolution is reference to Timely Replacement of Vehicles. The recommendation is to replace vehicles in a timely manner, when fully depreciated.</p> <p>Alternative(s): The recommended alternative is to address the backlog of City Light vehicles, heavy and light fleet, on a plan spread over 7 or more years (a \$30 million backlog currently on a \$130 million fleet) A second plan would be to not purchase fleet vehicles. This option would result in paying both higher maintenance costs for worn out vehicles and higher rental costs both for specialized vehicles and daily use vehicles currently at \$2 million annually. It also has safety ramifications when considering malfunctions and inopportune breakdowns. A third plan would be to continue to not address the back log but replace on an as needed basis. This plan requires more rental costs and time loss due to equipment down time. It also does not address the need to be more fuel efficient and environmentally friendly. This plan to replace only as needed would be less</p>	System wide	\$6,121
------------------	-----------------------------------	--	-------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF9103	Office Furniture and Equipment Purchase	reliable for tracking or budgeting. Address the back log through a sevenh year or longer plan. Rationale: Workplace and process improvements completed under program 9159, plus ongoing organizational change, require the purchase of office furniture and equipment in order to achieve the project objectives. Each year Utility Support Services completes approximately 450 service requests requiring furniture reconfiguration, at least a third of which involve ergonomic corrections. Alternative(s): 1. Fund program 9103. 2. Don't fund program 9103 and purchase all office furnishings and equipment from the O&M budget. 3. Maintain office furniture until it can no longer be sustained in acceptable condition and then replace in total with a future ad hoc program.	System wide	\$465
MC-CL- XF9107	North and South Service Center Improvement s	Rationale: The purpose of the proposed subprojects, SSC locker room remodeling, NSC building on the main site, and the SSC yard study, is to improve each facility in support of the assigned staff/crews. Results include improved efficiency and reduced maintenance. Planning in the employee parking lot is necessary since an off-ramp will be constructed over a portion of the lot. The SSC yard study subproject includes planning for the revisions needed when the off ramp is built from the Spokane Street Viaduct to 4th Avenue South. The off ramp is to be placed over the employee parking lot. Alternative(s): 1. Continue the improvements as proposed. 2. Defer improvements. 3. Replace the service centers with state-of-the-art facilities. 4. Do no improvements until the service center is unusable and then replace the asset.	Outside City of Seattle	\$1,560
MC-CL- XF9134	Seismic Mitigation	Rationale: Several seismic surveys of City Light facilities have been done in past years. Some of the deficiencies were corrected; usually as part of a major construction program, however many of the deficiencies remain. Our structural engineering unit has an unscheduled plan to review prior surveys and release a prioritized corrective action plan. Plan implementation funding will be considered at the next budget cycle, or earlier, by special appropriation. Alternative(s): 1. Budget for emergent projects is recommended until the above action plan is in place. 2. Take no corrective action. 3. Contract for a comprehensive seismic study. Include cost estimates and a firm schedule requirement in the study results. Initiate a program of projects to make corrections.	Outside City of Seattle	\$1,364

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF9151	Facilities Regulatory Compliance	Rationale: Before City Light property is sold the area must be evaluated for any contamination. This project allows each property to be thoroughly investigated for contamination. Alternative(s): The alternative is to pass on contaminated properties to new owners and therefore incur long standing environmental liability.	500 Newhalem Creek Rd, Marblemoun t, WA 98267	\$340
MC-CL- XF9152	Environment al Safeguarding and Remediation of Facilities	Rationale: Statutory fines for mishandling or releasing hazardous and dangerous materials can reach tens of thousands of dollars per day and civil liability claims for damages stemming from a release or spill can reach into the millions. More important is City Light's position, as a responsible member of the community, to safeguard the environment. Alternative(s): 1. Fund Program 9152. 2. Don't fund Program 9152 and address environmental issues as directed by environmental agencies using O&M funds. 3. Incorporate money in other capital projects to address environmental issues. 4. Shift risk by outsourcing or by purchasing environmental insurance.	Outside City of Seattle	\$190
MC-CL- XF9159	Workplace and Process Improvement	Rationale: This program defines a separate workplace improvement element devoted specifically to integrate people and processes within the built environment as opposed to the long term strategic asset management focus of other facilities programs. Projects proposed under this program are justified based on an asset life cycle that is typically shorter than that used for replacement or improvement of building elements serving multiple and varied work groups and processes. Implement properly authorized process improvement projects within one month of the agreed upon completion date. Alternative(s): 1. Fund Program 9159. 2. Eliminate Program 9159 and expense business function support projects. 3. Force individual business units to budget for their own improvements and institute a charge back system to bill them for materials and outsourced labor.	System wide	\$1,050
MC-CL- XF9161	Substation Comprehensi ve Improvement s	Rationale: 1. Reduce the risk to communications equipment and power network controls in order to sustain City Light's historically high system reliability. 2. Reduce workplace complaints among substation staff so that City Light maintains its harmonious relationship with electrical workers. Alternative(s): 1. Fund Program 9161. 2. Eliminate Program 9161 and make limited scope improvements in reaction to critical situations. 3. Eliminate Program 9161 and fund substation improvements out of other programs. 4. Make no improvements and finance increasing risk through insurance. 5. Eliminate Program 9161 and complete substation improvements as an O&M expense.	System wide	\$295

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XF9235	Denny Substation Tenant Improvements	Rationale: The Seattle Design Commission operating under the guidelines set forth by the Urban Design Merit program unanimously approved the construction of the Denny Substation Project with the condition that the two shell spaces be developed as neighborhood enhancements. As stipulated by the Design Commission, the spaces shall be funded by the Capital Improvement Program, be fully programmed as part of the Denny Substation project and address any mitigation associated with vacating Pontius street. Alternative(s): Alternatives to not moving forward with this project would impact the overall Denny Substation Project - as it would impact the ability to vacate Pontius Street - which is critical to developing the planned Denny Substation for efficient layout of the yard and substation equipment. Options for the community center and the learning center are being explored through best value and benefit to the community and neighborhood, and City Light customers.	Valley Street	\$12
MC-CL- XF9320	Energy Conservation	Rationale: Energy reduction is a Department and City goal. SCL Conservation Unit's energy audits of our facilities will identify a program of projects to accomplish these goals. With documented savings, there will be recovery of some of the costs from BPA. Alternative(s): Do nothing. Continue to consume energy at existing levels.	System wide	\$286
MC-CL- XP6102	Special Work Equipment - Generation Plant	Rationale: Special equipment needs and new tooling frequently arise on an unpredictable basis. Technology obsolescence and evolution, which are not easily predicted, also play a part in replacement. This project provides some financial coverage for meeting these needs on a first-come, first serve basis. Without this authority, funding for special tooling and equipment would not be readily available and could take months to acquire. This category of acquisition often provides rapid payoff in terms of the efficiency of work execution. Alternative(s): The only alternative is to find some other way to fund special equipment needs that arise. For capital projects, this usually involves emergency appropriations involving the passage of special City ordinances. The time required for special appropriations could be prohibitively long when needs can not always be predicted or arise sometimes from an emergency nature.	Outside City of Seattle	\$922

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-XP6530	Hydro Project Spill Containment	Rationale: The project will implement upgrades that will either prevent spills, from oils, greases, fuels and other petroleum products, through process improvements and equipment replacement, or provide additional containment capacity for accidental spills. Options for reducing spills include replacing oil filled transformers with dry type transformers, building larger containment basins around oil filled equipment, reconfiguring powerhouse sumps to separate potentially oily water from non-oily water, installing oil/water separators on transformer and generator cooling water systems, and replacing greased valve bushings with greaseless bushings. Because each powerhouse is unique, different solutions will be designed and implemented at each facility. Alternative(s): No Alternatives Provided.	Outside City of Seattle	\$180
MC-CL-XP6990	Endangered Species Act Mitigation	Rationale: This project protects and restores fisheries habitat in the Skagit and Tolt basins by implementing the Endangered Species Program for recovery of listed fish species that are potentially affected by City Light projects. The project scope includes land purchase, restoration, assessment, and management. The ESA prohibits harming listed species and their habitat. SCL's facilities impact these species since the dams have changed the downstream hydrology, affecting the rearing and spawning habitat for Chinook, and rearing habitat for bull trout and steelhead. When SCL lowers the flow to reduce generation (load following), thousands of chinook juveniles may be adversely affected. In addition, the Skagit Project separates the bull trout population into four distinct populations. Concerns have also been expressed about interference with access to spawning areas resulting from lower reservoir levels and the potential of entraining bull trout. Since SCL's licenses for the Skagit and Tolt were issued prior to the listing, they provide no protection for third party lawsuits under ESA. We have no "take" permit. SCL licenses can also be reopened by Federal agencies, e.g. the U.S. Fish and Wildlife Service, seeking additional measures to protect and restore the listed species. Alternative(s): 1. Complete the projects envisaged by the City Council and incorporated into the Recovery Plans for each basin and work to obtain legal protection. 2. Complete projects as budgeted, extending the timeframe. 3. Terminate the project at current expenditure levels. This would result in failure to carry out a Council and Executive mandate and increase the Department's liability under the ESA. We would not be able to obtain legal protection.	Outside City of Seattle	\$1,134

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XS6373	Ross Dam - AC/DC Distribution System Upgrade	Rationale: The operation of critical components of the dam, such as gates, valves, and lighting, depend on the power distribution system. The electrical system is 50 years old and has been in service beyond its normal life expectancy. Extra space for breakers is not available, cable insulation is starting to strip, and the existing gear is not approved for lockout/tagout requirements. Presently there is a risk of losing power to the dam spillgates. New conduit and conductors will improve reliability of spillgate operations and other dam operations requiring electric power. New electrical equipment, new lighting, and the addition of emergency lighting will allow staff greater operational flexibility, safety, and efficiency. Alternative(s): Doing nothing will result in eventual loss of control of motors and valves used for water spill control and could cause the dam to be overtopped. Maintaining power to operational components on the dam (for instance the spillgate) is needed to ensure the operation of Ross, which provides an average of 100 megawatts.	Milepost 128 State Highway 20	\$1,898
MC-CL- XS6405	Skagit Facility - Minor Improvement s Program	Rationale: Emergent capital projects are, by definition, unpredictable. This project provides some financial coverage for such projects on a first-come, first serve basis. Without this authority, funding for emergency work would not be readily available, and could take months to acquire. Setting up and monitoring separate capital projects entails considerable administrative costs which may unreasonably increase the cost of small projects, even when identified in advance. Covering such projects under the emergent project program allows for accountability and tracking at the subproject level, with minimal overhead costs. A recent example is Emergency Generators for the Wastewater Treatment Plants. Project Weighted Rating-40.8, Primary Rationale-Varies Alternative(s): The only alternative for emergent projects is to find some other way to fund emergency needs that arise. Usually, for capital projects, this involves emergency appropriations involving the passage of special City ordinances, among other things. The time required to cut through the red tape of special appropriations could be prohibitively long, given that the needs that arise are either of an emergency nature or cannot be predicted. The only alternative for planned small capital projects is to secure separate budgeting for each one by putting each small project into the same administrative league as multi-million dollar projects.	500 Newhalem Creek Rd, Marblemoun t, WA 98267	\$2,176
MC-CL- XS6479	Newhalem - Generator 20/Support Facility Rebuild	Rationale: No Rationale Provided. Alternative(s): 1. Repair facility for future generation. 2. Remove facility and return river to previous condition. 3. Move or rebuild facility to take advantage of additional head. 4. Do nothing.	500 Newhalem Creek Rd, Marblemoun t, WA 98267	\$378

