C. The fees for the following special hazards permits are established in Schedule C. See Table C for 22.602.045.

Special Hazards Permits

Fees for special hazards permits are established in Schedule C (See Table C for 22.602.045). In some

cases these fees are based on the quantity of hazardous material stored and/or handled at the site and the relative risk posed by each material.

1. Definitions:

a. “Quantity Range Number,” as established in the Quantity Range Table below, is a number between 1 and 2 that is assigned to a hazard category based upon the amount of hazardous material located at the site.

QUANTITY RANGE TABLE

QUANTITY RANGE NUMBER	SOLIDS (Pounds)	LIQUIDS (Gallons)	GASES (Cubic Feet)
1	0-550	0-55	0-1,000
1.25	>550-5,500	>55-550	>1,000-5,000
1.5	>5,500-27,500	>550-2,750	>5,000-50,000
1.75	>27,500-55,000	>2,750-5,500	>50,000-100,000
2	>55,000	>5,500	>100,000

b. “Assigned Risk Factor,” as established below, is a number between 1 and 1.5 assigned to each hazard class and category of hazardous material indicating the relative hazard posed by materials in that hazard category and the potential nature of controls required by the Fire Code.

Hazard Class	Assigned Risk Factor	Hazard Class	Assigned Risk Factor
Aerosol products	1.3	Organic peroxides	
Cellulose nitrate	1.3	Unclassified	1.5
Combustible fiber	1.2	Class I	1.4
Combustible liquids		Class II	1.3
Class II	1.2	Class III	1.2
Class III-A	1.1	Class IV	1.0
Class III-B	1.0		
Compressed gases		Oxidizers	
Highly toxic	1.5	Class 4	1.5
Pyrophoric	1.4	Class 3	1.4
Flammable	1.4	Class 2	1.2
Unstable	1.4	Class 1	1.1
Oxidizing	1.4	Pyrophoric liquids and solids	1.3

Toxic	1.3	Toxic liquids and solids	1.2
Corrosive	1.3	Unstable (reactive) liquids and solids	
Corrosive Liquids and Solids	1.1	Class 4	1.5
Cryogenic Fluids	1.3	Class 3	1.4
Explosives	1.5	Class 2	1.3
Fireworks	1.4	Class 1	1.0
Flammable liquids, Class I	1.4	Water-reactive materials	
Flammable solids	1.3	Class 3	1.5
Highly toxic liquids and solids	1.5	Class 2	1.3
Magnesium	1.3	Class 1	1.0

c. “Fixed permit cost” is the minimum cost for the Seattle Fire Department to issue a hazardous material permit. The fixed permit cost is \$288.

d. “Base permit fee” is determined by multiplying the sum of the products of the quantity range number and assigned risk factor for each hazard class by the fixed permit cost and is represented by the following equation:

$$\text{Base permit fee} = [\Sigma (Q_1)(R_1) + (Q_2)(R_2) \dots] [F]$$

Where:

Q = The quantity range number.

R = The assigned risk factor.

F = The fixed permit cost of \$288.

When an individual material has multiple hazards, only the hazard presented by the hazard class that has been assigned the highest risk factor shall be considered in the fee calculation.

Example:

XYZ Company stores 50 gallons of gasoline and 200 gallons of 50% nitric acid.

Gasoline is classified as a Class I flammable liquid, which has an assigned risk factor of 1.4. Nitric acid (50%)

is classified as both a corrosive liquid and a Class 2 oxidizer. Because 50% nitric acid presents two separate hazards (corrosive and Class 2 oxidizer) only the Class 2 oxidizer hazard is considered in the fee calculation because it has an assigned risk factor of 1.2 compared to the 1.1 risk factor assigned to corrosives.

$$\text{Base permit fee} = [(1)(1.4)_{\text{flammable}} + (1.25)(1.2)_{\text{Class 2 oxidizer}}] \$288.$$

$$\text{Base permit fee} = \$835.20.$$

Schedule C fee worksheet-based permits shall be renewed at one-half the permit origination fee or \$288, which is the minimum renewal fee, whichever is greater. ² This temporary permit is valid for six months and is issued to a facility placed under a long-term compliance plan while the facility works towards full compliance with the Code. The fee is calculated to be half of the annual permit fee of the annual permit that will be issued to the facility once compliance is achieved. This permit cannot be renewed but additional 1070 permits can be issued as needed to cover the entire compliance plan period. ³ This permit is valid for 24 months and is renewed on a biannual basis. □

L. Fees for certification examinations are established in Schedule L. Each examination fee listed under Schedule L includes one test and one opportunity to retake the test under the following “re-test” conditions: the person taking the examination does not pass the examination the first time and the “re-test” occurs within 90 calendar days of the original test. Upon successfully passing a certification examination, and upon providing evidence of current State of Washington certification if required by State law for that certification type, the person who took the test will be certified by The City of Seattle for that certification type for one year. The certification may be renewed for two subsequent years at no cost to the licensee. The licensee will, however, need to demonstrate continued competence and continue to comply with State regulations where applicable as a condition of certification renewal. The renewal of the license will be denied if the Seattle Fire Department becomes informed and verifies that the licensee no longer meets the qualifications for the license. Testing is required once every three years.
