Section 5. A new Section 11.56.050 is added to the Seattle Municipal Code as follows:

11.56.050 Emergency response caused by person's intoxication-Recovery of costs from convicted person

A. A person whose intoxication causes an incident resulting in an appropriate emergency response, and who, in connection with the incident, has been found guilty of or has had their prosecution deferred for driving while under the influence of intoxicating liquor or any drug under Section 11.56.020 or operating a vessel while under the influence of alcohol or drugs under Section 16.20.110 is liable for the expense of an emergency response by a public agency to the incident.

B. The expense of an emergency response is a charge against the person liable for expenses under this Section 11.56.050. The charge constitutes a debt of that person and is collectible by the public agency incurring those costs in the same manner as in the case of an obligation under a contract, expressed or implied.

Following a conviction of an offense listed in subsection 11.56.050.A, and prior to sentencing, the prosecution may present to the court information setting forth the expenses incurred by the public agency for its emergency response to the incident. Upon a finding by the court that the expenses are reasonable, the court shall order the defendant to reimburse the public agency. The cost reimbursement shall be included in the sentencing order as an additional monetary obligation of the defendant and may not be substituted for any other fine or cost required or allowed by ordinance or statute. The court may establish a payment schedule for the payment of the cost reimbursement, separate from any payment schedule imposed for other fines and costs.

C. In no event shall a person's liability under this Section 11.56.050 for the expense of an emergency response exceed \$2,500 for a particular incident.

D. If more than one public agency makes a claim for payment from an individual for an emergency response to a single incident under the provisions of this Section 11.56.050, and the sum of the claims exceeds the amount recovered, the division of the amount recovered shall be determined by an interlocal agreement consistent with the requirements of chapter 39.34 RCW.

In this connection a converter gear used to convert a semitrailer into a full trailer shall be considered to be a part of the full trailer and not a separate vehicle. A converter gear being pulled without load and not used to convert a semitrailer into a full trailer may be substituted in lieu of a full trailer or a semitrailer in any lawful combination ((;)) .

B. A combination consisting of ~~((three trucks or truck tractors used in driveaway service where two of the vehicles are towed by the third in double saddlemount position (RCW 46.44.037)))~~ a truck tractor carrying a freight compartment no longer than eight feet, a semitrailer, and another semitrailer or full trailer that meets the legal length requirement for a truck and trailer combination set forth in Section 11.60.130.

Table A for 11.60.370 is based on the following formula: $W = 500 ((LN/N-1) + 12N+36)$. W is the maximum weight in pounds (to the nearest 500 pounds) carried on any group of two or more consecutive axles. L is the distance in feet between the extremes of any group of two or more consecutive axles. N is the number

of axles under consideration. ~~((See Table A for 11.60.370 A)))~~

B. When inches are involved: Under six inches, take lower, ~~((6")), disregard the additional inches, when))~~ six inches ~~((6"))~~ or over, take higher ~~((calculate to the next highest figure (in feet)))~~. The maximum load on any axle in any group of axles ~~((shall not exceed 1.2 times the load given in the above table divided by the number of axles in that group, and))~~ shall not exceed the single axle or tandem axle allowance as set forth in Table A for 11.60.370 ~~((elsewhere. For considering the number of axles in a group, the front axle of a unit supplying motive power need not be included in the axle group.))~~

E. It shall be a violation to operate any vehicle upon the streets and alleys equipped with two ~~((2))~~ axles spaced less than ~~((seven ()))~~ 7 ~~((3))~~ feet apart, unless the two ~~((2))~~ axles are so constructed and mounted in such a manner as to provide oscillation between the two ~~((2))~~ axles and that either one ~~((1))~~ of the two ~~((2))~~ axles will not at any one time carry more than the maximum gross weight allowed for one ~~((1))~~ axle specified in this ~~((section))~~ Section 11.60.370. ~~((RCW 46.44.041)))~~

Section 8. Section 11.60.420 of the Seattle Municipal Code, last amended by Ordinance 112092, is amended as follows:

11.60.420 Maximum gross weight-Tire factor ((-))

A. Subject to the maximum gross weights specified in Section 11.60.370, no person shall operate any vehicle upon a street or alley with a gross weight, including load, upon any tire concentrated upon the surface of a street or alley in excess of 600 ((five hundred fifty (550))) pounds per inch width of such tire ((, up to a maximum width of twelve inches (12")), and for a tire having a width of twelve inches (12") or more there shall be allowed a twenty percent (20%) tolerance above five hundred fifty (550) pounds per inch width of such tire))). An axle manufactured after July 31, 1993, carrying more than 10,000 pounds gross weight must be equipped with four or more tires. An axle carrying more than 10,000 pounds gross weight must have four or more tires, regardless of date of manufacture. Instead of the four or more tires per axle requirements of this Section 11.60.420, an axle may be equipped with two tires limited to 500 pounds per inch width of tire. This Section 11.60.420 does not apply to vehicles operating under oversize or overweight permits, or both, issued under Section 11.23.220 or RCW 46.44.090, while carrying a nonreducible load.

B. The following equipment may operate at 600 pounds per inch width of tire: (1) A nonliftable steering axle or axles on the power unit; (2) a tiller axle on firefighting apparatus; (3) a rear booster trailing axle equipped with two tires on a ready-mix concrete transit truck; and (4) a straddle trailer manufactured before January 1, 1996, equipped with single-tire axles or a single axle using a walking beam supported by two in-line single tires and used exclusively for the transport of fruit bins between field, storage, and processing. A straddle

trailer manufactured after January 1, 1996, meeting this use criteria may carry 515 pounds per inch width of tire on 16.5 inch wide tires.

C. For the purpose of this ~~((section))~~ Section 11.60.420, the width of tire in case of solid rubber or hollow-center cushion tires, so long as the use thereof may be permitted by the law, shall be measured between the flanges of the rim. For the purpose of this ~~((section))~~ Section 11.60.420, the width of tires in case of pneumatic tires shall be the maximum overall normal inflated width as stipulated by the manufacturer when inflated to the pressure specified and without load thereon. ~~((RCW 46.44.042))~~

Section 9. Section 11.82.180 of the Seattle Municipal Code, enacted by Ordinance 108200, is amended as follows:

a. The total weight on and including the wheels of the trailer or trailers or cargo extension shall not exceed ~~((forty percent-))~~ 40 percent ~~((%))~~ of the gross weight of the towing vehicle when connected to the trailer or trailers; and

b. The combination of vehicles consisting of the towing vehicle and its total towed load~~((;~~)) is capable of complying with the performance requirements of Section 11.84.040.