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XS6483	Diablo Facility - Lines Protection Upgrades	Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.	Milepost 126 State Highway 20	\$78
MC-CL- XS6515	Skagit Facility Conservation	Rationale: No Rationale Provided. Alternative(s): 1. Do nothing. 2. Perform work as detailed.	Newhalem Creek Rd, Marblemoun t WA 98267	\$259
MC-CL- XS6520	Skagit Facilities Plan	Rationale: The Skagit FERC Licensing agreement requires SCL to meet Section 106 of the National Historic Preservation Act of 1966, to take into account the effects of SCL's undertakings on historic properties. Additionally, the Skagit Licensing Agreement requires SCL to implement a historic resource mitigation and management plan demonstrating proper management of these resources. The Skagit Facilities Plan is SCL's commitment to meeting this licensing agreement requirement and results in better management of the overall resources and better operations and maintenance of the overall assets. Alternative(s): See the separate Skagit Facilities Plan that addresses alternatives. The alternatives include doing nothing, which does not conform to the FERC licensing requirements, and compromises our facilities as an asset to our power production operations and our civic and cultural stewardship responsibilities. The alternative to increase O&M resources (labor and budgets) is another option. This option improves facilities that are not required to meet program needs (improvements to vacant buildings).	Newhalem Creek Rd, Marblemoun t, WA 98267	\$526
MC-CL- XS6540	Skagit - Boat Facility Improvement s	Rationale: Design and construct several new structures to support industrial and recreational boat operations on our Skagit reservoirs. Structures to include a new tour dock, new dry dock, additions to the existing boat houses and a new barge landing in Diablo. Alternative(s): No Alternatives Provided.	Newhalem Creek Rd, Marblemoun t, WA 98267	\$899
MC-CL- XS6562	Ross - Governors	Rationale: The project will be best coordinated with the Bank 44 and 42 replacement projects in order to take advantage of the same outage. Alternative(s): No Alternatives Provided.	Ross Powehouse	\$350

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XS6581	Gorge - 240V AC Station Service Switchgear Replacement	Rationale: Recent changes in regulations and City Light policies related to electrical "arc flash" hazards have changed how operators and electrical constructors approach operation and maintenance of some high and low voltage electrical devices. Power Production electrical engineering has identified high voltage equipment inside Gorge Switchyard that is difficult to operate in compliance with these new rules. This project installs replacement equipment that can be remotely operated improving safety and efficiency. Alternative(s): A no action alternative was dismissed as it would jeopardize worker safety.	Milepost 121 Stte Highway 20	\$137
------------------	--	---	------------------------------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- XS6610	Diablo Dam - Spill Gate Trunnion Upgrades	<p>Rationale: FERC requires the floodgates on the dams be demonstrated regularly. Gates 2, 3, 14 and 15 at Diablo Dam were tested per FERC requirements in July 2013. Gate 2 trunnion had the highest friction of those tested. Along with the high numeric values there was mechanical noise from the trunnion when the gate was operated. Gate 2 was LOTO'd, and in 2014 the trunnion was disassembled, inspected and found to be deteriorated. The trunnion pins were cleaned of corrosion, the bronze bushing was replaced with like-kind new materials, and the unit was reassembled and tested successfully. After repairs to gate 2, Mechanical Engineering studied why gate 2 failed, establishing requirements for testing the other gates, and identifying a repair method. During this program, it was identified that: ? all the other gates (being of similar design) were at risk of failing by this method, ? the other gates tested at the same time were better than gate 2, but none met the standard of a coefficient of friction of 0.3 or less, ? replacement with like-kind materials offered only a renewal of the time. Maintenance inputs would remain the same (annual lubrication of 20 gates at approx. 3 hr/gate for a two-person crew) ? replacement with a permanent sealed bushing was the preferred method of rehabilitation. The project will rehabilitate all Tainter gate arms' trunnion bushings with new synthetic bushings that are permanently sealed and lubricated. Alternative(s): Do nothing and the Trunnions could seize up, causing a failure of the gate in the open position. This is considered a Dam Failure by FERC standards, and would be extremely costly to ratepayers. Replace with like-kind materials was performed for Gate 2. However there is no significant savings in labor to replace with like-kind (bronze), vs permanently lubricated, sealed, synthetic bushings. Materials savings only with this option, and maintenance continues as in the past which amounts to 2 persons @ 3 hrs/ea per gate, so for 20 gates about 120 person-hours for annual maintenance. Over the expected 75 year life, this amounts to a total of 9,000 hours @\$100/hr (total loaded rate) this amounts to \$900,000 in maintenance in 2014 dollars. Replace with new permanently sealed and lubricated synthetic bushings, labor is the same as for like-kind option, but materials are significantly more expensive than replacement with bronze bushings. However SCL can then avoid the maintenance cost of 120 person-hours annually and the \$900k in 2014 dollars for maintenance over the life of the improvement. The increased material cost for the new bushing type is \$2,660 per gate. That amounts to an upcharge of 53,200 for all 20 gates. As noted previously there is no labor difference between replace in kind vs these new bushings. The labor</p>	Milepost 126 Stte Highway 20	\$563
------------------	--	--	------------------------------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

		savings in maintenance alone pays for the new bushing type.		
MC-CL-XS6986	Skagit - Relicensing	Rationale: Procurement of a new license for the Skagit River Hydroelectric Project from the Federal Energy Regulatory Commission (FERC) is required to continue operations. Alternative(s): No Alternatives Provided.	Newhalem Creek Rd, Marblemount, WA 98267	\$13,858
MC-CL-XS6991	Skagit Licensing Mitigation	Rationale: As part of the relicensing of the Skagit River Hydroelectric Project, City Light is required to provide mitigation for 30 years of continued project operation between 1995 and 2024. The license incorporates the Wildlife Settlement Agreement signed in 1991 by the City of Seattle and numerous interveners (Federal and State agencies, tribes, and environmental groups). This stipulates that the City shall make available a total of \$17,000,000 (in 1990\$) to secure and preserve valuable wildlife habitat. The charges to this CIP project will be credited towards the \$17,000,000 total. Alternative(s): 1. Perform work as scheduled in the Settlement Agreements and required by the license. This is the preferred approach to meeting our license obligations. 2. Delay implementation. This increases our liability since the bridge is falling down and poses a safety hazard which will only increase in future years. 3. Do not undertake some mitigation. This would have severe repercussions as the agencies and tribes are carefully monitoring our progress and participating as partners on many projects. They would likely contest our license should we not fulfill our commitments.	500 Newhalem Creek Rd	\$86

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9009	Communicati ons Improvement s	Rationale: Project 9009 provides the necessary flexibility to address emergent communication system problems that arise between biennial budget requests. These tend to be smaller projects costing less than \$10K per incident. During any given year there are a variety of requests requiring immediate attention. In addition, this program includes small specific improvement projects that are too small to warrant uniquely assigned project numbers. Each of these small projects has a separate scope of work, schedule, budget, and tracking mechanisms. An example is the project to monitor tower movement on our transmission towers near Oso, WA. Alternative(s): Option 1: Respond to customer requests for emergent and critical work in a timely manner. This approach preserves operational reliability, safety and security. This project provides flexibility to respond to these unknown communications problems or requirements. The alternative to having PE 9009 is to make special requests to the City Council for budget appropriations when emergencies occur. This is time consuming and limits the department's flexibility to react to emergent communications problems. Option 2: Fund the project at a reduced level and incur the risk that emergent trouble cannot be met and worker safety, security and system reliability is compromised.	System wide	\$772
------------------	--	---	-------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9102	Special Work Equipment - Other Plant	<p>Rationale: This project is a roll up of requests from individual work units in the Electrical Services Branch and other units in the department except for Generation Division (see CIP 6102) and Power Stations (see CIP 7902). All tools and work equipment over \$5,000 dollars must be capitalized. The purpose of this project is to collect these requests into a project to allow better tracking and review of the expenditures throughout the year. Requests have been reviewed and prioritized during the 2003-04 budget cycle and purchases deferred. The proper funding of tools for high voltage electrical and related work supports the department's goals of safety, productivity and employee morale. Alternative(s): 1. See description. 2. Do nothing. Do not allow units to purchase new tools or equipment valued at over \$5,000. This alternative is not acceptable as the department would be unable to meet the needs and expectations of our customers. 3. Prioritize and review the individual units' requests and adjust CIP to budgeted targets. This would be a new way to budget for this CIP. Individual units may need to defer equipment purchases and in some cases work may be deferred. Risks include the possibility that unplanned equipment failures in deferred equipment will delay work completion. Option 3 has been selected and only the highest priorities for equipment have been funded. This project is being funded at approximately one third the level that historically has been required.</p>	System wide	\$794
------------------	--	---	-------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9108	Transmission & Generation Radio Systems	Rationale: This project builds or replaces communications infrastructure consisting of fiber optic rings, digital microwave, telephone networks and two-way radio systems. This project provides City Light with command and control capabilities for the operation of the electrical system. This project ensures the safe, reliable and efficient operation of the system and positions SCL to meet the Federal Energy Regulatory Commission's vital communications systems requirements. Alternative(s): Option 1 Proceed as proposed. Option 2 Do nothing and continue to have systems that are incompatible with each other, require a high degree of maintenance, at greater cost, and in some cases, rely on commercial carriers for service and system protection; and/or face the loss of capability, capacity, coverage, licenses, and electrical system reliability. This alternative maintains the inadequate data exchange between sites, switches, feeders, meters, and communications systems and networks. Option 3 Install digital microwave instead of fiber systems at all substations and facilities. This is not cost effective, very difficult to locate land or space, design the system, acquire the land or space, provide power and get permits for adequate sites. Future upgrades are very difficult and expensive, and increases maintenance costs.	System wide	\$658
------------------	--	--	-------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9202	Security Improvement s	<p>Rationale: If Seattle City Light's Security Improvements Program is underfunded, its critical facilities face increased risk to sabotage, vandalism, theft, and terrorism that can result in the loss of valuable infrastructure for generation and distribution of power, as well as noncompliance with North American Reliability Council (NERC) 1200 Standards, adopted May 2, 2006, to improve security at critical facilities that house command and control systems. Curtailment of Seattle City Light's electric operations would impact reliability of the power system in the Pacific Northwest, create lost revenues, and jeopardize public safety and emergency response due to loss of lifeline services such as medical services, water and wastewater systems, communications, law enforcement, banking, transportation system, etc. Alternative(s): Option 1, Status Quo: No centralized security system. Operate local security systems in place and use local law enforcement and private security companies to address security on a limited basis. Use private security services and/or request additional assistance from local law enforcement during times when the Federal government has raised the alert level for the nation or region, or for a situation that has occurred requiring additional security services. Option 2, Centralized Security System: Seattle City Light installs security enhancements to delay, detect, and respond to security intrusions at its critical facilities that are connected to a central security monitoring center that will be staffed by trained security guards on a 24/7 basis to monitor and respond to security incidents. Department wide response procedures will be established and coordination with local law enforcement will be established for responding to security incidents.</p>	System wide	\$2,211
------------------	------------------------------	---	-------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9307	Distribution Area Communications Networks	Rationale: The communication systems now employed are in need increased capacity, better security, faster speeds, and increased reliability to meet new regulatory requirements. This will meet our ever increasing data and voice communication needs and take us twenty years or more into the future. Maintenance costs are lower because increased redundancy and reliability as well as better system alarms and the capability to remotely troubleshoot and reprogram the system. Traffic on the network is easily rerouted until major failures can be repaired. The new requirements of security, relaying, Automated Meter Reading, Automated Distribution and other automated systems will be easier to implement at lower cost once this project is completed. The system is easily upgraded to increase capacity or take advantage of new technology as it becomes available. Alternative(s): Option 1 Proceed as proposed. Install/complete fiber optic rings. Option 2 Do nothing. Have an inadequate communications network, with a high expense O&M component.	Citywide	\$2,258
------------------	--	--	----------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YD9957	Enterprise Geographic Information System	<p>Rationale: MOVED FROM DESCRIPTION, 7/10/2013, WYKPIISJ UPDATED AS OF 4/13/2012, HIBNESM: The Enterprise GIS Initiative will support the Seattle City Light 2013-2018 Strategic Plan in these objectives: 1. Improve customer experience and rate predictability. 2. Increase workforce performance and safety practices. 3. Enhance organizational performance. 4. Continue conservation and environmental stewardship. Replacing our multiple, incompatible GIS systems with a single enterprise level GIS will eliminate redundant data entry into GIS and other systems, increase data quality and put information into the hands of the people who need it, when they need it, including engineering, operations, asset management and environmental affairs. An enterprise GIS will improve field worker safety and reduce the occurrence of expensive project changes in the field resulting from inaccurate or incomplete information. It will also streamline software maintenance and support requirements and ease integration to other future utility systems requiring access to GIS data. This new system will provide: 1. A centralized geospatial data store improving data access and interoperability to support other enterprise systems such as Outage Management (OMS), Work and Asset Management (WAMS), Mobile Workforce, System Planning/Analysis, Automated Utility Engineering Design (AUD), Advanced Metering Infrastructure (AMI) and Business Intelligence (BI). 2. Electronic and web based access to distribution, transmission, streetlight, joint use and fiber optics/communications infrastructure information. 3. A flexible, configurable system that can accommodate evolving business information needs. The additional transmission, streetlight, joint use and fiber optics information that the utility needs to maintain as we move to an asset centric maintenance and planning model essentially doubles the size of the GIS dataset. The number of staff supporting GIS needs has seen an overall reduction in the last decade. Alternative(s): This business case and proposal presents 3 options for dealing with the problem: A. Do Nothing B. Replace the current DAMS editor and convert TLM Services C. Install a new unified GIS system A. Do nothing. Do not fund the work. Continue to leave our Radial Distribution System's GIS data at risk, and by extension, baseline OMS functionalities. Apply additional resources to manually maintain systems using current tools. Write and support multiple custom interfaces and procedures to provide base line GIS data required by OMS & WAMS. Do not take advantage of new business processes and functionality of automation between GIS, OMS and WAM. B. Replace the current DAMS editor and convert TLM</p>	System wide	\$126
------------------	---	--	-------------	-------

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

Services. The current DAMS editor was originally implemented in 1994 as a suite of custom applications using Environmental Systems Research Institute (ESRI) Arc/INFO GIS products. DAMS tools are so obsolete that SCL is no longer backward compatible with our City partners in the Common Geographic Data Base (CGDB). To begin addressing these issues, the existing DAMS editor needs to be replaced. This project would incorporate into the DAMS GIS the final piece of connectivity data, between the customer meter and the transformer that is currently stored in the separate Transformer Load Management (TLM) database. This work will position City Light to begin working toward a unified GIS and to better leverage our GIS investment through new and improved integration to other major IT systems. Examples might include: 1. The ability to replace obsolete engineering analysis and planning systems, such as TLM and NLM/Loadflow, with modern GIS based applications. 2. The ability to more robustly model the underground portions of our Radial distribution system. 3. The ability to move closer to a unified GIS, including both our Radial and Network distribution systems in a single GIS data store, at City Light. C. Install a new unified GIS system. This option would install a new unified

MC-CL-YD9967	Outage Management System Phase II Implementation	Rationale: See attachments Alternative(s): See attachments	Citywide	\$1,100
MC-CL-YD9969	Enterprise Software Solution Replacement Strategy	Rationale: This project is an ongoing commitment to provide a sustainable funding stream to keep enterprise level resources up to date and fully functional. Software systems today are as critical to operate City Lights business as poles and wires. The Utility can no longer afford to delay regular required upgrades and or replacements to the system. Alternative(s): City Light could decide not to upgrade the systems, as prescribed, but that could create a significant risk if the system goes unsupported by the vendor or if something were to happen with the software. Operations and Maintenance costs could rise significantly while attempting to maintain the software on our own.	City Wide	\$10,222

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8129	Network Hazeltine Upgrade	<p>Rationale: Using the Network Hazeltine system provides reliable power by remotely monitoring the electrical vaults and electrical equipment within the entire downtown service area. The Power Dispatchers constantly monitor the real time status of the network using the Hazeltine system. This program costs \$304K per year and avoids problems that can easily exceed twice that amount for Seattle City Light and its customers. The utility's cost for one such problem can range from \$200K up to as much as \$3M. Aggregated customer costs can range from \$100K up to \$5M. The benefit cost ratio for any one problem can range from 0.99 $(\\$200k + \\$100k) / \\$304k$ to be as high as 26.3 $(\\$3M + \\$5M) / \\$304k$. We usually avoid 4 to 5 smaller problems each year and a larger problem, with combined costs of \$1.53M, every 5 years. The yearly benefit cost is then $[4 * 0.99 + 1.53M / (304k * 5)] = 5.0$. Alternative(s): 1. Do nothing. Do not change existing Hazeltine system. Hazeltine has changed the production of their transmitters, forcing utilities to pay a premium for the transformers that is a fraction of the cost of upgrading to their Next Generation equipment. 2. Upgrade to Hazeltine's Next Generation system, changing station receivers and transmitters on each transformer. Total cost is about \$2.2 million. 3. Develop SCL proprietary network EMS system, capable of monitoring plus a new function of control of NP's, BTS's, and primary switches if they are added. Total cost ranges from \$7 million to \$17 million, depending on communications option selected. This excludes developmental costs. 4. Buy any upgrades from vendors only. Wait for Hazeltine or other vendors, to develop network EMS systems with the desired control and monitoring features. No products or competitors to Hazeltine are available at this time for cost estimates. 5. Add sensors to existing or future Hazeltine system to enhance the monitoring of the network environment. This would enable system operators to detect and respond to abnormal field condition and thereby improve customer reliability. 6. Continue existing program of upgrading the sensors to match the current SCL standard. In 2007 and 2008, review the Hazeltine program and determine if more significant upgrades are feasible. Presently, this is the recommended action and funding level for 2007 and 2008. The 2009 and beyond dollars are expected expenditures for the significant Hazeltine upgrades, if approved.</p>	System wide	\$531

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8130	Network Maintenance Hole and Vault Rebuild	<p>Rationale: The Network Maintenance Hole (MH) & Vault Rebuild project provides reliable electric service by repairing or replacing damaged electrical maintenance holes/vaults and ducts located within the network. This project also reduces unsafe working conditions for our workers and potential hazards to the public. In the 1990s, licensed engineering consultants conducted a series of structural surveys on approximately 1,200 underground maintenance holes and vaults. Based on the survey, 38 MH/vaults have been repaired or replaced at a cost of \$14.1Million. Subsequent additional surveys have been done. Our prioritized list of facilities requiring major repairs or replacements includes replacing 78 MH/vaults and 350 vault roofs. The vaults that we are replacing for the 2007-2008 period have exceeded their expected lifetime. These are among the oldest facilities and include brick structures in Pioneer Square that are approximately 100 years old. Replacing now provides an opportunity to construct a route for bringing main stem feeder service cables through the Pioneer Square area and to a significant portion of the Downtown core area (City Hall, Justice Center, Seattle Municipal Tower) rather than using the Alaskan Way Viaduct structure. By repairing or replacing six manholes/vaults, rebuilding at least 10 vault/manhole roofs and 2,800 feet of old clay tile duct banks. Surveys performed by licensed civil engineering consultants have identified 78 maintenance holes/vaults requiring replacement as well as roofs for an additional 350 underground right-of-way facilities. Alternative(s):</p> <p>Alternative 1 - No Action: Vaults and maintenance holes with failing structures and grates would be left in place until catastrophic failure. Problems associated with deferring repair work include reduced worker and public safety, increased City liability, increased City paving expense, negative impacts on traffic flow through downtown when repairs are not coordinated with SDOT's paving operations, and loss of use of City Light facilities for customer service needs. The no action alternative is never an option as too many facilities are in states of failure that require at least temporary shoring and loss of use, and many require immediate repair. Alternative 2: Perform temporary fixes to the highest risk facilities until permanent repairs are made at some unspecified future date. Without a specific project to repair vaults and maintenance holes, temporary shoring systems installed in failed facilities has the following challenges: a) Electric crews cannot perform electric work in the failed facility with shoring left in place, effectively resulting in loss of use of the facility. b) Placement and removal of temporary shoring reduces productivity of field</p>	System wide	\$2,536
------------------	---	---	-------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

personnel. c) Wood shoring rots from continuous exposure to moisture has limited life in wet network environments. d) Temporary fixes using steel beams can be applied in facilities with few cables or obstructions from temporary supports. Such repairs require costly custom designs from Civil Engineers and could be applied only where manhole access is not needed for several years. Alternative 3 (Preferred): Make permanent repairs to those facilities in need and continually monitor condition of civil facilities. Work would be prioritized to those facilities in highest need of repair, those associated with new customer load additions and those affected by public right of way projects, such as street paving. Benefits of this approach are improved worker and public safety, reduced City liability, improved tr

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8201	Union Street Substation Networks	<p>Rationale: The Union Street Substation Networks project provides sufficient and reliable electrical capacity for the growing power needs of our customers. It is a programmatic approach for comprehensive management of underground network assets (electrical and in some cases civil) serving customers in the area bounded by Yesler Street, Alaska Way, Pike Street, 6th Avenue, Union Street, the Freeway, University Street, 3rd Avenue and the Waterfront area from Denny to Yesler. The project goal is to increase the capacity of present Union Street Substation network feeder cables to their ultimate service build out limit (an overall increase of 128 MVA) as determined by Union Substations transformer capacity, with allowances for feeder imbalances, feeder diversity and diversity among sub-networks. We will re-conductor and re-route four targeted service feeders by the end of 2008 and perform associated work such as feeder balancing. This includes the work in support of finishing the main stem build out and to address capacity issues in the branch portion of the feeder service cables as needed in response to specific service requests, as well as analyses of branch cable congested areas. Work in 2007 and 2008 as well as successive years is necessary to be able to pick up loads that will likely be transferred from Broad Street sub-networks in 5 years. To meet the projected new loads on the Waterfront and at specific downtown core sites we need to complete re-conductoring and re-routing of four targeted service feeders by the end of 2008 and perform associated work such as feeder balancing that will be transferred from Broad Street, and may be transferred from Massachusetts Street; build and energize a new network substation at least six years before all Downtown network capacity is used so that service cutovers can be done with minimal impact to our customers. This work is essential to meet near term load requirements of the SAM/WaMu and Four Seasons projects. This critical project Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the reliability of the network system from its present level, subjecting it to more lengthy outages. 2. Reduce customer demand for more load with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders incrementally, as little</p>	1312 Western AV	\$2,002
------------------	--	--	--------------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8202	Massachusetts Street Substation - Networks	<p>as possible and as close to near-term load requirements as possible. This is no longer feasible as the next increment of feeder capacity additions reach their final capacity targets. 4. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 5. Add measures that improve system reliability to mitigate the severity of any network event. 6. Add measures that improve customer reliability by preventing the chain of events leading to major customer impacts.</p> <p>Rationale: The rationale for this project is to increase the capacity and reliability of present Massachusetts Street Substation network feeder cables to their ultimate service build out limit (an overall increase of 69 MVA), as determined by Massachusetts Street Substation's transformer capacity, with allowance for feeder imbalances, feeder diversity and diversity among sub-networks. The Alaska Way Viaduct project will require the relocation of all 13kV distribution feeders that are suspended from the viaduct. These include feeders serving Pioneer Square and the downtown core. Additional duct banks and electrical vaults must be built throughout the Pioneer Square area to accommodate the feeder relocations. Doing the engineering for this relocation during 2007 will ensure that timely civil construction can be done in order to avoid many conflicts with other utilities and mitigate some of the traffic impacts that will occur during the Viaduct and Seawall construction. Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the customer reliability of the network systems from its present level, subjecting it to infrequent but lengthier outages. 2. Reduce customer demand for more load with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 4. Add measures that improve system reliability to mitigate the severity of any network event. 5. Add measures that improve customer reliability by preventing the chain of events leading to major customer impacts.</p>	1555 Utah Ave S	\$2,206
------------------	--	--	--------------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8203	Broad Street Substation - Network	<p>Rationale: Customer demand for higher loads continues. Capacity of the cables serving two sub-networks is near overload, requiring immediate attention to avoid cable failure and customer outages. In the next five years, customers are projected to exceed the capacity of cables in another five network subareas. This capital project addresses the means to serve customer demand for higher capacity. Reliability measures identified in the Network Strategic System Plan are incorporated into this capacity driven work. Without this critical project it is very likely that there will be insufficient reliable electrical capacity in the very near future to hook up new customers and to serve present customers such as the Westin building. hernanju (7/29/21010): The project goal increases capacity of present Broad Street Substation network feeder cables to their ultimate service build-out limit (an overall increase of just under 100 MVA) as determined by Broad Street Substation's transformer capacity. This project constructs ten vaults and ten blocks of duct banks, re-conductors and relocates three primary feeders per year, upgrades/optimizes network transformers as needed, reduces secondary bus ties (reduce the size of the secondary grid resulting in greater reliability), and performs ancillary work. Alternative(s): Alternatives include: 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without commensurate additions to capacity of feeders serving this area, ultimately leading to multiple cable failures and extended customer outages. This would reduce the customer reliability of the network systems from its present level, subjecting it to infrequent but lengthier outages. 2. Reduce customer demand for more loads with demand side management measures. This alternative was evaluated in the Network Strategic Systems Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders incrementally, as little as possible and as close to near-term load requirements as possible. 4. Increase capacity of network feeders to the full limit of the substations capability to deliver power. 5. Add measures that improve system reliability to mitigate the severity of any network event. 6. Add measures that improve customer reliability by preventing the chain of events leading to major customer impacts.</p>	319 6th AVE N	\$6,656

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8404	Denny Substation - Network	<p>Rationale: This project is a result of a four years of advocacy by customers to make sure that the electrical distribution system has sufficient capacity to meet the projected loads in the rapidly growing area of North Downtown, and that the system has the reliability and voltage stability to support the research activities of the emerging biotech industry there. The principal stakeholders are the Fred Hutchinson Cancer Research Center, the UW School of Medicine, the Seattle Biomedical Research Institute, Rosetta Inpharmatics, ZymoGenetics, Children's Hospital and Medical Center, and the startups at the Accelerator Project. This five to seven year infrastructure project is specifically tailored and designed to the core needs of this business sector in the North Downtown area. The research activities and the laboratory equipment are so sensitive to system reliability and voltage stability that this area requires an extraordinary level of service from the utility. The motto is "World class research requires world class facilities.". The utility through this project is a partner in that effort. Because existing City Light substations cannot accommodate the new network feeders, this project requires the construction of a new North Downtown substation in a three to five year period, proposed as project 7757, North Downtown Substation Development. This network project cannot exist without the new substation. Alternative(s): 1. Enhance the service using non-network feeders from other substations. 2. Have individual customers invest in private reliability improvements. 3. Install network system in core service area, including the biotech industries. 4. Install network system throughout North Downtown area. Option 1 is not feasible because the availability of feeders from adjacent substations is limited and in question over time. Option 2 has been tried recently, but did not meet the reliability needs of this set of customers. Option 3 is the recommended option, as it is effective in meeting the need and cost effective. Option 4 includes all customers in the area, which is not necessary and expensive.</p>	Valley Street	\$10,772
------------------	----------------------------------	--	---------------	----------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YN8464	University Substation - Network	<p>Rationale: This project increases electrical capacity and reliability for University Substation customers in response to increased customer demand. At present, capacity of the cables serving the University network is exceeded in several areas, requiring operation restrictions to avoid cable failure and customer outages. In the next few years, larger customer loads are expected to be added, exceeding the capacity of cables. Based on projected new loads within the University area (University of Washington, Sound Transit) the electrical capacity of the cables serving the sub network will be exceeded, requiring immediate action to avoid cable failures and long costly customer outages. Alternative(s): 1. Do nothing. Make no improvements to system reliability or additions to feeder capacity. This would allow customer load to continue growing without the department making commensurate additions to capacity of feeders serving this area. This would ultimately lead to multiple cable failures and extended customer outages. This would also leave the customer reliability of the network system at its present level, subject to infrequent but lengthy outages. 2. Reduce customer demand for more loads with demand side management measures. This alternative was evaluated in the Network Strategic System Plan and found to have negligible ability to reduce customer demand in the network area. 3. Increase capacity of network feeders incrementally, as little as possible and as close to near term load requirements as possible. 4. Increase capacity of network feeders to the full limit of the substation's capability to deliver power. 5. Add measures which improve system reliability to mitigate the severity of any network event. 6. Add measures which improve customer reliability by preventing the chain of events leading to major customer impacts.</p>	645 NW 45Th	\$363
MC-CL- YR8322	Dallas Ave. 26 kV Crossing	<p>Rationale: Boeing and the other industrial customers in this area have critical facilities (e.g., Boeing wind tunnels) that depend on reliable power. The additional feeders assure reliable power supply to Boeing's operations and local industrial plants and residences. The Boeing Company has lobbied our management and the City Council to ensure that this line is replaced. Alternative(s): The do nothing alternative would leave Boeing and others with reduced reliability and in violation of previous SCL commitment.</p>	Dallas Ave S	\$6

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YR8351	Overhead Equipment Replacements	<p>Rationale: Equipment that is aging, overloaded, or of an outdated design poses a risk to the reliability of the system and could lead to unplanned outages and additional restoration expenses. By replacing the oldest and failing parts of our system, and those parts that are not made anymore, and we have no spare parts. We will replace items such as rotten and damaged cross-arms, transformers, hardware, old lead cable, PCB transformers, etc. By doing so, the system will be more maintainable and customer outages will be fewer and not as long.</p> <p>Alternative(s): The do nothing alternative leaves the existing system in place. As the aging and outdated equipment fail they will cause unplanned outages. This necessitates the immediate, unplanned replacement of these facilities. This causes hardship for the customers that are impacted and increased expense for City Light, especially if overtime is required to get the customers re-energized.</p>	System wide	\$24,895
MC-CL-YR8353	Underground Equipment Replacements	<p>Rationale: Avoid unplanned outages or interruption of service due to equipment failure. Alternative(s): The do nothing alternative would allow the equipment to deteriorate beyond its useful life and result in increased outages to customers.</p>	System wide	\$20,666
MC-CL-YR8355	Overhead Customer Driven Capacity Additions	<p>Rationale: This project adds capacity to the distribution system to accommodate increased load from new services. Alternative(s): The do nothing alternative leaves the existing system in place. New loads added to the system will adversely impact system reliability and voltage stability. It may be necessary, if the load increase is significant, to deny new service connections if the feeder capacity is inadequate.</p>	System wide	\$2,826
MC-CL-YR8356	Overhead System Capacity Additions	<p>Rationale: This project adds capacity to the distribution system to maintain the reliability level for the existing customers on the system and accommodate the increased load from new services. Alternative(s): The do nothing alternative leaves the existing system in place. New loads added to the system will adversely impact system reliability and voltage stability. It may be necessary, if the load increase is significant, to deny new service connections if the feeder capacity is inadequate.</p>	System wide	\$3,570

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YR8358	Overhead 26kV Conversion	Rationale: The existing 4kV equipment has lasted beyond its useful life and is no longer supported by manufacturers. In some places, the 4kV system no longer has the capacity to carry the system loads we are now experiencing. The system also demands ever increasing O&M resources. Alternative(s): The do nothing alternative leaves the 4kV system in place. The capacity concerns will remain and grow worse as more loads are added to the system. Obtaining 4kV equipment will become increasingly difficult and O&M will increase as the system continues to age.	System wide	\$1,777
MC-CL-YR8360	Underground Customer Driven Capacity Additions	Rationale: This project adds capacity to the distribution system to accommodate increased load from new services. Alternative(s): The do nothing alternative leaves the existing system in place. New loads added to the system will adversely impact system reliability and voltage stability. It may be necessary, if the load increase is significant, to deny new service connections if the feeder capacity is inadequate.	System wide	\$4,231
MC-CL-YR8361	Underground System Capacity Additions	Rationale: This project adds capacity to the distribution system to maintain the reliability level for the existing customers and accommodate the increased load from new services. Alternative(s): The do nothing alternative leaves the existing system in place. New loads added to the system will adversely impact system reliability and voltage stability. It may be necessary, if the load increase is significant, to deny new service connections if the feeder capacity is inadequate.	System wide	\$2,685
MC-CL-YR8362	Underground 26kV Conversion	Rationale: This project increases capacity to deliver power to City Light customers, rebuilds and maintains the backbone of the system, saves energy by reducing transformer and line losses, improves quality and reliability of service to customers, and releases unit substation properties for better neighborhood uses. Alternative(s): The do nothing alternative leaves the 4kV system in place. The capacity concerns will remain and grow worse as more loads are added to the system. Obtaining 4kV equipment will become increasingly difficult and O&M will increase as the system continues to age. Operations and maintenance costs are not expected to change as a result of this project. The Capitol Hill Underground Ordinance area does not have capacity at 4 kV to serve the load growth in the area, thus requiring City Light to install vaults, ducts and underground at 26 kV.	System wide	\$3,046

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL- YR8425	Distribution Automation	<p>Rationale: The new distribution switching equipment is capable of intelligent controls. The integration of this equipment into the Seattle's distribution system will provide significant benefits and will set the stage for a Smart Distribution System that will become one of the main components of a Smart Grid. S&C Electric offers first generation switching equipment with compatible intelligence built in. Through this CIP, the Smart Distribution infrastructure can be designed, constructed, and operated until fully built out. With SMART GRID in place, operators of the distribution system can optimize the operation of our distribution system, reducing time for outage restoration and preventing some outages in the first place. A smart distribution system can also provide real time data of the system, maximizing the capability of the system, and may allow for deferment of capital expenditure. A fiber cable system that can support this operation has been partially constructed. This fiber ring project can continue and be expanded to provide adequate coverage for Smart Grid and other communication needs of Seattle City Light in the future. Fiber optics communication allows secure communications and meets NERC Cyber Security requirements. As the power system is changed or redesigned through usual needs to serve customers, automated switches can be installed in consonance with the integrated DA plan. Eventually the whole distribution system in Seattle Service Area would have a capability to become a Distribution Automation system. Alternative(s): 1. Business as Usual. Automatic switches will be installed as need arises. Power system switching will be done through manually operated switches. Outage restoration will depend on feeder patrols. 2. Expand pilot projects. Candidates are SODO, which is highly congested with power lines and serves the industrial customers, White Center & Burien areas, which have potential for growth, and south Duwamish commercial area. Include the South Lake Union area when the City decides to proceed with the development. Required? Yes. Distribution Automation needs to be a properly funded project. City Light will have a distribution system ready to deliver automation as part of a SMART GRID initiative.</p>	Citywide	\$2,507
------------------	----------------------------	--	----------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YR8452	Pole Attachments	<p>Rationale: City Light is legally and contractually obligated to make space available on its facilities to government and private entities for communication and other purposes. Customers wishing to utilize space on City Light facilities are required to pay in advance for any necessary work required to provide the necessary space and minimum clearances to the electrical equipment. This ensures that the attachments meet all applicable federal, state and local safety codes. Customers are not allowed to make any attachments until all make ready work, including tree trimming, has been completed and the system made safe for the communication worker. Speed to market in the communications industry is critical for them to maintain their competitive advantage. Customers pay in advance for City Light crews to complete this work on overtime, without interrupting the normal assignments of the crews. All construction charges are deposited into the Light Fund. New wireless facilities and pole attachments generate an additional \$100,000 in rental revenue annually. Currently \$3.3 million in annual rental revenue is being generated and will continue to increase as construction and make ready work is completed. All rental revenue is deposited into the Light Fund. The communications industry and associated technology are growing at an astounding rate. City Light has experienced a 375 percent increase in pole attachment applications since 2007. All trends indicate that this growth will increase by an average of 24 percent annually. This does not take into account major initiatives such as fiber to the home, Advanced Metering Infrastructure (AMI), or vast expansion of existing networks and Distributed Antenna Systems (DAS). Completing the construction for make ready work and wireless facilities will enable City Light to fulfill its legal and contractual obligations to our customers. Customers will be provided a small measure of rate relief through increased revenue streams from these additi</p> <p>Alternative(s): It is possible that some or all of this construction work could be outsourced to electrical utility construction companies. This alternative presents obstacles like logistics, compatible parts, quality control, and required electrical reviewers. These challenges negate any cost savings and sometimes take longer to construct.</p>	System wide	\$14,717
MC-CL-YR9974	PCB Tracking and Condition Assessment Project	<p>Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.</p>	System wide	\$300

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YS7121	Replace Breakers BPA Covington and Maple Valley Substations	Rationale: City Light's interconnection agreement with Bonneville Power makes City Light the owner of the breakers in the Maple Valley Yard. City Light is required by this agreement to make upgrades as required. The breakers are currently over capacity due to the addition of another 500 kV line into the area. Alternative(s): If SCL does not replace the breakers, they may be forced to do so through legal means due to a breach of contract.	Kent	\$11
MC-CL-YS7750	Substation Plant Improvements	Rationale: The Power Stations CIP Review Committee evaluates subprojects for this category based on cost benefit ratios and departmental policies. Proposed work includes seismic improvements to old buildings, refurbishment of concrete buildings, upgrades to potable water systems, and construction of storage facilities for materials and tools. Incidental work that Power Stations do to improve station security is also funded in this project. Alternative(s): The water system at the North Substation is old, deteriorating, and becoming unreliable for drinking and for fire protection. Allowing the present systems to deteriorate may endanger employees and further put the safety and reliability of key system resources at risk. Additional seismic improvements are planned at Broad Street substation. Refurbishment of concrete structures is planned at North Substation. Storage facilities for tools and safety protective ground cables are planned for Delridge and East Pine substations. There are several levels of alternatives for improving security at Seattle City Light's fourteen substations. They range from installing more effective perimeter fencing, to adding remote monitoring systems, to catch intruders.	System wide	\$1,046
MC-CL-YS7751	Substation Capacity Additions	Rationale: We plan to design the feeder get-aways to carry power from substations as needed. Alternative(s): The alternatives to making capacity additions to existing substations are: 1. Accepting limitations on service to customers. 2. Successfully promoting voluntary power demand reductions. 3. Meeting capacity demand increases by new substations and transmission lines.	System wide	\$2,203

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YS7752	Substation Equipment Improvements	Rationale: The project includes a regular program of critical electrical equipment replacements at the substations, because this equipment becomes less reliable as it ages. The 2005-2006 plans continue a program to provide supervisory control of breaker functions. This allows remote control and monitoring of substation equipment from the System Control Center, which allows the System Control Center to diagnose the seriousness of an equipment malfunction or switch equipment more quickly. This allows a faster response time to correct system instability or outages. Alternative(s): This project is where the utility funds work on equipment that the maintenance review process identifies as being more cost effective to replace or refurbish than to continue to maintain. A review team prioritizes replacements by their criticality rating. This is a figure provided by the System Control Center that identifies the components of Seattle's distribution infrastructure that are especially important to the system as a whole. For example, an equipment failure at Broad Street Substation may cause more of a problem than one at Canal Substation because it is not as easy to switch loads into the network grid.	System wide	\$6,426
MC-CL-YS7753	Relaying Improvements	Rationale: Relays are protective devices that guard system components when electrical equipment fails. When a relay senses a problem with a major piece of equipment, it opens the circuit flowing to that component and isolates it from the rest of the electrical system. This protects the rest of the distribution system from potentially cascading effects if one part fails to operate properly. Recent technological advances in relay and protection equipment and software allow remote control and documentation of system events. The work plan includes installing digital fault recorder (DFR) equipment and software at the substations. City Light is changing electro-mechanical relay components to electronic, programmable devices. This will make it easier to detect and manage equipment problems. Alternative(s): Almost every change out of high voltage substation equipment requires that its relay and metering be reset and modified. Not continuing to have a significant relay improvement program would keep us using old technology that is not maintained by its manufacturers.	System wide	\$4,629
MC-CL-YS7755	Substations Demand Driven Improvements	Rationale: Requests from other agencies typically occur without enough notice to be included in the biennial budgeting process. The Power Stations Division budgets a nominal sum for each year to cover requests and to request spending authority. Alternative(s): The alternative to implementing regional demands is failing to meet City commitments to regional agreements.	System wide	\$5

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YS7756	Interbay Substation - Development	<p>Rationale: The Broad Street Substation is reaching its capacity to serve the network and the growing South Lake Union neighborhood. The limiting factor is an inability to construct additional underground feeders to carry electrical current in to the area. The existing 26 kV distribution system and substations are becoming overloaded and a new 26-kV substation will feed the areas load growth. The 115 kV ring bus work at Broad Street and Canal Substations will provide the connections to the transmission system. The new substations will provide 10 to 15 new 26 kV getaways, adding to the distribution network and providing a new path for power to the area. Because City Light already owns property for a station in Interbay, it is the nearest opportunity we have to add capacity in the western part of the service area that will off-load demand from the Broad Street Substation for the South Lake Union district. Developers who are interested in projects in the SLU district want to know that City Light will be able to serve their needs reliably. Alternative(s): 1. Not build the new substation. 2. Option one build: Contract out the design and construction 3. Option two build: Have City Light design and integrate the facility into the distribution system, and construct the facility. It requires at least 36 months to site, contract for design, construct, and energize a distribution substation. There are several alternatives such as installing distributed generation facilities to meet load growth. City Light has considered constructing additional transmission corridors from the University Substation and/or Canal Substation. Both alternatives require crossing a body of water, which are expensive options even if environmental challenges do not delay or halt progress. Given the recognized growth in South Lake Union, City Light selected the most cost effective and achievable option - constructing a station at Interbay to serve the growing load in that part of the service territory.</p>	17th Ave West	\$193
MC-CL-YS7776	Substation Transformer Replacements	<p>Rationale: To replace aging substation transformers before they fail in service. Alternative(s): The alternative is to accept the risk of a transformer failure and the consequent added cost and time for emergency replacement.</p>	2136 N 163rd St, Shoreline	\$5,047
MC-CL-YS7779	Substation Breaker Replacements and Reliability Additions	<p>Rationale: To replace aging substation circuit breakers before they fail in service. **Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YS7783	Substations Oil Containment	<p>Rationale: The rationale of this project is to get City Light into compliance with the Clean Water Act regulations (Title 40, Code of Federal Regulations, Part 112) which require that oil containment measures be taken that will prevent oil spills into any streams or open bodies of water. During preparation of the Oil Spill Plans required by the regulations, a comparison of existing oil containment facilities was made with the recently revised (August 2002) regulations, which resulted in discovery of instances at 11 of our substations of design problems or capacity problems that should be resolved to fully meet the regulations.</p> <p>Substation Scope of Recommended Oil Containment: (Scott McLean's project estimates) Duwamish Sub - Add oil containment at the bus bays and potential transformers. Major issues are proximity to the Duwamish River, which with porous soils raises the prospect of an oil spill finding its way to groundwater and into the river in a short period of time. Broad Sub - Remedy the insufficient capacity of the oil containment system and lack of impervious sumps. Major issue with the existing system is that spilled oil can overflow the undersized unlined sumps into the combined yard drain sys (i.e. combined drainage and oil containment system) and from there into City drains. There is no oil containment in the E yard. Improve the system or set up a contingency plan. Bothell Sub 1. Provide lining for the currently unlined sumps at transformers and OCBs, and provide for separating the oil containment system from the drainage system. Major issues include unlined sumps; no oil containment for oil tanks at west side next to wetland, combined drainage/oil containment system can spread an oil spill into the yard gravel. 2. Retrofit with impervious sumps at bulk storage tanks with normally closed valve. 3. Pipe 3 CBs at SW yard to MH with OSV. East Pine Sub - Remedy the undersized combined oil containment system, which has the potential of overflowing i</p> <p>Alternative(s): 1. Implement improvements recommended by Oil Spill Plans as soon as possible, to obtain compliance with the applicable federal regulations (Title 40, Code of Federal Regulations, Part 112). 2. Implement recommended improvements over a phased period of time, to obtain compliance with the applicable federal regulations (Title 40, Code of Federal Regulations, Part 112), giving priority to the sites of highest environmental risk. This is the selected alternative. 3. Do nothing.</p>	System wide	\$217
--------------	-----------------------------------	---	-------------	-------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YS8424	Substation Automation	<p>Rationale: Seattle City Light's (SCL) remote monitoring and control of critical substation equipment from our system control center dates from the 1970s, when SCL led the industry's development. The basic configuration in each substation is unchanged since those early days. The configuration consists of a Remote Terminal Unit (RTU), which collects electric system measurements and status; forwards them promptly to the control center; conveys power dispatcher commands back to the substation to operate high voltage switches and circuit breakers for electric system reconfiguration in real time. Industry developments and the toll of decades have made necessary the upgrade of this system. The existing Remote Terminal Unit equipment is 40 years old, wearing out and cannot be replaced in kind because the equipment is no longer manufactured. It has insufficient capacity to address the needs of added substation sensors and controls, cannot offer the computerized capabilities of new technology, cannot support automation of the distribution system feeders radiating from the substations, is too slow to meet the speed requirements of new control applications, is energy inefficient and cannot support modern demands of sophisticated asset management of expensive high-voltage equipment, and it doesn't provide the insight into the operation of the substation that today's staff could be using to improve operation and maintenance practices. Further, an RTU failure will significantly affect the operation of the Automatic Generation Control (AGC) at the EMS. The AGC relies heavily on the RTU for accurate data acquisition of real time power flow on transmission lines to neighboring utilities, comprising the Western Interconnection governed by the Western Electricity Coordinating Council (WECC). The AGC enables the proper allocation of a pool of power generation to the appropriate load required by each utility customer. Loss of AGC due to RTU failure will in turn cause fines from the appropriat Alternative(s): Option I - Replace at Failure: This strategy poses significant business risk that will grow as the equipment ages. Currently, the average age is about 40 years old. This analysis assumes that this equipment will fail at an increasing rate at or before reaching 60 years old. The current technology can no longer be replaced or maintained because it is no longer manufactured. When the RTU fails, it will take one year to replace and require one year of manual operation, which adds approximately \$1Million of additional labor costs above the \$1.3 Million planned cost of replacement. Should SCL lose more than 2 RTUs in one year, it would take longer to replace and require more labor to manually operate the substations. However, replacing this equipment with</p>	System wide	\$1,260

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

modern technology will set the foundation to support future smart grid applications like AMI (Advanced Metering Infrastructure), OMS(Outage Management System), Asset Management applications, Distribution Automation, and reactive power management, to name a few. It will also allow SCL to meet future NERC compliance requirements for substation equipment and install intrusion control measures for substation security. Option II - Preferred Option: Planned RTU Replacement over 7 Years at a rate of 2 per year. This option will: Remove existing RTU. Install new server systems in every substation. Install supervisory control of feeders (30 feeders for each station) that serve network loads to allow remote control of feeder breakers from the EMS. Install group control of network feeders to enable load restoration in case of a sub-network or total substation outages. Install new annunciators and monitors for productive operator interfaces. Two other options were discussed but not pursued for this analysis. One alternative considered adding a server to each substation over 7 years, but did not propose to connect it. This option didn't return sufficient benefit and resulted in the disadvantage of prolonging the peri

MC-CL-YT7011	Transmission Capacity	Rationale: The capacity of the system is based on winter and summer peaks, weather conditions, and N-1 criteria. Additional capacity shall be added to meet the planning criteria for power delivery of new load demand. Alternative(s): If transmission lines are overloaded, overhead wires could sag beyond National Electric Safety Code clearances causing an unsafe condition, and underground lines could exceed the insulation's temperature rating causing damage to the cable. In order to avoid these situations from overload, which could cause long term outages; shorter term load shedding would be used.	System wide	\$24
MC-CL-YT7104	Transmission Reliability	Rationale: As structures, insulators and conductors reach their end of life expectancy and need to be replaced to maintain existing systems. To meet the National Electric Reliability Council and Western Electricity Coordinating Council reliability criteria, it is necessary to add additional transmission lines that are not capacity driven. Wood poles will have a shorter replacement life of approximately 40-60 years depending on condition assessment. Alternative(s): Allow the lines to fail before replacing them. This can cause a dangerous safety issue and will reduce the availability of the system at unscheduled and inopportune times. The August 2003 East Coast blackout has shown that inattention to the transmission system has large implications.	System wide	\$1,864

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YT7105	Transmission Inter-Agency	Rationale: Seattle City Light is required to relocate facilities at the request of other agencies. Drivers for the relocations are road realignments, construction of facilities, regional upgrades, and changes in lighting. Inter-agency projects may or may not be reimbursable depending on real estate drivers. Alternative(s): Do not meet other agencies needs and potentially delay local, state, or regional construction programs. If interagency agreements are not met, there are usually contractual, permit, or franchise rights involved, which could lead to litigation.	System wide	\$606
MC-CL-YT7125	Denny Substation Transmission Lines	Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.	System wide	\$6,772

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-YT8461	Transmission Line Inductor Installation	<p>Rationale: Rationale: This project is based upon a Memorandum of Agreement (MOA) between Bonneville Power Administration (BPA), Puget Sound Energy (PSE), and Seattle City Light (SCL), aimed at improving the reliability of the regional electric grid in the Puget Sound Area Northern Intertie (PSANI). Since the early 2000's, BPA has limited energy transfers between the Puget Sound area and Canada due to congestion in the Puget Sound Area. This project will reduce congestion and upgrade the reliability of the transmission system, reducing the risk of region-wide customer power outages in the future. Objectives for this project include: 1. Install series inductors on the Massachusetts to Union to Broad (MA-US-BR) and Denny to Broad (DN-BR) 115kV Underground Transmission Cable Lines in the downtown Seattle Transmission System by 2017. 2. Complete all Transmission System Improvements within the 2013 - 2018 CIP Forecast and Budget. 3. Complete all agreed upon Transmission System Improvements per the MOA by the end of 2017. 4. Complete necessary upgrades to existing substation and transmission equipment or structures to support Seattle City Light's 2013 - 2018 Strategic Plan Initiative for Transmission System Improvements. Project Goals: 1. Enhance customer experience and service reliability for SCL customers. 2. Reinforce transmission interties and interconnections with PSE and BPA. 3. Improve SCL asset strengths and load capacity on existing transmission systems. 4. Reduce the risk of region-wide customer power.</p> <p>Alternative(s): City Light belongs to the Columbia Grid, a regional transmission planning organization. SCL and other Columbia Grid members considered alternatives such as new phase shifting transformers, 500kV transmission lines, and additional underground cables. The goal of the regional analysis was to minimize costs and impacts using a one-utility approach for solving the transmission congestion issues. The selected projects were chosen after two years of transmission system studies and analysis. The 2011 report can be found in City of Seattle Ordinance 123779, as an attachment with a table of the alternatives considered.</p>	System wide	\$3,995
MC-CL-ZC9972	Call Center Improvements - City Light	<p>Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.</p>	University District / Roosevelt / Northgate	\$107

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

MC-CL-ZL8377	Transportation Streetlights	Rationale: 2010 EMS Streetlighting that SCL owns may need to be relocated for transportation purposes, just as other SCL facilities. Often SCL will pay to move all types of its facilities if a project is deemed a Transportation Project. Utilizing SDOT as the design and construction management consultant allows SCL to avoid being in the critical path of transportation projects. It also allows for leveraging engineering staff. Alternative(s): The do nothing alternative would hamper transportation projects and cause delays to the public.	System wide	\$6,207
MC-CL-ZL8378	Streetlights: Arterial, Residential and Floodlights	Rationale: Streetlights and floodlights are provided in public right of way, and on private property, for either public or private benefit. Often these lights are attached on existing City Light wood poles, but they may also be installed on separate metal poles, depending on the application. City Light owns the arterial and non-arterial lighting systems throughout the City of Seattle per Ordinance 119497. In other jurisdictions, franchise agreements may dictate City Light's requirement to support lighting needs. City Light has historically provided the resources to install street lighting. These capital costs are then reimbursed by the requesting party through monthly billing according to Seattle Municipal Code 21.49.060, Schedule T, Option C. Alternative(s): The do nothing alternative would deny new lighting, a service authorized by ordinance. In residential areas, public safety would remain at present levels. Along arterials, the existing aging system would deteriorate beyond usefulness and lag behind improved lighting standards.	System wide	\$1,568

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZL8441	Streetlight LED Conversion Program	Rationale: 2010 EMS - This project will reduce annually energy consumption by 40% (for those lights replaced), provide Greenhouse Gas Avoidance of 5,446 metric tons of carbon per year, and reduce maintenance cost of the Utility's streetlight system. The savings in energy and maintenance costs will pay for the initial investment within the life of the new system. The overall goal of this project is to improve customer service and reduce cost. With a total system conversion, it is estimated that annual operating costs will be reduced from \$10,180,213.59 per year to \$6,510,231.31 per year. Debt service for system conversion capital cost may be made with these savings. Through 2011, 20,000 cobrahead residential fixtures have been installed. In 2012, residential conversion will take place from the southern border of City Light's service area to Brandon St. The 2013 conversion effort includes residential and minor collector arterials in Zone 2 (250 watt High Pressure Sodium replacements), from Brandon St to Denny Way. Complete conversion of the residential streetlights completion anticipated by the end of 2014. Arterial cobrahead luminaire conversion will continue through 2017. Ornamental LED conversion anticipated through 2021. Alternative(s): No Alternatives Provided.	Citywide	\$1,611
MC-CL-ZL8481	Seattle Waterfront Streetlight Installation	Rationale: No Rationale Provided. Alternative(s): No Alternatives Provided.	1312 Western AVE	\$3,927

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZS8054	Meter Additions	<p>Rationale: Background: Of the 400,000 meters in City Light's metering system, approximately 80,000 are older than 30 years. City Light's Rates Unit estimates that replacing the meters would result in an increase in revenues of more than \$450,000 annually. City Light has a fiduciary responsibility to continually update the metering system. Due to continuous budget constraints, both in labor and material, targets of 10,000 obsolete meter exchanges were reduced in 2000, 2006 and 2008 to our current level of 5300, thus the backlog of older meters continues to increase. Methodology: New Service Installations: Over the past 9 years, new or upgraded services have averaged 5,500 a year. Material budgeting was based on a 2006 to 2008 average and current labor figures. These project funds support the demands of new construction and upgraded services. Obsolete Meter Exchange: The life cycle of a meter is 30 years based on the electro-mechanical meter. However, current and future electronic technology may reduce this life-span up to 50%. Older meters slow with age, resulting in a loss of revenue to the Department. Obsolete meters can account for up to 3 percent loss in department revenue. The Technical Metering Unit expects to exchange 10,000 obsolete meters annually starting in 2013 through 2016. Alternative(s): 1. Continue to replace obsolete meters at current level of 5,300 annually. City Light could not accurately bill for electrical consumption. Incur loss of City Light revenue due to slow meters. Results in increasing backlog of meters over 30 years old. Increased future utility costs due to replacing obsolete meters at an accelerated pace with higher labor and material costs. 2. Continue to replace obsolete meters at higher level of 10,000 annually. Increase number of customers who receive accurate and timely bills. Reduce loss of utility revenues due to slow meters. Avoid higher cost of meter replacement when meters fail.</p>	System wide	\$3,764
MC-CL-ZS8350	Overhead Outage Replacements	<p>Rationale: During unplanned outages, work often must be done that requires the complete replacement, rather than repair just one piece of equipment that is normally capitalized. This includes poles and transformers. This project is intended to capture those expenditures. Alternative(s): During an unplanned outage, feeder switching will restore most, if not all of the affected customers. The do nothing alternative possibly leaves the few affected customers without power. The system also remains in its damaged condition which severely limits the flexibility to switch the feeders to allow for other outages, both planned and unplanned. Planned outages are needed to accommodate line moves and other system work.</p>	System wide	\$1,035

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZS8352	Underground Outage Replacements	Rationale: During unplanned outages, work often must be done that requires the complete replacement rather than repair just one piece of equipment that is normally capitalized. This includes cable and transformers. When there are no customer outages, the goal is to restore the system to its normal configuration within two months, unless customer driven construction mandates an earlier deadline or the magnitude of the scope of the outage makes this impractical. Alternative(s): During an unplanned outage, feeder switching will restore most, if not all, of the affected customers. The do nothing alternative possibly leaves the few affected customers without power. The system also remains in its damaged condition which severely limits the flexibility to switch the feeders to allow for other outages, both planned and unplanned.	System wide	\$1,637
MC-CL-ZS8363	Network Additions and Services: Broad Street Substation	Rationale: The Broad Street Substation Network Additions and Services project connects approximately five small, four medium, and five large properties costing \$4.6 million and performs capacity additions work associated with service connections. These connections include condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. Alternative(s): No Alternatives Provided.	319 6th AV N	\$9,979
MC-CL-ZS8364	Network Additions and Services: First Hill, Massachusetts, Union & University	Rationale: This Network Additions and Services project for the customers in the First Hill, Massachusetts, Union, and University District network areas provides service connections to approximately nine small, five medium, and four large properties costing \$3.5 million. These connections include condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. Alternative(s): No Alternatives Provided.	1555 Utah AV S	\$4,030
MC-CL-ZS8365	Large Overhead and Underground Services	Rationale: There is a continuous demand for additional electric power services as new construction and renovation work occurs. Seattle City Light provides service to new customers in a safe, reliable, timely, and cost effective manner as a means to fulfill its commitment to be a customer and community focused organization. Alternative(s): Each service connection may have unique aspects that would require or facilitate design, construction, and financing alternatives. Seattle City Light will fully consider alternatives as a means to fulfill its commitment to be a customer and community-focused organization.	System wide	\$3,170

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZS8366	Medium Overhead and Underground Services	<p>Rationale: There is a continuous demand for additional electric power services as new construction and renovation work occurs. Seattle City Light provides service to new customers in a safe, reliable, timely, and cost effective manner as a means to fulfill its commitment to be a customer and community focused organization.</p> <p>Alternative(s): Each service connection may have unique aspects that would require or facilitate design, construction, and financing alternatives. Seattle City Light will fully consider alternatives as a means to fulfill its commitment to be a customer and community-focused organization.</p>	System wide	\$16,401
MC-CL-ZS8367	Small Overhead and Underground Services	<p>Rationale: There is a continuous demand for additional electric power services as new construction and renovation work occurs. Seattle City Light provides service to new customers in a safe, reliable, timely, and cost effective manner as a means to fulfill its commitment to be a customer and community focused organization.</p> <p>Alternative(s): Each service connection may have unique aspects that would require or facilitate design, construction, and financing alternatives. Seattle City Light will fully consider alternatives as a means to fulfill its commitment to be a customer and community-focused organization.</p>	System wide	\$5,719
MC-CL-ZS8379	Normal Emergency	<p>Rationale: This project will collect costs related to the annual storm invoked work orders, which results in more accurate accounting for weather related and other emergency outage situations and leads to better planning for similar future events. SCL traditionally has budgeted for these events in the Outage capital project. This did not allow us to easily account for emergencies versus billed work, such as car and pole accidents. Separating these charges will allow us to track costs and feasibly plan for future emergency situations. Alternative(s): To continue to mix emergency and non emergency work in the Outage capital project. This project does not add a body of work but clarifies the accounting for it.</p>	System wide	\$931
MC-CL-ZS8380	Major Emergency	<p>Rationale: This project will collect costs related to emergency work. This will result in more accurate accounting for weather related and other emergency outage situations. This project does not add a body of work, but clarifies the accounting for it. SCL traditionally has budgeted for these events in the Outage capital projects. This did not allow us to easily account for emergencies versus billed work such as car and pole accidents. Separating these charges will allow us to track costs and feasibly plan for future emergency situations. Alternative(s): To continue to mix emergency and non emergency work in the Outage capital projects.</p>	System wide	\$2,952

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZS8405	Network Additions and Services - Denny	Rationale: This is a mandated project that provides electrical service connections and related improvements in response to requests for service from customers. The project provides targeted civil and electrical design assistance to customers to connect existing and proposed buildings to the North Downtown network system. The conversion effort is quite large since we are installing a new network in this area. It is imperative to participate in early design discussions with customers building in the area. For existing buildings, the conversions to network service are complicated and require expert assistance. This project provides service connections to biotech industry, condominiums, office buildings, medical facilities, hotels, and commercial and apartment buildings. Alternative(s): 1. Do nothing. 2. Hook up customers as they request. Option 2 is recommended as it is most compatible with our mission of customer service.	Valley Street	\$9,929
--------------	--	---	---------------	---------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZT8307	Alaskan Way Viaduct and Seawall Replacement - Utility Relocations	<p>Rationale: The Alaskan Way Viaduct replacement includes a complex transmission and network/non-network relocation, design and construction, and is on a fast track. This work is integrated and required by the broader transportation project. The externally generated project and schedule includes significant electrical relocation work in the near term that will extend for over a decade. The utility is required to relocate for transportation relocated projects. The City's overall plan for the Alaskan Way Viaduct project includes utility funded relocations for the viaduct replacement and for rebuilding the Seawall. The series of subprojects that make up the Alaskan Way Viaduct replacement have opportunities for system improvements that will also be funded under this program. For most of the subprojects in the Alaskan Way Viaduct project, utility relocations will lead the construction. Therefore any delay in accomplishing SCL work will result in delays along the overall projects critical path. While the designs & construction schedules for the various subprojects in the Alaskan Way Viaduct program are being sequenced and detail design is underway for the immediate projects, the central waterfront elements of the overall project are beyond this budget cycle and are still in the preliminary design phases. Alternative(s): The Alaskan Way Viaduct program provides the utility with a combination of obligations and opportunities for system improvements over the next 6 years. The Alaskan Way Viaduct program will likely be the City's primary construction focus as its various projects impact traffic and roadway construction, seawall stabilization, and urban design on the waterfront. Seattle City Light facility relocations will be a part of each of these projects. The global nature of the Viaduct Program also provides the opportunity to make system improvements that will provide for increased reliability and capacity for our customers. For example, work in the south end will include system improvements that will increase feeder capacity and reliability for Port customers. Undergrounding of transmission lines near Broad Sub are being done as part of an overall SDOT street improvement with costs shared based on a negotiated MOA with SDOT. The return of Aurora, north of Harrison Street to a city street, and the decommissioning of the Battery Street Tunnel provides an opportunity to extend ducts and vault across Aurora to help provide system capability to the NODO area.</p>	SR 99 / Battery St	\$11,229
--------------	---	--	--------------------	----------

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

MC-CL-ZT8369	Overhead and Underground Relocations	Rationale: This project provides the means to move City Light system infrastructure, located in the public right-of-way for transportation projects, including street widening and street vacation projects. This means moving distribution lines to make way for construction of buildings, bridges, airport runways, tunnels, and for other utilities. This project moves electrical lines to accommodate or take advantage of transportation-related projects being constructed by other agencies. The project builds new and replaces old line segments, installs and replaces poles, and adds or renovates underground facilities to the distribution system, as necessary, to relocate distribution systems for transportation projects, street vacations, or other projects proposed by outside (non-City Light) agencies. Some projects are paid for by City Light and some are paid for by the requesting agencies. This project provides the means to move the system for transportation projects in the public right of way, including street widening and street vacation projects. Alternative(s): The do nothing alternative leaves the distribution of facilities in their current location, which would interfere with the projects of the other agencies.	System wide	\$5,283
MC-CL-ZT8435	State Route 520 Bridge Relocations	Rationale: SCL is legally required to relocate its infrastructure to support transportation driven projects. Alternative(s): No Alternatives Provided.	SR 520 / Lake Washington	\$22
MC-CL-ZT8470	Center City Connector Streetcar City Light	Rationale: This SDOT project was initially proposed as the 1st Ave Streetcar project in 2009, but was deferred in favor of the 1st Hill Connector line. It is now being proposed as part of a wider mobility improvement initiative to be implemented along with the Alaskan Way Viaduct program. Alternative(s): Since this transportation relocation work is required, the "do nothing" alternative does not apply. Given the importance of SCL's infrastructure in the proposed project area, SCL engineering & project management will work with SDOT & contracting personnel to insure that the project design chosen has minimal impact on SCL customers & ratepayers while meeting the overall project's goals.	City Wide	\$35
MC-CL-ZT8471	Sound Transit Lynnwood - City Light	Rationale: See alternatives. This is a legally required relocations project for SCL. Alternative(s): The Sound Transit Lynnwood Link project is a mandatory distribution system relocations project for SCL. Pursuant to SCL's status as a utility operating in the public transportation right-of-way, SCL is required by Washington State law to facilitate construction of new transportation projects by other agencies, such as Sound Transit. Therefore, this is not an optional project for SCL.	City Wide	\$2,818

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

Seattle Department of Transportation

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
MC-TR-C004	Sound Transit - East Link	This project will provide design review, permitting, and construction support services for the Sound Transit - East Link project.	Citywide	\$70
MC-TR-C013	RapidRide Roosevelt	This project will increase the person-carrying capacity of Seattle's transportation network and of the regional transit network.	VARIOUS	\$15,036
MC-TR-C019	Neighborhood Traffic Control Program	This program will install traffic calming devices on neighborhood streets.	Citywide	\$5
MC-TR-C020	New Traffic Signals	This project will install new traffic signals to improve traffic flow, reduce the frequency and severity of traffic accidents, and support pedestrian activity.	Citywide	\$476
MC-TR-C021	Next Generation Intelligent Transportation Systems (ITS)	This project will install new Intelligent Transportation System equipment to improve traffic flow.	Citywide	\$1,579
MC-TR-C028	S Lander St. Grade Separation	The project will construct a grade separation of the S Lander St. roadway and the Burlington Northern mainline tracks between 1st and 4th Avenues S.	S Lander St/1st Ave S/4th Ave S	\$9,965
MC-TR-C029	Transit Corridor Improvements	This program implements projects that improve transit speed, reliability, access, and convenience, consistent with the Transit Master Plan.	Citywide	\$1,928
MC-TR-C030	Northgate Bridge and Cycle Track	This program will design and build pedestrian and bicycle improvements in order to increase safety and improve access to transit modes.	Multiple	\$17,822
MC-TR-C034	3rd Avenue Corridor Improvements	This project will increase the person-carrying capacity of Seattle's transportation network and of the regional transit network.	3rd AVE	\$1,400
MC-TR-C041	Non-Arterial Street Resurfacing and Restoration	This project is consistent with the priority placed on basic services and asset preservation, and protects the City's capital investment in non-arterial asphalt and concrete streets. City crews budgeted against this work are also those who respond to emergency events.	Citywide	\$1,590
MC-TR-C044	Burke-Gilman Trail Extension	This project will construct three miles of new multi-use trail.	VARIOUS	\$250
MC-TR-C047	Freight Spot Improvement Program	This project will improve mobility. Specific projects and the corresponding impacts on capacity are still to be determined.	Citywide	\$2,974

*Amounts in thousands of dollars.

Appendix A: New or Expanded Capital Facilities

MC-TR-C050	Urban Forestry Capital Establishment	The initial estimate for establishment provided by SDOT Urban Forestry as a component of the Org Based Budget is subject to confirmation near the end of construction to ensure support to complete the 3 year establishment for trees and associated planting installed by the project. This coordination between SDOT Urban Forestry and CP&RS supports the close out capital projects in timely manner.	Citywide	\$9
MC-TR-C051	Madison BRT - RapidRide G Line	This project will increase the person-carrying capacity of Seattle's transportation network and of the regional transit network.	Madison ST/Alaskan Way/Martin Luther King Junior W	\$51,350
MC-TR-C062	Bike Master Plan - Protected Bike Lanes	This program will install bike lanes and bicycle route signing, and complete links or reconstruct key sections of urban trails in order to increase bicycle safety and access.	Citywide	\$5,251
MC-TR-C064	Vision Zero	This project will upgrade existing signals and signs, and install new ADA ramps, and pedestrian safety improvements.	Citywide	\$2,229
MC-TR-C072	Alaskan Way Main Corridor	The program will construct a new Alaskan Way surface street and public space.	VARIOUS	\$56,891
MC-TR-C087	SR-520 Project	This project will provide for the planning, design and EIS review on the SR 520 bridge replacement.	SR520 WB	\$806

**Amounts in thousands of dollars.*

Appendix A: New or Expanded Capital Facilities

Seattle Parks and Recreation

Project Name	Project ID	Project Capacity	Project Location	2020 Budget*
MC-PR-21001	Park Land Acquisition and Leverage Fund	This project will add acreage to Seattle's total park land acreage.	Citywide	\$1,050
MC-PR-21004	Activating and Connecting to Greenways	This project will increase the number of miles of safe pedestrian routes for all ages.	Citywide	\$226
MC-PR-41029	Parks Upgrade Program	Capacity will depend on the project scopes that will be the subject of additional citizen review consistent with the Parks Department's Public Involvement Policies.	Citywide	\$808
MC-PR-41039	Play Area Renovations	The project improves the safety and usability of the play areas, ensuring that Seattle's children can have a safe and enjoyable place to play.	Multiple	\$575

**Amounts in thousands of dollars.*

DEPARTMENT OF FINANCE AND ADMINISITRATIVE SERVICES

Project ID: MC-FA-FS31IMP
Project Title: Fire Station 31 Temporary Station
Location: 1319 N Northgate Way
2021 Proposed Budget: \$ 1,300,000
Description: This project provides resources to provide an interim location for Fire Station 31. The project includes leasing an interim site for the fire station, providing tents and trailers to house the fire fighters and equipment, and identifying a for a permanent fire station.

Project ID: MC-FA-HCMSYS
Project Title: Human Capital Management System
Location: N/A
2021 Proposed Budget: \$ 7,500,000
Description: This technology project funds the planning, design and replacement of the a Human Resource Information System (HRIS), which includes the citywide pay and benefit system, with a new Human Capital Management (HCM) system. timing of this project is critical for the citywide HR, timekeeping and payroll system, which will no longer be supported after 2023. The project was approved by the Enterprise Oversight Board (EOB) in February 2020 and will managed out of the FAS Business Systems division, with funding and partnership from Seattle Department of Human Resources (SDHR) and Seattle IT (ITD)

Project ID: MC-FA-SMTELVHRB
Project Title: Seattle Municipal Tower Elevator Rehab
Location: 700 Fifth AVE
2021 Proposed Budget: \$ 8,500,000
Description: This project will improve the operation, reliability, and system performance of the Seattle Municipal Tower (SMT) elevators. The work will bring the SMT elevators to current building codes and into compliance with Americans with Disabilities Act (ADA) requirements. This project is envisioned to be a multi-year effort that must be phased to minimize impacts on SMT ongoing building operations, and on the approximately 4,000 city staff who work in the building and the public who visit the SMT to access City services.

DEPARTMENT OF PARKS AND RECREATION

Project ID: MC-PR-21009
Project Title: Athletic Field Improvements
Location: Various

2021-2026 Proposed Capital Improvement Program

Appendix B: Capital Projects passing the \$5 million threshold with the 2021 Proposed allocation.

2021 Proposed Budget: \$ 600,000

Description: This project is an ongoing program designed to improve Seattle Athletic Fields. Funding for these improvements is provided by various sources including Athletic Field revenues.

Project ID: MC-PR-41004

Project Title: Aquarium Major Maintenance

Location: 1483 Alaskan WAY

2021 Proposed Budget: \$ 1,221,921

Description: This ongoing project provides funds for major maintenance at the Aquarium and other related items. Typical projects include seawater pump replacement, tank repairs, energy efficient systems upgrades, exterior decking repairs, Americans with Disabilities (ADA) access improvements, roofing and seismic upgrades, and related work. The facility was constructed in 1980, and a partial addition was installed on Pier 59 portion of the building in 2006. Due to the harsh saltwater environment, Aquarium facilities have a shorter lifespan than similar facilities not located over saltwater. The individual projects will address health and safety codes, extend the life of the asset, improve access for all, reduce energy costs, and improve the overall Aquarium experience for the public. This project is part of the Seattle Park District measure put before voters in 2014.

Project ID: MC-PR-41070

Project Title: Athletic Field Replacements

Location: Various

2021 Proposed Budget: \$ 3,326,560

Description: This program replaces field surfacing systems for fields at the end of their lifecycle. These replacements may include replacement or addition of natural turf, fiber carpets, drainage features, infill material, shock attenuation layers or related features and allow the continued safe and playable use and scheduling of playfields for sports and other activities.

SEATTLE CENTER

Project ID: MC-SC-S0305

Project Title: General Site Improvements

Location: Seattle Center Campus

2021 Proposed Budget: \$ 550,000

Description: This ongoing project improves the safety, security, facility integrity, and visitor experience on the Seattle Center campus. Improvements may include, but are not limited to, installation of security bollards, lighting upgrades, sealing of building exteriors, technology and security system upgrades, and renovation fountains, site amenities and open spaces.

SEATTLE CITY LIGHT

2021-2026 Proposed Capital Improvement Program

Appendix B: Capital Projects passing the \$5 million threshold with the 2021 Proposed allocation.

Project ID:	MC-CL-XF9239
Project Title:	Transportation Electrification
Location:	System Wide
2021 Proposed Budget:	\$ 3,980,000
Description:	This ongoing project develops electrification infrastructure for light-duty, medium-duty, and heavy-duty electric vehicles (including transit, commercial government and non-profit fleets, delivery vehicles, personal vehicles and freight vehicles) as well as ferry and port systems. The portfolio of projects be developed based on a committed customer engagement effort and is expected to include support for electrified public transit, investments in and support for electric vehicle charging infrastructure, engineering support, installation services and/or construction services and related infrastructure. The project also includes the enabling investments in grid modernization as including automation and smart grid technology, distributed generation (so wind, etc.) and energy storage equipment, and demand side management to better support and align customer energy demands with supply.
Project ID:	MC-CL-XS6540
Project Title:	Skagit - Boat Facility Improvements
Location:	Newhalem Creek Rd, Marblemount, WA 98267
2021 Proposed Budget:	\$ 898,983
Description:	This project provides design and construction of several new structures to support industrial and recreational boat operations on our Skagit reservoirs. Structures include a new tour dock, new dry dock, additions to the existing boat houses and a new barge landing in Diablo. The project provides improved visitor access for the Skagit Boat Tour, safer boat fueling facilities, reduced impact of snowfall on boats, consolidated barge landings, and improved dry docks.
Project ID:	MC-CL-XS6562
Project Title:	Ross - Governors
Location:	Ross Powehouse
2021 Proposed Budget:	\$ 350,098
Description:	This project replaces governor controls on all four of the Ross Powerhouse generating units.
Project ID:	MC-CL-ZS8350
Project Title:	Overhead Outage Replacements
Location:	System wide
2021 Proposed Budget:	\$ 1,035,325

Appendix B: Capital Projects passing the \$5 million threshold with the 2021 Proposed allocation.

Description: This ongoing project supports the capitalized portion of work resulting from unplanned, non-emergency, overhead outages. These outages result from events, such as storms, accidents, and equipment failures. The project funds permanent storm repairs and construction of new infrastructure to bypass failing equipment. The project ensures that customers' electric power is restored as quickly as possible.

SEATTLE DEPARTMENT OF TRANSPORTATION

Project ID: MC-TR-C031
Project Title: Pedestrian Master Plan - Stairway Rehabilitation
Location: Various
2021 Proposed Budget: \$ 1,462,250
Description: This ongoing program implements the Pedestrian Master Plan. The primary goals of the Pedestrian Master Plan is to reduce the number of crashes involving pedestrians; make Seattle a more walkable city for all through equity in public engagement, service delivery, accessibility, and capital investments; develop a pedestrian environment that sustains healthy communities and supports a vibrant economy; and raise awareness of the important role of walking in promoting health and preventing disease. The sub-program, Stairway Rehabilitation, funds projects to rebuild and/or rehabilitate stairways to the current standards, that includes but not limited to adding proper width, step height, grip rail, landings, and other features required by the Americans with Disabilities Act. The historical LTD amount for the Stairway Rehabilitation is in project TC367150.

Project ID: MC-TR-C036
Project Title: SPU Drainage Partnership - Broadview Pedestrian Improvements
Location: Various
2021 Proposed Budget: \$ 4,375,938
Description: This project funding will be used to install pedestrian improvements as part of SPU's larger Broadview Sewer and Drainage Improvement project. The Broadview sewer system was built in the 1950's and cannot handle the combination of additional flow from the homes and business that have developed since then and the additional storm water that is entering the system from downspouts directly connected to the sewer system as well as additional storm water entering through deteriorated pipes. This area is also lacking conventional sidewalks and would benefit from pedestrian improvements. The overall project goal is to reduce the potential for sewer backups and surface flooding for the Broadview neighborhood while improving the pedestrian environments.

Project ID: MC-TR-C053

2021-2026 Proposed Capital Improvement Program

Appendix B: Capital Projects passing the \$5 million threshold with the 2021 Proposed allocation.

Project Title: Route 7 Transit-Plus Multimodal Corridor Project
Location: Rainier AVE
2021 Proposed Budget: \$ 2,088,233
Description: This project, in partnership with King County Metro, will make street improvement on Rainier Ave which could include key features: dedicated bus lanes and queue jumps; and improvements to crossings and transit connections to help people access transit safely.

Project ID: MC-TR-C054
Project Title: SPU Drainage Partnership - South Park
Location: TBD
2021 Proposed Budget: \$ 7,137,395
Description: This funding will be used to partner with SPU's South Park Drainage Improvement projects. SPU is planning to install a pump station to control flooding in the South Park area. However, that alone will not control flooding. Many streets in the area are in poor condition and don't have a street drainage collection system. This funding will allow SPU and SDOT to partner to install the needed collection systems and repair the deteriorated roads.

Project ID: MC-TR-C074
Project Title: NE 43rd Street Improvements
Location: NE 43rd ST
2021 Proposed Budget: \$ 2,305,600
Description: This project will implement streetscape and pedestrian improvements on NE 43rd Street between Brooklyn Ave NE and 15th Ave NE to improve access to the Link Light Rail station, which is scheduled to open in 2021. The project will transform the operation of NE 43rd St between Brooklyn Ave NE and University Way NE to one-way westbound transit-only travel and between University Way NE and 15th Ave NE to one-way westbound, all vehicle travel. The roadway will be optimized for pedestrians with a curb-less roadway section, widened sidewalks, pedestrian illumination, bio retention, and rain gardens. A protected bike lane will be provided for eastbound bike traffic and westbound bicycle traffic will share the travel lane with westbound traffic. The project is scheduled to begin construction in the summer of 2020.

Project ID: MC-TR-C088
Project Title: Sound Transit 3
Location: Various
2021 Proposed Budget: \$ 1,359,520
Description: The City of Seattle is committed to actively collaborating with Sound Transit early in the environmental assessment and design phases of ST3 projects to refine and provide certainty around project scope and cost estimates, and to streamline and expedite the permitting processes.

2021-2026 Proposed Capital Improvement Program

Appendix B: Capital Projects passing the \$5 million threshold with the 2021 Proposed allocation.

Project ID:	MC-TR-C106
Project Title:	Rapid Ride C & D Line Improvements
Location:	Various
2021 Proposed Budget:	\$ 6,000,000
Description:	This project will deliver additional transit spot improvements aimed at improving travel time and reliability along RapidRide C&D lines, in preparation for Light Rail extensions into the West Seattle and Ballard neighborhoods. These projects make changes to SDOT-owned infrastructure, including streets and signals, and will result in adjustments to signal and street operations.
Project ID:	MO-TR-D006
Project Title:	Debt Service - REET II
Location:	N/A
2021 Proposed Budget:	\$ 8,291,457
Description:	The project funds debt service for the following capital projects: Alaskan Way Viaduct/Seawall (MC-TR-C006), Alaskan Way Main Corridor (MC-TR-C072), and Fremont Bridge Approaches (TC365790, no new Project ID because project completed prior to 2018).

SEATTLE PUBLIC UTILITIES

Project ID:	MC-SU-C5403
Project Title:	Enterprise Information Management
Location:	Various
2021 Proposed Budget:	\$ 3,050,000
Description:	This ongoing project provides integrated technology solutions in support of the management of SPU's corporate knowledge, including data, information, documents, and web content. Typical improvements may include, but are not limited to, replacement of shared file storage, new online collaboration tools, introduction of workflow, tracking & reporting applications, web content management systems, and an enterprise document management solution. This ongoing project enhances SPU's ability to retrieve, share, distribute and manage corporate information.

1% for Art: A program administered by the Office of Arts and Culture (ARTS) that sets aside one percent of eligible City capital improvement project funds for the commission, purchase, and installation of artworks.

2000 Parks Levy (“Neighborhood Parks, Green Spaces, Trails, and Zoo Levy”): A \$198.2 million, eight-year levy lid lift passed by Seattle voters in November 2000. The levy is designed to fund more than 100 park, open space, and recreation projects throughout the city.

2008 Parks Levy (“Parks and Green Spaces Levy”): A \$145.5 million, six-year levy lid lift passed by Seattle voters in November 2008. The levy was designed to fund park and green space acquisition, capital expansion and renovation of parks, and park facilities throughout the city.

Americans with Disabilities Act (ADA): A comprehensive civil rights law for people with disabilities passed by the federal government in 1990.

Allocation: The expenditure amount planned for a project or service that requires additional legislative action, or “appropriation,” before expenditures are authorized.

Appropriation: A legal authorization granted by the City’s legislative authority (the City Council) to make expenditures and incur obligations for specific purposes.

Asset Preservation (also known as Major Maintenance): Capital improvement projects that involve major repairs or rehabilitation of existing City facilities.

Capital Improvement Program (CIP): Annual appropriations from specific funding sources are shown in the City’s budget for certain capital purposes, such as street improvements, building construction, and some types of facility maintenance. The CIP is a six-year allocation plan presented as a document separate from the Budget that details all projects, fund sources, and expenditure amounts including many multi-year projects that require funding beyond the one-year period of the annual Budget.

Capital Projects Funds: Funds with resources set aside to acquire or construct major capital facilities that allow the monitoring of revenues and expenditures of authorized voter approved and Councilmanic bonds and levies.

Capital Projects Passing the \$5 million threshold with the 2020 Adopted allocation (Appendix B): Pursuant to the 1999 settlement agreement in CLEAN, et. al v. City of Seattle, the City has adopted policies regarding public notification when capital projects cross certain spending thresholds. Resolution 31203 updated those policies to require a list of all Capital Projects for which the City has cumulatively spent more than \$5 million with the adoption of the current annual Budget be published as an appendix to the Capital Improvement Program.

Community Development Block Grant (CDBG): An annual grant to Seattle and other local governments from the U.S. Department of Housing and Urban Development to support economic development projects, housing and services in low-income neighborhoods.

Comprehensive Drainage Plan: A Citywide drainage management program for capital improvements and ongoing maintenance. It establishes a monitoring program and identifies measures to control flooding and pollution, such as regulatory controls and public education.

Cumulative Reserve Fund (CRF): A source of ongoing local funding to support capital projects in general government departments. The CRF consists of two accounts: The Capital Projects Account and the Revenue Stabilization Account. The Capital Projects Account has three Funds: REET I Capital Projects Fund, REET II Capital Projects Fund, and the Unrestricted Cumulative Reserve Fund.

Design Build Operate (DBO): A non-conventional approach to implementation of major capital projects, wherein a single vendor is responsible for design, construction, and long-term operation of a facility.

Debt Service: Annual principal and interest payments that local government owes on money that it has borrowed.

Endangered Species Act (ESA): Legislation passed by the federal government in 1973 to conserve the ecosystems upon which endangered species depend upon and to conserve and recover listed species.

Fire Facilities and Emergency Response Levy: A \$167 million, eight-year levy lid lift, approved by voters in November 2003. The Levy includes funds for more than 40 projects to upgrade, renovate, or replace most of the City's fire stations, construct new support facilities for the Fire Department, construct a new Emergency Operations Center and Fire Alarm Center, procure two new fireboats and rehabilitate an existing one.

Fund Balance: The difference between the assets and liabilities of a fund. This incorporates the difference between the revenues and expenditures each year.

General Fund: A central fund into which most of the City's general tax revenues and discretionary resources are pooled and allocated to support many of the operations of City government. General Fund dollars appear in the CIP in two places: the General Fund contribution to the Cumulative Reserve Fund (if any) and appropriations to capital projects from a department's operating budget.

Geographic Information System (GIS): A tool that enables users to analyze and understand the spatial relationships among things that exist and occur in a location. The results of geographic analysis can be communicated with maps and/or reports.

Growth Management Act (GMA): Passed by the state legislature in 1990, the Growth Management Act encourages strategic land use planning and provides protection for environmentally sensitive areas.

Habitat Conservation Plan (HCP): A 50-year commitment by the City and Seattle Public Utilities to protect and restore the Cedar River Watershed.

Leadership in Energy and Environmental Design (LEED): A green building rating system for new and existing commercial, institutional, and multi-family residential buildings that evaluates environmental performance from a "whole building" perspective. There are four rating levels: Bronze, Silver, Gold, and Platinum.

Levy Lid Lift: An increase in regular property taxes for a general or designated purpose—for example, the 2008 Parks Levy.

Levy to Move Seattle: A nine-year, \$930 million-dollar levy passed by voters in November 2015. The levy provides funding to improve safety for all travelers, maintain streets and bridges, and invest in reliable, affordable travel options.

Limited Tax General Obligation (“LTGO” or “Councilmanic”) Bonds: Bonds that are issued by the City Council without voter approval. The debt service on these bonds is typically repaid from existing general government revenues or from revenues generated by the project(s) financed with the bonds.

Major Maintenance: See “Asset Preservation” above.

Municipal Art Plan: A plan prepared by the Office of Arts and Culture that establishes budgets for new 1% for Art program projects and describes the status of existing projects.

Neighborhood Matching Subfund (NMF): A fund administered by the Department of Neighborhoods to provide money to Seattle neighborhood groups and organizations for neighborhood-initiated improvement, organizing, or planning projects. The community’s contribution of volunteer labor, materials, professional services or cash is “matched” by cash from the fund.

Operating Budget: The portion of a budget that deals with recurring expenditures such as salaries, electric bills, postage, printing, paper supplies, and gasoline.

Public Works Trust Fund: A low-interest state revolving loan fund designed to help local governments with the repair, replacement, and rehabilitation of public works infrastructure.

REET I and REET II: The Real Estate Excise Tax (REET) is levied on all sales of real estate with the first 0.25% of the locally imposed tax going to REET I and the second 0.25% for REET II.

Seattle Metropolitan Park District: In August 2014, voters passed a ballot measure creating the Seattle Metropolitan Park District. The goal of the park district is to provide long-term, stable funding to support recreation programming, parks projects and the critical needs for investment in major and ongoing maintenance.

Unlimited Tax General Obligation (“UTGO” or “voted”) Bonds: Bonds issued after receiving approval by 60% of the voters in an election with at least 40% voter turnout. The debt service on these bonds is repaid from additional (“excess”) property tax revenues that voters approve as part of the bond measure.
